activities responsible for changes in prevalence can be difficult due to the large number of prevention efforts at any one time. The intent is to ensure that prevention methods and programs are effective and provide a feedback mechanism to improve programs and enhance Marine Corps prevention strategies. The RAND Corporation will create a logic model to link program activities and efforts to various short-term, intermediate, and long-term outcomes. Based on this logic model, RAND will identify which measures already exist and which new measures should be incorporated into the program to measure SAPR Program effectiveness. This effort is leading the way to provide a comprehensive assessment of SAPR initiatives.

2. LOE 2—Investigation—The objective of investigation is to “achieve high competence in the investigation of sexual assault.”

2.1 Summarize your efforts to achieve the Investigation Endstate: “investigative resources yield timely and accurate results.” (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

In FY16, the Naval Criminal Investigative Service (NCIS) refined the implementation of the Department of Defense (DoD) Special Victim Investigation and Prosecution (SVIP) initiative to provide timely, unbiased investigations while ensuring all services are provided to the victims throughout the process. Through the use of a surge strategy with Special Agents and investigators dedicated specifically to the investigation of sexual assault allegations and ongoing collaboration with relevant SVIP partners, NCIS continued to experience a reduction in the sexual assault investigative timelines while maintaining a high standard of investigative excellence.

NCIS is implementing a pilot program to place active duty Marine Corps Special Agents aboard Amphibious Readiness Group (ARG) ships. These fully credentialed NCIS Special Agents will accompany the ARG on deployments and conduct felony level investigations to include all allegations of sexual assault.

NCIS Headquarters (NCIS HQ) conducted a 100% review of all the open reports for investigations of sex-related offenses, domestic violence offenses, and child physical abuse offenses. In addition, a minimum of 10% of all active cases in these categories received a comprehensive program review on a monthly basis. These efforts have allowed potential issues with cases to be identified and resolved at the earliest possible opportunity.

The first line supervisor on each investigation conducts a case review at a minimum of every 30 days during the pendency of the investigation. The second line supervisor is responsible for reviewing all cases at least once every six months. These reviews are submitted and maintained at NCIS HQ. The NCIS Inspector General conducts case inspections every three years.

NCIS investigative timelines are calculated from initial notification until the date all logical investigative leads have been completed and the case has been presented to command for administrative/judicial action. Prior to Fiscal Year 2012 (FY12), investigative timelines were as long as 300 days in some locations. The average timeline for investigations in FY16 was 132 days for Marine Corps cases, which is comparable to the FY15 average of 133 days.

2.2 Provide an update on the expansion efforts for the Special Victim Investigation and Prosecution Capability for MCIOs, to include how Congressional plus-up funding was spent to directly support this program. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 2, #1, p. 6 / DoDI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 2, para 6ac)

Since the expansion of Article 120 of the Uniform Code of Military Justice (UCMJ), the

number of reported sexual assaults investigated by NCIS has increased significantly. The FY16 sexual assault statistics showed an 8% increase in the number of NCIS sexual assault investigations from FY15 to FY16. Overall, there has been a 77% increase in sexual assault investigations since June 2012.

To help offset the increase in sexual assault reporting, the Department of the Navy (DoN) approved 54 new NCIS billets—including 41 special agents and 13 support staff—in July 2013. The Special Agents have completed the nearly six-month Special Agent Basic Training Program at the Federal Law Enforcement Training Center (FLETC) and reported to their assigned field offices, where they have now completed in the Field Training Evaluation Program (FTEP). During the FTEP, new special agents investigate crimes such as larcenies, burglaries, and drug offenses to gain experience and further develop their investigative skills. Although these new special agents are just beginning to investigate sexual assaults, their contributions help mitigate overall workloads.

In order to expand the usage of the SVIP capability in the field, NCIS HQ mandated all investigative open reports document the proper SVIP notifications and list by name the SVIP members who are involved with the investigation. Training on the SVIP requirements has been added to the NCIS Advanced Adult Sexual Assault Investigator Training Program (AASAITP), Advanced Family Sexual Violence Training Program (AFSVTP), and the First Line Supervisor Training Program.

2.3 Describe your progress in enhancing training focusing on special techniques for victim interviewing by investigators of sexual violence. Include efforts to establish common criteria, core competencies, and measures of effectiveness, and to leverage training resources and expertise. (DoDD 5505.19, Establishment of Special Victim Investigation and Prosecution Capability within MCIOs (4 Sep 15), para 3g / DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 2, #3, p. 6)

In FY16, NCIS reevaluated the curriculum for both the AASAITP course and the AFSVTP course. The AASAITP course focuses on providing the necessary training elements mandated by Department of Defense Instruction (DoDI) 5505.18, “Investigation of Adult Sexual Assault in the Department of Defense,” and DoDI 5505.19 “Establishment of SVIP Capability Within the Military Criminal Investigative Organizations.” The goal of NCIS is to provide advanced training to all personnel who could potentially respond to, investigate, and/or supervise the investigation of SVIP offenses. NCIS currently employs 1,050 Special Agents and Investigators, 164 of which are dedicated solely to the investigation of SVIP crimes. Since August 2012, 140 of the 164 dedicated personnel and 449 of the non-dedicated personnel have attended the AASAITP or equivalent advanced training. NCIS continued to work to satisfy these training requirements by conducting nine AASAITP courses in FY16.

NCIS also initiated a Mobile Training Team (MTT) during FY16 to provide refresher training to field agents who completed their advanced training requirements several years ago. The MTT focused on victim interviewing techniques, victim response to trauma, and updates on current sexual assault investigative policy. Additionally, NCIS funded interview training through John E. Reid & Associates to enhance the interviewing skills of agents who respond to allegations of sexual assault.

2.4 Provide an update on your participation in the Defense Enterprise Working Group of Military Criminal Investigation Organizations and Defense Criminal Investigative Service to assess and validate joint investigative technology, best practices, and resource efficiencies benched against external law enforcement agencies. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 2, #4, p. 6)

In partnership with the other Military Criminal Investigation Organizations (MCIOs)—the US Army Criminal Investigation Division (CID) and US Air Force Office of Special Investigations (OSI)—and the Department of Defense Inspector General (DoDIG), NCIS participated in multiple working groups during FY16 focused on updating several key instructions to include DoDI 5505.18, DoDI 5505.03 “Initiation of Investigations by Defense Criminal Investigative Organizations,” and DoDI 5505.14 “Deoxyribonucleic Acid (DNA) Collection Requirements for Criminal Investigations, Law Enforcement, Corrections, and Commanders.” These instructions have a direct impact on investigative policy and provide an avenue for implementing best practices across the MCIOs.

NCIS also participates in a joint effort with U.S. Army CID and U.S. Air Force OSI to develop software for crime scene evidence processing. The software, Evidence Collection Management X (ECMX), was developed from the Federal Bureau of Investigation’s (FBI) crime scene management system and modified to comply with DoD procedures. ECMX allows Major Crime Scene Team members to complete functions via internet enabled devices and links all processes (e.g., photography, sketches, and evidence collection) into one comprehensive report.

Also in collaboration with Army CID and Air Force OSI, NCIS developed the Crime Scene Investigators Training Program (CSITP) at FLETC. The course aims to enhance the crime scene processing skills of Special Agents while providing instruction in the latest methods and technologies to more effectively collect evidence in anticipation of certification requirements in 2020.

2.5 Describe your progress in assessing and coordinating with the United States Army Criminal Investigation Laboratory and Armed Forces Institute of Pathology to improve investigative support and facilitate evidence processing (i.e., turnaround time for processing of Sexual Assault Forensic Examination (SAFE) kits). (Joint Chiefs of Staff Strategic Direction to the Joint Force on SAPR (7 May 12), p. 11)

NCIS established a Forensic Consultant (FC) position in June 2014 at the Defense Forensic Science Laboratory (DFSL) and continued to dedicate an agent full-time to the position in FY16. The FC is assigned to the Forensic Analysis Division and prioritizes case submissions on behalf of NCIS. The FC works with the DFSL staff to conduct a comprehensive assessment upon receipt of evidence. The FC also inventories and inspects the evidence and then builds an examination strategy to ensure the most appropriate testing is conducted.

The U.S. Navy Bureau of Medicine and Surgery (BUMED) has partnered with DFSL to provide quality assurance feedback on Navy and Marine Corps Sexual Assault Forensic Examination (SAFE) kits processed by their facility. Unlike the civilian sector, DFSL does not limit forensic samples submitted, and DFSL is time-bound by the UCMJ to complete forensic evidence analysis within 120 days for “speedy trial.” DFSL staff complete

evidence examinations within an average of 87 days. For comparison, civilian facilities can take between 150 and 160 days to process evidence. All Navy and Marine Corps SAFE kits submitted by Navy SAFE providers to DFSL undergo quality assurance review. Feedback results are shared with the provider submitting forensic evidence and trends are shared with all.

2.6 Describe your efforts to increase collaboration and improve interoperability with civilian law enforcement to include sharing information on Civilian and Military Protective Orders and assure receipt of civilian case dispositions. (DoDI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 4, para 3g)

NCIS field offices have the responsibility to maintain collaborative relationships with law enforcement agencies within their area of responsibility. When investigations of sexual assault fall within the primary jurisdiction of a local law enforcement agency, NCIS may initiate a joint investigation or assist the agency with investigative leads as deemed appropriate. During the course of the investigation, NCIS remains engaged with local law enforcement counterparts and reports the progress of the investigation to command. This enables continued visibility and awareness in the event that civilian authorities defer prosecution to the military or civilian prosecutors decline the case and NCIS decides to pursue additional investigative leads.

Through agreement with the FBI, NCIS enters all Military Protective Orders (MPO) issued during an NCIS investigation into the National Crime Information Center (NCIC) database. This gives local law enforcement agencies access to the MPO information during potential contact with a subject and provides a point of contact when a violation is discovered that otherwise would have gone undetected.

At the initiation of each criminal investigation, NCIS queries the NCIC database along with other databases to obtain background information on the subject of the investigation. Civilian protective orders are included in these queries and are enforceable by NCIS and command. Any violations of civilian protective orders found during an NCIS investigation are reported to the local law enforcement agency and to the command for action.

2.7 Describe your efforts in providing training and guidance for all first responders to a report of a sexual assault that ensures the preservation of evidence and witness testimony. Also, describe the training and guidance specifically provided to law enforcement on victim trauma and the requirement that only the MCIO shall conduct the formal victim interview. Describe any additional training and guidance provided for locations where the arrival of the MCIO will be delayed (e.g., due to mission requirements or a submarine cannot surface for a week). Address how this training and guidance assists law enforcement and commanders in responding appropriately to reports of sexual assaults in these locations. (DoDI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 10, para 7e)

All training for first responders to sexual assault allegations is provided via the AASAITP course. The objective of the course is to standardize the response for all sexual assault investigations. Agents and investigators attending the training receive a four-hour block of instruction that covers the latest investigative techniques for processing a crime scene and

preserving evidence. The instruction includes a practical lab where participants apply the techniques learned in the lesson. The course includes an eight-hour block of instruction focused on the impact of trauma on memory and victim responses to traumatic incidents, to include counterintuitive behavior. Additionally, the course includes multiple-day instruction on the cognitive interview technique that is applicable to both the victim and witness interview process. The cognitive interview lesson is reinforced through the use of instructor evaluated mock interviews.

During the AASAITP course, instruction is provided on the most current sexual assault investigation policy and procedure. This block of instruction addresses the requirement that not only must NCIS conduct the formal victim interview, but the NCIS agent conducting the interview must have completed the advanced training in understanding victim trauma. Participants are instructed that NCIS must initiate an investigation in response to all allegations of sexual assault that occur within their jurisdiction regardless of the severity of the incident.

Unique circumstances that preclude the timely arrival of NCIS agents to an allegation of sexual assault are addressed at the local level. Upon receipt of an allegation where an immediate response is not possible, the local SVIP members would be notified and provided the information that is available concerning the allegation. Upon notification, NCIS would instruct the command on the proper steps to ensure the preservation of evidence and to address any safety concerns on behalf of the victim while reinforcing the need for command to allow NCIS to conduct the formal victim interview.

2.8 Describe your future plans for the achievement of high competence in the investigation of reports of sexual assault by MCIOs.

In addition to continuing the compliance oversight provided by NCIS HQ, in FY17, the NCIS Family and Sexual Violence program plans to automate the open report review process to allow supervisors in the field to access the reviews of their cases in real time in order to immediately identify any deficiencies. These reviews are designed to address the critical elements of a sexual assault investigation that must be completed in the crucial initial stages after receiving an allegation. By allowing field supervisors to correct deficiencies in a timely manner, the overall investigative process for the case is improved.

NCIS will continue to pursue the goal of having all agents and investigators, regardless of discipline, trained in the AASAITP course to ensure trained personnel are consistently available to respond to all allegations of sexual assault. In FY17, qualified agents in SVIP billets will be selected for advanced training at recognized forums such as the End Violence Against Women Conference, the Crimes Against Children Conference, and the Association of Threat Assessment Professionals Conference. These venues provide excellent training opportunities and the chance to network with civilian law enforcement professionals and exchange ideas on best practices.

NCIS will also continue the training program to create a cadre of credentialed, active duty Masters-at-Arms (MAs) serving in NCIS billets. In FY17, four additional MA candidates have been identified to attend the training and serve in NCIS billets on three year orders. This program has the additional benefit of providing trained, experienced MAs who will return to the fleet upon completion of their tour with NCIS.

3. LOE 3—Accountability—The objective of accountability is to “achieve high competence in holding offenders appropriately accountable.”

3.1 Summarize your efforts to achieve the Accountability Endstate: “perpetrators are held appropriately accountable.” (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

The Marine Corps continues its practice of providing qualified individuals possessing the necessary training, leadership, experience, and support to serve in military justice billets and in supervisory roles. Such individuals include trial counsel, defense counsel, Victims' Legal Counsel (VLC), highly qualified experts (HQEs), and commanders and Staff Judge Advocates (SJAs). Individuals in these billets have an important role in ensuring that alleged perpetrators are held appropriately accountable, that justice is served, and that good order and discipline in the Armed Forces is maintained.

Trial Counsel

Before being detailed to a special victim case, the trial counsel must be special victim qualified. This qualification requires the trial counsel to meet certain standards, including time as a trial counsel, experience, training, prior qualification as a general court-martial trial counsel, and previous experience as an assistant trial counsel on a contested special victim case. Once the trial counsel meets the standards to be qualified as special victim capable, the Regional Trial Counsel (RTC) and the Legal Services Support Section (LSSS) Officer in Charge (OIC) review his or her background and experience to ensure they are confident in the counsel's ability to work with victims of sexual assault and to prosecute special victim cases. This guarantees a minimum level of competence for the trial counsel detailed to these sensitive cases.

Marine trial counsel are led and supervised by judge advocates that have a high degree of training and trial experience. Marine Corps supervisory trial counsel billets are coded for the 4409 Military Occupational Specialty (MOS). This means that all supervisory counsel must possess a Masters of Law (LL.M.) degree with a specialty in Criminal Law from a service or civilian school. Additionally, every senior trial counsel is a Special Victim Qualified Trial Counsel (SVTC). Moreover, in the prosecution of sexual assault cases, SVTCs frequently receive the additional support of a member of the regional Complex Trial Team.

In summary, a trial counsel assigned to a case involving an allegation of sexual assault:

- Has contested at least one such case as an assistant trial counsel;
- Is accountable to two levels of supervisors who have earned a LL.M. degree with a Criminal Law specialty; and
- Has access to an HQE with, on average, 20 years of civilian prosecution experience.

Defense Counsel

Defense counsel have a critical role in the accountability process because they defend accused Marines and Sailors facing disciplinary action in order to safeguard the rights of alleged offenders. Within 21 days of assignment to a defense counsel role in the Defense

Services Organization (DSO), judge advocates are required to complete an exhaustive orientation checklist that provides a thorough and broad overview of law, rules, policies, and resources applicable to military defense counsel. The DSO's detailing policy ensures that each alleged offender receives a defense counsel whose training and experience are appropriate for the individual circumstances of the case. Defense counsel receive appropriate supervision through their independent leadership chain. Additionally, they have access to the DSO SharePoint site, which serves as both an information repository and dynamic support network that connects defense counsel with resources and expertise across the Marine Corps.

Victims' Legal Counsel

VLC ensure that a sexual assault victim's interests are appropriately represented throughout the process of holding an alleged offender accountable. Depending on their preference, sexual assault victims can either receive counseling about their legal rights and options or receive representation by a VLC. Before being nominated and certified as a VLC by the SJA to the Commandant of the Marine Corps (CMC), potential VLCs must first be interviewed by their OIC to ensure they have the temperament to work with victims, must undergo a sensitive screening process, and must complete a VLC certification course. Once detailed to represent a victim, VLCs represent the interests of their clients as they participate in the court-martial process and/or certain administrative proceedings involving the alleged offender.

Highly Qualified Experts

Each Marine Corps trial and defense counsel is supported by an HQE. Each HQE supporting trial counsel is a seasoned civilian prosecutor. On average, these HQEs possess 20 years of experience in complex criminal litigation, to include successful trial-level work in sexual assault cases. Trial counsel must consult HQEs within 10 days of receiving a sexual assault case to ensure all avenues of investigation are explored and that they begin to develop an overview of the trial strategy.

Commanders/Sexual Assault-Initial Disposition Authorities (SAIDAs) and SJAs

Convening Authorities in the Marine Corps who serve as Sexual Assault-Initial Disposition Authorities (SAIDA) receive role-specific training and preparation, investigative information, and quality advice before making decisions about the accountability of their Marines and Sailors. The initial disposition authority for sexual assault cases is withheld to the SAIDA, an O-6 Special Court-Martial Convening Authority (SPCMCA), or higher, for the following offenses: rape, sexual assault, aggravated sexual contact and abusive sexual contact in violation of Article 120, Uniform Code of Military Justice (UCMJ); rape of a child, sexual assault of a child, and sexual abuse of a child in violation of Article 120b, UCMJ; forcible sodomy in violation of Article 125, UCMJ; and attempts to commit those offenses in violation of Article 80, UCMJ. Because with few exceptions O-6 level commanders will first serve as O-5 level commanders, the O-5 level convening authorities of today are being trained, prepared, and mentored by current O-6 level commanders.

Each commander is advised by an SJA who is an experienced judge advocate, usually in the grade of O-5 or O-6. The SJA who will advise the SAIDA receives written advice in the form of a Prosecutorial Merit Memorandum (PMM) from a SVTC when evaluating an

allegation of sexual assault. This PMM identifies the strengths and weaknesses of each case and provides a recommended disposition. The Marine Corps first mandated the preparation of a PMM in all sexual assault cases on 9 March 2015, pursuant to Judge Advocate Division Military Justice Practice Advisory 5-15. Trial counsel are required to upload the PMM for each case into the Marine Corps Case Management System.

In addition to consulting with the SJA, the SAIDA must review the report of the investigation and the preliminary hearing officer's report under Article 32, if applicable, and consider the victim's preference for going forward with the prosecution and disposition. Per Rules for Courts-Martial (R.C.M.) 306(e), for cases that occur within the United States, before the SAIDA makes the initial disposition decision, he or she must consider the victim's preference on whether the offense should be prosecuted by court-martial or in a civilian court with jurisdiction over the offense. Per R.C.M. 705, convening authorities must provide victims an opportunity to provide input on any pretrial agreement (PTA) prior to accepting that PTA. When selecting members for a court-martial, convening authorities are instructed to select the most qualified members in accordance with Article 25, UCMJ. And when trial is complete, convening authorities take post-trial action with the assistance and advice of their SJAs to ensure they lawfully hold each convicted offender appropriately accountable.

3.2 Provide an update on SAPR training provided to those who are affiliated with the Special Victim Investigation and Prosecution Capability program (paralegals, trial counsel, special victims' counsel / victims' legal counsel, and victim-witness assistance personnel) for responding to allegations of sexual assault. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 3, #1, p. 6)

MARADMIN 638/15, published 18 December 2015, listed the special victim case litigation training that was provided in FY16 for trial counsel; defense counsel; VLC; legal support Marines; and investigators, to include regional trial investigators. Per the MARADMIN, the "courses ensure all counsel understand the complexities of special victim cases, including digital forensics, physical forensics, medical evidence, ethical obligations, and psychological aspects of special victim cases." The courses were offered over numerous dates and through a variety of Service schools and civilian training events. One of these courses, the Marine Corps Trial Counsel Assistance Program Special Victim Investigation and Prosecution training, included specialized training on sexual assault-related topics for both trial counsel and their enlisted support personnel/paralegals.

In addition, Headquarters Marine Corps (HQMC) HQMC Judge Advocate Division (JAD) organizes training for Victim Witness Assistance Program (VWAP) personnel each year. In FY16, the training was open to all VWAP personnel and included, among other topics, training on pending changes to VWAP, recent and upcoming changes in military justice, and training by HQMC Sexual Assault Prevention and Response (SAPR) on the SAPR Program and interaction of SAPR with VWAP. Other courses on topics such as VWAP roles and responsibilities, the court-martial process, victim advocate-victim privilege, legal assistance available to victims, Victims' Legal Counsel Organization (VLCO), impacts of crime on survivors, and communication with victims, provided additional understanding of the roles of VWAP personnel in responding to allegations of sexual assault.

3.3 Describe your efforts to ensure that the personnel records of Service members

convicted by court-martial, adjudged non-judicial punishment, or other punitive administrative action for a sex-related offense are updated to reflect punitive action taken, as appropriate. (DoDI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 10, para 2d(5)(g))

Per MARADMIN 416/14, published 22 August 2014, the Marine Corps requires that Service members who have been convicted at court-martial or were in receipt of nonjudicial punishment or other punitive administrative action for any offense have a notation to that effect in their official military personnel file. The MARADMIN further requires all commanders or OICs to review their Service members' records currently in their command. Additionally, commanders have a continuing obligation to review the records of each new member as they check into their units. To facilitate this process, the Marine Corps developed an online tool in Marine OnLine that gives commanders the ability to identify and review all personnel records in their units that have legal action remarks. Commanders also have the ability to review online the unit punishment books, records of conviction by court-martial, and administrative counseling entries for the Marines assigned to their commands. The purpose of this review is to "familiarize each [commanding officer] with the sex-related offense history of Marines in their [unit] to reduce the likelihood of repeat offenders escaping command attention."

3.4 Describe your efforts to ensure SARC, SAPR VA, MCIO, and commander knowledge of recent victim rights and military justice updates in FY16. (DoDI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 10, para 7a)

HQMC JAD published five Practice Advisories (PA) in FY16 covering a variety of military justice issues. Specifically, these PAs included topics such as changes to the military justice system from the FY16 National Defense Authorization Act (PA 10-15), changes to the military justice system from Executive Order 13730 of 20 May 2016 (PA 4-16), victim rights and commander considerations (PA 4-16), and changes to the military justice system from Executive Order 13740 of 16 September 2016. These PAs were distributed to the entire Marine Corps judge advocate community, to include trial counsel, defense counsel, VLC, and SJAs. These practitioners have direct contact with Sexual Assault Response Coordinators (SARCs), SAPR Victim Advocates (VAs), Military Criminal Investigation Organizations (MCIOs), and commanders. Additionally, these PAs are available to Department of Defense (DoD)-affiliated personnel through the HQMC JAD public website.

Victims' legal counsel play a key role in protecting victims' rights and working with the aforementioned individuals. Specifically, the Marine Corps VLCO mission statement explains that VLCs are "fully committed to provide legal advice, counseling, and representation to victims of sexual assault and other crimes, and to protect victims' rights at all stages of the military justice process." The Marine Corps VLCs, who are trained and educated on updates to victim rights and military justice, supplement existing victim support provided by SARCs and SAPR VAs and interface with MCIOs and commanders.

Finally, the FY16 VWAP Annual Training included instruction on both victims' rights and military justice updates to both Victim Witness Liaison Officers (VWLOs) and Victim Witness Assistance Coordinators (VWACs), who assist commanders in the fulfillment of

their responsibilities to victims, to include sexual assault victims. The VWAP training materials are posted on JAD's public website to allow VWAP personnel, SJAs, trial counsel, unit legal officers and others to obtain updated training materials that allow them to keep their commanders informed on the recent changes to victims' rights and military justice.

3.5 NGB, provide an update to your efforts to ensure that all Unrestricted Reports of sexual assault (both Title 10 and 32 status) are referred to the appropriate MCIO, civilian law enforcement, or to the NGB Office of Complex Administrative Investigation. (Chief National Guard Bureau Notice 0400 (16 Apr 14), para 1b)

Not applicable to the Marine Corps.

3.6 Describe your current policies and procedures to ensure alleged offenders are provided due process rights and protections afforded by the Constitution and the Uniform Code of Military Justice. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 3, #6, p. 6)

Convening authorities have a central role in protecting the accused Service member's due process rights. Convening authorities balance competing obligations to victims and suspects of crime, especially when the two are both in the commander's unit. Marine Corps policies give commanders several tools to help them in these duties. Before commanders receive disposition advice on a case, their SJA must receive a prosecutorial merit memorandum analyzing the strengths and weaknesses of the case. This overview of the case from the trial counsel's perspective helps the convening authority make a well-informed and objective disposition decision.

The Marine Corps works to protect the due process rights of those accused of crimes by developing policies and training programs that emphasize the principles of justice found in our Constitution, statutes and Executive Orders related to military justice, the Manual for Courts-Martial, and DoD regulations. Service regulations assign specific tasks to ensure that those accused of crimes are aware of their rights and that those rights are properly administered and protected throughout the court-martial process. As many recent changes have substantially modified the rules, roles, and procedures involving victims in the military justice process, the Marine Corps remains focused on identifying mechanisms to implement these changes in a comprehensive, systemic manner consistent with the Constitution and the UCMJ. Defense counsel, trial counsel, and convening authorities and their SJAs all play a crucial role in ensuring the procedural fairness of the military justice process for the accused.

To help ensure a just process for those accused of crimes, the Marine Corps significantly overhauled the manner in which it provides criminal defense services in 2011 by standing up the DSO. The mission of the DSO is to "zealously defend Marines and Sailors facing disciplinary action in order to safeguard the Rights of those who safeguard our nation."

The DSO provides Marine Corps defense counsel an independent reporting structure, as they fall under the operational control and supervision of the Chief Defense Counsel for the delivery of defense counsel services. Additionally, as a critical stakeholder in the military justice process, DSO leadership provides valuable perspectives to regulation and policy changes and is afforded the opportunity to recommend revision of service and

department level changes that affect the due process rights of accused service members. Further, the DSO currently has 17 defense-specific policy memos augmenting the Manual of the Manual of the Judge Advocate General (JAGMAN), Marine Corps Manual for Legal Administration (LEGADMINMAN), and ethical regulations to facilitate strong leadership, effective management, and robust supervision and support for members of the DSO. Due to the DSO's independent reporting structure, judge advocates receive thorough guidance, which assists in the zealous representation of Service members accused of crimes. The DSO also currently employs two HQEs to support defense counsel.

The Rules for Court-Martial and Military Rules of Evidence delineate the requirements that help prosecutors fulfill their ethical duties. To ensure trial counsel remain aware of their obligations as the UCMJ and associated rules change, the Marine Corps rapidly disseminates information through its Trial Counsel Assistance Program SharePoint, publishes Military Justice Practice Advisories, and conducts regional quarterly training and annual headquarters-level training for all trial counsel.

Finally, the Marine Corps Military Justice Branch of HQMC JAD reviews and/or assists in the development of official policies, training materials, and other publications/statements relating to both SAPR and the military justice process to ensure these items do not violate the due process rights of accused Service members, lead to unfair prejudice against an accused Service member, or create actual or perceived unlawful command influence in an accused's case.

3.7 Provide an update on the Special Victims' Advocacy Program that affords legal consultation and representation for Service members, eligible adult dependents, and DoD civilian employees who report being a victim of sexual assault, to include how Congressional plus-up funding was spent to directly support this program. Describe how your Military Service is implementing the Special Victims' Advocacy Program for DoD civilian employees. Provide an update on how you are informing Officers, Non-Commissioned Officers (NCOs), and junior Service members of the availability of Special Victims' Counsels (SVCs)/Victims' Legal Counsels (VLCs). Include your Military Service's metrics for measuring the success of the program. (SecDef Memo (14 Aug 13), *Improving Victim Legal Support*, p. 1 / DoDI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 2, para 6ac / NDAA FY16, Sec 532 / NDAA FY13, Sec 573)

The Marine Corps VLCO provides confidential legal advice and counseling to eligible victims of sexual assault and to all other crimes throughout the military justice process. The VLC provides detailed representation to victims of sexual assault and certain other crimes at Article 32 hearings, filing motions at Article 39a hearings to protect a victims' privacy interest and other representation at court-martial proceedings. VLCs also provide advice and counseling on SAPR programs, protective orders, victim services, and the victim's preference on case resolution.

The USMC VLCO consists of over 30 judge advocates and support staff. Specifically, the VLCO is comprised of 15 full-time, active duty VLCs; 3 auxiliary counsel (legal assistance attorneys who also provide VLC services); 8 civilian support personnel; two reserve VLCs; and the Officer in Charge and Deputy Office in Charge at HQMC. The VLCO has 11 VLC offices, including the 4 regional offices, 1 at every major Marine Corps installation

(Figure 4). By assigning VLCs to our main Marine Corps installations we increase the opportunity for face-to-face interaction with the vast majority of our active duty clients.

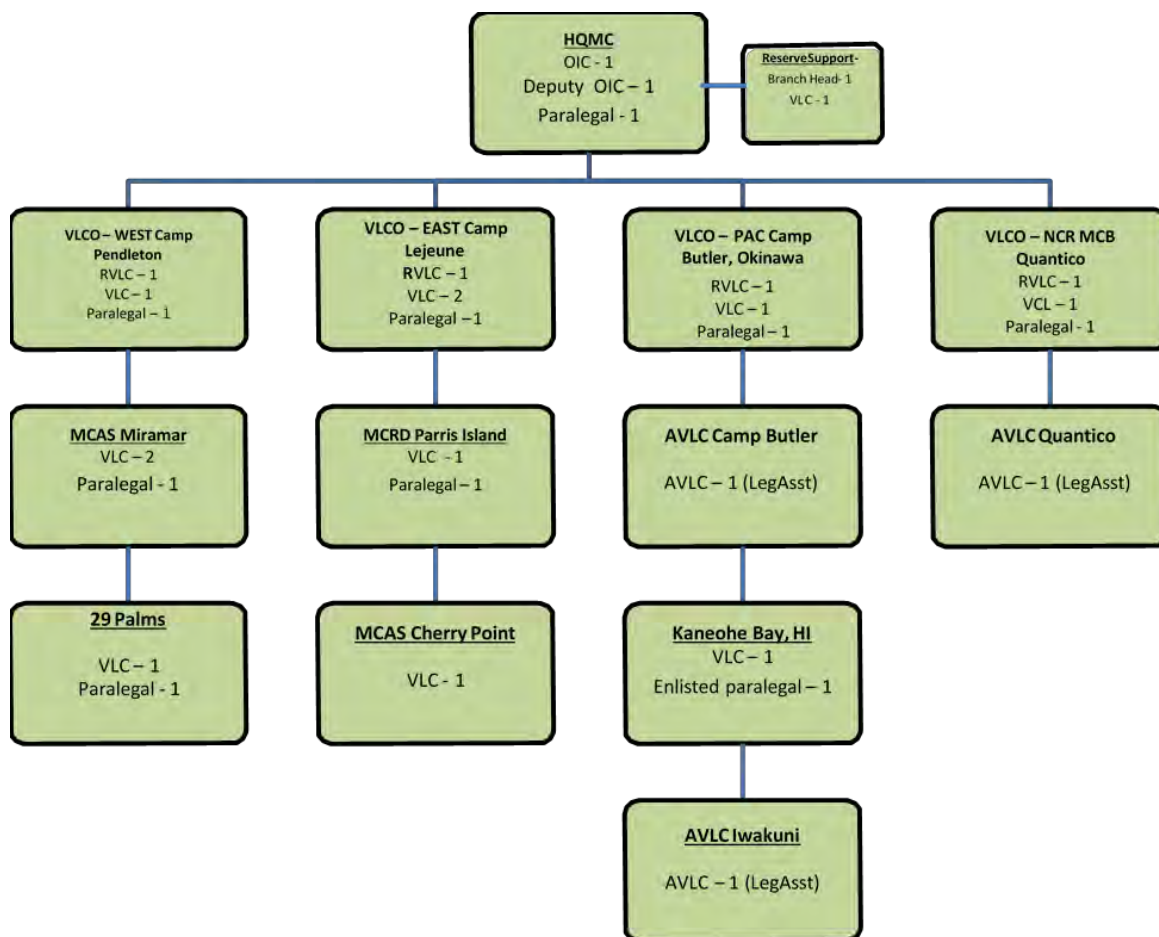

Figure 4. VLCO Locations

Training/Funding

The VLCO has used Congressional plus-up funding to support training for all judge advocates, enlisted paralegals, and civilian paralegals assigned to the VLCO. As a relatively new program and developing practice of law, the VLCO's ability to provide beginning and advanced training courses to counsel and support staff is vital to providing quality victim services. The training includes initial certification training, required for all staff. In FY16 certification courses also included training on representing DOD civilian employees. The VLCO sent all VLC, Marine legal services specialists, and civilian paralegals to the Special Victims Counsel (SVC) Certification Courses at the Army and Air Force Judge Advocate General (JAG) Schools where they sat alongside and received the same training as SVCs and VLCs from all the Services.

The VLCO also sent counsel and support staff to advanced VLC courses that discussed trial advocacy, integrated victim legal services, child victim services, appellate advocacy,

and legal ethics. Judge advocates attended courses on victim advocacy at the National Crime Victim Law Institute. Paralegals attended courses covering legal ethics, research, and writing.

Additionally, in FY16, the VLCO held its second annual organization-wide training. The annual training brought together the entire VLCO to discuss professional responsibility, improvements to the victims' counsel practice within the Marine Corps, recent legal updates and a plenary session covering victim trauma and psychology. The third annual training will occur in February 2017. This year's course will focus on male victims of sexual assault and on practical exercises concerning motion practice, professional responsibility scenarios and engaging with male victims.

Finally, funds have also been used to support the hiring of civilian paralegals who provide critical administrative support and continuity in VLC offices.

Metrics

Our metrics for success look at the demand for VLC services and the ability of VLCs to provide quality services by examining case load and training. Our metrics also review doctrine development, service outreach, and ability to adapt to changes in the victim advocacy law.

Case Load

Similar to last year, the VLCO provided services to approximately 665 victims of crime under the UCMJ. However, in FY16, the percentage of clients who were victims of sexual assault increased while the number of victims of other crimes decreased. In FY16 of the 655 new victim clients, 468 were victims of sexual assault (70%) and 165 were victims of domestic violence (25%). The remaining 32 were victims of various other crimes (5%) such as assault or larceny among others. In FY15 the percentage of sexual assault victims was (60%) and for crimes other than domestic violence (13%). The number of VLCs to clients provides an average case load of approximately 35 cases per VLC. Weekly reports also track the number of victim interviews attended, motions filed, Article 32 hearings attended, administrative separation and other court-martial hearings attended.

Standards and Inspections

In FY16, the Marine Corps published its first VLC Manual signed by Major General John Ewers, the SJA to the CMC. The Manual establishes standard operating procedures for the delivery of victim legal services throughout the Marine Corps. This will ensure that victims from Camp Lejeune, North Carolina, to Marine Corps Air Station Iwakuni, Japan, receive the same level of service. The Manual has also been shared with SARCs, SAPR VAs, SJAs, and commanders so that they may better understand VLC services and the parameters of the VLC program. In FY16, the OIC of VLCO published an inspection checklist for all offices to use in preparation for the OIC's annual inspections. Inspections began in early FY17. The inspections and site visits provide the OIC with information to assess the health of the organization, quality of representation, any needed personnel, and relationships between the VLCs with commanders and command judge advocates.

Outreach

All of the regional offices engage in outreach activities with commanders, SJAs, victim

service providers, and Professional Military Education (PME) instructors. Every week the regional offices report on their outreach efforts to the OIC VLCO. The outreach efforts include providing welcome aboard briefs to new personnel or one-on-one briefs to incoming commanders, courses to new uniformed victim advocates, and joint classes with other military justice counsel. Eligibility for VLC services, the types of services provided by VLCs, and victim privacy are covered in the briefs. In addition, VLCs provide information to base newspapers, write articles for Marine Corps-wide and specific legal publications, and participate in radio interviews discussing the VLCO program.

Developing Areas of Practice and Use of Technology

Metrics also consist of assessing our ability to adapt and to provide resources to counsel and support staff. The OIC, VLCO, has been actively involved in developing areas of VLC practice and increased use of collaboration tools. These areas include representing victim interests through writs of mandamus during the court-martial proceeding and after disposition at appellate proceedings where a victim's privacy right or other Article 6b right are at issue. In late FY16, the Marine Corps Judge Advocate Board approved several changes to the administrative separation process to improve protections of victim privacy such as clarifying the responsibilities for legal advisors concerning victim privacy, recommending the incorporation of protective language in separation regulations concerning victim privacy, adding language for victim recourse when privacy safeguards are improperly handled, and specifically allowing VLCs to attend separation proceedings.

Judge advocates within the VLCO continue to improve the practice by creating and sharing sample forms, protective orders, motions, responses and training materials. Along with the inspection checklist, in FY16, the VLCO also published a check-in guide and ethics guide for paralegals. The Marine Corps will continue to improve the use of technology through SharePoint sites, case management tracking systems, and video-calling systems that increase collaboration between regional offices and increase understanding of recent legal developments.

3.8 Describe your future plans for the achievement of high competence in holding offenders appropriately accountable.

The Marine Corps will continue to leverage its four LSSSs, regional trial structure, the DSO, VLCO, and SJA expertise to administer military justice. The Military Justice Branch at Judge Advocate Division will increase drafting and making products and resources available to trial counsel and SJAs (e.g., offense-specific "Playbooks" and real-time edits to primary legal resources after legislative or policy changes).

The Marine Corps, along with the Navy, is currently in the final stages of development of the Naval Justice Information System (NJIS). NJIS will improve communication between investigators, counsel, and commands and standardize military justice documents and forms. NJIS will be a web-based application that supports the information and reporting requirements of the Department of Navy (DoN) criminal/military justice communities, to include law enforcement, criminal investigations, command actions, judicial actions, and corrections.

NJIS will be an integrated "cradle-to-grave" DoN information system for reporting data ranging from an initial incident to the details of investigation, prosecution, and

confinement. Additionally, NJIS will be used to document courts-martial and nonjudicial punishments, manage desertion activities, and track the review process of the Navy and Marine Corps appellate leave/appellate review activities (NAMALA/NAMARA). NJIS will allow for better case-tracking, coordination, and oversight over SVIP cases.

4. LOE 4—Advocacy/Victim Assistance—The objective of advocacy/victim assistance is to “deliver consistent and effective victim support, response, and reporting options.”

4.1 Summarize your efforts to achieve the Advocacy/Victim Assistance Endstate: “high quality services and support to instill confidence and trust, strengthen resilience, and inspire victims to report.” Include how competency, ethical, and foundational standards established in DoDI 6400.07, enclosure 2, are met.
(DoDI 6400.07, Standards for Victim Assistance Services in the Military Community (25 Nov 13) / DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

In Fiscal Year 2016 (FY16), the Marine Corps persisted in its efforts to improve victim services and increase confidence and trust in the response system, with the knowledge that only when victims are confident in the support they will receive will they come forward to report. Marine Corps victim care services are comprehensive—victims can obtain support immediately via 24/7 support lines; receive assistance via credentialed Sexual Assault Response Coordinators (SARCs) and Sexual Assault Prevention and Response (SAPR) Victim Advocates (VAs); and access world-class medical, counseling, and legal support through qualified professionals.

Department of Defense Instruction (DoDI) 6400.07 Foundational Standards

The Marine Corps ensures the foundational standards prescribed by Department of Defense Instruction (DoDI) 6400.07 are met. SARCs and SAPR VAs continue to provide victims with comprehensive information about the available supportive services, and they also connect victims to these resources. In addition, SARCs notate information about services elected in the DoD Sexual Assault Incident Database (DSAID), including whether victims elected to use Sexual Assault Forensic Exam (SAFE) and Victim Legal Counsel (VLC) services. Victims who file Unrestricted Reports also receive Command support in ensuring timely access to services. The SAPR 8-Day Brief, detailed below, must be completed within eight calendar days and specifies the date all the services were offered to the victim.

DODI 6400.07 Ethical and Competency Standards

To ensure high quality services and support, the Marine Corps equips SAPR professionals with the most up-to-date resources, ranging from SharePoint to support line audits.

Updated SAPR 8-Day Report Form

In FY16, Headquarters Marine Corps (HQMC) SAPR optimized the SAPR 8-Day Incident Report form on the SAPR SharePoint Workspace. The 8-Day Incident Report is a comprehensive checklist used by Commanding Officers to ensure that each victim in their unit who files an Unrestricted Report of sexual assault receives timely access to all supportive services. The revised form was developed in FY16 and released on 1 October 2016 (formalized via GENADMIN) and included several improvements to make the interface more user friendly and comprehensive. When users open the 8-day reporting form, they are prompted to select a victim status (military, SAPR-eligible civilian, or SAPR

non-eligible civilian). Depending on the victim status, the form automatically changes to reflect the required fields that must be filled in for a particular victim. Navigation options on the left side and bottom of the page allow for easy access to different sections of the report. The SharePoint Workspace automatically sends an email to the identified SARC and Commanding Officer once the form is submitted. Additional automatic emails are sent to the first General Officer, Installation Commander, and O6, ensuring leadership is informed of incidents occurring within the command. Figure 5 is a screenshot of the 8-day Incident Report form.

Figure 5. HQMC SAPR 8-day Incident Report Form

Installation 24/7 Sexual Assault Support Line Audits

To ensure that the SAPR contact information is accurate and that help is available around the clock for victims of sexual assault, the Marine Corps continued to audit its Installation 24/7 Sexual Assault Support Line monthly in FY16. These audits confirm the support lines are operating according to standards set by the Department of the Navy (DoN). In FY16, 96% of calls were handled properly. A call is considered improperly handled if one or more of the following situations occur:

- The call is not answered by a credentialed advocate who can provide relevant information, maintain confidentiality, and initiate Service-specific advocacy.
- The call is not returned within 15 minutes (when it is not able to be answered immediately, like when the advocate on duty is assisting another victim).
- The call is not forwarded to the back-up service if it is unanswered after five rings.

If a call is not handled properly during the audit, corrective actions are identified by the Installation SARC and provided to HQMC SAPR. The corrective action ensures victims have the necessary victim services and that the installations are in compliance with program standards.

Department of Defense (DoD) Safe Helpline

The Department of Defense (DoD) Safe Helpline is a DoD Sexual Assault Prevention and Response Office (SAPRO)-contracted service with the Rape, Abuse, and Incest National

Network (RAINN), which also runs a national sexual assault hotline. The DoD Safe Helpline has been designated as the mandatory default backup for all 24/7 Sexual Assault Support Lines. This backup capability ensures all calls that are forwarded to the DoD Safe Helpline are answered by sexual assault professionals who can provide victims with immediate crisis support and referrals. In addition to forwarded calls, the DoD Safe Helpline may be accessed by calling 877-995-5247 or by going online to this address: www.safehelpline.org.

- Each social media post by HQMC SAPR contains a “call to action;” in other words, it contains a link to a supportive service relevant to that social media post. During FY16, users were connected to the DoD Safe Helpline. The Digital Engagement Marines at the Office of United States Marine Corps Communications track the data for each social media post and are able to provide the metrics of how many people were connected to supportive resources as a result of the post.

MARADMIN 285/16 Methods to Report Retaliation and Resolution Process

A collaborative effort of the Inspector General of the Marine Corps (IGMC), HQMC Judge Advocate Division (JAD), HQMC SAPR, and the Naval Criminal Investigative Service (NCIS), the message defines retaliation, to include restriction, reprisal, ostracism, and maltreatment. It also provides guidance on the various avenues available for reporting or seeking assistance on retaliation. (See Section 6.2 for more information.)

MARADMIN 300/16 FY16 Victim-Witness Assistance Program (VWAP) Training

In order to ensure proper training of those personnel involved in Victim-Witness Assistance Program (VWAP), HQMC JAD sponsors annual training on the proper implementation of VWAP. The training provided regional and installation program managers (Victim Witness Liaison Officers [VWLO]) and other Marine VWAP representatives with a basic understanding of the Marine Corps VWAP, the roles and responsibilities of supervisors and other personnel under the VWAP, and how to properly assist victims of crime.

Annual Training

Annual training is provided to our SARCs and SAPR VAs to ensure the consistency and continuity of the SAPR mission and vision and to provide our SARCs and SAPR VAs with current training that enhances their victim care capabilities. Not only does this training ensure competency standards are met, it also educates SAPR personnel regarding the required ethical standards, including how to protect Personally Identifiable Information (PII), how to respect the victims’ rights, and how to understand their responsibilities and the implications of their actions. All digital communication is encrypted to protect PII. The DSAID case number is used to reference a victim rather than a name in order to provide an additional safeguard.

4.2 Describe your current oversight processes over SAPR, to included reviewing credentials, qualifications, continuing education, inappropriate behavior, and revocation of certification, if appropriate. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 4, #1 &15, p. 7)

Credentialing

In FY16, HQMC SAPR continued to monitor the credentialing status of its SAPR personnel to ensure that the Marine Corps is meeting its congressional requirements. The bulk of the credentialing process resides with the SARCs in the fleet, who review DoD Sexual Assault Advocate Certification Program (D-SAACP) applications for accuracy, appropriate credentialing level, and proper screening. Three sources capture data elements critical for reviewing credentials, qualifications, and continuing education efforts for our SAPR personnel:

- National Organization for Victim Assistance (NOVA) tracks the status of all new applications and renewals for D-SAACP credentialing.
- DSAID tracks credentialed SARCs and SAPR VAs and their continuing education efforts, as well as their duty status (active/inactive).
- Marine Corps Human Resources management software (PeopleSoft) tracks the majority of civilian SAPR full-time personnel.

Credentialing is an ongoing task to meet quarterly deadlines for both new applicants and renewal of credentialed SAPR personnel.

SAPR Advocacy Specialist

HQMC SAPR employs a SAPR Advocacy Specialist whose primary duties include oversight of the SAPR credentialing, approval of continuing education, suspension/revocation process, and reinstatement. This specialist is the point of contact for any potential violations that could lead to suspension or revocation concerns. During FY16, the SAPR Advocacy Specialist collaborated with the Compliance Section and developed a Critical Risk Analysis with HQMC Internal Controls. This protocol is specific to Marine Corps actions required when violations have occurred and allows for more oversight of SAPR personnel. The SAPR Advocacy Specialist provides a monthly D-SAACP roster to the fleet for tracking purposes, verifies SAPR personnel credentialing status monthly, and serves as a cross check access provided to SAPR workspaces through the HQMC SAPR Functional Systems Section. The SAPR Advocacy Specialist is the lead for reviewing continuing education requirements and approving continuing education for the fleet. During FY16, the SAPR Advocacy Specialist piloted a new Learning Management System (LMS) for continuing education. Implementation is expected during FY17.

Qualifications and Continued Education

SARCs organize, facilitate, and track continuing education; DSAID is the record of management for continuing education. SARCs can develop continuing education training, submitted through the SAPR Advocacy Specialist, who reviews for content and verifies that the training will meet the requirements for continuing education. Marine Corps Order (MCO) 1752.5B requires all SARCs and SAPR VAs to obtain 16 hours of continuing education annually to ensure that they meet the required DoD standard of 32 hours every two years to renew their credentials. SARCs continually review the number of continuing education hours their advocates have obtained to ensure they have completed or are on track to meet these requirements. SAPR VAs must submit a valid 40-hour Marine Corps VA training certificate signed by a Marine Corps SARC to receive access to the SAPR VA SharePoint Workspace. To receive access to DSAID, SARCs must additionally submit: Marine Corps SARC training certificate, date of background check, appointment letter,

proof of web-based DSAID training, and most current PII training certificate.

Procedures to Address Inappropriate Behavior and Revocation Process

Reports of sexual assault involving SAPR personnel trigger a Commander's Critical Information Requirement (CCIR), which is routed through HQMC and the DoN SAPRO and to the Secretary of Defense (SecDef). SARCs and SAPR VAs who are under investigation or found to have engaged in inappropriate behavior, committed a punitive offense, or violated the code of conduct/ethics will have their certification suspended and/or revoked and access to SAPR SharePoint workspaces and DSAID (if applicable) immediately rescinded. The SARC or SAPR VA is notified that his or her ability to perform SAPR duties has been suspended. If the investigation substantiates the allegations and if there is a nexus between the misconduct and the duties of the SAPR VA, his or her certification will be revoked in writing by the Commander. The SARC or SAPR VA must then sign the revocation letter; the letter also includes the process to appeal the Commander's action. HQMC SAPR is provided a copy of the signed revocation letter from the SARC, which is forwarded to both DoD SAPRO and NOVA. HQMC SAPR annotates the revocation within its credentialing database and properly tracks all revocations. HQMC SAPR also maintains a copy of the report, along with the signed suspension/revocation letter.

4.3 Describe your current progress to ensure SAPR personnel meet D-SAACP screening requirements prior to attending your Military Service's SAPR certification training. (DoDI 6495.03, Defense Sexual Assault Advocate Certification Program (D-SAACP) (10 Sep 15), Encl 3)

HQMC SAPR has provided best practices regarding training, including personnel having local background checks prior to attending the SAPR training while awaiting the adjudication of their National Agency Check with Inquiries (NACI). Credentialing cannot occur until the SARC has verified the acceptable results of the NACI are provided to leadership. Leadership screens all candidates, and uniformed candidates are subject to a review of their military records. Individuals are also screened on the National Sex Offender Registry.

HQMC SAPR sends a weekly D-SAACP Application Status Report to SARCs so they can monitor the status of certification applications, including those that have been approved. The report provides the SARCs with the most up-to-date status of each application, which includes the dates of submission, approval dates, expiration dates, and the applicant's experience level. In this way, SARCs can ensure that all SAPR VAs under their purview are credentialed prior to performing official victim support duties.

4.4 Describe your Military Service's efforts to encourage SARCs and SAPR VAs to renew their certification at a higher level in order to increase the quality of victim assistance providers. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

HQMC SAPR provides best practices for the renewal of SAPR personnel. SAPR personnel are encouraged to renew the certification at a higher level to ensure that their experience is documented properly. Civilian personnel are encouraged to provide their renewal certification at a higher level to their human resources and respective

commanders to establish their level of expertise and experience.

The Marine Corps encourages its SAPR personnel to stay current in the field and engage with victims of sexual assault, both within their responsibilities as a SARC and/or SAPR VA and within the civilian community. For example, SARCs and SAPR VAs are encouraged to volunteer at their local civilian rape crisis and/or women centers to obtain additional sexual assault advocacy hours and experience. These hours and experience will count towards a higher level of certification.

In addition to enhancing our professional qualifications, volunteering within the civilian sector ensures that SAPR personnel are able to maintain a high standard of care and build important relationships with civilian advocacy services. Through these relationships, military victims of sexual assault can be easily referred to civilian services if desired.

Our SARCs and SAPR VAs are also encouraged to attend on-site sexual assault related trainings that focus on adult victims, advocacy, and prevention. It is also highly recommended that SAPR personnel participate in scenario-based training that enhances or teaches new skills.

4.5 Describe how you addressed any challenges that SARCs and SAPR VAs have in obtaining continuing education training, to included training on emerging issues and victim-focused trauma-informed care. (DoDI 6495.03, Defense Sexual Assault Advocate Certification Program (D-SAACP) (10 Sep 15), Encl 3, para 3)

To continue to successfully guide victims through a comprehensive response system and provide them with compassionate, multidisciplinary support, SARCs and SAPR VAs must be provided with up-to-date training. This includes providing annual training required for SARCs and VAs to satisfy DoDI 6495.02 and to ensure consistent implementation of the Marine Corps SAPR Program.

To ensure that Marine Corps SARCs and SAPR VAs obtain the required continuing education to maintain and renew their certification, HQMC SAPR provides SAPR personnel with yearly opportunities to earn all of their required continuing education. In previous years, HQMC SAPR hosted a centralized annual training event for all of our SARCs and civilian SAPR VAs via a three-day event that included both internal and external subject matter experts. In FY16, HQMC SAPR encouraged all SARCs and civilian SAPR VAs to attend the NOVA conference in August in Atlanta, GA, where they were able to earn the required continuing education. To complement this event, HQMC SAPR hosted two-hour train-the-trainer skill building sessions that focused on facilitation versus lecture, identifying common pitfalls when public speaking, and providing positive replacement behaviors for common public speaking errors. Those in attendance received continuing education for their participation.

4.6 Describe your continued efforts to ensure that the 24/7 DoD Safe Helpline has accurate contact information for on-base SAPR resources (i.e., Chaplains, SARCs, Military Police, and Medical Personnel). (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 4, #2, p. 7)

The Marine Corps works closely with the DoD Safe Helpline to ensure the installation-specific information posted on the DoD Safe Helpline website locator tool is up-to-date and comprehensive. To this end, in FY16 the Marine Corps released a SAPR Dashboard,

an online portal where SARCs verify and update contact information for all first responders in their area of responsibility on a monthly basis. These first responders include SARCs, SAPR VAs, chaplains, legal assistance personnel, medical resources, and military police.

HQMC SAPR employs a SAPR Advocacy Specialist who conducts unannounced audits of 24/7 Installation Sexual Assault Support Lines and 24/7 DOD Safe Helpline contact information. SARCs are required to contact the programs listed on the Helpline to ensure accurate information is marketed. Additionally during HQMC Inspector General (IG) inspections, inspectors ensure that the SAPR contact information is accurately marketed.

4.7 Describe your efforts to make Service members aware of SAPR resources, such as the DoD Safe Helpline. (DoDI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 2, para 6af(1) / Encl 3, para 1k & 1m)

The Marine Corps remains committed to ensuring that our Service members are cognizant of all of the SAPR resources available to them. This includes all official command and installation websites (both .mil and .org) clearly and prominently identifying the Installation 24/7 Sexual Assault Support Line and DoD Safe Helpline telephone numbers within three clicks of the homepage. In addition, all printed SAPR VA posters display the applicable Installation 24/7 Sexual Assault Support Line phone number and the DoD Safe Helpline number/logo. Annual SAPR training also provides all Marines with information regarding SAPR services, including who can maintain the confidentiality of a disclosure of sexual assault.

The Marine Corps has extended its outreach efforts to publicize its SAPR resources beyond these communications required by policy. For example, the Marine Corps continued its social media campaign, with monthly posts related to sexual assault on the official Marine Corps social media pages, including Facebook, Twitter, Instagram, Vine, and YouTube. Four of our FY16 posts were specifically designed to inform victims of sexual assault about supportive services and provided links to the DoD Safe Helpline website. In addition, another two posts in FY16 provided those who experienced retaliation as a result of reporting a sexual assault with a link to the Marine Corps Inspector General website. The United States Office of Marine Corps Communications tracks metrics for all social media posts to include how many click-throughs there are to the supportive services linked in each post.

In early FY16, HQMC SAPR began publicizing information about SAPR services and topics on the new Marine Corps Community Services (MCCS) Forward website, which is the official website of Marine Corps Community Services. MCCS Forward is a dynamic, digital news publication that focuses on topics and services universally important to Marines and family members. HQMC SAPR has developed the following articles for publication on MCCS Forward, all of which point to the SAPR page for further information:

- Marine Corps Recipient of the DoD Sexual Assault Prevention Innovation Award
- How 24/7 Support Lines Make a Difference
- Wear Denim to Combat Sexual Assault Myths
- SAAPM Is Right Around the Corner!
- The SAAPM Poster Contest is on!
- Marines: Always Faithful, On and Off the Battlefield

- CMC and SMMC Message: Prevent and Stop Retaliation
- Raising Awareness One Event at a Time: SAAPM Wrap-Up
- Marines Step Up and Take a Stand Against Sexual Assault
- Who will be the DoD Sexual Assault Prevention Award Winner?
- Marine Corps Sexual Assault Response Coordinator Wins DoD Award

The SAPR Monthly Snapshot also features special articles about SAPR resources. For example, we have published articles about procedural changes to the SAPR Program (MARADMIN 607/15), the SARC Dashboard, outreach efforts to men who are sexually assaulted, and resources for those who may have experienced retaliation.

4.8 Describe your efforts to ensure the requirement for both male and female victim input into the development of your Military Service SAPR policy. (SecDef Memo (1 May 14), *Improve Reporting for Male Victims*, p. 2) / GAO Report 15-284, *Actions Needed to Address Sexual Assaults of Male Service Members* (March 2015), p. 20)

The Marine Corps is committed to receiving input from victims of sexual assault into the development of SAPR policy and initiatives. HQMC SAPR uses the results of external surveys and focus groups that seek the input of Marine victims of sexual assault, including Workplace and Gender Relations Survey for Active Duty Members (WGRA). Direct victim feedback from these surveys helps the Marine Corps focus its target outreach and risk reduction activities, as well as understand which programs are helpful and effective. The results from these surveys also reveal areas that need to be improved upon and inform future development of SAPR policy and programs.

SecDef Memo, dated 3 Dec 2014, directed the Services to enhance first-line supervisor skills and knowledge with regard to SAPR and the 2015 Commandant's Planning Guidance emphasizes the importance of developing NCOs as the primary leaders of first-term Marines. As a result, HQMC SAPR hosted two SAPR Non-Commissioned Officer (NCO) Summits with the goal of enhancing first-line supervisor skills and knowledge with regard to SAPR. The Summits were framed across five functional areas: myths and misconceptions, barriers to reporting, retaliation, suicide, and alcohol with specific reference to differences between males and females with regard to sexual assault. The NCOs then formed working groups and developed Courses of Action (COAs) pertaining to each of these five areas. The COAs developed by the NCOs are informing policy, future trainings, and prevention materials.

4.9 Describe your efforts to improve response to male victims, to include implementing and monitoring methods to improve reporting of male sexual assault allegations. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 4, #14, p. 7)

In FY16, the Marine Corps continued its efforts to improve response to male victims of sexual assault. HQMC SAPR created a communications plan, informed by research, intended to outreach to males. Part of that outreach involved a social media campaign in FY16 designed to raise awareness regarding males who are sexually assaulted as well as connect males to the appropriate resources. At the headquarters level, the Marine Corps has facilitated a research-based and comprehensive approach to preventing sexual assault that considers all affected Marine populations, including male victims.

During FY16, HQMC SAPR made a concerted effort to outreach to male Service members to bring awareness to the issue, combat myths and misconceptions, address barriers to reporting, and link Marines to supportive services. Initiatives included, but were not limited to, identifying and reviewing research on male sexual assault; coordinating with external Subject Matter Experts (SMEs); infusing male-specific content into SAPR training; and an extensive communications strategy that focused on awareness, outreach, prevention, and supportive services. FY16 data suggest that our efforts to reach out to male victims is having an effect—the number of reports made by male victims increased by 17.7% between FY15 and FY16.

The Defense Equal Opportunity Management Institute (DEOMI) Organizational Climate Survey (DEOCS), discussed in Section 1.12, is used to monitor perceived potential barriers to reporting for both male and female Marines. These trends are reported quarterly in the SAPR Monthly Snapshot to SAPR personnel and commanders, who are provided with talking points about barriers to reporting and feature articles on outreach to male victims. Barriers to reporting specific to male victims have also been incorporated into HQMC SAPR training. In an effort to provide further education and improve response to male victims, many critical thinking case scenarios are intentionally gender neutral to challenge Marines to focus on responding and supporting a person regardless of his or her gender.

An upcoming study, *Evaluating Best Practices for Interacting with Male Marines Who Experienced a Sexual Assault*, will (a) identify best practices that SAPR professionals use when interacting with male victims of sexual assault and (b) gain an understanding of expert SAPR Professionals' observations of male Marines' perceived barriers and facilitators to filing a formal report of sexual assault. In FY16, the HQMC SAPR Research Section began planning and conducting interviews with SARCs and VAs across five Marine Corps installations to conduct this study. This study will be completed and analyzed in FY17. Pending approval of findings, HQMC SAPR will develop and implement tools that reflect the best practices for working with male victims.

4.10 Provide your policy for facilitating requests from victims, who report a sexual assault, for accommodations during mandatory SAPR training (e.g., an alternate training setting to prevent re-victimization). (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 4, #16, p. 7)

The Marine Corps recognizes that some of the content presented in SAPR training courses has the potential to be distressing for some individuals, including all victims of sexual assault, not just those who have filed reports. As a result, all personnel conducting SAPR training are required to inform those in the class that they have the ability to leave the course and return only when ready. Personnel also provide resources for supportive services at the beginning of each course and introduce themselves as SAPR VAs who are available at any time to provide confidential help and assistance.

SAPR VAs are trained that it is important to prepare for the possibility of someone experiencing emotional distress as a result of SAPR training. As a result, they are provided with strategic solutions, including having another SAPR VA available and standing in the back of the training space so that, if a person needs to leave the training, support and (if necessary) an offer of SAPR services can be provided immediately. If

extra personnel are not available to help at the training, SAPR VAs are encouraged to pay close attention for anyone exiting the training and not returning. The SAPR VA can then follow up with support and offer SAPR services immediately after the brief. SARC's can also offer to complete the training with a victim in a one-on-one setting at a slower pace.

4.11 Describe your progress to improve victim care services and conduct Case Management Groups at Joint Bases, in Joint Environments, and for the Reserve Components. For the Reserve Components, describe Military Service's actions to promote timely access to SARC's by members of the National Guard and Reserves. Describe how you addressed any recurring challenges (if any) your Military Service may have had in this area. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 4, #11, p. 7)

In support of continued efforts to operationalize the SAPR Program execution with the larger Joint Force, HQMC SAPR participated in the review of the Joint Base Common Output Level Standards (COLS) as part of the Case Management Working Group hosted by DoD. Review and assessment of the SAPR program within Joint Environments is continuous. At the enterprise level, the Marine Corps collaborates with Sister Service representatives on a regular basis and discusses impact of policy and training on joint environments as part of the ongoing dialogue with members of the SARC Advisory Committee (SAC). Fleet-level oversight is provided by the Marine Forces (MARFOR)-level SARC established at Marine Corps Installations Command (MCICOM). During FY16, HQMC SAPR participated in working groups facilitated by the DoD that were focused on joint-base collaborations and the effective execution of the SAPR Program. The Marine Corps, while not the lead on any joint base, collaborates with the joint base Commander to ensure that victims receive comprehensive care regardless of Service affiliation. This is accomplished by the Marine Corps participation in the joint base CMGs. The development of Memorandums of Understanding (MOUs) at joint bases establishes the roles and responsibilities of each Service.

The Marine Forces Reserve (MARFORRES) SAPR Program provides consistent care and referrals to all Marines and Sailors, regardless of duty status. Available medical and investigative services vary depending on duty status; however, SAPR services are always available. MCO 1752.5B applies equally to the Active and Reserve Forces. MARFORRES has a 24/7 Sexual Assault Support Line that provides immediate telephonic crisis response to all active duty and reserve component Marines/Sailors assigned to the 161 Marine Reserve Sites throughout the United States, including Alaska, Hawaii, and Puerto Rico. The MARFORRES Support Line is staffed on a rotating basis by the MARFORRES SARC, the four Major Subordinate Command (MSC) SARC's, and two civilian SAPR VAs located at MARFORRES Headquarters in New Orleans. All Reserve Sites are mandated to post the MARFORRES SAPR 24/7 Sexual Assault Support Line as well as the DoD Safe Helpline throughout the common areas of their facilities. All Marine Corps Reserve Sites are required to have at least one credentialed and appointed uniformed SAPR VA assigned to the site to respond in-person to victims of sexual violence as well as to provide required annual training. Many of the Reserve Sites have multiple credentialed uniformed SAPR VAs, totaling more than 300 assigned throughout MARFORRES.

In addition to the required curriculum included in the standard 40-hour SAPR VA Training,

MARFORRES SAPR VAs are instructed on how to create professional relationships with civilian services near the standalone Reserve Sites. Because many Reserve Marines do not reside in close proximity to their home training centers, the MARFORRES SAPR VAs are trained to seek services near and far with the support of their SARCs. When appropriate, relationships are formalized with written agreements.

The sites have MOUs with other SAPR military services and agreements with rape crisis centers in their localities that establish relationships for victims' services. Sexual assault victims can access SAPR services by calling the MARFORRES SAPR 24/7 Sexual Assault Support Line, contacting their unit's SAPR VA directly, calling the DoD SAFE Helpline, or notifying their chain of command. No matter how the report is received, a referral will be made to the local SAPR VA to provide immediate in-person response. SAPR VAs are required to answer all calls within 15 minutes and to respond in person within two hours of notification.

Given the structure of MARFORRES, there are recurring challenges that impact the SAPR Program. The dispersed nature of the commands and their subordinate units demands flexibility to overcome obstacles to providing services. To ensure the SAPR VAs are prepared to provide services in the MARFORRES environment, the initial SAPR VA training is provided quarterly for the new SAPR VAs at Headquarters in New Orleans. This involves funding, coordination, and preparation for the attendees' travel. SARCs and Commanders have gone to great lengths to ensure that most, if not all, SAPR VAs are active duty in order to avoid any potential gap in coverage. MSC SARCs also remain available by telephone 24/7 and by traveling to locations throughout MARFORRES as needed, to both support the SAPR Programs and to provide individual victim support.

As the SMEs, each MARFORRES SARC travels throughout the country to complete required inspections and ensure the SAPR Programs within each command are fully functional. The time spent traveling to the sites takes each SARC out of the office for extended periods of time. However, it gives each SARC an opportunity to make a connection with leadership at the various sites that they may not have made otherwise and address any program issues that arise. SARCs remain accessible via their cell phones and computers while they are away, and they coordinate coverage with other MSC SARCs to ensure the Marines and Sailors always have timely access to SAPR services.

4.12 Describe your current progress to inform Officers, NCOs, and junior Service members about your Military Service's expedited transfer request policy. (DoDI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), para 4o)

During FY16, revisions to SAPR training and education curriculum has been in full development. These curricula include a description of expedited transfers to educate each Marine at his or her level of responsibility. At each level, the education is focused on the basic policy and how the process occurs. As we progress through the ranks, the focus shifts to how to support victims who elect a transfer and correcting myths about the process (e.g., a victim just trying to get out of a deployment).

Throughout various fleet engagements with Staff Sergeants, First Sergeants, and Master Gunnery Sergeants, expedited transfers was a key topic. Discussions focused on how the

fleet and leadership viewed the process, the benefits of the transfers, and the policy challenges those Marines face. During the NCO Summits, the NCOs described what they knew of the expedited transfer policy, and HQMC SAPR took the opportunity to educate them on any misconceptions. These interactions with the fleet are shaping how the HQMC SAPR Implementation Section educates and informs Marines of this important policy. The Commanders Course has a case scenario focused on the expedited transfer process in the read-ahead materials and has a section dedicated to the process during the facilitated training. In FY16, HQMC SAPR began developing hip pocket guides and critical thinking case scenarios that include expedited transfer requests in an effort to educate the fleet on the policy. These products will be released to Marines in FY17.

4.13 In consultation with your SARCs, list the number of victims who reported a sexual assault, if any, whose medical care was hindered due to lack of SAFE kits, timely access to appropriate laboratory testing resources, mental health counseling, or other resources. Describe the measure(s) your Military Service took to remedy the situation. (NDAA FY06, Sec 596 / DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

No victims experienced hindered medical care in FY16.

4.14 Provide information on how you addressed problems or challenges, if any, with assigning SAPR personnel to handle unrestricted or anonymous reports of sexual assaults made by prisoners in a Military Confinement Facility. Additionally, describe your use of the DoD Safe Helpline as an anonymous reporting resource for prisoners. (Prison Rape Elimination Act (4 Sep 03) / Presidential Memorandum, Implementing the Prison Rape Elimination Act (17 May 12))

The Marine Corps SAPR Program fully supports the ability for confined Service members to make an Unrestricted Report at each confinement facility's location and provides SAPR advocacy services when requested.

To ensure Marine Corps Confinement Facilities are in compliance with Prison Rape Elimination Act (PREA) requirements, a dedicated office was established under HQMC Plans, Policy, and Operations. The Marine Corps PREA Manager coordinates the dissemination of guidance and protocols and provides oversight for all Marine Corps confinement facilities. A telephonic reporting procedure has been verified through the local SARC by correctional staff at each Marine Corps confinement facility.

The DoDI 6495.02 SAPR Program Procedure does provide the use of the DOD SAFE Helpline and the reporting options are Unrestricted and Restricted Reporting. Service members in a "confined status" may not give a Restricted Report under PREA but may use the option to report anonymously. The anonymous method of reporting provided by the DOD Safe Helpline will result in an Unrestricted Report when initiated from a confinement facility, and will not afford the reporting party to remain anonymous as required by PREA. As a result, the Marine Corps has identified a substitute procedure for anonymous reporting through the local installations IG Office. The reporting individual may remain anonymous and investigation procedures are initiated as required by PREA. To further institute the DoD Safe Helpline as an alternate 24/7 anonymous reporting method, the DoD Safe Helpline has established a system to forward anonymous reports to

the local installation's IG office where the allegation has been reported.

Installation SARCs and SAPR VAs are available to address any issues and concerns with prisoners in the event a prisoner opts to file an Unrestricted Report. Installation programs work closely with the Military Confinement Facilities to ensure prisoners are informed about SAPR and how to access SAPR personnel or the DoD Safe Helpline.

In an effort to support access to SAPR information, Marine Corps Military Confinement Facilities have worked within the confines of their requirements to enable prisoners to access the DoD Safe Helpline and maintain audio privacy. The phone system is programmed to recognize the DoD Safe Helpline number. When that number is called, the call is not recorded; the system does record the fact that the number was dialed.

Prisoners may face challenges accessing the DoD Safe Helpline as a result of the rules and regulations of the Military Confinement Facility. Prisoners may only be authorized to use the phone during personal time in the facility's daily schedule. If the prisoner chooses to call in an incident and wants to make an anonymous report, he or she would need to wait until the arranged times. Additionally, some prisoners may believe that their phone calls are being recorded or that they must have funds in their account to make the call. Every effort is made to offset this misperception by SAPR information pamphlets, briefs, and posted information.

4.15 Describe your leadership-approved future plans to deliver consistent and effective victim support, response, and reporting options.

The Marine Corps SAPR Program aims to support Marines who are victims of sexual assault, from the time a report is filed to the conclusion of services. Our victim care services are comprehensive: victims can access support immediately via 24/7 Support Lines; receive assistance via credentialed SARCs and SAPR VAs; and obtain world-class medical, counseling, and legal support via qualified professionals. Marines can report incidents and access supportive services at any time, including years after an incident occurred. If a victim chooses to file an Unrestricted Report, care does not stop when a Commander disposes of the case. SARCs, SAPR VAs, medical professionals, and counselors continue to support the victim as long as the victim desires services, even if the ensuing investigation determines there is insufficient evidence to proceed to trial, and even if a court-martial returns a not guilty verdict. The investigative and legal outcomes of a case in no way affect the duration or quality of care that the Marine Corps provides to victims of sexual assault.

The Marine Corps constantly develops and improves its victim services, with the goal of delivering consistent and effective victim support, response, and reporting options. To successfully deliver consistent and effective victim support, response, and reporting options, the Marine Corps employs comprehensive training with a goal to remove barriers to reporting while making Marines aware of available supportive services. The message in these training packages is infused with our core values of honor, courage, and commitment. In FY16, the Marine Corps paved the way to implement the following initiatives in the near future, which will help us reach those objectives:

- **SAPR Education Continuum.** The Marine Corps is committed to improving the quality of its education efforts and employs a holistic approach commensurate with

the audience's knowledge and responsibilities. HQMC SAPR is developing curricula for the enlisted schools and officer academies that will be implemented by Training and Education Command (TECOM). Among other things, the continuum will address:

- Barriers to reporting for all victims.
 - Barriers to reporting specific to male victims.
 - Immediate and long-term effects of trauma after a sexual assault.
 - Hormone and biological response (flight, fight, freeze).
 - Each Marine's role in supporting victims who come forward.
 - Maintaining healthy and respectful relationships.
- **Annual Training Revision.** HQMC SAPR intends to revise the annual required SAPR training provided to Marines. In order to best leverage available resources, this effort will be contracted.
 - **SAPR VA Training Revision.** To maintain Marine Corps SAPR personnel at the highest level of effectiveness, the initial training in SAPR victim advocacy is slated for revision and implementation in FY17.
 - **SARC Training Revision.** HQMC SAPR began revising SARC training in FY16, working with MARFOR SARCs to ensure feedback from the fleet is incorporated in the development process. Implementation is expected in FY17.
 - **The Basic School (TBS) SAPR Training.** Training developed in FY16 for implementation in FY17 will mark the first time TBS will have specific SAPR training customized to junior officers. Training objectives include understanding the SAPR Program, the leadership role in the program, and effective use of prevention techniques. Development of this training was a joint effort between HQMC SAPR and Training Command.

These future efforts are all designed to enhance and strengthen Marine Corps victim care capabilities. Our customized outreach efforts aim to address myths and misconceptions that may prevent Marines from reporting a sexual assault.

5. LOE—Assessment—The objective of assessment is to “effectively standardize, measure, analyze, assess, and report program progress.”

5.1 Summarize your efforts to achieve the Assessment Endstate: “responsive, meaningful, and accurate systems of measurement and evaluation into every aspect of the SAPR program.” (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

To assess Sexual Assault Prevention and Response (SAPR) progress and initiatives, the Marine Corps uses both internal and external surveys, focus groups, and other research across all aspects of our SAPR Program. These tools provide valuable insights into the parameters surrounding each reported incident of sexual assault, enabling the Marine Corps to identify overarching trends and evaluate the impact and effectiveness of the SAPR Program. In addition, the Marine Corps employs information from surveys and reports to help pinpoint future prevention, training, and victim care initiatives.

Defense Sexual Assault Incident Database (DSAID)

In Fiscal Year 2016 (FY16), the Marine Corps continued to advance its goal of providing responsive, meaningful, and accurate systems of measurement and evaluation. Subsequently, data collected via the Defense Sexual Assault Incident Database (DSAID) and data calls to the fleet are subject to regular quality assurance checks and audits throughout the fiscal year to ensure that measures of program assessment use the most complete and accurate data possible. Program evaluation is also supported by evidence-based research standards.

DSAID Quarterly Report

The Department of the Navy (DoN) Sexual Assault Prevention and Response Office (SAPRO) conducts a quarterly data call of sexual assault incident data from DSAID. The data call focuses on prevention and highlights several data points from previous years. Headquarters Marine Corps (HQMC) SAPR works with DoN SAPRO to provide data specific to Unrestricted/Restricted Reporting, male and female reporting times, and penetrative and non-penetrative (or contact) crimes.

Installation Prevention Project (IPP)

The HQMC SAPR Program’s internal evaluation is supported by evidence-based research standards. We also support Department of Defense (DoD) level surveys and assessment initiatives, such as the Installation Prevention Project (IPP), which takes a multiyear look (three to five years) at selected units aboard Marine Corps Base (MCB) Camp Lejeune to identify and understand successful sexual assault intervention policies and installation and community risk factors. HQMC SAPR provided guidance to shape the project, keeping it consistent with best practices in research and ensuring that the project could be implemented in the Marine Corps.

Inspections

HQMC SAPR continued assisting the Inspector General of the Marine Corps (IGMC) with inspections as part of its oversight activities. The IGMC conducts an average of 25

inspections annually, translating to an average of 2 IGMC inspections per month. SAPR SMEs devote 44% of their time assessing program effectiveness using a Functional Area Checklist (FAC).

Surveys

The Defense Equal Opportunity Management Institute (DEOMI) Organizational Climate Survey (DEOCS) provides a snapshot of the SAPR climate and relates Marine *perceptions* about topics like publicity of SAPR information, unit reporting climate, barriers to reporting a sexual assault, and bystander intervention. This survey provides direct and indirect insights into the progress in several prevention efforts, including leadership involvement, peer-to-peer mentorship, accountability, organizational support, deterrence, and harm reduction. The HQMC SAPR Research Section examines this data in light of results from the biennial Workplace and Gender Relations Survey for Active Duty Members (WGRA). The results of the 2016 WGRA are expected in Spring 2017.

Installation 24/7 Support Line Audits

HQMC SAPR continued to assess and monitor performance of SAPR Program victim care services, including conducting audits of the Installation 24/7 Sexual Assault Support Lines. HQMC SAPR also supported the DoD Safe Helpline audits of its first responder database.

5.2 Provide an update on oversight improvement activities that assess SAPR program effectiveness. Include frequency, methods/metrics used, findings, and corrective actions taken (e.g., program management reviews and Inspector General compliance inspections). (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

In FY16, the Marine Corps performed the following SAPR Program assessment and oversight activities:

- The Commandant of the Marine Corps (CMC) received weekly reports, which include the number of reports received year-to-date in the operational force and supporting establishment (top-line numbers). The CMC also received detailed reports via the Gouge Sheet and Tone of the Force that include such data points as total reports (Unrestricted/Restricted), reports converted to Unrestricted in the same FY and from previous FYs, prior-to-Service reports, offense types (e.g., sexual assault, rape, abusive sexual contact, attempts to commit offenses), and investigations initiated and completed in the current FY (case disposition information is updated quarterly).
- HQMC SAPR provided ad hoc assessments and data analyses in the form of briefing products and presentations as requested by leadership and the Fleet. For example, leadership asked if the decrease in sexual assault reports in FY16 from FY15 could be related to the total force reduction. Detailed analysis revealed no correlation between the two.
- SAPR Subject Matter Experts (SMEs) continued to assess program effectiveness using the published FAC. The FAC is mapped to policy and provides a standard by which to measure the command on its program implementation. The inspector grades the command using the FAC, provides a holistic analysis of the command's overall implementation of its program, and engages in hands-on training and on-

site recommendations to assist the command in areas identified as needing improvement, if necessary. The intent is to train, teach, find it, and fix it, ensuring that each command inspected benefited from the visit. These inspections also provide HQMC with fleet best practices and critical information to facilitate trend analysis on policy implementation and training to positively impact future iterations.

Final reports are provided to IGMC and also maintained by Marine and Family Programs Division (MF) Internal Controls. The top two findings in FY16 were:

- No Standard Operating Procedures (SOPs) (21% of findings overall).
- Commands not meeting the requirements for minimum number of appointed uniformed SAPR Victim Advocates (VAs) (13% of findings overall).

In addition to hands-on training and collaboration during the inspection, IGMC Augment Inspectors leave notes on best practices and recommendations with the command point of contact to facilitate program improvement. For the way ahead, HQMC SAPR will provide additional guidance and training for the development of functional SOPs, emphasizing the requirement to adapt the template based on the command location and structure. HQMC SAPR will also conduct a 360-degree review of the FAC, in concert with MF Internal Controls, to assess applicability of each inspectable item.

- HQMC SAPR audits Marine Corps Installation 24/7 Sexual Assault Support Lines monthly to confirm that they are operating as intended and that they meet performance standards set by DoN. Results of the audits are reported quarterly in the SAPR Monthly Snapshot. These audits were conducted each month of FY16, with the following end result: 96% of calls were handled properly, while 4% of calls were not handled properly. These results meet and exceed the Department of Navy standards. Calls not returned within the required 15-minute timeframe accounted for the majority of the audit failures. In addition, HQMC SAPR performs a monthly audit of installation websites for SAPR-related Support Line and after-hour phone numbers; in FY16, the Marine Corps passed this audit with a 100% success rate.

5.3 Provide an update on your efforts to ensure integrity of data (i.e., accuracy, completeness, etc.) collected in the Defense Sexual Assault Incident Database (DSAID). (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 5, #2, p. 8)

The Marine Corps undertook extensive efforts to ensure the integrity of data recorded in DSAID for FY16 sexual assault reports. DSAID Program Managers use the DoD's Quality Assurance (QA) tool, which assesses a case-level report from DSAID for missing data and data values that do not match certain logical algorithms (identifying potential errors). This tool is used at least once per month and distributed to the fleet for action. DSAID Program Managers internally keep track of data quality by SARC over time, which is used to alert Marine Forces (MARFOR) SARCs when a SARC in their area of responsibility may be struggling with data entry/quality. DSAID Program Managers also offer assistance and additional training to SARCs as needed based on data quality (or SARC request). Unannounced data audits are also conducted approximately once per month, focusing on specific data points (such as missing victim type, or missing investigative agency data)

and distributing results to SARCs for action.

DSAID Program Managers receive interface reports from DOD (about monthly) that details the interface results for DSAID and Military Criminal Investigation Organization (MCIO) databases (most notably NCIS's Consolidated Law Enforcement Operations Center [CLEOC]). Interface failures are identified and researched in coordination with NCIS Headquarters data analysts to determine the cause of the interface failure. PMs also keep a running list of NCIS investigations and the corresponding DSAID case numbers of "I/titled" or "info only" NCIS case numbers for which no data will interface with DSAID (these are cases without a titled victim).

SARCs are offered two opportunities per month to receive DSAID and data management training from HQMC SAPR data SMEs (optional webinars and simultaneous conference calls) that cover topics such as DSAID best practices, responding to data calls, completing data audit tasks, and addressing data quality in practice.

NCIS HQ data analysts send DSAID PMs a weekly report of all sexual assault investigations initiated in the past week that have Marine Corps equities. PMs then ensure there is a one-to-one match for each (a DSAID case for every investigation or a reason why a DSAID case is inappropriate). These weekly reports are processed by DSAID PMs and missing cases are sent securely to the responsible SARC for entry into DSAID or accountability of why no entry is appropriate; SARCs have 48 hours to comply.

DSAID PMs, Legal Officers, and NCIS analysts meet in person every one to two months to discuss complex cases with data reconciliation issues. These meetings also ensure that there are clear, open lines of communication between the three entities to facilitate expedient data quality reconciliation and problem solving throughout the FY.

HQMC Judge Advocate Division (JAD), which is responsible for the reporting of disposition data in DSAID, uses a comprehensive reporting form for commands, a continuous reporting and review process, and a numerous internal data validation procedures to ensure the integrity of disposition data reported in DSAID. In FY16, the Marine Corps received official approval for its Sexual Assault Disposition Report (SADR), NAVMC 1752, which commands use to report disposition details to NCIS and the Marine Corps Legal officers at JAD. Commands are required to report sexual assault dispositions within two business days of the final disposition. Each SADR is reviewed by a SJA and signed by an O-6 level or higher Sexual Assault Initial Disposition Authority (SAIDA). JAD reviews each SADR for completeness and enters the disposition information into DSAID within days of receiving the SADR to minimize accountability issues and facilitate speedy resolution of any issues identified during the data entry. JAD also requests missing SADRs from commands when NCIS reports that an investigation is complete, but the command has not yet submitted a SADR. Finally, JAD completes quarterly reviews and validations of the disposition data it has reported, in addition to the data validation tasks received from DOD SAPRO.

5.4 Provide an update on your efforts to develop and implement a survey, or leverage existing military training surveys that will provide comprehensive and detailed information to decision makers about sexual assault and other sexual misconduct allegations that occur during initial military training, including basic and subsequent career-specific military training. (GAO Report 14-806, DoD Needs

to Take Further Actions to Prevent Sexual Assault During Initial Military Training (March 2015), p. 44)

The Marine Corps also leverages surveys conducted by DoD, such as the WGRA, to understand the parameters surrounding sexual assault in the Corps in general. The information in these surveys also applies to Marines in basic and career-specific military training. Results from the 2016 WGRA will be available in May 2017.

The single-gender training model, commissioned officer oversight, and command focus are tools used to prevent episodes of sexual misconduct during initial training. Additionally, there are at least three other opportunities where probative questioning revolving around all types of abuse exists. This direct interaction by the appropriately trained staff provides a constant and current assessment of misconduct issues while reinforcing the importance the command places on the well-being and security of Marine recruits.

5.5 Describe your progress in assessing SARC/SAPR VA training effectiveness. Include actions taken to implement training enhancements. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 5, #21, p. 8)

In FY16, HQMC SAPR evaluated existing SARC and SAPR VA training and identified areas in need of revision. HQMC SAPR additionally solicited program feedback, to include training effectiveness, from SAPR professionals at the two-hour Train-the-Trainer session held in FY16 (see also Section 5.1). Revisions to the initial victim advocacy training provided to SAPR VAs began in FY16 with expected completion and implementation during FY17. Refer to Section 4.15 for details on the training revisions.

The HQMC SAPR QA Specialist conducted QA site visits in FY16 to ensure that SARCs were meeting all necessary requirements and that SARCs and SAPR VAs were receiving consistent training. These engagements allowed for assessment of audience reaction to the training. Commanders received an assessment of their SARC's facilitation skills. Additionally during FY16, we invited SARCs from the fleet to work at HQMC SAPR for short periods of time and provide their subject matter expertise in areas of improvements for trainings.

5.6 Describe your efforts to assess compliance of commanding officers in conducting organizational climate assessments for purposes of preventing and responding to allegations of sexual assault. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 5, #17, p. 8)

The climate assessment assists unit commanders in evaluating their unit's equal opportunity and organizational effectiveness areas. Preventing and responding to sexual harassment and sexual assault are inherent to the commander's responsibilities as it affects readiness and welfare of unit members.

Commanders in units of 50 personnel or more conduct a climate assessment within 90 days of assuming of command, and annually thereafter. Commanding Generals use appropriate tracking processes to ensure compliance of such climate assessments. HQMC Equal Opportunity & Diversity Management via the Equal Opportunity Advisor (EOA) community provides the report format. Reports are forwarded to the respective MARFOR Commander for consolidation. MARFOR Commanders submit consolidated

reports to HQMC Equal Opportunity & Diversity Management every FY.

Installation SARCs discuss the resource brief with the commander, emphasizing the importance of conducting a climate survey and sharing that information with their command SARC. Installation SARCs work closely with the EOA who has access to climate surveys and results. Organization climate surveys are tracked widely. The results are provided by command in reference to the SAPR Program. Any systemic issues regarding prevention and response to sexual assault allegations are addressed.

Installation SARCs efforts to assess compliance of climate assessments purpose include but are not limited to the following.

- Seek, receive, and review climate surveys for Installation Commands; review recommendations and support implementation at the unit level.
- Ensure Commanding Officer policy statements are completed and posted with 60 days of assuming command.
- Create and implement standardized SAPR VA and Commanding General's Readiness Inspections (CGRI) Binders for each unit.
- Hold quarterly CGRIs for all units under area of responsibility and unit SAPR VA meetings.
- Monitor completion of required annual training, Take a Stand, Step Up, etc.
- Track command and SAPR VA participation in Case Management Group (CMG) for active cases.
- Ensure policy statements, SARC, SAPR VA, and reporting options posters and resource list are posted in high-traffic pedestrian areas.

5.7 Describe your policy and management control procedures for ensuring that Service members, who reported a sexual assault and are separated for Non-Disability Mental Conditions, are properly counseled, in writing. Additionally, describe how your Military Service ensures that the separations are processed and recorded in accordance with DoDI 1332.14, Enlisted Administrative Separations (4 Dec 14). (DoD IG Report 2016-088, Evaluation of the Separation of Service Members Who Made a Report of Sexual Assault (9 May 16), p. i)

Marine Corps policy directs that whenever a Marine's performance deteriorates or has an adverse effect on others in the unit, commanding officers and subordinate leaders determine the cause of performance deterioration. When a command suspects a physical or mental condition interferes with the Marine's effective performance of duty, the Marine should be referred to an appropriate medical authority. Service policy directs that commanders comply with Department of Defense Instruction (DoDI) 6490.04 when referring a Marine to receive mental health evaluations. Some conditions may warrant that the Marines be provided a reasonable opportunity to correct any performance deficiencies prior to the initiation of administrative separation processing. Commanding Officers, with advice of appropriate medical providers, are directed to make determinations if a Marine warrants a reasonable opportunity to correct deficiencies before separation processing begins. If a commanding officer determines that a Marine's condition is within their control and that Marine displays rehabilitative potential, Service policy directs that the Marine is counseled in accordance with paragraph 6105 of Marine Corps Order (MCO) 1900.16, Chapter 6, and afforded a reasonable opportunity to correct

any deficiencies. If examination by a medical officer confirms that the Marine is suffering from a physical or mental condition apparently beyond the individual's control, and indicates that the condition is not a disability, separation processing may be initiated per paragraphs 6303 or 6304 of MCO 1900.16, Chapter 6, as applicable.

As a matter of policy, the Marine Corps processes Marines diagnosed with and separated for select Non-Disability Mental Conditions (NDMC), including Marines who have reported a sexual assault, under the basis of "Condition Not a Disability," per paragraph 6203.2 of MCO 1900.16, Chapter 6. On 26 November 2013, a substantial revision of MCO 1900.16 was published. The revision standardized the notification procedures for "Condition Not a Disability" separations and included in the Marine's acknowledgment of rights that such conditions do not qualify as a naval service disability. On 7 August 2015, the Marine Corps further updated Service policy in paragraph 6203.2c of MCO 1900.16, Chapter 6, for "Condition Not a Disability" separations, providing additional guidance on the correction of performance deficiencies.

Service policy limits separation of Marines on the basis of Personality Disorder (PD) to situations in which a psychiatrist or PhD-level psychologist has made a written diagnosis that a Marine's ability to function effectively in a military environment is significantly impaired, the diagnosis has been corroborated by a peer psychiatrist or PhD-level psychologist, and the diagnosis has been reviewed by a medical flag officer. The Marine Corps policy does not limit these higher level reviews to only those who have served in a combat zone and is more stringent than required by DoDI 1332.14. Counseling guidelines for PD separations mirror that of Marines separated for "Condition Not a Disability." At this time, the Marine Corps is awaiting procedural guidance from the DoN and the Bureau of Medicine and Surgery (BUMED) regarding the evaluation and processing of administrative separations as the result of NDMC to better align Department and Service policy with the requirements set forth in DoDI 1332.14.

In all cases where the basis (or bases) of separation requires counseling under paragraph 6105 of MCO 1900.16, separation processing may not be initiated until the Marine is counseled concerning deficiencies and afforded a reasonable opportunity to overcome those deficiencies as reflected in appropriate counseling and personnel records. No certain amount of time can be used to define "reasonable opportunity" as this must be determined by commanding officers, with the advice of medical providers, on a case-by-case basis. Rehabilitation efforts must include written notification, specific recommendations for corrective action, comprehensive explanation of consequences of failure to successfully take corrective action, reasonable opportunity for the Marine to undertake the recommended corrective action, and acknowledgment of this counseling. In all "Condition Not a Disability" and PD separation cases, Marines must be informed in writing that the individual's condition does not qualify as a naval service disability.

The Marine Corps takes an additional step, not required in DoD or DoN regulation, to ensure that separation authorities consider all relevant medical information prior to making an administrative separation decision. Paragraph 6110 of MCO 1900.16, Chapter 6, requires a complete separation health physical evaluation to be completed and provided to the separation authority for due consideration of all medical conditions that may have affected the Marine's performance.

The Marine Corps ensures compliance with Service policy through the Service-level Inspector General and Marine Corps Administrative Analysis Team (MCAAT) inspections. These inspection elements are responsible for analyzing the effectiveness of internal audit procedures, regulatory compliance, systems management, internal controls, and other associated requirements. Inspection results are forwarded to appropriate authorities and inspection elements to correct deficiencies, develop educational workshops, seminars, lessons-learned reports, curriculum training, and doctrine development that may be required to ensure Service compliance.

5.8 Describe actions taken to integrate recent survey (e.g., MIJES, WGRR, and QSAPR) and focus group results into your Military Service SAPR policies and training programs. (DoDI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 3, para 1s / Encl 12, para 1f)

HQMC SAPR employs a variety of tools, including surveys and focus groups, to support the prevention of sexual assault in our Corps. The Marine Corps uses measures of performance and effectiveness to identify potential areas of improvement. To best identify these areas, HQMC SAPR contracted RAND to conduct a study in FY17 to assess measures of performance and effectiveness as well as overall progress in the SAPR Program. HQMC SAPR has a multiple-stage, data-driven approach to determining the efficacy of SAPR policies and training programs. In order to make an accurate evaluation of training products, results of focus groups and pre-post training assessments must be both observable and measurable. Attitudes and behavior are closely monitored to determine if training has the desired impact.

Using findings from the 2014 RAND Military Workplace Study on Sexual Assault and Sexual Harassment in the US Military (RMWS), the Marine Corps made great strides in improving outreach to male victims and developing a retaliation prevention and response strategy. Following the release of the DoD Retaliation Prevention Strategy, the Marine Corps developed and published MARADMIN 285/16 on Methods to Report Retaliation and Resolution Process on 6 June 2016. The DoD also formed an inter-Service Retaliation Working Group, with participants from the IGMCMC, the Judge Advocate Division (JAD), Victims Legal Counsel (VLC) and HQMC SAPR. One of the early products of the working group was a Retaliation Prevention Strategy Implementation Plan.

The DEOCS, conducted monthly, provides information on Marine perceptions of high-risk behaviors, barriers to reporting, and retaliation. These results are reported quarterly in the SAPR Monthly Snapshot. DEOCS data also informed the creation of the Join the Conversation Professional Military Education (PME), designed to help increase Marines' recognition of high-risk behavior and situations that could potentially lead to a sexual assault.

5.9 Describe your leadership approved future plans, if any, for effectively standardizing, measuring, analyzing, assessing, and reporting program progress.

In FY16, the HQMC SAPR Research Section requested funds for a study to examine measures of effectiveness for implementation into the Marine Corps. The objectives of the study are to (a) identify measures of effectiveness and performance that have been used to assess SAPR programs and practices and (b) propose which measures the Marine Corps SAPR Program should implement to more accurately determine the impact

of the program's efforts beyond decreases in prevalence.

As a result of this submission, Marine Corps Combat Development Command (MCCDC) Operations Analysis Directorate (OAD) contracted RAND to conduct the study. In FY17, the effort will take place. The expected completion date is late FY17. Implementing responsive, meaningful, and accurate measures of effectiveness and performance will help SAPR ensure that existing programs and practices have the intended effect and outcomes for sexual assault survivors.

The FY17 RAND study to identify measures of effectiveness and performance will help identify progress in overall SAPR programs, beyond prevalence rates. The intent is to ensure that prevention methods and programs are effective and provide a feedback mechanism to improve programs and enhance our own strategies. We will incorporate measures of performance and measures of effectiveness into our trainings, assess the delivery of these trainings, and then determine if SAPR programs/trainings are meeting desired goals. These measures are important for internal improvement of the SAPR Program.

HQMC SAPR will continue to support the efforts of DOD SAPRO, including continued participation in the IPP, a multiyear project aimed to advance our knowledge and understanding of successful sexual assault intervention policies, as well as to identify installation and community risk factors for sexual assault. The results will also help develop actions that leaders can take to mitigate sexual violence.

6. Overarching Tenet: Communication and Policy

6.1 Describe your efforts to post and widely disseminate information on male victim sexual assault prevention and response. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

In an effort to maintain transparency and widely disseminate sexual assault information to Service members, eligible dependents and Department of Defense (DoD) civilian personnel, Headquarters Marine Corps (HQMC) Sexual Assault Prevention and Response (SAPR) developed an internal communication strategy that includes SAPR fleet engagements, a monthly snapshot of SAPR status and reported incidents (the SAPR Monthly Snapshot), and a social media campaign. These communications encompass a range of topics, including male victims, designed to raise awareness of the issue of sexual assault, increase acknowledgement of the issue, and spur behavior change to combat this issue. Many of these products feature elements designed to reach out to male victims.

DoD Safe Helpline and 24/7 Installation Sexual Assault Support Line

The Marine Corps continues to disseminate sexual assault information via traditional communications channels. All official command and installation websites (both .mil and .org) and printed SAPR Victim Advocate (VA) posters display the applicable Installation 24/7 Sexual Assault Support Line phone number as well as the DoD Safe Helpline number and logo. SAPR VAs are required to hang these posters around their area of responsibility, so Marines know who to contact if they experience a sexual assault or need more information about sexual assault. Marine Corps commands and detachments located on a non-Marine Corps military installation display that Sister Service's 24/7 Sexual Assault Support Line and the DoD Safe Helpline on the command/detachment website, posters, and any other appropriate printed material. In addition, the Installation 24/7 Sexual Assault Support Line and DoD Safe Helpline telephone numbers are clearly and prominently identified within three clicks of each Marine Corps and installation homepage.

Training and Education

During the SAPR VA course, SAPR VAs receive a resource list and Installation Sexual Assault Response Coordinators (SARCs) provide relevant materials (posters, public service announcements, etc.) throughout the year. The resource list includes services both on the installation and off the installation that address male sexual assault. Installation SARCs also provide additional training on male sexual violence. Information packets specifically designed for male victims are available on some installation websites. When providing training, SAPR trainers reiterate that sexual assault happens to both male and females. Information on male sexual assault is covered at the annual SAPR training, "Take a Stand" Bystander Intervention Training for Non-Commissioned Officers (NCOs), and "Step Up" Bystander Intervention Training for junior Marines. Statistics on male sexual assault are shared at all SAPR resource briefs with Command Teams and emphasis is placed on the need to understand male sexual violence and the need to reduce the stigma of male reporting.

Local Efforts to Post and Disseminate Information

Our SARCs work diligently to ensure information on male victim sexual assault prevention and response is widely disseminated. Marine Corps Air Station (MCAS) Iwakuni Armed Forces Network (AFN) has a commercial that emphasizes sexual assault occurs to male and females. MCAS Miramar shows a public service announcement in the base theater and ensures equal information and pictures of male and females are marketed throughout the installation.

The primary venue for most outreach efforts is training events. SAPR VAs ensure that they use gender neutral language during training and reinforce the fact that males can be victims of sexual assault. Scenarios are presented orally and attendees are encouraged to recognize the legitimacy of sexual assault as a community issue with males often times as victims. Installation SARCs encourage SAPR VAs who are providing classes to use more male examples when discussing sexual assault.

Some installations host monthly SAPR information booths at the local Marine Corps Exchange, featuring pamphlets on male sexual assault victims. Educational materials such as Pocket Sliders on Male Sexual Assault are offered during routine SAPR training at MCAS Beaufort Corporal's Course training. Focused materials are also placed in bathrooms and other high traffic areas throughout the command and added to the welcome aboard packages.

Additional efforts to disseminate information on male victims include, but are not limited to, the following:

- Monthly Case Management Group (CMG) statistics and annual statistics reports
- Monthly meetings with Command Officer
- Routine dissemination of HQMC SAPR Monthly Snapshot publications
- SAPR Resource and Command Team briefs
- Quarterly Sexual Assault Response Team (SART) meetings

Fiscal Year 2016 (FY16) data suggest that our efforts to reach out to male victims is having an effect—the number of reports made by male victims increased between FY15 and FY16.

6.2 Describe your efforts to post and widely disseminate information on ways to report allegations of retaliation. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

While survey results indicate that Marines as a whole have a positive perception of command climate, retaliation remains an area of concern. Retaliatory behavior is unacceptable, and the Marine Corps has a zero tolerance policy. We recognize the detrimental impact retaliation has on our victims and on unit readiness. A public service announcement from the Commandant of the Marine Corps, NCO Summits, Staff Sergeant Guided Discussions, public service announcements published to social media, MARADMIN 285/16 (Methods to Report Retaliation and Resolution Process), and case management group oversight are among a few of the initiatives HQMC SAPR is using to address retaliation. Information about these initiatives is disseminated to local SAPR programs via the SAPR Monthly Snapshot.

The Marine Corps is committed to both eliminating retaliation in its ranks and supporting those Service members, bystanders, witnesses, and first responders who may experience retaliatory behavior. The DoD Retaliation Prevention and Response Strategy, published in April 2016, outlined five issues to address in this effort: 1) standardizing the definition, 2) closing the gap in knowledge, 3) building strong and supportive systems of investigation and accountability (response process), 4) providing comprehensive support to reporters (response process), and 5) creating a culture intolerant of retaliation.

Actively working to address the aforementioned issues, on 13 May 2016, the Marine Corps Judge Advocate Division (JAD) published a Military Justice Practice Advisory that discussed types of retaliation, avenues for reporting, and considerations when reporting. This advisory providing specific guidance for judge advocate and other legal practitioners.

On 6 June 2016, the Marine Corps published MARADMIN 285/16 on Methods to Report Retaliation and Resolution Process. This was published with the other MARADMINs and is available on the Marine Corps homepage at <http://www.marines.mil/News/Messages/Messages-Display/Article/897999/methods-to-report-retaliation-and-resolution-process/>. This message was a collaborative effort of the Inspector General of the Marine Corps (IGMC), HQMC JAD, HQMC SAPR, and the Naval Criminal Investigative Service (NCIS). The message defines retaliation, to include restriction, reprisal, ostracism, and maltreatment. It also provides guidance on the various avenues available for reporting or seeking assistance on retaliation. The message includes a list of additional resources, references, and points of contact for matters relating to retaliation. This message widely disseminated information on ways to report allegations of retaliation because all MARADMINs are readily accessible to Marines through the internet, applications on personal electronic devices, and unit read boards that are posted in common areas.

Creating a successful reporting process relies on disseminating clear definitions of retaliation. The IGMC has been instrumental in developing DoD-wide definitions, processes, tracking mechanisms, and educational materials in the area of retaliation. The IGMC has overall responsibility in the Marine Corps to ensure that Inspector General (IG) personnel (and the lawyers advising them), who receive complaints of retaliation, are appropriately trained to offer assistance. In order to ensure up-to-date training was disseminated on the latest DoD developments, the IGMC conducted training on retaliation as it relates to reporting a crime with a focus on sexual assault. Attendees consisted of all Marine Corps Inspector General personnel, SAPR personnel, and attorneys, totaling 192 Marines and civilians. The training lasted approximately one hour and was given multiple times to ensure that all IG personnel were able to attend.

As part of this training IGMC reinforced the importance of understanding retaliatory behavior as it relates to reporting a sexual assault and ensuring that we “get this right” so that our Marines do not lose faith in the system. The main part of the training focused on how Command Inspectors General are able to recognize and process complaints that allege retaliatory behavior as a result of someone reporting a sexual assault. SAPR protocols and best practices were reviewed during the training. This training will continue in the future as part of the IGMC training modules given across the Marine Corps at a variety of recurring training venues. Additionally, IGMC is constantly updating the training modules to incorporate new legal retaliation requirements and detail how the IGMC is

processing retaliation complaints via the IG hotline.

SAPR personnel support the dissemination of information regarding methods to report retaliation primarily through briefs and trainings. SAPR VAs are provided with information about retaliation at their SAPR VA course. The resource list includes services both on the installation and off the installation and includes information about retaliation. Installation SARCs also provide commands with information at the command resource brief. Installation SARCs disseminate the monthly SAPR Snapshot to all commanders on the installation. The HQMC SAPR Snapshot addresses current issues such as retaliation and reprisal. There are many avenues to report retaliation. SARCs work closely with IGMC and the Victims Legal Counsel (VLC) to provide information and referral for those who may have experienced retaliation. For example, Installation SARCs partner with VLCs to provide periods of instruction specifically on retaliation at all-hands training events and command briefings. To further support retaliation prevention initiatives, a retaliation information link will be created on installation websites in the upcoming Fiscal Year. Retaliation information has been included on all local SAPR posters and briefs.

Every SAPR brief covers retaliation and how to report it. Every victim of sexual violence is provided information on retaliation, what it is, and how to report. Every victim of sexual violence is asked at least once a month if he or she has experienced retaliation via the safety screening tool. At every CMG, Commanders are asked if victims, SAPR VAs, or SARCs have experienced retaliation. Additionally, new Commanders and Sergeants Majors receive a briefing from an Installation SARC which includes a discussion on retaliation and the appropriate authority for handling the various types of allegations.

The Marine Corps also used social media to disseminate information on retaliation. On 2 May 2016, a Public Service Announcement by the Commandant and Sergeant Major of the Marine Corps posted to the official Marine Corps social media pages of Facebook, Instagram, Twitter, and YouTube. Focused on retaliation, the post reached over 110,000 people and connected interested viewers to the IGMC website.

6.3 Provide an update on your development and implementation of new certification standards for sexual assault medical forensic examiners. (DoDI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 2, para 3c(3)(b))

Sexual Assault Forensic Examiners coordinated training for all examiners to complete the new requirements for certification, which is an additional 40-hour training that is similar to Sexual Assault Nurse Examiner-Adult/Adolescent certification.

In FY16, ten interservice DOD Sexual Assault Medical Forensic Examiner (SAMFE) Training sessions were held at Fort Sam Houston, Texas. The first week of training consisted of 40 hours of classroom time delivered by SMEs who meet the Department of Justice National Training Standards for SAMFE. The second week consisted of hands-on clinical exams using live male and female models. Continuing competencies are required every three years for recertification.

6.4 Describe your ongoing efforts to review, revise, update, and issue policy pertaining to:

- **Safety Assessments for SAPR Program**

- **High-Risk Response Teams**

Were any multi-disciplinary High-Risk Response Team established?

- If so, how many and what was the duration?
- If the High-Risk Response Team was dissolved, explain why?

(DoDI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 5, para 2c / Encl 9, para 2j(3))

Through engaged leadership, the Marine Corps continues to enhance its ability to stop sexual assault from occurring, provide world-class victim care and advocacy, create a positive command climate in which victims feel safe, and hold offenders appropriately accountable. To ensure accurate execution of safety assessments and High-Risk Response Teams (HRRTs), the Marine Corps reviewed and revised Marine Corps Order (MCO) 1752.5B in FY16. The forthcoming revision to MCO 1752.5B in FY17 will clarify Marine Corps policy for safety assessments and codify guidance on the establishment of HRRTs.

Safety Assessments

The DOD Sexual Assault Incident Database (DSOID) is the system of record for all program safety assessments. DSOID Program Managers include Safety Assessment notes as topics in the data audit rotation. This includes examining each case holistically to take into account the expected number of safety notes/completed assessments based on the age of the case. Content of the safety notes is reviewed to ensure that SARCs are complying with HRRT policy requirements. Additional training has been offered to SARCs on how and why safety notes are required in DSOID, which improved compliance with this practice after an identified deficiency in the process.

High-Risk Response Teams

HRRTs are chaired by the victim's immediate Commander and, at a minimum, include the alleged offender's immediate Commander; the victim's SARC and SAPR VA; the responsible Military Criminal Investigation Organization (MCIO) representative, the staff judge advocate, and the Victim Witness Assistance Program (VWAP) representative assigned to the case; the victim's healthcare provider or mental health and counseling services provider; and the personnel who conducted the safety screening. The HRRT makes its first report to the CMG chair and CMG co-chair within 24 hours of activation. The HRRT also reviews the risk factors and takes immediate action to mitigate risks.

Two HRRTs were established in FY16 at Camp Lejeune, North Carolina. The first HRRT lasted for three meetings and was dissolved after the victim received an expedited transfer to remove risk. The second HRRT lasted for four meetings and was dissolved after the victim was transferred to a different unit to remove risk.

6.5 Provide an update on your methods for effectively factoring accountability metrics into commanders' and subordinate leaders' performance assessments.

(SecDef Memo (6 May 13), Enhancing Commander Accountability, p. 2)

The Performance Evaluation System (PES) order addresses accountability in two distinct ways. First, the Performance Anchored Rating Scales (PARS) allow reporting officials to capture leadership metrics in accordance with developing subordinates and ensuring the well-being of subordinates. If commander's fail in addressing specific SAPR related tasks,

reporting officials may use the PARS to document poor performance. Second, reporting officials are required to place a directed comment in every commander's fitness report that discusses an individual's ability to foster a command climate that is non-permissive of misconduct, especially sexual assault.

6.6 Provide an update on efforts to improve overall victim care and increase trust in the chain of command: include initiatives or updates undertaken to reduce allegations of retaliation as a means of increasing reporting and the way in which your Military Service is tracking and accounting for these efforts. (SecDef Memo (6 May 13), *Improving Response and Victim Treatment*, p. 2 / DoD Retaliation Prevention and Response Strategy: Regarding Sexual Assault and Harassment Reports (April 2016), p. 10)

The Marine Corps is committed to providing high-quality and comprehensive care, in which victims can obtain support immediately from SARCs and SAPR VAs via 24/7 support lines; receive compassionate assistance via credentialed advocacy services; and access world-class medical, counseling, and legal support via dedicated professionals. As discussed above in Section 6.2, the Marine Corps is committed to eliminating retaliation in our ranks and creating a safe reporting environment free of retaliatory behavior.

By clarifying the definition of retaliation and the associated reporting process, we ensure commanders have the necessary knowledge and resources to support victims and promote a healthy command climate. At the Commanders Course, HQMC SAPR facilitated town hall discussions, addressing foundational SAPR components, prevention methods, and Marine Corps statistics relating to sexual assault, and the DOD Retaliation Prevention and Response Strategy.

The primary method of tracking the success of our initiatives is through the Defense Equal Opportunity Management Institute (DEOMI) Organizational Climate Survey (DEOCS). HQMC SAPR closely monitors survey results to determine if Marines' perceptions about retaliation change from month-to-month. The results from the 2016 Workplace and Gender Relations Survey for Active Duty Members (WGRA) (expected in May 2017) may also provide insight into the efficacy of our retaliation prevention efforts in 2016.

6.7 Provide an update on your policy for Case Management Group (CMG) Chairs to regularly assess and refer retaliation allegations, made in conjunction with a sexual assault report, for appropriate investigation. Additionally, describe your policy for keeping these retaliation allegations on the CMG agenda for status updates until the victim's allegation is appropriately addressed. (SecDef Memo (3 Dec 14), *Engage Command to Prevent Retaliation*, p. 2 / DoDI 6495.02, *Sexual Assault Prevention and Response (SAPR) Program Procedures* (7 Jul 15), Encl 9)

The Marine Corps adheres to the retaliation and resolution process outlined in MARADMIN 285/16 within the CMG and in conjunction with the IG's office. At every CMG Meeting, the Chair asks the group members if the victim, victim's family members, witnesses, bystanders (who intervened), SARC and SAPR VAs, responders, or other parties to the incident have experienced any incidents of retaliation, reprisal, ostracism, or maltreatment. If any allegations are reported, the CMG chair will ensure action is taken

through the proper authority (e.g., MCIO, IGMC, and Military Equal Opportunity).

HQMC SAPR released a memorandum of record on 15 September 2016, announced via MARADMIN 478/15, formalizing the requirement to regularly assess and refer retaliation allegations to the appropriate investigative authorities. The forthcoming revision to MCO 1752.5B and Retaliation Prevention and Response Strategy will further instruct that all retaliation allegations must remain on the CMG agenda for status updates until the victim's case is closed or until the allegation has been appropriately addressed.

7. Secretary of Defense Initiatives

7.1 Enhance First Line Supervisor Skills and Knowledge: Provide an update on your first line supervisor training that advances a climate of dignity and respect and supports the prevention of potential retaliation associated with reporting. First line supervisors are junior officers, enlisted supervisors, and civilian employees who supervise military members. Address the frequency of the training; policy updates in support of the training; and, how the curriculum emphasizes the importance of engaging subordinates on sexual assault prevention and response; instructs them on recognizing the signs of possible acts of retaliation; and, provides an opportunity to practice leadership skills to promote a healthy command climate. (SecDef Memo, (3 Dec 14), p. 2)

In Fiscal Year 2016 (FY16), the Marine Corps continued to advance a climate of dignity and respect and to prevent retaliation associated with reporting by augmenting all supervisory training to address their role in unit Sexual Assault Prevention and Response (SAPR) Programs. This includes training for all junior officers, junior enlisted supervisors, and civilian employees who supervise military members. All Marines participate in SAPR annual training designated for their specific rank and grade. Additionally, Marines attend specialized training prior to deployment, at the Professional Military Education (PME) schools, and prior to filling a command position. The upcoming revision to Marine Corps Order (MCO) 1752.5B will clarify and outline these training requirements.

HQMC SAPR Non-Commissioned Officer Summits

Secretary of Defense Memo, dated 3 Dec 2014, directed the Services to enhance first-line supervisor skills and knowledge with regard to SAPR and the 2015 Commandant's Planning Guidance emphasizes the importance of developing NCOs as the primary leaders of first-term Marines. As a result, Headquarters Marine Corps (HQMC) SAPR hosted two SAPR Non-Commissioned Officer (NCO) Summits with the goal of enhancing first-line supervisor skills and knowledge with regard to SAPR:

- From 21-23 March 2016, 62 NCOs from I Marine Expeditionary Force (MEF), Marine Forces Reserve (MARFORRES), and III MEF attended a Summit aboard Marine Corps Base (MCB) Camp Pendleton.
- From 3-5 May 2016, 65 NCOs from II MEF, MARFORRES, Marine Forces Southern Command, and Marine Forces Central Command attended the Summit aboard MCB Camp Lejeune.

The Summits were framed across five functional areas: myths and misconceptions, barriers to reporting, retaliation, suicide, and alcohol. The NCOs then formed working groups and developed Courses of Action (COAs) pertaining to each of these five areas. The COAs developed by the NCOs are informing future trainings and prevention materials.

"Take A Stand" Bystander Intervention Training for Non-Commissioned Officers

Our NCOs in the ranks of Corporal and Sergeant receive training called "Take A Stand," which teaches bystander intervention and appeals to their developing sense of leadership.

Originally released in October 2012, “Take A Stand” was revised to incorporate best practices in adult learning theory and instructional design, to reduce the length from three hours to 90 minutes to be in line with typical annual training requirements, and to create additional material for small-group discussions. In addition to a video and PowerPoint based session that will serve as a basic refresher on SAPR concepts, the new “Take A Stand” curriculum will also comprise a 45-minute skill-building session focused on developing the skills expected of leaders. For each training session, instructors will select three role-playing exercises from a total of eight available, each of which focuses on one the following themes:

- Bystander intervention as a leader
- Male victims
- How to teach bystander intervention
- First-line supervisor responsibilities
- Identifying and addressing retaliation
- How to report outside the chain of command
- Countering sexual assault myths and misinformation

The risk of certain behavior is being incorporated throughout these role-playing exercises. For example, one exercise features a Service member who was physically and sexually assaulted in an incident that began as hazing, and participants learn that sexual assaults against men exhibit different patterns than those against women, including being more likely to be part of hazing incidents.

Training for DOD Civilians who Supervise Uniformed Personnel

The Marine Corps requires and provides civilian sexual assault training annually using a program titled “Sexual Assault Prevention: One Team, One Fight,” developed by the Department of the Navy (DoN). This training has several tracks for specific audiences, one of which is for civilian employees who supervise Marines. This training was developed in response to the National Defense Authorization Act (NDAA) 2012 requirement to ensure that SAPR training be provided to members of the Armed Forces and Department of Defense (DoD) civilian employees. This training is approximately one hour in length and consists of a 30-minute video component and 30-minute guided group discussion targeted specifically to applicable audiences. The video includes documentary-style interviews with leaders and Subject Matter Experts (SMEs), as well as three fictional scenarios. The scenarios are short video vignettes that portray different sexual assaults and missed opportunities for bystander intervention specifically relevant to both military personnel and civilian employees. The training also covers the following information:

- Definition of sexual assault.
- Explanation that sexual assault is a criminal offense.
- Explanation of consent.
- Difference between sexual assault and sexual harassment.
- Reporting options for Service members and civilian employees, including advantages and limitations of each option.
- Resources for Service members and civilian employees.

- Prevention strategies, including bystander intervention.
- The impact of sexual assault on victims, commands, and mission accomplishment.

8. NDAA Requirements - Provide your Military Service's update on the following FY15/FY16 NDAA requirements. If the provision has been implemented, indicate "Completed," and provide the implementation date. If the provision has not been implemented, indicate "In Progress" and provide an update (150 words or less), including the projected completion date.

8.1 Review by the Military Service Secretary (at the chief prosecutor's request) of a Convening Authority's decision to not refer charges of certain sex-related offenses for trial by court-martial.

“(c) REVIEW OF CERTAIN CASES NOT REFERRED TO COURT-MARTIAL.—

“(1) CASES NOT REFERRED FOLLOWING STAFF JUDGE ADVOCATE RECOMMENDATION FOR REFERRAL FOR TRIAL.—In any case where”; and (2) by adding at the end the following new paragraph:

“(2) CASES NOT REFERRED BY CONVENING AUTHORITY UPON REQUEST FOR REVIEW BY CHIEF PROSECUTOR.—

“(A) IN GENERAL.—In any case where a convening authority decides not to refer a charge of a sex-related offense to trial by court-martial, the Secretary of the military department concerned shall review the decision as a superior authority authorized to exercise general court martial convening authority if the chief prosecutor of the Armed Force concerned, in response to a request by the detailed counsel for the Government, requests review of the decision by the Secretary.

“(B) CHIEF PROSECUTOR DEFINED.—In this paragraph, the term ‘chief prosecutor’ means the chief prosecutor or equivalent position of an Armed Force, or, if an Armed Force does not have a chief prosecutor or equivalent position, such other trial counsel as shall be designated by the Judge Advocate General of that Armed Force, or in the case of the Marine Corps, the Staff Judge Advocate to the Commandant of the Marine Corps.” (FY15 NDAA, Sec 541)

Complete. This was implemented on 9 March 2015 via Military Justice Practice Advisory 5-15, which required observation of the following provision:

Elevated Review of Disposition Decisions by Deputy Director, Judge Advocate Division (JAD), Military Justice and Community Development (MJCD): In any case involving rape or sexual assault in violation of Article 120, Uniform Code of Military Justice (UCMJ), forcible sodomy in violation of Article 125, UCMJ, or attempts to commit any of these offenses in violation of Article 80, UCMJ, which has been reviewed by the next superior commander (after the Staff Judge Advocate [SJA] pursuant to Article 34 recommended a sex-related offenses not be referred and the convening authority did not refer) and a sex-related offense is not referred to a court-martial, the detailed trial counsel may request that Deputy Director, JAD MJCD, review the case file and determine whether to seek Secretary of the Navy review of the case file. The detailed Trial Counsel shall forward this request through the Regional Trial Counsel (RTC). If the Deputy Director, JAD MJCD determines the case has prosecutorial merit, Deputy Director,

JAD MJCD, shall forward the case file to the Secretary of the Navy for review.

8.2 Inclusion of disposition results in future annual reports.

(a) SUBMITTAL TO SECRETARY OF DEFENSE OF INFORMATION ON EACH ARMED FORCE.—Subsection (b) of section 1631 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (10 U.S.C. 1561 note) is amended by adding at the end the following new paragraph:

“(11) An analysis of the disposition of the most serious offenses occurring during sexual assaults committed by members of the Armed Force during the year covered by the report, as identified in unrestricted reports of sexual assault by any members of the Armed Forces, including the numbers of reports identifying offenses that were disposed of by each of the following:

“(A) Conviction by court-martial, including a separate statement of the most serious charge preferred and the most serious charge for which convicted.

“(B) Acquittal of all charges at court-martial.

“(C) Non-judicial punishment under section 815 of title 10, United States Code (article 15 of the Uniform Code of Military Justice).

“(D) Administrative action, including by each type of administrative action imposed.

“(E) Dismissal of all charges, including by reason for dismissal and by stage of proceedings in which dismissal occurred.” (FY15 NDAA, Sec 542)

Complete. Since Fiscal Year 2014 (FY14), the Marine Corps has submitted the information required by FY15 NDAA, Section 542, to the Department of Defense by entering all required disposition data for each incident of sexual assault into the Defense Sexual Assault Incident Database (DSAID). Service-specific case-level data is evaluated and analyzed by Defense of Defense (DoD) Sexual Assault Prevention and Response Office (SAPRO). Using this Service-level data, DoD SAPRO produces a series of reports, matrices, metrics, and nonmetrics that form the quantitative basis for the Marine Corps report each FY.

8.3 Confidential review of the terms or characterization of discharge for Armed Services members who report being victims of sexual assault.

(a) CONFIDENTIAL REVIEW PROCESS THROUGH BOARDS FOR CORRECTION OF MILITARY RECORDS.—The Secretaries of the military departments shall each establish a confidential process, utilizing boards for the correction of military records of the military department concerned, by which an individual who was the victim of a sex-related offense during service in the Armed Forces may challenge the terms or characterization of the discharge or separation of the individual from the Armed Forces on the grounds that the terms or characterization were adversely affected by the individual being the victim of such an offense.

(b) CONSIDERATION OF INDIVIDUAL EXPERIENCES IN CONNECTION WITH OFFENSES.—In deciding whether to modify the terms or characterization of the discharge or separation from the Armed Forces of an individual described in subsection (a), the Secretary of the military department concerned shall instruct boards for the correction of military records—

<p>(1) to give due consideration to the psychological and physical aspects of the individual's experience in connection with the sex-related offense; and</p> <p>(2) to determine what bearing such experience may have had on the circumstances surrounding the individual's discharge or separation from the Armed Forces.</p> <p>(c) PRESERVATION OF CONFIDENTIALITY.—Documents considered and decisions rendered pursuant to the process required by subsection (a) shall not be made available to the public, except with the consent of the individual concerned.</p> <p>(d) SEX-RELATED OFFENSE DEFINED.—In this section, the term “sex-related offense” means any of the following:</p> <p>(1) Rape or sexual assault under subsection (a) or (b) of section 920 of title 10, United States Code (article 120 of the Uniform Code of Military Justice).</p> <p>(2) Forcible sodomy under section 925 of such title (article 125 of the Uniform Code of Military Justice).</p> <p>(3) An attempt to commit an offense specified in paragraph (1) or (2) as punishable under section 880 of such title (article 80 of the Uniform Code of Military Justice).</p> <p>(FY15 NDAA, Sec 547)</p>	<p>Complete. The Board for Correction of Naval Records (BCNR) is an entity of the Department of the Navy. Refer to the response in the Department of the Navy FY16 Annual Report on Sexual Assault in the Military.</p>
<p>8.4 Applicability of sexual assault prevention and response and related military justice enhancements to military service academies.</p> <p>(a) MILITARY SERVICE ACADEMIES.—The Secretary of the military department concerned shall ensure that the provisions of title XVII of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113–66; 127 Stat. 950), including amendments made by that title, and the provisions of subtitle D, including amendments made by such subtitle, apply to the United States Military Academy, the Naval Academy, and the Air Force Academy, as applicable. (FY15 NDAA, Sec 552)</p>	<p>Not applicable to the Marine Corps.</p>
<p>8.5 Sexual assault prevention and response training for administrators and instructors of Senior Reserve Officers' Training Corps.</p> <p>The Secretary of a military department shall ensure that the commander of each unit of the Senior Reserve Officers' Training Corps and all Professors of Military Science, senior military instructors, and civilian employees detailed, assigned, or employed as administrators and instructors of the Senior Reserve Officers' Training Corps receive regular sexual assault prevention and response training and education. (FY16 NDAA, Sec 540)</p>	<p>Not applicable to the Marine Corps.</p>

Unrestricted Reports

MARINE CORPS FY16 UNRESTRICTED REPORTS OF SEXUAL ASSAULTS IN THE MILITARY		
A. FY16 REPORTS OF SEXUAL ASSAULT (rape, sexual assault, aggravated sexual contact, abusive sexual contact, forcible sodomy, and attempts to commit these offenses) BY or AGAINST Service Members. Note: The data on this page is raw, uninvestigated information about allegations received during FY16. These Reports may not be fully investigated by the end of the fiscal year. This data is drawn from Defense Sexual Assault Database (DSAID) based on Service affiliation of the Sexual Assault Response Coordinator (SARC) who currently manages the Victim case.	FY16 Totals	
# FY16 Unrestricted Reports (one Victim per report)		553
# Service Member Victims		436
# Non-Service Member Victims in allegations against Service Member Subject		117
# Relevant Data Not Available		0
# Unrestricted Reports in the following categories		553
# Service Member on Service Member		225

E. SUMMARY OF UNRESTRICTED REPORTS WITH INVESTIGATIONS		FY16 Totals
E1. Subjects in Unrestricted Reports Made to Your Service with Investigation Initiated During FY16		
Note: This data is drawn from DSAID based on Service affiliation of the SARC who currently manages the Victim case associated with the investigation and Subject below.		
# Investigations Initiated during FY16		518
# Investigations Completed as of FY16 End (group by MCIO #)		357
# Investigations Pending Completion as of FY16 End (group by MCIO #)		161
# Subjects in investigations Initiated During FY16		560
# Service Member Subjects investigated by CID		3
# Your Service Member Subjects investigated by CID		2
# Other Service Member Subjects investigated by CID		1
# Service Member Subjects investigated by NCIS		349
# Your Service Member Subjects investigated by NCIS		326
# Other Service Member Subjects investigated by NCIS		23
# Service Member Subjects investigated by AFOSI		0
# Your Service Member Subjects investigated by AFOSI		0
# Other Service Member Subjects investigated by AFOSI		0
# Non-Service Member Subjects in Service Investigations		15
Note: Non-Service Member Subjects are drawn from all CID, NCIS and AFOSI investigations involving a Victim supported by your Service.		
# Unidentified Subjects in Service Investigations		99
Note: Unidentified Subjects are drawn from all CID, NCIS and AFOSI investigations involving a Victim supported by your Service.		
# Service Member Subjects investigated by Civilian or Foreign Law Enforcement		6
Note: Service Member Subjects are drawn from Civilian or Foreign Law Enforcement investigations involving a Victim supported by your Service.		
# Your Service Member Subjects investigated by Civilian or Foreign Law Enforcement		5
# Other Service Member Subjects investigated by Civilian or Foreign Law Enforcement		1
# Non-Service Member Subjects in Civilian or Foreign Law Enforcement Investigations involving a Victim supported by your Service		1
# Unidentified Subjects in Civilian or Foreign Law Enforcement Investigations involving a Victim supported by your Service		3
# Subject or Investigation Relevant Data Not Available		84
E2. Service Investigations Completed during FY16		
Note: The following data is drawn from DSAID and describes criminal investigations completed during the FY16. These investigations may have been initiated during the FY16 or any prior FY.		
# Total Investigations completed by Services during FY16 (Group by MCIO Case Number)		523
# Of these investigations with more than one Victim		14
# Of these investigations with more than one Subject		31
# Of these investigations with more than one Victim and more than one Subject		0
# Subjects in investigations completed during FY16 involving a Victim supported by your Service		573
# Service Member Subjects investigated by CID		4
# Your Service Member Subjects investigated by CID		2
# Other Service Member Subjects investigated by CID		2
# Service Member Subjects investigated by NCIS		376
# Your Service Member Subjects investigated by NCIS		347
# Other Service Member Subjects investigated by NCIS		29
# Service Member Subjects investigated by AFOSI		1
# Your Service Member Subjects investigated by AFOSI		0
# Other Service Member Subjects investigated by AFOSI		1
# Non-Service Member Subjects in completed Service Investigations involving a Victim supported by your Service		21
# Unidentified Subjects in completed Service Investigations involving a Victim supported by your Service		105
# Subject Relevant Data Not Available		66
# Victims in investigations completed during FY16, supported by your Service		540
# Service Member Victims in CID investigations		6
# Your Service Member Victims in CID investigations		6
# Other Service Member Victims in CID investigations		0
# Service Member Victims in NCIS investigations		413
# Your Service Member Victims in NCIS investigations		389
# Other Service Member Victims in NCIS investigations		24
# Service Member Victims in AFOSI investigations		2
# Your Service Member Victims in AFOSI investigations		2
# Other Service Member Victims in AFOSI investigations		0
# Non-Service Member Victims in completed Service Investigations, supported by your Service		119
# Victim Relevant Data Not Available		0

E3. Subjects and Victims in Investigations Completed by US Civilian and Foreign Agencies during FY16	
Note: This data is entered by your Service SARC for cases supported by your Service.	
# Total Investigations completed by US Civilian and Foreign Law Enforcement during FY16 (Group by MCIO Case Number)	7
# Of these investigations with more than one Victim	0
# Of these investigations with more than one Subject	0
# Of these investigations with more than one Victim and more than one Subject	0
# Subjects in investigations completed during FY16 involving a Victim supported by your Service	7
# Service Member Subjects investigated by Civilian and Foreign Law Enforcement	1
# Your Service Member Subjects investigated by Civilian and Foreign Law Enforcement	1
# Other Service Member Subjects investigated by Civilian and Foreign Law Enforcement	0
# Non-Service Member Subjects in Civilian and Foreign Law Enforcement Investigations involving a Victim supported by your Service	3
# Unidentified Subjects in Civilian and Foreign Law Enforcement Investigations involving a Victim supported by your Service	3
# Subject Relevant Data Not Available	0
# Victims in investigations completed during FY16, supported by your Service	7
# Service Member Victims in Civilian and Foreign Law Enforcement investigations	6
# Your Service Member Victims in Civilian and Foreign Law Enforcement investigations	6
# Other Service Member Victims in Civilian and Foreign Law Enforcement investigations	0
# Non-Service Member Victims in Civilian and Foreign Law Enforcement Investigations in a case supported by your Service	1
# Victim Relevant Data Not Available	0
E4. Subjects and Victims in Investigations Completed by Military Police/Security Forces/Master At Arms/Marine Corps CID (MPs) during FY16 (all organizations regardless of name are abbreviated below as "MPs")	
Note: This data is entered by your Service SARC for cases supported by your Service.	
Note: As of 1 Jan 2013, all sexual assault investigations are referred to MCIO for investigation. This section captures remaining Subjects from investigations opened in prior years by Military Police/Security Forces/Master At Arms/Marine Corps CID.	
# Total Investigations completed by MPs during FY16 (Group by MCIO Case Number)	0
# Of these investigations with more than one Victim	0
# Of these investigations with more than one Subject	0
# Of these investigations with more than one Victim and more than one Subject	0
# Subjects in MP investigations completed during FY16 involving a Victim supported by your Service	0
# Service Member Subjects investigated by MPs	0
# Your Service Member Subjects investigated by MPs	0
# Other Service Member Subjects investigated by MPs	0
# Non-Service Member Subjects in MPs involving a Victim supported by your Service	0
# Unidentified Subjects in MPs involving a Victim supported by your Service	0
# Subject Relevant Data Not Available	0
# Victims in MP investigations completed during FY16, supported by your Service	0
# Service Member Victims in MP investigations	0
# Your Service Member Victims in MP investigations	0
# Other Service Member Victims in MP investigations	0
# Non-Service Member Victims in MP Investigations, supported by your Service	0
# Victim Relevant Data Not Available	0

E. SUMMARY OF UNRESTRICTED REPORTS WITH INVESTIGATIONS IN COMBAT AREAS OF INTEREST	FY16 Totals
E1. Subjects in Unrestricted Reports Made to Your Service with Investigation Initiated During FY16 in Combat Areas of Interest Note: This data is drawn from DSAID based on Service affiliation of the SARC who currently manages the Victim case associated with the investigation and Subject below.	
# Investigations Initiated during FY16	2
# Investigations Completed as of FY16 End (group by MCIO #)	2
# Investigations Pending Completion as of FY16 End (group by MCIO #)	0
# Subjects in investigations Initiated During FY16	2
# Service Member Subjects investigated by CID	0
# Your Service Member Subjects investigated by CID	0
# Other Service Member Subjects investigated by CID	0
# Service Member Subjects investigated by NCIS	1
# Your Service Member Subjects investigated by NCIS	1
# Other Service Member Subjects investigated by NCIS	0
# Service Member Subjects investigated by AFOSI	0
# Your Service Member Subjects investigated by AFOSI	0
# Other Service Member Subjects investigated by AFOSI	0
# Non-Service Member Subjects in Service Investigations Note: Non-Service Member Subjects are drawn from all CID, NCIS and AFOSI investigations involving a Victim supported by your Service.	0
# Unidentified Subjects in Service Investigations Note: Unidentified Subjects are drawn from all CID, NCIS and AFOSI investigations involving a Victim supported by your Service.	1
# Service Member Subjects investigated by Civilian or Foreign Law Enforcement Note: Service Member Subjects are drawn from Civilian or Foreign Law Enforcement investigations involving a Victim supported by your Service.	0
# Your Service Member Subjects investigated by Civilian or Foreign Law Enforcement	0
# Other Service Member Subjects investigated by Civilian or Foreign Law Enforcement	0
# Non-Service Member Subjects in Civilian or Foreign Law Enforcement Investigations involving a Victim supported by your Service	0
# Unidentified Subjects in Civilian or Foreign Law Enforcement Investigations involving a Victim supported by your Service	0
# Subject or Investigation Relevant Data Not Available	0
E2. Service Investigations Completed during FY16 in Combat Areas of Interest Note: The following data is drawn from DSAID and describes criminal investigations completed during the FY16. These investigations may have been initiated during the FY16 or any prior FY.	
# Total Investigations completed by Services during FY16 (Group by MCIO Case Number)	2
# Of these investigations with more than one Victim	0
# Of these investigations with more than one Subject	0
# Of these investigations with more than one Victim and more than one Subject	0
# Subjects in investigations completed during FY16 involving a Victim supported by your Service	2
# Service Member Subjects investigated by CID	0
# Your Service Member Subjects investigated by CID	0
# Other Service Member Subjects investigated by CID	0
# Service Member Subjects investigated by NCIS	1
# Your Service Member Subjects investigated by NCIS	1
# Other Service Member Subjects investigated by NCIS	0
# Service Member Subjects investigated by AFOSI	0
# Your Service Member Subjects investigated by AFOSI	0
# Other Service Member Subjects investigated by AFOSI	0
# Non-Service Member Subjects in completed Service Investigations involving a Victim supported by your Service	0
# Unidentified Subjects in completed Service Investigations involving a Victim supported by your Service	1
# Subject Relevant Data Not Available	0
# Victims in investigations completed during FY16, supported by your Service	2
# Service Member Victims in CID investigations	0
# Your Service Member Victims in CID investigations	0
# Other Service Member Victims in CID investigations	0
# Service Member Victims in NCIS investigations	2
# Your Service Member Victims in NCIS investigations	2
# Other Service Member Victims in NCIS investigations	0
# Service Member Victims in AFOSI investigations	0
# Your Service Member Victims in AFOSI investigations	0
# Other Service Member Victims in AFOSI investigations	0
# Non-Service Member Victims in completed Service Investigations, supported by your Service	0
# Victim Relevant Data Not Available	0

Unrestricted Reports in Combat Areas of Interest (continued)

E3. Subjects and Victims in Investigations Completed by US Civilian and Foreign Agencies during FY16 in Combat Areas of Interest	
Note: This data is entered by your Service SARC for cases supported by your Service.	
# Total Investigations completed by US Civilian and Foreign Law Enforcement during FY16 (Group by MCIO Case Number)	0
# Of these investigations with more than one Victim	0
# Of these investigations with more than one Subject	0
# Of these investigations with more than one Victim and more than one Subject	0
# Subjects in investigations completed during FY16 involving a Victim supported by your Service	0
# Service Member Subjects investigated by Civilian and Foreign Law Enforcement	0
# Your Service Member Subjects investigated by Civilian and Foreign Law Enforcement	0
# Other Service Member Subjects investigated by Civilian and Foreign Law Enforcement	0
# Non-Service Member Subjects in Civilian and Foreign Law Enforcement Investigations involving a Victim supported by your Service	0
# Unidentified Subjects in Civilian and Foreign Law Enforcement Investigations involving a Victim supported by your Service	0
# Subject Relevant Data Not Available	0
# Victims in investigations completed during FY16, supported by your Service	0
# Service Member Victims in Civilian and Foreign Law Enforcement investigations	0
# Your Service Member Victims in Civilian and Foreign Law Enforcement investigations	0
# Other Service Member Victims in Civilian and Foreign Law Enforcement investigations	0
# Non-Service Member Victims in Civilian and Foreign Law Enforcement Investigations in a case supported by your Service	0
# Victim Relevant Data Not Available	0
E4. Subjects and Victims in Investigations Completed by Military Police/Security Forces/Master At Arms/Marine Corps CID (MPs) during FY16 (all organizations regardless of name are abbreviated below as "MPs") in Combat Areas of Interest	
Note: This data is entered by your Service SARC for cases supported by your Service.	
Note: As of 1 Jan 2013, all sexual assault investigations are referred to MCIO for investigation. This section captures remaining Subjects from investigations opened in prior years by Military Police/Security Forces/Master At Arms/Marine Corps CID.	
# Total Investigations completed by MPs during FY16 (Group by MCIO Case Number)	0
# Of these investigations with more than one Victim	0
# Of these investigations with more than one Subject	0
# Of these investigations with more than one Victim and more than one Subject	0
# Subjects in MP investigations completed during FY16 involving a Victim supported by your Service	0
# Service Member Subjects investigated by MPs	0
# Your Service Member Subjects investigated by MPs	0
# Other Service Member Subjects investigated by MPs	0
# Non-Service Member Subjects in MPs involving a Victim supported by your Service	0
# Unidentified Subjects in MPs involving a Victim supported by your Service	0
# Subject Relevant Data Not Available	0
# Victims in MP investigations completed during FY16, supported by your Service	0
# Service Member Victims in MP investigations	0
# Your Service Member Victims in MP investigations	0
# Other Service Member Victims in MP investigations	0
# Non-Service Member Victims in MP Investigations, supported by your Service	0
# Victim Relevant Data Not Available	0

Court Case or Article 15 Outcome	Reason Charges Dismissed at Art 32 Hearing, if applicable	Most Serious Offense Conviction	Administrative Discharge Type	Must Register as Sex Offender?	Alcohol Use	Case Synopsis Note	
1	Sexual Assault (Art. 120)	UNITED STATES	N/A	US Civilian	Female	Marine Corps	E-5	Male	No	No		04 (July-September)	Courts-Martial charge preferred for non-sexual assault offense			Failure to obey order in regulation (Art. 12)	Convicted	Failure to obey order in regulation (Art. 12)				None	Courts-Martial discharge (M2) - Best Conduct Discharge (Confidential) - 4 Furloughs of Pay and Allowance; Yes. Fee: No. Restriction: No. Reduction in rank: Yes. Pay Grade Reduced To: E-3. Hard Labor: No. Notes: Victim reported that the Subject sexually assaulted her by sexually touching her face and shoulders in a sexual manner at an off-base location. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority referred non-sexual related charges to a SFCA. The Subject pled guilty.
2	Abusive Sexual Contact (Art. 120)	Unknown	N/A	US Civilian	Female	Marine Corps	E-5	Male	No	No		02 (April-June)	Non-judicial punishment for non-sexual assault offense			Drunkness (Art. 124-16)	Article 15 Punishment Imposed		None			Subject (a single subject)	Victims reported that Subject sexually assaulted her by sexually touching her face and shoulders in a sexual manner at an off-base location. NCIS conducted an investigation. The Convening Authority reviewed the investigation. After consultation with the SJA, RTC, and TC, the Convening Authority awarded the Subject NUP for a non-sexual related offense.
3a	Abusive Sexual Contact (Art. 120)	UNITED STATES	Air Force	E-3	Female	Marine Corps	E-4	Male	No	No		02 (October-December)	Courts-Martial Charge Preferred	Abusive Sexual Contact (Art. 120)		Convicted		Abusive Sexual Contact (Art. 120)		Yes	Both Victim and Subject	Victims reported that the sexually assault her at an off-base residence. Alcohol was consumed by both parties. NCIS conducted an investigation. Charges were preferred. The Convening Authority reviewed the investigation and considered the views of the Victim. An Article 32 hearing was conducted and the Article 32 officer recommended proceedings with a general court-martial. After consultation with the SJA, the victim legal counsel, the regional trial counsel, and the two counsel, the Convening Authority referred charges to a general court-martial. The Subject was found guilty and probatorily sentenced.	
3b	Rape (Art. 120)	UNITED STATES	Air Force	E-3	Female	Marine Corps	E-4	Male	No	No		02 (October-December)	Courts-Martial Charge Preferred	Abusive Sexual Contact (Art. 120)		Convicted		Other Sexual Misconduct (Art. 120c)	None	Yes	Both Victim and Subject	Notes: Victim reported that the Subject sexually assaulted her at an off-base residence. Alcohol was consumed by both parties. NCIS conducted an investigation. Charges were preferred. The Convening Authority reviewed the investigation and considered the views of the Victim. An Article 32 hearing was conducted and the Article 32 officer recommended not going forward with the 120 offense due to a lack of evidence. After consultation with the SJA, the victim legal counsel, the regional trial counsel, and the two counsel, the Convening Authority referred charges to a general court-martial. The Subject was found guilty for violating Article 120c.	
4	Abusive Sexual Contact (Art. 120)	UNITED STATES	Marine Corps	E-2	Female	Unknown	Unknown	Unknown				02 (October-December)	Offender is Unknown									Victim (single subject)	Notes: Victim reported that an unknown Subject groped her without her consent and pushed her against a wall while imposing himself to her outside a club. Victim had consumed alcohol. It is unknown whether Subject had consumed alcohol. She reported 4 days after the incident. Local law enforcement investigated and NCIS later assumed the primary investigation role. Deliberate action was precluded because Subject was not identified.
5	Abusive Sexual Contact (Art. 120)	UNITED STATES	Marine Corps	E-3	Female	Marine Corps	E-4	Male	No	No		02 (October-December)	Courts-Martial Charge Preferred	Abusive Sexual Contact (Art. 120)		Convicted		Assault (Art. 120)	Under Other than Reasonable Conditions (UDTRC)			Victims reported that Subject sexually assaulted her at the barracks. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. Charges were referred for initiation of Article 120 to a Special Court-Martial. The Subject signed a PFA and agreed to a PFA at Special Court-Martial to a non-sexual related offense and was right to an administrative separation board. Subject's punitive discharge was suspended pursuant to the terms of the PFA. The Subject was separated with an Other than Honorable Characterization of service.	
6	Abusive Sexual Contact (Art. 120)	Marine Corps	E-2	Female	Marine Corps	E-6	Male	Yes	No	No	Alcohol/Drug Counseling	02 (October-December)	Courts-Martial Charge Preferred	Abusive Sexual Contact (Art. 120)		Convicted		Assault (Art. 120)	Under Other than Reasonable Conditions (UDTRC)			Subject (a single subject)	Notes: Victim reported that Subject placed his hands down her pants without her consent. Alcohol was consumed by both parties. NCIS conducted an investigation. Charges were preferred. An Article 32 hearing was held and the Article 32 officer recommended all charges be referred to a GCM. The convening Authority agreed to a PFA and agreed to a PFA. The Subject was found guilty of sexual assault and sexual right to an administrative separation. Subject's punitive discharge was suspended pursuant to the terms of the PFA. The Subject was separated with an Other than Honorable Characterization of service.
7	Sexual Assault (Art. 120)	UNITED STATES	Marine Corps	US Civilian	Female	Marine Corps	E-5	Male	No	No		04 (July-September)	Non-judicial punishment for non-sexual assault offense			Insubordination (Art. 124-C)	Article 15 Punishment Imposed		None			Both Victim and Subject	Notes: Victim reported that the Subject kissed her and fondled her breast without her permission at a barracks on base. Alcohol was consumed by both parties. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority referred charges to a GCM. The Subject pled guilty.
8	Sexual Assault (Art. 120)	JAPAN	Marine Corps	E-2	Female	Marine Corps	E-5	Male	No	No		01 (October-December)	Courts-Martial Charge Preferred	Aggravated Sexual Assault (Art. 120)			Charges dismissed for any other reason prior to Courts-Martial followed by Art. 15 punishment	Under Other than Reasonable Conditions (UDTRC)			Both Victim and Subject	Notes: Victim reported that Subject sexually assaulted her at the barracks. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. Charges were preferred. The Subject pled guilty to a PFA and agreed to a PFA. The Subject was found guilty of sexual assault and sexual right to an administrative discharge board. After consultation with the SJA, the Convening Authority agreed to the PFA. Following the NUP, the Subject was separated from the Marine Corps.	
9	Rape (Art. 120)	UNITED STATES	Marine Corps	E-2	Female	Marine Corps	E-3	Male				04 (July-September)	Courts-Martial charge preferred for non-sexual assault offense			Falsely official statements (Art. 107)	Charges dismissed for any other reason prior to Courts-Martial followed by Art. 15 punishment	Under Other than Reasonable Conditions (UDTRC)			Unknown	Notes: Victim reported that Subject raped her in her barracks room while she was asleep. Victim consumed prescription medication and sleeping medication. NCIS conducted an investigation. Charges were preferred. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority took no further action on the non-sexual offense, but the Subject was separated from the Marine Corps.	
10	Rape (Art. 120)	GERMANY	Marine Corps	E-6	Male	Unknown	Unknown	Unknown				04 (July-September)	Offender is Unknown									Both Victim and Subject	Notes: Victim reported that the Subject presented her breasts to her non-uniformed ally at an on-base lodging residence. Alcohol was consumed by both parties. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority referred charges to a GCM. The Subject pled guilty.
11	Abusive Sexual Contact (Art. 120)	UNITED STATES	Marine Corps	E-3	Male	Marine Corps	E-4	Male	No	No		01 (October-December)	Administrative discharge for non-sexual assault offense					Under Other than Reasonable Conditions (UDTRC)				Both Victim and Subject	Notes: Victim reported that the Subject sexually assaulted her by exposing his buttocks to her work station. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority referred charges to a GCM. The Subject pled guilty.
12	Abusive Sexual Contact (Art. 120)	UNITED STATES	Marine Corps	E-3	Female	Marine Corps	E-3	Male	No	No		02 (October-December)	Other adverse administrative action for non-sexual assault offense										Notes: Victim reported that the Subject sexually assaulted her by exposing his buttocks to her work station. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority referred charges to a GCM. The Subject pled guilty.
13	Sexual Assault (Art. 120)	UNITED STATES	N/A	US Civilian	Female	Marine Corps	E-6	Male	No	No		01 (October-December)	Other adverse administrative action for non-sexual assault offense										Notes: Victim reported that the Subject sexually assaulted her by exposing his buttocks to her work station. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority referred charges to a GCM. The Subject pled guilty.
14	Abusive Sexual Contact (Art. 120)	UNITED STATES	Marine Corps	E-2	Female	Marine Corps	E-6	Male	No	No		04 (July-September)	Non-judicial punishment for non-sexual assault offense			Failure to obey order in regulation (Art. 12)	Article 15 Punishment Imposed	General				Victims reported that the Subject sexually assaulted her by sexually grabbing her waist at the barracks. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority referred charges to a GCM. The Subject pled guilty.	
15	Rape (Art. 120)	UNITED STATES	Marine Corps	E-3	Female	Marine Corps	E-2	Male	No	No		02 (January-March)	Courts-Martial Charge Preferred	Abusive Sexual Contact (Art. 120)		Convicted		Assault (Art. 120)				Both Victim and Subject	Notes: Victim reported that the Subject raped her in her barracks room on base. Both parties had consumed alcohol. The report was made 4 days after the incident occurred. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. Charges were preferred and after an Article 32 investigation, charges were recommended to be referred to a GCM. The Convening Authority entered a pre-trial agreement with the Subject to withdraw the Article 120 charge and dispose of the case at a PFA. Subject was found guilty of violating Articles 120 and 124-A-1000.
16	Rape (Art. 120)	UNITED STATES	Navy	E-3	Male	Marine Corps	E-1	Male	No	No	Multiple Referrals	02 (April-June)	Courts-Martial Charge Preferred	Sexual Assault (Art. 120)		Acquitted						Both Victim and Subject	Notes: Victim reported that the Subject raped her in the Subject's off-base residence. Alcohol was consumed by both parties. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority referred charges to a GCM. The Subject pled guilty.
17	Sexual Assault (Art. 120)	UNITED STATES	Marine Corps	E-2	Female	Marine Corps	E-4	Male	No	No		02 (April-June)	Courts-Martial Charge Preferred	Sexual Assault (Art. 120)		Acquitted						Both Victim and Subject	Notes: Victim reported that the Subject raped her in her barracks room and was on duty at an off-base location. Victim consumed alcohol. It is unknown whether the Subject had consumed alcohol. She reported 12 days after the incident. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority referred charges to a GCM. The Subject pled guilty.

115	Rape (Art. 120)	UNITED STATES	Marine Corps	E-3	Male	Unknown		Male				C2 (January-March)	Offender is Unknown								Both Victim and Subject	None	Victims reported that an unknown Subject had sexual intercourse with while she was sleeping at an on-base location. Alcohol was consumed by both parties. NCIS and local authorities conducted an investigation. NCIS action was precluded on the reported offense due to the Subject being unknown.
116	Sexual Assault (Art. 120)	UNITED STATES	Marine Corps	E-5	Male	Marine Corps	E-3	Male	No	No		OK (July-September)	Other adverse administrative actions for non-sexual assault offense								Both Victim and Subject	None	Victims reported that the Subject sexually assaulted her in a flag on base. Sexual intercourse was performed by both parties. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA and the RTC, the Convening Authority gave the Subject a formal counseling for non-sexual assault.
117	Abusive Sexual Contact (Art. 120)	UNITED STATES	Marine Corps	E-2	Female	Marine Corps	E-3	Male	No	No		C2 (April-June)	Administrative Discharge for non-sexual assault offense						General		Subject (a single subject)	None	Victims reported that Subject sexually assaulted her in an on-base location by forcing her to have sex at an off-base location. The Subject was charged with rape. The Victim was a victim preference letter articulating her desire not to be prosecuted. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, victim legal counsel, regional trial counsel, and trial counsel, the Convening Authority referred the charges to a separation process for the Subject. A separation board found the Subject guilty of sexual assault. The Subject was separated with a General (Under Honorable Conditions) characterization of service.
118	Rape (Art. 120)	JAPAN	Marine Corps	E-3	Female	Marine Corps	E-4	Male	No	No		C1 (October-December)	Courts-Martial Charge Preferred	Rape (Art. 120)		Charges dismissed subsequent to recommendation by Art. 12 hearing officer followed by Art. 15 punishment	Evidence did not support a recommendation for prosecution			None	Both Victim and Subject	None	Victims reported that Subject raped her. Alcohol was consumed by both parties. NCIS conducted an investigation. Charges were preferred for sexual and non-sexual related offenses. An Article 12 hearing was held. The Article 12 officer recommended referral to a general court-martial. Due to insufficient evidence, he recommended proceeding with the non-sexual assault charges. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA and the Article 12 officer's report, the Convening Authority accepted a pre-trial agreement to dismiss the sexual related offenses. The accused agreed to plead guilty at a non-judicial punishment to the non-sexual related offenses.
119	Aggravated Sexual Assault (Art. 120)		Marine Corps	W-2	Female	Unknown		Unknown				C2 (January-March)	Offender is Unknown								Both Victim and Subject	None	Victims reported that a Subject in her unit kissed her without her consent and performed sexual acts without her consent on two separate occasions in transient quarters on base. Both Subject and victim have not consented to the investigation. A medical report at the time of the sexual assault, but the report became unavailable prior after when she released the incident to her commanding officer. Victim declined to provide the name of the Subject. NCIS action was precluded because the identity of the Subject is unknown.
120	Rape (Art. 120)	UNITED STATES	Navy	E-2	Female	Marine Corps	E-4	Male	No	No		C1 (October-December)	Other adverse administrative actions for non-sexual assault offense								Subject (a single subject)	None	Victims reported that Subject wrongfully and forcefully had sexual contact with her to include sexual intercourse, oral penetration, and anal penetration. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the victim legal counsel, and trial counsel, the Convening Authority took no further action on the reported offense due to insufficient evidence. The Subject received a formal counseling for committing the non-sexual assault related offense of adultery.
121	Sexual Assault (Art. 120)	UNITED STATES	Marine Corps	E-1	Female	Marine Corps	E-1	Female	No	No		C2 (April-June)	Other adverse administrative actions for non-sexual assault offense								Both Victim and Subject	None	Victims reported that Subject wrongfully kissed and sexually penetrated the Victim in her barracks room. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority took no further action on the reported offense. The Convening Authority issued the Subject a 4150 counseling for sexual harassment.
122	Abusive Sexual Contact (Art. 120)	UNITED STATES	Marine Corps	E-2	Male	Marine Corps	E-2	Male	No	No		C2 (April-June)	Other Adverse Administrative Action								Both Victim and Subject	None	Victims reported that the Subject wrongfully rubbed and spanned the chest area of the victim while the victim was lying in bed. The victim also reported that the Subject continued to rub his chest and laid down in bed with her while putting his leg around the victim's ankle making sexual comments at the Victim's barracks room on base. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority referred the charges to a general court-martial.
123	Rape (Art. 120)	UNITED STATES	Multiple Services	Multiple Victims	Multiple Victims	Marine Corps	E-3	Male	No	No	Mental	C2 (April-June)	Courts-Martial Charge Preferred	Rape (Art. 120)		Charges dismissed for every other reason prior to Courts-Martial					Both Victim and Subject	None	Victims reported that the Subject raped her by force in a barracks room. NCIS conducted an investigation. Charges were preferred. An Art. 12 was held. The Convening Authority reviewed the investigation and considered the views of the Victim. The Convening Authority recommended the recommendation of the Art. 12 Officer. After consultation with the SJA, the Convening Authority referred the charges to a GCM. Pursuant to the PTA, the Subject pled guilty at a GCM for non-sexual assault.
124	Abusive Sexual Contact (Art. 120)	UNITED STATES	Marine Corps	E-1	Male	Marine Corps	E-1	Male	No	No		C2 (January-March)	Non-judicial punishment for non-sexual assault offense		Assault (Art. 120)	Article 15 Punishment Imposed			Under Other than Administrative Discharge (BUCIC)		None	Victims reported that the Subject sexually harassed her by touching her breasts while standing in line. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, NCIS, and the TC, the Convening Authority imposed NJP on the Subject for non-sexual assault related offense.	
125	Sexual Assault (Art. 120)	JAPAN	Marine Corps	E-2	Male	Marine Corps	E-4	Male	No	No		C2 (January-March)	Courts-Martial Charge Preferred	Aggravated Sexual Assault (Art. 120)		Discharge or Reassignment in Lieu of Courts-Martial					Both Victim and Subject	None	Victims reported that the Subject sexually abused her in a barracks room. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. Charges were preferred. After reviewing the investigation and preliminary hearing report, considering the views of the victim and consulting with the SJA, the Convening Authority referred sexual assault charges to a GCM. After consultation with the SJA, the Subject submitted a request to be separated in lieu of trial. After consultation with the SJA, NCIS, and the TC, the Convening Authority approved the separation process.
126	Sexual Assault (Art. 120)	Unknown	Marine Corps	E-2	Female	Marine Corps	E-4	Male	No	No		C2 (April-June)	Courts-Martial Charge Preferred	Sexual Assault (Art. 120)		Convicted		Sexual Assault (Art. 120)		Yes	Both Victim and Subject	None	Courts-Martial Discharge: NCIS - Moderate Discharge; Confirmation: Yes; Confirmation Type: Less Than Life; Confirmation (Article): 42; Forfeiture of Pay and Allowances: Yes; Fine: No; Restriction: No; Reduction in rank: Yes; Pay Grade Reduced To: E-1; Hard Labor: No.
127	Aggravated Sexual Contact (Art. 120)		Marine Corps	E-3	Female	Marine Corps	E-2	Male	No	No		C2 (January-March)	Administrative Discharge						General		Both Victim and Subject	None	Victims reported that Subject wrongfully restrained her in an off-base location. Local authorities and NCIS conducted an investigation. Alcohol was consumed but not specified. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority took no further action on the reported offense due to the fact the Subject is detained.
128	Rape (Art. 120)	CA	N/A	US Civilian	Multiple Victims	Marine Corps	E-7	Male	No	No		C2 (January-March)	Courts-Martial Charge Preferred	Rape (Art. 120)		Acquitted					All victims and subjects (multiple parties to the crime)	None	Two Victims reported that the Subject wrongfully pinned her bra over clothing on two occasions. A military medical center was issued after the second incident. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA and the trial counsel, the Convening Authority took no further action due to the Victim declining to participate further. The Subject was administratively separated for a non-sexual assault offense.
129	Abusive Sexual Contact (Art. 120)	UNITED STATES	Marine Corps	E-1	Female	Marine Corps	E-2	Female	No	No		C1 (October-December)	Administrative Discharge for non-sexual assault offense						General		Both Victim and Subject	None	Victims reported that the Subject wrongfully restrained her in an off-base location. Local authorities and NCIS conducted an investigation. Charges were preferred. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority referred charges for rape to a GCM. The Subject was acquitted of both charges.

FY16 Service Member Sexual Assault Suspense Report: Marine Corps																	Administrative Action						
No.	Most Serious Sexual Assault Allegation Subject Is Investigated For	Incident Location	Victim Affiliation	Victim Pay Grade	Victim Gender	Subject Affiliation	Subject Pay Grade	Subject Gender	Subject: Prior Investigation for Sex Assault?	Subject: Moral Waiver Assessment?	Subject Referral Type	Quarter/Charges Completed	Case Disposition	Most Serious Sexual Assault Offense Charged	Most Serious Other Offense Charged	Court Case or Article 15 Outcome	Reason Charges Dismissed at Art 32 Hearing, if applicable	Most Serious Offense Convicted	Administrative Discharge Type	Must Register as Sex Offender?	Alcohol Use	Case Synopsis Note	
148	Rape (Art. 120)	UNITED STATES	Marine Corps	E-2	Female	Marine Corps	E-5	Male	No	No		OK (July-September)	Administrative Discharge						General			Notes: Victim reported that the Subject sexually assaulted her by sexually penetrating her vagina with his penis. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA and TC, the Convening Authority issued an Administrative Separation based on which the Subject was released. The Subject will be discharged with a General Characterization of service upon CGR due to other misconduct.	
149	Revolve Sexual Contact (Art. 120)	Australia	Marine Corps	E-4	Male	Marine Corps	O-3	Male	No	No		CI (October-December)	Non-judicial punishment for non-sexual assault offense		Assault (Art. 120)	Article 15 Punishment Imposed		None			Both Victim and Subject	Notes: Victim reported that the Subject raped her and grabbed her breasts. Alcohol was consumed by both parties. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority notified the Subject of non-judicial punishment for non-sexual related offense.	
150	Rape (Art. 120)	JAPAN	Navy	E-4	Female	Marine Corps	E-7	Male	No	No		CI (October-December)	Non-judicial punishment for non-sexual assault offense		Adultery (Art. 134.2)	Article 15 Punishment Imposed		None			Victim (single victim)	Notes: Victim reported that the Subject sexually assaulted her by her hands in room. Alcohol was consumed by the Victim. The Victim was taking medication at the time of the offense that would have a negative effect when mixed with alcohol. NCIS conducted an investigation. During the investigation the Victim stated that she wanted the Subject to be charged with a lesser offense, adultery at a lower forum than court martial. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA and the TC, the Convening Authority imposed RUP against the Subject for violation of Article 134, adultery.	
171	Revolve Sexual Contact (Art. 120)	Unknown	Marine Corps	E-5	Female	Marine Corps	E-5	Male	No	No		CI (April-June)	Other adverse administrative action for non-sexual assault offense								Both Victim and Subject	Notes: Victim reported that the Subject sexually assaulted her by sexually placing the Subject's hand on his groin, squeezing her breasts, and attempting to kiss her at both on and off base locations. Alcohol was consumed by both parties. NCIS conducted an investigation. During the investigation the Victim indicated that she did not wish to participate further in the investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, RUC, and TC, the Convening Authority took no action on the report of sexual assault due to insufficient evidence. The Subject was found guilty at a civilian court for sexual assault related offense.	
172a	Rape (Art. 120)	UNITED STATES	N/A	US Civilian	Female	Marine Corps	E-2	Male	No	No		Alcohol/Drug Counseling	A Civilian/Foreign authority Prosecuting Service Member								Victim (single victim)	Notes: Victim reported that the Subject sexually assaulted her at an off base location. Alcohol was consumed by the Victim. NCIS and Local Authorities conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority administratively separated the Subject for a conviction of a serious offense. The Subject was found guilty at a civilian court for attempted rape.	
172b	Rape (Art. 120)	UNITED STATES	N/A	US Civilian	Female	Marine Corps	E-3	Male	No	No		Alcohol/Drug Counseling	A Civilian/Foreign authority Prosecuting Service Member								Both Victim and Subject	Notes: Victim reported that the Subject sexually assaulted her at an off base location. Alcohol was consumed by the Victim. NCIS and Local Authorities conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority administratively separated the Subject for a conviction of a serious offense. The Subject was found guilty at a civilian court for sexual assault related offense.	
173a	Rape (Art. 120)	UNITED STATES	N/A	US Civilian	Female	Marine Corps	E-3	Male	No	No		CI (April-June)	A Civilian/Foreign authority Prosecuting Service Member								Subject (a single subject)	Notes: Victim reported that the Subject sexually assaulted her at an off base location. Alcohol was consumed by the Victim. NCIS and Local Authorities conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority administratively separated the Subject for a conviction of a serious offense. The Subject was found guilty at a civilian court for sexual assault related offense.	
173	Rape (Art. 120)	UNITED STATES	Marine Corps	E-3	Female	Marine Corps	E-3	Male	No	No		Alcohol/Drug Counseling	Administrative Discharge					Under Other than Reportable Conditions (GOTIC)			Both Victim and Subject	Notes: Victim reported that the Subject was having unwanted sexual intercourse with her. Alcohol was consumed by both parties. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, RUC, and TC, the Convening Authority took no further action on the reported offense due to insufficient evidence. The Subject was administratively separated for sexual assault related offense.	
174	Rape (Art. 120)	UNITED STATES	N/A	US Civilian	Female	Marine Corps	E-6	Male	No	No		CI (October-December)	Courts-Martial Charge Preferred	Sexual Assault (Art. 120)		Charges dismissed for any other reason prior to Courts-Martial					Victim (single victim)	Notes: Victim reported that the Subject sexually assaulted her by sexually penetrating her vagina with his penis. NCIS investigated. Charges were preferred. An Article 32 preliminary hearing was conducted. After considering the investigation and Article 32 report, the recommendations of the SJA, RUC, and TC were addressed to the Convening Authority. After charges for violations of Art. 120 sexual assault were preferred, the Victim advised to the Convening Authority that she did not want to participate in the military justice process. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, RUC, and TC, the Convening Authority administratively separated the Subject for a conviction of a serious offense. The Subject was found guilty at a civilian court for sexual assault related offense.	
175	Rape (Art. 120)	UNITED STATES	Marine Corps	E-1	Female	Marine Corps	E-5	Male	No	No		CI (October-December)	Courts-Martial Charge Preferred	Sexual Assault (Art. 120)		Charges dismissed for any other reason prior to Courts-Martial			Under Other than Reportable Conditions (GOTIC)		Both Victim and Subject	Notes: Victim reported that the Subject sexually assaulted her in the Subject's barracks room. Alcohol was consumed by both parties. NCIS conducted an investigation. Charges were preferred. An Article 32 hearing was conducted and the Article 32 hearing was continued pending the views of the Victim. After the Article 32 hearing, the Victim indicated that she did not want to participate in the military justice process. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, RUC, and TC, the Convening Authority accepted a PFA from the Subject. The Subject received RUP for a non-sexual related offense. The Subject was separated from the Marine Corps for conviction of a serious offense.	
176	Sexual Assault (Art. 120)	UNITED STATES	Marine Corps	E-3	Female	Marine Corps	E-4	Male	No	No		CI (April-June)	Courts-Martial Charge Preferred	Sexual Assault (Art. 120)		Charges dismissed for any other reason prior to Courts-Martial					Both Victim and Subject	Notes: Victim reported that the Subject sexually assaulted her by sexually penetrating her vagina with his penis. NCIS conducted an investigation. Charges were preferred. An Art. 32 was held. The Convening Authority reviewed the investigation and considered the recommendations of the Art. 32 Officer. After consultation with the SJA, RUC, and TC, the Convening Authority took no further action on the reported offense due to insufficient evidence.	
177	Rape (Art. 120)	UNITED STATES	Marine Corps	E-1	Female	Marine Corps	E-5	Male	No	No		CI (April-June)	Other adverse administrative action for non-sexual assault offense									Subject (a single subject)	Notes: Victim reported that the Subject raped her and forced her to perform oral sex on her multiple times over a period of 8 months. NCIS conducted an investigation. During the investigation the Victim declined to participate in the investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority took no further action on the reported offense due to insufficient evidence. The Convening Authority counseled the Subject for non-sexual related offense.
178	Sexual Assault (Art. 120)	UNITED STATES	N/A	US Civilian	Female	Marine Corps	E-4	Male	No	No		OK (July-September)	Administrative Discharge						Under Other than Reportable Conditions (GOTIC)		Subject (a single subject)	Notes: Victim reported that the Subject sexually assaulted her by sexually penetrating her vagina with his penis. NCIS conducted an investigation but instructed the Victim to report with local law enforcement in a civil court. After some time the Victim declined to participate further in the investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority processed the Subject for administrative separation for conviction of a serious offense. Victim was contacted throughout the separation process and agreed with the action taken.	
179	Sexual Assault (Art. 120)	UNITED STATES	Marine Corps	E-1	Male	Marine Corps	E-1	Male	No	No		CI (October-December)	Administrative Discharge for non-sexual assault offense					Uncharacterized				Notes: Victim reported that the Subject sexually assaulted her by sexually penetrating her vagina with his penis. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority processed the Subject for administrative separation for conviction of a serious offense.	
180	Revolve Sexual Contact (Art. 120)	UNITED STATES	Marine Corps	E-4	Male	Marine Corps	E-3	Male	No	No		CI (April-June)	Courts-Martial Charge Preferred	Sexual Assault (Art. 120)		Corrected		Sexual Assault (Art. 120)		Yes	Both Victim and Subject	Notes: Victim reported that the Subject sexually assaulted her by performing oral sex on her while she was unconscious. Alcohol was consumed by both parties. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. Charges were preferred and an Art. 32 was held. After consultation with the SJA, RUC, and TC, the Convening Authority referred charges to a CGM. The subject was found guilty at a CGM.	
181	Revolve Sexual Contact (Art. 120)	UNITED STATES	Marine Corps	E-3	Female	Marine Corps	E-3	Male	No	No		CI (April-June)	Courts-Martial Charge Preferred	Sexual Assault (Art. 120)		Corrected		Assault (Art. 120)			Subject (a single subject)	Notes: Victim reported that the Subject sexually assaulted her by sexually penetrating her vagina with his penis. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. Charges were preferred. After consultation with the SJA, RUC, and TC, the Convening Authority referred charges to a CGM. The Subject was found guilty at a non-sexual related offense.	
182	Sexual Assault (Art. 120)	UNITED STATES	Marine Corps	E-4	Female	Marine Corps	O-4	Male	No	No		CI (October-December)	Courts-Martial Charge Preferred	Sexual Assault (Art. 120)		Charges dismissed subsequent to recommendations by Art. 32 hearing officer followed by Art. 15 punishment	Other		General		Both Victim and Subject	Notes: Victim reported that the Subject raped her. Alcohol was consumed by both parties. NCIS conducted an investigation. Charges were preferred. An Art. 32 was held. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, Pursuant to a PFA, the Subject received RUP for non-sexual assault related offense. The Subject was administratively separated for sexual assault related offense.	
183	Sexual Assault (Art. 120)	UNITED STATES	Marine Corps	E-3	Female	Marine Corps	E-3	Male	No	No		CI (April-June)	Courts-Martial Charge Preferred	Sexual Assault (Art. 120)		Charges dismissed for any other reason prior to Courts-Martial					Both Victim and Subject	Notes: Victim reported that the Subject sexually assaulted her by sexually penetrating her vagina with his penis. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, RUC, and TC, the Convening Authority withdrew the charges due to insufficient evidence.	
184	Revolve Sexual Contact (Art. 120)	UNITED STATES	Marine Corps	E-2	Male	Marine Corps	E-1	Male	No	No		CI (October-December)	Other adverse administrative action for non-sexual assault offense									Notes: Victim reported that the Subject sexually grabbed his hand and pulled the Victim's shoulder when he consent. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA and the Senior Trial Counsel, the Convening Authority processed the Subject for Administrative Separation on the basis of Entry Level Performance and Conduct.

181	Rape (Art. 120)	UNITED STATES	Marine Corps	US Civilian	Female	Marine Corps	E-3	Male	No	No		(2) (Children Dismissed)	Courts-Martial Charge Preferred	Rape (Art. 120)		Convicted		Assault (Art. 120)			Both Victim and Subject	Courts-Martial discharge: NCJ - Bad Conduct Discharge; Confinement: Yes; Confinement Type: Less Than Life; Confinement (Months): 12; Forfeiture of Pay and Allowances: Yes; Fine: No; Restriction: No; Reduction in rank: Yes; Pay Grade Reduced To: E-1; Hard Labor: No. Notes: Victim reported that Subject raped and sexually assaulted her. Both parties had consensual sexual relations prior to the incident. Charges for sexual offenses were performed. An Article 32 was held and the Article 32 trial court recommended that the Subject be sentenced to hard guilty to Art. 120 and Art. 114 in exchange for the Art. 32 offense. The victim strongly requested that the Convening Authority approve the proposed pretrial agreement. The Convening Authority reviewed the investigation and considered the views of the victim. After consultation with the SJA, the victim legal counsel, the regional trial counsel, and the trial counsel, the Convening Authority approved the pretrial agreement. The Subject was convicted of Article 120 and 114 at a GCM.
182	Abusive Sexual Contact (Art. 120)	UNITED STATES	Marine Corps	E-2	Multiple Victims Female	Marine Corps	E-5	Male	No	No		(2) (April June)	Courts-Martial Charge Preferred	Abusive Sexual Contact (Art. 120)		Convicted		Assault (Art. 120)			Both Victim and Subject	Courts-Martial discharge: NCJ - Bad Conduct Discharge; Confinement: Yes; Confinement Type: Less Than Life; Confinement (Months): 12; Forfeiture of Pay and Allowances: Yes; Fine: No; Restriction: No; Reduction in rank: Yes; Pay Grade Reduced To: E-1; Hard Labor: No. Notes: Multiple Victims reported that Subject had sexually assaulted them by touching them inappropriately and sexually abusing them. NCJ conducted an investigation. Charges were performed. The Convening Authority reviewed the investigation and considered the views of the victim. Charges for violating Article 92, 120, and 128 were returned to general court-martial. The Subject submitted a PFA to plead guilty to Article 92 and 128. After consultation with the SJA, the Convening Authority agreed to the PFA. The Subject pleaded guilty in accordance to the PFA. Participants were returned.
183	Rape (Art. 120)	UNITED STATES	Marine Corps	E-3	Male	Marine Corps	E-5	Male	No	No		(4) (July-September)	Courts-Martial Charge Preferred	Sexual Assault (Art. 120)		Charges dismissed subsequent to recommendation by Art. 32 hearing officer	Evidence did not support a recommendation for prosecution				Both Victim and Subject	Notes: Victim reported that the Subject conducted forcible sex acts on her in a room at the Marine Corps. Sexual acts were committed by both parties. NCJ conducted an investigation. Charges were performed. The Convening Authority reviewed the investigation and considered the views of the victim. The victim submitted a PFA to plead guilty to Article 120. After consultation with the SJA, the victim legal counsel, the regional trial counsel, and the trial counsel, the Convening Authority agreed to the PFA. The Subject pleaded guilty in accordance to the PFA. Participants were returned.
184	Rape (Art. 120)	UNITED STATES	Marine Corps	E-4	Female	Unknown		Male	No	No		(2) (April June)	Subject is a Civilian or Foreign National								Unknown	Notes: Victim reported that Subject sexually assaulted her. NCJ conducted an investigation. During the investigation it was determined that the Subject is a civilian of DAD authority. NCJ referred the case to trial authorities. The trial authorities, informed by general court-martial, after consultation with the SJA, the victim legal counsel, and the regional trial counsel, recommended that the Subject be sentenced to hard guilty to Article 120.
185	Abusive Sexual Contact (Art. 120)	UNITED STATES	Marine Corps	E-3	Male	Unknown		Unknown	No	No		(2) (Children Dismissed)	Offender is Unknown								Victim (single victim)	Notes: Victim reported that an unknown Subject sexually assaulted her while she was on duty at the Marine Corps. Sexual acts were committed by both parties. NCJ conducted an investigation. Charges were performed. The Convening Authority reviewed the investigation and considered the views of the victim. The victim submitted a PFA to plead guilty to Article 120. After consultation with the SJA, the victim legal counsel, the regional trial counsel, and the trial counsel, the Convening Authority agreed to the PFA. The Subject pleaded guilty in accordance to the PFA. Participants were returned.
186	Sexual Assault (Art. 120)	N/A	US Civilian	Female	Marine Corps	E-4	Male	No	No	No		(2) (April June)	Administrative Discharge					Under Other than Inevitable Conditions (SOIC)			All victims and subjects multiple parties to the crime	Notes: Victim reported that Subject sexually assaulted her while she was on duty at the Marine Corps. Sexual acts were committed by both parties. NCJ conducted an investigation. Charges were performed. The Convening Authority reviewed the investigation and considered the views of the victim. The victim submitted a PFA to plead guilty to Article 120. After consultation with the SJA, the victim legal counsel, the regional trial counsel, and the trial counsel, the Convening Authority agreed to the PFA. The Subject pleaded guilty in accordance to the PFA. Participants were returned.
187	Rape (Art. 120)	Japan	N/A	Foreign National	Female	Marine Corps	E-3	Male	No	No		(2) (January-March)	Courts-Martial Charge Preferred	Rape (Art. 120)		Convicted		Assault (Art. 120)		Yes	Victim (single victim)	Courts-Martial discharge: None; Confinement: No; Forfeiture of Pay and Allowances: No; Fine: No; Restriction: No; Reduction in rank: No; Hard Labor: No. Notes: Victim reported that Subject sexually assaulted her by engaging in nonconsensual sex and intercourse. NCJ conducted an investigation. Charges were performed and an Art. 32 was held. The Convening Authority reviewed the investigation and considered the views of the victim. The victim submitted a PFA to plead guilty to Article 120. After consultation with the SJA, the victim legal counsel, the regional trial counsel, and the trial counsel, the Convening Authority agreed to the PFA. The Subject pleaded guilty in accordance to the PFA. Participants were returned.
188	Sexual Assault (Art. 120)	UNITED STATES	Marine Corps	E-1	Female	Marine Corps	E-2	Male	No	No		(2) (January-March)	Courts-Martial Charge Preferred	Sexual Assault (Art. 120)		Convicted		Assault (Art. 120)		Under Other than Inevitable Conditions (SOIC)	Both Victim and Subject	Courts-Martial discharge: None; Confinement: Yes; Confinement Type: Less Than Life; Confinement (Months): 12; Forfeiture of Pay and Allowances: Yes; Fine: No; Restriction: No; Reduction in rank: No; Pay Grade Reduced To: E-1; Hard Labor: No. Notes: Victim reported that Subject sexually assaulted her. NCJ conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the victim. Charges were performed and an Article 32 hearing was conducted. Charges were returned to general court-martial. The Subject submitted a PFA. After consultation with the SJA, victim legal counsel, and the regional trial counsel, the Convening Authority agreed to the PFA. The Subject pleaded guilty and was administratively separated with an Other Than Inevitable Discharge.
189	Abusive Sexual Contact (Art. 120)	UNITED STATES	Marine Corps	E-3	Female	Marine Corps	E-3	Male	No	No		(2) (January-March)	Courts-Martial Charge Preferred	Abusive Sexual Contact (Art. 120)		Charges dismissed for no other reason given in Courts-Martial followed by Art. 15 punishment		Under Other than Inevitable Conditions (SOIC)			Subject (single subject)	Notes: Victim reported that Subject sexually assaulted her in her barracks room. NCJ conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the victim. Charges were performed and a Special Court-Martial was held. The Subject submitted a PFA to plead guilty to Art. 120, 128, and 114. After consultation with the SJA, the victim legal counsel, the regional trial counsel, and the trial counsel, the Convening Authority agreed to the PFA. The Subject pleaded guilty and was administratively separated with an Other Than Inevitable Discharge.
190	Sexual Assault (Art. 120)	UNITED STATES	Marine Corps	E-1	Male	Unknown		Unknown	No	No			Offender is Unknown									Notes: Victim reported that she was sexually assaulted in a room. NCJ conducted an investigation. Charges were performed. The Convening Authority reviewed the investigation and considered the views of the victim. The victim submitted a PFA to plead guilty to Article 120. After consultation with the SJA, the victim legal counsel, the regional trial counsel, and the trial counsel, the Convening Authority agreed to the PFA. The Subject pleaded guilty in accordance to the PFA. Participants were returned.
191	Sexual Assault (Art. 120)	UNITED STATES	Navy	US Civilian	Female	Marine Corps	E-3	Male	No	No		(4) (July-September)	Courts-Martial Charge Preferred	Sexual Assault (Art. 120)		Convicted		Sexual Assault (Art. 120)		Yes		Notes: Victim reported that the Subject sexually assaulted her by sexually abusing her and touching her groin while she was on duty at the Marine Corps. Sexual acts were committed by both parties. NCJ conducted an investigation. Charges were performed. The Convening Authority reviewed the investigation and considered the views of the victim. The victim submitted a PFA to plead guilty to Article 120. After consultation with the SJA, the victim legal counsel, the regional trial counsel, and the trial counsel, the Convening Authority agreed to the PFA. The Subject pleaded guilty in accordance to the PFA. Participants were returned.
192	Sexual Assault (Art. 120)	UNITED STATES	Marine Corps	E-3	Female	Marine Corps	E-5	Male	No	No		(2) (April June)	Courts-Martial Charge Preferred	Sexual Assault (Art. 120)		Charges dismissed subsequent to recommendation by Art. 32 hearing officer followed by Art. 15 punishment	Evidence did not support a recommendation for prosecution	None				Notes: Victim reported that Subject sexually assaulted her. NCJ conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the victim. Charges were performed. At an Article 32 hearing the Article 32 officer recommended dismissing the sexual assault related charges due to insufficient evidence. At the consultation with the SJA, the victim legal counsel, the regional trial counsel, and the trial counsel, the Convening Authority agreed to the PFA. The Subject pleaded guilty in accordance to the PFA. Participants were returned.
193	Sexual Assault (Art. 120)	N/A	Foreign National	Female	Marine Corps	E-3	Male					(2) (Children Dismissed)	Courts-Martial Charge Preferred	Sexual Assault (Art. 120)		Convicted		Other Sexual Offense (Art. 120)		None	Both Victim and Subject	Courts-Martial discharge: None; Confinement: No; Forfeiture of Pay and Allowances: No; Fine: No; Restriction: No; Reduction in rank: No; Pay Grade Reduced To: E-1; Hard Labor: No. Notes: Victim reported that Subject had sexual intercourse with her and that she performed oral sex on the Subject on duty at the Marine Corps. Sexual acts were committed by both parties. NCJ conducted an investigation. Charges were performed. The Convening Authority reviewed the investigation and considered the views of the victim. The victim submitted a PFA to plead guilty to Article 120. After consultation with the SJA, the victim legal counsel, the regional trial counsel, and the trial counsel, the Convening Authority agreed to the PFA. The Subject pleaded guilty in accordance to the PFA. Participants were returned.
194	Aggravated Sexual Contact (Art. 120)	UNITED STATES	Marine Corps	E-3	Female	Marine Corps	E-5	Male	No	No		(2) (Children Dismissed)	Non-judicial punishment for non sexual assault offense			Failure to obey order in regulation (Art. 15)	Article 15 Punishment Imposed	None			Both Victim and Subject	Notes: Victim reported that Subject sexually engaged in sexual contact by groping her in the floor and having her sexually abused her. NCJ conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the victim. The victim submitted a PFA to plead guilty to Article 120. After consultation with the SJA, the victim legal counsel, the regional trial counsel, and the trial counsel, the Convening Authority agreed to the PFA. The Subject pleaded guilty in accordance to the PFA. Participants were returned.
195	Sexual Assault (Art. 120)	UNITED STATES	Marine Corps	E-5	Female	Marine Corps	E-5	Male	No	No		(2) (January-March)	Courts-Martial Charge Preferred	Abusive Sexual Contact (Art. 120)		Convicted		None			Both Victim and Subject	Courts-Martial discharge: None; Confinement: No; Forfeiture of Pay and Allowances: No; Fine: No; Restriction: No; Reduction in rank: No; Pay Grade Reduced To: E-4; Hard Labor: No. Notes: Victim reported that Subject sexually assaulted her while stationed on base. NCJ conducted an investigation. Charges were performed. A pretrial agreement was submitted. Victim stated that she did not wish to participate in the investigation. The Convening Authority reviewed the investigation and considered the views of the victim. The victim submitted a PFA to plead guilty to Article 120. After consultation with the SJA, the victim legal counsel, the regional trial counsel, and the trial counsel, the Convening Authority agreed to the PFA. The Subject pleaded guilty in accordance to the PFA. Participants were returned.
196	Abusive Sexual Contact (Art. 120)	UNITED STATES	Marine Corps	E-3	Female	Marine Corps	E-4	Male	No	No		(2) (April June)	Courts-Martial Charge Preferred	Abusive Sexual Contact (Art. 120)		Convicted		Assault (Art. 120)		Under Other than Inevitable Conditions (SOIC)	Both Victim and Subject	Courts-Martial discharge: None; Confinement: No; Forfeiture of Pay and Allowances: No; Fine: No; Restriction: No; Reduction in rank: No; Pay Grade Reduced To: E-4; Hard Labor: No. Notes: Victim reported that Subject sexually assaulted her by sexually touching her and touching her groin while she was on duty at the Marine Corps. Sexual acts were committed by both parties. NCJ conducted an investigation. Charges were performed. The Convening Authority reviewed the investigation and considered the views of the victim. The victim submitted a PFA to plead guilty to Article 120. After consultation with the SJA, the victim legal counsel, the regional trial counsel, and the trial counsel, the Convening Authority agreed to the PFA. The Subject pleaded guilty in accordance to the PFA. Participants were returned.

§ 87(2)(b) Service Member Sexual Assault Summary Report: UNRESTRICTED CASES															Administrative Actions							
No.	Most Serious Sexual Assault Allegation Subject is Investigated For	Incident Location	Victim Affiliation	Victim Pay Grade	Victim Gender	Subject Affiliation	Subject Pay Grade	Subject Gender	Subject Prior Investigation for Sex Offense?	Subject: Moral Awareness?	Subject: Rational Type	Quarter/Offense/Completion	Case Disposition	Most Serious Sexual Assault Offense Charged	Most Serious Offense Other Charged	Court Case or Article 15 Outcome	Reason Charges Reduced at Art 22 Hearing, if applicable	Most Serious Offense Concluded	Administrative Discharge Type	Most Restrictive as Sex Offender	Alcohol Use	
201	Active Sexual Contact (Art. 120)	UNITED STATES	Marine Corps	E-3	Male	Marine Corps	E-1	Male	No	No	Multiple Offenses	Q1 (October-December)	Courts-Martial Charge Preferred	Sexual Assault (Art. 120)		Acquitted					Both Victim and Subject	Notes: Victim reported that the Subject sexually assaulted her by sexually touching her chest area at the off-base location. Assault was consummated by both parties. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, RTC, and TC, the Convening Authority referred charges to a GCM. The Subject was subsequently released.
202	Sexual Assault (Art. 120)	JAPAN	Marine Corps	E-3	Female	Marine Corps	E-3	Male	No	No		Q1 (October-December)	Non-judicial punishment for non-sexual assault offense	Failure to obey orders or regulations (Art. 10)		Article 15 Punishment Imposed		General			Both Victim and Subject	Notes: Victim reported that Subject sexually assaulted her in the Subject's barracks room on base. Assault was consummated by both parties. NCIS conducted an investigation. During the course of the investigation, the Victim declined to participate any further. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA and the victim legal counsel, the Convening Authority charged the Subject with violation of Article 11 and 12 of RUF. The Subject was subsequently released.
203	Rape (Art. 120)	UNITED STATES	Marine Corps	E-6	Female	Unknown	Unknown	Unknown				Q1 (July-September)	Subject is a Citizen or Foreign National						All victims and subjects involved parties to the crime			Notes: Victim reported that Subject sexually assaulted her while she was intoxicated in an off-base hotel room. Victim reported the sexual assault to a sister for enforcement in 2006. Civilian law enforcement conducted an investigation, but did not prosecute the case due to the victim's decision not to participate in prosecution. Eight years later, victim reported the incident to military authorities, stating a willingness to participate in investigation and prosecution and requesting a determination as to whether investigation by civilian authorities had been properly conducted. NCIS investigated and confirmed that civilian investigators had taken all reasonable investigation steps in 2006. When the victim reported, the Subject had exited their military service and was civilian. Accordingly, civilian law enforcement declined to initiate an investigation or prosecute the offenders. Civil action was precluded because the Subject was civilian.
204	Rape (Art. 120)	UNITED STATES	Marine Corps	E-2	Female	Unknown	Unknown	Unknown				Q2 (April-June)	Offender is Unknown						Unknown			Notes: Victim reported that she was sexually assaulted by her brother while she was in the hospital. Victim reported that her Victim initially made a restricted report, but disclosed the sexual assault to her medical staff after she was discharged to explain her becoming pregnant. NCIS investigated and after victim reported her concern for enforcement, civil action was precluded because the subjects are unknown.
205	Rape (Art. 120)	UNITED STATES	N/A	US Civilian	Female	Marine Corps	E-4	Male	No	No			A Civilian Foreign authority is Prosecuting Service Member						Both Victim and Subject			Notes: Victim reported that Subject submitted and reported her as an off-base residence. Both parties consumed alcohol. Local law enforcement investigated and arrested the Subject. Civilian authorities prosecuted Subject for forcible sodomy and rape. The Convening Authority requested the Subject with an Other than Administrative Discharge of separation for the sexual assault offense. Subject was convicted of aggravated sexual assault in civilian court.
206	Active Sexual Contact (Art. 120)	UNITED STATES	Marine Corps	E-1	Male	Unknown	Male	Male	No	No		Q2 (January-March)	Offender is Unknown						Unknown			Notes: Victim reported that an unknown Subject sexually assaulted her in the barracks on base. NCIS initiated an investigation. After pursuing all investigation leads, NCIS could not identify the Subject and closed the investigation. The Subject is subject to a legal authority because he is unknown.
207	Rape (Art. 120)	UNITED STATES	N/A	US Civilian	Female	Marine Corps	E-7	Male	Yes	No		Q1 (October-December)	Courts-Martial Charge Preferred	Rape (Art. 120)		Acquitted					Both Victim and Subject	Notes: Victim reported that Subject raped and sexually assaulted her during a motorcycle ride after they had a sex. NCIS conducted an investigation. Charges were preferred. An Article 15 was held. After considering the investigation, Article 15 report, recommendations of the Regional Trial Counsel and SJA, and views of the Victim, the Convening Authority referred charges to a GCM for three violations of Article 120 (rape, sexual assault, and sexual sexual contact). Subject was acquitted of all charges.
208	Active Sexual Contact (Art. 120)	UNITED STATES	Marine Corps	E-2	Female	Marine Corps	E-3	Male	No	No		Q1 (July-September)	Other adverse administrative action for non-sexual assault offense						Unknown			Notes: Victim reported that the Subject pulled her shirt collar down and all of the same pants pulled the bottom of her shirt up to her rib cage. When she refused to show the rest of her body, the Subject and the female went back to her room and kept her in and both to expose her buttocks at her barracks were on base. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority given the Subject a formal discharge.
209	Rape (Art. 120)	UNITED STATES	Marine Corps	E-2	Female	Marine Corps	E-4	Male	No	No		Q1 (July-September)	Non-judicial punishment for non-sexual assault offense	Subsiding (Art. 134-C)		Article 15 Punishment Imposed		None			Victim (single subject)	Notes: Victim reported that the Subject raped her at the Subject's off-base residence. Assault was consummated by both parties. NCIS conducted an investigation. The Victim provided information in the command history that she was willing to participate in further court-martial proceedings. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA and TC, the Convening Authority found the Subject guilty of RUF for a non-sexual related offense.
210			Marine Corps	E-3	Male	Unknown	Unknown	Unknown				Q2 (January-March)	Offender is Unknown						Unknown			Notes: Victim reported that a female forced her into the back of a off base house where she was presented to the area by an unknown person. Victim reported that the Subject and the female were in a room and the female had used her pants to provide lubrication. Civilian law enforcement investigated and NCIS provided investigation for the command action was possible. Subject was released.
211	Active Sexual Contact (Art. 120)	UNITED STATES	Marine Corps	E-1	Multiple Victims	Marine Corps	E-1	Male	No	No		Q1 (October-December)	Non-judicial punishment for non-sexual assault offense	Failure to obey orders or regulations (Art. 10)		Article 15 Punishment Imposed		General				Notes: Victim recalls reported that Subject sexual inappropriately touched her buttocks and penis and licked a woman's ribs. NCIS conducted an investigation and interviewed the victim. After consultation with the SJA, the Convening Authority determined the misconduct was appropriately disposed of at RUF. The Subject received non-judicial punishment for violations of Article 10, sexual harassment, and Article 134, sexual misconduct by a battery. The subject was administratively separated.
212	Active Sexual Contact (Art. 120)	UNITED STATES	Marine Corps	E-4	Female	Marine Corps	E-5	Male	No	No		Q2 (January-March)	Non-judicial punishment for non-sexual assault offense	Other Sexual Harassment (Art. 120C)		Article 15 Punishment Imposed		Under Other than Investigative Circumstances (SJC/TC)				Notes: Victim reported that the Subject was sexually assaulted by her by touching her breast over the Victim's clothes. The report was made after an initial report of sexual harassment. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. The incident charges were drafted to include a sexual contact-moral, the Subject admitted a RUF guilty plea at RUF with an administrative separation based on the report. After consultation with the SJA and the regional trial counsel, the Convening Authority found the Subject guilty at RUF for non-sexual related offense. The Subject was processed for administrative separation following RUF.
213	Active Sexual Contact (Art. 120)	Unknown	Navy	Multiple Victims	Multiple Victims	Marine Corps	E-7	Male	No	No	Alcohol/Drug Consuming	Q2 (January-March)	Non-judicial punishment for non-sexual assault offense	Disrespect toward a superior (unsubstantiated offense)(Art. 85)		Article 15 Punishment Imposed		None	All victims and subjects involved parties to the crime			Notes: Victim reported that the Subject sexually touched her buttocks. Assault was consummated by all parties. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, RTC, and TC, the Convening Authority imposed RUF on the Subject for non-sexual related offense.
214	Sexual Assault (Art. 120)	UNITED STATES	N/A	US Civilian	Female	Marine Corps	E-2	Male	No	No		Q2 (April-June)	Courts-Martial Charge Preferred	Sexual Assault (Art. 120)		Committed					Both Victim and Subject	Notes: Victim reported that the Subject sexually assaulted her in multiple locations in the Subject's barracks room by sexually touching her breasts. Assault was consummated by both parties. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, RTC, and TC, the Convening Authority referred charges to a GCM. The Subject was found guilty of sexual related offense.
215	Rape (Art. 120)	UNITED STATES	Marine Corps	E-2	Female	Unknown	Female	Female	No	No		Q2 (January-March)	Subject is a Citizen or Foreign National						Subject (single subject)			Notes: Victim reported that Subject raped her at the Victim's off-base residence. Assault was consummated by the Subject. As the Subject is a civilian, local law enforcement conducted the investigation. Local authorities determined that no crime was committed and closed the case as unfounded.
216	Aggravated Sexual Contact (Art. 120)	UNITED STATES	Marine Corps	E-3	Female	Marine Corps	E-3	Male	No	No		Q1 (October-December)	Other Adverse Administrative Action						Both Victim and Subject			Notes: Victim reported that Subject kissed her mouth and touched her chest areas after she had been to base. Assault was consummated by both parties. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority found the Subject a 9700 formal counseling for a sexual assault offense.
217	Sexual Assault (Art. 120)	UNITED STATES	Marine Corps	US Civilian	Female	Marine Corps	E-4	Male	No	No		Q1 (October-December)	Courts-Martial Charge Preferred	Sexual Assault (Art. 120)		Committed					Both Victim and Subject	Notes: Victim reported that the Subject sexually assaulted her by sexually touching her breasts and touching her buttocks. Assault was consummated by both parties. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority referred charges to a GCM for two violations of Article 120 (sexual assault and sexual sexual contact). The Subject was convicted at a GCM and received a dishonorable discharge.
218			Marine Corps	E-3	Female	Unknown	Unknown	Unknown				Q1 (July-September)	Offender is Unknown						Unknown			Notes: Victim reported a non-sexual sexual assault by an unknown offender. Assault was unknown. NCIS conducted an investigation. Victim declined to participate and offender was unable to be identified. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority took no further action on the reported offense due to insufficient evidence.
219	Sexual Assault (Art. 120)	JAPAN	Marine Corps	E-3	Female	Marine Corps	E-3	Male	No	No		Q2 (April-June)	Courts-Martial Charge Preferred	Sexual Assault (Art. 120)		Committed					Both Victim and Subject	Notes: Victim reported that Subject sexually assaulted her by sexually touching her breasts and touching her buttocks. Assault was consummated by both parties. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, the Convening Authority referred charges to a GCM and the Subject submitted a RUF to the Convening Authority. After consultation with the SJA, RTC, and TC, the Convening Authority signed the RUF and the Subject was found guilty to non-sexual related offense.

NCIS conducted an investigation. During the course of the investigation the Victim declined to participate further in the investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA and TC, the Convening Authority found the Subject an adverse administrative consequence for non-sexual related offense.
220	Aggravated Sexual Contact (Art. 120)	Northern Mariana Islands	Marine Corps	E-3	Female	Marine Corps	E-3	Male	No	No		Q3 (April-June)	Courts-Martial Charge Preferred	Aggravated Sexual Contact (Art. 120)		Convicted		Assault (Art. 120)	Under Other than Honorable Conditions (SOTHC)			Notes: Victim reported that Subject sexually assaulted her by touching on her face and grabbing her breasts while in her hold room off base. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. Charges for violations of Art. 120, 124, and 128 were preferred in SOTHC. After consulting with the SJA, the Convening Authority signed a PFA. Following the 120 charges, the Victim agreed with the charge. The Subject was found guilty of violating Article 120 and 124 at PFC. Subject was administratively separated under other than honorable conditions.
221	Abusive Sexual Contact (Art. 120)	JAPAN	Marine Corps	Multiple Victims	Multiple Victims Female	Marine Corps	E-4	Male	No	No		Q3 (April-June)	Courts-Martial Charge Preferred	Maximal Sexual Contact (Art. 120)		Discharge or Integration in Lieu of Courts-Martial						Notes: Victim reported that the Subject sexually assaulted them on separate occasions by sexually touching their buttocks, breasts and lower back and under their armpits and breast area of the Victims. Alcohol was consumed by the Subject. NCIS conducted an investigation and considered the views of the Victim. Charges were preferred for the Article 32 Officer's recommendation, charges were returned in a SOTHC. The Subject submitted a S.I.T. On 4/1/20 the Victim agreed with the SJA but the other had separated from the Marine Corps and could not be reached. After consultation with the SJA and TC, the Convening Authority agreed to the S.I.T. and separated the Subject.
222	Rape (Art. 120)	UNITED STATES	NA	Foreign National	Female	Marine Corps	E-4	Male	No	No		Q3 (April-June)	Courts-Martial Charge Preferred	Rape (Art. 120)		Convicted		Rape (Art. 120)		Yes		Courts-Martial Discharge: 120 - Dishonorable Discharge; Conviction Type: Yes; Than Life: Conviction (Months): 1; Conviction of Pay and Allowances: Yes; Fine: No; Restrictions: No; Restriction Limit: None; Restriction Length (Days): 0; Reduction in rank: Yes; Pay Grade Reduced To: E-1; Hard Labor: No.
223	Sexual Assault (Art. 120)	UNITED STATES	Marine Corps	E-7	Female	Unknown		Unknown				Q4 (July-September)	Offender is Unknown									Notes: Victim reported that a civilian Subject sexually assaulted her at an off-base location. Victim reported 30 days after the incident. NCIS initiated an investigation. Victim declined to participate in the investigation. NCIS action was precluded because the identity of the Subject is unknown.
224	Rape (Art. 120)		NA	US Civilian	Female	Marine Corps	E-4	Male	No	No	Multiple Materials	Q3 (April-June)	Non-judicial punishment for non-sexual assault offense		Adultery (Art. 134-C)	Article 15 Punishment: Improved			None		Notes: Victim reported that Subject attempted to put his hand down her pants, which she stopped, and that they subsequently had pre-arrested intercourse. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. Charges were preferred and an Article 32 hearing was held. The Convening Authority reviewed the recommendations of the Art. 32 officer and returned the charges to a SOTHC. The Subject submitted a PFA. The Convening Authority, after consultation with the SJA, NC, ETC, and the TC, the Convening Authority agreed to the PFA and the Subject pled guilty to rape.	
225	Sexual Assault (Art. 120)	UNITED STATES	Marine Corps	E-4	Female	Unknown		Unknown	No	No		Q4 (July-September)	Offender is Unknown									Notes: Victim reported that a civilian Subject sexually assaulted her at an off-base location. Victim reported 30 days after the incident. NCIS initiated an investigation. Victim declined to participate in the investigation. NCIS action was precluded because the identity of the Subject is unknown.
226	Rape (Art. 120)	UNITED STATES	NA	US Civilian	Female	Marine Corps	E-3	Male	No	No		Q2 (January-March)	Courts-Martial Charge Preferred	Rape (Art. 120)		Acquitted						Notes: Victim reported that the Subject sexually assaulted her by touching her genital area under the clothing. Alcohol was consumed by both parties. NCIS conducted an investigation and considered the views of the Victim. Charges were preferred and an Article 32 hearing was held. After consultation with the SJA, NC, ETC, and the TC, the Convening Authority returned the charges to a general court-martial. The Subject was acquitted of all charges.
227	Sexual Assault (Art. 120)	UNITED STATES	Marine Corps	E-4	Female	Unknown		Unknown	No	No		Q4 (July-September)	Offender is Unknown									Notes: Victim reported that the Subject sexually assaulted her by touching her genital area under the clothing. Alcohol was consumed by the Subject. NCIS conducted an investigation and considered the views of the Victim. Charges were preferred and an Article 32 hearing was held. After consultation with the SJA, NC, ETC, and the TC, the Convening Authority requested an NJP against the Subject for non-sexual related offense. Proceedings were initiated. The Convening Authority requested an NJP against the Subject for non-sexual related offense.
228	Abusive Sexual Contact (Art. 120)	UNITED STATES	Marine Corps	E-4	Male	Marine Corps	E-6	Male	No	No		Q4 (July-September)	Courts-Martial Charge Preferred for non-sexual assault offense		Failure to obey order or regulation (Art. 15)	Charges dismissed for non-sexual assault offense		General				Notes: Victim reported that the Subject sexually assaulted her by touching her genital area under the clothing. Alcohol was consumed by both parties. NCIS conducted an investigation and considered the views of the Victim. Charges were preferred and an Article 32 hearing was held. Charges returned for non-sexual related offense. PFA was submitted by the Subject. After consultation with the SJA and the TC, the Convening Authority agreed to the PFA and found the Subject guilty of a non-sexual related offense at NJP. The Subject was separated from the Marine Corps.
229	Attempts to Commit Offense (Art. 80)	UNITED STATES	Marine Corps	E-1	Female	Marine Corps	E-1	Male	No	No		Q1 (October-December)	Non-judicial punishment for non-sexual assault offense			Assault (Art. 120)	Article 15 Punishment: Improved		Under Other than Honorable Conditions (SOTHC)			Notes: Victim reported that the Subject sexually grabbed her by the hand and arm and attempted to kiss her without her consent. The Subject attempted to kiss her a second time by grabbing her hand and kissing her. The Subject was found guilty of sexual harassment without her consent at this barracks on base. NCIS conducted an investigation. The Convening Authority reviewed the investigation and considered the views of the Victim. After consultation with the SJA, NC, ETC, and the TC, the Convening Authority requested an NJP against the Subject for non-sexual related offense. Proceedings were initiated. The Convening Authority requested an NJP against the Subject for non-sexual related offense.
230	Rape (Art. 120)	UNITED STATES	Navy	E-4	Female	Marine Corps	E-4	Male	No	No		Q2 (January-March)	Courts-Martial Charge Preferred	Rape (Art. 120)		Acquitted						Notes: Victim reported that the Subject sexually assaulted her by touching her genital area under the clothing. Alcohol was consumed by the Subject. NCIS conducted an investigation and considered the views of the Victim. Charges were preferred and an Article 32 hearing was held. After consultation with the SJA, trial counsel, the victim legal counsel, the Convening Authority returned sexual related charges to a general court-martial. The Subject was acquitted of all charges.

Enclosure 3: Department of the Air Force

SECRETARY OF THE AIR FORCE
WASHINGTON

MAR 20 2017

MEMORANDUM FOR UNDER SECRETARY OF DEFENSE (PERSONNEL AND
READINESS)

SUBJECT: Fiscal Year 2016 Annual Report on Sexual Assault in the Military

In response to your 29 September 2016 data call, I am forwarding the Air Force input to the *Fiscal Year 2016 Department of Defense (DoD) Annual Report on Sexual Assault in the Military*.

Sexual assault reporting is unchanged from recent years, telling us we have more work to do to increase the percentage of sexual assaults that victims report to the Air Force. In fiscal year 2016, Air Force Sexual Assault Prevention and Response Office (AF SAPRO) requested and received approval for select full-time Sexual Assault Prevention and Response (SAPR) Victim Advocates (VAs) to further assist their Sexual Assault Response Coordinators (SARCs). In addition, we renewed efforts toward a multi-pronged strategy to address prevention. Employing evidence-based approaches to prevention strengthens our focus in the ongoing battle against sexual assault, and we will continue to search for a path that leads us to zero.

Lisa S. Disbrow
Acting

Attached:
FY16 Annual Report on Sexual Assault in the Military: United States Air Force

FY16 Annual Report on Sexual Assault in the Military: United States Air Force

Executive Summary

Sexual violence can and has negatively affected our Airmen, families, units and communities, and ultimately our mission. The human and economic costs of this scourge are often veiled, not fully understood, and have lifelong impacts for individuals, while also impacting unit cohesion. The Air Force is unwavering in our commitment to eradicating the occurrence of sexual assault with a focused strategy, evidence-based approaches to development, and investment in proven expertise at all levels. While we are pursuing a more effective strategy to eliminate sexual assault, we will continue to respond immediately and with the most effective resources to support any Airman who has been assaulted, and we know we have more work to do with regards to response and increasing reporting as well as addressing retaliation against sexual assault survivors.

In focusing on prevention we seek a future state where the cultural imperatives of mutual respect and trust, professional values, and team commitment are so pervasive in our environment that sexual assault is not tolerated, condoned, or ignored anywhere. In this regard, we are using a multi-pronged strategy to address prevention. The strategy includes universal as well as targeted initiatives. As an example, in 2016 the Air Force Sexual Assault Prevention and Response Office (AF SAPRO) operationalized the first phase of the 2015 SAPR Strategy by implementing the evidence-based Green Dot prevention training approach. Since the start of training, thousands of surveys and myriad individuals have reported an increase in preventive actions and / or a broader understanding of violence prevention skills. In the civilian sector, Green Dot has proven effective in significantly reducing sexual violence three to five years after implementation; AF SAPRO expects similar success in prevalence reduction over time. Our strategy also relies on investing in prevention expertise at all levels. In order to ensure the success and momentum of this and future prevention efforts, the Secretary of the Air Force authorized the hiring of 92 installation level Specialists for the Primary Prevention of Violence (SPPV's), with Headquarters Air Force and Major Command oversight. These SPPV's are the office of primary responsibility for developing and ensuring the execution of a comprehensive local primary prevention strategy. They will also facilitate future prevention trainings and initiatives while collaborating with other installation stakeholders. Other prevention efforts include the adaptation of healthy life and relationship skills training in partnership with the US Air Force Academy (with the potential to employ this training across all officer accession sources), illustrating the Air Force's increased emphasis on developmentally appropriate prevention. At Basic Military Training, AF SAPRO is adapting, for our new enlisted accessions, a set of interventions aimed at preventing the victimization, re-victimization, and perpetration of sexual crimes. Additional efforts to prevent sexual assault include our initiative to increase Alcohol and Drug Abuse Prevention, given the association between alcohol and sexual assault; and we also established a Survivor Panel, which brought together survivors of sexual assault to better inform Air Force policies, planning, programming, and assessments. The survivor panel interacted with the Senior Air Force leadership and is a valuable resource for ongoing leadership engagements at other key levels like the Wing Commander orientation courses.

Improving SAPR policies and programs is important to ensure we provide the best support to Airmen. In line with this philosophy, in 2016, AF SAPRO asked for a continuation to the exception to policy to allow AF Civilians the ability to make restricted and unrestricted reports of sexual assault worldwide, and to receive SAPR services. AF SAPRO will continue to request this exception from DoD each year until such time as it can be made permanent. DoD civilians became eligible for Special Victims' Counsel in 2016, which may have led to an increase in reporting by DoD civilians. AF SAPRO took strides to improve male victimization reporting by creating small group training on the topic, as well as increasing collaboration with experts from across the country in this area of study. This multi-faceted approach to improving male victim response led to AF SAPRO adding a new block of instruction to its training course for Sexual Assault Response Coordinators (SARCs), which addresses myths surrounding male sexual assault.

We still have more work to do to increase the percentage of sexual assaults that victims report to the Air Force, as the annual trend for reporting is flat. The Air Force received 1,355 sexual assault reports in FY16, compared to 1,312 in FY15 and 1,350 in FY14. Expressed as percentages of the total Air Force population (including active duty, Air Force Reserve, Air National Guard and appropriated fund civilian employees) 0.21% of Airmen reported a sexual assault in FY16, compared to 0.20% in FY15 and 0.21% in FY14. Similarly, 30.6% of the FY16 reports remained restricted at the end of FY16, compared to 29.0% in FY15 and 30.1% in FY14.

The Air Force has dedicated talented professionals who care for victims of sexual assault. Air Force SARCs exist at the base and major command levels and are the focal point for victim care, case management, and program oversight. Our SARCs must obtain Defense Sexual Assault Advocate Certification Program accreditation, as well as attend initial and reoccurring training. SAPR Victim Advocates (VAs) and Volunteer VAs at the base level must also obtain accreditation and complete the appropriate training. This year, AF SAPRO requested and received approval for select full-time SAPR VAs to further assist their SARC by entering data in the Defense Sexual Assault Incident Database (DSAID). Allowing SAPR VAs to take on a portion of the DSAID workload led to a 23% decrease in data entry errors (including blank data fields) over a six month period. Additionally, Air Force Instruction 90-6001 *Sexual Assault Prevention and Response (SAPR) Program* was updated effective 18 March 2016 to reflect current requirements, ensuring the Air Force remains in compliance with DoD regulations. The Air Force remains committed to eliminating sexual assault and this is reflected in the myriad initiatives, trainings, and process improvements surrounding prevention and reporting.

1. LOE 1—Prevention—The objective of prevention is to “deliver consistent and effective prevention methods and programs.” Based on the 2014-2016 DoD Sexual Assault Prevention Strategy, implementation of prevention efforts across DoD should be spread across a collection of 10 program elements. To aid in assessing DoD-wide progress in operationalizing the Prevention Strategy, please provide responses connected back to these program elements.

1.1 Summarize your efforts to achieve the Prevention Endstate: “cultural imperatives of mutual respect and trust, professional values, and team commitment

are reinforced to create an environment where sexual assault is not tolerated, condoned, or ignored.” Where appropriate, be specific in the types of measures your program uses, the number of Service members impacted and the approved way ahead for achieving the prevention endstate. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 2)

In 2015, Air Force senior leaders signed a Sexual Assault Prevention and Response (SAPR) Strategy. The Air Force Sexual Assault Prevention and Response Office (AF SAPRO) then operationalized the Strategy in a three-phase prevention plan (Phase 1: Addressing attitudes, norms, and environmental factors; Phase 2: Addressing individual-level risk factors; Phase 3: Addressing relationship-level risk factors) that outlined a systematic and comprehensive approach to prevention that combined evidence-based interventions, with prevention policy and cultural norms change. These elements address each level of the social ecology outlined by the DoD Strategy.

The cornerstone of the first phase of the three-phase plan involved implementation of an evidence-based bystander intervention approach, Green Dot. Green Dot is a three pronged community mobilization approach that was adapted for use in the Air Force and has separate modules for leaders, peer influencers, and the general Air Force population. In addition, a version of Green Dot was adapted for and utilized by AF Guard and Reserve Airmen to address their unique requirements and time limitations. As a departure from past prevention efforts and to stimulate a grassroots approach to prevention, 2500 Airmen—not Sexual Assault Response Coordinators, Victim Advocates, or commanders—were trained to implement Green Dot in over 25 regional trainings hosted by installations across the world. Green Dot will be implemented from 2016-2018 (foundational content in 2016, content extensions and boosters in 2017-2018) because in the randomized controlled trial of the intervention, the greatest reductions in sexual violence perpetration and victimization were realized after three years of implementation.

Green Dot, and the other elements of the AF SAPR Strategy, are being monitored and evaluated, as outlined in section 1.12. In the civilian sector, Green Dot has been effective in significantly reducing sexual violence three to five years after implementation; AF SAPRO expects similar success in prevalence reduction over time.

Because the AF SAPR Strategy emphasizes doing what works, while Green Dot is implemented, several prevention interventions and policies are being developed/adapted and evaluated for effectiveness within the Air Force. The policies and interventions that have demonstrated effectiveness will be implemented in subsequent phases of the prevention plan. These efforts are detailed throughout LOE 1 of this report. Interventions that are being evaluated include an adaptation of a healthy life and relationship skills training at the US Air Force Academy and the development of interventions to prevent first time victimization, re-victimization, and perpetration to be evaluated at Basic Military Training. Policy-level interventions include the implementation of a screening measure to prevent individuals at extremely high risk for sexual assault perpetration from accessing into the Air Force and formative research to examine the potential feasibility of alcohol policies to decrease consumption and subsequent problem behaviors.

1.2 Communications and Engagement: Update your progress in aligning prevention communications and training based on the type of message, messenger, and delivery methodology to specific demographic audiences across your Military Service (e.g., basic training, first-term, mid-level, and senior leader). (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Communications), p. 11)

The Air Force Sexual Assault Prevention and Response (AF SAPR) Strategy emphasizes doing what works and several prevention interventions and policies are being developed/adapted and evaluated for effectiveness within the Air Force. The policies and interventions that have demonstrated effectiveness will be implemented in subsequent phases of the prevention plan. Interventions that are being evaluated include an adaptation of a healthy life and relationship skills training at the US Air Force Academy (USAFA) and the development of targeted interventions to prevent first time victimization, re-victimization, and perpetration to be evaluated at Basic Military Training. The targeted interventions focus on increasing awareness of risky situations, teaching problem solving and protective behaviors for managing risky situations, and dispelling rape myths. Policy-level interventions include the implementation of a screening measure to prevent individuals at extraordinarily high risk for sexual assault perpetration from accessing into the Air Force and formative research to examine the potential feasibility of alcohol policies to decrease consumption and subsequent problem behaviors.

The Air Force Sexual Assault Prevention and Response Office (AF SAPRO) is working closely with research staff at USAFA to adapt a healthy life and relationship skills training for sexual assault prevention. The adapted curriculum focuses on the following areas: self-management skills (e.g., decision making, emotion regulation), social skills (e.g., assertiveness), alcohol and drug prevention (e.g., skills to resist peer pressure), and healthy relationship skills. Emphasis on developmentally appropriate prevention suggests specific prevention approaches may be most useful with a young Airman audience. In addition, AF SAPRO is working closely with USAFA SAPR and Community Support staff to ensure Green Dot is a fit for the unique environment.

The AF SAPR Strategy and three-phase plan as well as the implementation specifics and rationale for Green Dot were communicated to leaders and the field in regular updates, such as during the SAPR pre-command briefing to new wing and group commanders, to senior leader conferences hosted by Major Commands, at senior enlisted leader conferences, and through communications from senior leaders (email or at the Community Action Information Board) to subordinate commanders. In addition, specific Sexual Assault Awareness and Prevention Month (SAAPM) guidance was distributed to the Sexual Assault Response Coordinator (SARC) and Victim Advocate community to ensure that their SAAPM prevention activities complemented Green Dot messaging and goals.

SARCs continued to submit quarterly training reports during fiscal year 2016. The reports highlight training and briefings to special populations such as leadership, first term airmen, pre-deployment personnel, first responders, medical personnel, volunteer victim advocates, etc. SAPR personnel also facilitate training and briefings in collaboration with

other on base and community agencies, including equal opportunity, security forces, family advocacy, and rape crisis centers.

1.3 Communications and Engagement: Update your efforts to share and foster practices across all prevention stakeholders (suicide prevention, sexual assault prevention, alcohol reduction, etc.). Detail any effort to incorporate shared messaging (e.g., bystander intervention efforts supporting suicide and sexual assault prevention). (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 4, #5, p. 7)

The 2015 Air Force Sexual Assault Prevention and Response (AF SAPR) Strategy reflects a holistic approach to prevention, such that the common underlying risk and protective factors for sexual assault and other forms of interpersonal and self-directed violence are considered together rather than in a siloed approach. Examples of this holistic approach include implementation of Green Dot, which has evidence of effectiveness preventing multiple forms of interpersonal violence and sexual harassment, and the adaptation and evaluation of a healthy life and relationship skills training that is based on the best-available research.

To concretize the goal of addressing multiple forms of violence through a comprehensive Strategy, a cross-functional working group developed an approach focused on shared risk and protective factors, in order to simultaneously address multiple problem behaviors rather than preventing each form of violence in a silo. A key aspect of a holistic approach is using the AF community mobilization infrastructure (known as the Community Action Information Board (CAIB) and Integrated Delivery System (IDS)) as the primary forum through which the various helping agencies and prevention stakeholders will plan and oversee execution of integrated prevention at the Installation, Major Command, and Headquarters levels.

As an example of the first glimpse of a more integrated approach to prevention, through Summer 2016, the AF worked with five installations to adapt and pilot a version of Green Dot that addressed interpersonal as well as self-directed violence. The goal was to target multiple forms of personal violence (i.e., sexual assault, suicide, domestic abuse) with one training. This integrated training will serve as the Total Force annual SAPR and suicide prevention training in 2017 and will significantly reduce Airman's time in training. Although the Green Dot bystander intervention training does not address alcohol reduction specifically, it does provide scenarios in which trainees understand how alcohol consumption can increase risk for all forms of personal violence.

As described elsewhere in LOE 1 of this report, the Air Force Sexual Assault Prevention and Response Office (AF SAPRO) ongoing research (evaluations of life and relationship skills training and alcohol policies) are expected to have benefits for sexual assault prevention in addition to other problem behaviors. Additionally, prevention of first time victimization and re-victimization via the studies ongoing at Basic Military Training are expected to have multiple downstream benefits given the diverse negative physical, social and psychological outcomes associated with victimization.

The AF SAPR Strategy and three-phase plan as well as the implementation specifics and rationale for Green Dot were communicated to leaders and the field in regular updates, such as during the SAPR pre-command briefing to new wing and group commanders, to senior leader conferences hosted by Major Commands, at senior enlisted leader conferences, and through communications from senior leaders (email or at the CAIB) to subordinate commanders. In addition, specific Sexual Assault Awareness and Prevention Month (SAAPM) guidance was distributed to the Sexual Assault Response Coordinator (SARC) and Victim Advocate (VA) community to ensure that their SAAPM prevention activities complemented Green Dot messaging and goals.

AF SAPRO, in collaboration with the Army Sexual Harassment/Assault Response and Prevention office and the Department of Defense SAPR Office continued a study in Fiscal Year (FY) 2016 with the Institute for Defense Analyses to examine the link between alcohol, harmful behaviors, and negative outcomes including sexual assault. The project, Reducing Alcohol's Impact on Sexual Assault and Other Harmful Behaviors, Phase One: Understanding Service Member's Alcohol Purchasing Behavior, and Designing a Rigorous Causal Evaluation of Interventions, explores the effects of policy interventions, such as alcohol pricing effects on drinking behaviors and subsequent violence. During FY16, researchers conducted a literature review and an Alcohol Landscape Study to examine the spending patterns of military members to include the types of alcohol purchased and whether the purchase was made on a military installation. With insights from the Alcohol Landscape Study, the Air Force and other services will determine the feasibility of conducting a rigorous evaluation of an alcohol policy intervention at selected military installations.

The Alcohol and Drug Abuse Prevention and Treatment Program collaborated with the Department of Justice to reduce underage Airmen's access to alcohol and to reduce the risk of sexual assault and crimes using evidence-based environmental strategies. Working with local civilian communities, Air Force strategies for enforcement of underage drinking laws include compliance sting operations targeting local distributors, increased number and frequency of Driving Under the Influence checks in the local community, development of local policies to prevent underage drinking and related consequences, community-based media campaigns to reduce underage drinking and increase awareness of legal consequences, and increased frequency of alternative alcohol-free social activities.

To facilitate communication to the field (i.e. both the newly hired Specialists for the Primary Prevention of Violence (SPPVs) and the Green Dot implementers), AF SAPRO instituted two new SharePoint sites (Green Dot and Interpersonal and Self-Directed Violence Prevention) to host strategic-level information, training materials, presentations, graphics, and resources. AF SAPRO also hosted monthly teleconferences with Major Command (MAJCOM) SAPR personnel to provide guidance, answer questions, and solicit feedback from the field on best practices and challenges; and, AF SAPRO hosted video and phone teleconferences with major command leaders to highlight training initiatives,

prevention and response efforts.

Other communication efforts include, AF SAPRO:

- hosted Green Dot training for Air Force senior leaders (Secretary of the Air Force, Chief and Vice Chief of Staff of the Air Force, and Chief Master Sergeant of the Air Force)
- hosted Green Dot webinars with SPPVs and Community Support Coordinators (CSC) to foster cross-functional communication and collaboration
- hosted training webinars with the Division of Violence Prevention at the Centers for Disease Control and Prevention for SPPVs, CSCs, and MAJCOM SARCs
- communicated to all levels of SAPR the AF Green Dot Progress Report which provided feedback from training, testimonials, and how the Air Force was embracing Green Dot
- solicited feedback from Airmen pertaining to Green Dot training via the Air Force Portal (Share Your Story)

Finally, in order to support the expansion of prevention activities, AF SAPRO created a Prevention Branch to focus on SPPV professional development and execution of the 2015 SAPR Strategy including Green Dot.

1.4 Peer-to-Peer Mentorship and Support: Describe efforts to support peer-to-peer programs for junior service members that promote healthy relationships focused at the battalion/squadron/or Military Service equivalent levels. Provide, where appropriate, metrics used to assess efforts and intended outcomes of the efforts. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Peer-to-Peer Mentorship), p. 10)

The cornerstone and a critical core component of the Green Dot approach is identification, recruitment and training of peer influencers in a (4 hour) bystander workshop. The workshop equips and empowers socially influential Airmen with tools to identify and intervene in situations that pose a high risk for sexual assault, dating/domestic violence, or stalking and tools to proactively prevent these situations from arising in the first place. Across active duty installations, 10-15% of the base population are trained in these workshops. Social diffusion of innovation theory suggests that after these workshops, Airmen will serve as change agents in their peer group and sphere of influence to set norms that do not tolerate interpersonal violence. This is a robust, evidence-based approach to changing norms and cultures.

The metrics for Green Dot and the overall Air Force Sexual Assault Prevention and Response Strategy are described in detail in section 1.12.

1.5 Leadership Involvement: Update improvements to local Military Service SAPR programs (on both prevention and response) based on the feedback to local commanders from command climate assessments. (DoDI 6495.02, Sexual Assault

Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 5, para 9f)

Results from recent Defense Equal Opportunity Management Institute Organizational Climate Surveys (DEOCS) indicate that most Airmen (93%) believe, to a great or moderate extent, that their chain of command encourages bystanders to intervene in situations where a person is at risk for sexual assault or other harmful behavior. Based in part on these DEOCS results, and feedback from the Survivor Panel, the Air Force Sexual Assault Prevention and Response Office geared its FY16 annual SAPR training to emphasize unit commander-delivered messages. We believe messages directly from commanders are an important factor in inspiring positive morale and behaviors.

1.6 Deterrence: Update your progress in developing and/or enhancing sexual assault deterrence measures and/or messaging and outline how they are provided to Service members at the installation (or Service equivalent) level (e.g., Crime Reduction Program, Military Criminal Investigation Organization (MCIO) Outreach Initiatives, etc.). Provide summary of Service member feedback or metrics to demonstrate progress. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Deterrence), p. 11)

Green Dot as a bystander intervention approach has as one of its outcomes, deterring possible crime. The accession standard mentioned above (Section 1.2) would decrease the probability that individuals at extraordinarily high risk for perpetrating sexual assault would be accessioned into the Air Force. The AF is adapting an evidence-based male-focused perpetration prevention approach that focuses on consent and healthy sexuality that would deter potential perpetrators. The AF continues to publicize courts-martial and article 15 outcomes on an AF website and in base newspapers to make individuals aware of potential consequences for sexual assault and other crimes. Area Defense Counsel also provide summaries of common punishments for crimes to new airmen in First Term Airman Center, for example, in an effort to deter criminal and other negative behaviors. The deterrence approaches summarized above (i.e. publicizing courts-martial and briefings about common punishments) are known to have a correlative relationship to reduced instances of crime, but the Air Force does not have a tool to directly measure the effectiveness of deterrence.

1.7 Community Involvement: Describe your efforts to engage with military community leaders and organizations (e.g., Family Advocacy Programs, ROTC Programs, Chaplains, Healthcare providers, and Single Soldier Programs) to develop collaborative internal Military Service programs. Describe how you addressed challenges. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Community Involvement), p. 11 / SecDef Memo (1 May 14), Develop Collaborative Forum for Sexual Assault Methods, p. 2)

The primary mechanism at all levels for cross-functional involvement and community mobilization is the Integrated Delivery System (IDS), which brings all prevention stakeholders and helping agencies together monthly to focus on planning, execution, and monitoring of community-based prevention initiatives. In April 2016 the Vice Chief of Staff of the Air Force hosted an AF Community Action Information Board (CAIB) that primarily focused on the implementation of Green Dot—in order to communicate senior leader support and problem solve potential issues in execution.

In addition, starting in April 2016, Specialists for the Primary Prevention of Violence (SPPVs) started to be onboarded at 92 active duty and reserve installations across the Air Force. The SPPVs' role involves collaborating with stakeholders and across agencies to develop a community wide, data-driven Prevention Strategy that operationalizes the AF Strategy.

The Air Force Medical Service has taken an active role to engage in response with Sexual Assault Response Coordinators (SARCs) and SAPR Victim Advocates (SAPR VAs) during FY16. SARCs and SAPR VAs continue to receive live, in-person training from a certified Sexual Assault Nurse Examiner – Adult/Adolescent (SANE-A) which allows for fluid communication related to the medical response for sexual assault patients.

The Air Force Family Advocacy Program (FAP) continued to build on existing relationships with the Air Force Sexual Assault Prevention and Response Office (AF SAPRO) during FY16 by supporting the SARC Course. Information presented during this training focuses on identifying risk factors for increasing violence that exists in unmarried/spouse relationships and the management of these cases to ensure optimal safety of sexual abuse victims. The training also speaks to the role of the Domestic Abuse Victim Advocate and the increased response efforts these contract positions bring to FAP.

Additionally, the Air Force FAP and AF SAPRO collaborated on similar language for Air Force Instruction 40-301, *Family Advocacy Program*, and Air Force Instruction 90-6001, *Sexual Assault Prevention and Response (SAPR) Program*, that would increase the safety of domestic abuse sexual assault victims and enable eligible domestic abuse sexual assault victims to access the expedited transfer option. This revised guidance also outlines a plan for these programs to consult one another when there appears to be a current or former relationship between offender and victim or stalking behaviors.

AF SAPRO also collaborated with the AF Surgeon General and the AF Personnel Directorate to hold a 2 week working group that focused on optimizing interpersonal and self-directed violence prevention and response. The General Officer led cross-functional working group, which had approximately 50 members, made recommendations related to structural changes that would facilitate better prevention integration and better victim-care.

Cross-Service collaborations are also fostered via the quarterly OSD SAPRO hosted roundtable as well as the monthly cross-Service research collaboration meeting that fosters communication, information sharing, and research collaboration among the Services.

1.8 Community Involvement: Describe your efforts to engage with non-DoD civilian community leaders and organizations both locally and nationally (e.g., Safer Bars Alliance and Association of Women for Action and Research) to develop collaborative community relationships and programs. Describe how you addressed challenges. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5, (Community Involvement), p. 11 / SecDef Memo (1 May 14), Develop Collaborative Forum for Sexual Assault Prevention Methods, p. 2)

Community engagement and engagement with other federal agencies significantly

increased in 2016. A group of 5 external prevention advisors who represent prevention research and practitioner perspectives continue to consult with the Air Force Sexual Assault Prevention and Response Office (AF SAPRO) to ensure that the Air Force's efforts are in line with current prevention research and practice. In addition, AF SAPRO continued an Interagency Agreement with the Centers for Disease Control and Prevention (Division of Violence Prevention within the National Center for Injury Prevention and Control) both to share time of the AF SAPRO Senior Advisor for Prevention as well as to collaborate in the training of Specialists for the Primary Prevention of Violence (SPPVs). The research projects described in LOE 1 that involve evaluating interventions and policies that have potential utility for sexual assault prevention represent an additional avenue of collaboration and community involvement, such that they ensure the Air Force is utilizing the best available scientific and experiential prevention evidence.

Conference and meeting attendance represents an additional method of building collaborative relationships outside of the Air Force. Below is a summary of these different activities in 2016:

AF SAPRO participated in a meeting of subject matter experts (made up of community stakeholders) from across the nation at the Battered Women's Justice Project Visioning meeting in Minneapolis, Minnesota. The purpose of this endeavor was to nurture an ongoing non-Department of Defense (DoD) civilian collaborative relationship and become further informed of promising practices, as well as federally funded technical assistance, within both the civilian and military criminal justice systems. The Battered Women's Justice Project has served as the Office on Violence Against Women's lead technical assistance provider for civilian as well as military community stakeholders since 1993 and continues to be a nationally recognized leader. The Battered Women's Justice Project has a history of working collaboratively with the military and continues to be a willing partner in the military's efforts to prevent and respond to sexual assault and intimate partner violence. At this meeting three main areas were highlighted by the Visioning group as integral to enhancing preventive efforts:

- Workplace Violence Training in which safety is viewed as a responsibility of everyone in the workplace. Training on this issue enhances awareness such that potential incidents can be prevented before having the opportunity to manifest. Through this type of effort, everyone in the workplace is trained on what their part is in maintaining a safe workplace.
- Maintaining an effective Coordinated Community Response which entails using response lessons learned to inform prevention.
- Engaging Boys and Men to become a positive part of the solution to ending all types of violence through prevention programs mirroring those championed by groups like Men Can Stop Rape and Coaching Boys Into Men.

Ongoing efforts to improve collaboration and coordination with our non-DoD civilian community leaders and organizations include working with the National Organization for

Victims Assistance (NOVA). In 2016 AF SAPRO collaborated with NOVA by providing webinars for Trauma Survivors and Law Enforcement: Unintended Consequences and Righting the Ship. NOVA received such a positive response from these briefings that they requested AF SAPRO provide the same briefing at the NOVA 42nd Annual Conference in Atlanta, GA in August 2016.

Ongoing efforts to improve collaboration and coordination with our non-DoD civilian community leaders and organizations include working with the Maryland Victims Assistance Academy, a state run organization housed out of the University of Baltimore. This non-DoD civilian organization is the longest running State Victim Assistance Academy in the country providing training and technical assistance to community stakeholders throughout the Washington/Maryland/Virginia region. AF SAPRO assisted in planning and facilitating the Maryland Victim Assistance Academy May 2016 1st Annual Trauma Summit. This event targeted civilian and military community stakeholders with the goal of enhancing their respective community efforts to prevent and respond to intimate partner violence through a coordinated trauma informed response. Further, in June 2014, May 2015, and June 2016 AF SAPRO assisted the Maryland Victims Assistance Academy in their week-long annual academy. The Maryland Victims Assistance Academy continues to be a willing partner in the Air Force's efforts to prevent and respond to sexual assault and intimate partner violence. Two areas in particular being targeted by the Academy include:

- Sponsoring a Trauma Summit that focuses on what a trauma informed response by community stakeholders would look like in military environments.
- Having more participation by AF Sexual Assault Response Coordinators (SARCs), SAPR Victim Advocates (VAs), and SPPVs in future Annual Maryland Victims Assistance Academy sessions.

Other prevention and response oriented community involvement activities include:

- Collaboration with the Commander Homeland Security Division, Prince George's County Police Department, Prince Georges County, Maryland to set up a joint briefing, The Neurobiology of Trauma; Trauma Informed Investigations for United States Air Force law enforcement personnel and Prince Georges County Maryland Police detectives. The event was hosted by the Prince Georges County Police Department on 20 January 2016 at which there were about 75 law enforcement personnel in attendance.
- Participation in the International Association of Chiefs of Police National Leadership Forum on Violence Against Women 24-25 February 2016.
- Collaboration with the International Association of Chiefs of Police (April 2016) to develop a technical assistance to plan and film a training video on the law enforcement response to intimate partner violence.

- Facilitated a Criminal Justice Panel at the 13th Annual Maryland Victims Assistance Academy in June 2016.
- Provided an all-day briefing in June 2016 for a multi-disciplinary group including Security Forces, Office of Special Investigations, SARCs, SAPR VAs, and civilian law enforcement. The Neurobiology of Trauma was covered in the morning session and Lethality Assessment was covered in the afternoon session. These voluntary attendance trainings had good turnout from which we received positive feedback as well as a desire for more intimate partner violence focused trainings.

1.9 Incentives to Promote Prevention: Other than the DoD Exceptional SARC and Prevention Innovation Awards, describe your efforts to promote and encourage installation leadership recognition of Service member driven prevention efforts. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Incentives to Promote Prevention), p. 12)

In addition to the Department of Defense Exceptional Sexual Assault Coordinator and Sexual Assault Prevention Innovation Awards the Air Force Sexual Assault Prevention and Response Program also offers the following three Air Force awards: Air Force Exceptional Sexual Assault Prevention and Response Victim Advocate Award, Air Force Exceptional Volunteer Victim Advocate Award and the Sexual Assault Prevention and Response Team Award. The purpose of these awards is to recognize individuals or teams who are outstanding in the area of victim advocacy, support/service and community collaboration, which exceed what is one's routine job responsibilities. Each Major Command is encouraged to submit active duty, civilian, National Guard Bureau or Reserves personnel for consideration, based upon specific criteria and eligibility requirements. Furthermore, these additional awards offer leadership opportunities to recognize the contributions made by both formal and informal efforts that promote awareness, prevention and response to sexual assault. These awards provide extra incentive to all community members to use their talents and skills for the benefit of others. Finally, the awards serve as a powerful tool to bring focus to an ever evolving climate and culture of dignity and respect while celebrating the achievement of those who demonstrate commitment to the prevention of sexual assault.

1.10 Harm Reduction: Describe the metrics being used to assess the effectiveness of Military Service-specific efforts aimed to reduce the impact of high-risk behaviors and personal vulnerabilities. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Harm Reduction), p. 12)

The Air Force Integrated Delivery System (AF IDS) oversees and provides guidance to the Installation IDS with oversight from the Air Force Community Action Information Board (AF CAIB). The Installation IDS, which is the working arm of the Installation CAIB, provides various metrics to installation leadership to reduce the impact of high-risk behaviors and personal vulnerabilities. The metrics include: alcohol related incidents (driving under the influence), domestic maltreatment (neglect, physical, emotional, sexual abuses), child maltreatment (neglect, physical, emotional, sexual abuses) and suicides. Currently, these data (metrics) are presented as trending lines with action plans (or follow-up to previously discussed action plans) to prevent or reduce base-level incidents of personal violence. Future directions for the prevention of personal violence will include taking the current

metrics and identifying specific risk factors (individual meta-data) that is then presented to the Installation CAIB. These risk data will be presented along with specified protective factor data. This approach allows installation subject matter experts along with installation leadership to continually utilize the metrics available to them in an effort to prevent personal violence.

1.11 Education and Training: Describe efforts to address sexual assault prevention in your organization by educating Service members on healthy relationships. Describe any training, particularly training that focuses on changing skills, attitudes, and behaviors, to encourage Service members to take part in healthy relationships. Describe any increases in complexity or depth of training on healthy relationships over the course of a Service member's career. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Education and Training), p. 12)

The 2015 Air Force Sexual Assault Prevention and Response (AF SAPR) Strategy reflects a developmentally appropriate approach to prevention, such that the knowledge and skills addressed in prevention efforts reflect what each Airmen needs and is delivered when they need it. Given the limited number of evidence-based prevention approaches for sexual assault that are currently available, the Air Force is in the midst of adapting and evaluating six interventions and one policy approach for prevention. As a foundation for this work, beginning in 2015 the Total Force received an evidence-based bystander intervention approach training (Green Dot) which is ongoing and is discussed further in sections 1.1 and 1.14 of this report. Future primary prevention efforts will build off of the Green dot foundation and its bystander-intervention impact.

The Air Force Sexual Assault Prevention and Response Office updated and edited the Sexual Assault Response Coordinator (SARC) Course briefing *The Realities of Sexual Assault and Offender Dynamics* to what is now two briefings, *History and Culture of Sexual Assault* and *Male Victimization* provided to all SARCs, Alternate SARCs, and Sexual Assault Prevention and Response Victim Advocates. *History and Culture of Sexual Assault* illustrates the patriarchal nature of sexual violence in our society along with its historical roots which provide the solidly structured circumstances and challenges faced in the social order today. It explores hyper-masculinity, the impact of drugs/alcohol, and offender types. The second briefing, *Male Victimization*, serves to increase awareness of sexual violence as it relates to male victims. Attendees learn how males have been negatively impacted by patriarchy; the toxic effect of sexually violent subcultures; and the influence of hostile, as well as hyper, masculinity in relation to male victimization. Students engage in facilitated discussion on myths, invisibility, and marginalization, as they relate to male victimization in order that male victimization can be brought into context and further understood. In addition, a three part prevention block was added to the SARC Course and includes a primer on a public health approach to sexual assault prevention, the AF SAPR Strategy, and Green Dot.

1.12 Program Metrics: Describe the metrics used to assess your Military Service Sexual Assault Prevention program. Where appropriate, align the metrics with the 2014-2016 DoD Prevention Strategy elements. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 6 (Prevention Metrics, Assessment, and Research), p. 13)

The Air Force Sexual Assault Prevention and Response Office (AF SAPRO) developed a logic model that outlined specific activities, outputs, short, intermediate, and long term outcomes associated with the 2015 Air Force Sexual Assault Prevention and Response Strategy. Existing metrics that could be used to assess short, intermediate, and long-term outcomes in the model were identified. For outcomes without an existing metric, AF SAPRO developed a survey that will be administered to track change over time.

For Green Dot specifically, AF SAPRO developed a multi-pronged monitoring plan. The plan assumes that before effectiveness can occur, Airmen must be exposed to the intervention material as it was intended. Therefore, the plan assesses implementer fidelity, customer satisfaction, commander satisfaction, as well as short, intermediate, and long term outcomes assessed through existing surveys, focus groups, and new longitudinal surveys at selected installations that assess change over time in short and intermediate behaviors such as knowledge and attitude change and increases in bystander behaviors. For example, in terms of customer satisfaction after every Green Dot session participants have the opportunity to complete a short survey. AF SAPRO summarizes results monthly and provides summary reports to the major commands and installations to assist the implementation teams in troubleshooting issues with implementation. In the civilian sector, Green Dot has been effective in significantly reducing sexual violence three to five years after implementation; AF SAPRO expects similar success in prevalence reduction over time.

1.13 Prevention Allocation of Time: As a result of ongoing SAPR related surveys, describe your approved initiatives to assist SAPR professionals improve prevention training. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 6 (Prevention Metrics, Assessment, and Research), p. 13)

Shortly after senior leaders signed the 2015 Air Force Sexual Assault Prevention and Response (AF SAPR) Strategy, it became clear that a dedicated prevention resource was needed to holistically address multiple forms of interpersonal and self-directed violence. To address this need, the Secretary of the Air Force authorized the hiring of Specialists for the Primary Prevention of Violence (SPPVs) for 92 active duty and reserve installations. Hiring for these civilian positions initiated in April 2016 and the kickoff training was held in July 2016 in collaboration with the Centers for Disease Control and Prevention and Green Dot. Sexual Assault Response Coordinators (SARCs) and Victim Advocates (VAs) continue to provide exceptional victim response and care; the addition of the SPPVs provides them additional time that would have traditionally been spent on annual training, as SPPVs and Green Dot implementers will be implementing Green Dot 2016-2018.

In addition to hiring SPPVs, the revised AF SARC course includes several training sessions on a public health approach to violence prevention, the AF SAPR Strategy, and Green Dot to ensure SARCs are equipped to communicate and collaborate with SPPVs and other prevention subject matter experts within the Integrated Delivery System.

Finally, the 2016 Green Dot training is supplemented by squadron commanders' talking points for use during regular monthly Commanders' (CC) Calls. Each unit commander spends time at each monthly CC Call addressing a talking point or two. The purpose is to

create an on-going dialogue between commanders and their Airmen, to embed the topic into every command climate, and to help every commander keep this on their Airmen's list of "things that are important to my commander."

1.14 Future Efforts: Describe your future plans for delivering consistent and effective prevention methods and programs, including how these efforts will help your Military Service strategies, enable resourcing, and make progress in your overall SAPR program.

Future prevention efforts involve completing the evaluations of prevention interventions and policies described in LOE 1 and then implementing effective interventions with the appropriate samples of Airmen. In 2017, the Air Force Sexual Assault Prevention and Response Office (AF SAPRO) will continue to move towards integrated interpersonal and self-directed violence prevention, specifically the 2017 version of Green Dot will reinforce the bystander tools for sexual assault, stalking, and dating/domestic violence and extend these tools to apply to self-directed violence prevention (suicide prevention). This strategic combination of annual training not only boosts the visibility and utility of the Green Dot skills but also significantly reduces Airman's time in training.

Close strategic, operational, and tactical collaboration between the Air Force Surgeon General's office and AF SAPRO will continue in 2017; the two offices will take further steps to eliminate existing seams in prevention and advocacy for sexual assault victims with an intimate and non-intimate partner perpetrator. For example, in 2016 multiple Air Force communities were included in the training for the Specialists for the Primary Prevention of Violence to enhance collaboration and communication at every level. Collaboration of this kind and beyond will continue to mature in 2017.

In addition, AF SAPRO will continue hiring SPPVs for installations (92 total), advocate for additional manpower resources at the major command level, and will continue partnering with the CDC to deliver training to SPPVs which ultimately enhances the Air Force's violence prevention efforts.

In 2018, AF SAPRO will plan for sustainability of Green Dot and planning for subsequent phases of the AF Prevention Plan.

2. LOE 2—Investigation—The objective of investigation is to “achieve high competence in the investigation of sexual assault.”

2.1 Summarize your efforts to achieve the Investigation Endstate: “investigative resources yield timely and accurate results.” (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

The Air Force Office of Special Investigations (AFOSI) made significant improvements in investigation timeliness in Fiscal Year (FY) 2016. The median time to run and publish reports of investigation in over 850 adult victim sexual assault cases was 75 days; the average was 106 days. This is an improvement over FY15 timeliness which was a median of 76 days and an average of 126 days. AFOSI is confident the FY16 timeliness improvements will continue into FY17 as investigation timeliness is a mission metric monitored on a monthly basis by AFOSI's senior leaders.

While timeliness of investigations is important, so too is the quality of the investigations AFOSI produces for commanders. AFOSI's robust case quality review process continued to work well in fiscal year 2016. Headquarters AFOSI case quality reviewers maintained a random case review level of over 30 percent in FY16; almost one in every three investigations closed in AFOSI received a Headquarters AFOSI quality review. Issues with investigation sufficiency were identified in five percent of cases. Most sufficiency issues identified by reviewers were either minor investigative or administrative deficiencies that did not impact the outcome of the investigation.

AFOSI's investigations are also periodically reviewed by the Department of Defense Inspector's General (DoD IG). DoD IG evaluated 159 of AFOSI adult sexual assault investigations opened on or after January 1, 2013, and completed on or before December 31, 2015, to determine whether they were in compliance with all relevant DoD, Military Service, and Military Criminal Investigation Organization guidance. DoD IG revealed this case review disclosed zero investigations with significant deficiencies expected to negatively impact the investigation. AFOSI continues to achieve timely and accurate results as this is the second consecutive DoD IG evaluation with no significant deficiencies.

2.2 Provide an update on the expansion efforts for the Special Victim Investigation and Prosecution Capability for MCIOs, to include how Congressional plus-up funding was spent to directly support this program. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 2, #1, p. 6 / DoDI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 2, para 6ac)

The Air Force has established a world-wide special victim investigation and prosecution capability. Since 2012, Air Force Office of Special Investigations (AFOSI) assigned a senior agent as the sexual assault investigations and operations consultant to oversee the delivery of special victim investigation and prosecution capabilities to adult victim sexual assault cases worked throughout AFOSI. In addition, AFOSI has requested an additional investigations and operations consultant to assist and expand capabilities. AFOSI sexual assault investigations and operations consultant serves as the command's point of contact to the Air Force Legal Operations Agency (AFLOA) for all operational matters pertaining to the special victim investigation and prosecution capability as well as the Air Force's Special Victims' Counsel (SVC) Program. At the installation level, AFOSI agents and base legal personnel coordinate closely on each investigation. AFOSI agents refer unique or complex issues that may affect the investigative or judicial process to the sexual assault investigations and operations consultant, who works closely with AFLOA to develop a solution. The resulting recommendation then flows back to the AFOSI unit through the investigations and operations consultant and to the base legal office through AFLOA.

Each year the legal community holds its Advanced Sexual Assault Litigation Course for the USAF Judge Advocates, Area Defense Counsels, and SVC Program. For the past three years, AFOSI supported this course by presenting cognitive interviewing techniques and procedures and demonstrating a cognitive interview observed by Special Victims' Counsel, Area Defense Counsels, and Special Trial Counsels. The course also has incorporated a court room direct and cross examination testimony portion for agents,

which is very valuable for courtroom preparation.

2.3 Describe your progress in enhancing training focusing on special techniques for victim interviewing by investigators of sexual violence. Include efforts to establish common criteria, core competencies, and measures of effectiveness, and to leverage training resources and expertise. (DoDD 5505.19, Establishment of Special Victim Investigation and Prosecution Capability within MCIOs (4 Sep 15), para 3g / DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 2, #3, p. 6)

In 2012, Air Force Office of Special Investigations (AFOSI) created the Sex Crime Investigations Training Program (SCITP) which provides advance training to sexual assault investigators and many Air Force judge advocates in the use of the cognitive interview technique for interviewing victims of sexual assault. Starting in Fiscal Year 2015, after receiving Department of Defense Inspector General approval to allow Security Forces members to be detailed to AFOSI to assist with sexual assault cases, detailed Security Forces members also began attending SCITP. Since 2012, 336 agents, 98 lawyers and 57 Security Forces investigators have attended the 18 iterations of SCITP. This program later received accreditation by the Federal Law Enforcement Training Center. In 2016, SCITP expanded investigation capability by incorporating a Sexual Assault Forensic Medical Examiner (SAFME) and nursing practitioner consultant to teach information related to medical evidence in sexual assault investigations. Moreover, the SAFME provided insight on merge points between the agents' mission in sexual assault investigations, the medical collection of evidence and care of victims.

AFOSI's decision in 2012 to adopt cognitive interviewing as the primary interview technique for victims of violence has proven to be the right way forward. Consistent with its commitment to using evidence-based methods, AFOSI partnered with the Research Division of the High-Value Detainee Interrogation Group. While this research is still ongoing, preliminary results have already shown statistically-significant results that reinforce expanded use of the technique throughout AFOSI.

Since 2012, AFOSI, through both training and guidance, has emphasized the need for investigators to look into the behavioral histories of those accused of committing sexual assaults. In 2016, Headquarters AFOSI analysts noted an increase in the identification of offenders who have allegedly sexually assaulted multiple acquaintances. We believe this increase in the identification of alleged serial offenders is a direct result of the Command's emphasis on investigating accused's histories.

2.4 Provide an update on your participation in the Defense Enterprise Working Group of Military Criminal Investigation Organizations and Defense Criminal Investigative Service to assess and validate joint investigative technology, best practices, and resource efficiencies benched against external law enforcement agencies. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 2, #4, p. 6)

Air Force Office of Special Investigations (AFOSI) is a member of the Defense Investigative Organization Enterprise-Wide Working Group (DEWG) which meets every other month to address issues that pertain to all member agencies. In March 2015, the

DEWG formed a panel chartered to provide a structured integrated process to assess, on a recurring basis, opportunities for mission efficiencies and cost savings derived from multi-agency requirement generation processes and centralized procurement vehicles. This panel is chaired by an AFOSI agent and known as the Joint Requirement Assessment Panel. One successful project that reached full operational capability in Fiscal Year 2016 is the Crime Scene Investigations Training Program; a seven-week advanced forensic class that prepares agents from AFOSI, Army Criminal Investigation Command, and Naval Criminal Investigative Service to investigate violent crime scenes at a level of proficiency that meets national best practices. To date, 19 AFOSI agents have been trained through this program; 60 agents across the DoD. Two joint projects have now reached initial operational capability. First, the development of a crime scene application that standardized crime scene reports across the DoD and raised the level of documentation to the national standards is in limited use within AFOSI, Army Criminal Investigation Command, and Naval Criminal Investigative Service; full implementation will occur over the next year. Second, the criminal history biometric inquiries and reporting through the Federal Bureau of Investigations' Next Generation Identification has been identified for consolidation across the DoD law enforcement agencies. The capability has passed a proof of concept demonstration and full integration of all service law enforcement biometrics is being developed.

In 2013, the Department of Justice established the National Commission on Forensic Science in partnership with the National Institute of Standards and Technology, to improve on the reliability of forensic science. The National Commission on Forensic Science is co-chaired by the Deputy Attorney General and the National Institute of Standards and Technology Director. On 30 April 2015, the National Commission on Forensic Science adopted the recommendation that all forensic service providers become accredited. In the past, accreditation has been voluntary in most jurisdictions. Several states have passed legislation mandating accreditation and other forms of oversight of forensic service providers, but the legislation and oversight varies greatly from state to state. The goal of universal accreditation is to improve forensic service provider's compliance with industry best practices, promote standardization, and improve the quality of forensic service provider's services across the country. The National Commission on Forensic Science has proposed the Attorney General direct all currently-accredited Department of Justice forensic service providers maintain their accreditation, and those who are not currently accredited apply for accreditation within 5 years. The Defense Criminal Investigative Organizations have not yet sought accreditation for their forensic service providers. These forensic service providers conduct analysis on evidence associated with all types of criminal investigations, including sex crimes investigations.

2.5 Describe your progress in assessing and coordinating with the United States Army Criminal Investigation Laboratory and Armed Forces Institute of Pathology to improve investigative support and facilitate evidence processing (i.e., turnaround time for processing of Sexual Assault Forensic Examination (SAFE) kits). (Joint Chiefs of Staff Strategic Direction to the Joint Force on SAPR (7 May 12), p. 11)

The United States Army Criminal Investigation Laboratory's (USACIL) median average turn-around time for processing Air Force sexual assault cases was 103 days for the second quarter of Fiscal Year (FY) 2016 and 95 days for the third quarter of FY16. This

represents a significant increase over the historic processing times for Air Forces cases, and the laboratory expects to get well by the end of FY17. Air Force sexual assault case processing times for the previous two quarters were 50 days for the first quarter of FY16 and 43 days for the fourth quarter of FY15.

During the first and second quarters of FY16, USACIL's Laboratory DNA branch experienced internal audits, the implementation of a new management system, and increased court-related travel. These combined factors drove an increase in the average turn-around times. The laboratory expects to divert personnel from other areas of the lab to significantly reduce the backlog by the end of FY17.

Testing all Sexual Assault Forensic Examination (SAFE) kits collected as part of a criminal investigation into a sexual assault is a national best practice (National Sexual Assault Policy Symposium, Sep 2016). In line with current known best practices, effective 1 January 2016, USACIL eliminated the consent case policy and worked with the Criminal Investigative Division (CID) to eliminate similar language from CID Regulation 195-1. An All CID notification was issued advising that all SAFE kits and other associated evidence should be submitted in all cases, regardless of consent issues. Currently, USACIL is processing all SAFE kits submitted from ongoing investigations effective day one forward as of the policy change. Resourcing is an on-going issue which does impact processing times; it not whether or not evidence will be tested, but rather "how quickly" USACIL can complete the testing on current cases. Resourcing is an on-going issue which does impact processing times; ie not whether or not evidence will be tested, but rather "how quickly" USACIL can complete the testing on current cases. Timeliness will also likely be effected when un-submitted SAFE kits from previously closed cases are added to the "current" case work load.

2.6 Describe your efforts to increase collaboration and improve interoperability with civilian law enforcement to include sharing information on Civilian and Military Protective Orders and assure receipt of civilian case dispositions. (DoDI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 4, para 3g)

Air Force Office of Special Investigations (AFOSI) has offices at 260 locations worldwide. Agents continually nurture local working relationships with over 1,500 law enforcement agencies through aggressive locally-administered liaison programs to ensure worldwide mission effectiveness. In addition to our 1,900 full-time active duty and civilian special agent work force, the majority of AFOSI's 346 reserve agents are also full-time employees of local, state and federal law enforcement organizations. AFOSI leverages its reserve agents to strengthen interagency relationships worldwide. AFOSI continues to stress the important of leveraging its liaison and reserve agent programs as a way to enhance our ability to refer cases to the appropriate investigative jurisdictions.

Pursuant to the requirements of section 1567a, Title 10, United States Code, if a Military Protective Order is issued against a member of the armed forces and any individual involved in the order does not reside on a military installation at any time during the duration of the Military Protective Order, the commander of the military installation shall notify the appropriate civilian authorities of: the issuance of a protective order; and the

individuals involved in the order.

2.7 Describe your efforts in providing training and guidance for all first responders to a report of a sexual assault that ensures the preservation of evidence and witness testimony. Also, describe the training and guidance specifically provided to law enforcement on victim trauma and the requirement that only the MCIO shall conduct the formal victim interview. Describe any additional training and guidance provided for locations where the arrival of the MCIO will be delayed (e.g., due to mission requirements or a submarine cannot surface for a week). Address how this training and guidance assists law enforcement and commanders in responding appropriately to reports of sexual assaults in these locations. (DoDI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 10, para 7e)

Air Force guidance related to a sexual assault incident can be found in Air Force Instruction (AFI) 71-101V1 which states in para 2.19 that In Accordance With (IAW) Department of Defense Instruction 5505.18, Air Force Office of Special Investigations (AFOSI) will initiate investigations of all offenses of adult sexual assault of which they become aware, that occur within their jurisdiction, regardless of the severity of the offense. Security Forces (SF) notifies AFOSI when unrestricted reports are received. AFOSI safeguards Sexual Assault Forensic Examination kits as evidence for restricted reports IAW AFI 90-6001, *Sexual Assault Prevention and Response (SAPR) Program*. As outlined in Attachment 2 Table A2.1 Air Force Office of Special Investigations and Security Forces Investigative Matrix, Rule 29 directs SF to notify AFOSI if the alleged matter involves as listed below:

- Rape, Sexual Assault, Aggravated Sexual Contact, and Abusive Sexual Contact, in violation of Article 120
- Forcible Sodomy (oral or anal sex), in violation of Article 125
- Attempts to commit any of the above offenses, in violation of Article 80
- Forcible Pandering, Major Indecent Viewing (e.g., AD Airmen watching a dependent minor undress) and Major Indecent Exposure (e.g., AD Airmen exposing his penis to a dependent minor), in violation of Article 120
- An unprofessional relationship involving an authority figure (see Note 2) and either vaginal intercourse, oral or anal sodomy, digital penetration of the vagina or anus, or the fondling of the genitalia or female breasts, in violation of Article 92

When SF encounter a situation involving a possible sexual assault, the appropriate notifications must be made to AFOSI. SF members will not interview or attempt to investigate sexual assault incidents but should attempt to record anything deemed relevant and of value. Additionally, SF will secure the scene to preserve evidence for AFOSI collection.

SF incident response training outlined in CAREER FIELD EDUCATION AND TRAINING PLAN, SECURITY FORCES SPECIALTY, MILITARY WORKING DOG HANDLER SPECIALTY, COMBAT ARMS SPECIALTY AFSCs 3P0X1/A/B dated 20 March 2015, provides instruction to first responders on conducting preliminary investigations of incidents or complaints, securing crime and major accident, disaster and incident scenes and sexual assault/rape. Additionally, SF members receive a one hour block of instruction titled Sexual Assault Prevention and Response Program-Law Enforcement annually. The objective of the course is to identify basic facts and general principals about crisis intervention for a sexual assault case IAW DoD and USAF instructions and the US Manual for Courts-Martial.

2.8 Describe your future plans for the achievement of high competence in the investigation of reports of sexual assault by MCIOs.

Air Force Office of Special Investigations (AFOSI) achieved high competence in the investigation of sexual assault by sustaining the progress previously achieved in investigation quality and timeliness, leveraging research-based interviewing techniques, and ensuring AFOSI contributes to a robust special victim investigation and prosecution capability within the Air Force. In September 2014, the Joint Sex Assault Team (JSAT) concept was adopted between AFOSI and United States Air Force Security Forces (SF). Since the JSAT program's inception, 57 SF members have been trained through the Sex Crime Investigations Training Program (SCITP) and assigned as JSAT members at 26 main operating bases throughout the Air Force. These JSAT members are assigned to AFOSI units and serve as a force multiplier at locations with above average sexual assault case loads. AFOSI will continue to conduct five SCITP course iterations each year for the foreseeable future, annually training 150 agents, lawyers and SF investigators. In addition to formal training, members from the Headquarters AFOSI Violent Crimes Branch and the Command's Sexual Assault Investigations and Operations Consultant will continue to conduct training at many of our region operational leadership meetings in order to ensure our unit leadership teams receive up-to-date information on sexual assault investigative sufficiency and timeliness and to ensure they have a thorough understanding of new and emerging polices, techniques and procedures.

Since 2012, Headquarters AFOSI staff along with Sexual Assault Prevention and Response agents, Command Psychologists, and the Command's Sexual Assault Investigations and Operations Consultant have attended the Crimes Against Women Conference. This conference provides an opportunity to expand knowledge, capabilities, and learn the latest techniques and procedures. Additionally, personnel are exposed to the latest case law and policy as it pertains to sexual assault behavior, violence, investigation and prosecution; which is constantly changing at the national level.

3. LOE 3—Accountability—The objective of accountability is to “achieve high competence in holding offenders appropriately accountable.”

3.1 Summarize your efforts to achieve the Accountability Endstate: “perpetrators are held appropriately accountable.” (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

The Air Force provides a fair and equitable system of accountability. The system ensures legal fairness, maintains good order and discipline, and promotes efficiency and

effectiveness. Key components of the Air Force's system are the commander and leadership driven programs that address survivor support as well as alleged offenders' appropriate accountability and support. The Air Force's efforts include:

- Prompt and compulsory referral of sexual assault allegations to Air Force Office of Special Investigations.
- Prompt investigation of reported sexual assault complaint/report.
- Immediate reporting of sexual assault/misconduct, harassment, retaliation, and inappropriate relationship allegations to senior leadership.
- Notification of installation Staff Judge Advocate and legal office within 24 hours of a sexual assault allegation.
- Prompt and timely meetings between investigating agents and the judge advocate, the first being within 48 hours of a sexual assault allegation.
- Thorough review of completed investigations by a Sexual Assault Initial Disposition Authority Commander. The Sexual Assault Initial Disposition Authority Commander, who is advised by a Staff Judge Advocate, will consider evidence and victim input to make fully informed and sound disposition decisions. The initial disposition decision is reviewed by at least one commander.
- Training of Wing, Vice Wing, and Group Commanders in the Senior Officer Legal Orientation course (SOLO).

Senior Trial Counsel (STCs) are the Air Force's most experienced prosecutors. STCs prosecute the most complex cases Air Force-wide while mentoring and training base trial counsel. STCs provided approximately 2100 man hours of training in calendar year 2015. Experienced STCs work closely with base legal offices, Military Criminal Investigation Organizations and Special Victims Counsel (SVCs), from the earliest stages of the investigative process through court-martial and post-trial processing to ensure that all efforts are taken to hold alleged offenders appropriately accountable under the law. The ability to partner very experienced STCs with local counsel and military investigators ensures that the government is well represented through all stages of the process and maximizes the chances of conviction of alleged offenders when warranted by the evidence.

In accordance with Air Force Instruction 51-201, *Military Justice Administration*, Section 13R, paragraph 13.39, the Chief, Government Trial and Appellate Counsel Division (AFLOA/JAJG) identifies experienced STCs who have demonstrated proficiency in providing the highest quality of legal representation for the government in cases involving special victims. Identified counsel are designated as members of the Special Victims Unit (SVU-STC). SVU-STCs are experienced prosecutors with specialized training and experience in prosecuting sexual assault crimes involving both children and adults; based

on the complexity of any given case, the Chief, Senior Trial Counsel will detail an SVU-STC to any Special Victim Investigation and Prosecution case that arises in the Air Force. STCs and SVU-STCs participate in approximately 90% of sexual assault trials Air Force-wide.

3.2 Provide an update on SAPR training provided to those who are affiliated with the Special Victim Investigation and Prosecution Capability program (paralegals, trial counsel, special victims' counsel / victims' legal counsel, and victim-witness assistance personnel) for responding to allegations of sexual assault. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 3, #1, p. 6)

Sexual Assault Prevention and Response (SAPR) training is provided to those affiliated with the Special Victim Investigation and Prosecution (SVIP) Capability in a plethora of ways. First, annual training for all judge advocates, paralegals, Victim and Witness Assistance Program (VWAP) personnel and legal assistance attorneys is accomplished via First Responder training. The Air Force's SVIP capability is comprised of judge advocates and paralegals who have taken the First Responder training course. The web-based learning course covered numerous topics including but not limited to reporting options; the roles of the sexual assault response coordinator, victim advocate, trial counsel, paralegals, and VWAP liaison; case typologies such as drug and alcohol facilitated sexual assault; rules of evidence and evolving case law; victim privacy matters; and working with Special Victims' Counsel (SVC). The First Responder training is mandatory for all Active Duty and Reserve judge advocates who provide military justice advice, legal assistance, or who serve as trial counsel; Active Duty and Reserve paralegals that provide legal assistance support or directly contribute to a VWAP; and civilian employees who work in military justice, legal assistance, or contribute to a VWAP.

SAPR training is also provided to SVIP affiliated personnel via distance education. In Fiscal Year (FY) 2015, Air Force Judge Advocate General's School (AFJAGS) offered a five-week VWAP distance education course. SAPR topics covered included: discussing the military justice process with victims; the neurobiology of trauma and counterintuitive behaviors; understanding the various individual roles of those within the special victim capability; Air Force and civilian resources available to crime victims. The VWAP distance education course is offered twice per year, enhancing the installation level training and reach-back support for judge advocates and paralegals who serve integral components of the AF's SVIP capability.

SAPR training is also delivered to the AFJAGS through various specific brick-and-mortar courses sponsored by the AFJAGS, Air Force Office of Special Investigations (AFOSI), and civilian non-DoD organizations such as the National District Attorney's Association and Aequitas. A sexual assault scenario is usually used as the factual framework for most courses held by the AFJAGS. SAPR topics are weaved into the curriculum and discussions in an organic way while reinforcing the important principles embodied by the SAPR program. Some of the courses offered at AFJAGS are:

- Trial and Defense Advocacy Course: This is a two-week course that allows judge advocates to develop their trial advocacy skills through practical demonstrations and mock court exercises. Experts from both within and outside the Department of

Defense teach students how to overcome the challenges of litigating sexual assault cases to include addressing a case with an intoxicated victim, working with expert witnesses, and cross-examining an accused. In FY16, 67 judge advocates attended this training.

- Training by Reservists in Advocacy and Litigation Skills: AFJAGS also provides continuing litigation training through its Training by Reservists in Advocacy and Litigation Skills (TRIALS) course, which visits multiple Air Force legal offices each year providing on-site advocacy training. In FY16, training was held at 7 bases world-wide, honing the skills of 94 judge advocates. The TRIALS team is comprised of experienced Reserve judge advocates, The AFJAGS faculty members, and a sitting military judge. The team offers a two and one half-day intensive advocacy training program using a fact pattern involving a sexual assault case.
- Intermediate Sexual Assault Litigation Course: This course is always paired with the TRIALS course and was taught four times in FY16 at the AFJAGS and at other base locations throughout the world. In FY16, 154 judge advocates attended this training. This course provides trial and defense counsel and SVC updates on: evolving aspects of military trial practice; practical lessons on securing and using evidence and experts; litigating Military Rule of Evidence (MRE) 412 “rape shield” provisions and exceptions, MRE 513 psychotherapist-patient privilege, and MRE 514 victim advocate-victim privilege; and instruction on litigating sexual assault cases. Pairing this course with the TRIALS course enables immediate application of this classroom instruction with courtroom skills practice. A forensic psychologist teaches a block of instruction to prosecutors and defense counsel. Students hear from senior leaders, receive instruction from experienced litigators, and network with other counsel.
- Advanced Trial Advocacy Course: This course provides education in advanced trial techniques to experienced trial and defense counsel to prepare them to try major, complex courts-martial, including sexual assault trials. 20 attorneys received this advanced litigation training in FY16.
- Advanced Sexual Assault Litigation Course: This one-week course is offered to Special Victims’ Unit Senior Trial Counsel (SVU-STC), Special Victims’ Counsel, and Senior Defense Counsel and includes AFOSI agents who have been designated to investigate sexual assault cases. This course fosters a collaborative approach to sexual assault investigations and prosecutions with its joint approach to training. Training focuses on use of expert witnesses at trial, the victim interview process and victim testimony at trial, and overarching concepts related to sexual assault investigations. The AFJAGS brings in two forensic psychologists for this course and a full day of instruction is dedicated to this topic with students conducting mock direct and cross-examinations of the experts. Similarly, one day of instruction is dedicated to sexual assault nurse examiners, and two forensic sexual assault nurse examiners provide instruction, with students conducting mock direct and cross-examinations of the experts. In FY16, six defense counsel, six SVC, six STC, and six AFOSI agents

completed this training.

- Sex Crimes Investigation Training Program: Another course that fosters a collaborative approach to sexual assault investigations and prosecutions is the eight-day Sex Crimes Investigation Training Program (SCITP) that judge advocates attend with AFOSI agents at the Federal Law Enforcement Training Center at Glynco, Georgia. This course was originally developed by the AFOSI for agents in FY2012, and has evolved to include both AFOSI agents and judge advocates. Among the faculty for this course are the SVU-STC Chief of Policy and Coordination and the AFJAGC's subject matter expert (SME) in the areas of sexual assault, domestic violence, and child abuse. The SVU-STC Chief of Policy and Coordination is one of Air Force's most experienced prosecutors. The AFJAGS SME is a former civilian prosecutor with over 20 years of experience dealing with special victims and special victim crimes. SCITP is offered five times a year and contains military justice and policy updates, SAPR policy updates, training on cognitive biases in sexual assault cases, the psychology of victims and offenders, advanced victim and suspect interviewing techniques, advanced crime scene processing, information related to drug and alcohol facilitated sexual assaults and working with sexual assault nurse examiners, sexual assault response coordinators, and working with SVC. In FY16, 25 JAGs and 118 AFOSI agents completed SCITP.
- Military Justice Administration Course: This one-week course provides training in the management of base legal offices' military justice sections to judge advocates and paralegals who are currently or soon will be the Chief of Military Justice (attorney) or the Non-commissioned Officer in Charge of Military Justice (paralegal). In FY16, 116 students learned to manage a base level military justice section, including how to process a case from initial stages of investigation through post-trial. Since at least 2010, the course has covered sexual assault prosecution, including understanding the role of SAPR, SVC roles, Article 120 updates and other changes to laws and regulations.
- Gateway (Judge Advocate Advanced Law & Leadership Course): Gateway is a two-week course designed to prepare new field grade judge advocates for the leadership and challenges that they face at every level. Students will receive advanced instruction on substantive, front-burner legal issues while participating in realistic exercises to hone leadership, management, and communications skills. Military Justice-related topics address processing complex cases, to include sexual assault cases. The course will challenge the students' ability to master the facts, law, and skills associated with practical applications. Students will develop creative and effective courses of action, briefings, and written products within peer-led flights. In FY16, 57 judge advocates attended the course.
- Staff Judge Advocate Course: This two-week course provides a refresher in military law and a study of Air Force leadership principles for judge advocates who are assigned to staff judge advocate positions. This course is designed to facilitate the transition of judge advocates to the position of staff judge advocate, the senior legal

advisor to Air Force commanders, including those who serve as special and general court-martial convening authorities. Some topics consist of processing a sexual assault case from beginning to end, cardinal principles of military justice (environment, moving cases, visibility, fairness), mentoring trial counsel, retaliation, and victim support from the legal office. In FY16, 65 judge advocates attended the course.

Finally, an important component of how the Air Force delivers SAPR training to SVIP personnel is through the direct training efforts of SVC. SVCs frequently and effectively interact with the key members of the SVIP capability, ensuring victims' interests are represented throughout the military justice process. SVCs and Special Victims' Paralegals receive Annual SAPR training and additional subject matter training at the Special Victims' Counsel Course (SVCC). The SAPR-specific block of instruction at the SVCC is provided by the Air Staff Counsel to the Air Force SAPR Office. The training provides a more in-depth review of SAPR policies and a discussion of best practices when working with SARCs and VAs. SVCs also conduct specialized training with trial counsel at the Intermediate Sexual Assault Litigation Course and the Advanced Sexual Assault Litigation Course (ASALC). SVCs and trial counsel hold joint training sessions to discuss litigation issues specific to sexual assault cases and sexual assault response. ASALC is a comprehensive training targeted at enhancing the integration of Office of Special investigation agents in the military justice process while sharpening the sexual assault-specific litigation skills of the trial participants.

3.3 Describe your efforts to ensure that the personnel records of Service members convicted by court-martial, adjudged non-judicial punishment, or other punitive administrative action for a sex-related offense are updated to reflect punitive action taken, as appropriate. (DoDI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 10, para 2d(5)(g))

The Air Force is 100% compliant with all statutory and regulatory guidance pertaining to the documentation of sex-related offenses and mandatory initiation of discharge proceedings for sexual assault. A copy of all records of court-martial conviction and non-judicial punishment action for any offense is kept in a member's master personnel file at the Air Force Personnel Center. With regard to the initiation of discharge processing, the Air Force requires the initiation of separation action when a commander has information indicating that an airman has committed a covered sexual assault offense (rape, sexual assault, aggravated sexual contact, abusive sexual contact, forcible sodomy, or attempt to commit the same). This mandatory discharge processing is required in all sex assault cases in which a commander has credible information indicating that an airman committed a covered offense, not only cases that result in court-martial conviction.

3.4 Describe your efforts to ensure SARC, SAPR VA, MCIO, and commander knowledge of recent victim rights and military justice updates in FY16. (DoDI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 10, para 7a)

The Senior Officer Legal Orientation (SOLO) course provides legal instruction to new Wing, Vice and Group Commanders. The course provides attendees with dedicated legal training to prepare commanders to exercise the authorities assigned to them under the

Uniform Code of Military Justice. SOLO is taught in conjunction with the Air Force Wing and Group Commander's Course and covers military justice, ethics, victim rights, First Amendment issues, common installation legal matters, restriction and reprisal and operations law. In Fiscal year 2016, SOLO was offered six times for 409 commanders.

The Senior Enlisted Legal Orientation orients sitting and newly assigned Air Force Command Chief Master Sergeants to legal issues they and their commanders are likely to encounter, and lay the foundation for a productive relationship between the Command Chief Master Sergeant and the legal office by providing focused, small group instruction (including one-on-one when needed), covering legal issues pertinent to all senior Air Force leaders plus legal issues of special interest to Command Chief Master Sergeants. Victim Rights are specifically covered in this course. The course was offered four times in FY 2016 and 86 CCMs attended the course.

The General Court-Martial Convening Authority (GCMCA) Training Module is a resource created by the Air Force Judge Advocate General's School and distributed to GCMCAs via their servicing legal offices. The training consists of 21 slides and a written guide aimed to orient and assist GCMCAs in understanding and executing their military justice duties and related disciplinary and investigatory responsibilities. With regard specifically to victim rights and military justice updates, the training includes sections on Sexual Assault Incident Report Oversight Reports, GCMCA Review and Command Action in Sexual Assault Cases, Transactional/Testimonial Immunity for Sexual Assault Victims, Reprisal and Restriction Allegations, Sexual Harassment Allegations, and Understanding Command Influence.

Special Victims' Counsel (SVC) leadership provides regular training on the SVC Program and victims' rights at Sexual Assault Response Coordinator (SARC) and Sexual Assault Prevention and Response Victim Advocate (SAPR VA) courses led by the USAF Personnel Professional Development School. Additionally, the Air Force Judge Advocate General's Corps (AFJAGC) sexual assault/DV/child abuse Subject Matter Expert (SME) also provides training regarding privileges and confidentiality at the annual SARC and VA Refresher courses.

SVC leadership, the Special Victims' Unit Senior Trial Counsel Chief of Policy and Coordination, and the AFJAGC's sexual assault SME (see question 3.2) also provide training at the Office of Special Investigations' Sexual Crimes Investigation Training Program. SVCs and SARCs also regularly provide joint specialized training to local SARCs, Family Advocacy Program personnel, Domestic Abuse Victim Advocates, SAPR VAs, paralegals and victim-witness assistance personnel to ensure all receive updates about victims' rights.

3.5 NGB, provide an update to your efforts to ensure that all Unrestricted Reports of sexual assault (both Title 10 and 32 status) are referred to the appropriate MCIO, civilian law enforcement, or to the NGB Office of Complex Administrative Investigation. (Chief National Guard Bureau Notice 0400 (16 Apr 14), para 1b)

Please see the National Guard Bureau enclosure for a response to this Inquiry.

3.6 Describe your current policies and procedures to ensure alleged offenders are provided due process rights and protections afforded by the Constitution and the Uniform Code of Military Justice. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 3, #6, p. 6)

On 26 July 2016, The Judge Advocate General of the Air Force (TJAG) issued policy guidance for all JAG Corps military justice practitioners regarding criminal discovery obligations. This guidance was issued as part of a broader training initiative on discovery with the goal of satisfying the due process rights of suspected offenders, preventing surprise at trial for any party to a court-martial, and preventing delays. The policy guidance serves to clarify existing discovery obligations through reference to governing rules and case law with an emphasis on liberal discovery balanced against recognition of privileges. Senior Trial Counsels (STCs) are currently conducting training on this policy in conjunction with temporary duties taken for courts-martial and associated hearings.

At the core of the Air Force's efforts to ensure that the due process rights of every accused are preserved is the Air Force Trial Defense Division (JAJD). Since its creation in 1974, JAJD has been focused solely on providing Air Force members worldwide with independent criminal defense representation in a zealous, ethical, and professional manner. To ensure full freedom to accomplish its mission, the men and women of JAJD operate independently of installation leadership and alleged offender's chain of command. Military defense counsel are dedicated to providing the best possible outcome for the individual Airman in each and every criminal or adverse administrative proceeding. Currently, JAJD is composed of 70 Defense Paralegals, 85 Area Defense Counsel, 19 Senior Defense Counsel, 3 Chief Senior Defense Counsel, as well as the Division Chief and the Deputy Chief for policy and training.

In addition to ensuring that all Airmen accused of a crime have zealous advocacy in the form of a defense counsel; the military justice process includes a full spectrum of rights and due process protections that apply to an accused as a matter of law or Air Force policy. After an investigation of allegations of wrongdoing, a commander may dispose of allegations against a member by several means, including no action, administrative action, non-judicial punishment or trial by court-martial. Each commander exercises his or her own best judgment, after reviewing all relevant facts and considering victim input and legal advice, in determining how to appropriately handle a case. When interviewed for an investigation, Airmen are informed of their rights under Article 31, Uniform Code of Military Justice (UCMJ), and have the right to remain silent and consult with counsel. This protection against self-incrimination is broader than those protections against self-incrimination afforded by Miranda.

If a member's commander decides to take administrative action such as a letter of reprimand, the member is given three duty days to speak with a Military Defense Counsel (MDC) before responding. After consulting with his or her attorney, the member is given the opportunity to respond to the administrative action in writing. Once a commander makes a decision, the member is notified of the decision. The member will then be notified if the commander intends to place the action into an Unfavorable Information File

or place the member on a Control Roster, which could have adverse effects on their ability to go on temporary duties or make a permanent change of station (See Air Force Instruction (AFI) 36-2907).

If a member's commander decides to offer non-judicial punishment, the member is given three duty days to speak with the Military Defense Counsel before responding. JAJD provides military defense representation for all nonjudicial punishment proceedings regardless of rank of the command offering the nonjudicial punishment or the accused. After consulting with his or her attorney, the member is given the opportunity to respond to the administrative action in writing. The member is also entitled to speak in person with his or her commander. If the commander finds that the member did commit one or more of the offense and imposes punishment, the member has the right to appeal that decision. The member has five calendar days to submit matters on appeal and is again provided the assistance of MDC. The member's commander will then consider the matter and decide if he or she is going to grant the appeal. If they deny the appeal in full or in part it must go to the next higher commander for final decision. Once a final decision is made, the member is notified and must acknowledge the decision by signing the nonjudicial punishment form. (See AFI 51-202).

If a commander decides to prefer charges, there are additional due process considerations. Before charges may be referred to trial by general court-martial, a preliminary hearing must be conducted into the subject matter of the charged offenses in accordance with Article 32, UCMJ. After the Article 32 preliminary hearing has been completed, the convening authority must find that there are reasonable grounds to believe that an offense triable by a court-martial has been committed, that the accused committed it, and that the specification alleges an offense. (See AFI 51-201).

Any service member charged with an offense under the UCMJ is entitled to a presumption of innocence until proven guilty in court by legal and competent evidence beyond a reasonable doubt. MDC is provided free of charge. A service member also has the right to be represented by a military counsel of his own selection, provided the counsel selected is reasonably available. In addition to his MDC, the service member has the right to be represented by a civilian counsel at no expense to the government.

If the member's case goes to trial, he is represented by his MDC and/or civilian defense counsel. After a trial is completed, if the service member is convicted, the court-martial convening authority is required to consider the results of trial, the recommendation of the staff judge advocate, and any matters submitted by the service member before taking action on the case. The convening authority's action may not change a finding of not guilty or increase any sentence adjudged by the court-martial.

After the convening authority's action, if the sentence includes a dishonorable or bad conduct discharge or confinement for one year, the Air Force Court of Criminal Appeals automatically reviews the case for error. In these cases, an appellate MDC is appointed to represent the member at no expense to the member. Depending on what happens at the Air Force Court of Criminal Appeals, the member may appeal to the Court of Appeal

for the Armed Forces and potentially to the United States Supreme Court.

3.7 Provide an update on the Special Victims' Advocacy Program that affords legal consultation and representation for Service members, eligible adult dependents, and DoD civilian employees who report being a victim of sexual assault, to include how Congressional plus-up funding was spent to directly support this program. Describe how your Military Service is implementing the Special Victims' Advocacy Program for DoD civilian employees. Provide an update on how you are informing Officers, Non-Commissioned Officers (NCOs), and junior Service members of the availability of Special Victims' Counsels (SVCs)/Victims' Legal Counsels (VLCs). Include your Military Service's metrics for measuring the success of the program. (SecDef Memo (14 Aug 13), *Improving Victim Legal Support*, p. 1 / DoDI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 2, para 6ac / NDAA FY16, Sec 532 / NDAA FY13, Sec 573)

In 2016, the Special Victims' Counsel (SVC) Program grew to 45 SVCs and 26 Special Victims' Paralegals (SVPs) at 42 locations worldwide. Five Senior SVCs (SSVCs), located in each judicial circuit (Eastern, Central, Western, European and Pacific), supervise, train and mentor SVCs and SVPs within their area of responsibility and interface with intermediate levels of leadership at Sexual Assault Prevention and Response (SAPR), Air Force Office of Special Investigations (AFOSI) and legal offices. A sixth SSVC spearheads the SVC Program's appellate practice and outreach efforts.

As of 31 August 2016, SVCs have represented 2,399 victims, including 73 children, over the life of the program. Currently there are 1,068 active clients, of which 51 are children. With the addition of 21 newly assigned SVCs in the summer of 2016, the average SVC caseload is currently 23 clients per attorney. In Fiscal Year (FY) 2016, SVCs appeared in 112 courts-martial and 82 preliminary hearings. They also filed and argued 68 motions on behalf of their clients and represented clients in 294 interviews with investigators, defense counsel and trial counsel.

Pursuant to the FY16 National Defense Authorization Act (NDAA), victims were authorized to seek enforcement of their rights in the Service Courts of Criminal Appeals (CCAs). The SVC Program filed 17 briefs on behalf of their clients at the CCAs as well as the Court of Appeals for the Armed Forces (CAAF), either as a Real Party in Interest or as an *amicus curiae*. In a case of first impression, an AF SVC filed an extraordinary writ following an adverse ruling by the military judge with respect to client mental health records. The writ was denied by the Navy-Marine Court of Criminal Appeals (NMCCA). The SVC appealed their decision to CAAF, which examined whether it had the authority to review the ruling by the NMCCA. CAAF found that it lacked jurisdiction to do so pursuant to Article 6b, Uniform Code of Military Justice (UCMJ).

During FY16, Congressional plus-up funding was used for travel, training and establishment of facilities and equipment for new and existing SVC offices. SVC travel included initial client consultation, preliminary hearings, courts-martial, and discharge boards and totaled over \$821,000. As part of the robust continuing education and training

of SVCs, \$321,000 was spent for travel and fees for SVCs to attend both military- and civilian-hosted training. Additionally, \$850,000 was expended to purchase equipment, furniture, and renovations of new and existing offices. Finally, Congressional plus-up money has funded a new case management/data system development. This tailored data retention and case management tool will permit SVCs to document their client interactions and services rendered, while allowing Program leadership to assess metrics and respond to frequent data calls.

In FY16, SVC representation expanded to Department of the Air Force civilians. SVC leadership continues to work with JAG Corps Labor Law Subject Matter Experts (SME) to develop appropriate policy and training for this complex representation. In order to enhance SVC leadership understanding of the issues, the Associate Chief and a SSVC attended the Federal Employment Labor Law Course in October 2015 and the Associate Chief attended the Advanced Labor Law Course in April 2016. SVCs were then provided an overview of federal employment law issues in November 2015. At the May 2016 SVC course a detailed overview of federal employment law and scenario-based discussions were added to the curriculum. These courses were taught by a labor law SME with previous SVC experience. Finally, guidance regarding Department of the Air Force civilian representation is included in the SVC chapter of Air Force Instruction 51-504, *Legal Assistance and Special Victims' Counsel Programs* (currently in staffing for publication). Examples of SVC representation of Department of the Air Force civilians include: representing a client in a Merit Systems Protection Board hearing, resolving client issues prior to an Equal Opportunity informal mediation hearing, and advocating before a General Court-Martial Convening Authority to impose non-judicial punishment on an O-6 offender and obtain a Permanent Change of Station for the client.

The SVC program undertakes several initiatives to promote SVC services and availability. Briefings are provided at several formal training courses conducted at Maxwell AFB including Commissioned Officers Training, Air Command and Staff College, Air War College, the Senior Enlisted Legal Orientation Course, the Senior Officer Legal Orientation Course and a myriad of courses internal to the AF Judge Advocate General's School.

Locally, SVCs and SVPs brief at the First Term Airman's Center, Commander's Calls and Newcomers briefings held at installations within their area of responsibility. SVCs and SVPs conduct outreach to senior enlisted members at Wing Staff meetings, First Sergeants Symposia, First Sergeant Breakfasts, and Top 3 meetings. SVCs also post flyers that include a brief description of SVC services and contact information throughout their bases of responsibility and are regularly included as a resource on a Wing's webpage. An AF SVC also participated in a DOD-created public service announcement regarding SVC services which is available DOD-wide on the Armed Forces Network.

The Air Force SVC Program led the Service program managers' coordination for the Department of Defense implementation requirement to establish program guiding principles and standardization of training and performance measures pursuant to the FY16 NDAA Section 535. This effort was implemented on 2 Sep 2016 when the Deputy

Secretary of Defense signed the directive into effect. While not required by the Department of Defense, the Air Force SVC Program internally implemented additional performance assessment measures to include bi-annual self-inspection checklists and comprehensive trip books, enabling The Judge Advocate General to more effectively execute his Article 6 responsibility when visiting installations.

Currently, SVC Program data is collected and maintained in SharePoint. This will be replaced by a SVC-specific case management program currently in development, note above. Metrics tracked include: 1) total number of clients; 2) number of child clients; 3) number of DoD civilian clients; 4) interviews attended (including investigative and pre-trial interviews); 5) Article 32, UCMJ, preliminary hearings attended; 6) courts-martial attended; 7) motions filed and argued; 8) correspondence on behalf of clients; 9) calls or meetings with clients; 10) legal assistance issues addressed; 11) documents drafted; 12) victim satisfaction with SVC representation; 13) advanced training attended by SVCs and SVPs; 14) SVC feedback on courses trained, 15) extraordinary circumstances requests; 16) extraordinary writs filed; and, 17) post-trial appellate briefs filed.

The Program Chief receives bi-weekly reports from each SSVc detailing the case status and legal assistance highlights on active cases. These reports allow the SSVcs and leadership to evaluate individual SVC caseloads, representational issues, the advocacy and performance of individual SVCs, and training and improvement areas. The SVC Program continues to utilize the Victim Impact Survey (VIS), as it is the best tool to capture the client's evaluation of and satisfaction with the SVC's representation. VIS are reviewed by Program leadership and provided to the SVC. The feedback from victims represented by an SVC remains overwhelmingly positive. An impressive 86% of victims surveyed indicated they were "extremely satisfied" with their SVC's representation and 13% were "satisfied," resulting in an overall 99% satisfaction rate. An astounding 99% of those surveyed would recommend other victims request an SVC; this percentage remains consistent with the level in FY14 and FY15.

3.8 Describe your future plans for the achievement of high competence in holding offenders appropriately accountable.

In addition to the extensive accountability and training programs described above, the Air Force Judge Advocate General's Corps (AFJAGC) has completed a reorganization of our military justice system into five circuits. Each circuit covers a specific geographic region, and military judges, senior trial counsel (STC), senior defense counsel (SDC), and senior special victims counsel are collocated into one of the following locations within each circuit: Joint-Base Langley-Eustis (Eastern Circuit – CONUS); Joint Base San Antonio-Randolph (Central Circuit – CONUS); Travis AFB (Western Circuit – CONUS); Kadena AB (Pacific Circuit); and Ramstein AB (European Circuit).

STCs stationed at each circuit location are supervised by a Chief STC. The Circuit Chiefs maintain primary responsibility for providing reach back military justice expertise to the installations within their regions while still reporting to The Chief Senior Trial Counsel of the Air Force at Joint Base Andrews. This arrangement allows for increased familiarity

and training opportunities between Special Victim's Unit Senior Trial Counsel (SVU-STCs) and JAG Corps personnel stationed at installations within their regions, while at the same time preserving the benefits of centralization, such as shared lessons learned and the ability to detail counsel across circuit boundaries should a specific case call for a specific skill set. Circuits also allow for greater mentoring opportunities and interaction between co-located SVU-STCs and newer STCs.

As of August 2016, the STC program has expanded to 25 active duty billets. These STCs are currently supplemented by 3 reserve STCs, who are experienced civilian litigators who try courts-martial in their capacity as reserve Air Force officers. Air Force Legal Operations Agency (AFLOA)/JAJG (Government Trial and Appellate Counsel Division) is in the process of identifying and formalizing additional ways to leverage the experience of our civilian reservists to broaden the training opportunities available to our active duty STCs by exposing them to fellow experienced litigators who practice outside of the Department of Defense (DoD).

In August 2016, the first Air Force Circuit Annual Training (AFCAT) was held on JB Andrews. AFCAT enabled senior trial counsel stationed at each circuit to come together and share lessons learned from the field and individually attended trainings. Certain joint training blocks included senior trial counsel, SDC, senior special victims' counsel and military judges. The curriculum during these blocks focused on communications and the resolution of common issues to promote efficiencies in bringing cases to trial and reducing unanticipated delays. This weeklong training received positive feedback from attendees, and allowed for cross-feed of ideas and training on legal developments among the STC, SDC, SVC and military judge communities. Planning is already underway for next year's AFCAT, which is set to be held from 14-18 August 2017.

In addition to AFCAT, AFLOA/JAJG continues to work in conjunction with the Air Force Judge Advocate General's School (AFJAGS) to ensure curriculum for the Intermediate Sexual Assault Litigation Courses and Advanced Sexual Assault Litigation Course remains current and targets common challenges in the prosecution of special victim cases.

Finally, AFLOA/JAJG will continue to seek opportunities for STCs to attend non-DoD courses such as those sponsored by the National District Attorneys' Association to further their knowledge of complex litigation. This will ensure that Air Force prosecutors remain informed of legal developments and trial techniques outside of the DoD, and will help to prevent a stagnation of ideas within the Air Force litigation community.

4. LOE 4—Advocacy/Victim Assistance—The objective of advocacy/victim assistance is to “deliver consistent and effective victim support, response, and reporting options.”

4.1 Summarize your efforts to achieve the Advocacy/Victim Assistance Endstate: “high quality services and support to instill confidence and trust, strengthen resilience, and inspire victims to report.” Include how competency, ethical, and foundational standards established in DoDI 6400.07, enclosure 2, are met.

(DoDI 6400.07, Standards for Victim Assistance Services in the Military Community (25 Nov 13) / DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

Successful response and advocacy begins with personal and professional commitment, and equal amounts of preparation. To that end Sexual Assault Prevention and Response (SAPR) personnel (including volunteers) receive the mandatory initial and refresher training, and acquire at a minimum all required continuing education units. Opportunities for continuing education are also published in personnel-wide communications followed by reminders which are provided on monthly teleconferences. Standards are further met by regular monitoring the credentials of all full-time and volunteer personnel and by ensuring that Defense Sexual Assault Advocate Certification Program qualifications are not compromised. This includes initiating proper procedures to suspend or revoke certification should the occasion present. Other functional communities that include victim assistance personnel (i.e. legal and medical) ensure they meet this endstate with various training and programmatic efforts as described in LOEs 3 and 5 of this report.

Major command SAPR program managers conduct site visits to assess clarity of policy and operational guidance and provide coaching and mentoring to enhance program effectiveness. This not only offers an opportunity to share program successes and promising practices but is a forum to work through unique challenges. The Air Force Sexual Assault Prevention and Response Office (AF SAPRO) identified the requirement to mandate these recurring site visits, a change which will appear in the next revision of Air Force Instruction 90-6001, *Sexual Assault Prevention and Response (SAPR) Program*.

AF SAPRO maintains a SharePoint site which is a clearinghouse for a large variety of resources to help accelerate the competency of personnel. These materials include but are not limited to: program references, a sharing center, data management tools, deployment resources, training videos, first line supervisor training, installation profiles, toolkits, victim advocate course material, recommended reading, frequently asked questions, and information for leadership. SharePoint is a Common Access Card enabled site and allows authorized personnel 24/7 access to an abundance of materials.

Standard Operating Procedures were developed to provide uniform procedures for expedited transfers, awards, use of the sexual assault incidence database, and the purpose and acquisition of continuing education units. This list will be expanded to create additional standardized guidance for the case management group, eight day report, training requirements, and prevention.

We have entered the age of unlimited access to information and are all compelled to take the initiative to enhance our own learning – *education, training and skills building*. SAPR personnel are encouraged to take a close look at the ways they learn and to explore ideas that transcend beyond traditional methods. Two courses, Sexual Assault Prevention and Response Victim Advocates (five days) and the Sexual Assault Response Coordinators (nine days), are offered four times a year. These courses are built on principles of adult learning as outlined in the Department of Defense Core Competencies. An integral part of

each course includes self-care and resilience.

4.2 Describe your current oversight processes over SAPR, to included reviewing credentials, qualifications, continuing education, inappropriate behavior, and revocation of certification, if appropriate. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 4, #1 &15, p. 7)

Monthly audits are provided at the major command and headquarters level to ensure that Sexual Assault Prevention and Response (SAPR) personnel (which includes volunteers) have completed all mandatory training and the required continuing education units. The Air Force Audit Agency conducted an audit of the SAPR Program at eleven non-deployed locations in 2016, however results have not been released at the time of this report. Opportunities for continuing education are communicated to the field via the Major Command Sexual Assault Response Coordinators (MAJCOM SARCs) who provide additional oversight of installation SAPR programs. MAJCOM SARCs conduct site visits each year to assess installation SAPR programs and enhance program effectiveness. These visits will be mandated with the next revision of Air Force Instruction (AFI) 90-6001 *Sexual Assault Prevention and Response (SAPR) Program*. In accordance with AFI 90-6001, copies of credentials are retained at the installation and major command level and are documented in a monthly report which is forwarded to headquarters. Revocation of certification follows the standard protocol and documentation is maintained at headquarters and forwarded to the appropriate Department of Defense and National Organization of Victim Advocates points of contact.

4.3 Describe your current progress to ensure SAPR personnel meet D-SAACP screening requirements prior to attending your Military Service's SAPR certification training. (DoDI 6495.03, Defense Sexual Assault Advocate Certification Program (D-SAACP) (10 Sep 15), Encl 3)

The Air Force Sexual Assault Prevention and Response Office (AF SAPRO) endeavors to ensure that all screening requirements are met prior to personnel attending SAPR certification training. All SAPR Personnel, in accordance with Air Force Instruction 90-6001, must accomplish the screening criteria before attending the initial certification training. In addition, an application is completed with the appropriate validating signature of the major command sexual assault prevention and response program manager, prior to attendance at the formal courses. This is further monitored monthly by headquarters and requires the screening dates.

4.4 Describe your Military Service's efforts to encourage SARCs and SAPR VAs to renew their certification at a higher level in order to increase the quality of victim assistance providers. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

The Air Force Sexual Assault Prevention and Response Office (AF SAPRO) has implemented a number of processes to monitor personnel credentials and qualifications. Major command program managers are required to update personnel rosters for all of their programs. Quarterly training reports document continuing education units and are uploaded into the Defense Sexual Assault Incident Database. Major command program managers ensure that all SAPR personnel obtain the appropriate training and number of

continuing education units to maintain their credentials. In order to ensure only the most competent individuals are interacting with victims, the Air Force has established criteria that ensures education, training, and relevant experience qualification must be met to hold the position of Sexual Assault Response Coordinator (SARC), Victim Advocate (VA) and volunteer VA.

AF SAPRO is invested in providing personnel with the best possible training to prepare them for their role of response coordinators and advocates. The focus is therefore on ensuring that they have the appropriate skills to meet the demands of the job. The criteria for obtaining the levels of certification is already pre-established by the recertifying process. SARCs and VAs will reach higher levels of certification as they accumulate victim services and support hours.

SAPR full-time personnel are provided bi-weekly reminders of the need to continue their efforts to reach a higher level of certification. They are also reminded to create opportunities for volunteers to acquire higher certification as well.

4.5 Describe how you addressed any challenges that SARCs and SAPR VAs have in obtaining continuing education training, to included training on emerging issues and victim-focused trauma-informed care. (DoDI 6495.03, Defense Sexual Assault Advocate Certification Program (D-SAACP) (10 Sep 15), Encl 3, para 3)

While the Air Force Sexual Assault Prevention and Response Office has no data to suggest any major challenges, Sexual Assault Response Coordinators and/or SAPR Victim Advocates could potentially face difficulty obtaining their 32 hour bi-annual continuing education training requirements due to operations tempo or funding.

4.6 Describe your continued efforts to ensure that the 24/7 DoD Safe Helpline has accurate contact information for on-base SAPR resources (i.e., Chaplains, SARCs, Military Police, and Medical Personnel). (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 4, #2, p. 7)

The Department of Defense (DoD) initiates semi-annual phone audits of the Safe Helpline to verify contact numbers contained in the Responder Administration website are correct. These audits focus on the contact information for Sexual Assault Response Coordinators (SARCs), Sexual Assault Prevention and Response Victim Advocates (SAPR VAs), and responders (Chaplains, Legal Assistance, Medical Resources, and Military Police). The Military Services, National Guard Bureau, and U.S. Coast Guard provides this contact information to Department of Defense Sexual Assault Prevention Response Office (DoD SAPRO) per DoD SAPRO's Guidelines for the DoD Safe Helpline.

The audit itself is conducted by the Rape, Abuse and Incest National Network via a contract with the Department of Defense. This database is a public tool that can be accessed directly by victims and the public on www.safehelpline.org. There is ongoing maintenance of the information contained in this website. Major command program managers are tasked with accomplishing self-inspections of their installation's contact information. Updates and/or deletions are required to be reported back to Headquarters Air Force for reconciliation. All personnel inputs are then updated via the Responder Administration website. Upon completion of the audit, a report is generated on the

'success rate' based on positive and/or confirmed contact with an organization.

Discrepancies from the audit are reconciled by the Air Force SAPR office and the Safe Helpline is updated accordingly. The final audit report reflects phone verifications and reconciliation results.

The final verification results from the March 2016 audit are shown below:

- SARCs and SAPR VAs - 110 contacts/110 attempts = 100% success rate
- First Responders (Chaplains, legal assistance, medical resources, and military police) 377 contacts/377 attempts = 100% success rate
- Air Force overall - 487 contacts/487 attempts = 100% success rate

Headquarters Air Force recognizes the importance of accurate and up-to-date information as part of the response capability of its program. These audits are critical to this effort as installation information and services change.

4.7 Describe your efforts to make Service members aware of SAPR resources, such as the DoD Safe Helpline. (DoDI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 2, para 6af(1) / Encl 3, para 1k & 1m)

Publicizing Sexual Assault Prevention and Response (SAPR) resources is critical in establishing an easily accessible response and prevention program for all Air Force personnel. The Air Force Sexual Assault Prevention and Response Office (AF SAPRO) utilized the Public Affairs advisor to provide a comprehensive approach to information dissemination. Information containing contact phone numbers, hours of operation, and website links are located on each Air Force installation home page. These home pages also contain links and contact information to the Department of Defense Safe Helpline.

Additionally, Sexual Assault Response Coordinators provide training to installation personnel to include leadership members. This training includes resource information for the various services provided both on and off base related to sexual assault prevention and response.

Finally, communicating policy changes to the field is essential to ensuring accurate and effective responses for victims. There are a number of methods AF SAPRO utilizes to accomplish this goal. Policy changes are communicated to the field via websites, teleconferences, webinars, Public Affairs announcements, emails, Air Force Instruction releases, and guidance memorandums. Program management policy changes are often relayed to the field via monthly teleconferences with major command program managers and AF SAPRO. Information that requires direct Air Force leadership attention is often sent by email directly from the Director of AF SAPRO.

4.8 Describe your efforts to ensure the requirement for both male and female victim input into the development of your Military Service SAPR policy. (SecDef Memo (1 May 14), Improve Reporting for Male Victims, p. 2) / GAO Report 15-284, Actions Needed to Address Sexual Assaults of Male Service Members (March 2015), p. 20)

Replacing the 2015 Survivor Experience Survey is the 2016 Military Investigation and Justice Experience Survey (MIJES). MIJES is conducted in response to a Secretary of Defense Directive requiring that a standardized and voluntary survey for survivors be developed and regularly administered to “provide the sexual assault victim/survivor the opportunity to assess and provide feedback on their experiences with Sexual Assault Prevention and Response (SAPR) victim assistance, the military health system, the military justice process, and other areas of support” (Secretary of Defense, 2014). Results from the 2016 MIJES will be briefed to Service leadership, Department of Defense (DoD) leadership, the Department of Defense Sexual Assault Prevention and Response Office (DoD SAPRO), and Congress.

To ensure a victim centric perspective relative to the mission of the Air Force Sexual Assault Prevention and Response Office (AF SAPRO) an Executive Speaker Survivor Panel was developed and met in September of 2016. This panel consists of sexual assault survivors who experienced sexual abuse while serving in the military or working as a civilian employee. AF SAPRO utilizes the survivor panel in the following ways: by advising the Director/Staff of AF SAPRO (responsibilities include but are not limited to reviewing sensitive surveys, policy, procedures, documents and training materials); by speaking publicly at various engagements, meetings, or briefings (e.g. Wing Commanders course, SAPR Summit); and by attending quarterly meetings (in person, via video or phone teleconference) with AF SAPRO staff. Additional panels will be held on a semi-annual basis with the goal of gaining insight into how the policies and practices of the SAPR program are received by survivors, how to improve survivor experiences, and how to improve prevention and response efforts across the Air Force.

In 2015 AF SAPRO requested a DoD exception to policy concerning civilian employee’s eligibility for services. Prior to this exception, only civilian employees at overseas locations and their dependents 18 years old or older were eligible to utilize SARC services and were only able to do so by filing unrestricted reports. The DoD approved exception allows all Air Force civilian employees to file both unrestricted and restricted reports and receive SAPR services regardless of their duty location. This exception does not include legal or non-emergency medical services unless the individual is otherwise eligible. This exception was originally granted for a one-year trial basis at the end of which data was collected by the Air Force and submitted to DoD for an approval request to make this exception permanent.

AF SAPRO began retaliation data collection in March 2015, and this practice continued in FY16. Sexual Assault Response Coordinators are responsible for interviewing each victim with an open, unrestricted report and offering them the opportunity to have the results discussed at the monthly Case Management Group meeting. The option to decline the interview or to have the details of the interview kept private is available as well.

The 2016 Air Force adaptation of Green Dot specifically includes examples of hazing, bullying, male victimization. Additionally, the Air Force uses a variety of surveys to gather feedback from Airmen on its SAPR efforts to institutionalize the solicitation of both male

and female victim input. These include: 1) several surveys on various aspects of the effectiveness of the Green Dot program; 2) A pre-command course survey designed to tailor command course SAPR lesson content to commander-selects' SAPR knowledge gaps; 3) SAPR civilian satisfaction survey to measure satisfaction with SAPR services received by AF civilian employees and 4) A form to build an inventory of sexual assault prevention activities at AF installations.

4.9 Describe your efforts to improve response to male victims, to include implementing and monitoring methods to improve reporting of male sexual assault allegations. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 4, #14, p. 7)

Air Force Sexual Assault Prevention and Response participated in the Office on Violence Against Women Roundtable *Where We've Been, Where We're Going, Mobilizing Men and Boys to Prevent Gender-Based Violence*. The first meeting of this type occurred approximately five years ago in which subject matter experts from across the country looked at what works when it comes to preventing males from committing acts of violence in general, and intimate personal violence in particular. Additionally, frank discussion explored ways in which the response to male victims of violence in general, and intimate partner violence in particular could be better accomplished. In the reconvening of this group, attendees attempted to pick up where the first meeting left off. Evidence-based practices remain hard to come by; the few that are working are conducted at the primary and secondary school level in programs such as Men Can Stop Rape (Men of Strength Club) and Coaching Boys Into Men.

Ongoing efforts to improve response to male victims are a multi-faceted endeavor. In this pursuit the United States Air Force continues to collaborate with and learn from subject matter experts from across the country. As a result of their insights, along with the growing body of research and promising practices in responding to male victims of sexual violence, a new block of instruction titled *Male Victimization* was added to the 2016 Sexual Assault Prevention and Response Coordinator course. This course addresses myths surrounding male victims of sexual assault, hyper-masculinity, rituals, hazing and traditions.

Most of our efforts to date have been academic as we continue to identify evidence informed strategies that support advocacy and outreach to male victims.

4.10 Provide your policy for facilitating requests from victims, who report a sexual assault, for accommodations during mandatory SAPR training (e.g., an alternate training setting to prevent re-victimization). (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 4, #16, p. 7)

Victim sensitivity and care are top Air Force priorities when providing any Sexual Assault Prevention and Response (SAPR) training. Facilitating a victim's request for accommodations at annual training has been a standard operating procedure within the AF. Therefore, the AF SAPRO Policy Team included guidance in the 2015 update to Air Force Instruction (AFI) 90-6001, *Sexual Assault Prevention and Response (SAPR) Program*, directing trainers and curriculum developers to include a disclaimer at the

beginning of all SAPR trainings allowing victims the option to receive training individually from the SAPR office as applicable. Additionally, Sexual Assault Response Coordinators (SARCs) and SAPR Victim Advocates (VAs) inform victims of this option. To facilitate the commander being informed, AF SAPRO also incorporated the following recommendations: Commanders will announce that those who feel they cannot attend the annual training, due to personal histories, should contact the installation SARC to be excused. The Facilitator's instructions for Fiscal Year 2016 annual training included the following: "Prior to the group discussion, be sure to advise attendees they can decline to attend if they are uncomfortable with the topic. If anyone needs assistance, refer them to talk with the SARC or SAPR VA to protect their reporting options. To ensure that the accommodations are further codified, AFI 90-6001 includes the language for SARCs and Commanders to provide accommodations.

Annual SAPR First Responder Training covers reporting types and discusses actions to be taken to ensure victim confidentiality. This includes advising command of duty restrictions related to medical treatment through the medical profiling process without disclosing that a sexual assault has occurred or the medical diagnosis. Medical records are protected according to Health Insurance Portability and Accountability Act and medical documentation that occurs related to sexual assault are identified as sensitive, with access to these records monitored to ensure only those with a need to know have accessed the record.

4.11 Describe your progress to improve victim care services and conduct Case Management Groups at Joint Bases, in Joint Environments, and for the Reserve Components. For the Reserve Components, describe Military Service's actions to promote timely access to SARCs by members of the National Guard and Reserves. Describe how you addressed any recurring challenges (if any) your Military Service may have had in this area. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 4, #11, p. 7)

In accordance with Department of Defense Instruction (DoDI) 6495.02 (Change) Members of the Reserve Components, whether they file a Restricted or Unrestricted Report, shall have access to medical treatment and counseling for injuries and illness incurred from a sexual assault inflicted upon a Service member when performing active duty service, as defined in section 101(d)(3) of Reference (d), and inactive duty training.

Active Component: Currently, there are twelve Joint Bases across the DoD: Six are Air Force led (Joint Base Charleston, Joint Base McGuire – Dix –Lakehurst, Joint Base Andrews, Joint Base Elmendorf-Richardson, Joint Base San Antonio, Joint Base Langley-Eustis); four are Navy led (Joint Base Anacostia-Bolling, Joint Base Pearl Harbor-Hickam, Joint Base Guam, Joint Base Norfolk); and two are Army led (Joint Base Lewis-McChord, Joint Base Myer-Henderson Hall).

Joint Bases are similar to Air Force installations in the sense that Airmen at Joint Bases are trained to receive Sexual Assault Prevention and Response (SAPR) services and annual SAPR training from their Service. However, in accordance with DoD policy, a

service member can access sexual assault prevention and response services from any branch of service regardless of affiliation.

The Air Force provides victim care at Joint Bases, in Joint Environments, and at Reserve Component installations using a multi-faceted approach employing Sexual Assault Response Coordinators (SARCs) and SAPR Victim Advocates (SAPR VAs). The SAPR staff, regardless of service affiliation, collaborate on prevention, outreach and training efforts at their installations.

Medical supplemental instructions are required at each Joint Base location. A medical supplemental instruction directs in detail the coordination and provision of services and care to medical beneficiaries at each Base Realignment and Closure Commission location. Additionally, the Assistant Secretary of Defense for Health Affairs has oversight of the services and, therefore, the military treatment facilities on each installation. Medical support and response to victims of sexual assault include: emergency services, primary care services, mental health services, alcohol/drug abuse prevention and treatment services and family advocacy program services. Over 55 Air Force military treatment facilities have memorandums of understanding with civilian centers of excellence for emergency services to ensure sexual assault victims are provided the highest quality care.

Reserve Component: To facilitate victim care the Air Force has a full-time civilian SARC and a dedicated reserve officer VA assigned to each of its 11 host installations (Dobbins Air Reserve Base, Grissom Air Reserve Base, Homestead Air Reserve Base, March Air Reserve Base, Minneapolis-St. Paul International Air Port Air Reserve Station, Naval Air Station Joint Reserve Base Fort Worth (formally known as Carswell), Niagara Falls International Air Port Air Reserve Station, Pittsburgh International Air Port Air Reserve Station, Pope Army Airfield, Westover Air Reserve Base, and Youngstown Air Reserve Station). At each of these locations, Air Force Reserve Command assigns a traditional reserve officer in the rank of Major to the installation SAPR office with the job title of SAPR VA.

The Reserve Component facilitates care for its Airmen by referring sexual assault victims to medical and mental health treatment centers. To expedite care and meet a victim's needs, Reserve victims are generally referred to the nearest medical treatment facility or Veterans Administration facility. Coordinating care with Veteran's Affairs enables the Reserve Component to meet a victim's needs when they are geographically separated from a military treatment center.

Additionally, the Air Force is in the process of initiating a manpower review and cost estimate for additional full-time support to National Guard bases. The Air National Guard discusses their progress in improving victim care services at Joint Bases and in Joint Environments in their annual report. Please reference the National Guard Bureau Submission for more detailed information.

4.12 Describe your current progress to inform Officers, NCOs, and junior Service members about your Military Service's expedited transfer request policy. (DoDI

6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), para 4o)

The Air Force Sexual Assault Prevention and Response Office (AF SAPRO) informs the field about Expedited Transfer (ET) policy through various training venues to include the Air Force Sexual Assault Response Coordinator and Victim Advocate Course provided by AF SAPRO staff, as well as the Sex Crime Investigations Training Program led by the Air Force Office of Special Investigations. Additionally, Airmen who do not attend these specialized trainings receive information on ETs from unit leadership during Commander's Calls via the Commander's Talking Points. The SARC provides information in regards to ET policy directly to victims of sexual assault.

4.13 In consultation with your SARCs, list the number of victims who reported a sexual assault, if any, whose medical care was hindered due to lack of SAFE kits, timely access to appropriate laboratory testing resources, mental health counseling, or other resources. Describe the measure(s) your Military Service took to remedy the situation. (NDAA FY06, Sec 596 / DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

According to Defense Sexual Assault Incident Database, there were zero reports in Fiscal Year 2016 where a forensic exam was not completed because a Sexual Assault Forensic Examination Kit and/or other needed supplies were not available.

4.14 Provide information on how you addressed problems or challenges, if any, with assigning SAPR personnel to handle unrestricted or anonymous reports of sexual assaults made by prisoners in a Military Confinement Facility. Additionally, describe your use of the DoD Safe Helpline as an anonymous reporting resource for prisoners. (Prison Rape Elimination Act (4 Sep 03) / Presidential Memorandum, Implementing the Prison Rape Elimination Act (17 May 12))

The Air Force Security Forces Center hired a Prison Rape Elimination Act (PREA) Coordinator in March of 2016 to oversee the Air Force's efforts to comply with the PREA standards. In Fiscal Year 2016, we did not receive any sexual assault allegations within Air Force Confinement Facilities requiring the assigning of Sexual Assault Prevention and Response personnel to handle Unrestricted or Anonymous reports. In the pursuit of complying with the specific PREA standard requiring facilities to provide confinees with a way of reporting sexual abuse to an outside source, facilities have begun to make the Department of Defense Safe Helpline number available. The challenges are with facilities establishing unmonitored telephones in order to report anonymously. Planners are currently assessing facility infrastructure, building the requirement, and seeking funding.

4.15 Describe your leadership-approved future plans to deliver consistent and effective victim support, response, and reporting options.

The Air Force Sexual Assault Prevention and Response Office (AF SAPRO) has and will continue to provide a trained and ready response to reports of sexual assault in accordance with National Defense Authorization Act and Department of Defense requirements. Each installation hosts, at a minimum, one full-time Sexual Assault Response Coordinator (SARC) and a full-time Sexual Assault Prevention and Response Victim Advocate (SAPR VA) who are credentialed to provide a variety of services to sexual assault victims and survivors. They provide victims/survivors with the capability to make a report using current reporting options, and to do this in the context of their

understanding of the trauma they may have experienced. They assist and empower individuals to make an informed decision by providing knowledge about the process of reporting and resources available to them throughout the entire process. Detailed descriptions of the specific roles and responsibilities are highlighted in Air Force Instruction 90-6001 *Sexual Assault Prevention and Response (SAPR) Program* dated 21 May 2015. Response efforts are focused in three areas: victim care and support, professional investigation of all reports, and prosecution of the crime as appropriate. SARCs and SAPR VAs offer both the expertise required for individuals who have been impacted by this crime and essential support to commanders, as well as response and advocacy for victims/survivors. Installation SAPR programs offer a unique 24/7 response capability and utilize trained and certified Volunteer Victim Advocates (VVAs) to manage this capability. While the full-time positions are filled primarily by civilians, military personnel also support this capability, especially in VVA positions. Consistent and effective advocacy and support also requires a coordinated response with medical personnel, first responders, legal, investigative and community support agencies. In pursuit of the highest level of service to Airmen, every effort is made to ensure continuing education, regular communication and guidance to the field, and on-going assessment of current programs, policies, and procedures regarding the care of victims/survivors.

AF SAPRO has also incorporated the subject of retaliation and ostracism into a one-time training entitled: First Line Supervisor Training Preventing Retaliation. This training served to educate First Line Supervisors on issues that sexual assault victims expressed regarding retaliation after reporting a sexual assault. The training informed supervisors on ways to prevent and respond to incidents of retaliation at their level. This training addressed definitions and provided scenarios to allow for small group discussion to enhance their supervisory skills. Moving forward these concepts, definitions and resources will be incorporated into all existing AF supervisory platforms. It is hoped that this type of training will serve to remove barriers which may discourage reporting.

Comprehensive interviewing techniques help to establish rapport with victims/survivors and aim to ensure that victims will not be judged or blamed for the assault when interacting with responders. These techniques are taught and demonstrated in formal training (i.e. the Air Force SARC and SAPR VA Course) through role playing and other types of experiential learning strategies. SAPR personnel are trained to utilize a victim centered approach to taking reports and empowering victims/survivors to elect their follow-up care by providing them information which will help them make an informed decision.

AF SAPR is genuinely interested in increasing reporting and reducing prevalence of sexual assault. To that end, leadership remains committed to deploying strategies that help to eliminate sexual assault from all ranks. Sexual assault is a sensitive and complex issue which requires the engagement of the entire community, therefore all Airmen play a significant role in assuring a culture and environment that guarantees everyone's personal safety.

5. LOE—Assessment—The objective of assessment is to “effectively standardize, measure, analyze, assess, and report program progress.”

5.1 Summarize your efforts to achieve the Assessment Endstate: “responsive,

meaningful, and accurate systems of measurement and evaluation into every aspect of the SAPR program.” (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

Overview: Over the past year, the Air Force has continued its efforts to measure, analyze, evaluate, and report the progress of its Sexual Assault Prevention and Response (SAPR) Program. These efforts include developing tools to automate data processing and analysis, refining existing metrics and products for tracking program effectiveness, and surveying commanders, victims, victim advocates, and Airmen across all levels within the Air Force.

Analytic Tools: At the start of 2015, the Air Force Sexual Assault Prevention and Response Office (AF SAPRO) relied only on Microsoft Excel for conducting analysis. To create a more robust analysis capability, we acquired SAS (SAS Institute Inc.) licenses and provided training for all analysts. Throughout Fiscal Year (FY) 2016, AF SAPRO analysts have successfully used SAS software in a variety of ways, such as: drawing probability samples from official personnel databases for surveys; querying the Defense Sexual Assault Incident Database (DSAID) and creating reports to support policy initiatives and evaluation and leadership decision making; developing automated reports for prevention initiatives; and developing products to improve the accuracy of data in DSAID. Additionally in FY16, AF SAPRO began using R statistical software, which provides advantages over SAS for certain tasks such as data display and visualization. Having both tools has substantially increased AF SAPRO’s data processing, analysis, and visualization capability.

Surveys: Surveys are one of the most effective means to provide leaders information about the health and welfare of a large population or environment. During FY16, AF SAPRO continued its emphasis on surveys to gauge Airmen attitudes with respect to SAPR, to assess SAPR training and knowledge gaps, and to support SAPR policy initiatives and evaluation.

Qualtrics Survey Platform: AF SAPRO relies heavily on survey data to assess the effectiveness of various aspects of its program and to inform program decisions. To fulfill its in-house survey development needs, AF SAPRO awarded a multi-year contract to Qualtrics in FY16. Qualtrics provides a comprehensive web-based survey platform, which enables AF SAPRO to develop, test, administer, analyze and report surveys. Since contract award, AF SAPRO has successfully used the Qualtrics survey system for a variety of surveys.

AF SAPRO deployed the following surveys in FY16 to expand its understanding of SAPR related issues:

- **Air Mobility Command Green Dot Effectiveness Survey:** The purpose of this survey is to assess the impact of the Green Dot program on Airmen’s attitudes and opinions about bystander behaviors before, six months after, and twelve months after receiving Green Dot training. The first survey was administered in March 2016, the six month survey was administered in September 2016, and the twelve month survey

will be administered in March 2017. Survey results will inform future iterations of Green Dot Training.

- Green Dot Suicide Prevention Training Survey: This survey is currently being administered to individuals who participated in the pilot programs of the Green Dot Suicide Prevention Programs. Many of the bystander intervention principles discussed in Green Dot to reduce sexual assault can be applied to intervening with potential suicides. The pilot programs teaching bystander intervention targeted toward both sexual assault and suicide were conducted May through July of 2016. The survey will gather information on short-term (three month) outcomes as a result of the training, which will be used to inform future iterations of Green Dot.
- Pre-Command Course Survey: This survey is administered to Pre-Command Course participants before they receive the SAPR lesson. The results are used by instructors to tailor the lesson to the knowledge gaps of the participants. Approximately 250 pre-command course participants took this survey in fiscal year 2016.
- SAPR Civilian Satisfaction Survey: In August 2015, the DoD granted the Air Force a year-long exception to policy which allowed Air Force civilian employees who are victims of sexual assault the ability to file an unrestricted or restricted report regardless of their duty location and have access to all of the SAPR (i.e. Sexual Assault Response Coordinator and SAPR Victim Advocate) services that are available to service member victims. During this year-long trial period, the Air Force used this survey to measure the level of satisfaction of Air Force civilian employee victims with the SAPR services they received. Unfortunately, few of the 44 DoD civilians who reported a sexual assault during the trial period responded to the survey. However, those that responded indicated satisfaction with the SAPR services they received.
- SAPR in the Air Force: The purpose of this survey is to track attitudes and behaviors associated with the Air Force's SAPR program over time. It was first administered December 2015 through January 2016 to approximately 4,000 airmen across the total Air Force, of which about 500 responded. It will be re-administered to a similar sample in the same timeframe each year thereafter. Results from this survey are used to assess, inform, and shape AF SAPRO efforts.
- SPPV Initial Training Survey: This survey was administered to SPPVs 45 days after they completed the two-week initial training. Results were used to improve AF SAPRO's training and support efforts and to shape subsequent SPPV training efforts.

Improved Prevalence versus Reporting Graphic: The Air Force relies on two metrics for assessing the effectiveness of its SAPR program: sexual assault prevalence and sexual assault reporting. The DoD conducts victimization surveys such as the RAND Military Workplace Study and the Workplace and Gender Relations Survey of Active Duty

Members that estimate the past-year prevalence of sexual assault in each branch of the military. Sexual assault reporting is the number of active duty Airmen who officially report a sexual assault to the Air Force in a given timeframe, usually the past year.

Since sexual assault is an underreported crime, prevalence has always exceeded reporting. Primary goals of the AF SAPR program are to reduce prevalence and increase reporting. Comparing prevalence to reporting also gives the Air Force an indication of Airmen's confidence in the SAPR program. A decrease in the gap between prevalence and reporting may indicate increased confidence.

In FY16, the Air Force developed a new graphic to more accurately compare prevalence to reporting. The previous graphic compared reporting to prevalence by FY. The problem with the previous graphic was that a portion of the reports the Air Force receives in a given FY are for incidents that occurred in a prior FY or on an unknown date, and are therefore in a different timeframe than the prevalence estimate. The new graphic addresses this problem by using a segmented bar to differentiate the reports that occurred in the same timeframe as the prevalence estimate from those that occurred in a different timeframe or on an unknown date. The Air Force believes the new graphic provides a more realistic picture of how close we are to our goal of 100% reporting.

5.2 Provide an update on oversight improvement activities that assess SAPR program effectiveness. Include frequency, methods/metrics used, findings, and corrective actions taken (e.g., program management reviews and Inspector General compliance inspections). (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

The Air Force Sexual Assault Prevention and Response Office (AF SAPRO) utilizes a number of practices in order to determine program effectiveness. Major commands submit quarterly training reports that identify the types and number of activities that sexual assault prevention and response personnel are delivering to their communities. Included in these reports are training and briefing activities, outreach and prevention efforts, as well as personnel manning metrics.

AF SAPRO continues to use the Management Internal Control Toolset as an integral tool to assist in making data driven decisions; providing clarity to policy; and identifying program concerns. Airmen at the program level complete the self-assessment communicators, which is a two way communicator designed to improve compliance to the published guidance, communicate risk and program health, and provide real-time information relevant to decision makers throughout the chain of command. AF SAPRO has three self-assessment communicators written for distinct audiences: Sexual Assault Response Coordinators, Installation/Host Wing Commanders, and Squadron Commanders. The assessments help senior leaders understand why Airmen are unable to meet requirements through trend analysis.

To meet the continuous compliance requirements set forth in Air Force Instruction 90-201, *The Air Force Inspection System*, the SAPR program is inspected by certified personnel annually. This report is provided to the base's major command and to Headquarters Air

Force.

5.3 Provide an update on your efforts to ensure integrity of data (i.e., accuracy, completeness, etc.) collected in the Defense Sexual Assault Incident Database (DSAID). (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 5, #2, p. 8)

Sexual Assault Response Coordinators (SARCs) are responsible for entering sexual assault report data into the Defense Sexual Assault Incident Database (DSAID). All SARCs have a favorable background investigation, are certified through the Defense Sexual Assault Advocate Certification Program, and have completed two hours of online DSAID training before being granted access.

In Fiscal Year (FY) 2016, the Air Force Sexual Assault Prevention and Response Office (AF SAPRO) provided a 90 minute block of DSAID training for SARCs during the Air Force annual refresher training, led several Defense Connect Online DSAID training sessions for SARCs, and provided one-on-one assistance to SARCs multiple times per day.

AF SAPRO makes DSAID an agenda item on an as-needed basis during its monthly major command (MAJCOM) teleconference meeting. This 60-90 minute meeting allows AF SAPRO to conduct training, relay information, and ensure the Air Force's SAPR community is informed about any issues affecting DSAID. It also allows the office to collect DSAID change requests from the field, which are presented for consideration at the monthly DSAID Change Control Board meeting.

Quality control oversight and review of the data is monitored daily by the DSAID technical manager along with the MAJCOM program managers. Using the quality assurance tool provided by the Department of Defense Sexual Assault Prevention and Response Office, AF SAPRO validates data in DSAID to ensure accurate entry and performs cross-checks to identify potential data conflicts.

In FY16, AF SAPRO began providing a monthly report to its MAJCOMs showing the percent of their DSAID cases that contain errors. As a result, DSAID cases containing errors have dropped 31 percentage points since the beginning of FY16. AF SAPRO also works to ensure the investigation data in DSAID matches the corresponding data in the Investigative Information Management System.

In addition, AF SAPRO's Research and Analysis Branch developed programs using the SAS (SAS Institute Inc.) analytic tool to find required data missing from DSAID records. Data available from the Military Personnel Data System and the Defense Civilian Personnel Data System are cross-referenced using either the victim or subject social security numbers. Missing data fields completed using these methods include the victim type, gender, date of birth, grade for victim or subject. DSAID records are subsequently updated with the known data.

5.4 Provide an update on your efforts to develop and implement a survey, or leverage existing military training surveys that will provide comprehensive and

detailed information to decision makers about sexual assault and other sexual misconduct allegations that occur during initial military training, including basic and subsequent career-specific military training. (GAO Report 14-806, DoD Needs to Take Further Actions to Prevent Sexual Assault During Initial Military Training (March 2015), p. 44)

In response to several high-profile incidents of sexual misconduct by Military Training Instructors (MTIs) during Basic Military Training (BMT), the U.S. Air Force's Air Education and Training Command (AETC) partnered with Research and Development (RAND) Project AIR FORCE to develop an integrated survey system to better understand the conditions and perspectives within the BMT environment from both trainees and instructors. The goal of this system is to help detect incidents of abuse and sexual misconduct in the training environment and to provide metrics to help leaders understand what actions to take to reduce these behaviors.

Based on an extensive review of relevant materials including internal AETC investigations of these incidents, Air Force and Department of Defense policies and the scientific literature, RAND developed two complementary surveys, one for trainees and one for MTIs. The trainee survey assesses trainee experiences and related reporting behaviors for the following abuse and misconduct categories: trainee bullying, maltreatment and mal-training, unprofessional relationships, sexual harassment, and unwanted sexual experiences. The survey also measures individual perceptions of squadron climate and BMT feedback and support systems.

The MTI survey assesses the extent to which MTIs were aware of trainees experiencing abuse, as well as their perceptions of the related squadron climate and MTI reporting behaviors. The MTI survey also includes a section on quality of life, including job attitudes, the work environment, and job stressors.

The Basic Military Training Survey was launched on 7 Oct 2013. Thus far, in Fiscal Year (FY) 2016, 22,316 trainees have participated in the BMT Survey. The BMT MTI Survey was first launched in early calendar year 2015. In FY16, 455 instructors have participated to date in the BMT MTI Survey.

This research program has enabled AETC to intervene in the BMT training environment where appropriate in order to address issues as they arise. It also provides the Air Force with the capability to evaluate the effectiveness of such intervention and to continue moving forward in addressing issues relating to sexual assault.

AETC is continuing its partnership with RAND and developing a training climate survey system for the flying training and technical training environments. The RAND survey will ask students to identify bullying (to include cyber), hazing, maltreatment/mal-training, unprofessional relationships, sexual harassment and unwanted sexual experiences. RAND is coordinating a pilot test of the survey at 5 locations (Keesler AFB, Lackland AFB, Sheppard AFB, Laughlin AFB, and Fairchild AFB) that began in October 2016 and is ongoing, with a final instrument available for full implementation during FY17. The survey will be delivered electronically to the survey taker and data storage, upon survey

completion by the survey respondent, will be tightly controlled to prevent alteration of the data and to enhance confidentiality.

Since 2013, Second Air Force has engaged in similar efforts to identify misconduct in the training environment through the use of a student climate survey and an end-of-course misconduct questionnaire. Climate surveys are administered randomly by training group evaluations staff and require students to evaluate the training climate. Selected students rate and comment on how the training culture tolerates/rejects sexual assault, sexual harassment, bullying, hazing, and inappropriate relationships. Furthermore, all students complete the misconduct end-of-course questionnaire. This survey asks students if they have experienced faculty-on-student sexual assault, physical or verbal abuse, unprofessional relationships, inappropriate social contact, or discrimination. Once the flying and technical training survey systems are implemented, Second Air Force will discontinue the use of these instruments.

5.5 Describe your progress in assessing SARC/SAPR VA training effectiveness. Include actions taken to implement training enhancements. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 5, #21, p. 8)

The Air Force Sexual Assault Prevention and Response Office (AF SAPRO) utilizes a number of practices in order to determine program effectiveness. Major commands submit quarterly training reports that identify the types and number of activities that SAPR personnel are delivering to their communities. Included in these reports are training and briefing activities, outreach and prevention efforts, as well as personnel manning metrics.

Coordination with the Air Force Audit Agency (AFAA) continues to identify findings and recommendations pertaining to program effectiveness. In addition to standard audits AFAA and AF SAPRO formalized a virtual audit plan in Fiscal Year 2015 that is still being utilized to date. The audit's aim is to determine if required qualifications are met by SAPR personnel and include background investigations, training, statements of understand, and Department of Defense Sexual Assault Advocate Program Certification. Additionally, the AFAA conducted an audit of the SAPR Program at eleven non-deployed locations in 2016, however results have not been released at the time of this report.

To meet the continuous compliance requirements set forth in Air Force Instruction 90-201, *The Air Force Inspection System*, the SAPR program is inspected by certified personnel annually. This report is provided to the base's major command and to Headquarters Air Force.

5.6 Describe your efforts to assess compliance of commanding officers in conducting organizational climate assessments for purposes of preventing and responding to allegations of sexual assault. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 5, #17, p. 8)

The Air Force continues to hold commanders accountable for creating and sustaining an environment of dignity and respect for active duty, reserve, and civilian employees. The climate assessment survey is a tool commanders use to measure their climate. Command climate, just like organizational climate, is the perception of a unit's environment by its members. Commanders are ultimately responsible for the good order

and discipline in their unit and have unique responsibility and authority to ensure good order and discipline which includes adherence to Sexual Assault Prevention and Response Program directives. Policy states evaluators of commanding officers must take this special responsibility and authority into consideration when evaluating a commander's effectiveness in ensuring a healthy command climate.

Changes were made to Air Force Instruction 36-2406, *Officer and Enlisted Evaluation System*, and performance evaluation and performance feedback forms. These changes codified the organizational and command climate. A commander's performance evaluation could be impacted by the organizational climate for all Airmen.

5.7 Describe your policy and management control procedures for ensuring that Service members, who reported a sexual assault and are separated for Non-Disability Mental Conditions, are properly counseled, in writing. Additionally, describe how your Military Service ensures that the separations are processed and recorded in accordance with DoDI 1332.14, Enlisted Administrative Separations (4 Dec 14). (DoD IG Report 2016-088, Evaluation of the Separation of Service Members Who Made a Report of Sexual Assault (9 May 16), p. i)

Air Force Instructions 36-3206 *Administrative Discharge Procedures for Commissioned Officers* and 36-3208 *Administrative Separation of Airmen* have been updated to require a higher level review in circumstances in which a sexual assault victim is considered for separation under a non-disability mental condition. Special processing for Airmen who alleged having been sexually assaulted and filed an unrestricted report of sexual assault, and are being considered for a personality disorder discharge or other mental health disorder not constituting a physical disability, will obtain a higher level review. Specifically, the Military Treatment Facility will forward the diagnosis with supporting documentation through for a higher level review and endorsement by the Air Force Surgeon General.

5.8 Describe actions taken to integrate recent survey (e.g., MIJES, WGRR, and QSAPR) and focus group results into your Military Service SAPR policies and training programs. (DoDI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 3, para 1s / Encl 12, para 1f)

The Defense Manpower Data Center (DMDC) created the Military Investigation and Justice Experience Survey (MIJES) for the Office of the Department of Defense Sexual Assault Prevention and Response Office (DoD SAPRO) to gather data on a victim's experiences with the military justice process. Results from the 2015 MIJES found that Service members were extremely satisfied with their Special Victims' Counsel (SVC). Therefore, the AF will continue to sustain the SVC program.

Additionally, the 2015 MIJES found that many Service members experienced negative outcomes as a result of reporting. This finding contributed to the DoD Retaliation Prevention and Response Strategy, the implementation for which is being coordinated between DoD SAPRO and representatives from all Services.

Air Force Sexual Assault Prevention and Response Office utilized a web-based survey similar to DMDC's Survivor Experience Survey to gather feedback from civilian employees who made reports during the civilian employee reporting exception to policy period. Few

of the 44 DoD civilians who reported a sexual assault between 1 Aug 15 and 31 Jul 16 responded to the survey so the results are not statistically significant; however, the responses indicate a general level of satisfaction with the SAPR services received. As a result, the Secretary of the Air Force has requested an indefinite exception to policy, which would continue to allow AF civilians to make restricted and unrestricted reports of sexual assault, and continue to obtain SAPR services.

5.9 Describe your leadership approved future plans, if any, for effectively standardizing, measuring, analyzing, assessing, and reporting program progress.

The Air Force is making steady progress to standardize assessment methodologies and to effectively measure, analyze, assess, and report the progress of the Sexual Assault Prevention and Response (SAPR) Program. Future Air Force efforts will include research on understanding and defining useful prevention approaches, identifying high-risk subgroups, identifying the characteristics of assaults that are more prevalent as well as identifying common characteristics of perpetrators. The Air Force believes that understanding the perpetrator risk factors and assault behaviors will aid in creating a more robust and effective prevention program.

The Air Force, together with Department of Defense SAPR Office (DoD SAPRO) and Army Sexual Harassment and Assault Response and Prevention (SHARP) commissioned the Institute for Defense Analyses to conduct the Alcohol Landscape Study in 2015. The Alcohol Landscape Study will study Service member's drinking habits and preferences, as well as personnel data, in an effort to quantify how attitudes and behaviors towards drinking drive negative outcomes associated with alcohol misuse (e.g., sexual assault, suicide, drinking and driving). Ultimately the study will clarify how effective policies impacting alcohol availability and pricing could be at reducing negative outcomes. The study is ongoing and will take several years to complete.

The Air Force Sexual Assault Prevention and Response Office (AF SAPRO) is also working with the Research Triangle Institute and Basic Military Training (BMT) on the Sexual Communication and Consent effort, which is adapting evidence based victimization and re-victimization training programs from a college environment for the Air Force. Using tablet technologies, individuals will be identified as at risk for victimization, re-victimization, or perpetration, and receive training tailored to their experiences. The study will be piloted at BMT starting in 2017.

At the start of 2015, AF SAPRO had no survey system capability for conducting sexual assault survey research. AF SAPRO relies on extensive survey data to inform program decisions and in Fiscal Year (FY) 2016 awarded a multi-year contract for the Qualtrics survey system to fulfill in-house survey development needs. AF SAPRO has successfully used the Qualtrics survey system for multiple surveys in 2016 (see Section 5.1) and will continue to do so in the future.

Also at the start of 2015, AF SAPRO relied solely on Microsoft Excel for conducting analysis. In FY15, AF SAPRO acquired SAS (SAS Institute Inc.) licenses and provided training for all analysts to create a more robust analysis capability. Additionally, in 2016 AF SAPRO began using the R programming environment to supplement SAS. Throughout

FY16, AF SAPRO analysts have successfully used SAS and R software in a variety of ways, such as sampling populations in support of surveys, providing decision support reports for leadership, developing automated reports for prevention initiatives, and developing products to improve the accuracy of data in the Defense Sexual Assault Incident Database. SAS and R will continue to be AF SAPRO's standard analysis tools in the future.

6. Overarching Tenet: Communication and Policy

6.1 Describe your efforts to post and widely disseminate information on male victim sexual assault prevention and response. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

The Sexual Assault Response Coordinator (SARC) and Sexual Assault Prevention and Response Victim Advocate (SAPR VA) Course, the foundational training for our SARCs and SAPR VAs, provides information and education on prevalence rates and specific barriers with male sexual assault victims. The male victimization module helps SARCs and SAPR VAs identify and respond to the unique social and cultural pressures and misconceptions that impact male survivors. This provides our advocates a better understanding when responding to male victims. Additionally, attendees are provided information on resources that address male survivors, to include Male Survivor, Safe4athletes, 1in6, MenThriving, and the DoD Safe Helpline. During the required 2016 AF SAPR Refresher training for all SARCs and SAPR VAs, MaleSurvivor.org provided 1.5 hours dedicated to male victimization. Additionally, the training branch developed a specific training topic mandated for 2015 annual training on male victimization that can still be utilized as a training tool as requested. Currently, the AF is working with DoD on a working group to gain additional awareness that will review and utilize evidence-informed and evidenced-based approaches that specifically target male victimization. The Air Force Sexual Assault Prevention and Response Office (AF SAPRO) provides information on male victimization via the AF SAPRO website and installations promote awareness of the SAPR program that is gender responsive, culturally competent and recovery oriented.

6.2 Describe your efforts to post and widely disseminate information on ways to report allegations of retaliation. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

Results from the 2014 Research and Development (RAND) Military Workplace Survey indicated 62% of female Airmen who reported a sexual assault indicated they had subsequently experienced some form of retaliation. In response, the Secretary of the Air Force directed all training for supervisors include sexual assault related curriculum on retaliation. In 2016, the Air Force required all Uniform Airmen and Civilians who supervise military members to receive initial first-line supervisor training on preventing retaliation. The focus of the training was on enabling supervisors to recognize signs or possible acts of retaliation, take action by addressing incidents of retaliation, and understand which resources are available to military Airmen experiencing retaliation.

Additionally, retaliation was added as an action item to the monthly case management review meetings in March 2015 to ensure commanders are held accountable for addressing all incidents. The Air Force Equal Opportunity Office has established training to prevent retaliation and/or reprisal against Airmen who allege sexual harassment.

Human Relations Education is given by local Equal Opportunity office personnel and is mandatory for pre-commissioning programs, initial entry training, all levels of professional military education, and training of general officers and senior executive service members.

Air Force Instruction 1-1, *Air Force Standards*, sets the standard for social media use. It specially states: "You must avoid offensive and/or inappropriate behavior on social networking platforms and through other forms of communication that could bring discredit upon the Air Force or you as a member of the Air Force, or that would otherwise be harmful to good order and discipline, respect for authority, unit cohesion, morale, mission accomplishment, or the trust and confidence that the public has in the United States Air Force."

Finally, installation commanders are responsible for developing supplemental guidance to prevent unlawful discrimination, sexual harassment, and reprisal. Commanders must post the guidance prominently on base web pages and in locations frequented by the base population. Our overarching SAPR Strategy goal is to realize an Air Force free from sexual assault; but, as long as there is one victim, we will not lose sight of our responsibility to care for that victim, to seek appropriate justice; and to appropriately address any retaliation that results from reporting a sexual assault or helping a sexual assault victim. Sexual assault and the restoration of our Airmen and communities have a direct impact on mission readiness. We will continue to improve upon our response to sexual assault. We are committed to leading the nation in holistic world-class care.

6.3 Provide an update on your development and implementation of new certification standards for sexual assault medical forensic examiners. (DoDI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 2, para 3c(3)(b))

During Fiscal Year (FY) 2016 the Air Force was allotted training slots for designated healthcare providers in the Army Sexual Assault Medical Forensic Examiner (SAMFE) course. In FY17, the SAMFE course will be Tri-Service. The Air Force will represent one of five full-time instructors for the course. Certification is only achieved after attending the two-week SAMFE Course (Phase I) and then completing Phase II which consists of a live patient exam, court experience and observation of a case management group. Phase II is currently being discussed within the Services to develop a Tri-Service approach as done with Phase I. The certification test has been developed and is currently in the pilot testing phase.

6.4 Describe your ongoing efforts to review, revise, update, and issue policy pertaining to:

- Safety Assessments for SAPR Program
- High-Risk Response Teams

Were any multi-disciplinary High-Risk Response Team established?

- If so, how many and what was the duration?
- If the High-Risk Response Team was dissolved, explain why?

(DoDI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 5, para 2c / Encl 9, para 2j(3))

Air Force Instruction (AFI) 90-6001 (incorporating Change 1, 18 March 2016) *Sexual Assault Prevention and Response (SAPR) Program*, directs the installation commander and Sexual Assault Response Coordinator to ensure SAPR personnel conduct a non-clinical safety assessment in every non-Family Advocacy Program incident of adult sexual assault (paragraph 1.7.1.3.5. and 2.5.3.6.). Additionally, AFI 90-6001 directs the Case Management Group to form a High Risk Response Team (HRRT) based on the safety assessment, if a victim is found to be at high risk of harm.

SAPR personnel report convening two HHRTs in Fiscal Year 2016. The duration of one was two months and the second for thirty minutes. Each were dissolved because the safety issues were resolved.

6.5 Provide an update on your methods for effectively factoring accountability metrics into commanders' and subordinate leaders' performance assessments. (SecDef Memo (6 May 13), *Enhancing Commander Accountability*, p. 2)

Commanders are held accountable for the climate in their organization. Air Force Instruction 36-2406, *Officer and Enlisted Evaluations Systems* outlines commander responsibility for command climate to include SAPR program directives and the responsibility for evaluators to take this into account when evaluating a commander's effectiveness.

Paragraph 1.8.5.2. Commanders at every level have an even greater responsibility to create a healthy climate in their command. Additionally, they are responsible for ensuring adherence to Sexual Assault Prevention (SAPR) Program directives. Command climate, just like organizational climate, is the perception of a unit's environment by its members. Commanders are ultimately responsible for the good order and discipline in their unit and have unique responsibility and authority to ensure good order and discipline. Therefore, evaluators must take this special responsibility and authority into consideration when evaluating a commander's effectiveness in ensuring a healthy command climate.

6.6 Provide an update on efforts to improve overall victim care and increase trust in the chain of command: include initiatives or updates undertaken to reduce allegations of retaliation as a means of increasing reporting and the way in which your Military Service is tracking and accounting for these efforts. (SecDef Memo (6 May 13), *Improving Response and Victim Treatment*, p. 2 / DoD Retaliation Prevention and Response Strategy: *Regarding Sexual Assault and Harassment Reports* (April 2016), p. 10)

An August 2016 Department of Defense (DoD) mandated data call initiated collection of information on retaliation allegations associated with sexual assault and harassment reporting involving service members. This data call builds on the March 2015 Retaliation Memo that requires Sexual Assault Response Coordinators (SARCs) to discuss retaliation with victims as well as collect retaliation related data for review during installation Case Management Group (CMG) meetings. This memo also establishes additional reporting requirements for SARCs regarding any retaliation victims may be experiencing.

Inter-service working groups have been established to develop a Retaliation Prevention and Response Strategy for approval by DoD. The Judicial Proceedings Panel published

in 2015 provided a series of recommendations that will improve the quality of legal services provided to sexual assault victims.

The Air Force Sexual Assault Prevention and Response Office (AF SAPRO) established an Executive Speaker Survivor Panel in 2016. This panel consists of sexual assault survivors who meet with senior AF SAPRO leaders on a recurring basis to discuss victim-centric issues, lessons learned, and improvements to be made to AF SAPRO policies and procedures.

The 2015 Survivor Experience Survey has been replaced by the 2016 Military Investigation and Justice Experience Survey. This survey is provided to sexual assault survivors as a way to provide feedback on their experiences with the response portion of the SAPR program. Results from this survey will be briefed to Service leadership, DoD leadership, the DoD SAPR Office, and Congress.

6.7 Provide an update on your policy for Case Management Group (CMG) Chairs to regularly assess and refer retaliation allegations, made in conjunction with a sexual assault report, for appropriate investigation. Additionally, describe your policy for keeping these retaliation allegations on the CMG agenda for status updates until the victim's allegation is appropriately addressed.

(SecDef Memo (3 Dec 14), Engage Command to Prevent Retaliation, p. 2 / DoDI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 9)

Air Force Instruction (AFI) 90-6001 (incorporating Change 1, 18 March 2016) *Sexual Assault Prevention and Response (SAPR) Program*, directs the installation commander to add allegations of retaliation to the monthly Case Management Group (CMG) for discussion. The allegation will be reviewed until the case has reached final disposition or the allegation has been appropriately addressed (paragraph 1.7.1.26.2. and 6.2.1.1.2.). Furthermore, the CMG chair is directed to require any complaints of retaliation to remain on the CMG agenda until the case has reached final disposition or the complaint has been appropriately addressed (paragraph 8.3.6.3.3.).

7. Secretary of Defense Initiatives

7.1 Enhance First Line Supervisor Skills and Knowledge: Provide an update on your first line supervisor training that advances a climate of dignity and respect and supports the prevention of potential retaliation associated with reporting. First line supervisors are junior officers, enlisted supervisors, and civilian employees who supervise military members. Address the frequency of the training; policy updates in support of the training; and, how the curriculum emphasizes the importance of engaging subordinates on sexual assault prevention and response; instructs them on recognizing the signs of possible acts of retaliation; and, provides an opportunity to practice leadership skills to promote a healthy command climate.

(SecDef Memo, (3 Dec 14), p. 2)

The Air Force Sexual Assault Prevention and Response Office (AF SAPRO) developed First Line Supervisor Training on Preventing Retaliation based on a 2013 Secretary of Defense memo that directed the enhancement of first line supervisor skills and knowledge in order to advance a climate of dignity and respect. The training was mandatory for all junior officers, junior enlisted, and civilians who supervise military, but all supervisors were

encouraged to participate to help them recognize signs of possible retaliation. The duration of the training was estimated to take one hour and designed in a small group format to generate discussion, and intended for Squadron Commanders or an appropriate designee to facilitate. Participation in small groups was to give first line supervisors ownership of the issue of retaliation and empower them to act in ways that support and sustain the healthy, respectful command climate all leaders expect and all Airmen deserve. Six discussion points were included to create open dialogue and problem solving scenarios to find ways to prevent retaliation. Actively listening, familiarity with SAPR resources, and controlling information flow protects the victim and allows First Line Supervisors to remain the gate keepers.

The initial training was designed to serve as a one-time training event to capture all current Regular Air Force personnel, Guard and Reserve.

AF SAPRO also collaborated with Air University to add curriculum on retaliation in all first line supervisor training and courses. This training will be ongoing for targeted supervisors identified by the Secretary of Defense and Secretary of the Air Force with emphasis on sexual assault related retaliation and the importance of engaging with subordinates as key elements. Creating an environment where subordinates feel safe to speak to supervisors about issues and concerns is the optimum climate.

8. NDAA Requirements - Provide your Military Service's update on the following FY15/FY16 NDAA requirements. If the provision has been implemented, indicate "Completed," and provide the implementation date. If the provision has not been implemented, indicate "In Progress" and provide an update (150 words or less), including the projected completion date.

8.1 Review by the Military Service Secretary (at the chief prosecutor's request) of a Convening Authority's decision to not refer charges of certain sex-related offenses for trial by court-martial.

“(c) REVIEW OF CERTAIN CASES NOT REFERRED TO COURT-MARTIAL.—

“(1) CASES NOT REFERRED FOLLOWING STAFF JUDGE ADVOCATE RECOMMENDATION FOR REFERRAL FOR TRIAL.—In any case where”; and (2) by adding at the end the following new paragraph:

“(2) CASES NOT REFERRED BY CONVENING AUTHORITY UPON REQUEST FOR REVIEW BY CHIEF PROSECUTOR.—

“(A) IN GENERAL.—In any case where a convening authority decides not to refer a charge of a sex-related offense to trial by court-martial, the Secretary of the military department concerned shall review the decision as a superior authority authorized to exercise general court martial convening authority if the chief prosecutor of the Armed Force concerned, in response to a request by the detailed counsel for the Government, requests review of the decision by the Secretary.

“(B) CHIEF PROSECUTOR DEFINED.—In this paragraph, the term ‘chief prosecutor’ means the chief prosecutor or equivalent position of an Armed Force, or, if an Armed Force does not have a chief prosecutor or equivalent position, such other trial counsel as shall be designated by the Judge Advocate General of that Armed Force, or in the case of the Marine Corps, the Staff Judge Advocate to

<p>the Commandant of the Marine Corps.” (FY15 NDAA, Sec 541)</p>
<p>Completed on 3 August 2016, via Air Force Guidance Memorandum 2016-01 to Air Force Instruction 51-201, <i>Administration of Military Justice</i>.</p>
<p>8.2 Inclusion of disposition results in future annual reports.</p> <p>(a) SUBMITTAL TO SECRETARY OF DEFENSE OF INFORMATION ON EACH ARMED FORCE.—Subsection (b) of section 1631 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (10 U.S.C. 1561 note) is amended by adding at the end the following new paragraph:</p> <p>“(11) An analysis of the disposition of the most serious offenses occurring during sexual assaults committed by members of the Armed Force during the year covered by the report, as identified in unrestricted reports of sexual assault by any members of the Armed Forces, including the numbers of reports identifying offenses that were disposed of by each of the following:</p> <p>“(A) Conviction by court-martial, including a separate statement of the most serious charge preferred and the most serious charge for which convicted.</p> <p>“(B) Acquittal of all charges at court-martial.</p> <p>“(C) Non-judicial punishment under section 815 of title 10, United States Code (article 15 of the Uniform Code of Military Justice).</p> <p>“(D) Administrative action, including by each type of administrative action imposed.</p> <p>“(E) Dismissal of all charges, including by reason for dismissal and by stage of proceedings in which dismissal occurred.” (FY15 NDAA, Sec 542)</p> <p>Completed as of the signing of this report; refer to section 2.2 of the Analytic Discussion.</p>
<p>8.3 Confidential review of the terms or characterization of discharge for Armed Services members who report being victims of sexual assault.</p> <p>(a) CONFIDENTIAL REVIEW PROCESS THROUGH BOARDS FOR CORRECTION OF MILITARY RECORDS.—The Secretaries of the military departments shall each establish a confidential process, utilizing boards for the correction of military records of the military department concerned, by which an individual who was the victim of a sex-related offense during service in the Armed Forces may challenge the terms or characterization of the discharge or separation of the individual from the Armed Forces on the grounds that the terms or characterization were adversely affected by the individual being the victim of such an offense.</p> <p>(b) CONSIDERATION OF INDIVIDUAL EXPERIENCES IN CONNECTION WITH OFFENSES.—In deciding whether to modify the terms or characterization of the discharge or separation from the Armed Forces of an individual described in subsection (a), the Secretary of the military department concerned shall instruct boards for the correction of military records—</p> <p>(1) to give due consideration to the psychological and physical aspects of the individual’s experience in connection with the sex-related offense; and</p> <p>(2) to determine what bearing such experience may have had on the circumstances surrounding the individual’s discharge or separation from the Armed Forces.</p> <p>(c) PRESERVATION OF CONFIDENTIALITY.—Documents considered and decisions rendered pursuant to the process required by subsection (a) shall not be made</p>

available to the public, except with the consent of the individual concerned.

(d) SEX-RELATED OFFENSE DEFINED.—In this section, the term “sex-related offense” means any of the following:

(1) Rape or sexual assault under subsection (a) or (b) of section 920 of title 10, United States Code (article 120 of the Uniform Code of Military Justice).

(2) Forcible sodomy under section 925 of such title (article 125 of the Uniform Code of Military Justice).

(3) An attempt to commit an offense specified in paragraph (1) or (2) as punishable under section 880 of such title (article 80 of the Uniform Code of Military Justice).

(FY15 NDAA, Sec 547)

(a) Completed. Both the Discharge Review Board (DRB) and Board for Correction of Military Records (BCMR) provide a confidential venue through which any person, including an individual who was the victim of a sex-related offense while serving in the Armed Forces, may challenge the terms or characterization of the discharge or separation of the individual from the Armed Forces. The appropriate venue is determined based on the length of time since the individual's discharge. If the discharge occurred less than 15 years ago, the DRB is the appropriate venue; however, if the discharge occurred more than 15 years ago (or a Discharge Review was previously completed without specific consideration for the sex-related offense consideration), the BCMR is the appropriate venue.

(b) In-progress; Estimated Completion Date: 2017. These provisions have already been incorporated in the BCMR governing instruction, Air Force Instruction (AFI) 36-2603, *Air Force Board for Correction of Military Records*, which is pending publication in the Federal Register for a 60-day public comment period. Once the 60-day public comment period closes, and any comments are adjudicated, the AFI will be released for publication.

Additionally, we are coordinating specific guidance to the BCMR from the Secretary of the Air Force, which, when published, will be provided to the Board for reference in adjudicating cases pertaining to victims of sexual assault. The DRB will implement similar procedures as the BCMR by providing the specific guidance from the Secretary of the Air Force to DRB board members.

While these provisions have yet to be codified in our governance, both the DRB and BCMR have implemented mechanisms to ensure due consideration is given to the psychological and physical aspects of the applicant's experience to determine the bearing such experience may have had on the discharge or separation. Two clinical psychiatrists were recently hired to comply with separate provisions in the Fiscal Year 2015 National Defense Authorization Act pertaining to the adjudication of cases before the DRB and BCMR relating to mental health diagnoses. These provisions require a clinical psychiatrist or psychologist to serve as a member of the DRB when adjudicating any case where a mental health diagnosis rendered while serving is at issue. For the BCMR, these provisions require our psychiatrists provide written opinions supporting the BCMR's adjudication of such cases. These opinions are provided to the applicant for a 30-day review and comment period prior to the case being referred to the Board for consideration.

(c) Completed. While redacted decisional documents are required to be posted to a public reading room under the Freedom of Information Act, this confidentiality provision requires the consent of an applicant before doing so. Upon receipt of an application for correction of military records where the applicant claims to be the victim of a sex related offense, we advise the applicant in writing that their consent is required in order to post redacted decisional documents to our public reading room. If the applicant does not consent or does not reply, the redacted Record of Proceedings is not posted to the public reading room. The DRB will implement similar procedures.

8.4 Applicability of sexual assault prevention and response and related military justice enhancements to military service academies.

(a) MILITARY SERVICE ACADEMIES.—The Secretary of the military department concerned shall ensure that the provisions of title XVII of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113–66; 127 Stat. 950), including amendments made by that title, and the provisions of subtitle D, including amendments made by such subtitle, apply to the United States Military Academy, the Naval Academy, and the Air Force Academy, as applicable. (FY15 NDAA, Sec 552)

Completed, October 2016. The 2015 Air Force Sexual Assault Prevention and Response Strategy vision is applicable to the US Air Force Academy (USAFA). In particular, the emphasis on developmentally appropriate prevention suggests specific prevention approaches may be most useful with a young airman audience. Toward this end, the Air Force Sexual Assault Prevention and Response Office (AF SAPRO) is working closely with research staff at USAFA to adapt a healthy life and relationship skills training. In addition, AF SAPRO is working closely with USAFA SAPR and Community Support staff to ensure Green Dot is a fit for the unique environment. Through these collaborations AF SAPRO is building relationships and stimulating a holistic approach at USAFA.

8.5 Sexual assault prevention and response training for administrators and instructors of Senior Reserve Officers' Training Corps.

The Secretary of a military department shall ensure that the commander of each unit of the Senior Reserve Officers' Training Corps and all Professors of Military Science, senior military instructors, and civilian employees detailed, assigned, or employed as administrators and instructors of the Senior Reserve Officers' Training Corps receive regular sexual assault prevention and response training and education. (FY16 NDAA, Sec 540)

Completed. Since 2005, the Senior Reserve Officer's Training Corps (ROTC) detachment commanders and instructors receive Sexual Assault Prevention and Response (SAPR) training. Each year the curriculum is reviewed and updated as needed, then delivered as part of their initial qualification courses. These courses address the uniqueness of teaching in a university setting and include topics on sexual assault, sexual harassment, legal issues and reporting procedures.

The Fiscal Year 2015 implementation of Green Dot included a separate leadership session (90 minutes) that contextualized the content for the unique role of the leader. In

addition, group and wing commanders received a briefing at pre-command courses that included background on the public health approach to violence prevention, the overarching prevention plan, on the rationale behind Green Dot, implementation specifics and early success stories. In addition, a specific adaptation was developed for AFRC. The Air Force Sexual Assault Prevention and Response Office is collaborating with ROTC to ensure that interventions in development meet the unique needs of officers in training.

9. Analytic Discussion

9.1 Military Services/NGB*, provide an analytic discussion (1,000 words or less) of your Military Service's Statistical Report of reported sexual assault cases from the DSAID. Required elements included on this template are information on Unrestricted Reports; Restricted Reports; Service referrals for victims alleging sexual assault; and case synopses of completed investigations.

***NGB should provide comments based on their available information and data.**

This section shall include such information as:

- **Notable changes in the data over time**
- **Insight or suspected reasons for noted changes, or lack of change, in data**
- **The application of insights from data analyses for programmatic planning, oversight, and/or research**
- **Prevalence vs. reporting (the percentage of Service member incidents captured in reports of sexual assault (Restricted Reports and Unrestricted Reports) (Metric #2)**
- **Total number of Sexual Assaults (Restricted Reports and Unrestricted Reports) over time (since FY08) (Metric #12)**
- **Military Protective Orders issued as a result of an Unrestricted Report (e.g., number issued, number violated)**
- **Approved expedited transfers and reasons why transfers were not approved**
- **The number of sexual assault investigations completed by the MCIO in the FY and the corresponding mean and median investigation length. Case open date can be in any year, but the close date must be by the end of the FY (Metric # 5)**
- **The number of subjects with victims who declined to participate in the military justice process (Metric #8)**
- **Command action for military subjects under DoD legal authority (to be captured using the most serious crime investigated, comparing penetration to contact crimes) (Non-Metric #1)**
- **Sexual assault court-martial outcomes (to be captured using the most serious crime charged, comparing penetration to contact crimes) (Non- Metric #2)**
- **Summary of referral data – Unrestricted and Restricted Reports - either referrals received from other sources or referrals made to other sources (e.g., medical/mental health, command, criminal investigation/security services, legal, civilian or VA authorities, etc.)**
- **Any other data relating to sexual assault case data**

United States Air Force FY16 Annual Report on Sexual Assault in the Military: Statistical Analysis

1. Analytic Discussion

This section presents tabulations and charts regarding reports of sexual assault involving Service members as either victims or subjects received by the Air Force in fiscal year (FY) 2016 (FY16). Where possible, prior-FY data are also included for comparison. Sexual assault report data were drawn from the Defense Sexual Assault Incident Database (DSAID) and sexual assault prevalence data were drawn from biannual workplace and gender relations surveys. DSAID is a centralized, case-level database for the collection and maintenance of information about sexual assaults, such as the nature and details of the assault, information about the victim, services offered to the victim, information about the offender(s), and disposition of the reports associated with the assault. It is important to note that DSAID does not contain information about all military-related sexual assaults. DSAID captures sexual assault reports in which either the victim or the subject is a service member. Other military-related sexual assaults, such as those involving intimate partners, those involving dependent minors, or those involving a non-Service member victim and non-Service member subjects, are not captured in DSAID and are not addressed in this report.

The Air Force received a total of 1,355 reports of sexual assault involving Service members as either victims or subjects in FY16, which represents a 3.3% increase from the 1,312 reports made in FY15. The total active duty Air Force population also increased 2.1% during FY16, from about 307,300 at the end of FY15 to about 313,700 at the end of FY16. Considering the population increase, the increase in reporting is not statistically significant.

Of the 1,355 sexual assault reports received by the Air Force in FY16, 748 (55%) were for incidents that occurred in FY16, 471 (35%) were for incidents that occurred in prior FYs, and the remaining 136 (10%) were for incidents that occurred on an unknown date. In FY15, the Air Force received 1312 sexual assault reports. Of these, 711 (54%) were for incidents that occurred in FY15, 371 (28%) were for incidents that occurred in prior FYs, and the remaining 230 (18%) were for incidents that occurred on an unknown date.

Of the 1,355 sexual assault reports received by the Air Force in FY16, 1,170 (86%) had a Service member victim. Of those 1,170 Service member victims, 125 (11%) reported an incident that occurred before entering into military service. In FY15, the Air Force received 1,312 sexual assault reports. Of these, 1,148 had a Service member victim. Of the 1,148 service member victims in FY15, 120 (10%) reported an incident that occurred prior to entering military service.

The United States military allows eligible victims to make one of two kinds of sexual assault report: unrestricted or restricted. Additionally, a victim who initially makes a restricted report has the option of later converting the restricted report to an unrestricted report. Of the 1,355 reports of sexual assault involving Service members as either victims or subjects received by the Air Force in FY16, 940 are unrestricted and 415 remained restricted at the end of FY16.

The 940 unrestricted reports include 796 initially-unrestricted reports made in FY16, 109

initially-restricted reports made in FY16 that converted to unrestricted in FY16, and 35 initially-restricted reports made in prior FYs that converted to unrestricted in FY16.

The Air Force initially received 524 restricted reports involving Service members as either victims or subjects in FY16, of which 109 converted to unrestricted during FY16 (and are now included in the aforementioned 940 unrestricted reports), leaving 415 remaining restricted at the end of FY16. Thirty-one percent of FY16 reports remained restricted at the end of FY16, up from 29% in FY15.

Chart 1.1 shows the number of reports of sexual assault involving Service members as either victims or subjects in FY08 through FY16. The number of reports (both restricted and unrestricted) more than doubled (108% increase) from FY11 to FY14 and has remained at FY14 levels since. The Air Force believes that the sustained high levels of reporting in FY14, FY15, and FY16 indicates that victims continue to feel comfortable coming forward to report these crimes, receive care, and allow investigations to take place so that commanders can hold alleged assailants appropriately accountable. Additionally, the percentage of reports that remain restricted decreased from roughly 40% in FY09 through FY12 to roughly 30% in FY14 through FY16. Although the Air Force fully supports the restricted reporting option, the decrease in the percentage of reports that remain restricted may indicate increased victim confidence in the military justice system and the overall Sexual Assault Prevention and Response Program.

Chart 1.1 – Annual Reports of Sexual Assault

2. Unrestricted Reporting

2.1 Victim Data Discussion and Analysis

This section provides data about victims in completed investigations of unrestricted reports of sexual assault. In this section, the term “FY” refers to the FY in which the investigation associated with a report concluded. For example, unrestricted reports under the FY16 rubric are not necessarily reports filed in FY16. Rather, they are reports whose associated investigations concluded in FY16. These reports could have been filed in FY16 or in any preceding FY.

Table 2.1.1 breaks out the unrestricted report investigations completed each FY by type of offense.¹ From FY12 through FY14, the percentage of victims who experienced penetrating offenses decreased to less than half of all victims, while the percentage of victims who experienced non-penetrating offenses increased. In FY15 and FY16, this trend reversed, with penetrating offenses accounting for slightly more than half of all

¹ By DoD policy, a victim who wished to report multiple distinct sexual assaults would file multiple reports, or multiple victims involved in a single incident would each file their own reports. As a result, each sexual assault report has exactly one victim and the number of reports corresponds to the number of victims. The terms “number of reports” and “number of victims” are synonymous.

reports.

	FY12		FY13		FY14		FY15		FY16	
	Num	%	Num	%	Num	%	Num	%	Num	%

Table 2.1.1 – Type of Sexual Assault Offense for Unrestricted Reports

(associated with investigations completed during the respective fiscal year)

A demographic analysis of victims in investigations completed in each FY is provided in Table 2.1.2.

Gender: Women consistently represent the vast majority (over 82%) of victims in investigations completed each FY. Females comprised only about 19% of the active duty Air Force population during this timeframe. The percentage of male victims in completed investigations doubled between FY12 and FY16, from about 7% to over 15%. Males comprised about 81% of the active duty Air Force population during this timeframe. This increase in male reporting suggests that the social barriers for reporting among male victims are beginning to come down.

Age at Time of Incident: Victims in the 16-19 age group are increasingly over-represented compared to their representation in the active duty Air Force population. The percentage of victims in the 16-19 age group almost doubled between FY14 and FY16, from about 11% to about 20%. This age group comprised less than 5% of the active duty Air Force population during the same timeframe. However, about 20% of the victims in this age group reported incidents that occurred prior to Service entry. Even excluding the victims in this age group who reported incidents that occurred prior to Service entry, this age group still accounts for about 16% of victims in investigations completed in FY16, while comprising only about 5% of the FY16 active duty Air Force population.

Victims in the 20-24 age group are also over-represented compared to their representation in the active duty Air Force population, though not to the same extent as those in the 16-19 age group. The 20-24 age group contained about 40% of the victims in investigations closed in FY15 and FY16, while comprising less than 27% of the active duty Air Force population in this timeframe. However, about 19% of the victims in this age group reported incidents that occurred prior to Service entry. After excluding the victims in this age group who reported incidents that occurred prior to Service entry, this age group accounts for 32% of victims in investigations closed in FY16, while comprising less than 27% of the FY16 active duty Air Force population.

Victims in each of the older age groups (25-34, 35-49, 50-64, and 65+) are well under-represented compared to their respective cohorts in the active duty Air Force population.

Grade: Junior enlisted airmen (E1-E4) are highly over-represented amongst the victims in investigations completed in the FYs shown, consistently accounting for at least 70% of the

victims, while comprising only 39% of the active duty Air Force population. Senior enlisted airmen (E5-E9) and officers each account for much smaller shares of victims in investigations completed in FY16 (21% and 6%, respectively) than their respective cohorts in the active duty Air Force population (42% and 20%, respectively).

Table 2.1.2 – Victim Demographics for Unrestricted Reports

(associated with investigations completed during the respective fiscal year)

Combat Areas of Interest: A summary of victims in completed investigations in combat areas of interest is provided in Table 2.1.3. Due to the small number of victims in combat areas of interest, no demographic analysis is provided here because doing so could compromise victim confidentiality.

	FY12		FY13		FY14		FY15		FY16	
	Num	%	Num	%	Num	%	Num	%	Num	%
Total Victims	8	-	27	-	8	-	7	-	12	-

Table 2.1.3 - Victims in Combat Areas of Interest for Unrestricted Reports

(associated with investigations completed during the respective fiscal year)

A summary of military protective orders is provided in Table 2.1.4. The number of military protective orders remained stable from FY15 to FY16 (85 compared to 82, respectively).

NOTE: Prior to FY14 there was not a consistent mechanism for capturing the number of military protective orders issued and/or violated. The values in Table 2.1.4 represent the best data available at the time; however, they may not reflect the actual numbers of military protective orders issued and/or violated in FY12 and FY13.

	FY12		FY13		FY14		FY15		FY16	
	Num	%	Num	%	Num	%	Num	%	Num	%

Military Protective Orders Violated	9	6.8%	12	85.7%	3	2.1%	1	1.2%	1	1.2%

Table 2.1.4 - Military Protective Orders for Unrestricted Reports

A summary of expedited transfers is provided in Table 2.1.5. The number of expedited transfer requests almost tripled from FY12 to FY13 and remained relatively stable through FY15, and dropped in FY16 to 87 requests. One expedited transfer request was denied in FY16. The expedited transfer request was initially denied by the victim's squadron commander because the victim wanted to remain at victim's current location, but be placed into a different Squadron. The Wing Commander made a final decision to have the airman placed in a different organization and squadron (with the victim's approval).

Table 2.1.6 – Victim Participation in the Military Justice Process

2.2. Subject Data Discussion and Analysis

This section analyzes demographic data about subjects (i.e., assailants) in completed investigations of unrestricted reports of sexual assault. In this section, the term “FY” refers to the FY in which the investigation associated with a report concluded. For example, unrestricted reports under the FY16 rubric are not necessarily reports filed in FY16. Rather, they are reports whose associated investigations concluded in FY16. These reports could have been filed in FY16 or in any preceding FY. Additionally, while each unrestricted report of sexual assault has a single victim, a report may have more than one subject. For these reasons, the number of subjects shown in a given FY will not necessarily match the number of unrestricted reports filed during that FY.

A demographic analysis of subjects in completed investigations is provided in Table 2.2.1.

Gender: The percentage of subjects that are male appears to be decreasing and approaching the male share of the active duty Air Force population. The percentage of subjects in completed investigations who are male has decreased from a high of about 94% in FY13 to about 84% in FY16, while comprising about 81% of the active duty Air Force population during the same timeframe.

Age at Time of Incident: The percentage of subjects in the 16-19 age group is declining and approaching its representation in the active duty Air Force population. The percentage of subjects in the 16-19 age group declined from almost 11% in FY14 to 7.3% in FY16, while comprising about 5% of the active duty Air Force population during the same timeframe.

Subjects in the 20-24 age group are over-represented compared to their representation in the active duty Air Force population. The 20-24 age group contained roughly 35% to 38% of the subjects in investigations closed in FY13 through FY16, while comprising less than 27% of the active duty Air Force population in this timeframe.

Subjects in each of the older age groups (25-34, 35-49, 50-64, and 65+) are well under-represented compared to their respective cohorts in the active duty Air Force population.

Grade: Enlisted airmen (E1-E9) consistently account for about 89% of the subjects in completed investigations, while comprising roughly 80% of the active duty Air Force population during the timeframe shown. By contrast, officers account for about 8% subjects in investigations completed in FY16, while comprising 20% of the active duty Air Force population.

	FY12		FY13		FY14		FY15		FY16	
	Num	%	Num	%	Num	%	Num	%	Num	%

Table 2.2.1 – Subject Demographics for Unrestricted Reports

(associated with investigations completed during the respective fiscal year)

Table 2.2.2 analyzes subject dispositions reported in FY16. Of the 483 subjects with dispositions reported in FY16, 403 were considered for command action and the

remaining 80 were not considered for command action because the subject was outside the DoD's legal authority or a civilian or foreign authority exercised jurisdiction over the subject. Of the 403 subjects considered for command action, for 266 (66%) either a sexual assault charge or other misconduct was substantiated which lead to command action of some kind, for 126 (31%) command action was precluded, and for 11 (3%) the allegation was determined to be unfounded.

SUBJECTS OF INVESTIGATION WITH DISPOSITION INFORMATION TO REPORT IN FY16	483
<i>DoD did not Consider Action</i>	80
Subject outside DoD's legal Authority	79
<i>Offender is Unknown</i>	54
<i>Subject is a Civilian or Foreign National</i>	23
<i>Subject Died or Deserted</i>	2
Civilian/Foreign Authority Exercised Jurisdiction over Service Member Subject	1
<i>Sexual Assault Investigation Subjects Considered for Possible Action</i>	403
Evidence Supported Commander Action	266
<i>Sexual Assault Charge Substantiated</i>	210
Court-Martial Charge Preferred	129
Nonjudicial Punishments	39
Administrative Discharges	6
Other Adverse Administrative Actions	36
<i>Other Misconduct Substantiated</i>	56
Court-Martial Charge Preferred	4
Nonjudicial Punishments	30

Other Adverse Administrative Actions	21
Command Action Precluded	126
Victim Declined to Participate	59
Insufficient Evidence	65
Statute of Limitations Expired	2
Victim Died before completion of justice action	0
Allegation Unfounded by Command/Legal Review	11

Table 2.2.2 – FY16 Subject Dispositions for Unrestricted Reports

Chart 2.2.1 analyzes all command actions, both completed and pending completion, by FY.

Chart 2.2.1 – Command Actions by FY

Chart 2.2.2 analyzes dispositions for subjects with completed command actions in FY16.² Of the 403 subjects considered for command action in FY16, 382 had completed

² Chart 2.2.2 only includes command actions in which the action was completed in FY16. Command actions pending completion (e.g., court-martial preferred but pending trial) are not included in this graph because, in some cases, the crime investigated is not yet entered in DSAID. However, command actions

command actions in FY16. Of the 382 subjects with completed command actions in FY16, 218 (57%) were investigated for penetrating crimes and 164 (43%) were investigated for sexual contact crimes. Ninety five of the 218 subjects (44%) investigated for penetrating crimes proceeded to court-martial, and 33 of the 164 subjects (20%) investigated for sexual contact crimes proceeded to court-martial.

Chart 2.2.2 – FY16 Completed Command Actions by Crime Investigated

Chart 2.2.3 analyzes FY16 sexual assault court-martial outcomes. Twenty-two of the 95 (23%) subjects charged with penetrating crimes in FY16 were convicted, and seven of the 33 (21%) subjects charged with sexual contact crimes were convicted.

pending completion are included in Chart 2.2.1 which provides total disposition numbers from FY09 to FY16. Additionally, there were 9 completed command actions in FY16 that could not be classified as penetrating or sexual contact crimes because the crime charged was attempted sexual assault.

Chart 2.2.3 – FY16 Sexual Assault Court Martial Outcomes

Subject dispositions for unrestricted reports made in combat areas of interest are summarized in Table 2.2.3. Court-martial outcomes are not available for these cases.

Table 2.2.3 – Subject Dispositions for Unrestricted Reports in Combat Areas of Interest

2.3. Reporting Data Discussion and Analysis

This section analyzes assault details in unrestricted reports filed each FY. Previous sections classified reports by the FY in which the associated investigation was completed. This section classifies reports by the FY in which the report was filed. In cases where investigations have not yet been completed, the incident details are based upon information provided by the victim.

The number of unrestricted reports filed each FY significantly increased from FY12 to FY14 and has not significantly changed between FY14 and FY16. This suggests that members feel comfortable reporting offenses if needed. Subject-Victim service affiliation and Subject-Victim Gender categories show very little change from FY15 to FY16. Descriptive information about all unrestricted reports is analyzed in Table 2.3.1.

Table 2.3.1 – Incident Details for Unrestricted Reports

Descriptive information about unrestricted reports in combat areas of interest is analyzed

in Table 2.3.2. Of the unrestricted reports made in combat areas of interest, a notable difference from the larger population is in incident location. In combat areas of interest, a larger proportion of sexual assaults occur on-base (between 70%-100% in the combat areas of interest vs. 46%-50% for the full population of unrestricted reports). This is not surprising since the amount of time spent off the military installation is limited in combat areas of interest.

Table 2.3.2 – Incident Details for Unrestricted Reports in Combat Areas of Interest

3. Restricted Reporting

3.1. Victim Data Discussion

Table 3.1.1 and the following discussion provides demographic analysis of victims of sexual assault who made restricted reports that remain restricted. Five-hundred and twenty-four (524) victims initially filed restricted reports to the Air Force in FY16. Of these, 109 chose to convert their restricted report to an unrestricted report during FY16, leaving 415 restricted reports remaining restricted at the end of FY16.

Table 3.1.1 – Victim Demographics for Restricted Reports

Gender: Over 75% of the victims in restricted reports that remain restricted in any FY are women, compared to about 19% in the active duty Air Force population. Although the proportion male victims increased from 12.3% in FY13 to a high of 22.8% in FY15, it fell to 17.8% in FY16 (for comparison, men comprise about 81% of the active duty Air Force population).

Age at Time of Incident: Victims in the 16-19 age group are highly over-represented, consistently accounting for 21%-24% of restricted reports that remain restricted while comprising less than 5% of the active duty Air Force population. However, 38% of the victims in this age group reported incidents that occurred prior to Service entry. After excluding the victims in this age group who reported incidents that occurred prior to Service entry, this age group still accounts for 13% of victims who made restricted reports that remain restricted in FY16, while comprising only 5% of the FY16 population.

Victims in the 20-24 age group are also over-represented, accounting for 38% of the FY16

victims who made restricted reports that remain restricted, while comprising less than 27% of the active duty Air Force population (only 8% of the FY16 victims in this age group reported incidents that occurred prior to Service entry).

Each of the older age groups are well under-represented compared to their respective cohorts in the active duty Air Force population.

Grade: Junior enlisted airmen (E1-E4) are highly over-represented amongst the victims who made restricted reports that remain restricted in FY16, accounting for about 63% of the victims, while comprising only 39% of the active duty Air Force population. Senior enlisted airmen (E5-E9) and officers each account for much smaller shares of the FY16 victims who made restricted reports that remain restricted in FY16 (24% and 10%, respectively) than their respective cohorts in the active duty Air Force population (42% and 20%, respectively).

Combat Areas of Interest: A summary of victims in restricted reports remaining restricted from combat areas of interest is provided in Table 3.1.2. Due to the small number of victims that made restricted reports in combat areas of interest, no demographic analysis is provided here because doing so could compromise victim confidentiality.

Table 3.2.2 – Incident Details for Restricted Reports in Combat Areas of Interest

Table 3.2.3 shows the number of initially restricted reports, the number of initially restricted reports that were converted to unrestricted reports, and the number of restricted reports remaining restricted by FY. The percentage of initially restricted reports which converted to unrestricted reports has increased from 14.5% in FY12 to 20.5% in FY16. This overall increase may be indicative of growing confidence on the part of victims coming forward to make unrestricted reports.

	FY12		FY13		FY14		FY15		FY16	
	Num	%	Num	%	Num	%	Num	%	Num	%
Initially Restricted	399	-	488	-	505	-	471	-	524	-

Table 3.2.4 – Conversions of Restricted Reports in Combat Areas of Interest

4. Service Referrals for Victims of Sexual Assault

Table 4.1 summarizes the numbers of service referrals for unrestricted reports. There are no significant changes to report between FY15 and FY16. The most common service referrals for unrestricted reports were mental health, legal, victim advocate, and chaplain/spiritual support. NOTE: A change in counting methods occurred in FY14. Prior to this year, every time a victim received a referral for services, the tally for that particular service type was increased. However, starting in FY14, the tally was based simply on whether or not a victim received a certain type of referral. For example, if a victim received five referrals to see a mental health provider, it would have counted as five referrals in FY13 but only as one referral in FY14. For this reason, the percentages may be somewhat skewed in the following analysis.

	FY12		FY13		FY14		FY15		FY16	
	Num	%	Num	%	Num	%	Num	%	Num	%
Total Service Referrals	1,556	-	2,741	-	1,103	-	1,394	-	1429	-
Type of Service										
Medical	349	22.4%	332	12.1%	100	9.1%	92	6.6%	124	8.7%

Table 4.6 – Service Referrals for Non-Military Victims in Combat Areas of Interest

5. Additional Items

5.1. Military Justice Process/Investigative Process Discussion

This section summarizes data associated with the timeline involved in the military justice process. Chart 5.1 shows the time from when a victim makes an unrestricted report (i.e. signs the DD 2910) to the completion of the courts-martial process, sentence or acquittal. From FY15 to FY16 there was an increase of 83 days for the average courts-martial outcome. NOTE: This measure was first developed in FY14.

Chart 5.1 – Days from Report to Court Outcome

Chart 5.2 shows the average time period between victim reporting and completion of non-judicial punishment action. There is no significant difference between FY15 and FY16. Metrics will continue to be monitored. NOTE: This was also a new measure for FY14.

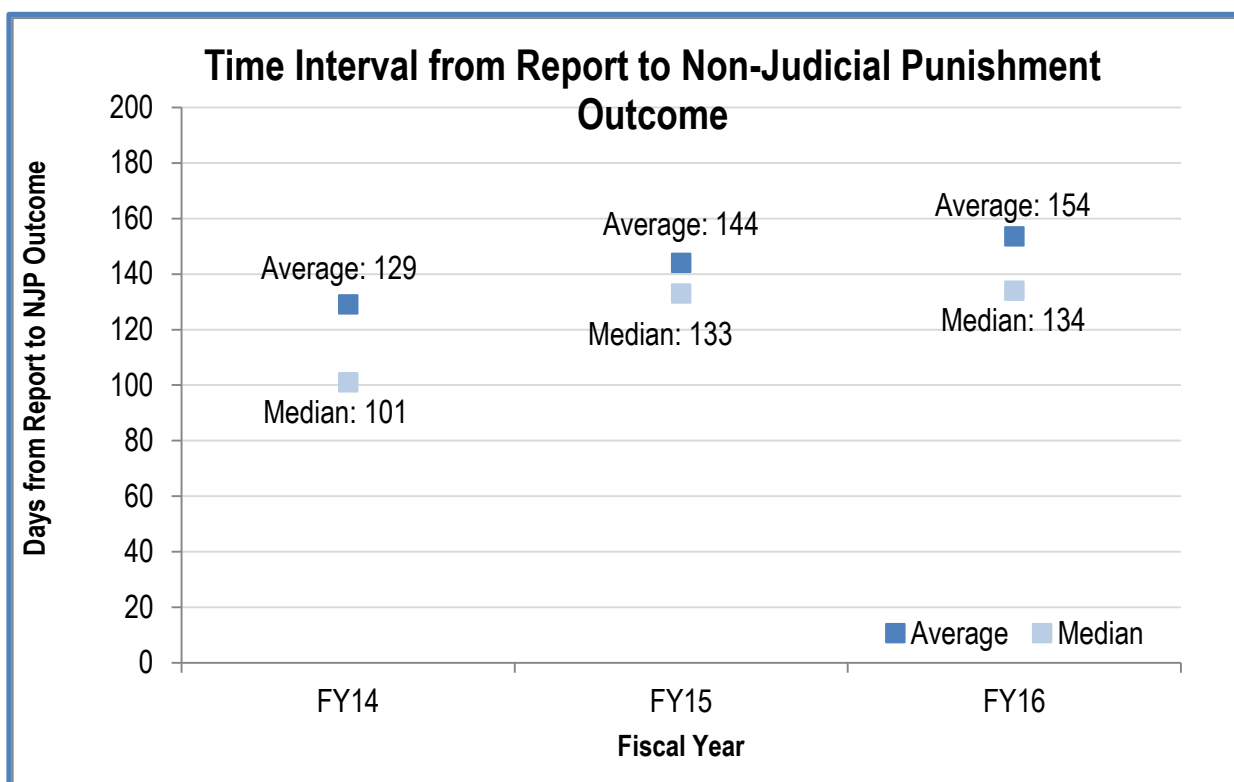

Chart 5.2 – Days from Report to Non-Judicial Punishment Outcome

9.2 Complete the following table with your numbers as of the end of the FY. Use the job/duty descriptions provided and the following inclusion criteria:

- Include all Reserve and Active Duty military personnel. Army and Air Force do not need to include National Guard personnel as they will be included in the NGB's response.
- Include civilian and contractor personnel
- Only include filled positions
- Indicate the number of full-time and part-time personnel
- Provide the exact number of current personnel, whenever possible. If the number is an estimate, please indicate how the estimate was reached and any other relevant information.

(DoDI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 2, para 6ac)

Job/Duty Title	Description of Job/Duty	Full-Time	Part-Time
Program Managers	Capability in developing policy, or program management and execution; and completion of 40+ hours of Military Service-specific National Advocate Credentialing Program and approved SARC training.	15	0
Dedicated Headquarters-Level Professionals	Include policy, advocacy, and prevention professionals who support the headquarters-level SAPR program offices at each Military	29	0

	Service/National Guard Bureau (<i>not including program managers, who are counted in their own category</i>). 0		
Uniformed SARCs	Serve as the single point of contact at an installation or within a geographic area to oversee sexual assault awareness, prevention, and response training; coordinate medical treatment, including emergency care, for victims of sexual assault; and track the services provided to victims from the initial report through final disposition and resolution. Certified under the nationally-accredited DoD Sexual Assault Advocate Certification Program (D-SAACP).	66	0
Civilian SARCs	See above.	85	0
Uniformed SAPR-VAs	Provide non-clinical crisis intervention, referral, and ongoing non-clinical support to adult sexual assault victims; offer information on available options/resources to victims; coordinate liaison assistance with other organizations and agencies on victim care matters; and report directly to the SARC. Certified under the nationally-accredited D-SAACP.	0	0
Civilian SAPR-VAs	See above.	99	0
Sexual Assault-Specific Legal	Legal personnel who specialize in sexual assault cases including prosecutors, Victim Witness Assistance Program personnel, paralegals, legal experts, and Special Victims' Counsel/Victims' Legal Counsel.	102	92
Sexual Assault – Specific Investigators	Military Criminal Investigation Office investigators who specialize in sexual assault cases.	350	0
Sexual Assault Medical Forensic Examiners	Medical providers that have completed the DoD course at Fort Sam Houston, or equivalent.	28	0

Unrestricted Reports

AIR FORCE FY16 UNRESTRICTED REPORTS OF SEXUAL ASSAULTS IN THE MILITARY		
A. FY16 REPORTS OF SEXUAL ASSAULT (rape, sexual assault, aggravated sexual contact, abusive sexual contact, forcible sodomy, and attempts to commit these offenses) BY or AGAINST Service Members. Note: The data on this page is raw, uninvestigated information about allegations received during FY16. These Reports may not be fully investigated by the end of the fiscal year. This data is drawn from Defense Sexual Assault Database (DSAD) based on Service affiliation of the Sexual Assault Response Coordinator (SARC) who currently manages the Victim case.	FY16 Totals

E. SUMMARY OF UNRESTRICTED REPORTS WITH INVESTIGATIONS		FY16 Totals
E1. Subjects in Unrestricted Reports Made to Your Service with Investigation Initiated During FY16		
Note: This data is drawn from DSAID based on Service affiliation of the SARC who currently manages the Victim case associated with the investigation and Subject below.		
# Investigations Initiated during FY16		724
# Investigations Completed as of FY16 End (group by MCIO #)		488
# Investigations Pending Completion as of FY16 End (group by MCIO #)		236
# Subjects in investigations Initiated During FY16		782
# Service Member Subjects investigated by CID		12
# Your Service Member Subjects investigated by CID		0
# Other Service Member Subjects investigated by CID		12
# Service Member Subjects investigated by NCIS		15
# Your Service Member Subjects investigated by NCIS		0
# Other Service Member Subjects investigated by NCIS		15
# Service Member Subjects investigated by AFOSI		515
# Your Service Member Subjects investigated by AFOSI		506
# Other Service Member Subjects investigated by AFOSI		9
# Non-Service Member Subjects in Service Investigations		34
Note: Non-Service Member Subjects are drawn from all CID, NCIS and AFOSI investigations involving a Victim supported by your Service.		
# Unidentified Subjects in Service Investigations		31
Note: Unidentified Subjects are drawn from all CID, NCIS and AFOSI investigations involving a Victim supported by your Service.		
# Service Member Subjects investigated by Civilian or Foreign Law Enforcement		2
Note: Service Member Subjects are drawn from Civilian or Foreign Law Enforcement investigations involving a Victim supported by your Service.		
# Your Service Member Subjects investigated by Civilian or Foreign Law Enforcement		1
# Other Service Member Subjects investigated by Civilian or Foreign Law Enforcement		1
# Non-Service Member Subjects in Civilian or Foreign Law Enforcement Investigations involving a Victim supported by your Service		12
# Unidentified Subjects in Civilian or Foreign Law Enforcement Investigations involving a Victim supported by your Service		5
# Subject or Investigation Relevant Data Not Available		156
E2. Service Investigations Completed during FY16		
Note: The following data is drawn from DSAID and describes criminal investigations completed during the FY16. These investigations may have been initiated during the FY16 or any prior FY.		
# Total Investigations completed by Services during FY16 (Group by MCIO Case Number)		652
# Of these investigations with more than one Victim		60
# Of these investigations with more than one Subject		31
# Of these investigations with more than one Victim and more than one Subject		4
# Subjects in investigations completed during FY16 involving a Victim supported by your Service		702
# Service Member Subjects investigated by CID		15
# Your Service Member Subjects investigated by CID		0
# Other Service Member Subjects investigated by CID		15
# Service Member Subjects investigated by NCIS		20
# Your Service Member Subjects investigated by NCIS		0
# Other Service Member Subjects investigated by NCIS		20
# Service Member Subjects investigated by AFOSI		513
# Your Service Member Subjects investigated by AFOSI		507
# Other Service Member Subjects investigated by AFOSI		6
# Non-Service Member Subjects in completed Service Investigations involving a Victim supported by your Service		28
# Unidentified Subjects in completed Service Investigations involving a Victim supported by your Service		41
# Subject Relevant Data Not Available		85
# Victims in investigations completed during FY16, supported by your Service		748
# Service Member Victims in CID investigations		12
# Your Service Member Victims in CID investigations		8
# Other Service Member Victims in CID investigations		4
# Service Member Victims in NCIS investigations		25
# Your Service Member Victims in NCIS investigations		18
# Other Service Member Victims in NCIS investigations		7
# Service Member Victims in AFOSI investigations		555
# Your Service Member Victims in AFOSI investigations		551
# Other Service Member Victims in AFOSI investigations		4
# Non-Service Member Victims in completed Service Investigations, supported by your Service		140
# Victim Relevant Data Not Available		16

E3. Subjects and Victims in Investigations Completed by US Civilian and Foreign Agencies during FY16	
Note: This data is entered by your Service SARC for cases supported by your Service.	
# Total Investigations completed by US Civilian and Foreign Law Enforcement during FY16 (Group by MCIO Case Number)	12
# Of these investigations with more than one Victim	3
# Of these investigations with more than one Subject	3
# Of these investigations with more than one Victim and more than one Subject	3
# Subjects in investigations completed during FY16 involving a Victim supported by your Service	18
# Service Member Subjects investigated by Civilian and Foreign Law Enforcement	3
# Your Service Member Subjects investigated by Civilian and Foreign Law Enforcement	2
# Other Service Member Subjects investigated by Civilian and Foreign Law Enforcement	1
# Non-Service Member Subjects in Civilian and Foreign Law Enforcement Investigations involving a Victim supported by your Service	9
# Unidentified Subjects in Civilian and Foreign Law Enforcement Investigations involving a Victim supported by your Service	5
# Subject Relevant Data Not Available	1
# Victims in investigations completed during FY16, supported by your Service	18
# Service Member Victims in Civilian and Foreign Law Enforcement investigations	16
# Your Service Member Victims in Civilian and Foreign Law Enforcement investigations	16
# Other Service Member Victims in Civilian and Foreign Law Enforcement investigations	0
# Non-Service Member Victims in Civilian and Foreign Law Enforcement Investigations in a case supported by your Service	2
# Victim Relevant Data Not Available	0
E4. Subjects and Victims in Investigations Completed by Military Police/Security Forces/Master At Arms/Marine Corps CID (MPs) during FY16 (all organizations regardless of name are abbreviated below as "MPs")	
Note: This data is entered by your Service SARC for cases supported by your Service.	
Note: As of 1 Jan 2013, all sexual assault investigations are referred to MCIO for investigation. This section captures remaining Subjects from investigations opened in prior years by Military Police/Security Forces/Master At Arms/Marine Corps CID.	
# Total Investigations completed by MPs during FY16 (Group by MCIO Case Number)	0
# Of these investigations with more than one Victim	0
# Of these investigations with more than one Subject	0
# Of these investigations with more than one Victim and more than one Subject	0
# Subjects in MP investigations completed during FY16 involving a Victim supported by your Service	0
# Service Member Subjects investigated by MPs	0
# Your Service Member Subjects investigated by MPs	0
# Other Service Member Subjects investigated by MPs	0
# Non-Service Member Subjects in MPs involving a Victim supported by your Service	0
# Unidentified Subjects in MPs involving a Victim supported by your Service	0
# Subject Relevant Data Not Available	0
# Victims in MP investigations completed during FY16, supported by your Service	0
# Service Member Victims in MP investigations	0
# Your Service Member Victims in MP investigations	0
# Other Service Member Victims in MP investigations	0
# Non-Service Member Victims in MP Investigations, supported by your Service	0
# Victim Relevant Data Not Available	0

# Subjects whose nonjudicial punishment action was completed by the end of FY16	36
# Subjects whose nonjudicial punishment was dismissed	0
# Subjects administered nonjudicial punishment	36
# Subjects with unknown punishment	0
# Subjects with no punishment	0
# Subjects with pending punishment	0
# Subjects with Punishment	36
# Subjects receiving correctional custody	0
# Subjects receiving reductions in rank	29
# Subjects receiving fines or forfeitures	13
# Subjects receiving restriction or some limitation on freedom	3
# Subjects receiving extra duty	7
# Subjects receiving hard labor	0
# Subjects receiving a reprimand	34
# Subjects processed for an administrative discharge or separation subsequent to nonjudicial punishment on a sexual assault charge	14
# Subjects who received NJP followed by UOTHC administrative discharge	2
# Subjects who received NJP followed by General administrative discharge	12
# Subjects who received NJP followed by Honorable administrative discharge	0
# Subjects who received NJP followed by Uncharacterized administrative discharge	0
K. OTHER ACTIONS TAKEN. This section reports other disciplinary action taken for Subjects who were investigated for sexual assault. It combines outcomes for Subjects in these categories listed in Sections D and E above.	FY16 Totals
# Subjects whose administrative discharge or other separation action was not completed by the end of FY16	0
# Subjects receiving an administrative discharge or other separation for a sexual assault offense	6
# Subjects receiving UOTHC administrative discharge	2
# Subjects receiving General administrative discharge	4
# Subjects receiving Honorable administrative discharge	0
# Subjects receiving Uncharacterized administrative discharge	0
# Subjects whose other adverse administrative action was not completed by the end of FY16	3
# Subjects receiving other adverse administrative action for a sexual assault offense	33

L. COURTS-MARTIAL ADJUDICATIONS AND OUTCOMES (Non-sexual assault offense). This section reports the outcomes of Courts-Martials for Subjects who were investigated for sexual assault, but upon review of the evidence there was only probable cause for a non-sexual assault offense. It combines outcomes for Subjects in this category listed in Sections D and E above.	FY16 Totals
# Total Subjects with Courts-Martial Charge Preferred for a non-sexual assault offense in FY16	4
# Subjects whose Courts-Martial action was NOT completed by the end of FY16	0
# Subjects whose Courts-Martial was completed by the end of FY16	4
# Subjects whose Courts-Martial was dismissed	0
# Subjects in Charges dismissed subsequent to recommendation by Art. 32 hearing officer	0
# Subjects in Charges dismissed subsequent to recommendation by Art. 32 hearing officer followed by Art. 15 punishment	0
# Subjects in Charges dismissed subsequent to recommendation by Art. 32 hearing officer followed by Art. 15 acquittal	0
# Subjects in Charges dismissed for any other reason prior to Courts-Martial	0
# Subjects in Charges dismissed for any other reason prior to Courts-Martial followed by Art. 15 punishment	0
# Subjects in Charges dismissed for any other reason prior to Courts-Martial followed by Art. 15 acquittal	0
# Subjects who resigned or were discharged in lieu of Courts-Martial for a non-sexual assault offense	0
# Officer Subjects who were officers that where allowed to resign in lieu of Courts-Martial	0
# Enlisted Subjects who were discharged in lieu of Courts-Martial	0
# Subjects with Courts-Martial charges proceeding to trial on a non-sexual assault offense	4
# Subjects Acquitted of Charges	0
# Subjects Convicted of Any Non-Sexual Assault Charge at Trial	4
# Subjects with unknown punishment	0
# Subjects with no punishment	0
# Subjects with pending punishment	0
# Subjects with Punishment	4
# Subjects receiving confinement	3
# Subjects receiving reductions in rank	2
# Subjects receiving fines or forfeitures	2
# Subjects receiving a punitive discharge (Dishonorable, Bad Conduct, or Dismissal)	3
# Subjects receiving restriction or some limitation on freedom	0
# Subjects receiving extra duty	0
# Subjects receiving hard labor	0
# Subjects processed for an administrative discharge or separation subsequent to conviction at trial	0
# Subjects receiving UOTHC administrative discharge	0
# Subjects receiving General administrative discharge	0
# Subjects receiving Honorable administrative discharge	0
# Subjects receiving Uncharacterized administrative discharge	0
M. NONJUDICIAL PUNISHMENTS IMPOSED (Non-Sexual Assault Charge). This section reports the outcomes of nonjudicial punishments for Subjects who were investigated for sexual assault, but upon review of the evidence there was only probable cause for a non-sexual assault offense. It combines outcomes for Subjects in this category listed in Sections D and E above.	FY16 Totals
# Total Subjects with Nonjudicial Punishment (Article 15) for a non-sexual assault offense in FY16	30
# Subjects whose nonjudicial punishment action was not completed by the end of FY16	0
# Subjects whose nonjudicial punishment action was completed by the end of FY16	30
# Subjects whose nonjudicial punishment was dismissed	2
# Subjects administered nonjudicial punishment for a non-sexual assault offense	28
# Subjects with unknown punishment	0
# Subjects with no punishment	0
# Subjects with pending punishment	0
# Subjects with Punishment	28
# Subjects receiving correctional custody	0
# Subjects receiving reductions in rank	22
# Subjects receiving fines or forfeitures	10
# Subjects receiving restriction or some limitation on freedom	4
# Subjects receiving extra duty	8
# Subjects receiving hard labor	0
# Subjects receiving a reprimand	27
# Subjects receiving an administrative discharge subsequent to nonjudicial punishment on a non-sexual assault charge	5
# Subjects who received NJP followed by UOTHC administrative discharge	0
# Subjects who received NJP followed by General administrative discharge	5
# Subjects who received NJP followed by Honorable administrative discharge	0
# Subjects who received NJP followed by Uncharacterized administrative discharge	0
N. OTHER ACTIONS TAKEN (Non-sexual assault offense). This section reports other disciplinary action taken for Subjects who were investigated for sexual assault, but upon review of the evidence there was only probable cause for a non-sexual assault offense. It combines outcomes for Subjects in these categories listed in Sections D and E above.	FY16 Totals
# Subjects whose administrative discharge or other separation action was not completed by the end of FY16	0
# Subjects receiving an administrative discharge or other separation for a non-sexual assault offense	1
# Subjects receiving UOTHC administrative discharge	0
# Subjects receiving General administrative discharge	1
# Subjects receiving Honorable administrative discharge	0
# Subjects receiving Uncharacterized administrative discharge	0
# Subjects whose other adverse administrative action was not completed by the end of FY16	0
# Subjects receiving other adverse administrative action for a non-sexual assault offense	21

# Other	34
# CIVILIAN Resources (Referred by DoD)	88
# Medical	19
# Mental Health	22
# Legal	0
# Chaplain/Spiritual Support	1
# Rape Crisis Center	31
# Victim Advocate	3
# DoD Safe Helpline	
# Other	12
# Cases where SAFEs were conducted	41
# Cases where SAFE kits or other needed supplies were not available at time of Victim's exam	0

Use the following categories or add a new category to identify the reason the requests were denied:	FY16 TOTALS
Total Number Denied	1
Reasons for Disapproval (Total)	1
Moved Alleged Offender Instead	0
Pre-existing Transfer Order Used Instead	0
The Expedited Transfer Request was initially denied by the victim's squadron commander because the victim wanted to remain at her current location, but be placed into a different Squadron. Wing Commander made a final decision to have the airman placed in a different organization and squadron (with her approval)	1

Subject drove her toward parking lot and placed her in back seat of his vehicle. Victim 2 alleges Subject pulled her into a bathroom stall. After investigation, the commander determined there was insufficient evidence to prosecute. The report was closed without further action.		
16	Rape (Art. 120)	UNITED STATES	Air Force	Multiple Victims	Multiple Victims Female	Air Force	E-2	Male	No	No		G1 (October December)	Courts-Martial Change Preferred	Aggravated Sexual Assault (Art. 120)		Acquitted				Victim (single victim) Notes: Victim 1 alleges Subject pulled her into a bathroom stall and forced her to have sex. Subject threatened her with a knife and told her she would be killed if she did not comply. Victim 2 alleges Subject pulled her into a bathroom stall and forced her to have sex. Subject threatened her with a knife and told her she would be killed if she did not comply. After reviewing the report of investigation and consulting with the staff judge advocate, the commander preferred charges. Charges were referred. Subject was found guilty at court martial.		
17	Rape (Art. 120)	UNITED STATES	Air Force	E-4	Female	Air Force	E-1	Male	No			G2 (April-June)	Courts-Martial Charge Preferred	Rape (Art. 120)		Acquitted				Victim (single victim) Notes: Subject and victim targeted in a hotel room together after a night of drinking. Victim asserts no consent to sexual intercourse with her. After consultation with the staff judge advocate, the commander preferred charges. Subject was acquitted.		
18	Absolve Sexual Contact (Art. 120)	UNITED STATES	Air Force	E-4	Female	Air Force	E-5	Male	No			G2 (April-June)	Non-Judicial Punishment	Absolve Sexual Contact (Art. 120)		Article 15 Punishment Imposed		None		Refutation of Pay and Absolution; No Fine; No Restriction; No Reduction in rank; No Extra Duty; No Hard Labor; No Concomitant Custody (DP-DP); No Notes: Victim reported Subject grabbed her back and buttocks, attempted to kiss her and touched her inner thigh without her consent. After receiving the report of investigation, and consulting with the staff judge advocate, the commander refused non-judicial punishment.		
19	Sexual Assault (Art. 120)	UNITED STATES	Air Force	E-4	Female	Air Force	E-4	Male	No	No		G2 (January March)	Courts-Martial Charge Preferred	Absolve Sexual Contact (Art. 120)		Discharge or Relegation in Lieu of Courts-Martial		Both Victim and Subject		Notes: Victim reported that Subject touched her in a social setting without her consent. Victim reportedly asked Subject to stop several times before he did. After receiving the report of investigation and consulting with the staff judge advocate, the commander preferred charges. Subject submitted a Chapter 4 discharge. Subject was discharged.		
20	Sexual Assault (Art. 120)	Japan	Air Force	E-3	Female	Air Force	E-2	Male	No			G2 (January March)	Administrative Discharge					General		Both Victim and Subject Notes: Victim and subject had been in a great comradely social relationship. One night victim became extremely intoxicated and passed out while subject took her underwear away from her to participate in the military presence prior approval. After consultation with the staff judge advocate, the commander issued administrative written discharge subject with a general characterization.		
21	Absolve Sexual Contact (Art. 120)	UNITED STATES	Air Force	Multiple Victims	Multiple Victims Female	Air Force	E-1	Male	No			G2 (April-June)	Non-judicial punishment for sexual assault offense	Failure to obey orders by regulation (Art. 10)	Article 15 Punishment Imposed		None		Refutation of Pay and Absolution; No Fine; No Restriction; No Reduction in rank; No Extra Duty; No Hard Labor; No Concomitant Custody (DP-DP); No Notes: Victim 1 reported Subject touched her lower back area and forced her to have sex over her knee. Victim 2 denied any sexual contact with Subject. After receiving the report of investigation and consulting with the Staff Judge Advocate, the commander determined there was probable cause only for a sexual assault offense. The commander offered non-judicial punishment.			
22	Sexual Assault (Art. 120)	Air Force	US Civilians	Female	Air Force	E-3	Male	No				G2 (April-June)	Courts-Martial Charge Preferred	Sexual Assault (Art. 120)		Discharge or Relegation in Lieu of Courts-Martial		General		Notes: Victim requested sexually assaulted by Subject after meeting him in his dorm for consensual sex. While in the act, the victim reported wanting to stop and waiting for him but was prevented from doing so by Subject. After receiving the report of investigation and consulting with the staff judge advocate, the commander preferred charges. Subject submitted a request for under other than honorable conditions discharge. Subject was discharged.		
23	Absolve Sexual Contact (Art. 120)	UNITED STATES	Air Force	E-1	Female	Air Force	E-3	Male	No			G2 (January March)	Non-judicial punishment for sexual assault offense		Annullal (Art. 126)	Article 15 Punishment Imposed		General		Subject (single subject) Notes: Subject repeatedly asked Victim out. When she said no, he said he could wait for her until they both turned 21. However, he never gave up on her. He continued to ask her out and harass her even though he knew she had broken off their relationship. After receiving the report of investigation and consulting with the staff judge advocate, the commander offered non-judicial punishment. Case closed.		
24	Sexual Assault (Art. 120)	Air Force	E-3	Female	Air Force	E-3	Male	No				G2 (April-June)	Courts-Martial Charge Preferred	Sexual Assault (Art. 120)		Discharge or Relegation in Lieu of Courts-Martial		Both Victim and Subject		Notes: Subject was at a party at which victim where they both became highly intoxicated. After receiving the report of investigation and consulting with the staff judge advocate, the commander preferred charges. Subject submitted a request to be discharged with the staff judge advocate. After consultation with the staff judge advocate, the commander preferred charges. Subject was discharged.		
25	Sexual Assault (Art. 120)	UNITED STATES	Air Force	E-4	Female	Air Force	E-4	Male	No	No		G2 (October December)	Courts-Martial Charge Preferred	Rape (Art. 120)		Acquitted		Both Victim and Subject		Notes: Victim reported that while she was sleeping Subject touched her breasts with his fingers. After receiving the report of investigation and consulting with the staff judge advocate, the commander preferred charges. Charges were referred and Subject was acquitted at court martial. Subject submitted a Chapter 4 request for release.		
26	Aggravated Sexual Contact (Art. 120)	United Kingdom	Air Force	Multiple Victims	Multiple Victims Male	Air Force	E-1	Male	No			G2 (January March)	Courts-Martial Charge Preferred	Aggravated Sexual Contact (Art. 120)	Convicted	Involuntary Assault (Art. 120)	Yes	Both Victim and Subject		Courts-Martial discharge: DD - Dishonorable Discharge Certificate. NATIONAL GUARD BUREAU

1636 DEFENSE PENTAGON
WASHINGTON DC 20301-1636

MAR 14 2017

MEMORANDUM FOR UNDER SECRETARY OF DEFENSE FOR PERSONNEL AND READINESS

SUBJECT: National Guard Sexual Assault Prevention and Response Program (SAPR),
2016 Review

The National Guard SAPR Program review is attached for inclusion in the Department of Defense Annual Report on Sexual Assault in the Military.

This report details National Guard efforts to enhance SAPR Program initiatives along the five lines of effort, overarching tenets, and Secretary of Defense Initiatives for Title 32 Service members.

The point of contact for this action is Colonel Nahaku McFadden, Chief of Sexual Assault Prevention and Response Division, National Guard Bureau Joint Staff, at 703-607-3585.

A handwritten signature in black ink, appearing to read "J. Lengyel", is positioned above the printed name.

Joseph L. Lengyel
General, USAF
Chief, National Guard Bureau

Attachment:
As stated

FY16 Annual Report on Sexual Assault in the Military Executive Summary: National Guard Bureau

The National Guard (NG) fully supports the Department of Defense (DoD) Sexual Assault Prevention and Response (SAPR) Program policies, procedures, goals, initiatives, and strategic plans. Whether serving in uniform or as civilians, the men and women in the NG demonstrate their investment in a culture of readiness and volunteer service.

As the only Reserve Component organization with its own established SAPR Program, the Chief of the National Guard Bureau (CNGB) is responsible for establishing and implementing SAPR policy and procedures, and developing and directing the execution of SAPR training requirements for its joint force members on Title 32 (T32) duty status per DoD issuances. The NG SAPR program goal is to eliminate sexual assault by building upon the core values of respect and dignity, supporting and strengthening a positive command climate, and deterring derisive attitudes and behaviors.

Significant milestones accomplished during Fiscal Year (FY) 2016 included publishing the CNGB's updated SAPR Program policy and sexual assault prevention strategic guidance. These issuances delineate NG SAPR program responsibilities and provide a roadmap toward preventing sexual assault within the Guard, respectively, and serve as the base documents for future manuals and strategic plans.

The Manpower and Personnel, NG SAPR Office (NGB-J1-SAPR) staff played an active role in DoD working groups to develop new strategies and plans to address facets of sexual assault, such as male victimization and retaliation with a nexus of sexual assault. The SAPR office routinely reviewed and provided input on the final drafts of DoD issuances and responded to surveys or inquiries. Some of the topic areas included the prevention and response to sexual assault of military men, retaliation prevention and response strategy, judicial proceedings panel recommendations related to sexual assault reporting retaliation, and community of practice. A benefit from participating in these efforts was helping members of the DoD SAPR communities understand and consider the equities of the citizen Soldier and Airman when writing DoD issuances.

Another important milestone for advocacy and victim assistance within the Guard was the allocation of funding for the Air National Guard (ANG) to support full-time (FT) manning authorization for a dedicated Sexual Assault Response Coordinator (SARC) at each wing. Previously, a FT technician at each wing performed SARC duties as part of their overall job description.

SAPR programs within the several States and Territories (**Guam** and the **Virgin Islands**), Commonwealth of **Puerto Rico** (PR), and the District of Columbia (DC) (hereafter referred to as the States), may vary greatly depending on their geographic location, resources available, and State Code of Military Justice (CMJ). However, several recurring themes were evident across the States for FY16. With increased leader involvement, available quality training, push of contact information, and collaboration with stakeholders, many states experienced an increase in requests for information and reports of sexual assaults.

This response from our Guard members shows an improved level of trust in the staff and the state's response.

CNGB Authorizing Publications

Listed below are the current issuances relevant to the NG SAPR Program. A comprehensive manual consisting of all SAPR procedures within one publication is currently under development.

- CNGB Manual 1300.01, 21 September 2016, "National Guard Implementation of the Department of Defense Sexual Assault Advocate Certification Program"
- CNGB Instruction 1300.01, 16 July 2016, "Sexual Assault Prevention and Response Program"
- CNGB Guidance, 26 February 2016, "National Guard Sexual Assault Prevention Strategic Blueprint"
- CNGB Instruction 0401.01, 06 January 2015, "National Guard Special Victims' Counsel Program"
- CNGB Information Memorandum, 02 September 2014, "National Guard Implementation of 2014-2016 Sexual Assault Prevention Strategy"
- CNGB Instruction 1303.01A, 06 August 2014, "Expedited Transfer, Reassignment, or Removal of National Guard Members Due to an Unrestricted Report of Sexual Assault"
- CNGB Memorandum, 27 November 2013, "Implementation of the Joint National Guard Special Victims' Counsel (NGSVC) Program"
- CNGB Memorandum, 19 November 2013, "National Guard Command Climate Assessment Policy"
- CNGB Instruction 6400.01, 14 November 2013, "Use of Defense Sexual Assault Incident Database (DSAID)"
- CNGB Instruction 0400.01, 30 July 2012, "Chief, National Guard Bureau Office of Complex Administrative Investigations"
- CNGB Manual 0400.01, 08 November 2012, "Chief, National Guard Bureau Office of Complex Administrative Investigations"

In addition to the CNGB issuances and training guidance developed specifically for the T32 environment, both the Army National Guard (ARNG) and ANG adhere to their Service-specific issuances and training requirements, as applicable, in support of the total force concept.

National Guard Bureau (NGB)

The Director, Manpower and Personnel Directorate (NGB-J1), serves as the NG principal authority on accountability, policy, and oversight for the NG SAPR Program on behalf of the CNGB to include T32 training development, strategic planning, and data management. The NGB-J1-SAPR Office consists of nine authorized positions and provides the operational support to the Director of NGB-J1 on all matters pertaining to the NG SAPR program.

The Directors of the ARNG (DARNG) and ANG (DANG) assist The Adjutants General (TAGs) of the States and the Commanding General (CG) of the DCNG (hereafter referred to as TAGs) in implementing SAPR programs in compliance with applicable Service-specific policies and directives, and NGB policy and procedures within each state applicable to T32 Guard members.

- The ARNG Sexual Harassment/Assault Response and Prevention (SHARP) Office resides within the Human Resources Directorate (G1). This office consists of eight personnel including five military personnel (SHARP Section Chief, Assistant Section Chief, and three SHARP Instructors), and three contract personnel (Incident Coordinator and two SHARP Program Analysts).
- The ANG SAPR Office resides within the Manpower, Personnel, and Services Directorate. This office consists of six personnel including one ANG SAPR Program Manager (PM)/Major Command (MAJCOM) SARC, General Schedule (GS) -13, four active duty operational support military members (three officers and one enlisted), and one ANG SAPR Resource Advisor on Title 10 Statutory Tour. The ANG SAPR office manages the budget for 91 ANG wings and Program Objective Memorandums for Title 5 positions, SAPR personnel travel, training, office supplies, marketing and promotional items.

Within the States, TAGs serve as the senior commander (CDR) of the NG on behalf of the Governor of his or her respective State. Each TAG is responsible for establishing policies, directives and guidance for the State SAPR program in compliance with DoD and CNGB issuances, and the State's CMJ for their T32 Guard members. Despite potential differences, the basic organization of these 54 separate SAPR programs meets the National Defense Authorization Act (NDAA) FY12 requirements for the assignment of at least one FT SARC and one FT SAPR Victim Advocate (VA) at the brigade (BDE) or equivalent unit level. At each NG Joint Force Headquarters-State, (NG JFHQ-State) SAPR office is a FT, GS-12, or Active Guard and Reserve (AGR) SARC to serve as the State SAPR PM, responsible for reporting all ARNG and ANG sexual assault reports within the state to TAG. Also authorized at each NG JFHQ-State is a FT, GS-9, or AGR NG JFHQ-State Victim Advocate Coordinator (VAC) to assist in the implementation of the TAG's SAPR program. The Army Military Technician program funds these two positions. A collateral duty SARC and one SAPR/SHARP VA are located at each ARNG BDE; two SAPR/SHARP VAs are located at battalion (BN) level command. As stated earlier, each wing is now authorized one dedicated FT SARC, T32 (Federal) GS-11 or Title 5 GS-12, who reports to the Wing Commander (WG/CC) or Vice Commander. A minimum of two volunteer SAPR VAs support the Wing SARC to implement the WG/CC SAPR program.

States may differ in the location of their NG JFHQ-State SAPR office within their structure and in their ability to hire additional FT SAPR staff. **Missouri (MO)** SAPR office falls under the umbrella of the ARNG, Director of Personnel and consists of the NG JFHQ-State SARC, NG JFHQ-State VAC, and two wing SARCs. For additional support, the MO based 131st Bomber Wing (BW) hired a deputy SARC.

The Active Component (AC) assumes SAPR program implementation and management for Guard units and members federalized for over 30 days. If the NG JFHQ-State SARC deploys, the state may hire a temporary technician, or utilize the NG JFHQ-State VAC to backfill the position until the SARC returns.

The NGB-J1-SAPR Office established collaborative working relationships with NG Family Programs, NGB Office of Equal Opportunity (NGB-EO), Director of Psychological Health and Well-Being (DPH), Joint Surgeon, Joint Chaplain, Public Affairs, and the Chief Counsel's (NGB-JA) office for assistance from the Office of Complex Administrative Investigations (NGB-JA/OCI) and Special Victims Counsel program office (NGB-JA/SVC).

The NG of the States relies greatly upon its collaboration and cooperation with federal employees, the Military Services, state and local municipal organizations, and other civilian and non-governmental organizations to counterbalance the lack of organizational structure available in the AC. At each NG JFHQ-State, SAPR personnel established relationships with the State Behavioral Health (BH), Chaplains, State Equal Employment Manager (SEEM), and State Staff Judge Advocate (SJA), as well as NGB-JA/OCI and NGB-JA/SVC. States, such as **Maine** and **Florida**, work closely with other programs such as the State Partnership Program (SPP), Resilience, Risk Reduction, Suicide Prevention (R3SP), and substance abuse prevention (SAP) programs.

Evident within this report, the success of the NG SAPR Program depends upon several key factors:

- Senior leadership emphasis, solid support, and commitment to the NG SAPR Program
- Ability to entice capable, dedicated, and qualified personnel to fill the positions of SARCs and SAPR VAs
- Teamwork, collaboration, and cooperation among all stakeholders, both military and civilian.

Although it is impossible to summarize all the achievements and accomplishments of the States' SAPR programs, this report provides an illustration of the NG SAPR Program.

1. Line of Effort (LOE) 1—Prevention—The objective of prevention is to “deliver consistent and effective prevention methods and programs.” Based on the 2014-2016 DoD Sexual Assault Prevention Strategy, implementation of prevention efforts across DoD should be spread across a collection of 10 program elements. To aid in assessing DoD-wide progress in operationalizing the Prevention Strategy, please provide responses connected back to these program elements.

1.1 Summarize your efforts to achieve the Prevention Endstate: “cultural imperatives of mutual respect and trust, professional values, and team commitment are reinforced to create an environment where sexual assault is not tolerated, condoned, or ignored.” Where appropriate, be specific in the types of measures your program uses, the number of Service members impacted and the approved way ahead for achieving the prevention endstate. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 2)

The NG Sexual Assault Prevention Strategic Blueprint released in February 2016 provided a proactive and comprehensive approach to eliminate sexual assault within the NG. The strategic blueprint incorporated DoD's 10 key elements necessary to achieve the prevention end state. Strategies developed for each of the elements provided the NG within the States with a tool kit to develop their own prevention plan. Elements discussed below include leadership involvement, education and training, communication, and, collaboration, cooperation, and teamwork.

Leadership Involvement

The extent to which a leader actively promotes a program greatly influences the amount of emphasis placed on the program by others. To set the proper tone, the CNGB signed the updated NG SAPR policy in July 2016 for implementation throughout the Guard. The "NG Sexual Assault Prevention Strategic Blueprint," signed and published in February 2016, provided the NG prevention strategy vision and mission, and a roadmap for implementing promising research-based practices. It identified the leaders and supervisors at every level as the center of gravity in the prevention of sexual assault and offered ways and means to achieve desired end states at each level of influence. The CNGB discussed this plan at a quarterly Guard Senior Leader Conference (GSLC) and disseminated it to all the States. The CNGB continued to host the quarterly GSLCs and monthly Guard Senior Leader Updates (GLSUs) where he discussed new initiatives and strategies, current trends and metrics, and provided updates to the DARNG, DANG, and the TAGs.

The leadership within the States also took actions to emphasize the importance of the SAPR program and to support a healthy culture within their State. The **Alaska** (AK) TAG signed and published an updated SAPR policy letter, 20 June 2016, directing a commitment of all AKNG personnel to create and support an environment where individuals do not tolerate, condone, or ignore sexual assault. In **Pennsylvania** (PA), cultural imperatives and mutual respect started from the top. Governor Tom Wolf recently called for the PA General Assembly to pass anti-discrimination legislation. This legislation offers equal protection under the law for all Pennsylvanians, regardless of sexual orientation or gender identity. The efforts by the Guard in support of equal protection started by visibly displaying posters, providing literature, and making other resource information available. The PANG SAPR program worked in concert with other programs during Yellow Ribbon events to unite and strengthen sexual assault prevention. One specific initiative, "PA CARES (Creating an Atmosphere of Respect and Environment for Success)," helped the PANG SAPR Office network with Pennsylvanians across the state in an effort to create safe environments for individuals to come forward. The **Tennessee** (TN) ARNG SHARP and ANG SAPR programs collectively posted the TNNG Adjutant General's policy on Sexual Harassment and Sexual Assault in prominent locations at every unit across the state. The policy outlined the intent for a well-trained, certified SAPR VA to be present in every Company and Detachment in the TNARNG, and two SAPR VAs in each wing in support of the FT SARC. The policy further stated, unequivocally, that sexual harassment and sexual assault have no place within the organization, and view any report of either seriously. The TNNG observes Sexual Assault Awareness and

Prevention Month (SAAPM) annually and uses that time to focus on mutual respect and professional values in Soldiers and Airmen through programming and awareness activities. The **West Virginia** (WV) and **Oklahoma** (OK) NG focused on a top down approach to facilitate cultural change within the units. At a town-hall meeting, the WV TAG addressed all Soldiers and emphasized his no tolerance policy for sexual harassment and sexual assault. In both states, BDE, BN, and company CDRs addressed formations during training events and Yellow Ribbon events to ensure their Soldiers understood the Guard's expectations.

Education and Training

The ARNG and ANG Directorates promoted the use of their respective Service's training program as their primary prevention training for members of the Guard. The SHARP Annual Unit Refresher training is the key element in the Army's multi-faceted prevention approach. Headquarters, Air Force (HAF) contracted the non-profit Green Dot organization to provide violence prevention tools to the total Air Force to decrease interpersonal violence across the service. HAF also launched a prevention initiative that required every ANG wing to train one coordinator and additional implementers on the Green Dot prevention program. The ANG had 567 Green Dot facilitators to execute the 2016 annual training (AT) SAPR requirement and prevention awareness.

In addition to conducting their Service-specific mandatory SAPR training, many states augmented the training or used different approaches to the training. In **Guam** (GU), the ARNG received individual and CDR led sexual assault briefings. The SHARP training identified issues within the organization and reviewed how to report sexual assault incidents. The briefers also gave statistics on reports of sexual assault within the organization to emphasize the relevance of the training. The GU ANG received Green Dot training focused primarily on sexual violence, domestic and dating violence, and stalking using interactive training, awareness tools, and a proactive approach in identifying problems that lie within their island. **Idaho** (ID) created and implemented targeted leadership training in conjunction with their required Service-specific AT. **Missouri** ARNG conducted interactive, small group, in-depth discussion focused on roles and responsibilities, prevention methods, policies, and commitment to eliminating sexual assaults, holding offenders accountable, and investigation options to include the importance of NGB-JA/OCl. As part of their training program, **Wisconsin** (WI) used recorded senior leader and peer sexual assault elimination messages, while some units presented skits on various topics to include sexual assault, violence prevention, and bystander intervention. The WING also coordinated with nationally known and renowned guest speakers to address senior leader conferences.

The **Kentucky** (KY) NG continued to use the "Not In My Squad" initiative, and encouraged leaders at the lowest level to use hip pocket training to talk to their Soldiers. Topics discussed in the training included sexual assaults, intervention techniques, the SAPR reporting process, the Army Values and how they relate to the units SAPR/SHARP prevention efforts, and team building. This approach assisted CDRs in creating an environment where Soldiers and Airmen do not tolerate, condone, ignore, or otherwise

allow sexual assaults and sexual harassment to fester and grow. The KYNG promoted an environment where victims of sexual violence have trust and confidence in the leadership to address issues of sexual harassment or sexual assault reported to them. This effort reached almost all of their 6,000 Soldiers in the KYNG.

The **Ohio** (OH) NG created a two-day SAPR Leader course for all levels of command teams to attend. The OHNG SAPR Leader Course's curriculum and open dialogue forum helped leaders build positive command climates and cultivate a culture that takes action to eliminate behaviors that lead to sexual harassment and sexual assault. The instruction also taught the leaders approaches to help prevent, and when necessary, respond to a report of sexual assault. The training included:

- Military culture and sexual assault
- Sexual innuendo, sexual harassment, and sexual assault
- Phenomenology of sexual assault
- Victimology - what is a victim, challenges, and care
- Offenders - what is an offender, getting the offenders out of our ranks
- Unit training
- Victim advocacy
- Reporting
- Bystander intervention
- How to talk to Service members about consent - how to get consent and how to give consent

The course also included a discussion on the difference between risk reduction versus prevention, and how to communicate the importance of the two without creating barriers to reporting. The OHNG held four, two-day SAPR Leader Courses in FY16. All four wings and BDEs sent personnel for the training. **Vermont** (VT) gave mandatory training briefings, which included specific language aimed at implementing bystander intervention strategies to promote stronger teams and safer communities. Over 2,000 Soldiers attended the briefings. The NG JFHQ-State SARC assisted the SEEM in conducting an "Inclusion Leadership Workshop" on 5 November 2016, which focused on recognizing how the strongest, most effective teams are comprised of diverse skill sets. This workshop reached 350 Soldiers representing every unit in the state.

New York (NY) ANG provided Green Dot training, Frontline Supervisor SAPR training, New CDR training (within 30-days of taking command), Pre- and Post-Deployment Briefings, Newcomers Orientation, and Basic Military Training Out-processing. The facilitators used different methods for training based on the audience, information emphasis, and desired effect on the Airmen. One example was Bystander Intervention training, where there is no one perfect response to deciding when, how, and whether to intervene alone or to look for help in intervening. The 109th Attack Wing (AW) leadership encouraged squadron CDRs to use a public forum to recognize Airmen, who used

bystander intervention to reduce high-risk situations. Additionally, first line enlisted and officer supervisors received supervisory retaliation training and the Leadership Development Course. The NYANG 174th AW SARC published monthly SAPR prevention articles in the wing newsletter, Compass Rose.

Communication - Information Push – Sexual Assault Awareness and Prevention Month

The NGB-J1-SAPR Office in collaboration with the NGB Public Affairs Office developed a comprehensive communication plan to provide consistent messaging and define lanes of responsibility for media response during FY16 SAAPM. The public affairs guidance included NG talking points, SAPR five lines of effort (LOEs), messaging, and public affairs efforts. A tactical plan supplemented the guidance to provide examples of events to generate ideas for use throughout the month and year to promote understanding and awareness. The examples provided group events, media and social media, sports activities, and videos to support training.

In April 2016, the **Indiana** (IN) NG observed SAAPM and supported the theme “Eliminate Sexual Assault: Know your Part. Do your part.” The focus - eliminating sexual assault - requires every Service member to be a steadfast participant in creating an appropriate culture and upholding military values. A SAAPM event included three presentations: Mr. Jeffrey Bucholtz, “Together We Can: Understanding and Preventing Sexual Violence;” Michelle Corrao, “A Story of Triumph Over Tragedy!” and, Dr. (MAJ) Scott Edwards, INNG State Psychologist, the “Neurobiology of Trauma.” This event was open to all INNG members, military and civilian. All BN level and above senior FT unit staff and Directors were required to attend the event. Approximately 200 INNG members attended, most of whom wore jeans and teal to show their support for sexual assault survivors and to show their unity in their fight to combat sexual assault in their organization and communities. For those who could not attend the event, INNG SAPR staff recorded all the presentations and distributed them to units to allow all members to watch the presentations. The NG JFHQ-State and Wing SAPR programs participated in the state Diversity Day event and provided a table display with several promotional items featuring the state’s 24/7 number. Another item handed out was DoD Safe Helpline (SHL) information. The NG JFHQ-State VAC and unit SAPR VA supported the table and answered questions about the information and the SAPR program. INNG members from around the state, both Army and Air, attended the event to learn more about cultures from around the world and the SAPR program.

Louisiana (LA) NG SAPR staff distributed educational materials across the state and at as many venues and training events as possible to promote education and prevention efforts. NG JFHQ-State SAPR office compiled and distributed bags of educational materials on stalking, sexting, healthy relationships, domestic violence (DV), bystander intervention, DoD SHL, male on male sexual assault, drug facilitated sexual assault (DFSA), Military Sexual Trauma (MST), the SHARP program, and the SAPR program to the following audiences/events:

- ANG Mentorship Seminar
- ANG Warrior Flight
- Yellow Ribbon Symposiums
- Leadership Conferences
- Equal Opportunity Leader (EOL) Trainings
- State Family Programs Symposium
- Company CDR's and First Sergeant's (1SG) Course
- Resilience, Risk Reduction and Suicide Prevention American Council on Education Training
- Recruiting and Retention Command AT

LANG also conducted a DV Prevention and Awareness statewide clothing drive in October 2015. The LANG SAPR Office donated a substantial collection of clothing to DV shelters across the state. The LANG SAPR Office conducted unit staff visits during FY16 and provided fifteen bulletin boards. These boards gave the unit a dedicated space for SAPR and SHARP policies, resources, and educational materials within the units as give away materials to Guardsmen.

The **Texas** (TX) National Guard strongly supported SAAPM with SAPR T-Shirts and Denim Day, in which TAG authorized all members of the **Texas** Military Forces to wear jeans and SAPR awareness shirts. The NG JFHQ-State SAPR team chose "There is never an excuse for rape," as the message for Denim Day, consistent with the DoD's message of sexual assault is never tolerated. Denim Day also encompassed a social media campaign in which BDEs, Wings, and all TXNG members took and shared pictures of their units on the TX Military Forces SAPR Facebook page in support of SAAPM. Other TXNG social media pages re-shared the photos, expanding their visibility and outreach of the services and prevention efforts offered by the SAPR and SHARP programs. The TXNG participated in community awareness initiatives by setting up information booths at local Veterans Affairs clinics, Rape Crisis Centers, Universities, and community events honoring survivors and SAAPM. The TXNG also focused on the primary prevention of sexual assault by using printed materials, videos, and in-person training on Consent and Bystander Intervention information and messaging.

The **New York** 107th AW teamed up with the 914th AW, an Air Force Reserve unit from Niagara Falls Air Reserve Station, to host a 5K run at the base track and a competitive obstacle course through mud and water during SAAPM. These 2 events required teamwork and communication, reinforcing an environment where there is not tolerance for sexual assaults and violent behavior. Approximately 100 Guard members participated in the events of the day.

Collaboration, Cooperation, and Teamwork

The **Illinois** (IL) NG SAPR program collaborated with IL State programs and relevant non-profits such as Health and Disability, IL Coalition Against Sexual Assault (CASA), Veterans Centers, and Rush University Medical Center Road Home Program to increase awareness about sexually violent crimes and prevention. Both the NG JFHQ-State SARC and the VAC attended trainings held by these organizations to create partnerships, gain resources for their victims, and to stay proficient in victim advocacy. The **Maine** (ME) NG JFHQ-State SARC provided training to units as part of a “Collaborative Team Training” concept along with Equal Opportunity (EO), Suicide Prevention, SAP, and Resiliency subject matter experts (SMEs). Green Dot Implementers provided the ancillary training requirement for all wing members. The Wing SARC attended an information and outreach booth at the annual Family Day event, as well as Yellow Ribbon Program event.

Michigan (MI) NG SAPR team brought SHARP and SAPR training out to the entire state for both Army and Air to reinforce their values and commitments as a whole. The NG JFHQ-State SARC serves on the Capitol Area Sexual Assault Response Team (SART), which includes professionals throughout the field. The team in turn supported the MING organization by committing to speaking engagements at their SAPR continuing education training (CET) events and providing consistent resources for our Service members. The MING SAPR team also collaborated with a member of the NGB-J1-SAPR Office and gave a presentation to the **Michigan** Coalition of Domestic Violence and Sexual Assault in May 2016. The response was so overwhelmingly positive, the coalition already requested they present again in 2017. This event assisted the MING SAPR team in making tremendous strides in reaching out to their community, providing support, learning from their resources, and applying that knowledge to their programs and teachings across the state. The **Virginia** (VA) ANG SAPR office collaborated with the Langley Air Force Base (AFB) SARC in prevention strategy, local rape crises center and Yellow Ribbon events. The ARNG SHARP team created a partnership with local colleges, Fort Eustis and Fort Lee SAPR Offices, and others agencies in support of sexual assault prevention and available resources.

Of particular note, the **Florida** (FL) NG JFHQ-State SARC and two additional members of the ARNG SHARP team participated in a Subject Matter Expert Exchange (SMEE) program in FY16 to discuss the ARNG SHARP program. The benefactors of the three-day vigorous and informative discussions were 29 members of the Guyana Defence Force (GDF). The GDF and FLNG are SPP partners. This event allowed a frank and open exchange of talk about sexual and gender based issues. Within that context, the participants noted how the issues crossed both societal and cultural boundaries. In this exchange, participants from both the FLNG and GDF discussed information that was beneficial to both sides. The FLNG SHARP Team tailored their discussion ideas to meet the needs of the Guyana participants.

1.2 Communications and Engagement: Update your progress in aligning prevention communications and training based on the type of message, messenger, and delivery methodology to specific demographic audiences across your Military Service (e.g., basic training, first-term, mid-level, and senior leader).

(DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Communications), p. 11)

The CNGB used quarterly GSLCs and monthly GSLUs to provide policy and procedural updates, discuss special initiatives, share trends, and deliver other relevant SAPR messages to TAGs, DARNG, and DANG. The senior leaders, in turn, disseminated this information at various venues to varying audiences within their headquarters and organization.

The Deputy DARNG conducted bi-weekly status update meetings, to include discussions on SHARP, resilience, suicide prevention, and SAP. Additional information briefed included sexual assault numbers, prevention, education and training requirements, policies, upcoming program events, and full-time vacancies within the states.

The ARNG G1 conducted bi-weekly meetings to discuss upcoming SHARP events and the number of trained SHARP personnel in the ARNG. The ARNG SHARP PM conducted monthly teleconferences with all NG JFHQ-State SARCs and VACs to discuss current events, best practices, and other SHARP or SAPR related topics. The SHARP Office used weekly emails to address concerns and questions raised from the field during the teleconference.

The ANG SAPR Office hosted a monthly ANG SARC teleconference at two separate times to accommodate different time zones. Topics discussed included training, budget, database management, DoD SAPR certification requirements, policy, and case reporting. Additionally, the SAPR Office emailed weekly field updates. The ANG SAPR SharePoint provides information and documentation regarding all pertinent program items. As needed, the ANG SAPR Office requests data calls to ensure SAPR personnel are certified and equipped to fulfill the requirements.

In general, the SARCs and JFHQs-State VACs within the States provided briefings at newcomer briefs or receptions, new employee orientation, recruitment sustainment programs (RSP) and student flight programs, and various deployment briefings. The **Connecticut** (CT) NG JFHQ-State VAC led monthly ARNG RSP "Battle Hand-Off" training and provided 282 Soldiers with follow-on SHARP training after returning from basic training to ensure these new recruits were not influenced by myths or misunderstanding about sexual assault. Additionally, the CTNG Wing SARC gave a Face-to-Face brief to 190 newcomers during quarterly briefings. The CTANG successfully trained 96.13% of their Airmen to meet their AT requirement using Green Dot training. The **Illinois** Recruiting Command has 27 Recruiters qualified as SHARP Specialists to train RSP Soldiers prior to attending basic training. Each student flight member in the **New York** 109th AW received a briefing by the SARC, who informed them about reporting options and provided SARC contact information for home station and Basic Military Training SARCs. During WG/CC's call, the CDRs briefed SAPR updates and the SAPR vision of mutual respect and dignity of all members. This discussion included the possibility of losing on-base Privately Owned Vehicle driving privileges for displaying inappropriate bumper stickers. The Airmen received most of the training on Unit Training

Assembly (UTA) weekends from March through December. By the end of October 2016, the 107th AW trained 73% of their unit in Green Dot; JFHQ-State trained 75%; 106th Rescue Wing (RQW) trained 58%; and, 109th AW trained 84% of their wing.

The SARCs and NG JFHQs-State VACs also briefed all CDRs within thirty days of taking command. **Colorado** (CO) took the briefing a step further by including Retaliation /Reprisal training to all first line supervisors in the CO ANG. **Hawaii** (HI) ARNG conducted SHARP Leader Training, specific to first line leaders, company grade and field grade leadership, to 100 personnel. They also provided their Plans and Operations Directorate, and G1 with a monthly update of annual SAPR training status and briefed trends at the Community Health Promotion Council (CHPC). The HIANG conducted training to 44 personnel in response to individual unit climate assessments. The HING TAG and Deputy Adjutant General (DAG) regularly attended training for victim advocates to show support for their work in SAPR. The **Indiana** TAG conducted a Senior Leader Conference to CDRs at the O5 and O6 level along with their associated Senior Enlisted Leaders, all NG JFHQ-State Directors, the NG JFHQ-State Command Group, and all INNG General Officers. The NG JFHQ-State SARC gave a two-hour block of instruction on the SAPR program. The NG JFHQ-State SARC and a Wing SARC discussed CDR responsibilities, reporting options, and culture. The presenters used scenario-based questions to engage in discussion about the SAPR program. In **Minnesota** (MN), the units had permission to tailor the SAPR training program to meet the specific demographics and needs of the unit. The units welcomed this approach and received training in such topics as male survivors, strangulation, sex trafficking, and deoxyribose nucleic acid (DNA) collection and processing. **Michigan** contracted Catharsis Productions to train and assist in engaging their Guard members by using comedy to appeal to all levels and types of personnel. During the year, 70 personnel participated in the CDRs/1SG course; 100 personnel attended EOL training. The SAPR staff provided training and information packets with SAPR program procedures, points of contact (POCs), and early intervention techniques to Command Sergeants Majors, key leaders, and military police during AT operations

Utah (UT) focused on educating and impacting change at the lowest level possible in FY16. The SAPR office personally trained over 5000 Service members. These Service members included **Utah** NG Soldiers, Airmen and families, and Soldiers from other states attending the Regional Training Institute. At the start of FY 16, the SAPR team and senior leadership identified common trends and issues during a CHPC meeting and with one-on-one sit-downs. With this information at hand, they developed state specific training focused on the areas identified. They targeted the “Not in my Squad” concept and “I. A.M. STRONG” Campaign. Training focused on stepping up and intervening to prevent sexual assault. With the **Utah** SAPR team fully engaged with the lower enlisted and new Service members, the senior leadership focused on educating and holding leadership accountable for training and actions. During SAAPM, the leadership hosted a presentation given by two local community partners, Detective Justin Boardman and Donna Kelly from the state prosecutor’s office. The presentation focused on trauma; specifically, how to support those that have experienced trauma. Over 250 Soldiers and Airmen attended the presentation. In FY16, **Utah** raised its SHARP training compliance from less than 70% to 96%. The attributable factor in this percentage increase was the ability of UT to fill all

authorized FT SAPR team positions. They currently have more than 70 BDE and BN SAPR VAs statewide.

Many states such as **Alaska** used a variety of media to reach their Guard members. They provided updated SARC and NG JFHQ-State VAC contact flyers, SAPR VA flyers, and TAG policy letter for bulletin boards in unit areas, as well as on the AKNG SAPR Facebook page and AKNG SAPR Twitter account. **Arkansas** (AR) produced a state level SAPR video for use during SAAPM that outlined leadership policy and accountability. The target audience for the video was all levels and both services. After SAAPM, the ARNG SAPR Office distributed the video to the field for use in support of SAPR training. The **District of Columbia** NG integrated their marketing material with the annual flu shot season. **NYANG** aired a monthly SAPR Spotlight on the Commanders Network for all wing members to view. **Hawaii** ARNG developed and distributed over 700 wallet cards for deploying Soldiers and initial entry trainees that contained resource contact information and Restricted and Unrestricted Reporting fundamentals. **Indiana** SAPR program office conducted a series of quarterly SAPR VA webinars to pass on updates on the SAPR program, including new guidance, procedures, and information. Each webinar played at least four times within the quarter to reach as many SAPR VAs as possible. The **Indiana** SAPR program also provided training upon request to various levels of command and groups within the organization. Some of the events included Senior Leader Conference, Peer-to-Peer Workshops, Technician/AGR Supervisor Courses, Department of Army (DA) Civilian Training, Chaplain Assistants Training, CDR/1SG Training, Yellow Ribbon Events, and NG JFHQ-State Annual SAPR training. **Louisiana** NG also utilized a quarterly newsletter to educate Service members on “hot topics” in the SHARP program and to inform CDRs and guardsmen of available resources. LANG managed a social media Facebook page to share information on rape culture and resources, and to encourage reporting and survivor supportive behavior. Additionally, LANG provided access to program information via a SHARP/SAPR webpage on their state's Geaux Guard website (<http://geauxguard.la.gov/resources/sharp/>).

Florida NG boasted a robust program for distributing information to different audiences. Some of the program included conducting:

- Monthly G1 Conference Calls to disseminate information regarding program needs and changes through BDE and BN Manpower and Personnel (S1) channels.
- Annual CDR and 1SG Courses to provide each student initial training to unit leadership regarding recent changes in regulations and sexual assault response tools for the leadership at the unit level.
- Bi-annual Army Leader Update Brief to provide training to senior command to maintain consistency of the program, policy changes, and regulatory consistency in cases.
- Officer Candidate School, Airmen Leadership School, and Senior Leader Courses in-briefs to provide leadership-based facilitation of SHARP program requirements and identification of key program personnel for students from out of state attending these courses.

FLNG also published Quarterly Operation and Fragmentary Orders to disseminate key requirements and policy changes through command channels. The NG JFHQ-State SAPR Office publishes a monthly Program Management slide deck to provide monthly program statistics, updates, and important dates to all major subordinate commands (MSCs), S1s, and Administrative Officers. The NG JFHQ-State SARC used a SAPR VA email distribution list to monitor and distribute information to SAPR VAs on CET, best practices, and awareness activities. The SAPR VA SharePoint Site listed the SHARP events calendar, SAAPM information, Command Readiness Inspection (CRI) supporting documentation, policy and training guidance, and information for advocate and leader response to reports of sexual assault. The FLNG JFHQ-State SARC Office managed a Facebook page to engage local resources, enhance awareness, and generate opportunities for community involvement, while seeking program and social media feedback from Soldiers and the greater **Florida** community.

In addition to including SAPR guidance in the JFHQ Yearly Training Guidance and updated Active Guard/Reserve Handbook, **Maine** NG JFHQ-State SARC provided training to Pre-Command Course with 40 attendees including chaplains, recruiting, and medical personnel. NG JFHQ-State SARC also provided input to a product called "Crisis Response Playbook" for unit command teams. The goal of this product is to provide a one-stop shop for emergency response steps for various Soldier emergency situations, such as suicidal ideation, substance abuse, sexual harassment, sexual assault, and family issues. Additional SAPR information was released periodically through the MAINEiac Refueled newsletter, MAINEiac Radio Show, and often through CDRs' Calls. SAAPM activities included sharing information via electronic marquees at various locations, pledge boards at the two most populated and traveled locations, and via the MENG SAPR and MENG Facebook pages.

The **Missouri** SAPR Program also geared their training and messaging toward specific audiences. In FY16, they conducted leader training for the Guard Officer Leadership Development Program, Pre-Command and 1SG Course, RSPs, and Joint CDR's Conference.

- The senior leaders training was an interactive small-group led discussion on roles and responsibilities for senior leaders and CDRs. In the training, they discussed plans to prevent sexual assault, as well as how to respond appropriately to a sexual assault victim making an Unrestricted Report. The platform provided an opportunity for senior leaders to promote a positive climate throughout the organization. SMEs in attendance to advise and assist with questions or concern included SARCs, EO advisors, legal, law enforcement, NGB-JA/OCI, and health care personnel.
- The MONG SAPR Staff also planned, coordinated, and executed the inaugural Sexual Harassment/Assault Prevention Education training with Ft. Leonard Wood Installation SAPR Program to teach culture change and bystander intervention. This comprehensive training program targeted Sergeants and Staff Sergeants, Warrant Officers and Chief Warrant Officers, and Second Lieutenants through Captains to discuss bystander intervention, training procedures and guidelines, cultural

socialization and breaking the cycle of abuse leading to sexual violence. The MONG, through data analysis, determined that Soldiers in these ranks, with knowledge and specific training, could facilitate and shape cultural change within the Army community.

- Additionally, MONG Family Assistance Coordinators, Family Readiness Groups, and MOANG New-Comers orientation received awareness training.

The **North Carolina** (NC) NG JFHQ-State SARC received previous training in Mentors in Violence Prevention, which is highly interactive and based on facilitated discussions. The SARC shared this knowledge and experience with the NG JFHQ-State VAC, Wing SARCs, and SAPR VAs to provide options to employ for communicating and engaging with an audience instead of relying on slide-decks and dated videos. The NCANG adapted and provided the National Green Dot training, alongside their already established bystander intervention training; as well as newly added first-line supervisor retaliation training. Implementing this new method helped to increase participation and interest in the information.

1.3 Communications and Engagement: Update your efforts to share and foster practices across all prevention stakeholders (suicide prevention, sexual assault prevention, alcohol reduction, etc.). Detail any effort to incorporate shared messaging (e.g., bystander intervention efforts supporting suicide and sexual assault prevention). (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 4, #5, p. 7)

The NGB-J1-SAPR Office coordinated with the NGB Surgeon General's Office, NGB-EO, NGB Office of Diversity and Inclusion, NG Family Programs, NG Joining Community Forces (JCF), and the NG Yellow Ribbon Reintegration Program as appropriate during FY16. The collaboration of these NGB entities represents the holistic approach to taking care of our Guard members and their families, and Veterans.

The Deputy DARNG conducted bi-weekly status update meetings, to include SHARP, Resilience, Suicide Prevention, and substance abuse program discussion on sexual assault numbers, prevention, education and training requirements, policies, upcoming program events, and full-time vacancies within the states.

The ANG SAPR office continued to collaborate with first responders for all SARC training and with the ANG Surgeon General's Office pertaining to line of duty investigations for sexual assault victims. The ANG SAPR Office also communicated with the ANG Inspector General (IG) on retaliation and wing inspection programs. Wing SARCs collaborate regularly with Wing DPH, Chaplains, Special Victims' Counsel (SVC), EO, and Family Programs. ANG Integrated Delivery System (IDS) and Community Action Information Board (CAIB) met quarterly to identify trends to improve wing's climate and culture.

The SAPR teams in the States routinely communicated with other prevention stakeholders, as well as other offices sharing an interest in the welfare of our Guard members and their families. Most notable were the various components within the Family

Program, EO, R3SP, Chaplain, and DPH. Members of the SAPR teams participated in the CHPC, Ready and Resilient Council (R2C), and JCF within their State, as well as the ANG CAIB and IDS. **Alabama** (AL) engaged their Counterdrug program in the Unit Risk Inventories (URIs). Some states, such as **Arkansas**, **Arizona** (AZ), **Hawaii**, **Idaho**, **Maine**, **New Jersey** (NJ), **North Carolina**, **Vermont**, and **West Virginia** required or encouraged their SARCs and SAPR VAs to attend Applied Suicide Intervention Skills Training (ASIST), EO, Master Resiliency Training, and substance abuse training. **Louisiana** NG supported R3SP “Fearless 5K,” two Yellow Ribbon events, Family Programs State Workshop, and two CDR/1SG Courses. The SAPR Office regularly communicated with these programs and the Army SAP to investigate and collaborate on areas of mutual concern. Both the NG JFHQ-State SARC and VAC are EOL trained and routinely provided training support to all EOL courses. **Maryland** (MD) NG JFHQ-State SARC also worked with EO to provide SHARP training at EOL training so that all new EO leaders understand the SHARP process. Additionally, the MDNG JFHQ-State SARC conducted a Unity Day in conjunction with EO to encourage awareness of issues related to SHARP and EO, to include their similarities and distinct differences. **Maine** NG JFHQ-State SARC provided training to units as part of ‘Collaborative Team Training’ concept along with EO, Suicide Prevention, SAP, and Resiliency SMEs focusing on resiliency as a protective and preventative set of skills, discussing bystander intervention tools for each area, and addressing how each of the areas can be interrelated. The SARC and SAPR staff continued to attend monthly and quarterly meetings routinely throughout the state to maintain currency on local trends, and remain integrated within the overall system, sharing information and knowledge gained with victim advocates and others within the organization. **North Carolina** NG SAPR/SHARP office worked in conjunction with the Suicide Prevention office, Army SAP, SEEM, and Integrated BH System to collaborate and share messaging across the disciplines and how they relate to prevention and response. Additionally, they attended Yellow Ribbon events, AGR and Technician orientation briefings, as well as monthly and quarterly meetings to include R3SP, Equality and Diversity Council, and EO meetings. **Vermont** NG JFHQ-State SARC completed the State run Victim Assistance Academy hosted by the Center for Crime Victim Services and funded by Violence Against Women Act. The NG JFHQ-State VAC enrolled to complete the academy in FY17. Both NG JFHQ-State SARC and VAC attended monthly county Task Force meetings on sexual and DV; the SARC serves on the Executive Committee for the local task force. Additionally, the NG JFHQ-State VAC is a Behavioral Interventionist, who supports Service members experiencing suicide ideation and uses these skills to support survivors as necessary. The NG-JFHQ-State VAC serves as special emphasis program manager for Spectrum Pride Awareness month.

These additional efforts by some of the individual states demonstrate the collaborative efforts typical within the States to help safeguard its Service members. The **Alaska** NG JFHQ-State SARC participated in the Ready and Resilient Working Group during FY16. This group combines the efforts of suicide prevention, alcohol reduction, sexual assault prevention, religious support, and overall behavioral health initiatives. The **Arizona** NG JFHQ-State SARC is a member of the Suicide Task Force; an organization that actively responds to high risk units based on URI and Defense Equal Opportunity Management Institute (DEOMI) survey results. **Guam** NG established a crisis response team, which

includes the SAPR office, Chaplain, DPH, BH, and suicide prevention personnel. This team met monthly to discuss updates in the programs, trend analyses, and events they can collaborate on to target assistance to Soldiers and Airmen within their organization. The team also engaged in awareness events such as SAAPM and Suicide Prevention month. In **Iowa** (IA), program managers from substance abuse, resiliency, suicide prevention, SAPR, and behavior health participate in a monthly Prevention Working Group under the CHPC. They worked to identify high-risk criteria from URI and Department of Defense Equal Opportunity Management Institute Organizational Climate Survey (DEOCS) and developed courses of action to assist command teams in mitigation of the high-risk behaviors identified. When high-risk units requested training, the working group synchronized efforts to include a team of program managers for each risk factor identified to consolidate and customize training to the needs of the unit. **Colorado** ANG created a caregiver's group (similar to a CAIB) that included the DPH, SARC, EO, Human Resources, and Airmen/Family Readiness Coordinator. This group met on a monthly basis to identify possible negative trends within the COANG.

Hawaii SAPR Office worked with the Army SAP to create the TAG's mitigation plan. **Illinois** NG JFHQ-State SARC and NG JFHQ-State VAC attended the monthly behavior health meeting, which included the SEEM and Alcohol Drug Control Officer. **Michigan** NG JFHQ-State SARC and VAC consistently worked with other programs to establish strategic goals and consistency within their programs. They provided contact information and training to EOL courses and collaborated with the SEEM, BH office and drug and alcohol reduction programs to produce a consistent, united message in training throughout the State for Yellow Ribbon, and pre and post deployment support. In **Nebraska** (NE), members of the CHPC, the NG JFHQ-State SARC, R3SP coordinator, and SEEM, visited units in different geographical areas to introduce themselves, share the purpose of the CHPC, and to allow the Guard members to ask questions or address any concerns or issues.

Indiana shared messaging included the SAPR program teaming with the Resilience program to incorporate sexual assault training with a resilience training event, while the Resilience program provided resilience training at a sexual assault training event. The Resilience team hosted Peer-to-Peer training for Service members, E4 and below, to receive training from Suicide Prevention, Resilience, Chaplaincy, and SAPR staff. The IN NG leadership wanted to expose the information about each program and the resources available to every member. The Resilience team also trained a 2-hour block of instruction at the SAPR VA Continuing Education Courses on how to foster a positive attitude and maintain it throughout their day, week, year, and lives. This type of messaging was extremely important for those who work in the SAPR program and have the stressors associated with the sensitive work they do. The **Indiana** NG Recruiting and Retention BN conducted sexual assault training to all leaders and recruiters within the recruiting command. Their senior SAPR VA conducted the training with support from the NG JFHQ-State SARC and VAC.

The **Missouri** NG JFHQ-State SAPR Office and ARNG EO Office combined efforts, resources, and expertise, to create a SHARP/EO training package for all MONG Service

members. SMEs capable of discussing the difference between sexual harassment and sexual assault, the continuum of behaviors and harm, prevention methods, bystander intervention, culture change, reporting options, CDR “no tolerance” policy of sexual harassments and sexual assault presented this training. The **Florida** NG Resilience, EO, SHARP Training Program provided training to units that experienced an incident of sexual harassment or assault, as requested or directed. The training program serves as a mechanism to increase unit cohesion and resiliency through experience and didactic discussion. **Florida** ARNG also conducted a bi-annual Wellness Camp. This wide-ranging program, coordinated by the R3SP program provided Guard members with the tools and training necessary to meet Army Physical Readiness standards, and height/weight requirements, but also focused on helping the participants learn ways to optimize their overall performance, and live a healthier lifestyle. The FLNG NG JFHQ-State SARC attended and provided input for Wellness Camp training, especially for the victims of sexual assault who were able to attend the program in an AT status, at the discretion of their command. The **Connecticut** NG JFHQ-State VAC, a DEOMI trained US Army EO Advisor, was a main instructor for the CTARNG EOL course. The NG JFHQ-State SARC was a guest speaker in the EOL course to provide up to date SAPR/SHARP policies. The CTNG NG JFHQ-State SARC is currently on a 6-month tour to NGB-ANG SAPR Office sharing information from the State level and forging relationships at the National level.

In **New Jersey**, the NG JFHQ-State SARC is responsible for the State SAPR Program, as well as the overall management of suicide prevention, SAP, and Resiliency. Members of these programs worked together collectively to present these programs at the CHPC meetings to BDE CDRs, Deputy Adjutant General, and TAG. They worked closely with their State Psychological Health Coordinators and State Surgeon to assist Soldiers in crisis management. Additionally, they shared resources among the multidisciplinary teams to ensure Soldiers received the resources they need.

The **Ohio** TAG capitalized on the concurrent observance of Alcohol Awareness Month and SAAPM in April and sent a message to all **Ohio** Guardsmen asking for a renewed focus. An excerpt of the message is as follows... “Maybe it's not a coincidence that April is both Sexual Assault Awareness and Prevention Month and Alcohol Awareness month. Alcohol is the number one weapon used in sexual assaults. Multiple studies have shown that close to 70% of assaults involve alcohol by the perpetrator, the victim, or both. An individual cannot give or receive consent if they are intoxicated or under the influence - we must make certain that every one of our Soldiers and Airmen understand this simple concept. Being an advocate for responsible drinking and preventing sexual violence is not only a leadership responsibility - it is the responsibility of every Service member. We must all be proactive in recognizing at risk behaviors and never hesitate to take action and intervene when we see one of our own crossing the red line of our organization's values.”

The **Virgin Islands** (VI) NG began a new collaborative initiative called “Lunch & Learn” conducted on every Wednesday from noon to 1300 and 1300 to 1400. It combined the members of the SHARP program, Family Support, Military Family Life Counselor, and Psychological Health Coordinator, who presented various topics to include anxiety,

depression, post-traumatic stress disorder, relaxation techniques and other remedies or ailments in a small, interactive group setting at a particular break area.

1.4 Peer-to-Peer Mentorship and Support: Describe efforts to support peer-to-peer programs for junior Service members that promote healthy relationships focused at the battalion/squadron/or Military Service equivalent levels. Provide, where appropriate, metrics used to assess efforts and intended outcomes of the efforts. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Peer-to-Peer Mentorship), p. 10)

The CNGB's "NG Sexual Assault Prevention Strategic Blueprint: Addressing Sexual Assault Prevention in Today's National Guard", provided strategies for this key element of the NG Sexual Assault Prevention Program for the States to use. The goal was to establish a peer-led program that aligns with the goals of the organization and complements the culture of the unit.

Generally, all the States assigned a sponsor to each newcomer, including interstate transfers, to the Guard and gave him or her a sponsorship packet to assist the new member in the integration with the unit or wing. This packet identified important areas and programs available within the State. Each new member used the packet to assist him or her in meeting all key personnel, inside and outside the unit. Additionally, most states ensure they introduce the new member to the SARC and SAPR VA within the unit, BN, or BDE.

Many of the State peer-to-peer programs rely heavily on the RSP and Student Flight Program as a strong base to support additional training. **Arizona** NG Army and Air SAPR Office focused on Bystander Intervention against any unacceptable behavior, understanding what "consent" means, healthy relationships between Soldiers and family members, and the I. A.M. Strong Campaign, specific to victim empathy. In the **Kentucky** NG RSP program, one of the first things new Soldiers receive training on is the Army's SHARP program to ensure they understand the purpose of the program, the services offered, and the personnel who make up the SAPR team if they need to talk. During this training, the instructor explained different means of intervention to stop sexual violence before it happens and covered what healthy relationships are and how to achieve them. **New Mexico** (NM) NG recently established a Female Mentorship Program for all ranks.

Georgia NG 116th Air Control Wing (ACW) has a robust student flight program, which includes a 45 minute to 1-hour long newcomer SAPR briefing, and pairing of new members with a unit POC throughout their accession process. The SARC and unit's SAPR VA introduced themselves to all new members during in processing. Key leadership received separate training for their annual SAPR and Green Dot training requirement. In this training, the instructor addressed retaliation issues and discussed real life examples and scenarios. The Assistant TAG and Unit CDR, both attended the training and reiterated their strict no tolerance policy. They also discussed the importance of improving the climate and culture to allow members to feel comfortable enough to

report a sexual assault and the better way to talk with them without causing additional suffering.

The **Indiana** NG resilience team hosted Peer-to-Peer training for Service members, Specialists and below. This group also received training from Suicide Prevention, Resilience, Chaplaincy, and SAPR staff. The SAPR staff provided a one-hour briefing, which included interactive PowerPoint, group discussion, and video. The training material, geared towards younger Service members, incorporated aspects of modern culture.

In the **Louisiana**, the NG JFHQ-State SARC developed a collection of 10 SAPR/SHARP mini lessons focused on targeting the 18 to 24 year old, Private to Specialist demographic. These lessons supplemented the SAPR/SHARP AT requirements and made available on the LA-Guard Knowledge Online (GKO) SHARP webpage. Additionally, all SAPR VAs who attended the FY16 LANG JFHQ-State SARC and VAC 40-hour CET received the mini-lessons on a compact disc. The mini-lessons included topics such as Respect, Recognizing Sexual Violence, Damaging Behavior and Language, Dispelling Rape Myths, Female Perpetrators, Sexism, Rape Culture, Appropriate Social Behavior, Abusive Dating Relationships, and Sexual Predators.

Michigan NG used consistent messaging throughout the state and conducted group sessions and one-on-one to reach out to junior Service members and higher. Some of the information discussed included inappropriate texting and pictures and their potential affects; and, prevalent underage and social media issues due to the increased use of social media such as Facebook, Twitter, blogs, and other social media platforms. Two other important topics discussed were the risk of abusive relationships and bystander intervention. The facilitator discussed how each of these situations possess risks based on the situation and identified resources available to assist.

Missouri NG employed a joint effort between the ANG and NG JFHQ-State SAPR Office to conduct Newcomer SHARP awareness training. The focus of the training was to ensure new Soldiers and Airmen understood TAG policies and reporting procedures for SHARP issues.

Nebraska NG created specific wallet cards with SAPR related contact and resource information, reporting option details, and key points to bystander intervention techniques.

North Carolina ANG conducted their bystander training and Green Dot implementation as a peer-to-peer instruction. NCNG SHARP and SAPR offices facilitated conversation to encourage the creation of peer-to-peer mentorship amongst units and squadrons, utilizing the sponsorship program, with an emphasis on bystander intervention and prevention. NCNG SHARP and SAPR built relationships with the RSP command to help facilitate SHARP program training before the recruit attends initial entry into the military.

Pennsylvania NG JFHQ-State SARC capitalized on the use of social media to reach out to provide Guard members' quick access to the PANG SAPR website by using a bar code on his business card. With peer-to-peer mentoring occurring by sharing information

through websites, the PANG SAPR team posts healthy communication tools in hopes that Guard members share the message verbally and electronically.

The **Tennessee** NG spearheaded the Guard Your Buddy Program, which incorporated a mobile application. The intent of the program is that every TNNG Service member, Army and Air, has a battle buddy or wingman who shares a responsibility to correspond frequently to check on each other's well-being. This program reinforces that the TNNG is a "Family," as well as a military force. All SAPR and SHARP training venues included Bystander Intervention training to support this prevention strategy of taking care of fellow Service members.

Vermont NG policy, enforced through the Organization Inspection Program, required the assignment of same gender sponsors to each incoming Soldier to a unit. That sponsor ensured the incoming Soldier met all leadership and integrated fully into the organization. The state published a SAPR to Retaliation Policy that outlines expectations of Unit leadership and peers following a report of Sexual Assault, Sexual Harassment, or Sexual Orientation Discrimination. This policy also provided CDRs with the appropriate language to counsel both the subject and survivor of the report as to their rights and boundaries pertaining to retaliation or reprisal. Unit training on sexual assault policies and procedures educated Service members on these expectations as well.

Washington (WA) NG conducted a State level cross-service Peer-to Peer training on a quarterly basis. SAPR programs facilitated conversations designed to encourage all levels of membership to embrace their role in the reduction of sexual assault within the WA Guard formation. Approximately 200 Guard members attended the peer-to-peer training in FY16. **Wisconsin** established peer-to-peer mentorship programs to help promote healthy relationships. Groups of Airmen met consistently to discuss challenges as well as successes.

1.5 Leadership Involvement: Update improvements to local Military Service SAPR programs (on both prevention and response) based on the feedback to local commanders from command climate assessments. (DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 5, para 9f)

A number of states addressed issues and concerns identified in the results of command climate assessments. **Arkansas** ANG Wing SARC conducted a "roundtable" with audiences to address issues identified in command climate assessments. The SAPR VA assisted by addressing concerns in the command assessment on knowledge of reporting and support to report. The NG JFHQ-State SARC conducted training to the ARNG on Anger management, DV, and healthy relationships (Strong Bonds) based on feedback received by CDRs from climate assessments and URIs.

Colorado ARNG developed AT based on the SHARP improvement process of FY15. The training requires Soldier involvement in the training in lieu of power point presentations. The ANG WG/CC requested the formation of a Tiger Team to identify any possible

barriers that could have an impact on the decision making process of a victim on whether to report a sexual assault.

Delaware (DE) NG modified their AT to increase leader involvement based on feedback from the climate assessments. The two particular topic areas modified were publicizing investigation outcome and reasoning, and false reporting and leadership trust, specifically relating to victim support.

District of Columbia NG updated the SAPR Command Policy for the DCNG based on the review of climate assessments and individual interviews. The new policy stresses increased leader involvement. The leaders received education on the importance healthy discussions and guided discussions within the workplace.

Based on feedback received from the command climate assessments, **Hawaii** NG CDRs became more responsive in understanding their role in sexual assault incidents. The HIARNG is currently working to ensure that change of command and responsibility briefs are conducted within mandated timelines.

Idaho NG created training material to teach leaders and Service members how to react properly to a report of sexual assault. **New Mexico** NG also developed more interactive training to keep Soldiers more engaged for better retention of the information and resources. **Oklahoma** NG and **West Virginia** NG redesigned training aids, such as specific videos and activities to use as icebreakers, to help encourage more dialogue between leadership and unit members.

The **Illinois** NG JFHQ-State SAPR office pushed the idea of CDRs leading the annual SHARP training for their units. Initial feedback from units following this direction was positive. With the CDR leading this training, the Soldiers view it as an endorsement for the program and take it more seriously. **South Dakota** (SD) NG CDRs also started conducting more of their annual briefs based on the results of the command climate and the unit risk assessments. Commanders are seeking to bring in SMEs and to combine classes. Another action taken based on feedback received from the surveys is the desire by more CDRs to increase their number of SAPR VAs. After reviewing the Command Climate Surveys and URI, many CDRs took the opportunity to talk to their units and identify vulnerabilities within their unit. Based on these assessments, the state developed a mitigation plan for dissemination in FY17.

Results of the **Indiana** NG FY15 DEOCS reported that 77% of Service members did not know their EO representatives or SAPR VAs. Based on this report, the SAPR office developed and sent out flyers with the NG JFHQ-State SARC and VAC pictures, reporting options, 24/7 number, and DoD SHL number. The flyer allowed space for units to add information specific to their SAPR VAs.

One of the more robust response programs to DEOCS reports is in **Kentucky**. The KYNG SEEM collaborated with the NG JFHQ-State SAPR/SHARP Office to review every DEOCS done within the KYARNG. The SARC in turn worked with the CDR to identify

trends and accurately analyze the Command Climate Assessments as it pertains to sexual violence and the SAPR/SHARP program. With this information, the CDR formulated an Action Plan to address their specific unit's needs. This effort resulted in targeted training efforts in units, extra SAPR/SHARP advertisement in unit areas, and updated unit bulletin boards, to include SAPR/SHARP Policy Letters, and other SAPR related material. This review process identified two consistent areas of statewide concern.

First, despite routine AT, some Service members did not understand which SAPR first responders could accept a victim's Restricted Report to maintain confidentiality. Actions taken to remedy this lack of understanding included:

- Requiring additional advertisement on all computers' screensavers with sexual assault reporting options
- Placing signs in all stalls and above all urinals in restrooms in all armories within **Kentucky**
- Emphasizing the types of reports and who to speak to during AT, encouraged leaders at all levels to use sexual assault reporting procedures as a topic for hip pocket training at every opportunity they have, as well as other posters and brochures placed in armories all addressing the sexual assault reporting process.

The second concern was the failure of units to post information pertaining to results of sexual assault courts-martial. Units are now required to post courts-martial results from Army and Air Force wide to show the prosecution of sexual assaults around the services on unit bulletin boards.

KYNG CDRs who reviewed the results of their command climate assessments with the SAPR/SHARP Office developed action plans based on feedback received in the DEOCS to address areas of concern identified, and to sustain areas of strength pertaining to SAPR/SHARP. These actions helped CDRs increase reporting of sexual assaults by building trust in the command team. They also led to more documented cases of intervention in cases that could lead to sexual violence. The KYNG SAPR Office SharePoint site became the single source repository of information for CDRs, Leaders, SARCs, SAPR VAs, and others to access for relevant and up to date information about the SAPR/SHARP program, prevention efforts and materials, and available resources in the military and civilian communities. This SharePoint site was shared with other state's SAPR/SHARP staff at their request for their use it as a template to develop their own up to date resource of information for their states

In **Louisiana** NG, feedback from CDRs resulted in two improvements to the SAPR/SHARP program. The state purchased Bystander intervention materials and disseminated them to the field. Also, they included a "For the Commander" section in the quarterly newsletter to provide information on program changes, best practices, and an updated list on certified advocates within each direct reporting unit and BN authorized to work with victims. Feedback expressed by **Iowa** NG CDRs and senior non-commissioned officers (NCOs) at all levels for more advanced training on sexual assault resulted in an FY16 State SAPR Summit. In excess of 200 company CDRs, 1SGs, and higher-ranking

NCOs from both the ARNG and ANG attended a two-day training event in April 2016. Topics included in the training were case timelines, male-on-male sexual assault, suicide prevention, CDR's responsibilities regarding SAPR and training, tough conversations, case studies, administrative responsibilities (medical), and executive level resiliency. The IA TAG personally addressed the attendees at the conclusion of the training event to affirm the importance of information provided.

Massachusetts (MA) NG utilized "Got Your Back Training" in numerous units after receiving rave reviews and favorable comments on Command Climate Surveys. The NG JFHQ-State SARC in collaboration with the SEEM initiated "sensing sessions" upon unit request after unfavorable comments on Command Climate Surveys. **Maine** ARNG unit CDRs also requested "sensing sessions," as well as additional SAPR training in response to command climate assessments and unit risk inventories. **Minnesota** conducted "sensing sessions" at multiple organizations also as requested by the CDR to ensure their Service members felt comfortable and safe. These sessions also provided opportunities for individual conversation for anyone that wanted to report a sexual assault or had questions regarding the program.

Based on feedback from training surveys, **Maryland** NG SHARP increased focus on male victims of sexual assault. Results from Command Climate Surveys prompted the MDNG SHARP to focus on the steps for filing Unrestricted and Restricted reports, the differences between the options, and resources available based on the reporting option selected.

Montana (MT) NG responded to the Command Climate Survey results for the wing by conducting Retaliation Training. Additionally, CDRs reached out for training on specific topics identified as areas of concern for the unit.

This year, the **Nebraska** NG SEEM, with approval from CDRs, shared the results of every climate assessment with the NG JFHQ-State SARC. This provided an excellent opportunity to identify issues or lack of awareness within units based on sexual harassment/assault and reporting options. It also allowed CDRs to see how much trust or lack of trust exists within their units.

The **North Carolina** NG JFHQ-State SAPR program office provided feedback to leadership at all levels based on results URI, Command Climate, and IG surveys, and Command level inspections. The feedback provided the state leadership with a specific "pulse" for the organization, and the state's status on sexual assault prevention, understanding, and command trust as it applies to sexual harassment and sexual assault. Consequently, there was an increased emphasis placed on existing sexual assault prevention policies and operating procedures, such as I.A.M. Strong, bystander intervention, and Green Dot, and re-addressing the proper response to an individual who indicates being a victim.

New York NG survey results showed that greater emphasis is required on ensuring CDRs receive one-on-one SAPR training within 30-days of receiving command. Within the 174th

AW, the SARC is currently designing posters on Restricted Reports and Unrestricted Reports for display throughout the wing to help Airmen distinguish between the two.

Texas NG identified awareness and training as areas requiring improvement. Leadership implemented a plan to communicate outside of Commanders Calls and formal settings, and in more work environments. The TX JFHQ-State SARC attended meetings with CDRs, discussed issues, and developed resolutions. The JFHQ-State SAPR program office created a CDRs Checklist for readiness in sexual assault response duties and focused more training on identifying sexual harassment, early bystander intervention of sexual harassment, reporting a sexual assault, identifying mandatory reporters.

Wisconsin NG JFHQ-State SAPR program created a more aggressive marketing campaign to ensure all Soldiers and Airmen can recognize their SARC. The other goal is to help build the program's Volunteer VA membership.

1.6 Deterrence: Update your progress in developing and/or enhancing sexual assault deterrence measures and/or messaging and outline how they are provided to Service members at the installation (or Service equivalent) level (i.e., Crime Reduction Program, MCIO Outreach Initiatives, etc.). Provide summary of Service member feedback or metrics to demonstrate progress. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Deterrence), p. 11)

The CNGB's "NG Sexual Assault Prevention Strategic Blueprint: Addressing Sexual Assault Prevention in Today's National Guard," provided strategies for this key element of the NG Sexual Assault Prevention Program for the States to use. Additionally, the CNGB continued to use the quarterly GSLCs and monthly GSLUs as a method to share feedback and metrics on deterrence. The NGB-J1-SAPR Program Office, in close coordination with TAGs, key state leaders, NGB-JA staffs, and State SJAs, captured the outcomes of sexual assault cases involving Guard members. The metrics provided state-level visibility on offender accountability with the intent to deter the occurrences of incidents, and improve NG investigations and accountability. Once distributed to the field, the publication of the outcomes was determined at the state-level in accordance with (IAW) state law and policy.

The States' primary emphasis on sexual assault deterrence was the proper investigation of every Unrestricted Report of sexual assault. Additional deterrence measures were addressed through training, aggressive marketing and messaging campaigns, and policy letters, such as limited use or no use Alcohol policy during AT and inactive duty training. Described below are specific measures some of the states created to deter sexual assault within the Guard.

Illinois NG posted and read the Non-Judicial Punishment (NJP) memorandum at first formation on all reports of sexual assault. The State SJA office completes the NJP memo quarterly. During annual SHARP training, the unit discussed the possible outcomes for Guard members who assaulted another Guard member. **Michigan** NG included potential punishments based upon Guard member status to let their members know what the

consequences could be for committing a sexual assault into their training program. During all SAPR training for the State, the SJA also briefed this topic to demonstrate a consistent message. TAG and all General Officers within the state declared no tolerance for sexual assault and determination to hold all alleged subjects appropriately accountable.

The **Kentucky** NG invited state police, prosecutors, and other individuals involved in crime reduction, and the investigation and prosecution of sexual assaults to speak with KYNG Service members. These SMEs provided shared messaging from the military and community in developing sexual assault deterrence measures and efforts during training events. In 2016, the KYNG updated and signed into law, the KY CMJ. This new code removed all statutes of limitations pertaining to sexual assaults in the KYNG and more closely mirrored the Uniform Code of Military Justice (UCMJ). This code allows for increased investigation and possible prosecution of sexual assaults in the KYNG. Steps to increase awareness of these efforts are being taken, with the intent to further deter Guard members from engaging in inappropriate behaviors. **Louisiana** NG SJA wrote Article 120 into the LA CMJ during FY15 and briefed it to Guard members in FY16 during the annual SHARP/SAPR briefing. The inclusion of Article 120 into the CMJ, which prohibits sexual assault, stalking (120a), and other sexual misconduct (120b), improved the State's ability to effectively and judicially address acts of sexual misconduct via the courts martial process, by providing an additional avenue to local law enforcement (LLE) and administrative adjudication options.

Missouri NG leadership published the inaugural Offender Accountability and Discipline Report to every member of the MONG to show Leader actions and offender discipline after the report process or investigation was completed. This report is published annually with guidance from SJA and case management group (CMG). The State of **Missouri** publishes offender accountability on Case.net and various news sources.

North Carolina NG discussed and promoted the concept of providing a "Teal Report" to the field showing the results of adjudicated cases involving sexual harassment and sexual assault or other sexual violence crimes. The report does not include Personally Identifiable Information, but allows demographics of rank, age, gender, and the crime and punishment or action taken by leadership. The intent of this report is twofold. First, the field knows that leadership is taking action on cases reported, which may have an impact on deterring of future violations. Second, the NCNG incorporated Special Victim's Prosecutors, SVCs, and NGB-JA/OCI investigators to provide briefings to leadership, unit victim advocates, and unit members on the process of reported cases through investigation and legal actions. Again, the purpose is to increase knowledge of the field on the process with a goal of deterring violations based on the serious nature of holding the subject appropriately accountable. The actions of several NCNG Soldiers in Kings Mountain demonstrated their determination to deter sexual assault. As reported by WBTV, a CBS-affiliated television station located in Charlotte, NC, some NC Guard Soldiers and other civilian bystanders were praised for their quick action and preventing the assault of a minor girl across the street from a Guard Armory. As the girl was walking along the roadside, a man grabbed her skirt from behind and groped her. The bystanders, hearing her calls for help, ran to her aid and detained the alleged subject until police

arrived. The 19-yr old alleged subject was charged with sexual assault and sexual battery and jailed.

Tennessee NG created Sexual Assault resource wallet sized laminated cards, as well as reporting guides, for statewide distribution. Since then, reporting numbers doubled in FY16 from previous years, lending itself to support Service members' increased understanding of how to access the resources available.

The **Texas** NG TAG tasked the TXNG JFHQ-State SARC to write a newsletter article focusing on offender accountability and consequences of committing sexual harassment and sexual assault. The article is scheduled for release in the *Dispatch* newsletter during the first quarter of FY17.

The **Vermont** NG JFHQ-State SAPR Program Office created a Strategic Plan that follows three LOEs, each of which fall within the five LOEs defined by the DoD. The three LOEs include - establish a climate of dignity and respect that actively prevents violence within the organization; focus on the response to victims from initial report through recovery, promote confidence to strengthen resilience through advocacy, and increase reporting; improve system accountability to provide a fair and trauma-informed system, which promotes justice, efficiency and effectiveness. In FY14, the VTNG created the Cultural Transformation Task Force, which met through FY16. The task force developed specific tasks to mitigate incidents of violence and prepare the units for the integration of women into non-traditional roles. The tasks included same gender sponsors and establishing bi-annual meetings between CDRs and SAPR VAs.

Washington NG observed a significant influence at the Army company command level due to past efforts to deter sexual assault. An increased number of Service members indicated their willingness to approach their chain of command and NCO support channel to gain assistance before an assault occurs. WANG JFHQ-State SARC received 10 requests for assistance from CDRs to support Service members in hostile or uncomfortable situations. The CDRs also strongly expressed to the formations their zero tolerance for the types of behavior that create such hostile environments.

1.7 Community Involvement: Describe your efforts to engage with military community leaders and organizations (e.g., Family Advocacy Programs, ROTC Programs, Chaplains, Healthcare providers, and Single Soldier Programs) to develop collaborative internal Military Service programs. Describe how you addressed challenges. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Community Involvement), p. 11 / SecDef Memo (1 May 14), Develop Collaborative Forum for Sexual Assault Methods, p. 2)

Establishing relationships and collaborative efforts to provide services and support to Guard members, their families, and veterans is the norm for the NG of the States. Each state progressively capitalized on the additional resources and partners available to support Guard members in a more holistic manner since the inception of the SAPR program. As noted previously, some of these partners include Family Program entities,

Chaplain's Office, Surgeon's Office, EO, DPH, Recruiters, and JCF. Described below are some specific state efforts and their stakeholders.

Alaska NG JFHQ-State SARC and VAC currently serve on the Ready and Resilient Working group, which partners with Chaplains, Healthcare Providers, Substance Abuse Program, Suicide Prevention Program, and the Resiliency Program to develop collaborative methods to serve the military population. Additionally, the AKNG JFHQ-State SAPR program Office developed relationships with several other important programs on Joint Base Elmendorf-Richardson (JBER), including the JBER SAPR offices, the Army SHARP office, and the JBER Family Advocacy Program (FAP).

Colorado NG established a memorandum of understanding (MOU) with Buckley AFB that requires the Installation SARC to act as the Alternate SARC for the CONG during an emergency and for the CONG SARCs to reciprocate when needed for Buckley AFB. This MOU also allows survivors to request a Volunteer VA or SAPR VA from another branch of service (active, reserve, or guard) to support them. In **Georgia** (GA), the 116th ACW established a memorandum of instruction (MOI) with the installation SARC at Robins AFB to notify the ANG Wing SARC if an incident involves an ANG member. The

Massachusetts NG JFHQ is located on the active duty Hanscom AFB. The MANG JFHQ-State SAPR Program Office collaborated regularly with the Hanscom AFB SARC and Domestic Violence/Family Advocacy Representative on trainings and events. **New Mexico** NG JFHQ-State SAPR Program Office worked closely with Kirtland AFB SAPR office and White Sands Missile Range Family Advocacy and SAPR office. The **New York** NG JFHQ-State SAPR Program Office collaborated with active duty installations to provide advocacy services for NG members at Fort Drum, West Point, Fort Hamilton, and Watervliet Arsenal. The **NYANG** 109th AW SARC worked jointly with the unit DPH to start the wing's Master Resiliency Training. They are in the process of establishing an MOU with the host installation unit, the 914th AW on the Niagara Falls Air Reserve Station, to solidify the verbal agreements currently in place to utilize the facilities and resources.

Tennessee NG partnered with Fort Campbell SHARP in FY16 and participated in their SAAPM events, and attended the **Tennessee** Annual Rape Education and Prevention Institute together. The TNNG JFHQ-State SARC is a member of several **Tennessee** county SARTs, and has a good relationship with the Sexual Assault Centers in **Tennessee**. A strong sense of cooperation exists between the TNNG JFHQ-State SARC, Chaplains, Family Assistance Specialists (FASs), and BH Specialists, relying upon each other for information and resources. **Texas** NG Wing SARCs are co-located with Reserve or Active duty installations and attend joint base CMG monthly meetings, as well as the monthly TXNG JFHQ-State CMGs. The TXNG Chaplain, EO, BH, Suicide Prevention, Family Readiness Groups, and Yellow Ribbon POCs often speak at the SAPR VA Refresher Trainings and the JFHQ-State SARC often speaks at their program events. The **Virginia** NG 192nd Fighter Wing worked with Joint Base Langley-Eustis in all SAPR events, such as training for Airmen and SAPR VAs. The VANG JFHQ-State SARC worked with first responders and provided information and training. **Washington** NG JFHQ-State SARC and VAC coordinated with all elements of the WANG Joint Service Support to include Family Assistance staff, Veterans Affairs Claim Assistance, BH

Coordinators, and chaplains. They also maintained their relationships with their active duty resources at JBLM, WA.

Ohio NG JFHQ-State SAPR Program Office and the Defense Logistics Agency Land and Maritime in Columbus collaborate each year to conduct various SAPR events, to include training SAPR personnel to complete their CET requirement. The OHNG also has an agreement with Wright Patterson AFB FAP Office. OHNG SAPR personnel collaborated with the Chaplain corps and gave a Chaplain SAPR brief. OHNG SAPR personnel conducted a briefing for our OHARNG Medical Detachment and created a power point presentation for on-going use outlining their functionality and responsibility as it relates to the SAPR Program. OHNG JFHQ-State SAPR Program Office made themselves available to all **Ohio** Reserve Officers' Training Corps (ROTC) programs for briefings and collaboration.

Puerto Rico NG JFHQ-State SAPR Program Office provided training and resources to the administrative personnel and the cadets at the **Puerto Rico** Youth Challenge Academy, a non-DoD program under the PRNG for young school dropouts. They also participated in FT Buchanan Sexual Assault Review Board with Navy, Marines, Coast Guard, Active Duty, US Army Reserve, Criminal Investigation Division (CID), and other agencies to build upon their relationship and share their procedures and services available to their Soldiers and Airmen.

The **Guam** NG initiated a proclamation signing during FY16 Sexual Assault Awareness Month that included their active duty counterparts, the Joint Region Marianas Commander, and the Andersen AFB Wing Commander. This relationship continued after April as the GUNG maintained constant communication with their partners. Each of them routinely invited the others to training events. Recently, GUNG attended a training hosted by the Navy, called "Pure Praxis." The GUNG invited the Army and Air Force Reserves to attend the Air Forces "Green Dot" training.

In **Hawaii**, the HING JFHQ-State SARC began serving as the **Hawaii** Department of Health, Sexual Violence Prevention, and Military Community Action Team (CAT) Leader in May 2016. The HIANG Wing SARC serves as the Alternate CAT Leader. HING JFHQ-State SAPR Program Office initiated planning to host a Joint SARC/SAPR VA Training Summit with all branches of the military present within the state to include over 200 SAPR VAs and SARCs in November of FY17.

Indiana NG BH provides 24/7 behavioral health response to INNG Service members and worked with the INNG JFHQ-State SARC or VAC on specific cases when requested to ensure victims of sexual assault receive all care and resources available to them. The INNG State Family Program Director (SFPD) and the INNG JFHQ-State SARC also worked together on cases involving family members or intimate partner violence. An INNG JFHQ-State SARC notified of a case involving a family member or intimate partner not eligible to file an official report with the SARCs office, the SARC referred the case to the SFPD and gave a warm hand off with the permission of the victim. SFPD then provided resources and assisted the victim with any additional needs/concerns. The SVC

and the INNG JFHQ-State SARC worked together on cases to ensure the victim receives all benefits, resources, and due process. This collaboration was extremely beneficial for all parties involved, but executed only after the victim gave permission for the collaboration.

The **Kentucky** NG JFHQ-State SAPR Program Office sought ways to improve DV services since the KYNG does not have a FAP. The office worked with the Fort Knox FAP and the **Kentucky** Cabinet for Family and Health Services to identify ways of addressing DV, while following state laws when responding to these types of cases involving KYNG Service members or Family members. Due to state law, numerous challenges prevent the Guard from developing similar programs. However, the KYNG JFHQ-State SAPR Program Office identified resources Guard members may use in this situation. The KYNG JFHQ-State SAPR Program Office served as a member of the KYNG CHPC working with the BH Services, Chaplains, SAP, Staff Judge Advocate, and others. This council focused on providing Guard members with resources to meet their needs and afford proper care. The primary focal points included addressing areas of concern and safety that could lead to sexual violence, and the care and response to KYNG and family members who experienced sexual violence and in of need help from these agencies. The KYNG established a partnership with the ROTC programs within the state to provide SAPR/SHARP training at the ROTC programs upon request, provide information and promotional materials for the SAPR/SHARP programs, advocacy response and referrals for sexual assaults, and ROTC guidance for their programs.

Louisiana NG JFHQ-State SAPR program Office cultivated relationships with the following partner programs: Army SAP, Drug Demand Reduction Program, R3SP, Chaplain's program, the DPH program, the Office of Family Programs (OFP), EO and SEEM program, and the Office of the Staff Judge Advocate (OSJA). Representatives from each of these programs are members of the CMG, which allows for collaboration. In addition, program managers assigned to J1 attend a weekly synchronization meeting to identify gaps in service and align efforts collectively to address Soldiers' needs within the state. The LANG JFHQ-State SAPR Program Office works with OFP to provide follow-up assistance for Guardsmen and family members reporting DV to Military One Source.

In addition to working closely with their Family Assistance Centers, Office of the State Surgeon, and Chaplain's Office, the **Minnesota** NG JFHQ-State SAPR Program Office provided training to several ROTC programs for their annual SAPR training. They also collaborated with the active duty SAPR VAs, Army Reserve SARC and Air Force SARC in the area and invited them to attend their yearly SAPR VA CET required for re-certification.

Missouri ARNG Senior Leaders Training is an interactive small group led discussion on roles and responsibilities for Senior Leaders and CDRs. The primary focus is to discuss plans to prevent sexual assault and appropriate responses to a sexual assaulted victim, who has made an Unrestricted Report. This platform provides an opportunity for senior leaders to promote a positive climate throughout the organization. Subject matter experts who attended the training included the SARC, EO Advisor, Legal, Law Enforcement and NGB-JA/OCI, and Health Care personnel to advise and assist with questions or concerns.

MONG also partnered with Army SAP to promote awareness and prevention strategies through displays, training, and awareness campaigns to discuss the correlation of substance abuse and sexual violence.

In **Montana**, both the MTNG JFHQ-State SARC and WING SARC work together with Malmstrom AFB SARC for SAPR program events. Both SARCs also attend the Community Sexual Assault and Domestic Violence Task Force Meetings throughout the State. Routine collaborate with VA MST Coordinator, Chaplains, BH, and State Safety Officer to discuss trends, concerns, and mitigation plans.

The **North Carolina** NG JFHQ-State SAPR Program Office established a relationship internally with the Family Programs Child and Youth department to provide trainings and briefings to help the youth become more knowledgeable on developing healthy relationships, consent, and respect during annual teen retreat events and monthly teen council meetings. Additionally, they collaborated on an event for February's Teen Dating Violence Awareness Month (TDVAM). This event included a midnight bowling event for all NCNG member's children 13-18 years of age to attend and participate in TDVAM projects, discussion and briefing along with a pizza party and evening of bowling. This successful event resulted in a decision to make this an annual occurrence. Additionally, the NCNG JFHQ-State SAPR Program Office continued to be an active member of the state's R3SP Council, the EO Council, and the Diversity and Inclusion Council. The prospect of being able to have a voice and actively participate in these councils helps build the knowledge base of the program and adds to the ongoing change in culture and preventing sexual violence.

New Jersey NG developed and nurtured several relationships with their active and reserve component commands co-located on Joint Base-McGuire-Dix-Lakehurst. Together, they conducted sexual assault refresher training to their SAPR VAs and monthly meetings to foster local-level esprit de corps. The ANG Wing SARCs worked with DPH, Family Advocacy, and Chaplains, and worked closely with the Army Support Activity - Fort Dix SARC.

1.8 Community Involvement: Describe your efforts to engage with non-DoD civilian community leaders and organizations both locally and nationally (e.g., Safer Bars Alliance and Association of Women for Action and Research (AWARE)) to develop collaborative community relationships and programs. Describe how you addressed challenges. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5, (Community Involvement), p. 11 / SecDef Memo (1 May 14), Develop Collaborative Forum for Sexual Assault Prevention Methods, p. 2)

The National Guard is a community-based organization composed of citizen Soldiers and Airmen, who reside and work within the communities. This serves as an advantage to the Guard when reaching out to gain community involvement. In general, many of the NG JFHQ-State SAPR Program Offices developed supporting relationships with their state's Coalition Against Domestic Violence (CADV), CASA, SARTs, rape crisis centers, Joining Community Forces, LLE, Attorney General's Office, Veterans Affairs (especially MST

Clinics), State Veterans centers, and academic institutions. Some of these states include **Arkansas, Colorado, District of Columbia, Delaware** (includes Sexual Assault Network of **Delaware**), **Florida** (to include Guyana Defence Force SPP SMEE), **Guam** (includes **Guam** Coalition against Sexual Assault and Family Violence), **Georgia, Hawaii, Idaho, Indiana** (includes Sexual Assault Nurse Examiner [SANE]), **Indiana** Coalition to End Sexual Assault, and Wabash Valley Veterans Services), **Iowa, Louisiana** (includes JFHQ-State VAC supporting a Prevention Summit in August 2016 engaging teachers, coaches, medical personnel, and others in the local community in sexual assault prevention), **Massachusetts, Maryland, Maine, Montana, Nebraska, New Jersey** (including coordinating Sexual Assault Forensic Exams [SAFEs] at local hospitals), **New Mexico, Nevada** (NV), **New York, Oklahoma** (including Native Alliance Against Violence, Family Justice Centers, and OK Prevention Through Leadership Committee), **Pennsylvania** (including bar managers), **Puerto Rico** (including memorandums of agreements with local hospitals), **South Carolina** (SC), **South Dakota, Tennessee** (including Centerstone Military Services, a grant-funded resource that offers free counseling both group and individual to military sexual assault survivors and their family members), **Virginia** (including Domestic Violence board in Danville, and providing classes to the National Association for the Advancement of Colored People), **Vermont** (including an MOU with the statewide Network to End Domestic and Sexual Violence), **Washington, Wisconsin**, and **West Virginia**.

Captured below are highlights from additional States on their various collaborative efforts in support of the prevention and awareness of sexual assault, as well as shared resources and information.

Alabama NG JFHQ-State SAPR Program Office is a board advisor for Standing Together Against Rape and Coalition Against Rape. The office also has MOUs with Rape crisis centers within the state.

Arizona NG is consistently involved with the **Arizona** Coalition to End Sexual & Domestic Violence, Community Veterans Centers, Phoenix VA MST Clinic, Community Alliance Against Family Abuse, LLEs, United States Department of Justice, Federal Bureau of Investigation Victim Services, and other victim resources.

Alaska NG JFHQ-State SAPR Program Office is involved in the Coalition Against Domestic Violence/Interpersonal Violence Coalition, which consists of local programs that support sexual assault awareness and prevention. AKNG participated in collaborative trainings hosted by the state SART team, which includes agencies in the community that also work to prevent sexual assault. The JFHQ-State SAPR Program Office provided support and resource tables to local events during SAAPM and throughout the year at events to promote prevention against sexual assault and interpersonal violence. AKNG JFHQ-State SAPR Program Office also collaborated with the University of Alaska, Anchorage Nursing students to present a health fair aimed at reducing interpersonal violence. This collaboration also included a senior nursing project that suggested high school students and AKNG Soldiers age 18-25, experience the same stressors and use corresponding coping strategies to support resiliency in both populations. The AKNG

JFHQ-State SAPR Program Office provided sexual assault and harassment prevention training to a local Junior ROTC and Alaska Military Youth Academy. The AKNG invited the Anchorage police department sexual assault officers to CMGs. The AKNG JFHQ-State SAPR Program Office is also an affiliate member with the Alaska Network on Domestic Violence and Sexual Assault and the Alaska Council on Domestic Violence and Sexual Assault.

Connecticut NG JFHQ-State SAPR Program Office worked with **Connecticut** State University, Central **Connecticut** State University (CCSU), and **Connecticut** Sexual Assault Crisis Services for different training events. The office also collaborated with local rape crisis coalition. The CT Alliance to End Sexual Violence provided trainers at all of their CET events. This relationship began in 2008 and remains today, keeping a strong communication and training support alliance. This past year CCSU Graduate School invited the CTNG JFHQ-State SAPR Program Office to an Inclusion/Community networking event. Through this event, the CTNG SAPR office gained a speaker on “Hyper-masculinity” for their 2016 CET. Additionally, The CTNG JFHQ-State SARC serves on a local prevention team with high school faculty and the chief of police for East Hampton, CT.

The **Georgia** NG 116th ACW SARC partnered with the Macon Judicial Circuit SART to discuss responding to the sexual assault victim, and developed relationships with the Salvation Army Safe House/Rape Crisis Center and the local legal advocate for Houston County.

Illinois NG developed a strong relationship with the local rape crisis centers. Members of the ILNG JFHQ-State SAPR Program Office spoke at their events and invited their members to training events conducted at Guard facilities. **Illinois** NG signed an MOU with the **Illinois** Coalition against Sexual Assault and several local rape crisis centers throughout the state. **Illinois** has 11 Veterans Centers throughout the state to provide counseling services to their Service members. Veterans Center personnel also spoke at Guard training events and, on occasion, brought their Veterans mobile unit for Guard Members to tour. The newest partnership was with Rush University Medical Center Road Home Program, which provides confidential support, counseling and veteran health services to MST survivors.

The **Kentucky** NG JFHQ-State SAPR Program Office was very active in FY16. The KYNG JFHQ-State SARC served as a member on the KY SART advisory committee and worked with senior members from a number KY agencies. These agencies included the Association of Sexual Assault Programs, State Police, Board of Nursing, Nurses Association, State Police Crime Lab, Chief Medical Examiner, Department of Community Based Services, Victim’s Advocacy Division of the Office of the Attorney General, and SANE, among others. The KY SART advisory committee addresses access to resources and community response to sexual assaults around the state, discusses and identifies best practices, develops model protocols for SARTs around the state, and identifies and addresses systemic issues among many other responsibilities. The KYNG also established MOUs with multiple universities and colleges statewide and continued to

develop more to provide a platform for collaboration with their sexual assault response staff. The MOUs enabled the KYNG to share program data, training resources, advertise their program on the campuses to reach Service members and their dependents, and to collaborate on improving prevention and response efforts. Another partnership created was with the KY Department of Criminal Justice Training. Members of the SAPR Office helped to educate law enforcement and prosecutors around the state on the NG SAPR program, to include services provided, and CDR responsibilities as it related to investigations and prosecutions of Guard members. The KYNG also collaborated with Western **Kentucky** University and the Victim Services section of the Attorney General's Office and other state agencies to develop an advanced victims' advocacy course provided through the **Kentucky** Victim Assistance Academy. They designed the course to train victim advocates around the state on advanced techniques and to provide updated advocacy information to improve victim services around the state.

The KYNG continued its partnership with the University of Louisville Men of Prevention, Education, and Advocacy on Campus and in the Community (PEACC) program. This program works to involve male students in violence prevention efforts and to increase recognition of male sexual assault victims and services provided to them. Men of PEACC conducted a workshop at the KYNG 16-hour CET event, speaking about relationship violence, ways to intervene, and ways to establish healthy relationships. The KYNG SAPR Office participated in Sexual Assault Awareness Month events hosted on campus by Men of PEACC. The newest collaboration established was with the **Kentucky** Division of Veterans Affairs. This relationship focused on educating Service members, SARCs and SAPR VAs on the services offered by the agency, particularly their new Women Veterans Assistance program, and their homeless veteran services. The Veterans Affairs provided two workshops during FY16 to the KYNG about their program and services. The KYNG JFHQ-State SAPR Office conducted free 90-minute workshop seminars and set up information booths at statewide conferences. These conferences included the 17th Annual Ending Sexual Assault and Domestic Violence Conference in Lexington, KY in December 2015; the Victim Assistance Conference in Louisville, KY in 2016; and various other events around the state. Over 300 military and civilians attended these workshops. Attending these conferences led to increased collaborations with new agencies and programs around the state and enabled us to provide updated information about our program to community partners across the state, other service providers, and survivors.

Michigan NG JFHQ-State SAPR Office was also very active in FY16. The JFHQ-State SARC and VAC were actively involved in community and state programs. They attended monthly or more frequent meetings with the Capitol Area SART, who include local hospitals, SANE nurses, **Michigan** State University, detectives and attorneys who specialize in sexual assault cases, psychologists, Small Talk, FireCracker Foundation and other groups. The Capitol Area SART goal is to improve our area and state response to sexual assault. The JFHQ-State SARC and VAC shared this information obtained with their SAPR VAs and other providers. In May 2016, The JFHQ-State SARC and a representative from NGB-J1-SAPR Office provided training for the **Michigan** Coalition of Domestic Violence and Sexual Assault. The success of the training prompted an invitation for the JFHQ-State SARC to participate and present at next year's conference

and from the Prosecuting Attorneys Office of **Michigan** to speak at one of their training events. The JFHQ-State SARC also engaged Veterans Hospitals, crisis centers and other organizations regarding resources to assist Service members. The Calhoun Crisis Center in Battle Creek, **Michigan** supported the MING and spoke at their CET events, and other significant training events. This training included tours with SANEs, psychologists, and a service dog, Mattie.

The **Minnesota** NG JFHQ-State SAPR Office worked with many civilian allied organizations, who were excited and anxious to join their network. The Battered Women's Legal Advocacy Project presented their annual Journey of Hope Community Award to the MNNG JFHQ-State SARC for her efforts in supporting victims of sexual and DV. The MNNG SAPR team conducted training for that organization, as well as the MN Coalition Against Sexual Assault, Central MN Sexual Assault Center, Acres for Life (Equine Therapy), and Cornerstone. They also worked with 360 Communities, Breaking Free, and Pathways of West Central **Minnesota**, among others.

When the **Missouri** NG JFHQ-State SAPR Office collaborated with **Kansas** (KS) JFHQ-State SAPR Office to conduct the Annual SAPR VA Refresher training, they also invited several volunteer organizations from the **Kansas** City area to offer information, training, and resources. These included the Metropolitan Organization to Counter Sexual Assault (MOCSA), the **Kansas** City Mobile Veterans Center, SANE from local hospitals, and survivors to share their experience with resources. Additionally, a guest speaker from "We End Violence" provided a one-day event on culture change and bystander intervention. The MONG JFHQ-State SAPR Office also met with five University Title IX Coordinators and provided reference material, contact information and marketing items to increase awareness for their student Soldiers and Airmen. The MONG JFHQ-State SAPR Office established memorandums of agreements (MOAs) with two of **Missouri's** Universities to provide SHARP coverage in the event a MONG Service member requires SAPR services. Additional relationships created by the MONG included community involvement with Buchanan County Prosecuting Attorney's Office and Sheriff's Department; Heartland Regional Medical Center Midwestern State University Police Department, Counseling Center, and Student Health Services; Northwestern State University Children's Advocacy Center; Saint Joseph School District and Young Women's Christian Association; and, Metropolitan Organization to Counter Sexual Assault Community Luncheon.

In addition to the relationships, the **North Carolina** NG already established with both state "COSA" and CADV, the NCNG JFHQ-State SARC, JFHQ-State VAC, and Wing SARC regularly attended monthly SART meetings in numerous counties in the state and shared knowledge, best practices and advocacy resources. Individuals on the NCNG JFHQ-State SAPR Office staff are long time members of the **North Carolina** Victim's Assistance Network, an organization that provides resources and advocacy to all victims of any crime. This membership culminated into an additional inter-agency council (IAC) that helps provide an annual victim's of crime event. Each year, the IAC creates and performs a ceremony in April for the National Crime Victim's Rights Week to bring the community together. This ceremony includes keynote speakers on numerous subjects, with state

officials and families of victims and survivors in attendance. Local high school choirs and Junior ROTC members also participate in this annual event. The NCNG JFHQ-State SAPR Office participated with numerous county SARTs, state coalitions, and the NC Governor's Focus Group on sexual assault and DV, and the events and awareness month projects throughout the year. Additionally, the NCNG JFHQ-State SARC is an acting member on the Governor's Crime Commission Sub-Committee on Sexual Assault and Domestic Violence and attends quarterly meetings or when necessary.

In **New York**, the all wings continued contact and efforts with local rape crisis center and VA for events and information sharing. The 109th AW is updating an MOU with Planned Parenthood-Mohawk Hudson to provide sexual assault services to victims of sexual assault. The 107th AW continued to work with several local police agencies, hospitals, and rape crises centers to share ensure information and resources. On a quarterly basis, the 107th AW SARC meets with these organizations to discuss upcoming awareness events relating to sexual assault, as well as, ideas on how to improve current processes and procedures. The 174th AW SARC worked with the Vera House nursing director in Syracuse, **New York** to establish an MOU between the two organizations. The MOU will provide SAPR support to all personnel assigned to the 174th AW and their family members 18 years old and older. The Vera House is a comprehensive domestic and sexual violence service agency providing shelter, advocacy, and counseling services for women, children & men, education and prevention programs and community coordination. The 174th AW SARC also worked with the medical director of Rome Memorial hospital emergency department to establish an MOU to provide SAPR support to the personnel assigned to the Eastern Air Defense Sector located in Rome, **New York**. The SARC also established an agreement with the Joint Base Bolling Anacostia AFB SARC to provide support to the 224th Air Defense Group located on the Joint Base Bolling Anacostia AFB and Herndon, Virginia. The 105th AW SART consists of County level first responders from Rape Crisis Center, Mobile Life, SANE nurses, and local investigators. The 105th AW is actively involved as part of this team. They also have a Wing DPH who collaborates with local VA and other organizations.

Ohio NG JFHQ-State SAPR team presented military briefings to civilian partnering advocacy programs, such as the **Delaware** and Morrow County VAs and the Sexual Assault Response Network of Central **Ohio** (SARNCO) VAs. The SAPR team continued to foster and grow their relationships with their community partners to include SARNCO, Central **Ohio** Sexual Assault Task Force, **Ohio** Alliance to End Sexual Violence, Buckeye Region Anti-Violence Organization focused on lesbian, gay, bi-sexual, transgender, queer and inter-sex survivors, Deaf World Against Violence Everywhere, and other agencies throughout **Ohio**. The OHNG JFHQ-State SAPR office personnel are also members for some of these agencies.

The **Oregon** (OR) NG JFHQ-State SAPR Office collaborated with the Center for Hope and Safety, a shelter for domestically abused or sexually assaulted women and men; the Willamette University Sexual Assault Resource Associates; and the Cherry City Derby. The ORNG JFHQ-State Office also engaged members of the **Oregon** Legislature to speak at their SAAPM event, collaborated with the Wells Fargo Bank, and the Ms.

Marion/Polk County. All of the above mentioned organizations worked with the ORNG SAPR program to plan, staff, and execute the April 2016 SAAPM event.

The **Texas** NG JFHQ-State SAPR Office engaged routinely with civilian service providers and coalitions to enhance training effectiveness and response to sexual assault. They worked with many state, county, and local Sexual Assault Advocacy Organizations to collaborate trainings for solidier SAPR VAs and leaders. Some of the agencies included the **Texas** Association Against Sexual Assault, **Texas** Advocacy Project, Institute on Domestic and Sexual Violence at the University of **Texas**, and most recently the **Texas**, Office of the Attorney General (OAG). The OAG secured a grant to fund three Civilian **Texas** OAG certified Victim Advocates to assist Service members. Specifically, Service members who were in a non-duty status at the time of the sexual assault incident and need additional state resources, advocacy, and assistance in navigating the civilian criminal justice systems. This grant and initiative increased the JFHQ-State SAPR Office's outreach to local rape crisis centers, law enforcement and victim services agencies. Civilian and Military staff of the SAPR program for the TXNG engage with and sit on county level SART Committees.

Virgin Islands NG JFHQ-State SAPR Office community collaborative efforts continued with the Domestic Violence and Sexual Assault Council (DVSAC), the Women's Coalition of St. Croix, and the Family Resource Center on St. Thomas. These efforts included such activities as an Interactive Film Series and Community Speak-Out on Gender-Based Violence with the Women's Coalition, "Youth-Wise Up," group home talks, ASIST suicide prevention training, health fairs, college student talks, and "good touch, bad touch" story-time at elementary schools with DVSAC.

1.9 Incentives to Promote Prevention: Other than the DoD Exceptional SARC and Prevention Innovation Awards, describe your efforts to promote and encourage installation leadership recognition of Service member driven prevention efforts. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Incentives to Promote Prevention), p. 12)

NGB-J1 established the Jane Lux Exceptional SAPR VA Award to recognize an individual for significant contributions, dedication, and outstanding performance in providing support and resources to sexual assault victims, and enhancing the National Guard SAPR program. The first award was presented in FY16 to the honoree, Ms. E. Jane Lux, who worked tirelessly to help establish and nurture the NG SAPR program from its infancy into a responsive, victim-focused program. This award plays an important role in raising awareness of the critical role the SAPR VA plays in helping a victim recover and assisting in prevention awareness and education. The Jane Lux Exceptional SAPR VA award will be presented annually to the one SAPR VA selected from nominees submitted by the 54 States, Territories and the District of Columbia National Guard during SAAPM. The selection criteria include professional accomplishments and achievements beyond the standard duties and requirements of the position, and demonstration within the SAPR arena of imaginative and unusually high impact initiatives, exceptional resourcefulness, and notable achievement. The following list identifies ways to achieve the criteria.

- Facilitating the sexual assault victim's care and safety, and provide referrals and non-clinical support.
- Explaining the reporting options during initial contact to afford the victim with the necessary information to make an informed decision.
- Supporting the command in raising awareness, prevention, and response to sexual assault.
- Establishing relationships and cooperation with civilian and military organizations to provide the best support and resources available.
- Providing engaging and effective unit and command SAPR prevention and awareness training.

The ARNG SHARP program office and ANG SAPR program offices support nominations for SAPR awards managed at the State level. Over fifteen States developed special SAPR award programs, annual recognition, or incentives for members within the SAPR arena. Some of the highlights are identified below:

- **Arkansas** NG JFHQ-State senior leadership publically recognized prevention and intervention efforts made by Service members.
- **Delaware** NG presented State SAPR VAs awards for exceptional performance and involvement in the SHARP Program.
- **Florida** NG selected top-notch SAPR VAs nominated by their MSC to attend specialized training or conferences outside DoD mandates. One of these special events included the Guyana SHARP SMEE.
- **Georgia** NG held a unit SAAPM poster contest. The 2016 winning slogan was, "Show others they are not alone. Don't be a bystander. Leaders Intervene." submitted by a member of the 1160th Transportation Company. Posters were printed and given to units to display in work areas.
- **Hawaii** NG selected a Team of the Year award, which went to the SAPR team in FY16.
- **Illinois** presented an inaugural SHARP Specialist of the Year Award in FY16. Additionally, the Teal Boot award goes to the BDE that gave the most support to SAPR/SHARP throughout the year.
- **Indiana** TAG recognized an outstanding SAPR VA with a certificate of appreciation and acknowledged her outstanding performance as a BDE SAPR VA. The presentation occurred during SAAPM.
- **Kentucky** NG established a SAPR VA of the Year Award to recognize VAs or SARCs who did an outstanding job supporting the KYNG SAPR program. Some of these efforts included working to increase participation in the SAPR program, to promote greater understanding of services provided for KYNG Service members and Family Members in the SAPR Program, and to eliminate behaviors and cultural

norms that lead to an environment conducive to sexual violence in all forms to include sexual harassment and sexual assaults.

- **Missouri** NG leadership provided awards and coins to individuals who volunteered for or provided additional training opportunities and those personnel who have intervened to prevent a sexual assault incident. This recognition often comes as a private acknowledgment unless multiple individuals are recognized.
- **Montana** NG leadership recognized their SAPR VAs when they took charge of an initiative or event/ training in their unit.
- **Ohio** NG recognized the 121st Air Refueling Wing SARC as the exceptional FY16 SARC of the Year. The OHNG leadership recently formalized their process to recognize an Exceptional SAPR VA for FY17, in addition to the Exceptional SARC of the Year.
- **New York** 19th AW provided Green Dot coins to CDRs, 1SGs and chiefs for presentation to individuals who intervened to disrupt an inappropriate situation.
- **Puerto Rico** ARNG promoted and encouraged installation leadership recognition of Service member driven prevention efforts. They have a SAPR /SHARP VA of the Year award to recognize the SAPR /SHARP VA who gave that extra mile while working with victims and was always engaged and available to support the program.
- **Tennessee** NG TAG and senior leaders placed an emphasis on recognizing Soldiers and Airmen who contributed to the prevention of sexual assault and harassment, and who promoted respect among their peers and leaders.
- **Texas** NG recognized their Exceptional SAPR VAs and SARCs at their three yearly Victim Advocate Refresher Trainings and during their CMGs.
- **Vermont** NG presented certificates signed by VTNG TAG to the “Victim Advocate of the Year” during the SAAPM kick-off events.
- **Washington** NG selected an ARNG and ANG SAPR VA of the year. The Assistant TAG from their branch of service recognized the selectees with a certificate and coin. Additionally, individual Service members were recognized during training for their efforts in supporting the unit, for example, a junior enlisted member seen intervening, or an NCO using Sergeant’s time as an opportunity to coach responsible behavior.

A number of states are in the process of developing a SAPR award program or pursuing ways to recognize extraordinary efforts made within the SAPR arena. **Michigan** NG is discussing a process for recommending and recognizing SAPR VAs throughout their state by offering attendance at outside training events, such as the National Organization for Victim Assistance (NOVA) conference, for providing Service member care and fostering an environment where sexual assault is not tolerated. **North Carolina** is taking steps to create a SAPR/SHARP VA of the year award. Each MSC witness or bystander, with knowledge of the advocacy efforts provided by a victim advocate or their actions and behaviors that encouraged a change in culture supporting and advocating for the

SAPR/SHARP programs, may nominate a candidate. **New Mexico** is developing a SAPR VA of the Year Award and Bystander Intervention of the Year Award for the State for implementation in FY17. **Pennsylvania** NG acknowledged volunteers and guest speakers for their efforts on behalf of SAPR, but is looking to develop a better form of recognition for the future.

1.10 Harm Reduction: Describe the metrics being used to assess the effectiveness of Military Service-specific efforts aimed to reduce the impact of high-risk behaviors and personal vulnerabilities. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Harm Reduction), p. 12)

The ARNG SHARP Program Office is creating a Mitigation Action Plan to address vulnerabilities within ARNG Commander's Area of Responsibilities IAW, Headquarters, Department of Army Executive Order (HQDA EXORD) 204-16, the Chief of the Army's Policy to reduce sexual assault, sexual harassment, and retaliation incidents.

Within the ANG, new WG/CCs are required to conduct a unit climate assessment within 120 days of assuming command. The EO and Wing SARC, in collaboration, routinely review the results of the assessment prior to briefing the WG/CC. Based on the feedback, the CDR and Wing SARC establish additional training or awareness initiatives to improve conditions within the wing. The EO office also tracks sexual harassment and hazing.

The States routinely use information gathered from URIs, Command Climate Surveys, Commanders Critical Incident Reports, Resiliency and Suicide Prevention Programs, CAIBs, CHPC meetings, high-risk response teams, and police reports of Guard members involved in alcohol related offenses, in addition to the number of sexual harassment reports and data from DSAID. Some specific State initiatives are discussed below.

Arkansas JFHQ-State SAPR Office provided their leadership with a program trends analysis monthly, which included the number of alcohol involved sexual assault offenses. The office also provided a quarterly report on the number of cases reported, to trends, such as an increase or decrease in sexual assaults, and a roll up at the end of the FY.

The **District of Columbia** NG gathered much of its information from regularly scheduled CAIBs and CHPC meetings. In these meetings, they addressed the health of the force and unhealthy behaviors. As negative trends developed, they identified and implemented measures to improve the trends. JCF members also engaged regularly, discussed trends, and sought avenues of support inside and outside of the organization.

The **Kentucky** NG utilized shared messaging from the JFHQ-State SAPR Program, substance abuse program, suicide prevention program, Chaplaincy, BH, and other programs to assess the effectiveness of their programs to minimize risky behaviors taken by their Guard members. This collaborative effort was instrumental in identifying Soldiers engaged in high-risk behaviors, such as substance abuse used as a coping mechanism following a sexual assault, and providing assistance aimed at helping the Guard member recover. Overall, these efforts increased command awareness of coexisting issues, such

as substance abuse, suicidal ideations, and sexual assaults, and reaffirmed the importance of taking a holistic view in assisting the victim.

The **Michigan** NG JFHQ-State SARC conducted trend analyses and shared the information at the CMG and with leadership to help reduce sexual assault cases or situations that may precipitate them within our state. The SARC also monitored sexual assault cases, confer often with the SEEM on harassment cases, and monitored hazing, bullying, and possible retaliation types of activities.

In **Missouri**, under the R2C, the MONG Adjutant General chaired the CHPC meetings to integrate garrison, medical and mission efforts in support of the synchronization of health promotion and risk reduction in their State NG. The SMEs included, but not limited to, LLE, alcohol substance abuse officers, and other civilian local agencies to help identify high-risk behaviors and personal vulnerabilities among ARNG Soldiers.

The **New Jersey** Substance Abuse PM conducted URIs of all of their units. The CDRs, SARC, Resilience Coordinator, and Suicide Prevention PM received this information to develop a mitigation plan for high-risk behaviors. Collectively, the group analyzed the trends and presented the results at the CHPC.

In the **New York** NG, cross-collaboration of the State Wellness committee and key stakeholders did not formalize metrics or measures, but started to map incident locations and timeframes to target high risk locations, populations and times of the year for increased command influence on prevention efforts specific to sexual assault incidents and suicide

The **Vermont** NG JFHQ-State SARC participated in the High-Risk Case Management meeting chaired by the Deputy G1, used to discuss trends and to develop mitigation plans.

1.11 Education and Training: Describe efforts to address sexual assault prevention in your organization by educating Service members on healthy relationships. Describe any training, particularly training that focuses on changing skills, attitudes, and behaviors, to encourage Service members to take part in healthy relationships. Describe any increases in complexity or depth of training on healthy relationships over the course of a Service member's career." (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Education and Training), p. 12)

The NGB-J1-SAPR Office developed 40-hour initial SARC and SAPR VA training contains a specific lesson on "Healthy Relationships." Information from this lesson was used during briefings and training conducted at the unit level. Additionally, information garnered by NG SARCS and SAPR VAs from their Service-specific initial SHARP or SAPR training was used Guard training events.

The ARNG SHARP Staff conducted 10 monthly SHARP trainings at Arlington Hall Station for 987 Soldiers and Department of the Army Civilians meeting the Army annual refresher

training requirements. The ARNG published the ARNG SHARP Implementation Guidance, dated 31 May 2016, signed by the DARNG. This memorandum established T32 training guidance, and outlined the responsibilities and requirements for the SHARP program within the ARNG.

In addition to presenting the specified training as designated by their Service to meet the 2016 Annual SAPR training requirement, some states provided additional training or information to augment the required training. Identified below are some of these activities.

Arkansas JFHQ-State SAPR Office used videos on empathy and consent to augment their training to improve the current knowledge base of their Service members. The **Connecticut** JFHQ-State VAC led training for ARNG RSP, “Battle Hand-Off” to 282 Soldiers. The training followed-up on SHARP trainings received prior to basic and at basic training. The intent of the monthly training was to ensure sexual assault myths were debunked and misunderstandings clarified for new recruits. These interactive trainings included the VAC actively asking Soldiers to answer policy or definitions of terms to allow for correction. The **Delaware** NG used the Strong Bonds program and FAPs to augment training, as well as classes presented at Dover AFB on family and parenting. This information was funneled through the Chaplain and Director of BH to address trends identified. **Massachusetts** NG also used multiple “Strong Bonds” training for single Soldiers.

The **Kansas** NG prided itself and creating training that is both informative and interesting, and customized to the specific audience. This type of tailored training proved effective based on the unit’s enthusiasm when it comes to SHARP training. More Soldiers talked about the material trained long after the briefing because of the selected focus for each group. The focus in the KSNG was on training the individual on becoming “Agents of Change” and creating a culture that does not tolerate sexual assault. They also stressed the importance of everyone being an active bystander, and empowering Service members with the tools and knowledge needed to defuse possible assaults or inappropriate behavior from taking place. The **Kentucky** NG partnered with The One Love Foundation to use their “Escalation of Force” workshop in our RSP targeted their most at risk population in the KYNG for sexual assaults and other violence. The “Escalation of Force” workshop helped Service members identify different attitudes and behaviors that are signs of an unhealthy relationship. It also gave them the tools to intervene at different stages so they could develop healthy and supporting relationships instead. The KYNG Recruiters are working to bring this workshop to education facilities around the state. This innovative program won the DoD 2016 Sexual Assault Prevention Innovative Program Award within the NG.

Michigan NG JFHQ-State SARC conducted training at the Recruit Sustainment Battalion as a basis for all new Service members. As requested, the SARC provided training for ROTC units. The JFHQ-State SAPR Office strived to provide more in depth or varied training to engage the changing roles of the recruits as they progress in their careers. The JFHQ-State SARC used group sessions and question and answer sessions during the training, but also included new video or materials to present information on newer topics, such as bullying and hazing or transgender advocacy. The new 1SG/CDR briefing was

changed to offer new material, less power point, more interaction, and questions to engage their thought process as developing leaders.

Minnesota NG JFHQ-State SAPR Office invited Russell Strand and Roger Canaff to speak to their State Senior leadership. The topics included sexual assault trauma, roles in responding and establishing culture change, behaviors of survivors, mitigating sexual assault. Mr. Strand spoke to approximately 500 members of the Army and Air Guard community for approximately 3 hours regarding culture change in the military. The State also brought in “Sex Signals” and “Catharsis” to train their RSP units, and Recruiting and Retention BDE leadership. “Male Survivor” conducted 3 separate 8-hour training sessions on male survivors; the MN Bureau of Criminal Apprehension (BCA) conducted training on DFSAs) and DNA processing, our local civilian SANE coordinator conducted training, as did the Ramsey County Attorney and lead champion in changing sex trafficking laws. The MN NG also had their allies from the Battered Women’s Legal Advocacy Project conduct three separate 4-hour training events on stalking. This training was more complex and built on the skills and knowledge of our Service members. Certified SAPR VAs conducted the 2-hour annual in person sexual assault training. The training presented in FY16 focused on drug-facilitated assaults and MN specific information relating to DFSAs, sex trafficking and MN specific metrics, sexting, consent, and male survivors. These topics were in addition to reporting options, reporting processes, roles of victim advocates, and other pertinent SAPR information. The MNNG yearly SAPR training progressively gets more in depth to provide relevant and fresh information to their Service members.

Nebraska NG JFHQ-State SAPR Office created their own specific SHARP/SAPR training and tailored the discussed based on the audience. They used videos on consent, bystander intervention, victim blaming, and others to bring home realistic and in some ways humorous approach to a serious subject. The NENG JFHQ-State SAPR team experienced opened lines of communication and discussion within the units and their Service members. The training also included **Nebraska** specific information to increase the relevancy of the training for their Service members in a civilian community.

For FY16, **New Mexico** NG JFHQ-State SAPR Office presented the SHARP curriculum at each unit. After each training event, the SAPR personnel conducted small group after action reviews with specific ranks to determine training for FY17. Based on the feedback received, the NMNG SAPR team presented 3-5 minute public service announcements (PSAs) on SHARP related topics and DV for Soldiers and Airmen to watch during drill for extra training.

The **Tennessee** NG JFHQ-State SARC invested time with all TNNG SAPR VAs throughout FY16 to discuss effective and valuable training for Soldiers and Airmen at different points along their career. The TNNG SAPR team made considerable effort to develop training appropriate for each level of Service member based on their knowledge, experience, and previous SAPR training. They integrated multiple video resources, such as the “Tea Consent” Video, “James is Dead,” and scenario based videos into the training. Video messaging included dispelling victim-blaming attitudes and bystander intervention’s

role in changing the course of events, all of which were intended to spark discussion and improve understanding.

Vermont NG JFHQ-State SAPR team used vignette based trainings and the screening of “*The Mask We Live In*” documentary. In FY16, the survivor testimony videos were male survivor focused. The VTNG JFHQ-State SAPR team is currently working on creating a multi-year curriculum designed to tie the readiness of units for sexual violence prevention to their ready years based on Army Force Generation cycles.

The **Maine** ARNG is in the developmental stages of adjusting annual refresher training provided to units according to demographics. They provided separate training to junior and to senior Service members at the request of the units, with focus on different pieces of the same basic training material. Because of the wide diversity of units, personnel and locations, tailoring the training to each specific demographic presented challenges. The SAPR team selected and adjusted the most relevant information to the age and experience of the audience. In the future, the MENG SME’s will review URIs and command climate assessments on a regular basis, and actively engage the command to create plans to improve the unit climate and change culture.

1.12 Program Metrics: Describe the metrics used to assess your Military Service Sexual Assault Prevention program. Where appropriate, align the metrics with the 2014-2016 DoD Prevention Strategy elements. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 6 (Prevention Metrics, Assessment, and Research), p. 13)

The NG primarily used the following surveys and database information to help assess aspects of the NG SAPR Prevention Program:

- Workplace Gender Relations Survey of the Reserve Components (WGRR), 2012 and 2015.
 - Prevalence of unwanted sexual contact.
- Defense Sexual Assault Incident Database
 - Prevalence versus reporting
- Department of Defense Equal Opportunity Management Institute Organizational Climate Survey address the SAPR Command Climate index in areas of:
 - Chain of Command Support
 - Perception of Safety
 - Reporting Climate (Barriers to Reporting)
 - Prevention Climate & Bystander intervention experience in past 12 months

1.13 Prevention Allocation of Time: As a result of ongoing SAPR related surveys, describe your approved initiatives to assist SAPR professionals improve prevention training. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 6 (Prevention Metrics, Assessment, and Research), p. 13)

The ARNG and ANG Program Offices will continue to promote the adherence to their Service-specific training guidance. Additional initiatives within the States include the following:

Arkansas NG JFHQ-State SARC will provide SAPR VAs slide decks that address the risks identified in the surveys to assist the CDR in providing SHARP training.

Of the annual SHARP training presented by the **Colorado** ARNG, 50% or more will consist of prevention training. The COANG Wing SARC will follow the annual sexual assault training guidance provided by HAF.

The **District of Columbia** NG took a proactive role in prevention of sexual assaults in FY16. The focus shifted to primary prevention, which refocused efforts to integrate healthy relationship and teams into multiple programs. JCF, comprehensive Soldier and family fitness, Strong bonds, and Ready and Resilient campaigns were integral parts of the primary prevention program. The SARC made every effort to inject SAPR themes into existing education programs.

Indiana NG JFHQ-State SAPR Office conducted train the trainer classes with their SAPR VAs during their CET event. This approach to the training was to help the SAPR VA feel more comfortable with the material; provide them the confidence to field additional questions, and to ensure their proficiency in mastering the content. The end-result is improved presentation of all pertinent material, in a professional and confident manner.

The **Kentucky** NG JFHQ-State SAPR Office developed training for use in FY17. This training package includes prevention efforts, and targeted training and guidance to address specific issues identified as systemic problems in the KYNG during review of unit DEOCS reports. This training will assist CDRs develop command climates that support Soldiers' ability to intervene when they see incidents of sexual harassment, sexual assaults, or the other derisive behaviors. The small group discussion format of the training will allow Soldiers at all levels the opportunity to speak about specifics affecting them, and to learn from each other about bystander intervention techniques already used successfully. It will also help the Soldiers develop a better understanding of how sexual assaults affect the victim, those around them, and the unit as a whole.

The **Nebraska** NG JFHQ-State SAPR Office will continue to send out invitations to events sponsored by their civilian counterparts as part of the ever-changing world of advocacy and support. The NENG SAPR team recognizes their gain in knowledge from their civilian counterparts, and identifies the topics, tactics, and information presented in schools and within the communities, and ties them in to the CDR led training events. The use of realistic and state-specific information draws in the NENG Soldiers more so than the

overly broad approach used in previous training events. The NENG SAPR team also provided real life examples to emphasize the accountability and judicial processing of Soldiers who commit such crimes.

Based on the positive feedback received from their leadership and Soldiers on prevention training, the **New Jersey** NG JFHQ-State SAPR Office will continue to avoid using PowerPoint presentations and will use real life examples for better feedback from the Soldiers. **West Virginia** SAPR professionals are also avoiding PowerPoint presentations in favor of more dialog with the audience.

The **New Mexico** NG JFHQ-State SAPR office developed training that all SAPR VAs use specifically for sexual assault primary prevention efforts. Their SHARP training is geared towards changing the culture and getting back to Army Values of respecting one another.

Puerto Rico SAPR professionals improved their prevention training by implementing the directive to conduct briefings with no more than 100 Soldiers. This initiative came about because of feedback from the troops indicating that the message is lost when the class size is greater than 100. The PRNG JFHQ-State SAPR team added more videos and images to their training. This helps the Soldiers relate better with the message and helps them the process better when faced with the opportunity to intervene.

The SAPR team will conduct more unit visits to help market their program and the services they can provide. Many Soldiers were still unaware of the SAPR program, its purpose, POCs in the event of a sexual assault. The PRNG JFHQ-State SAPR team will provide a compact disc with all regulations, current All Army Activities, and other documents and templates to the CDR during the unit visits. These resources will help the CDR comply with the regulations and directives. During these visits, the SAPR team will also discuss the importance of the program and promote the recruitment of new SAPR VAs. The team will post JFHQ-State SARC point of contact information and photo on the bulletin board as a resource for all unit personnel.

In **Vermont**, feedback on SAPR training conducted at the unit level was continually incorporated into revised training packages. This process occurred primarily through direct conversation rather than a formalized tracking process.

Washington NG JFHQ-State SAPR Office spent approximately 25% of training time allotted on reviewing the basics, Restricted vs Unrestricted, who to report to, and program overview. The remainder of the training time focused on prevention, smart decision making, supporting survivors, and other items.

1.14 Future Efforts: Describe your future plans for delivering consistent and effective prevention methods and programs, including how these efforts will help your Military Service strategies, enable resourcing, and make progress in your overall SAPR program.

The CNGB will continue to stress the importance of the many elements within the NG SAPR program, but specifically the prevention of sexual assault within the Guard. The GSLCs, GSLUs, CNGB issuances, and other forms of messaging will remain the focal point for disseminating information to the States. The NGB-J1-SAPR Program Office will support the CNGB by continuing to assess the relevancy of DoD SAPR programs to Title 32 Guard members. As necessary, the SAPR office will prepare policy and procedures to assist TAGs, senior leaders, and SAPR personnel within the States support their State Guard members.

The ARNG SHARP Program Office is creating an ARNG Mitigation Action Plan to address vulnerabilities within ARNG CDR's Area of Responsibilities IAW the Chief of the Army's Policy to reduce sexual assault, sexual harassment, and retaliation incidents.

The ANG SAPR Program Office follows Service-specific training requirements. Headquarters, Air Force rolled out a three-phase prevention strategy in meeting DoD requirements. The focus for implementing phase 1 of the 5-year prevention strategy is attitude, norm, and environmental change. The method for training is Green Dot. The focus for implementing phase 2 of the prevention strategy includes individual risk factors. For example, substance abuse, emotional regulation, and peer pressure are targeted activates for high risk sub groups. The focus for implementing phase 3 of the prevention strategy is relationship risk factors. For example, casual sex, relationship conflict, and gender-based attitudes are topics of discussion.

JFHQ-State SAPR Offices within the States will:

Alabama - Use Small group format for SHARP AT instead of large lecture forum and will collaborate with Family Readiness during SAAPM for Beer Goggles game.

Arizona - Continue to deliver consistent effective dialogue with troops to get them involved in the training versus PowerPoint presentations. Include more scenarios and role-playing into the training, and allow additional time to receive feedback from the troops on how the SAPR program can improve.

Colorado - Improve the implementation of SHARP/SARC training and education, specifically as it applies to male victimization, first-line supervisor responsibilities, the retaliation reporting process, and applicability to the non-federalized force.

Connecticut - Work on updating and publicizing TAG Alcohol Policy and the recognition program for SAPR VAs.

Hawaii - Engage "Men and Boys" collaboration with State Department of Health. Provide statewide training to include geographically isolated regions, previously underserved, targeting Service members within 1 year of assignment to first unit of assignment and leadership. Conduct targeted training towards units identified with high rates of sexual harassment from URI surveys. Conduct Initial HIANG Volunteer VA training to certify additional Volunteer VAs. Establish additional coordination and collaboration with

geographically isolated civilian support resources. Execute Joint SARC Victim Advocate Training Summit collaborating with active duty branches to provide CET to SAPR VAs from all branches of military assigned to the state.

Indiana - Introduce new interactive AT for FY17. Continue to provide train the trainer block of instruction to SAPR VAs. Implement reporting requirements for Commands to report training numbers to TAG. Disseminate Command message at various training events (CDR/1SG, Yellow Ribbon briefs, quarterly updates to MACOM CDRs, Senior Leader Conference, etc.). Add SAPR related prevention topics to IG inspection topics, and formalize them into Commander's Inspection Program/Organizational Inspection Program guidance.

Kansas - Empower the individuals to become Agents of Change and Active Bystanders, by fostering a culture that will continue to grow itself through active involvement and an eagerness for doing the right thing. **Kansas** is working with all of its units in understanding that everyone has a voice and the power to change a potentially bad situation, regardless of their rank.

Continue NG JFHQ-State SARC and VAC regular visits out to units for visibility and accessibility. These units will include RSP sites, to teach KS Guard members from the start that sexual assault is not a behavior condoned within their ranks. It is through this type of interaction they hope to foster a relationship of trust with all members and breakdown the fears that might come with reporting a case, or trying to stop and assault from happening.

Work with various agencies in their local communities as they might relate to SAPR and provide this information to the Soldiers. It is the hope that if a Service member does not feel comfortable coming to the KSNG SAPR team directly, they can still seek out the help they need within the community. Additionally, if these community agencies receive one of our Guard members as a client, they will know they can send their clients to the KSNG SAPR team for additional assistance.

Kentucky - Use the training developed for FY17 to increase knowledge and awareness of the SAPR/SHARP program and services offered, and to encourage increased bystander intervention to reduce sexual violence in all its forms in the KYNG.

Continue to use the part-time SARC brought on to assist CDRs during drill weekend in conducting their SHARP training. Having a subject matter expert provide the training will increase knowledge in the unit and bystander intervention efforts, by being able to provide best practices and new techniques that may be unknown to those that have historically conducted this type of training.

Maryland - Utilize civilian providers to provide quality training. Establish relationships with organizations such as NOVA, MD CASA, Office for Victims of Crime Training and Technical Assistance Center, in order to develop consistent and effective training programs to improve prevention efforts

New Jersey ARNG - Standardize the SHARP training for all units and build the program by providing resources to the units (such as bulletin boards, pictures of SARC & Victim Advocates). Emphasize that this is a CDR's program in which the leadership needs to be heavily involved.

New Jersey ANG - Follow a directed curriculum for prevention training, but seek to include more community involvement and partnerships with co-located units.

New Mexico - Work on PSAs that involve SHARP related issues, alcohol and drug abuse, suicide prevention and resources available for each that will be available on our SHAREPOINT, Facebook, and NMNG YouTube channel.

New York - Establish and implement State SHARP Mitigation Action Plan to measure effectiveness of prevention efforts. Continue to analyze and monitor the plan in reducing sexual assault incidents throughout FY 17. Continue efforts of State Wellness Committee to establish metrics for reporting to CHPC and CAIB. Establish and implement Installation Advisory Board to align with Air Force Sexual Assault Prevention Strategy 5-year development plan requirements into the Community Action Information Board.

New York 174th AW - Focus on ensuring that all 174th AW personnel are knowledgeable in the reporting process and the difference between Restricted and Unrestricted Reporting Options. Initiate a monthly refresher program for Volunteer VAs. Initiate a Bystander Intervention Program. Conduct a clothing drive twice annually to provide clothing to the rape crisis center. Contact the Title IX representative at Syracuse University to discuss having the 174th AW Volunteer VA set up an information table and provide briefings to students on the prevention of sexual assault.

Nebraska, Oklahoma, & West Virginia - Maintain training as a commander responsibility as a top down approach to emphasize to the unit the commands focus on preventing sexual assault and seriousness of the topic, and to foster trust and respect.

Oregon - Ensure Defense –Sexual Assault Advocate Certification Program (D-SAACP) certified SAPR VAs and SARCs receive their CET requirements by sending them to relevant sexual prevention trainings and conferences

Pennsylvania - Provide consistent, training to ensure people become comfortable with interacting with the SHARP Team, and to reinforce the reporting options and resources available through the SAPR office and community contacts. Continue to bring in outside subject matter experts to help identify the prevalence of sexual assault inside and outside the confines of the military making the program more relevant at home and at work.

Puerto Rico - Empower and enforce key leaders to integrate SHARP into daily safety briefings and planning, such as risk assessments of events, training and Morale, Welfare, and Recreation activities. Integrate SHARP visual aids at all Community Clubs or other venues where alcohol is served and consumed, and require a SHARP prevention plan on

all requests for exemption to Alcohol Consumption Policy. Identify units integrating female Soldiers into their ranks and educate leaders to ensure they are treated with respect and equality. Issue all policies with clear, concise instructions, and realistic and achievable actions for those who violate them. Speed up and facilitate the process of cases. Implement quarterly or biannual surveys of troops on SHARP issues and conduct a SHARP assessment in conjunction with Physical Health Assessment.

South Dakota – Implement Mitigation plan. Integrate newly hired SARC fully into the SAPR program.

Tennessee - Address Senior Leaders at the State, BDE, and wing levels at the annual Senior Leaders' Dialogue in FY17 to discuss reporting trends, investigations, quality training, and CDR's responsibilities.

Vermont – Continue toward achieving five primary goals of the VTNG task force to “Employ a multidisciplinary approach in prevention, response, accountability, stakeholder knowledge, advocacy and recovery and assessment to prevent all types of violence and enhance our response.” 1) Establish a climate of prevention to promote an environment of dignity and respect while preventing violence within the organization. 2) Improve the response to enhance trust in the chain of command, increase reporting and reduce the occurrence of survivors feeling ostracized. 3) Improve system accountability to provide a fair and equitable system to promote justice, efficiency, and effectiveness. 4) Focus on advocacy and recovery of survivors from the initial reporting through their recovery to deliver effective support and response, instill confidence and trust, strengthen resilience, and inspire survivors. 5) Develop and implement assessment mechanisms to standardize, measure, analyze, assess and report program progress.

Demonstrate sustained engagement and resolve to eliminate sexual assault within the VTNG by promoting senior leadership involvement in SAPR programs, fostering collaboration among the VTNG and civilian stakeholders and implementing primary prevention education into all SAPR/SHARP training blocks. Moreover, the VTNG will continue to reach out to survivors of sexual assault, civilian advocacy groups, and veterans' organizations to inform them of SAPR program progress and gain their feedback.

2. LOE 2—Investigation—The objective of investigation is to “achieve high competence in the investigation of sexual assault.”

2.1 Summarize your efforts to achieve the Investigation Endstate: “investigative resources yield timely and accurate results.” (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

The NG does not operate a military criminal investigative organization (MCIO) under 32 U.S.C. The investigative jurisdiction for most non-federalized Guard members falls upon the State Police or LLE. However, when jurisdiction of the sexual assault falls outside the MCIO and State Police or LLE declines to investigate the sexual assault, or does not investigate the sexual assault sufficiently, TAGs will request assistance from the NGB-

JA/OCI under the NGB Chief Counsel to investigate the incident. CNGB policy directs CDRs to refer all Unrestricted Reports of sexual assault to the appropriate MCIO, State Police, LLE, or to NGB-JA/OCI.

The NGB-JA/OCI received 105 requests for investigations from TAGs in FY16. Of those 105 requests, 73 cases were completed and 32 are still under investigation. The OCI teams consider all evidence and apply the administrative and civil standard of preponderance of the evidence to the case. The report of investigation goes through multiple levels of internal review before finalization.

Of the total cases completed during FY16, there were 44% of substantiated cases and 56% of the cases unsubstantiated. The average number of days from the date the state requested an investigation to the date the team traveled to the state was 96 days for FY16 cases; the average number of days from the date the team traveled to completion of the OCI Report of Investigation was 79 days.

Some states took additional efforts to ensure the investigative process was timely and produced accurate results.

Colorado and **Indiana** both assigned a competent POC or Liaison Officer to assist in each investigation. The **Colorado Liaison Officer** ensured all members involved in the investigations were available and scheduled for their interviews to expedite the investigation process. The **Indiana TAG** appointed POC is a state JAG to liaise with OCI, SVC, and Trial Defense Services (TDS) for all Unrestricted sexual assault investigations. This officer ensured all requests, meetings, findings, and other requirements of the case were set, actioned, and monitored. The **Indiana TAG**, Director of Joint Staff (DJS), and JAG reviewed the results of all cases investigated by OCI for further disposition. If substantiated, the reviewers rendered a decision whether the final disposition of the case occurred at the State level or given to the first O6 CDR for further disposition. If unsubstantiated, the reviewers examined the case for any collateral misconduct associated with the sexual assault report and discussed the appropriate resolution or disposition if warranted.

The **North Carolina** NG SAPR/SHARP office along with the NCNG SJA and J1/G1 offices collaborated to establish an updated protocol and timeline of investigation for all Unrestricted sexual assault reports. This group effort established the proper contact of State Police or LLE for jurisdictional precedence, a timeline of the State Police or LLE's response or declination to investigate, and TAG's request for NGB-JA/OCI assistance. This has improved the response time, investigation timeframe, and feedback to survivors, as well as command notification and participation for cases

The **Hawaii** SAPR team and leadership maintained ongoing open communication with State Police or LLE and prosecutor's office to build upon their relationship of mutual trust and professional respect. The **Indiana** ANG 181st Wing SARC developed a close working relationship with the new Office of Special Investigations (OSI) agents out of Wright-Patterson Air Force Base. OSI had a greater presence on their base than ever before and

was a great resource for investigative information. **Nevada** and **South Carolina** each capitalized on traditional Guard members who serve as FT law enforcement officers to established working relationships with their LLE agencies. **Vermont** NG took it a step further by establishing a memorandum of understanding with LLE agencies, State Police, and Special Investigative Units. The MOU outlines the sharing of investigative information, such as affidavits, with the consent of the Survivor in order to minimize re-traumatization.

2.2 Provide an update on the expansion efforts for the Special Victim Investigation and Prosecution Capability for MCIOs, to include how Congressional plus-up funding was spent to directly support this program. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 2, #1, p. 6 / DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 2, para 6ac)

The NG does not have an MCIO and relies on the Office of Complex Administrative Investigations to investigate a sexual assault that MCIO or State Police and LLE lack jurisdiction to investigate. In F16, NGB-JA/OCI received 3 million dollars of the 25 million Congressional plus up. The Congressional funding allowed the NG to continue to operate the OCI. Specifically, the funding paid the military pay, training, and travel cost for 25 FT investigators and headquarters staff, who traveled across the States investigating reports of sexual assault. Without this funding, many NG allegations of sexual assault may have gone uninvestigated.

2.3 Describe your progress in enhancing training focusing on special techniques for victim interviewing by investigators of sexual violence. Include efforts to establish common criteria, core competencies, and measures of effectiveness, and to leverage training resources and expertise. (DoDD 5505.19, Establishment of Special Victim Investigation and Prosecution Capability within MCIOs (4 Sep 15), para 3g / DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 2, #3, p. 6)

All newly assigned NGB-JA/OCI investigators attended required training prior to operating in the field to investigate a case. New employee training for the investigators included investigative procedures, and the report writing process. The other course required prior to case assignment is the Army CID Special Victims Capability Course.

Each written report underwent a review process to help evaluate the effectiveness of the training. The process required all reports to go through multiple levels of review before final issuance. Annual refresher training is mandatory for all active investigators, which included special techniques and areas of concern raised during the report review process. In addition to the report review process, NGB-JA/OCI uses multiple metrics, such as the time required to complete each step of the process, and investigator efficiency and accuracy, to evaluate the effectiveness of the training.

Recognizing that the majority of sexual assaults reported by NG members are investigated by State Police or LLE, the **Iowa** NG expanded their 40-year relationship with the **Iowa** Law Enforcement Academy (ILEA) to include SAPR training. For the past three years, members of the IANG SAPR team provided training on how to conduct a victim interview as part of a sexual assault investigation. ILEA students must conduct a victim of sexual assault interview as part of their final grade. The IANG JFHQ-State VAC role played as the sexual assault victim based on several scenario-driven victims provided by the ILEA commandant. Each interview lasted between 45 minutes to two hours. One of the key focal points of the training was to help educate potential officers on how to avoid re-victimizing the victim during the interview. Classes run on a quarterly basis and consist of approximately six interviews per class.

2.4 Provide an update on your participation in the Defense Enterprise Working Group of Military Criminal Investigation Organizations and Defense Criminal Investigative Service to assess and validate joint investigative technology, best practices, and resource efficiencies benched against external law enforcement agencies. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 2, #4, p. 6)

Not applicable - As a T32 entity without MCIOs, the NG has no experience with the Defense Enterprise Working Group of Military Criminal Investigation Organizations and Defense Criminal Investigative Services.

2.5 Describe your progress in assessing and coordinating with the United States Army Criminal Investigation Laboratory and Armed Forces Institute of Pathology to improve investigative support and facilitate evidence processing (i.e., turnaround time for processing of SAFE kits). (Joint Chiefs of Staff Strategic Direction to the Joint Force on SAPR (7 May 12), p. 11)

Not applicable – A civilian medical facility, rape crisis center, or other civilian medical asset typically completes the collection of forensic evidence of a sexual assault using a SAFE Kit or civilian equivalent, if available. The laboratory processing the evidence will vary from state-to-state. Each state NG SAPR program attempts to develop MOUs or MOAs with agencies and organizations to serve as a resource for Guard members who make a sexual assault report.

The ARNG SHARP Program encourages the JFHQ SARCs to develop MOUs or MOAs with local agencies and organizations.

The **North Carolina** NG SAPR/SHARP Office developed a close relationship with the State Bureau of Investigation Crime Lab director, a NCNG member and current General Officer Chair of the State's CMG. This association has provided information on increased productivity to process SAFE kits within NC and improved collaborations with the Crime Lab, local coalitions, and programs.

2.6 Describe your efforts to increase collaboration and improve interoperability with civilian law enforcement to include sharing information on Civilian and Military Protective Orders and assure receipt of civilian case dispositions. (DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 4, para 3g)

NGB-JA/OCI investigators collaborated with State Police or LLE in each sexual assault case to obtain their investigative reports and to consult with the officers as needed. New evidence uncovered by NGB-JA/OCI investigators or their case report, occasionally resulted in State Police or LLE reopening cases.

The States' Office of SJA maintain open communication with LLE, State Police and district attorney's offices. They routinely share products of investigations when relevant to hold the subject appropriately accountable. States who recognized special relationships with their State Police and LLE include:

Illinois NG established an MOU with the IL State Police to investigate all sexual assault that happen on NG military installations. The ILNG JAG works directly with the State Police on these cases.

The **Kentucky** NG SJA works with Commonwealth Attorney offices around the state to ensure command receipt of civilian case dispositions involving KYNG Service members. These case dispositions allow the command to develop an accurate response based on the guidance from the SJA and actions that have taken place in the civilian judicial system. The SJA also worked with State Police and LLE agencies around the state to increase quality investigations of sexual assaults reported by KYNG Service members or Family Members and increased use of civilian protective orders (CPOs), emergency protective orders, DV orders, and other types of protective orders.

West Virginia SAPR team worked closely with the WV State Police and many county police departments, such as the Kanawha County Police Department, to ensure consideration of victims' cases for investigation. **Virginia** also has a closely working relationship with the VA State Police to investigate sexual assault cases involving Guard members.

Similar to **Indiana** NG's appointment of a state JAG as a specific POC to help communication efforts with State Police and LLE, the **Texas** National Guard SJA Office secured Active Duty Operational Support (ADOS) personnel support in FY16 to increase communication with State Police and LLE agencies in order to improve the investigation process and timeline. Additionally, the TXNG received a grant to fund a civilian SAPR support specialist. These staff augmentations led to increased communication and response with State Police and LLE when requesting case numbers and disposition. Training provided to law enforcement agencies also helped them understand the processes within the DoD, the challenges, and how best to support each other.

New Mexico worked to build a closer relationship with State Police and LLE and looks forward to establishing MOUs in the future. **New York** SAPR team collaboration with NY State Police and local SARTs increased awareness of Guard specific needs in relation to investigative requirements. A future endeavor is to collaborate with NY State Police to provide oversight and support to LLE investigation of NG incidents of sexual assault.

The State's CMJ determines the authority to issue a military protective order (MPO) within each state, as applicable. To issue an MPO, the CDR coordinates with the state SJA to determine the legal possibility. The CDR issuing the MPO reports it to the State Police or LLE agency with jurisdiction. However, State Police and LLE do not have the authority to enforce an MPO. The most prevalent protective order issued within the NG is the CPO, since most Guard members reside within the community and not on a military installation.

2.7 Describe your efforts in providing training and guidance for all first responders to a report of a sexual assault that ensures the preservation of evidence and witness testimony. Also, describe the training and guidance specifically provided to law enforcement on victim trauma and the requirement that only the MCIO shall conduct the formal victim interview. Describe any additional training and guidance provided for locations where the arrival of the MCIO will be delayed (e.g., due to mission requirements or a submarine cannot surface for a week). Address how this training and guidance assists law enforcement and commanders in responding appropriately to reports of sexual assaults in these locations. (DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 10, para 7e)

The ARNG SHARP and ANG SAPR Programs do not provide training for first responders, but relies on the functional community to follow training guidance and core competencies. Since the majority of Guard member sexual assaults fall under State Police or LLE jurisdiction and use civilian healthcare providers, the civilian organizations determine the training received by their personnel.

However, some states do provide training to some of their first responders. The **Illinois** NG invited a detective, who investigates sexual assaults, and a SANE Nurse to talk to Guard members at their 16-hour CET class, on the importance of preserving evidence and witness testimony. The **Indiana** TAG disseminated policy that all INNG members will call the SARC immediately with any report of a sexual assault. Trained in preserving evidence and in providing trauma support to the victim, the SARC serves to ensure the victim receives the appropriate care. The **Kentucky** NG SAPR Office partnered with the KY Department of Criminal Justice to help educate law enforcement and prosecutors around the state about the NG SAPR program and ways they can assist in investigations of sexual assaults involving Service members. The training explained the purpose of KYNG SAPR program, the services they provide, and how CDRs can assist in ensuring the accused is available for investigations and prosecutions by flagging the individuals' Service records. The SAPR team also explained the options available to victims of sexual assault and their dependents through the SAPR program. This training increased KY

State Police and LLE awareness of the KYNG SAPR program and improved outreach on investigations initiated by State Police or LLE involving KYNG Service members.

The **Massachusetts** NG JFHQ-State SARC conducted multiple trainings across the state, to include State Police and LLE, Title IX representatives, and the local NG representatives. In **Michigan**, the NG JFHQ-State SARC invited an attorney, who specializes in sexual assault cases, and a detective who handles sexual assault cases and homicides in Detroit, to present in the CET for SAPR VAs. They discussed evidence protection and the importance of the first person's initial response when speaking to the sexual assault survivor. The significance is both from the case perspective and effect of the trauma based training and response on the victim's recovery. Michigan State Police or LLE most often conducts investigations on sexual assaults involving Guard members. The Michigan State Police has a special team to respond to sexual assault incidents and conduct interviews regarding the incident. **New York** NG collaborates with Rensselaer County SART, specifically their SANE, to train local first responders on care and handling of sexual assault victims and evidence collection procedures. The **Ohio** JFHQ-State SAPR Office, NG JFHQ-State SARC and SAPR VAs attended the Forensic Experiential Trauma Interview course and End Violence Against Women International conference in FY16. The attendees then used this information gathered from the training and conference in the local refresher training of their first responders (SAPR VAs) and in their leader courses. The **Ohio** JFHQ-State SAPR Office and the State SJA communicated on a frequent basis to ensure the judicial realm pursued the cases quickly and efficiently. Additionally, this close relationship between the OHNG JFHQ-State SAPR Office and SJA safeguards the victims and subjects' rights to a fair and just investigation. The NG JFHQ-State SARC works with newly appointed SVC to establish communications and processes for protecting victims.

Oklahoma and **West Virginia** SAPR teams each briefed the investigation process to CDRs, to include their responsibility in safeguarding both parties during an investigation. The training stressed the importance for the CDRs to remain objective and to provide support to the investigation, as required. **Puerto Rico** NG JFHQ-State SAPR Office helped to coordinate specialized training on victim advocacy, sexual assault ethics, law enforcement processes, evidence collection and investigation, the legal system and trial preparation, DNA analysis with ethics, and SAFE Training during SAAPM in FY15 and FY16. This training was available to all leaders and SAPR VAs. The **Texas** NG JFHQ-State SAPR team provided training on trauma-informed care to TXNG SAPR VAs and leaders through collaboration with the **Texas** Association Against Sexual Assault, **Texas** Advocacy Project, and University of **Texas**-Institute on Domestic Violence and Sexual Assault. The SAPR team connected with their civilian partners to capitalize on their long use of best practice training models and curriculum with first responders and to collaborate with them to provide training to law enforcement and military first responders. **Washington** NG JFHQ-State SAPR team provided the 24/7 SARC phone to all command elements along with instructions to call the number immediately in the event of a report of sexual assault. All leader training included the importance of caring for the victim (medical and mental health care) and notifying the SARC for assistance. Medical Command

personnel received training on addressing the immediate needs of reporting survivors and obtaining assistance from the SAPR VA and SARC.

2.8 Describe your future plans for the achievement of high competence in the investigation of reports of sexual assault by MCIOs.

As previously addressed, in almost all cases, MCIOs do not have jurisdiction over NG members in a T32 status. To address this gap and ensure quality administrative investigations, all NGB-JA/OCI investigators will continue to adhere to the following requirements:

- All NGB-JA/OCI investigators must complete the Army CID Special Victims Capability Course before assignment to a case with a seasoned investigator.
- All investigators must undergo new investigator training, which covers OCI-specific investigative procedures, including the Report of Investigation (ROI) report writing process.

After initial training and assignment to NGB-JA/OCI, all active investigators must complete an annual multi-disciplinary 40-hour refresher training. To ensure consistency and legal sufficiency, all OCI ROIs undergo multiple levels of review before final issuance to the State. OCI also tracks the time required for each phase of the investigative process, as well as investigator efficiency and accuracy.

Several of the states describe their plans to achieve high competence in the investigation of sexual assault reports:

Florida NG reached out to the FL Chiefs and Sheriffs Association to formulate an MOI for notification of the FLNG JFHQ-State in the event of the arrest of or charge against a FLNG Service member on a sex crime.

Louisiana NG JFHQ-State SAPR Office plans to implement prosecution record tracking and to report the information in Quarterly “Staying SHARP” newsletter or on Facebook page with a goal of recognizing prosecutors and District Attorneys with an 85% or higher sexual assault prosecution rate in their districts.

New York State Police developed a Special Campus Sexual Assault Victims Unit to reduce the incidence of and facilitate the reporting of sexual assault, dating violence, DV, and stalking on college and university campuses. To accomplish this goal, the unit implemented a prevention education campaign, a response-training program, and provided support and assistance to students, faculty and staff, university police, campus safety, LLE, and VAs. The NYNG JFHQ-State SARC presented the idea to include NG victims of sexual assault in this effort at a community SART meeting. The rationale was that parallel challenges with reporting and investigation of sexual assaults exists between the NG community and the college campus community. In addition, the ANG 106th RQW is planning to invite law enforcement agencies to be a part of all CMGs and to provide training. Their Wing SARC is looking forward to attending local community working groups.

3. LOE 3—Accountability—The objective of accountability is to “achieve high competence in holding offenders appropriately accountable.”

3.1 Summarize your efforts to achieve the Accountability Endstate: “perpetrators are held appropriately accountable.” (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

The Soldiers and Airmen of the NG are subject to the UCMJ only when serving in a federal active-duty status. Non-federalized Guard members fall under the jurisdiction of the individual states for military justice action or disciplinary measures. Each state has its own state military justice system that addresses non-judicial punishment, and the different levels of courts-martial to include pre and post-trial procedures, personnel involved, the trial, and appellate matters. Although a model State CMJ was drafted as directed by Congress, the States may choose to adopt the model in whole, modify it, or not adopt it at all. The result is the potential for 54 different State CMJs. Additionally, unlike the active component, who is on duty status 24-hours a day, the Guard member is on duty status only when performing military duties. A Guard member, who commits a criminal act while in a non-duty status, will most likely fall under the jurisdiction of civilian authorities. However, some states can claim jurisdiction over the offender based on NG membership alone.

The Compliance and Accountability Officer, located within the NGB-J1-SAPR Office, serves as the single point of contact to confirm the referral of all Unrestricted Reports of sexual assault to the appropriate investigative agency and the documentation of all referrals in DSAID. Additionally, the officer tracks the progress of all case referrals throughout the investigation process and reports on case outcomes for all Unrestricted Reports of sexual assaults within the states. To obtain the information, the Compliance and Accountability Officer maintains a close working relationship with the State SJA, SARC, and NGB agents for visibility on the investigation progress through final disposition and case closure on DSAID. The officer also plans, develops, organizes, implements, and directs activities of the Accountability Line of Effort for the NG J1 SAPR program to demonstrate compliance with the NDAA and DoD SAPR Strategic Plan. The measurable results produced during this process serve as metrics to inform the CNGB, Vice Chief of the NGB (VCNGB), DARNG, DANG, and TAGs on the progress to achieve accountability and compliance of all Unrestricted Reports of sexual assault. This officer also maintains program surveillance to identify any emergent high-risk trends for accountability lapses (unintentional or negligence), and provides early warning to NGB leadership.

As mentioned previously, TAGs may request assistance from the NGB-JA/OCI as an investigative resource for all Unrestricted Reports of sexual assault declined for investigation by the law enforcement agency having initial jurisdiction or not sufficiently investigated. The NGB-JA/OCI report following the thorough investigation of the sexual assault provides the state senior leaders with the information necessary to initiate administrative action to hold the offender administratively accountable if substantiated. Of the investigations conducted by NGB-JA/OCI since its inception in 2012, there were 105

substantiated reports, with action taken on 77 of the cases and 28 cases still under review. In five cases, the states were unable to take action due to loss of jurisdiction on the reported perpetrator. Recent actions taken by the states have grown more severe as the NG is seeing an increase in number of Courts-Martial, Administrative Separations, and Withdrawal of Federal Recognition Boards. To date, states have taken action or actions are pending on all substantiated cases where they retained jurisdiction of the reported perpetrator.

Senior Guard leaders view the current process for investigating sexual assaults of or by Guard members and holding the perpetrator appropriately accountable as a positive step. Some senior Guard leaders, such as the **Alabama** TAG, implemented directives to elevate every Unrestricted Report of sexual assault to TAG level for review. All substantiated cases are referred for proper disposition based on the State military justice code. **Minnesota** TAG also works with the State SJA to ensure the appropriate actions are taken on every perpetrator investigated by State Police or LLE. The **New York** NG established a zero tolerance policy for sexual assault violations. Every reported incident in the NYNG is properly investigated and if the case is substantiated, appropriate actions are taken. Commanders failing to meet the set of priorities established within the state are held appropriately accountable.

The **Colorado** ARNG implemented broadcasting a blotter on multiple televisions located throughout **Colorado** armories to show criminal infractions and any disciplinary actions taken. The COANG Public Affairs sends a monthly email to the entire wing that shows criminal infractions and any disciplinary actions taken.

South Carolina ARNG SAPR office continues to meet with the State SJA bi-weekly to ensure MSC CDRs are meeting suspense dates and deadlines, as it relate to the perpetrators.

Virgin Islands NG JFHQ-State SAPR staff gave a presentation to all senior leaders and CDRs entitled "Proper Responses to Reports of Sexual Assault." It covered the procedures and guidelines to mandatory reporting of various sexual assault infractions and initiating separation actions once someone is identified as a registered sex offender.

3.2 Provide an update on SAPR training provided to those who are affiliated with the Special Victim Investigation and Prosecution Capability program (paralegals, trial counsel, special victims' counsel / victims' legal counsel, and victim-witness assistance personnel) for responding to allegations of sexual assault. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 3, #1, p. 6)

The NG has fewer Special Victim Investigation and Prosecution capabilities than the active component simply by virtue of its organizational structure. The applicable NG asset within this category is the Special Victims' Counsel (NGB-JA/SVC) program, structured as a stovepipe regionally aligned Joint (ARNG and ANG) program. Regional SVCs are comprised of both ARNG and ANG Judge Advocates who can assist victims from both services. Before representing victims, all newly assigned SVCs must attend an initial

certification program through either the Army The Judge Advocate General's Legal Center and School (TJAGLCS) or the Air Force Judge Advocate General's School. The Service's The Judge Advocate General certifies the SVCs, who then receive their appointment from the Chief Counsel of the National Guard Bureau.

SVCs also attend a week of NG focused SVC training during their initial months of assuming duties as a regional SVC. This training addresses SVC advocacy areas unique to Guard members and focuses specifically on the application of information learned in the initial training as well as updates on the law, regulations, and policies that affect NG members. Additionally, NG Regional SVCs and program staff attend a five-day continuing legal education (CLE) training program on an annual basis. The CLE is organized and funded by the NG SVC program and includes a wide range of topics. These topics include, but are not limited to, updates on DoD SAPR Office (SAPRO) policy, NGB SAPR policy, the Military Justice system, the neurobiology of sexual assault trauma, victim advocacy resources, Line of Duty determinations, Incapacitation Pay, and protecting the privacy rights of sexual assault survivors in administrative separation proceeding. This program training also allows for information and best practices sharing. NG SVCs attend a minimum of one civilian training or educational conference annually. Among the training available is the National Crime Victim Law Institute's Crime Victim Law Conference, the Conference on Crimes Against Women, the National Sexual Assault Conference, and the NOVA. NG SVCs have the opportunity to attend courses at the Army TJAGLCS such as Criminal Law Advocacy Course and the Intermediate Sexual Assault Litigation and Skills Course at the Air Force Judge Advocate General's school to increase their knowledge in certain subject areas as necessary and to maintain current on changes in policies, procedures, or law. Finally, NG Regional SVCs routinely receive policy, advocacy, and legal guidance through a weekly peer-to-peer conference call and professional consultation with NG SVC program management.

3.3 Describe your efforts to ensure that the personnel records of Service members convicted by court-martial, adjudged non-judicial punishment, or other punitive administrative action for a sex-related offense are updated to reflect punitive action taken, as appropriate. (DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 10, para 2d(5)(g))

The ARNG and ANG within the States are required to adhere to Service-specific policies and procedures for annotating a Guard member's conviction by courts-marital, adjudged non-judicial punishment, or other administrative action for a sex related offense in the Guard member's personnel record.

Many states, such as **Alabama, Arkansas, Kentucky, Minnesota, Montana, North Carolina, New Jersey, Tennessee, Texas, and Vermont**, developed internal policies and collaboration between their SAPR office, State J1 personnel action branch State SJA, and Security Clearance managers. Together, they completed all required regulatory guidance actions against a perpetrator for a sex-related offense to include annotating it in the Guard member's official records. In KY, the J1 Personnel Section staff ensured all information was placed in the correct section of the records after referral with the SJA to

ensure it is meets the requirements. The communication between these entities allows tracking of the punitive action against perpetrators across multiple levels within the state.

Louisiana NG JFHQ-State SAPR program currently participates in a periodic review of case dispositions with the LANG-OSJA to ensure punishments associated to a sex-related offense are properly filed. The permanent filing requirement per Army Directive 2014-29 was briefed as a part of Annual SHARP training at the unit level.

Maryland NG monitors the personnel actions during the monthly CMGs and during their State's "Personnel Actions" Meeting. MDNG SAPR Office works in close connection with G1. All personnel actions are updated within one week of an adverse action. If convicted in a civilian court, the state of **Maryland** automatically requires sex offenders register on the sex offender registry.

Puerto Rico NG makes certain that the personnel records of Service members convicted by court-martial, adjudged non-judicial punishment, or other punitive administrative action for a sex-related offense were updated to reflect punitive action taken, as appropriate. The SAPR Office staff works hand in hand with Major Commands S1, SIDPERS, Enlisted and Officer Sections, to ensure perpetrators are properly flagged and coded IAW Assignment Consideration Codes (L3 / L8).

The **Iowa** NG JFHQ-State SARC distributed a unit notification memorandum to the Guard member's chain of command for all civilian criminal convictions. The IANG SAPR Office is developing a similar notification to communicate punitive administrative actions that require documenting on the Guard members Non-commissioned Officer Evaluation Report and Officer Evaluation Report.

3.4 Describe your efforts to ensure SARC, SAPR VA, MCIO, and commander knowledge of recent victim rights and military justice updates in FY16. (DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 10, para 7a)

The ARNG SHARP and ANG SAPR offices routinely disseminate SAPR program updates to include DoD, Service-specific, and NGB policy or guidance, to the SARCs and VACs in the States. The SARCs follow on by disseminating the information to their SAPR VAs. Another avenue for information dissemination is the SAPR Advisory Committee (SAPRAC). The SAPRAC is composed of selected SARC delegates from the seven regions across the States, ARNG & ANG PMs, and NGB-J1-SAPR Office representatives. This committee conducts a monthly teleconference to discuss new information, policy and procedures, as well as other topics of concern to the SAPR programs within the States.

The monthly CMG meetings are used by many States, such as **Alabama, Florida, Indiana, Kansas, Kentucky, Massachusetts, Montana, North Carolina, New York, Pennsylvania, Puerto Rico, and Texas**, to provide policy and procedure updates to CDRs and senior leadership. The CDRs and senior leadership take the new information and disseminate it to their commands or organizations. **Iowa** NG conducted two Pre-

Command course during FY16. The IANG JFHQ-State SARC, in conjunction with the SJA updated all command teams on recent legislation and regulatory updates. Each command team is given a sexual assault report case study to verify their understanding of the appropriate response.

For CDRs not involved in CMGs, updated information is presented by a SAPR staff member during the new CDR briefing provided within 30 days of assuming command, during pre-command courses. **Maryland** NG includes major updates in the Leader's briefing; SDNG includes this information in their CDR and 1SG courses, Chaplain Corps conferences, Mitigation plan, and trainings provided to SAPR VAs by JAG, chaplains, and EO personnel.

Many states use different forms of media to disseminate the information. **Arizona** NG posts updates on each SHARP information board located in every military facility. **Indiana** NG develops MOIs to inform all personnel of the updates. **Maryland** NG created a SHARP newsletter to distribute to the leadership to provide current information pertaining to the all aspects of the SAPR program. A folder is also maintained on the MDNG SARC web site that allows access 24/7. **Maine** NG also shares recent news on victims' rights, military justice, SAFE kit actions bill on their SAPR Facebook page. **North Carolina** NG also uses a quarterly newsletter, along with email blasts, to provide updates to all NC Guard personnel. **Florida** uses their VA SharePoint site to list SHARP events calendar, SAAPM information, CRI supporting documentation, policy and training guidance, and information for advocates and leader response to reports of sexual assault.

For SAPR personnel, updates are discussed at the Annual Refresher course. This forum offers an opportunity to engage in dialogue to ensure everyone thoroughly understands the change in policy or procedure. States such as **Washington** and **South Carolina**, conduct refresher training on a regular basis throughout the year to disseminate updates as well as other current trends and information to their SAPR personnel. SAPR personnel also take advantage of continuing education opportunities to gather information.

3.5 NGB, provide an update to your efforts to ensure that all Unrestricted Reports of sexual assault (both Title 10 and 32 status) are referred to the appropriate Military Criminal Investigative Organization (MCIO), civilian law enforcement, or to the National Guard Bureau Office of Complex Administrative Investigation (NGB-JA/OCI). (Chief National Guard Bureau Notice 0400 (16 Apr 14), para 1b)

CNGB established policy that directs CDRs to refer all Unrestricted Reports of sexual assault to the appropriate MCIO, State Police or LLE, or to the NGB-JA/OCI. NGB-JA/OCI coordinates closely with state SJAs to ensure that they are aware of the sexual assault referral requirements. OCI also sends speakers to SJA, Trial Defense Services, and SVC conferences to brief on the OCI program.

In addition to CNGB policy, the DARNG published ARNG SHARP implementation guidance, dated 31 May 2016, to reinforce the responsibility of TAGs to include referring all Unrestricted Reports to the appropriate investigative agency.

The ANG SAPR Office works with CDRs at all levels to ensure that all Unrestricted Reports of sexual assault, regardless of duty status, are referred to the appropriate investigative agency. All unrestricted cases are reported to the WG/CC. The WG/CC or their designee contacts LLE. Cases are referred to the following organizations, until one accepts the case: OSI, State Police or LLE, and NGB-JA/OCI. Area Defense Counsel (ADC) represents the alleged offenders.

Discussed in section 3.1, the Compliance and Accountability Officer located in NGB-J1-SAPR, serves as the single point of contact to validate compliance and accountability requirements of the referral process for Unrestricted Reports. The officer analyzed the data gathered to provide the senior leadership with a means to measure compliance and to reinforce making the appropriate investigative determination.

Iowa law mandates notification of State Police or LLE of all Unrestricted Reports of sexual assault. In addition to completing a DD Form 2910, each victim is required to complete an **Iowa** Form 2910 and 2915 to ensure compliance.

Some of the States developed their own process to ensure Unrestricted Reports of sexual assault were referred to the appropriate investigative agency. **Alabama** NG SARC forwards all Unrestricted Reports to their OSJA to ensure the report is referred appropriately and to monitor the actions taken on the case to help keep the victim informed of the status. The ARNG TAG SAPR policy includes the requirement to coordinate with the local JAG to help determine the appropriate investigative agency.

In **Louisiana**, all Unrestricted Reports were reported to State Police or LLE by the complainant or by a member of the OSJA at the direct reporting unit or state level to ensure all Unrestricted Reports were properly investigated. Unrestricted Reports that fell under Title 10 jurisdiction were reported to Fort Polk CID. The JFHQ-State SAPR team worked closely with Fort Polk CID to assist with coordinating victim interviews and act as liaison to LANG-OSJA when required. All **Michigan** NG personnel who file an Unrestricted Report are required to speak to the LLE or **Michigan** State Police based upon the jurisdiction. Once the report was completed, TAG and SJA reviewed it to determine whether it was necessary to request an investigation conducted by NGB-JA/OCI.

The **Minnesota** NG TAG policy on sexual assault states, "When an Unrestricted sexual assault report is received, reporting will be handled in one of two ways depending on the timing of the report.

- (1) If the assault is reported directly after an assault has occurred, the incident must be reported immediately to the appropriate law enforcement agency.
- (2) If the report is not made directly following the assault, but at some duration after where preservation of physical evidence is not a factor, the victim will be given 20 days from the date of signature on the DD 2910 to report to state or LLE and/or the appropriate military criminal investigative organization (CID or OSI). If the victim

chooses not to report law enforcement, the JFHQ SJA Office will report the crime on behalf of the victim.”

The MNNG JFHQ-State SAPR Office, in conjunction with the SJA, tracks reports made or not made to State Police or LLE. If a report of sexual assault is not reported to State Police or LLE within 20 days, the survivor is contacted regarding the report. If the survivor fails or refuses to report the assault to State Police or LLE, the MNNG will report on his or her behalf. After the initial report is made to law enforcement, TAG, in consultation with the SJA, will review the case and determine whether to request NGB-JA/OCI conduct a military investigation into the incident.

Oregon NG developed a sexual assault battle drill in collaboration with the SJA Office. The purpose of the drill is to ensure CDRs and leaders know the process of reporting a sexual assault. It covers both Restricted and Unrestricted Reporting channels.

In the **Texas** NG, local civilian jurisdiction is the primary investigative agency for all T32 Unrestricted Reports. During training, CDRs discussed the investigative jurisdiction and their responsibility to report to State Police or LLE. The JFHQ-State SAPR Office encouraged all CDRs to call their office upon receiving a sexual assault case to ensure proper execution of all procedures. In FY16, the TXNG TAG approved and implemented the directive, that all cases that cannot be/or declined to be investigated or prosecuted at the state level will be referred to OCI for an administrative investigation.

3.6 Describe your current policies and procedures to ensure alleged offenders are provided due process rights and protections afforded by the Constitution and the UCMJ. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 3, #6, p. 6)

A non-federalized T32 Guard member who allegedly commits a sexual assault offense while on duty status may fall into several different jurisdictional categories depending on the location of the offense. In most cases, the jurisdiction will fall upon State Police or LLE and the civilian court system. Unless the Guard member is on Title 10 status, the UCMJ is not applicable. However, the CDR may pursue actions based on the State Code of Military Justice, which varies from State to State.

CNGB Instruction, dated 16 July 2016, “Sexual Assault Prevention and Response Program” specifically states that TAGs will “hold CDRs responsible for developing and implementing policy that prohibits coercion, retaliation, ostracism, maltreatment, and reprisal against victims of sexual assault, alleged subjects, SAPR personnel, witnesses, and intervening bystanders.” The CNGB policy further states, CDRs will “balance the interests of the victim and subject of a sexual assault to enhance protection and maintain good order and discipline.”

CNGB Instruction, dated 06 August 2014, “Expedited Transfer, Reassignment or Removal of National Guard Members Due to an Unrestricted Report of Sexual Assault,” provides the CDR the authority to temporarily and administratively reassign or remove a T32 Guard member who is accused of committing a sexual assault or related offense. These options

support Public Law 113-66, Subtitle B § 1713 and both protect and balance the interests of the victim and the perpetrator of an associated investigation.

Additionally, the NGB-J1-SAPR Office and PMs collaborated to develop a checklist to guide the CDR of an alleged subject to ensure Guard member receives due process and to monitor his or her well-being.

Each state has different positions and needs for Judge Advocates. One of the potential positions for fill is a trial defense attorney in the TDS. There are seven ARNG TDS Regions under the Chief of the ARNG TDS. Within the Regions, there are Trial Defense Teams (TDT) with a Senior Defense Counsel (SDC) providing Technical Supervision of each team and the Regional Defense Counsel providing Technical Supervision of the SDC and the Trial Defense Counsel (TDC). Within that structure, there are 27 TDC positions, but can increase in strength based on current policy. The TDS provides conflict-free legal services to ARNG Soldiers who are facing criminal or adverse administrative actions, at no cost to the Soldier. The regional TDS fall under the ARNG TDS and operates independently from the State command structure. Once an attorney-client relationship is established, effectively all communications between a Soldier and his defense attorney are privileged or confidential and may not be used against him at trial or adverse administrative proceeding. Generally, the TDS is authorized to represent Soldiers in one of the following cases: Trials by Court Martial (Summary, Special, or General); Article 15 Hearings; Involuntary Separations; reduction Boards; Investigations (Army Regulation [AR] 15-6, CID, or Commander's Inquiry; and Letters of Reprimand. The ARNG TDS does not represent Soldiers in civilian court.

The ANG recently launched its TDS program, which will include 15 programs among the States. The TDS will standardize and improve defense services across the ANG. Airmen suspected of wrongdoing or facing potential disciplinary actions are provided with legal representation in the form of an ADC.

In **Alabama**, all Guard members accused of sexual assault receive their Article 31 (Miranda Rights) and are not required to incriminate himself or herself. TDS counsel is offered to the accused Guard members. No final adverse action against the Guard member may be taken without said Guard member and his or her TDS counsel having a right to provide a rebuttal to the charges and/or offer mitigation.

Arizona NG TAG policy directs all CDRs to inform subjects of their rights to seek TDS.

Georgia NG takes only such action as is necessary to ensure the safety of alleged victims until an appropriate investigative agency completed the investigation. Alleged offenders are afforded due process under the U.S. Constitution, GA Constitution, and the GA CMJ. GA NG ensures all alleged offenders are informed of their right to counsel through TDS or private counsel of their choosing.

All **Indiana** NG members suspected or interviewed in relation to a crime receive their rights and warning statement prior to any statements taken during an investigation. TDS

services are offered during this initial rights statement. The state does not conduct investigations pertaining to sexual assault reports, but is aware that OCI administers the statement prior to interviewing subjects and informs them of their right to TDS. All investigations and command actions are subject to legal review before administration.

The **Illinois** ARNG TDS provides conflict-free legal services to Soldiers who are facing adverse military actions, at no cost to the Soldier. Unlike public defenders in civil jurisdictions, there are no eligibility requirements for representation. Rather, all Soldiers are entitled to TDS representation by virtue of their membership in the **Illinois** ARNG. Areas of representation include assistance with administrative separations, non-judicial punishments, AR 15-6 Investigations, CDR's inquiries, responses to letters of reprimand, and other adverse actions taken against a Soldier.

The **Kentucky** NG SJA provides CDRs training on their requirements to ensure alleged offenders are provided due process rights and protections as required by the UCMJ, KY CMJ, and other state and federal laws. This training includes new updates to the KY CMJ that became law in FY16.

The **Louisiana** NG JFHQ-State SAPR Office works with CDRs to ensure alleged offenders receive information on TDS to assist individuals during the investigation and adjudication processes. Commanders are advised to give this notification during a formal counseling (for flagging action, notification of pending investigation, etc.) and provide the information to the alleged offender in writing on the counseling document.

Montana NG CDRs receive a briefing on offenders' rights and are given a CDRs' checklist with information for the alleged offender. SJA works with command to ensure the alleged offender's rights are respected and taken into consideration.

New Mexico NG JFHQ-State SAPR Office worked with SJA to ensure alleged perpetrators receive a TDS offer and are flagged upon start of the investigation and CDR involvement.

New York NG takes every effort to create an environment of dignity and respect, and ensures alleged offenders are afforded due process. During the CMG, the Chair reminds all participants that until the case is either substantiated or adjudicated, that all parties are treated fairly and equitably. Commanders of alleged offenders refer to the CDR's response checklist provided by NGB to ensure there is no maltreatment and will take action as appropriate to maintain a safe working environment. All alleged offenders are offered legal services through TDS or ADC.

The **Ohio** NG JFHQ-State SAPR Office and the SJA worked diligently with CDRs to ensure both the victim and subject receive the appropriate resources. The subject works through Command channels to receive guidance from the TDS.

Texas NG refers and relies on SJA for guidance and procedures on due process rights. All offenders receive proper notification and a suspense to respond to OCI to secure legal

counsel from TDS. The **Texas** Air National Guard recently launched a statewide TDS program to benefit Airmen and CDRs at Joint Base San Antonio –Lackland.

Washington NG CDRs received guidance to contact JAG immediately upon notification of an alleged offender in their unit to help ensure alleged offenders receive all rights and due process. **Wisconsin** TAG Policy Memo #35 directs the protection of the alleged offender's rights and provision of due process.

3.7 Provide an update on the Special Victims' Advocacy Program that affords legal consultation and representation for Service members, eligible adult dependents, and DoD civilian employees who report being a victim of sexual assault, to include how Congressional plus-up funding was spent to directly support this program. Describe how your Military Service is implementing the Special Victims' Advocacy Program for Department of Defense civilian employees. Provide an update on how you are informing Officers, NCOs, and junior Service members of the availability of SVCs/VLCs. Include your Military Service's metrics for measuring the success of the program. (SecDef Memo (14 Aug 13), *Improving Victim Legal Support*, p. 1 / DODI 6495.02, *Sexual Assault Prevention and Response (SAPR) Program Procedures* (7 Jul 15), Encl 2, para 6ac / NDAA FY16, Sec 532 / NDAA FY13, Sec 573)

The NG SVC program currently provides victim advocacy services to both ARNG and ANG members, their dependents, and eligible civilians in eight designated geographical regions across the States, plus a dedicated SVC for **Alaska** and **Hawaii/Guam** area to maximize face-to-face interaction with victims. Absent special circumstances or conflicts, NG SVCs are typically assigned victims within their designated region. Assignment within their region fosters more convenient, cost-effective, and efficient travel, which maximizes face-to-face interaction and in-person representation. For the period of July 1, 2016 to September 30, 2016 alone, the 19 credentialed and appointed NG SVCs represented over 60 victims who filed sexual assault reports. As of September 2016, over 400 victims have been, or are currently represented by the NG SVC Program. Additionally, in FY16, the NG SVC program implemented the provision of services to DoD civilian employees. To help disseminate this information, the NGB-JA/SVC Program Office included information on their available services and eligibility in educational and marketing materials distributed within each region. Regional SVCs received thorough training on the relevant portions of NDAA FY16 to prepare them to provide services to DoD civilian employees. In addition, NG SVCs incorporated this information into the outreach and training materials that they provide or present to ARNG SHARP personnel, SJAs, and leadership at all levels from Unit or WG/CCs up to and including state TAGs.

NG SVCs received training not only as advocates for victims, but also as stewards of the NG SVC program and its mission. As a result, NG SVCs routinely undertake additional duties to conduct state-level SVC training to Officers, NCOs, and junior Service members to educate them of NG SVC capabilities. Further, NG SVCs work closely with state SHARP and SAPR offices to ensure that they have current NG SVC program information and access to SVC resources.

In FY16, the NG SVC Program received 4.2 million dollars of the 25 million dollar Congressional plus up. As the NG SVC Program is an emerging requirement, permanent FT stricture is still being established. The Congressional funding allowed the NG to have FT SVCs located throughout the States capable of immediately responding to survivors of sexual assault, on par with our AC counterparts.

The following states shared additional information about specific aspects of their relationship with the SVC program or SVCs and efforts made to ensure victims receive information on services available. **Guam** NG members receive assistance from the regional SVCs based in **Hawaii**. The SVC representative made routine trips to **Guam** to provide services and raise awareness during FY16. The regional SVC worked closely with the GUNG SAPR team to facilitate a solid partnership to ensure services are available and offered to all victims. The **Illinois** NG requires each sexual assault victim to complete the Notification of National Guard Special Victims' Counsel Services form when filing a report. The ILNG JFHQ-State SARC provided the form to all SHARP specialists and SAPR VAs in the field and discussed its use during CET. Unit personnel, new employees, company CDRs, 1SGs, and senior leaders received information on the form and SVC services available to the victim during Annual SHARP briefings, orientation, and Senior Leader Conferences, as applicable. Every **Michigan** NG sexual assault victim who files a report is also required to complete the "Notification of National Guard Special Victims' Counsel Services" and given a copy, which contains the regional SVC's contact information. All MING SHARP specialists and SAPR VAs received a hard copy and electronic version of the form and provided updates as necessary from the regional SVC. The MING SAPR team receives a copy of the form and discussion at their bi-annual CET, and during SHARP/SARC briefings and training events. The regional SVCs met with the MING TAG to answer any questions or concerns regarding the SVC program. Information on the SVC specialized services was disseminated throughout the state to ensure all MI Guard members understood the purpose of the program and its availability.

The **Kansas** NG also took a very proactive approach by requiring all SARCs, JFHQ-State VAC, and SAPR VAs to carry intake packets on their person at all times. These packets include an SVC selection form as part of the intake process to ensure the sexual assault victim receives the option of SVC services. A victim, who initially chooses not to accept the offer, may request the assistance of an SVC later on during their case by notifying their SARC or SAPR VA, who then assists them in completing the required form. The **Kentucky** NG developed a brochure to advertise the SVC program and identify their State POCs; a best practice used by many other state programs. The KYNG invited the regional SVC to speak to KY Guard members and leaders on the SVC services available. Additionally, the KYNG JFHQ-State SAPR Office provided training on the SVC program at Command Leadership events, briefings, and other venues. The annual SAPR training also included a block of training on the SVC program.

3.8 Describe your future plans for the achievement of high competence in holding offenders appropriately accountable.

NGB will continue to use the Compliance and Accountability Officer as the single point of contact to validate the compliance and accountability requirements as described in section 3.1. This position became vacant 30 September 2016. A replacement will fill the position early in FY17.

The **Alabama** OSJA will continue to present all investigative findings and recommendations to TAG and, for substantiated charges, implement the appropriate punishment.

The **Iowa** NG will continue to verify the appropriate and timely communication of sexual assault reports, civilian charges, flagging actions, and process updates to all command levels. Included are the Unit Notification memoranda to trigger flagging actions on subjects and the case closure memoranda. Commands will be given clear guidance on required actions on sexual assault cases and POCs to assist them in completing the actions.

The **Kentucky** NG SAPR Office will continue to provide training to State Police and LLE and prosecutors on the KYNG SAPR program along with the new KCMJ updates which are part of state law. The definition of sexual assault for the military is different from other state laws, yet requires the conduct of an investigation where in similar situations for civilians it would not. By explaining these requirements, the KYNG increased the number of sexual assault investigations by State Police or LLE for cases involving KY Guard Members. This information also decreased the time it took for them to notify the KYNG on a decision not to investigate, prompting a request to NGB-JA/OCI to conduct an investigation.

The **North Carolina** NG SAPR/SHARP Office along with the NCNG SJA Office has continued to collaborate with one another in keeping open dialogue on any changes in policy as well as improved process of accountability and adjudication of offenders. This relationship allows for non-biased and open conversation regarding the case, investigation, and appropriate steps CDRs can take to hold those accountable.

The **Ohio** NG JFHQ-State SAPR Office is considering a “Blotter Report” strategy to assist in drawing attention to sexual assault events without re-victimizing victims.

4. LOE 4—Advocacy/Victim Assistance—The objective of advocacy/victim assistance is to “deliver consistent and effective victim support, response, and reporting options.”

4.1 Summarize your efforts to achieve the Advocacy/Victim Assistance Endstate: “high quality services and support to instill confidence and trust, strengthen resilience, and inspire victims to report.” Include how competency, ethical, and foundational standards established in DoDI 6400.07, enclosure 2, are met.

(DODI 6400.07, Standards for Victim Assistance Services in the Military Community (25 Nov 13) / DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

The roles of NG SARCs, NG JFHQ-State VACs, and SAPR VAs far exceed coordinating resources for sexual assault victims, helping to orchestrate events for SAAPM, and providing AT to Guard members across the 54 States. These individuals are essential to the success of SAPR programs through their influence on Guard members and State senior leaders, and their involvement and openness to brief and discuss the effects of sexual assault with the force and ways to move forward.

The ARNG SHARP and ANG SAPR offices work with the State and wing senior leaders in the selection of highly regarded, motivated, passionate, resourceful, and professional individuals to fill the FT and volunteer positions SAPR positions within the States. The NGB Technician branch updated the NGB Excepted Service Qualification Standard, Series GS-0301 for SARC and VA Positions on 28 January 2016 to address the DoD requirements for the designation of these positions as Positions of Public Trust and Moderate Risk, and favorable completion of the required Tier Two background investigation. This document specifies the educational, basic qualification, experience, quality of experience, and compatible military skill requirements of the qualified applicant. Also identified, are the individuals disqualified from consideration based on potential legal or professional conflicts of interest, such as chaplains and healthcare personnel.

An individual meeting the requirements, and selected to fill one of these positions, is scheduled for the appropriate DoD pre-approved Service-specific Army SHARP, ANG SAPR, or NGB SARC and SAPR VA Initial training program. The NGB-J1-SAPR Office, ARNG SHARP and ANG SAPR offices are continuing to hone the T32 specific augmentation training package required for SAPR personnel who completed a DoD approved Service-specific training to obtain their certification. This training will provide the NG SAPR professionals with the information to perform their duties and responsibilities in a T32 environment, which is critical considering the absence of the same capabilities as the active component (AC), such as MCIOs, military medical treatment facilities, and UCMJ authority.

In a joint effort, the NGB-J1-SAPR Office collaborated with the ARNG SHARP and ANG SAPR offices to develop a SAPR ethics training video. This video is pending approval by DoD SAPRO for its use as the mandatory two-hour CET for D-SAACP certification. Yearly refresher training for SARCs, NG JFHQ-State VACs, and SAPR VA is a joint effort between the ARNG, ANG, and NGB-J1-SAPR offices.

The NG published the revised CNGB Manual 1300.01, National Guard Implementation of D-SAACP on 21 September 2016. NG SARCs, NG JFHQ-State VACs, and SAPR VAs follow these procedures to obtain certification prior to assignment to a case. The manual also includes CET requirements for re-certification, suspending and revoking certification, closures, appeals, and reinstatements.

In addition to the SAPR personnel within the States, the ARNG also used the unit's master resiliency trainers (MRTs) to help enhance Guard members' courage, and mind and

mental thinking by focusing on physical, psychological, social, spiritual, and family strength. The MRTs trained 14 resiliency skills every 12 months to their organizations. The ANG collaborated with stakeholders to increase awareness of resiliency programs. The Wingmen Toolkit is an online resource for Airmen that connects them with their Wing DPH and Chaplain.

In canvassing the States, they identified the following focus areas.

Training, Mentorship, and Collaboration

Arizona partnered with their state coalition against sexual assault and developed training tools for VAs. One of these training tools was an edited videotape of SAPR VAs interacting with a “survivor.” The videotape was then used during their SAPR VA refresher training to show how advocates sometimes fail to make proper eye contact, or how one’s body language can send the wrong message when talking with people. This state brought in licensed social workers and Chaplains to assist with teaching interactive techniques of conversing with another person who may show different signs of trauma.

Connecticut training is cross service focused and contains highly interactive role-play. Additionally, all SAPR VAs working cases get minimum weekly mentorship from the SHARP.

District of Columbia NG works with adjacent states and supporting civilian agencies when developing and providing education for SAPR VAs. When plausible, SAPR VAs are encouraged to attend educational conferences related to the field of advocacy.

Guam emphasized the need for SAPR VAs to respond appropriately to their victims in their time of need. In their training program, they stress the importance of effective communication when responding to a report of sexual assault or when assisting the victim during the course of their case. They especially focus on their verbal and non-verbal communication as it relates to understanding cultural sensitivity from being born and raised in **Guam**.

The **Indiana** NG JFHQ-State SARC conducts 16 hours of CET to SAPR VAs throughout the state. Training consists of blocks of instruction that are designed to educate, instill confidence in advocate skills, strengthen resilience of the VAs and hone their communication skills with victims. JFHQ SARC is available to VAs at any time for additional questions, guidance, and support.

Colorado provides yearly refresher training for SARCs and Volunteer VAs with collaboration with the NG JFHQ-State SARC, Buckley Air Force Base Installation SARC, and ANG Wing SARC. During Sexual Assault Awareness and Prevention Month (SAAPM), the sexual assault team hosts 9 base-wide events that highlight multiple different aspects of the SAPR program: mock trials, self-defense courses, LGBTQ speakers, and more.

The **Kentucky** ANG and the KYNG JFHQ-State SAPR offices partnered to provide the first ANG Wing 40-hour Victim Advocate Course provided by an individual State NG. Historically, this course was conducted by the active duty AF or NGB ANG Office. They also provided training to SAPR VAs from other states and territories to assist them in meeting the requirements toward certification. The KYNG JFHQ-State SAPR Office provided a quarterly 16-hour SARC/VA Continuing Education course, partnering with community agencies to provide quality training covering updated information and best practices for victim advocacy. During this training, two hours of SAPR specific Ethics training was provided to ensure that SARCs and VAs understand their ethical responsibilities in the SAPR/SHARP programs.

Michigan NG JFHQ-State SARC provides each newly certified SAPR VA with a binder of up to date information and forms to help provide high quality of care and services for each survivor. When a SAPR VA is assigned a case, the NG JFHQ-State SARC has a face-to-face discussion or teleconference to review items and to answer any questions the SAPR VA may have prior to meeting the victim. The NG JFHQ-State SARC remains readily available to assist the SAPR VA with case management and to ensure the victim receives the assistance needed throughout the case. This process helps the victim gain confidence and trust in the SAPR VA and reinforces the relationship between the SARC and the SAPR VA. The **Michigan** NG JFHQ-State SARC conducts mandatory CET for their SAPR VAs twice a year, which incorporates practice scenarios and a review of best practices.

North Carolina continued to increase opportunities for their SAPR VAs to attend national and local training events to improve upon their understanding of rape culture, privilege and oppression, sexual violence, stalking, human trafficking, DV and other related community issues. These opportunities help improve their ability to provide un-biased, competent and ethical advocacy to survivors.

Ohio provided regular training opportunities for individual Guard members and leaders, to ensure proper handling of cases with efficiency and with great discretion. It also trained its SARCs and SAPR VAs on the latest regulatory information, as well as how to use soft skills, such as flexibility, empathy, teamwork and integrity, to help establish credibility of the program and to inspire victims to report. The other important factor toward gaining Guard member trust within the state is by being tough on retaliatory behavior.

The **Pennsylvania** NG SAPR VAs play a critical role in the success of the JFHQ-State SAPR Program. They consistently conducted themselves IAW the highest level of professional standards, as well as being personable and trustworthy – only these attributes will make them an asset to the SAPR Team and only these things will make victims feel comfortable in coming forward to report. They are extremely knowledgeable in military and civilian resources, stress-management and self-care, and possess a high level of self-awareness and excellent listening skills. They recognize the importance of maintaining victims' confidentiality, particularly when working closely with other entities as the investigation moves forward. Victim Advocacy skills are part of the continuing

education for PANG SARCs and SAPR VAs. Continuing education is also something that we regularly seek. The continuing education keeps our team informed and at the ready.

South Carolina NG ensures SAPR VAs are provided the most current and efficient training in order for them to provide personalized care to survivors of sexual assault. The SC NG JFHQ-State SARC continues to encourage CDRs to empower their SAPR VAs to be innovative and take ownership of their programs within their organization.

For the **Tennessee** NG JFHQ-State SAPR Office, instilling trust and operating ethically, are the cornerstones of SAPR VA training. SAPR VAs were taught that competency of their roles and knowledge of resources available to sexual assault victims is key in their ability to perform their duties, and when in doubt, call the SARC. The JFHQ-State SARC stressed that there are people in positions to help them as SAPR VAs when they are unsure of what to do, offer or say, in a specific situation. Consistency in services and knowledge are of the utmost importance when educating CDRs on the resource available to them in their SAPR VAs.

The **Texas** NG also took a strong stance on reports of retaliation with CDRs addressing them swiftly. Commanders, with the assistance of their State's SAPR staff, conducted quality training to their units. The SAPR VAs received DoD and State Law specific training opportunities no less than 3 times a year to ensure each SAPR VA achieved the required 32 hours of CET within the two-year D-SAACP certification period. Each training event included ethics and legislative updates to laws that could affect survivors and advocacy personnel.

Alaska strongly encouraged their SAPR VAs to attend training beyond the minimum requirements of 32 hours of CET over a two-year D-SAACP certification period. Commanders were supportive and allowed personnel time away from their duties to attend this type of training. This support, as well as the additional training opportunities has had a positive effect on their program. Additionally, during the NG JFHQ-State VAC's VA Monthly Meeting, the VAC discussed a selected training topic, current trends, and any policy changes, as applicable.

Hawaii SAPR personnel received 52 hours of CET opportunities through primary platform instruction, external resources, and online training focused on developing competency in advocacy, ethical decision making, and effective communication skills critical to the foundational standards of victim assistance programs outlined in DODI 6400.07 Enclosure 2.

Utah co-hosted a 40-hour SAPR VA Training event with their state coalition. This training was intense and multidisciplinary to broaden the knowledge base of SAPR VAs. The training focused on local **Utah** statutes and locally available resources. Over 20 state SAPR VAs attended the training, while local partners networked into the training. The SAPR office was also able to bring 35 SAPR VAs together for a three-day training event during FY16. To broaden the scope of topics, the UT NG SAPR Office invited outside community partners to help educate the SAPR VAs in trauma, substance abuse and

trauma, suicide, perpetrator behavior, motivational interviewing, ethics, and continuity of the program.

Missouri funded the SARC and five SAPR VAs to attend the Annual NOVA conference in Atlanta, and the National Sexual Violence Resource Center Conference in Washington DC. These combined training events provided more than 32 cumulative CETs in training, prevention, and ethics.

Minnesota offered three CET sessions for their SAPR VAs during FY16. The topics focused on new knowledge areas and competencies. The state also ensured SAPR VAs received the required two hours of VA ethics training within the two-year D-SAACP certification period. The organization “Male Survivor” conducted three separate eight-hour training sessions on male survivors; the MN BCA conducted training on Drug Facilitated Sexual Assault and DNA processing; the local civilian Sexual Assault Nurse Examiner coordinator conducted training; John Choi, Ramsey County Attorney and lead champion in changing sex trafficking laws also provided training in FY16. The “Battered Women’s Legal Advocacy Project” conducted four, one-hour training sessions on stalking, and “Breaking Free” provided training on sex trafficking. The SAPR VAs received training on MST, while the SAPR staff received training on Title IX programs. This training is more complex to build upon the skills and knowledge of our Service members.

Approachable, Accessible, and Active

Kansas NG SARCs and SAPR VAs focus on being approachable, accessible, and active to earn the trust of Guard members who may require their services. SAPR VAs who are approachable and welcome the opportunity to help a Guard member in need is paramount to getting someone to feel comfortable enough to talk with them. A SAPR VA must be accessible at all times to be there when a Guard member may need assistance. Finally, to maintain credibility, a SAPR VA must remain active in their case as assurance to the victim, that helping the victim towards recovery is their number one priority.

Maine NG also focuses on visibility and accessibility of SAPR VAs by using information boards at the units, and encouraging the SAPR VAs to be vocal, visible and to participate in training their units. To reinforce this concept, ME SAPR staff continue to create and hold dynamic, informative, and useful VA and unit refresher training

Maryland NG created an initiative to establish 50% of the state SAPR VAs at the Company level. Currently, 85% of SAPR VAs are BDE/BN members. Ensuring more SAPR VAs are located at the Company level will help ensure the competency, ethical, and foundational standards are implemented at all levels.

Vermont NG had diverse priorities. The process for improving their sexual assault response included multiple policy and program enhancements. The enhancements relevant to these priorities included the following:

- Implemented the FY14 DoD requirement for all Army officers and non-commissioned officers to incorporate SAPR concerns into their annual evaluation.

The rated individual's evaluation now includes goals and objectives in furtherance of committing themselves to eliminating sexual harassment and assault and to fostering climates of dignity and respect in their units.

- Established MOAs with over two-thirds (53 agreements out of 75 agencies) of the Law Enforcement Agencies throughout the state of **Vermont**, (including **Vermont** State Police and **Vermont** Special Investigation Units). The MOA allows both entities to exchange information from investigations involving sexual assault and DV with cases in which the alleged offender acted while on military orders at the time of incident and the survivor consents to the sharing of their information.
- Established an MOU with the **Vermont** Network.
- Completed and signed their Standard Operating Procedures for the VTNG SAPR Program.
- Trained 25 SAPR VAs and SARCs IAW DoD Sexual Assault Advocate Certification Program requirements and successfully certified 18 SAPR personnel with seven awaiting Tier II clearance, initiated in March 2016.
- Strengthened Military-Civilian Community Partnerships regarding response to Sexual Assault. Through collaboration, the VTNG has augmented and enhanced its SAPR program with a vast array of survivor services.
- Published the new Prevention and Response to Retaliation Policy Specialized Training: Senior Leader Training, Responder Training, SARCs and SAPR VAs, and CDRs Training

Interviewing, conducting background investigations, providing training, and gaining certification make up the litmus test for SAPR personnel within the **New York** ANG. The objective of the 174th AW SAPR program is to ensure that all members of the wing are informed of their options when dealing with a sexual assault. Members in the unit may contact the Wing SARC 24/7, if they have questions or are in need of assistance. MOUs are in progress to ensure that the four major Medical Centers in the Syracuse, **New York** area will afford any military member with SAPR services IAW AFI 90-6001. The Wing SAPR program provided services to instill confidence in victims by recognizing the range of reactions to victimization and the impact of trauma on victims' ability to connect to assistance services and assist in the military justice or administrative process. They helped to understand the relationship dynamics and environmental stressors, recognize the importance of victim self-care, and understand the impact of certain types of crimes on the needs of victims.

The **Indiana** NG JFHQ-State SAPR program has a 24/7 number that is disseminated to all Commands to the lowest level. Service members are encouraged to utilize this number for reporting a sexual assault or to ask questions regarding the program.

The **Virgin Islands** reserved a block of time for rehearsing initial victim contact in their SHARP VA refresher training. In the scenario, the VA made initial contact and completed a report of sexual assault with a "victim" using a DD Form 2910. This process focused on

minimizing actions or words that could dissuade the victim from reporting, ensuring the needs of the victim are considered, and that the victim receives all the information and resources available to him or her. Over the summer, 14 SAPR VAs attended national conferences: 7 attended the National Sexual Assault Conference in **Washington, DC** and another 7 attended the NOVA conference in Atlanta, GA. These conferences were DoD approved and provided great opportunities for networking, CETs, and professional development. This was especially important exposure for the VING SAPR VAs, who are typically not in a position to engage in that kind of interaction coming from an isolated island environment. To attend these conferences, the SAPR VAs must remain in good standing and maintain D-SAACP certification and background checks. The **Virgin Islands** conducts an annual national sex offender registry check on all their SAPR VAs.

4.2 Describe your current oversight processes over SAPR, to included reviewing credentials, qualifications, continuing education, inappropriate behavior, and revocation of certification, if appropriate. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 4, #1 &15, p. 7)

CNGB policy places the responsibility on the ARNG SHARP and ANG SAPR Program offices for monitoring and assessing SAPR personnel D-SAACP certification. This is to confirm that SAPR personnel possess the proper training and certification prior to providing victim support.

The CNGB Manual, "National Guard Implementation of Department of Defense Sexual Assault Advocate certification Program," provides the basic procedures for obtaining and renewing certification. Within the renewal section, the manual provides specific guidance to obtain DoD SAPRO pre-approval of the detailed CET agenda prior to attendance at the event. Adherence to these procedures eliminates the denial of CET submitted with the recertification packet. The manual also describes the procedures for suspending and revoking certification, non-punitive certification closure, appealing certification revocation, and reinstatement guidelines.

The ARNG SHARP Office provides oversight of the initial certification process by requesting the submission of all credentialing packets from the States to the ARNG SHARP program analysts for quality and control prior to sending them to the convening NOVA credentialing board. The ANG SAPR Office screens and reviews all initial Wing SARC applications. Wing SARCs review all local SARC and SAPR VA credentialing packets, to include DD Forms 2950 and 2950-1, training certificates, and all additional documents, for accuracy and completeness, prior to submitting the packets to NOVA for review and approval. Wing Security Managers are responsible for initiating security clearances. A reinvestigation is required every five years for all SAPR personnel certified at Tier III and above. The SARC communicates with CDRs to ensure the SAPR VA meets the required behavior expectations.

Once the application is under review and consideration, NOVA provides a weekly roster of all NG D-SAACP credentialing applications and the status of each applicant to the NGB-J1-SAPR Office. The NGB-J1-SAPR program analyst forwards this report to the ARNG

and ANG program analysts for their review, reconciliation, and action. The applicable program office coordinates with the States as necessary to address certification packets with deficiencies or errors noted.

The CDR or supervisor of a SARC, NG JFHQ-State VAC, or SAPR VA is responsible for adhering to the procedures in the CNGB Manual, "National Guard Implementation of Department of Defense Sexual Assault Advocate certification Program", in cases of inappropriate behavior, and the suspension and revocation of D-SAACP certification. The manual provides specific procedures for an allegation of sexual misconduct, and a complaint of a non-sexual misconduct allegation. In both cases, the CDR or appointing authority notifies the appropriate stakeholders to take all measures as warranted, to include suspension or revocation of D-SAACP certification and DSAID access, if applicable. The NGB-J1-SAPR Office is the authority to submit these actions to DoD SAPRO upon receipt of a request from the ARNG SHARP and ANG SAPR Program offices.

Additional oversight processes conducted within the States are included below.

Alaska NG JFHQ-State SARC and NG JFHQ-State VAC maintain and filter certification trackers to determine which SAPR VAs are nearing D-SAACP certification. Several months out from expiration, the NG JFHQ-State VAC focuses in on SAPR VAs nearing expiration to ensure they met the minimum CET requirement and submitted their renewal application packet.

Arizona, Colorado, Connecticut, Delaware, Illinois, Michigan, and Washington also use a spreadsheet or tracking system to provide oversight of the certification and recertification processes of the SARCs and SAPR VAs within their state.

The **Guam** NG conducts 30-hour Victim Advocacy refresher training and two hours of ethics for all SAPR VA's during SAAPM. SAPR VAs unable to attend this training are sent to either a 32-hour or 16-hour recertification training available at other states, depending on available funding. Prior to revocation of a SAPR personnel's D-SAACP certification, the case and circumstances are discussed at the monthly CMG meetings.

Hawaii NG JFHQ-State SARC reviews SAPR VA credentials on a regular basis and uses the Personnel Accreditation and Selection Screening (PASS) system for all new SAPR VAs. The State Security Manager checks all HING SAPR VAs for criminal records prior to credentialing.

Indiana NG used ADOS funds to bring on a SAPR Administrative Officer to manage and maintain the credentialing process to include securing school seats, processing packets, renewing credentials, and providing an SME to the NG JFHQ-State SARC.

Louisiana NG JFHQ-State SAPR Office maintains and periodically reviews a Collateral Duty SARC and SAPR VA tracker, which lists current credentials expiration date, number of CET's needed for D-SAACP renewal certification, area of operations (home address

and unit address), contact information, and any conflicts that would interfere with an advocate providing services (for examples, work type, and times unavailable).

Missouri NG JFHQ-State SAPR Office hired a SHARP Training Coordinator to track and coordinate the certification process and recertification of all SAPR personnel.

North Carolina NG JFHQ-State SAPR Office tracks, monitors and records CET of all trained and certified SAPR VAs. They created an internal database in the state SharePoint to allow SAPR VAs and CDRs the ability to monitor continuing education and D-SAACP recertification. Additionally, this office requires a background and Sex Offender Registry check every two years to meet proper standards for positions of trust.

Ohio NG JFHQ-State SAPR Office provides oversight and assistance in organizing credentialing, qualifications and CET, while the BDEs and Wing SARCs manage the certification process. The revocation of D-SAACP certifications are managed on a case-by-case basis IAW CNGB publication. Specific state credentialing steps are included in the draft **Ohio** NG SAPR Regulation, soon to be published.

South Carolina NG JFHQ-State SAPR Office is proactive and works with units to address any concerns or issues six months to a year prior to expiration of the certification.

Texas NG conducts background screening, and verifies security clearance adjudication dates and Sex Offender Registry for the initial SAPR VA appointment and re-certification packets. As part of their oversight, the JFHQ-State SAPR Office provides lists of all SAPR VA names and expiration dates to BDE SARCs and BDE CDRs for quality assurance and oversight. During the monthly CMGs, the JFHQ-State SARC discussed appointment and recertification procedures for the benefit of the wing and BDE representatives present.

Many states, such as **Vermont**, **New Jersey**, and **Maine**, use their NG JFHQ-State VACs to manage the recertification of all SAPR VAs. **Tennessee** tracks continuing education and credentials at the State level in the JFHQ SHARP program, as well as at BDE and wing levels.

Minnesota NG JFHQ-State VAC tracks all SAPR VAs, both ARNG and ANG, credentialing, expiration, training hours completed, and unit vacancies. The NG JFHQ-State VAC ensures each SAPR VA meets or exceeds the required hours for recertification and reaches out to those that are lacking to ensure they are tracking hours needed. The SAPR Office internally runs a local background check every six months on all advocates to ensure there is no current derogatory information. Per TAG guidance, no one with a DUI or more severe infraction in the last five years will be eligible for a victim advocate position due to risk factors. The NG JFHQ-State SARC is the only authorized individual to bring revocations to TAG for approval and signature.

Pennsylvania NG JFHQ-State SARC and NG JFHQ-State VAC maintain a continuity book, which contains SARC and SAPR VA credentialing and CET information. This is periodically reviewed so that qualifications are current and to standard. In addition, the

SARCs and SAPR VAs in PA meet regularly to ensure the most current data is included in the book. **Nebraska** NG also created, vetted, and distributed a SAPR continuity binder to every unit and detachment within the organization. The binder provides user knowledge and access to current up-to-date information readily available in both hard copy and electronic format in a regularly updated shared file.

4.3 Describe your current progress to ensure SAPR personnel meet D-SAACP screening requirements prior to attending your Military Service's SAPR certification training. (DODI 6495.03, Defense Sexual Assault Advocate Certification Program (D-SAACP)(10 Sep 15), Encl 3)

The ARNG conducts all background screenings IAW ARNG Personnel Policy Operational Memorandum 15-040, 16 December 2015, and HQDA EXORD 193-14. All ARNG background screenings include a local background (Part 1) and a Department of Army level (Part 2), which is required before a Soldier enrolls into the Army 80-hour SHARP Foundation Course IAW HQDA 193-14.

The ANG SAPR Office conducts the suitability screening for all Wing SARCs, while the Wing SARCs process SAPR VAs. The ANG SAPR Office tracks background screenings, training, and certification of Wing SARCs and SAPR VAs to ensure completion of all steps prior to serving as a SARC or SAPR VA. This process ensures that the individual, supervisor, CDR, and SARC oversee the completion of requirements.

4.4 Describe your Military Service's efforts to encourage SARCs and SAPR VAs to renew their certification at a higher level in order to increase the quality of victim assistance providers. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

The majority of the NG SAPR personnel within the States serve in the position as a collateral duty. In most instances, these personnel fail to meet the required number of hours of experience providing sexual assault victim advocacy to renew their certification at a higher level.

Kentucky was successful in tracking each SARC's and SAPR VA's hours in providing victim services and submitting recertification packets on FT SARCs and SAPR VAs to achieve a higher level of certification. **Connecticut** is in the process of gaining recertification of their NG JFHQ-State VAC at a higher level.

The states of **Delaware**, **Maine**, **Minnesota**, and **Texas**, actively encourage SARCs and SAPR VAs to volunteer within their communities as advocates with local community sexual assault or DV organizations, and rape crisis centers to add to their experience and improve their comfort level for responding. **Minnesota** currently has approximately 10-15 advocates that volunteer in their communities and are pursuing a higher level of certification. One particular individual is ARNG Sergeant First Class (SFC) John Thompson, a UH-60 Black Hawk helicopter standardization instructor, selected to attend the 80-hour SHARP course to become a victim advocate just prior to his unit deploying in

2001. He found the experience very eye opening as he learned of the scope and size of the problem of sexual assault in the military. Despite a few short anxious moments before his first call, SFC Thompson finds himself drawn more to the field of social services. The **Minnesota** NG JFHQ-State VAC suggested that he volunteer in the community to gain experience and confidence. SFC Thompson linked up with “360 Communities,” a nonprofit organization that provides many programs and services that include DV shelters, resources, food shelves and programs that support school success. To volunteer as a victim advocate, Thompson had to attend a 40-hour training class. At the class, he was the only male advocate and, he found out later, the only male advocate they ever had. This was unlike his environment with the **Minnesota** NG, who has more male advocates than female advocates. For SFC Thompson, this was not a path he ever expected, but one he finds to be personally rewarding.

Many other states, **Colorado, Michigan, Montana, New Mexico, Ohio, Oregon, Pennsylvania, Tennessee, Washington, Wisconsin**, encourage their SARCs and SAPR VAs to track the hours spent working with victims of the sexual assault to recertify, when possible, at a higher level.

4.5 Describe how you addressed any challenges that SARCs and SAPR VAs have in obtaining continuing education training, to included training on emerging issues and victim-focused trauma-informed care. (DODI 6495.03, Defense Sexual Assault Advocate Certification Program (D-SAACP)(10 Sep 15), Encl 3, para 3)

Members of the NG face a number of challenges in obtaining the required number of CET to maintain their D-SAACP certification. The primary challenge for the Guard is that most Guard members serving as SARCs and SAPR VAs are traditional drilling members, who drill two days out of the month and perform their roles as a collateral duty. In some cases, training opportunities interfere with the civilian work schedules of our traditional Guard members or conflict with family obligations. A concern is that their time away from civilian work may have negative impacts on promotions, opportunities and pay, and equally as detrimental to their family relationships. During drill weekend, some collateral duty SAPR personnel may be hesitant to attend SAPR CET over training in their currently assigned duty, which is required for promotion. Additionally, for ANG traditional Guard members to attend face-to-face and online training, they must first obtain Military Personnel funds.

The second challenge is that funding is not always available to conduct centrally funded Joint SARC and SAPR VA refresher training bi-annually or annually. The benefit of this training opportunity for all Guard SARCs and SAPR VAs is threefold – it allows NGB to provide updates to policies and procedures, discuss trends and strategies, and further establish a working relationship between the States and NGB. Second, guest speakers and SMEs can share their information and experiences with a broader audience, and engage them in useful scenarios, workshops, and discussions. Last, but not least, it offers the SAPR personnel from across the States an opportunity to network, share successful practices, and build a sense of teamwork and collaboration toward eliminating sexual assault within the military.

Third, CNGB Instruction 8100.01, "NG Conference Policy, 29 September 2014, requires SARCs and SAPR VAs to request an exception to policy to attend training events and conferences hosted by Non-Federal Government entities. This policy is currently under review to exempt SAPR personnel from this requirement.

During FY16, the ARNG SHARP Program Office hosted refresher training with support from the NGB-J1-SAPR Office. However, primarily FT ARNG SAPR personnel attended this training. The majority of the Guard SARCs and SAPR VAs, who volunteer for these positions as a collateral duty, rely heavily on webinars and other alternative learning methods to obtain their CET.

Many states develop relationships with civilian agencies who provide training opportunities in victim focused trauma as part of the state's strategy in helping Guard members achieve their CET requirements.

Alaska partnered with the **Alaska** Network on Domestic Violence and Sexual Assault, an amazing resource for the state's SAPR program. This organization offered several types of training opportunities to the SAPR VAs each year. Of special note are the online course offerings through the University of **Alaska** Sitka, which have assisted some of their deployed SAPR VAs to obtain their CETs while abroad.

Other states work with adjacent states and supporting civilian agencies, including the **District of Columbia, Delaware, Idaho, Massachusetts, New Mexico, Oklahoma,** and **South Dakota**, to provide training opportunities for their SAPR VAs and encourage them to attend educational conferences related to the field of victim advocacy and participate in webinars and online training.

Alabama TAG mandated bi-annual training attendance; however, funding is limited to sponsor the training. SAPR personnel participate in the NOVA webinars to help obtain the required number of CET hours. **Connecticut** also uses the webinars and has the NG JFHQ-State VAC forward all webinar notices and links to other online training to their SAPR VA personal email accounts for timely notification. **Louisiana** also relied on online training opportunities and the state's yearly CET for their SAPR VAs. The state was limited in providing quality training from SMEs due to a lack of available funding.

In **Georgia**, the NG JFHQ-State SARC conducted continuing education opportunities throughout the year for the collateral duty SAPR VAs and SARCs. **Indiana** works with the schedules of their SAPR VAs and offered two 16-hour CET events, provided four 1-hour webinars, and over 40 hours of online courses. **Illinois** NG JFHQ-State SARC also uses a multifaceted approach and offers yearly classroom training, and notifies their state's SAPR personnel of online training, webinars, and local civilian training availabilities. The **Maryland** SAPR Office scheduled CET on weekends to allow their traditional Guard members to participate and provided funding for a variety of conferences they could attend on weekdays and weekends. Finally, the SAPR Office offered training on a variety of weekdays to accommodate the schedules of AGR Soldiers. **North Carolina** provided as much opportunity for physical attendance of all national and local state conferences

and trainings, while the NG JFHQ-State VAC provided numerous opportunities for webinars and online courses to help with CET on a monthly basis. **Texas** conducted training focused on victim trauma and care during the monthly SAPR VA meetings at the wings, yearly refresher trainings through JFHQ, and monthly CMGs and monthly meeting with the local SART at the local rape crisis center when feasible.

Vermont NG JFHQ-State SARC provided various online modules for CET, to include NOVA pre-approved DoD SAPRO Webinars, for Guard members unable to meet CET requirements for renewal. Additionally, the NG JFHQ-State SARC and NG JFHQ-State VAC advertised trainings, to all military unit VAs, hosted by neighboring states and capitalized on several trainings hosted by other programs such as SEEM and R3SP vetted by NOVA and approved for CET.

The **Kentucky** NG SAPR Office provided quarterly 16-hour CET events to ensure all SARCs and SAPR VAs have the opportunity to receive the required 32 hours of CET every two years. For those that are unable to attend training in person, the SAPR Office identified various webinars, local training events, state conferences, and online training resources (most times at no cost) the SARCs and SAPR VAs may attend to receive their CET hours. This strategy resulted in a very high retention of current SARCs and SAPR VAs D-SAACP credentials.

Minnesota and **New York** SAPR offices expressed no issues during FY16 obtaining the CET required for their SAPR personnel. The **Minnesota** leadership fully supported the SAPR program. **New York** has a strong regional SAPRAC to ensure many training opportunities are provided to the SAPR VAs. The 106th RQW joined forces with Victims Information Bureau of Suffolk for CET, while the 107th AW established an MOU with the installation host (914th AW).

Other states are working diligently to improve CET programs for FY17 to include online, local, and regional opportunities.

4.6 Describe your continued efforts to ensure that the 24/7 DoD Safe Helpline has accurate contact information for on-base SAPR resources (i.e., Chaplains, SARCs, Military Police, and Medical Personnel). (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 4, #2, p. 7)

The NGB-J1-SAPR Office staff is responsible for verifying accurate NG SAPR resource contact information is displayed on the 24/7 DoD SHL website for each of the States. The NG database contains contact information only for the NG JFHQ-State SARCs, NG SVCs, and NG State Chaplains, as other positions are not relevant within the non-federalized NG. The DoD SHL database is verified and updated semi-annually or on an as needed basis.

NGB-J1-SAPR is the lead in notifying all primary stakeholders (ARNG SHARP Office, NGB-JA/SVC, and NGB Chaplains Office) of the semi-annual DoD SHL Call Audit. The staff sends a copy of the current NG responder spreadsheet along with the guidance and

instructions provided by DoD SHL. The stakeholders verify or update all relevant contact information and return it to NGB-J1-SAPR Office within 48 hours of receipt. Following a call audit, the NGB-J1-SAPR staff reconciles the preliminary audit report provided by DoD SHL with the appropriate stakeholders. The reconciliation includes identifying the failed attempts to contact an NG responder, obtaining the reason why the responder failed to reply to the call audit, identifying and implementing corrective actions, and compiling a reconciliation report with the previous information and updating the responder spreadsheet in the DoD SHL data system.

In addition to the DoD SHL call audits, the ARNG SHARP Office conducts monthly telephone audits for the JFHQs-State SARCs. The NGB-J1-SAPR staff receives a copy of all changes to personnel or contact information for updating the DoD SHL data system. Following their monthly teleconference, the ARNG SHARP Office disseminates the NG JFHQ-State SARC and NG JFHQ-State VAC POC roster along with the teleconference notes for review and corrections.

In addition to the semi-annual review, some states, such as **Illinois**, and **Indiana**, periodically check the DoD SHL website to ensure it lists the correct contact information. **Kentucky** reviews all first responder contact information on a monthly basis at the monthly CMG. The NG JFHQ-State SARC notifies the NGB-J1-SAPR staff to edit, add or delete information within the DoD SHL data system.

4.7 Describe your efforts to make Service members aware of SAPR resources, such as the DoD Safe Helpline. (DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 2, para 6af(1) / Encl 3, para 1k & 1m)

On the Official Homepage of the National Guard website, www.nationalguard.mil contains a link on its home page to the NG SAPR website; the NG SAPR page also contains a link to the DoD SAPRO website and to the DoD SHL, as well as the listing of the 24/7 hotline number. Additional information on the page are the goals of the NG SAPR program, policy documents, two relevant papers, a link to SARC and SAPR VA training registration through the Joint Services Support (JSS) website, and other external links such as the National Sexual Violence Resource Center, and Rape, Abuse, and Incest National Network (RAINN).

The NGB-J1 Division sponsors the JSS website as part of its Family Program efforts. The purpose of the website is to serve as a gateway for Service members, Families and Veterans. Among the programs offered is SAPR and one of its partners is DoD SHL. Items on the SAPR site include:

- Prevention – “Sexual Assault is a crime,” “Bystander Intervention,” and “Common Factors of Sexual Assault”
- Articles
- SAPR Blog

- Contact information for a SARC and Special Victim's Counsel
- Getting more help, Frequently Asked Questions and the NG SAPR policy
- List of upcoming events, such as Victim Advocate refresher training

The official Homepage of the ARNG offers a link to the ARNG SAPR site. This site provides contact information on both military and civilian resources for individuals needing assistance. The resources include "Army OneSource, RAINN, and the Sexual Assault Resource Agency.

The ARNG G1 Personnel Gateway SAPR Program website has links to various regulations and supporting resources. Most notable of the resources are the DoD SHL Website, National Sexual Violence Resource Center, and RAINN. Within Arlington Hall Station, home of the ARNG Readiness Center, the ARNG SHARP Program Office prominently displays the DoD SHL poster. A pop-up banner is located in a highly visible area near the dining facility; pamphlets and posters are visible in multiple locations on every floor including the latrines of AHS; building monitors display the SAPR/SHARP program POC info.

The ANG SAPR Office has monthly teleconferences with the Wing SARCs and provides regular guidance on how to advertise and partner with state stakeholders. SARCs are encouraged to add the DoD SHL to their signature block and wing marketing material.

Twice a year, during Sexual Assault Awareness Month in April and Domestic Violence Awareness Month in October, the **Virgin Islands** performs a marketing blitz of awareness items with DoD SHL information to include the SHL number to all Soldiers, Airmen, and Civilians. Additionally, these items are available on table displays and periodically distributed throughout the year.

Steps taken by the States to market the SAPR resources available to their Guard members and to the DoD SHL included a variety of means. Generally, all States placed posters in prominent places within every armory, such as on bulletins boards, State SAPR web sites, and social media pages. The messaging included identifying SARC contact numbers, DoD SHL contact information, and other relevant material such as policy letters. Many States prepared pamphlets, cards, magnets, flyers, or other reading materials, and placed them in various areas throughout the armories and support facilities. Another tactic used by the **Kansas** NG SAPR team is their regular visits to the units throughout the state.

4.8 Describe your efforts to ensure the requirement for both male and female victim input into the development of your Military Service SAPR policy. (SecDef Memo (1 May 14), *Improve Reporting for Male Victims*, p. 2) / GAO Report 15-284, *Actions Needed to Address Sexual Assaults of Male Service members* (March 2015), p. 20)

In FY16, the NGB-J1-SAPR Office established a SAPR working group comprised of personnel from the ARNG and ANG SAPR Program offices, and SAPR personnel from

the States. This group discussed specific issues raised by the SAPR General Officers Advisory Council to assist in developing courses of actions, and to gain consensus on the way forward. The SAPR working group also discussed relevant issues raised from the States and Program Managers pertaining to new DoD requirements and taskings, and gave them a voice in the process for developing, reviewing, and revising SAPR policy and procedures. This information received from the States is critical in the developmental process for both policy and procedures in the NG SAPR program. The community based, joint service environment within the Guard brings along with it influences that are potentially diverse from state to state and community to community. Communication captured within the States comes from many avenues such as those discussed below.

Feedback from Survivors – The NG fully supports the DoD Survivor Summit and actively encourages all survivors to share their thoughts on the positive aspects of the NG SAPR program as well as those areas that are in need of improvement. **Delaware** and **New York** are two states that use and encourage their survivors to complete SAPR surveys to gain valuable insight in efforts to improve the SAPR program.

Training Events and Briefings – Using the proper forum in training events and briefings can offer tremendous opportunities to discuss many aspects of the SAPR program. Many states take advantage of these opportunities, particularly small group, and leader-led discussions. Some of these states include **Idaho, Montana, North Carolina, New Mexico, Puerto Rico, and Washington**. Many of the discussions during these events focused on stereotypes and barriers for both genders in filing a report.

Feedback from SAPR VAs – The SAPR VAs who gain the confidence and trust of the survivors can very often receive valuable information on what helped them in their recovery efforts and what did not; what gave them the strength to report; and what attitudes and approaches were positive or negative.

The **Kansas** NG SAPR teams worked directly with the local Veterans Association hospitals and their MST directors in learning new ways to improve their program and policy, and how the perspective of care and outreach might be different for males and females. The JFHQ-State SARC had Veterans who suffer from MST approach her on ideas that might improve the program's services and policy.

New Mexico NG is working to develop additional policy for TAG signature. The policy will focus on resources available for both male and female victims based on discussions with SAPR VAs on their experiences.

New York NG TAG sends out an updated policy memo annually. Some of the input used to modify it comes for SAPR surveys completed by victims. **Pennsylvania** and **South Dakota** NG SAPR programs maintain a balance of men and women as SAPR VAs, who gather concerns and recommendations from both genders to aid in refining the policy.

4.9 Describe your efforts to improve response to male victims, to include implementing and monitoring methods to improve reporting of male sexual assault

allegations. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 4, #14, p. 7)

The NG continued to stress the importance of increasing awareness of male victimization, identifying and addressing the unique concerns of the male victim, and improving the environment to encourage more men to feel safe enough to come forward. In the NGB 40-hour initial SARC and SAPR VA training and refresher training, participants received a block of instruction on male victimization to improve the response by the SAPR VAs.

In many civilian organizations, victim advocates are predominantly women, but the **Minnesota** NG made a concerted effort to increase its male SAPR VAs. The state now has more male advocates than female advocates. The MNNG JFHQ-State SARC is encouraged with the positive response, noting that no one has requested a female advocate over a male advocate. The male SAPR VAs play an essential role in changing the culture surrounding sexual assault. The MNNG focused on engaging male survivors in FY16 and plan to continue the effort into FY17. They had a “Male Survivor” train three separate 8-hour workshops to their SAPR VAs. The training emphasized how to engage men to report and the different methodologies to use. The main idea of the training was to help the SAPR VAs engage with the male population as a whole and gain their confidence to report by helping them see that the SAPR VA understands their struggle.

In addition to MNNG, many other states used training and education to raise awareness of male victimization and to prepare the SAPR VAs to respond appropriately to male sexual assault victims. In the **Maryland** NG, the training covered common misperceptions about male victimization and discussed these with Soldiers. They conducted a three question pre- and post-test during each briefing related to male sexual assault. They then compared the responses before and after the briefing to see if there was an improvement in the Soldiers’ understanding of male victims. In some cases, this effort helped to increase reporting of male sexual assaults in the Guard.

Again, like MNNG, many states, such as **Colorado**, **Georgia**, and **New York** increased the number of male SAPR VAs to ensure each victim had a choice.

New York NG also increased training efforts for CDRs and key leaders in working with male victims of sexual assault and improved support, language, and communication with both male and female victims. Breaking down personal bias and barriers among those in leadership roles led to an increase in male reporting. NYNG noticed that having male SAPR VAs and the male victimization curriculum sparked males to come forward. This continued effort is vital as more and more come forward; it builds the trust in the program to reach those that are still fearful.

Delaware NG collaborated with the “**Delaware** Men’s Network” on prevention efforts. They also increased marketing to the male population to raise awareness that men are victims too.

4.10 Provide your policy for facilitating requests from victims, who report a sexual assault, for accommodations during mandatory SAPR training (e.g., an alternate training setting to prevent re-victimization). (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 4, #16, p. 7)

The NGB 40-hour SARC and SAPR VA initial training and refresher training both address the requirement to accommodate a victim who reported a sexual assault with an alternate training environment to accomplish mandatory SAPR training. As part of the training, the SARCs received a disclaimer or content warning to use prior to the start of a lesson, which allows a participant to take a break to maintain self-care at any time during the lesson. A member of the SAPR team ensures the well-being of the participant and offers assistance if needed and then follows up to ensure the required training is provided later.

The ARNG and ANG SHARP and SAPR Program Offices, respectively, also reinforce this policy with their SARCs. Typically, the SARCs take a proactive approach and brief leaders on the alternate training plan for victims of sexual assault and prearrange alternate training with the victim prior to the regular training event. SAPR personnel work one-on-one with the individual(s) when they feel ready to receive the information needed. The SAPR team tailors the training to the individual's concerns to avoid re-victimization.

Some states, such as **West Virginia** and **North Carolina**, encourage CDRs and SAPR personnel to have a chaplain or member of the behavioral health team available to assist a victim feeling distressed during training.

4.11 Describe your progress to improve victim care services and conduct Case Management Groups at Joint Bases, in Joint Environments, and for the Reserve Components. For the Reserve Components, describe Military Service's actions to promote timely access to Sexual Assault Response Coordinators by members of the National Guard and Reserves. Describe how you addressed any recurring challenges (if any) your Military Service may have had in this area. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 4, #11, p. 7)

Each State may operate its response system to a victim of sexual assault differently, providing it adheres to DoD, Service, and NGB issuances as applicable to a non-federalized Guard member. The inherent joint nature of the NG lends itself to establishing a cross-service joint response capability. Below is a discussion on some of the State response programs.

The **Minnesota** NG JFHQ-State SARC set up a collaborative team with the Wing SARC, Active Component SAPR VA stationed within our area, Army Reserve SARC, and Air Force Reserve SARC to meet and share information and resources. Additionally, the collaboration within the team includes talking issues, comparing trends, and discussing ways to address them in a united front across the Services and components. The JFHQ-State SAPR Office has a 24/7 response line that is advertised and marketed to all Service members. Anyone can call that number or the cell phone number at any time to receive services. **Texas** NG Wing SARCs attend Joint Base CMGs and JFHQ-State CMGs on a

monthly basis. TXNG established an on-call, 24/7, response roster that includes the **Texas** Military Department Hotline, DoD SHL, JFHQ-State SARC, and Joint Base SARCs.

In **Georgia**, the NG JFHQ-State SARC and VAC are on-call 24/7 to ensure members of the GANG have timely access to SAPR services. The GANG also has an application for mobile devices, which contains a link for "Get Help." The NG JFHQ-State SARC phone number and email are listed for quick access. The **Colorado** NG SAPR program has a 24-hour manned phone along with 3 different BlackBerry numbers that are available 24 hours. The **Colorado** NG has a one-hour response time to all incoming calls. The **Indiana** NG SAPR program has a 24/7 number that is always manned by the JFHQ-State SARC, VAC or one of the two Wing SARCs. The **Kansas** NG JFHQ-State SARC maintains a BlackBerry as the 24/7 duty phone in the event of a sexual assault. The JFHQ-State SARC leads by example by constantly monitoring the phone and answering it and addressing any issue on any given day and/or time. An intake from a victim always takes priority to anything else on the SAPR schedule, and the victim sets the time and location of the meeting. Even though the location selected must follow certain guidelines, the safety of both the victim and SAPR team member is always considered. In **Maine**, the JFHQ-State SARC and Wing SARC are on call 24/7. However, due to cell coverage in the state, delays may occur. The **Tennessee** NG JFHQ-State SARC is available 24/7 by phone or text. **Montana** NG JFHQ-State SAPR program works with the Navy and Reserve units in MT for collaboration and SAPR VA response in the event of an incident. **New York** JFHQ-State SARC has a 24/7 response phone. All SAPR personnel in **Delaware** NG have the 326-sarc# for 24-hour access. The **Hawaii** JFHQ-State SARC is on call 24/7 with a 24 hour hotline that is accessible to both HIARNG and HIANG personnel to ensure there are multiple personnel available at all times. One significant challenge they face is the geographic isolation of the islands.

Puerto Rico NG SAPR program identified and resolved the following challenges within their area of operation. The JFHQ-State SARC requested and received approval of Incidental Expenses by Human Resource Office to travel around the island to cover the victim's needs, coordinate law enforcement procedures and provide training for military and civilians. The JFHQ-State SARC coordinates with the victim on the meeting location (on-post or off-post) and preferred attire, uniform, or civilian clothing. The JFHQ-State SARC and VAC offices are equipped with locks for privacy and are located in a semi-private area.

NGB policy requires the JFHQ-State to hold a CMG with TAG or designated alternate as the chair. The JFHQ-State CMG requires a discussion of both ARNG and ANG cases by the principal parties. Wing commanders may conduct their own CMG; however, it does not supplant the JFHQ-State CMG.

4.12 Describe your current progress to inform Officers, NCOs, and junior Service members about your Military Service's expedited transfer request policy. (DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), para 4o)

The CNGB Instruction, "Expedited Transfer, Reassignment, or Removal of National Guard Members due to an Unrestricted Report of Sexual Assault" specifies the policy and basic procedures for implementing the NG expedited transfer program. The 40-hour SARC and SAPR VA initial training, as well as the NG T32 specific training package that augments Service-specific SAPR training address these NG procedures. As required by ARNG Implementation guidance, dated 31 May 2016, leaders attend annual leaders' training in addition to the annual soldier training. At this training, leaders receive information on the option for a Soldier to request an expedited transfer. Additionally, the JFHQ-State SARCs brief CDRs on their responsibilities and provide a CDR's checklist as a reference sheet when a Soldier of their unit reports a sexual assault. SAPR training is also provided at the 1SG course, pre-command course, Basic Officer Leader's course, and other leadership events. Expedited transfers are part of the Annual SAPR training.

During the initial interview with a victim of sexual assault, the SARC or SAPR VA informs him or her of the option to request an expedited transfer. The victim initials the DD Form 2910 to the left of the expedited transfer clause indicating that he or she understands the option.

Expedited transfer is often included in State TAG policy or memorandum to emphasize its importance, such as **Minnesota, Illinois, Wisconsin, and Maryland**. In the **Ohio** NG, information on the expedited transfer option is included in the OHNG CDR SAPR checklist. The 174th NY ANG Wing published an informative article on expedited transfer in their newsletter entitled, "Compass Rose."

4.13 In consultation with your SARCs, list the number of victims who reported a sexual assault, if any, whose medical care was hindered due to lack of Sexual Assault Forensic Examination (SAFE) kits, timely access to appropriate laboratory testing resources, mental health counseling, or other resources. Describe the measure(s) your Military Service took to remedy the situation. (NDAA FY06, Sec 596 / DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

A NG member who is sexually assaulted is typically taken to a civilian medical facility, rape crisis center, or other State resources per an MOU or MOA for a SAFE exam or civilian equivalent.

The **Texas** NG had three Unrestricted Report cases in FY16 in which SAFE exams were conducted. This evidence was held with the appropriate jurisdiction, and as an organization, The TXNG supported and stood with civilian victim services organizations on calling for more resources to clear the rape kit backlog across the state. The TAG is briefed on all trends in the civilian sector that influence the effectiveness of the TXNG to respond to survivors.

Puerto Rico NG had an instance when a sexual assault victim was transported to a local hospital to have a SAFE conducted, but the local hospital did not have the personnel properly trained to conduct the exam on that shift. This issue was addressed and a

course of action developed to provide the appropriate training and orientation for healthcare personnel on the DoD SAFE kit and how to manage the case in that hospital.

4.14 Provide information on how you addressed problems or challenges, if any, with assigning SAPR personnel to handle unrestricted or anonymous reports of sexual assaults made by prisoners in a Military Confinement Facility. Additionally, describe your use of the DoD Safe Helpline as an anonymous reporting resource for prisoners. (Prison Rape Elimination Act (4 Sep 03) / Presidential Memorandum, Implementing the Prison Rape Elimination Act (17 May 12))

Not applicable - The National Guard does not possess Military Confinement Facilities.

4.15 Describe your leadership-approved future plans to deliver consistent and effective victim support, response, and reporting options.

The NGB-J1-SAPR Office is preparing a manual to consolidate all SAPR procedures applicable to non-federalized Guard members. This manual will streamline access to the procedures, as well as provide current changes to the procedures based on DoD or NGB requirements.

The ARNG SHARP Office implemented ARNG specific training into the Army 80-hour SHARP Foundation training to ensure new SARCs and SAPR VAs are trained on how to support a victim whether they are on Title 10 or 32-duty status. Within the states, the NG JFHQs-State SARCs provide refresher training that includes their respective state specific training procedures and resources. The ARNG SHARP Program Office is creating a Mitigation Action Plan to address vulnerabilities and challenges within ARNG Commander's Area of Responsibilities that hinders victim support and services.

The ANG SAPR program will establish firm infrastructure with victim service delivery once all Wing SARCs are hired. The hiring of the Wing SARCs will close the gaps in the SAPR program and eliminate the norm for using additional duty SARCs as the primary point of contact.

The NGB-JA/OCI program experienced a backlog in conducting investigations preventing a timely response for the TAG and the victim. Local law enforcement's lack of understanding of Title 32 equities often hindered their response. Plans include maintaining the quality and quantity of current qualified SARCs and SAPR VAs within the wing. The ANG will also continue to work with their JAG, Chaplains, Medical Professionals, and Wing DPH to provide solid care and response efforts. This collaboration will help to foster a climate of dignity, trust, and respect. The ANG will implement best practices and stay the course on what is working well with victims, and effectively implement all facets of NGB sanctioned SAPR training. The ANG will strive to create a climate that fosters mutual respect amongst all Service members, civilian employees, family members, and community. The ultimate goal is to create a climate that eliminates incidents of sexual violence amongst all Service members, civilian employees, Family members and community, and provide sensitive and comprehensive advocacy to restore victims' health and well-being.

Discussed below are some of the plans of the States.

The **Colorado** ARNG is training more SAPR VAs for a faster response time, and to ensure that survivors have the option to choose whom they want as their SAPR VA. Having SAPR VAs throughout **Colorado** allows the SAPR Office to ensure the protection of the reporting options and continue to give the support needed to the survivor. The CO ANG SAPR Office plans to visit unit training assembly roll calls in every unit. The ANG SAPR team plans to conduct more walkabouts to ensure every member knows who the SARC is and where the office and contact information is located.

The **Georgia** ARNG will execute the SHARP Mitigation Action Plan during FY17. During the 2016 legislative session, GA Statute 35-1-2 passed. This new law, which went into effect on 1 July 2016, ensures the timely collection and submission of sexual assault kits for testing for those victims who wish to proceed with a criminal justice response by reporting the sexual assault to law enforcement. For those victims who do not wish to report their sexual assault, GA Statute 17-5-71 states that the investigating law enforcement agency must maintain custody of any physical evidence (including evidence collected in a sexual assault kit) for not less than 12 months from the date the evidence is collected. The kits collected from sexual assault victims not wishing to report the assault are not submitted for testing.

The **Guam** NG JFHQ-State SAPR Office will continue to provide annual briefs to all CDRs and inform them of DoD, Service, and CNGB policy and updates. The GUNG SAPR Office will monitor all and any types of retaliation toward victims and will also ensure that unit SAPR VAs are available and all personnel know to whom they can report to. The office will continue to emphasize reporting options and DOD's recommendation for filing Unrestricted Reports to hold offenders accountable to their offense.

Indiana NG plans to continue to have a 24/7 response line; collaborate with other organic and civilian agencies who have a role in SAPR response and support, such as Chaplains, BH, Crisis Centers, and SARTs; conduct SAPR VA CET and SAPR training; and participate in awareness events, such as SAAPM and Diversity Day.

Kansas NG SAPR team plans to focus on improving their response to victims by improving the management of their program. The first step is changing from a reactive to a proactive program. Experiences with a warm hand-off from one SARC to another SARC left the team in a reactive mode. Improving program management will eliminate the reactive nature of the team allowing them to respond to victims appropriately. The second step is establishing a well thought out battle rhythm. The goal is to develop a robust program that is Service member focused.

The **Kentucky** NG JFHQ-State SAPR Office developed training guidance for use in FY17. This training will use small group discussion format with updated information pertaining to the program. This format will allow for guided discussions and sharing of information pertaining to sexual assault services and prevention efforts statewide, while still focusing

on unit specific issues as well. The KY TAG signed the KYNG FY17 SHARP training guidance. Various other States have requested a copy of the training guidance to adopt it for their use in their SAPR/SHARP programs. KYNG State Command Sergeant Major put out a call to AGR females for volunteers to be SAPR VAs. Numerous AGR female NCOs volunteered so the KYNG can provide a better gender specific response for providing victim advocacy in the future. Participants at a CMG meeting raised this initiative, which was addressed immediately by the senior state command team.

Louisiana NG JFHQ-State SAPR Office will continue to use unit level SAPR VAs in the field rather than accepting cases at the JFHQ level to maintain continuity of care. In addition, unit level training will focus on emphasizing reporting options and choices for victims seeking support. **Minnesota** NG will continue in-depth training on topics related to sexual assault and look at different ways survivors can report their assault.

Montana NG's future plan is to continue to work with an integrated team for all Guard cases by conducting monthly meetings and coordinating efforts for prevention and response between Wing and JFHQ-State. One team, one fight mentality.

New Mexico NG SAPR team will tailor training to ensure units know what is available and how to get help and support. The SAPR team will ensure SAPR VAs are certified and re-certified, with the funds available for the SAPR VAs to assist when needed for Restricted and Unrestricted cases.

The **New Jersey** JFHQ-State SARC will increase involvement in community support and partner with local police departments and SANE nurses throughout **New Jersey**. Another goal is to identify additional training opportunities for SAPR VAs in place of computer-based training. Lastly, the SAPR Office will strive to gain more Leadership involvement with SHARP programs. The NJANG wing plans to recruit more full time SAPR VAs, and increase training opportunities for SAPR VAs through NOVA, community support organizations, and requests to MAJCOM for support. The Wing SARC will visit rape crisis centers and SANE facilities and verify an exchange of accurate contact information. The wing also plans to broadcast the verdicts of all NJANG sexual assault subjects found guilty to demonstrate the consequence to the wing members.

New York NG plans to continue the cross-collaborative efforts between the Wellness committee and CMG, which proved an effective method to ensure all stakeholders involved with providing victim care and resources remain victim focused. The future plan is to expand collaborative efforts to include more Command involvement and training at the State level throughout the response process.

The **Ohio** NG SAPR Regulation was published on 30 November 2016. The OHNG plans to continue their two-day SAPR Leader Training for Command teams.

Puerto Rico NG leadership is focused on the following initiatives for FY17:

- Increase the awareness and prevention of sexual assault by enforcing the leaders training, commitment and involvement in each case
- Maintain a clear policy and guidance in how to handle sexual assault victims on reported cases without fear of retaliation from the Command or other persons
- Implement safety measures, especially during the months of May through August to avoid sexual violence incidents during AT, such as enforced DA 31 Pass submission and implementing sexual assault risk assessments before coordinating any activity
- Enforce the mentorship program to all new Soldiers arriving from Basic Combat Training and Advance Individual Training.
- Provide Sexual Harassment/Assault training to Family members to inform them and explain the services available in case of a sexual assault incident.

Tennessee NG plans to increase the number of SAPR VAs to one per Company and Detachment level to ensure all Service members have ready access and availability to victim advocacy services.

Texas NG SAPR team plans to continue collaborating with local resources and first responders to improve victim support and continuity of care. The team plans to reapply for existing state grants to continue to fill the gaps in survivor care for NG Soldiers and Airmen. The TXNG SAPR/SHARP Program was just awarded a grant through the Office of the Governor to hire sexual assault specific counselors so survivors can receive advocacy and counseling regardless of duty status.

The **Vermont** NG SAPR team will create a network of knowledgeable SAPR VA professionals capable of delivering training, distributing accurate and timely information of a dynamic SAPR program, and acting as a point of contact for CDRs and Service members to access procedural and referral information. In FY16, the VTNG SAPR team hosted an 80-hour NOVA approved certification course. As a result, the VT ARNG is in the process of increasing the number of certified SAPR VAs to work with sexual assault survivors to over 90% of the DoD operating requirements for BDEs and BNs. In FY17, the VTNG SAPR Program will deliver 16 hours of CET to certified Air and Army SAPR VAs toward reaching the required 32 hours to maintain their certification. The training will focus on specific Advocacy skills, such as active listening, person-centered communication, empathy building and power / privilege / bias awareness. The VTNG VAC will attend and complete the 2017-2018 **Vermont** Victim's Assistance Academy delivered by the Center for Crime Victim Services.

Many states will focus on maintaining or increasing the quantity and quality of their certified SAPR team, increasing training opportunities, improving collaborative efforts with both Guard and civilian professionals, and striving toward a joint cross-service SAPR program within the State. Some of these states include **Arizona, Hawaii, Indiana, Michigan, Nevada, Pennsylvania, and South Carolina.**

5. LOE—Assessment—The objective of assessment is to “effectively standardize, measure, analyze, assess, and report program progress.”

5.1 Summarize your efforts to achieve the Assessment Endstate: “responsive, meaningful, and accurate systems of measurement and evaluation into every aspect of the SAPR program.” (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

Metrics are an important part of the NG program to help assess and monitor our ability to comply with DoD issuances and initiatives, and to meet the endstates of prevention, investigation, accountability and advocacy/victim assistance lines of effort.

In the past, the NG used the GKO SAPR dashboard to gather data from the States to gain a quick snapshot of the effectiveness of their programs. This dashboard is currently under revision; however, the systems that provided the majority of the data are still available and accessed periodically. The information is analyzed to identify trends, success stories, and areas requiring assistance. The systems include:

- **DoD Sexual Assault Incident Database.** The centralized, case-level database for the collection and maintenance of information regarding sexual assaults.
- **Digital Training Management System (DTMS).** ARNG system that tracks and records required annual unit and leaders training attendance.
- **ARCNet.** ANG web-based tool used to monitor training, review leadership training sign-in rosters, planning, scheduling, and tracking SAPR activities.
- **Personnel Accreditation and Suitability Screening Database.** Army system that tracks, and manages the background screenings for SARCs and SAPR VAs working in the Positions of Significant Trust and Authority.
- **DoD Sexual Assault Advocate Certification Program.** Mandated by NDAA (FY12) Section 584 requiring the DoD to establish a training and certification program for SARC and SAPR VA.

The NGB-J1-SAPR Office continued to employ a Compliance and Accountability Officer as the single point of contact for monitoring the compliance and accountability measures for appropriate investigation referrals, case documentation, and reporting case outcomes for all Unrestricted Reports of sexual assaults within the States. This officer also tracked the progress of case referrals through the investigation process and confirmed documentation of final disposition in DSAID prior to case closure.

Additional information to assess the program is obtained through the following:

- DSAID daily quality review conducted by the NGB-J1-SAPR Office to identify input missing data or improperly entered.

- Staff assistance visits conducted by a member of the NGB-J1-SAPR staff by invitation from state leadership.
- The SAPRAC is composed of SARCS from the States. This committee serves as a channel of communication among the stakeholders within the States and NGB.
- CMG meetings also offer valuable information on the procedural aspects of victim care.
- Studies and surveys, such as the WGRR and DEOCS, URI, and Management Internal Control Toolset reviews are also used.

In FY16, CNGB directed the NGB IG to conduct an inspection of the NGB SHARP focusing on the Title 10 workforce in the National Capitol Region. The purpose of the inspection was to determine the following:

- Which office(s) are responsible for assisting sexual assault victims, and if those offices were properly manned, equipped, and resourced.
- The availability of medical and mental health services for sexual assault victims.
- The amount of increase or decrease in sexual assaults against NGB personnel.
- The effective implementation of the SHARP education program.

The **Kentucky** NG SAPR Office assisted with a statewide victim advocacy needs assessment to identify needs for victim advocates and services across **Kentucky** through the **Kentucky** Victim Assistance Academy. The members wrote up the results of this assessment into an article for inclusion in a peer-reviewed journal set for publication in FY17.

Vermont NG used the Internal Control Program - a self-inspection based upon internal and external requirements examining 46 areas to assess the state of the program. FY16's assessment found the program complied with 45 items. In order to meet all components, the VTNG must meet manning requirements for BDE and BN level SAPR VAs. Additionally, the Director of the Joint Staff chairs the SAPR Committee that meets bi-monthly to provide executive oversight, procedural guidance, and feedback concerning the installation's SAPR program. This committee reviews the state's prevention program and the response to any sexual assault incidents occurring within the VTNG. This includes reviewing cases and procedures to improve processes, system accountability, and survivor access to quality services.

5.2 Provide an update on oversight improvement activities that assess SAPR program effectiveness. Include frequency, methods/metrics used, findings, and corrective actions taken (e.g., program management reviews and Inspector General compliance inspections). (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

NGB-J1-SAPR Office staff monitored DSAID entries on a daily basis to identify missing data or improperly annotated data. The staff member discussed the discrepancies with

the appropriate program manager to ensure corrective actions took place. The Compliance and Accountability Officer also worked on a daily basis to validate the NG's compliance with NDAA and DoD SAPRO program instructions. The officer made frequent contact with the appropriate state and NGB agents to obtain data. This data provided the NGB with visibility of case progress throughout the investigation process through final disposition. These measurable results provided the CNGB, VCNGB, DARNG, DANG and TAGs information on the progress made in achieving accountability data on all Unrestricted Reports of sexual assault. This continual surveillance was maintained to identify any emergent high-risk trends or accountability lapses (unintentional or intentional), and providing an early warning to NGB leadership.

There are two factions of the SAPRAC, one regional and the other national. Both met on a monthly basis by teleconference. The items discussed in the regional SAPRAC meetings often led the discussion in the national meetings. This forum assisted in developing possible resolutions for issues identified within the States. The leadership of the national SAPRAC raised unresolved issues or concerns to the NGB-J1-SAPR Office.

The ARNG SHARP Office oversight activities included:

- Conducting a monthly teleconference with the JFHQ-State SARCs (attendance required)
- Conducting 100% monthly call audits to all JFHQ-State SARCs in support of the DoD SHL call audit
- Providing a bi-weekly report to DARNG that included the number of sexual assault cases reported to the ARNG, summary of types of sexual assaults reported, and latency report between incident and reporting date
- Providing a monthly state-of-the-state briefing for the DARNG to discuss all ARNG SHARP related issues within the States

The ANG SAPR Office oversight activities included:

- D-SAACP certification of all Wing SAPR personnel on a continual basis
- Reviewing and monitoring MICT checklists
- Monthly teleconferences
- Weekly emails
- Annual IG by-law inspection
- Reviewing the ANG SAPR Database
- Conducting data calls

Generally, the States conducted Command Climate Surveys, organizational inspection program, MICT for the Wings, and URIs, reviewing data from DSAID, DTMS, PASS, and ARCNet to help assess their SAPR program. Described below are additional efforts by some of the states.

Colorado ARNG BDE SARCs were held accountable for tracking SAPR VA training within the BDE and BNs to ensure qualified individuals are maintaining their certifications and attending the mandatory 32-hour CETs.

For FY16, the **District of Columbia** NG conducted an IG inspection of units within the organization. The inspection included knowledge of programs, tracking and conducting training, and appropriate policy publication. The minimal shortcomings discovered during the inspections were remedied by updating policy boards and informational marketing materials. The **North Carolina** NG SAPR/SHARP office assisted with BDE level inspections on the SAPR/SHARP programs. Leaders received feedback on the inspections. Some of the information gathered indicated a lack of materials and advertisement for program contact. A random check of knowledge of the program and POCs for the program is conducted with full-time and M-Day Soldiers and Airmen. Leaders also receive this information to raise awareness and to provide guidelines on items requiring improvement.

The **Georgia** NG tracked discussion of retaliation allegations at each CMG for DoD data. The JFHQ-State SARC conducted Staff Assistance Visits (SAVs) to assist the BDE improve its SAPR program's compliance with DoD, Service, and CNGB policies and guidelines. The SAVs also helped to improve the BDE's ability to prevent sexual assault, ensure proper investigation of allegations, hold offenders appropriately accountable, provide access to available recovery oriented resources to the victim, and assess the effectiveness of BDE's SAPR program.

The **Indiana** NG TAG, accompanied by the J9 Director, conducted armory visits around the State. The J9 Director specifically checked to see if each armory had INNG SAPR flyers posted with SAPR VA and SARC information. The INNG JFHQ-State SARC received a report of those units with deficiencies in this area and provided the necessary information for posting.

The **Maryland** NG JFHQ-State SARC worked with EO to evaluate results of the Command Climate Surveys, particularly those questions related to sexual assault and the reporting process. The MDNG JFHQ-State SARC used this data to evaluate areas for improvement of the SHARP program.

The **Ohio** NG Wing and BDE SAPR programs assisted in gathering data. OHNG SAPRO shares a monthly dashboard and scorecard to wing and BDE CDRs to brief their TAG suite monthly. Included are metrics for Tier I & II training, Green Dot training, certification, case management, and adjudication. These dashboards are also discussed during the CMG.

Texas NG conducted yearly By-Law inspection and MICT assessments monthly and measured quarterly. The CDR submits the deficiencies and recommended timeline for corrective actions.

In the **Washington** NG, the WA IG maintains constant communication with the JFHQ – State SARC to address concerns expressed through that avenue.

5.3 Provide an update on your efforts to ensure integrity of data (i.e., accuracy, completeness, etc.) collected in the Defense Sexual Assault Incident Database (DSAID). (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 5, #2, p. 8)

The NG took several levels of effort to ensure the integrity of data entered onto DSAID. The first level was restricting access to the database. Only FT properly certified and trained JFHQ-State SARCs, VAC and Wing SARCs receive permission to enter data on their respective Service sexual assault incident reports.

The ARNG SHARP and ANG SAPR PMs exercised oversight of the certification process. Only after the SARCs and VACs successfully completed all certification requirements and obtained D-SAACP certification, could they request to enroll in the DSAID on-line training through the NGB-J1-SAPR DSAID system manager. Upon verification of their certification, the NGB-J1-SAPR DSAID system manager conducted the specialized DSAID on-line training, verified the applicant successfully received Personally Identifiable Information and Information Assurance certificates, and met all background screening requirements prior to granting access to the database. The NGB-J1-SAPR DSAID system manager provided oversight for the NG use of the database. Access and revocation actions taken adhered to the CNGB Manual 1300.01.

The NGB-J1-SAPR DSAID system manager, ARNG SHARP and ANG SAPR PMs monitored case entries for accuracy, completeness, and data entry timeliness. Issues identified are coordinated with the entering SARC or JFHQ-State VAC for correction.

In addition to the efforts identified above, some states established their own measures to ensure the integrity of the data. **Colorado** NG JFHQ-State VAC conducted a quarterly audit of the DSAID database. **Ohio** NG improved their management and workflow of case data to reduce the number of errors and omissions. By reducing the number errors or omissions in local data, scrubbing the data within DSAID was more efficient and effective. Additionally, the JFHQ-State SAPR Office convened a monthly conference call with BDE SARCs to discuss individual case updates and to ensure the reports included victim outreach and State Police or LLE details. The **Kentucky** NG SAPR Office reviewed all case information with the victim, investigating agency, legal team, and command team as appropriate to ensure accuracy of DSAID case information for Unrestricted sexual assault reports. The KYNG SAPR Office reviewed Restricted Report case information with the victim and SAPR VA to ensure accuracy of case information. When receiving a case transfer, the KYNG SAPR Office followed up with the previous SARC to ensure case information transferred was accurate and complete prior to accepting the case in DSAID. **Maryland** NG SARC conducted quarterly reviews of the cases in DSAID to ensure all information was accurate and matched the paperwork.

In the **Texas** NG, the JFHQ-State SARC and VAC have visibility of both ARNG and ANG data entries and conduct routine quarterly audits for quality assurance. In compliance with NGB suspense dates, the SARC and VAC reviewed the data, made corrections, and deleted duplicate entries, when necessary. The **Tennessee** NG JFHQ-State SARC scheduled a monthly audit of recent cases, entered any missing data, and updated cases as information on the investigation status changed. The **North Carolina** NG JFHQ-State SARC and Wing SARC updated cases weekly or as needed. They also conducted a regular audit check, comparing information in DSAID with the hard-copy files and updated the database as required.

5.4 Provide an update on your efforts to develop and implement a survey, or leverage existing military training surveys that will provide comprehensive and detailed information to decision makers about sexual assault and other sexual misconduct allegations that occur during initial military training, including basic and subsequent career-specific military training. (GAO Report 14-806, DoD Needs to Take Further Actions to Prevent Sexual Assault During Initial Military Training (March 2015), p. 44)

N/A - The NG does not conduct initial military training.

5.5 Describe your progress in assessing SARC/SAPR VA training effectiveness. Include actions taken to implement training enhancements. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 5, #21, p. 8)

The ARNG conducted Service-specific SHARP training. The participants completed lesson critiques or feedback forms during the training and provided them to the instructors for further disposition by the Service. Additionally, NGB-J1-SAPR Office, in coordination with the ARNG SHARP and ANG SAPR PMs, developed critical T32 augmentation material for use with Service-specific training. Feedback on the training provided by the students is critical to adjusting the material and methods as required. The ANG conducted training locally and provided surveys, feedback forms, and critique sheets to the students to gather input for adjusting the material and methods as required.

Many of the states provided SAPR VA refresher training following their NOVA approved agenda. After each lesson or module, the participant completed a survey or feedback form to identify best practices and areas for improvement. Additionally, the instructors conducted after action reviews to analyze their training material and methods. This feedback guides the revision of the training. Some changes made included implementing more interactive training with real situational videos of events within the community made by **Puerto Rico**. **Louisiana** NG included a cross section of ARNG and ANG military trainers, community partners in advocacy, civilian medical personnel, and LLE to enhance the quality of CET for collateral duty SARCs and SAPR VAs.

5.6 Describe your efforts to assess compliance of commanding officers in conducting organizational climate assessments for purposes of preventing and

responding to allegations of sexual assault. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 5, #17, p. 8)

CNGB policy states that TAGs are responsible to verify that CDRs conduct a command climate assessment within 120 days of assuming command and annually thereafter IAW CNGB Memorandum, 19 November 2013, "National Guard Command Climate Assessment Policy." Specific guidance from TAGs varies from State to State as do the procedures for monitoring and reviewing the results.

The **Arkansas** NG TAG SAPR policy requires DEOCS to be completed and the results provided to the respective SARCs. **Delaware** NG JFHQ-State SARC reviews climate assessment for trends, and forwards information to CHPC and IDS. In the **Ohio** NG, both the SAPR Office and EO office review the command climate assessments. The **Kentucky** NG JFHQ-State SAPR Office works with the SEEM to ensure all CDRs complete a DEOCS within the required timeframe. The two offices then review the results of the survey, brief the CDR, and offer recommendations tailored to address concerns identified in the survey. The **Tennessee** and **New Jersey** NG JFHQ-State SARCs also work closely with the state SEEMS to assess results of Command Climate Surveys and to discuss the results with the unit leadership.

Commanders in the **Colorado** NG are required to initiate a Command Climate Survey within 30 days of taking command. Commanders must review the results to assess the units overall perspective on sexual harassment and sexual assaults.

Louisiana NG TAG policy requires each CDR to initiate a DEOMI Command Climate Assessment within 120 days of taking command, and once per year following the initial survey. Commanders must review the results of the assessment to address areas of concern. The SEEM provides TAG with completion data at the conclusion of each fiscal year.

In the **Maine** NG, both ARNG and ANG EO Officers and ARNG Prevention Coordinator actively work with CDRs to ensure climate assessments and unit risk inventories are conducted and that the results of the assessments are communicated. **Oregon NG** Human Resources EO monitors the completion of Command Climate Assessments and conducts an analysis of the results of the survey, informing each CDR of the issues that require attention in the survey. The **Maryland** NG EO also tracks the completion of Command Climate Assessments.

5.7 Describe your policy and management control procedures for ensuring that Service members, who reported a sexual assault and are separated for Non-Disability Mental Conditions, are properly counseled, in writing. Additionally, describe how your Military Service ensures that the separations are processed and recorded in accordance with DoDI 1332.14, Enlisted Administrative Separations (4 Dec 14). (DoD IG Report 2016-088, Evaluation of the Separation of Service members Who Made a Report of Sexual Assault (9 May 16), p. i)

The ARNG and ANG follow Service-specific issuances pertaining to processing separations. Some states developed and implemented additional measures.

In the **Hawaii** NG, the policy is to discuss all separations of sexual assault victims, who filed an Unrestricted Report, during their monthly CMG meetings. The two critical items discussed are whether the Service member received proper counseling in writing during the separation process, and whether there was a nexus of retaliation associated with a report of sexual assault. In addition to establishing policy on separation procedures, the **Illinois** NG developed the "ILNG Separation Document Matrix" based on regulatory guidance to track compliance of the procedures. The second measure implemented by the ILNG was assigning a qualified SHARP specialist within the Personnel Actions Branch. All separation requests involving a Soldier who previously reported a sexual assault are referred to the SHARP specialist for additional coordination with the State SHARP coordinator to verify compliance with all procedural requirements. Additionally, the G1 and the SHARP program coordinator verify the separation of the Soldier is IAW AR 135-178 and identify any corrections to the packet prior to staffing for TAG's recommendation. The **North Carolina** and **Ohio** NG JFHQ-State SAPR offices each work with their G1 and SJA to track all separations involving a victim of sexual assault to ensure appropriate handling IAW Army and DoD issuances. **Montana** NG also involves the SJA to ensure the Soldier who filed an Unrestricted Report receives proper counseling. For Restricted Report cases, the Deputy State Surgeon and BH Office provide assistance while maintaining confidentiality.

The **Kentucky** ARNG holds a "final formation" for those who are leaving military service. During this event, the Soldier's records undergo a review and the Soldier is interviewed, screened, and counseled IAW Army and DoD issuances. Additionally, separation packets of Soldiers, who reported a sexual assault in the previous two years, undergo additional scrutiny during processing to ensure consideration of the report of sexual assault prior to recommending separation.

Several states established specific measures for medical issues related to a sexual assault. **New Jersey** NG created a medical management unit for Soldiers who have medical conditions. **New Mexico** NG JFHQ-State SAPR Office works closely with medical personnel involved in the Medical Evaluation Board process to ensure the completion of all steps to move the process along and to assist them in obtaining necessary information or documentation needed from the survivor. In the **Oregon** NG, the Medical Command (MEDCOM) BH specialist is responsible for this action. In **Washington** and **South Carolina** NG, the JFHQ-State SARC communicates with the local MEDCOM on all medical evaluations of sexual assault victims and gains input from the ARNG and ANG program managers, and States and Wings.

In the **New York** NG, the State has oversight on all case management. TAG reviews all administrative separations for all victims of sexual assault to ensure reprisal is not the basis of the separation. The **Pennsylvania** NG JFHQ-State SARC coordinates with the state's line of duty manager and State Medical Detachment to ensure the process

complies with governing issuances and maintains the Guard member's confidentiality. The SVC is also present to explain any legal content requiring explanation. The **Puerto Rico** NG JFHQ-State SARC is also a part of the process to ensure the motive of separation is not related to a sexual assault case. The JFHQ-State SARC requests guidance from the IG, JAG, SVC, and NGB as necessary to verify the medical separation is not based on retaliation and all processes are IAW the regulation.

The **Tennessee** NG JFHQ-State SAPR Office works very closely with the State JAG and the G1/ A1 to track separation actions and counseling taken on Service members who reported a sexual assault IAW DoD issuances. These actions are also a topic of discussion at monthly CMGs.

5.8 Describe actions taken to integrate recent survey (e.g., MIJES, WGRR, and QSAPR) and focus group results into your Military Service SAPR policies and training programs. (DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 3, para 1s / Encl 12, para 1f)

The recently published CNGB SAPR policy did not specifically address or include recent survey and focus group results. An NGB-J1-SAPR review of the policy for necessary updates is already underway and consideration of these items will be included in the review.

The NGB-J1-SAPR training developer stays abreast of survey results and participates in various working groups. The training developer reviews the information gleaned from these sources for T32 equities and includes relevant items into the training material when updated.

Many JFHQs-State SARCs conducting Annual SAPR unit training or refresher training for their SAPR VAs often reference statistical data from the surveys to emphasize trends. The metrics often lead to discussions on the cause and effect of behaviors and actions. **Hawaii** NG SAPR personnel included WGRR survey results as part of additional training and information to help explain reserve component trends that are more reflective of HING as compared to active component. **South Dakota** NG is currently working on a new Sexual Assault Prevention Strategic Plan and will use information from Command Climate Assessments, unit risk inventories, focus groups, and wellness groups to support the plan.

5.9 Describe your leadership approved future plans, if any, for effectively standardizing, measuring, analyzing, assessing, and reporting program progress.

NGB is revising and updating the GKO SAPR Dashboard for use in FY17. Once completed the dashboard will be one of the primary oversight systems for the NG SAPR Program. The States will generate the majority of the data and submit it to the NGB-J1-SAPR Office. The metrics will provide a snapshot for State leadership and SAPR personnel to identify the health and effectiveness of their own SAPR program. Originally developed and implemented in 2013, the series of joint metrics and measurements supported the DoD five lines of effort.

The NG compliance and accountability measures will continue in FY17. The Compliance and Accountability Officer located within the NGB-J1-SAPR Office will plan, develop, organize, implement, and direct activities of the accountability line of effort. This program will continuously monitor the investigation and accountability of Unrestricted Report cases to identify any emergent high-risk trends or accountability lapses.

The ARNG SHARP Program Office is drafting the ARNG Mitigation Action Plan for publication and dissemination in FY17. The SHARP Mitigation Action Plan will be a primary focus for the ARNG. States who have established and implemented the plan will begin to measure the effectiveness of their prevention efforts. The focus for the remaining States will be to complete the plan and implement it during FY17. Continued analysis and monitoring of the plan to reduce sexual assault incidents will be ongoing throughout FY17.

With a new FT Wing SARC in place, separate SAPR-specific surveys will help identify areas for improvement. The ANG Wing SARCs work closely with the JFHQ-State SARC, WG/CC, and sister units. The new Wing SARC will play an important role in monitoring the annual Command Climate Assessments and identifying trends.

The **Guam** NG intends to conduct more Command Climate Assessments to ensure their Guard members are comfortable and knowledgeable of their options and the SAPR VAs who can assist them.

The **Michigan** NG will continue to track reports and analyze data to identify trends, and report them to key leadership. The SAPR staff will work with units to assist them in documenting training in the Director's Personnel Readiness Overview for better accountability.

In **Montana**, the JFHQ-State SAPR staff will document methods to access the hotline number for SARCs and determine the comfort level for reporting and the amount of trust in the actions of the SAPR program and staff.

New Mexico NG will use the metrics set up on MilSuite for SAPR VAs and training.

The **Pennsylvania** NG JFHQ-State SAPR Office will measure mandatory training numbers through the Army training management system, which provides units with one centralized location to capture training numbers and SAPR personnel credentialing documents. The SAPR office will implement staff visits throughout the Directorates to address leadership and set the standard for tracking State SAPR programs.

A focus of the **Tennessee** NG is tracking the outcomes of investigations, both in civilian investigative agencies and NGB-JA/OCI. The data provided will serve as a metric to show the consequences associated with such behaviors.

Throughout FY17, the **Vermont** SAPR program will brief the VTNG TAG quarterly to evaluate program performance and provide guidance with respect to all VTNG activities

related to sexual assault prevention and response. The VTNG will conduct individual After Action Reviews of NGB-JA/OCI and Civilian Special Investigative Units usage to make recommendations for continual improvement of services. Additionally, the VTNG will implement survivor surveys that will analyze and assess variances in Restricted and Unrestricted Reporting across the VTNG. This information will identify trends and assess the feasibility of incorporating sexual assault prevention training into other VTNG programs

The **Washington** NG plans to achieve continual communication with all levels of unit membership, to implement a state survey to assess the knowledge base of Guard members and to create a forum for suggestions on improving the SAPR program. The SAPR team will work to create an avenue for survivors to provide personal assessment of the service received.

6. Overarching Tenet: Communication and Policy

6.1 Describe your efforts to post and widely disseminate information on male victim sexual assault prevention and response. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

The NG uses a variety of methods to disseminate general information about the SAPR program, but includes specific efforts for male victims. The primary resources are websites, both for general public use and restricted to NG members only.

The NG Joint Services Support website, designed for Service members and their families as a gateway to resources, support, and assistance in a number of programs, offers the SAPR program a tremendous opportunity to disseminate information. Although a section of the website requires requesting access, the vast majority of the information is readily available to anyone who accesses the site. Some of the specific SAPR related information includes contact information for SARCs located throughout the States and the DoD SHL toll free telephone number. The website also assists a victim to navigate the process of reporting a sexual assault. There are also links to various resources and organizations, who offer help or additional information in the following categories: military resources; national helplines and hotlines; sexual assault organizations; DV organizations; law enforcement organizations; legal action and prosecution; government offices; polices and regulations; research, tools and articles; and training and consulting

The official NGB website has a separate NG SAPR program site operated by the Public Affairs Office. This site includes the DoD SHL toll free telephone number, a list of policy documents, and external links to resources for victims of sexual assault. The ARNG G1 Personnel Gateway offers information on the ARNG SHARP program.

GKO is a secure website, common access card accessible only. This site offers a vast amount of information for both the NG SAPR program and ARNG SHARP program. Although there are restricted areas within the site for use by the SARCs and State senior leadership, much of the information is available to anyone with access to GKO.

New for FY16, the NGB-J1-SAPR Office produced two NG SAPR infographics and disseminated them Guard wide for display on bulletins in the armories and Guard facilities.

Generally, each State distributes, posts, and disseminates sexual assault information in a variety of ways. Some common ways include the following:

- Maintaining a SAPR program information page on their post, base, or unit website or SharePoint.
- Posting contact information on the unit or public bulletin board.
- Placing posters in prominent areas within the workplace.
- Using various social media venues to disseminate SAPR related messaging.
- Information booths at various venues such as SAAPM, Community Day, Diversity Day, and more. Business cards, promotional items, and other giveaways provided.
- Commander briefs, particularly during Family Day or other special and sponsored events.
- Brochures, handouts, newsletters, and other media.
- JFHQ-State or unit SAPR Facebook pages.
- Handouts and posters supporting male victimization training.

The **Louisiana** NG JFHQ-State SAPR office disseminated educational materials on male victimization, reporting options, retaliation reporting, and more using their SHARP Facebook page, "Staying SHARP" newsletter, Geaux Guard SAPR/SHARP webpage, and during SAPR/SHARP training events. The TAG's SAPR policy letter states that acts of retaliation associated with sexual assault reports are reported to the IG's office.

The **Ohio** NG used an Army Ethics Hazing video as annual SHARP training for their units. The video showed how the use of hazing often masks sexual assaults, particularly in the case of male victims.

Texas NG disseminated Male Victimology informational material, conducted retaliation training, and male victim sexual assault training for leaders and members during CDR's calls, Roll Calls, and CMGs. The SAPR VA utilized slides and videos to provide retaliation training to their Service members. The State IG personnel also received training on how to handle a report of retaliation associated with a sexual assault and sexual harassment report.

The **Georgia** NG 116th ACW purchased educational brochures about male victims of sexual assault and placed them in all wing care offices on base, displayed them on tabletops throughout the wing during the month of April, and handed them out during Wing Family Day events. The wing also has applicable SAPR related videos on male victims of sexual assault available by request. The leadership received male victim status briefs at the monthly CMG.

6.2 Describe your efforts to post and widely disseminate information on ways to report allegations of retaliation. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

The same general methods and materials described for disseminating information on male victim sexual assault prevention and response are used to disseminate information on ways to report allegations of retaliation.

The **Kentucky** NG included specific training in their SAPR/SHARP training to cover reporting and responding to allegations of retaliation related to reports of sexual assault or sexual harassment. The KYNG JFHQ-State SAPR Office share information with their community partners on this topic by providing a 90-minute workshop on Allegations of Retaliation in November/December 2016 at a statewide conference. The KYNG JFHQ-State SAPR Office also included advertisement on signs in all latrines across the KYNG explaining reporting options, identifying who can receive a report of sexual assault, and contact information to report a sexual assault.

The **Oregon** NG TAG addressed retaliation in his command policy memorandum. SAPR team presenters briefed retaliation at the annual SAPR briefings, company CDR and 1SG course, and other special events that requested a SAPR presentation. Additionally, the SAPR team briefed the chain of command and CDR of every sexual assault victim who reported the incident about retaliation.

6.3 Provide an update on your development and implementation of new certification standards for sexual assault medical forensic examiners. (DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 2, para 3c(3)(b))

Not applicable - the NG does not use military sexual assault forensic examiners when in a non-federalized status. When activated, any examiners would meet their Service requirements for certification standards.

6.4 Describe your ongoing efforts to review, revise, update, and issue policy pertaining to:

- **Safety Assessments for SAPR Program**
- **High-Risk Response Teams**

Were any multi-disciplinary High-Risk Response Team established?

- **If so, how many and what was the duration?**
- **If the High-Risk Response Team was dissolved, explain why?**

(DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 5, para 2c / Encl 9, para 2j(3))

The recently updated and published CNGB SAPR policy addressed the formation of high-risk response teams and conducting safety assessments within the SAPR program.

The ARNG published the SHARP Readiness Effort Implementation Guidance Policy, 3 August 2016, IAW EXORD 204-16, directing states to create a mitigation action plan, which would include the high-risk response team and safety assessment.

Louisiana NG updated their SAPR/SHARP Policy Letter to state the following in relation to safety assessments for the SAPR program: “Leadership must ensure that acts of reprisal or retaliation are discouraged and properly addressed if they occur. Leaders will ensure that subordinates adhere to unit risk reduction guidelines, such as using the buddy system, minimizing alcohol consumption, and limiting non-work related after duty hours social activities while in a duty status. It is essential that leaders promote a positive command climate where victims are confident in their leadership. This requires diligent command focus, and in some cases, a change in attitude that focuses on care of the victim, instead of solely focusing on holding someone accountable.”

In **Montana** NG, each time a victim comes forward, the SARC and SAPR VA conduct a safety assessment, followed by an additional assessment by CDRs for Unrestricted Report cases. The high-risk response team is comprised of the Chaplain, BH, and SARC. MTNG did not establish a High Risk Response Team (HRRT) in FY16. The **North Carolina** NG SAPR/SHARP office, per TAG policy, also incorporated safety assessments in all responses to reports of sexual assault, sexual harassment, and DV issues.

Chapters for both Safety Assessment and HRRT are included in the **Ohio** NG SAPR Regulation pending approval and signature.

The **Puerto Rico** NG formally established the Wellness Intervention Team and Risk Management Team in March 2016 to develop and implement policy and controls, and identify and assess hazards through URIs and the Global Assessment Tool. The teams coordinate with BH to synchronize, integrate, and manage the Risk Management Team during a monthly meeting or when needed.

The **Tennessee** NG HRRT is housed largely within the state’s J9 and includes first responder BH resources from both the ARNG and ANG, FASs, Airman and Family Readiness Support Assistants, Chaplains, JFHQ-State and Wing SARCs, unit SAPR VAs, Suicide Prevention Specialists, and Substance Abuse Prevention Specialists. This team was tested in FY16 during the TN Maneuvers statewide disaster exercise

The **Washington** NG uses the CMG meeting to review the safety assessment processes, which include utilization of all appropriate assets at the JSS, which includes BH coordinators, suicide intervention, FAS, and others. WANG did not establish a HRRT in FY16.

6.5 Provide an update on your methods for effectively factoring accountability metrics into commanders’ and subordinate leaders’ performance assessments. (SecDef Memo (6 May 13), *Enhancing Commander Accountability*, p. 2)

ARNG and ANG follow Service-specific regulations, guidance, and directives as it pertains to performance assessments.

The **District of Columbia** NG, as directed by policy, supports addressing SAPR, Equal Employment Opportunity, and EO in all ratings. Compliancy with local policy, care of Soldiers and appropriate response to incidents factors into all assessments.

The **North Carolina** NG SAPR/SHARP office incorporated a “9-line” response checklist for CDRs when dealing directly with a victim of sexual assault. The checklist includes victim safety, and proper response to the sexual assault victim’s needs, with dignity and respect. Commanders, leaders, and peers who fail to take the proper measures to treat a victim appropriately when reporting the incident and during the investigation are subject to reprimand and administrative action. NCNG strongly emphasized the policy on retaliation, clearly defined retaliation, and described the steps to hold individuals accountable for taking retaliatory actions.

The **Oregon** NG G1 briefed all leaders about factoring in accountability metrics in all levels of leaders’ performance assessments. Among the circumstances briefed that would result in an annotation in a leader’s performance evaluation includes failure to take appropriate and timely action on a reported sexual assault, and leader involvement in a sexual assault.

6.6 Provide an update on efforts to improve overall victim care and increase trust in the chain of command: include initiatives or updates undertaken to reduce allegations of retaliation as a means of increasing reporting and the way in which your Military Service is tracking and accounting for these efforts. (SecDef Memo (6 May 13), *Improving Response and Victim Treatment*, p. 2 / DoD Retaliation Prevention and Response Strategy: Regarding Sexual Assault and Harassment Reports (April 2016), p. 10)

The CNGB continued to emphasize the objectives of the SAPR program through the GSLCs and GSLUs, where TAGs received updates on key issues surrounding the NG SAPR program. Sexual assault within the NG is a priority for the CNGB, where the prevention of sexual assault and victim advocacy remain a strong focus and is supported by the other lines of efforts, especially accountability.

Continual command emphasis within the States and establishment of policies on sexual assault, sexual harassment, and retaliation, helped to reinforce leaders’ support of the SAPR program. Guard members experienced an increase in leader involvement within the SAPR program for FY16, a positive step in improving the trust within the unit.

In the **District of Columbia** NG, leader education stressed the importance their involvement throughout the process. DCNG SAPR personnel guided leaders on how to fill out a Sexual Assault Incident Response Oversight Report and their requirements in maintaining contact and updates with the survivor. DCNG identified a short fall where

section leaders were assuming responsibilities the CDR was required to perform. The DCNG CG published a policy letter supporting the training and stressing the importance for CDRs' support of Guard members reporting a sexual assault.

Guam NG established a proclamation, signed by TAG, to reinforce that sexual assault within their ranks is not condoned, ignored, or tolerated. The GUNG TAG receives a retaliation synopsis report upon request.

The **Indiana** NG strived to improve victim care, trust, and to reduce retaliation reports through senior leader training. The training focused on ensuring CDRs are culturally sensitive to reports of sexual assault and understand how to respond to reports of sexual assault. Another effort included verifying the required number of certified SAPR VAs available to assist Service members and CDRs. Additionally, the INNG provided the required SAPR AT to all Service members, augmented with events on awareness and cultural sensitivity. Lastly, the annual leader and unit SAPR training addresses retaliation associated with a report of sexual assault.

The **Kentucky** NG SAPR Office reviewed DEOCS reports and provided a back brief to CDRs on their results. The brief included targeted information on improving trust in their chain of command within their units, addressed any identified allegations of retaliation, and assisted the CDR in developing an action plan for their unit based on the results. This effort led to increased trust in the chain of command for responding to reports of sexual assaults, increased reporting of sexual assaults and zero allegations of retaliation reported in FY16 in the KYNG.

The **South Carolina** NG TAG published an updated a message each year for leaders. The message provided all SCNG leaders with a directive that instructs them to create a climate free of retaliation.

The **Tennessee** NG saw a very large increase in reporting in FY16. Several of the victims came forward and indicated that they reported because of the professional manner in which their company and higher-level commands took previous reports. One factor that vastly improved senior leadership understanding and support of overall victim care and the SHARP program, was the one-on-one discussion between each senior leader and the NG JFHQ-State SARC during their annual Senior Leaders' Dialogue. This discussion helped to establish a close working relationship between these entities and answered senior leader questions on issues they did not understand.

The primary mechanism for tracking allegations of retaliation associated with a report of sexual assault is through the monthly CMG meetings. JFHQs-State SARCs enter CMG meeting minutes into the GKO SAPR site following each month's meeting. A member of the NGB-J1-SAPR staff reviews each State's minutes to identify and track all alleged cases of retaliation reported at the CMG.

6.7 Provide an update on your policy for Case Management Group Chairs to regularly assess and refer retaliation allegations, made in conjunction with a sexual

assault report, for appropriate investigation. Additionally, describe your policy for keeping these retaliation allegations on the CMG agenda for status updates until the victim's allegation is appropriately addressed.

(SecDef Memo (3 Dec 14), *Engage Command to Prevent Retaliation*, p. 2 / DODI 6495.02, *Sexual Assault Prevention and Response (SAPR) Program Procedures* (7 Jul 15), Encl 9)

CNGB SAPR policy states TAGs will establish and chair, or designate a deputy to chair, the monthly multidisciplinary CMG meeting for reviewing all Unrestricted Reports of sexual assault occurring within the State. NG JFHQ-State SARC will serve as the co-chair of the monthly State CMG meeting. The NGB-J1-SAPR Office provided an agenda template to the NG JFHQs-State SARC for use to establish the State's CMG meeting specific agenda. Each NG JFHQ-State SARC is responsible for posting the completed agenda and the meeting minutes on the GKO SAPR website for every monthly CMG meeting. The agenda template includes the following items relevant to reports of retaliation:

- Number of reports of retaliation
- Initial date the retaliatory incident was introduced to the CMG
- Name of the individual reporting the retaliatory incident and his or her relationship to the report of sexual assault, such as "victim," witness," or "first responder"
- Name of offender and the type of retaliation, such as "social" or "professional"
- Date the retaliatory incident is referred to concerned CDR for appropriate corrective action
- Name and position of the person responsible for resolving the retaliatory incident
- Corrective actions taken to resolve the incident of retaliation and the results
- Date the retaliation incident resolved

The CMG reviews each report of alleged retaliation monthly until the case is resolved and closed. The following definitions pertaining to retaliation are included on the CMG agenda template: Retaliation/reprisal, ostracism, maltreatment, coercion. The agenda also includes a description of professional and social retaliation.

Puerto Rico NG disseminated policy to all PR ARNG members. Leaders received additional information on their responsibility and the importance of their role in the allegations of retaliation and the consequences.

7. Secretary of Defense Initiatives

7.1 Enhance First Line Supervisor Skills and Knowledge: Provide an update on your first line supervisor training that advances a climate of dignity and respect and supports the prevention of potential retaliation associated with reporting. First line supervisors are junior officers, enlisted supervisors, and civilian employees who supervise military members. Address the frequency of the training; policy updates in support of the training; and, how the curriculum emphasizes the importance of

engaging subordinates on sexual assault prevention and response; instructs them on recognizing the signs of possible acts of retaliation; and, provides an opportunity to practice leadership skills to promote a healthy command climate.
(SecDef Memo, (3 Dec 14), p. 2)

The structure of the NGB does not include a section for curriculum development. However, the training developer within the NGB-J1-SAPR Office develops individual classes to address new initiatives and changes within the CNGB SAPR program's policy and procedures.

The ARNG and ANG follow the curriculum developed by their Service.

The HAF developed a one-time training requirement that focused specifically on preventing and responding to incidents of retaliation against Airmen who make Unrestricted Reports of sexual assault. The training was directed at CDRs, or appropriate designee - Chief, 1SG, Superintendent at each echelon, to engage directly with the First Line Supervisors under their command to educate and mentor them on recognizing and addressing retaliation and reprisal in their duty sections, and creating a professional environment intolerant of it.

8. NDAA Requirements - Provide your Military Service's update on the following FY15/FY16 NDAA requirements. If the provision has been implemented, indicate "Completed," and provide the implementation date. If the provision has not been implemented, indicate "In Progress" and provide an update (150 words or less), including the projected completion date.

8.1 Review by the Military Service Secretary (at the chief prosecutor's request) of a Convening Authority's decision to not refer charges of certain sex-related offenses for trial by court-martial.

“(c) REVIEW OF CERTAIN CASES NOT REFERRED TO COURT-MARTIAL.—

“(1) CASES NOT REFERRED FOLLOWING STAFF JUDGE ADVOCATE RECOMMENDATION FOR REFERRAL FOR TRIAL.—In any case where”; and (2) by adding at the end the following new paragraph:

“(2) CASES NOT REFERRED BY CONVENING AUTHORITY UPON REQUEST FOR REVIEW BY CHIEF PROSECUTOR.—

“(A) IN GENERAL.—In any case where a convening authority decides not to refer a charge of a sex-related offense to trial by court-martial, the Secretary of the military department concerned shall review the decision as a superior authority authorized to exercise general court martial convening authority if the chief prosecutor of the Armed Force concerned, in response to a request by the detailed counsel for the Government, requests review of the decision by the Secretary.

“(B) CHIEF PROSECUTOR DEFINED.—In this paragraph, the term ‘chief prosecutor’ means the chief prosecutor or equivalent position of an Armed Force, or, if an Armed Force does not have a chief prosecutor or equivalent position,

such other trial counsel as shall be designated by the Judge Advocate General of that Armed Force, or in the case of the Marine Corps, the Staff Judge Advocate to the Commandant of the Marine Corps.” (FY15 NDAA, Sec 541)

N/A to the National Guard.

8.2 Inclusion of disposition results in future annual reports.

(a) SUBMITTAL TO SECRETARY OF DEFENSE OF INFORMATION ON EACH ARMED FORCE.—Subsection (b) of section 1631 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (10 U.S.C. 1561 note) is amended by adding at the end the following new paragraph:

“(11) An analysis of the disposition of the most serious offenses occurring during sexual assaults committed by members of the Armed Force during the year covered by the report, as identified in Unrestricted Reports of sexual assault by any members of the Armed Forces, including the numbers of reports identifying offenses that were disposed of by each of the following:

“(A) Conviction by court-martial, including a separate statement of the most serious charge preferred and the most serious charge for which convicted.

“(B) Acquittal of all charges at court-martial.

“(C) Non-judicial punishment under section 815 of title 10, United States Code (article 15 of the Uniform Code of Military Justice).

“(D) Administrative action, including by each type of administrative action imposed.

“(E) Dismissal of all charges, including by reason for dismissal and by stage of proceedings in which dismissal occurred.” (FY15 NDAA, Sec 542)

In Progress. The Compliance and Accountability Officer within the NGB-J1-SAPR Office is gathering information to support this requirement as it applies to NG members in a Title 32 status and State CMJ as opposed to the UCMJ. Projected Date of Completion is 1 September 2017.

8.3 Confidential review of the terms or characterization of discharge for Armed Services members who report being victims of sexual assault.

(a) CONFIDENTIAL REVIEW PROCESS THROUGH BOARDS FOR CORRECTION OF MILITARY RECORDS.—The Secretaries of the military departments shall each establish a confidential process, utilizing boards for the correction of military records of the military department concerned, by which an individual who was the victim of a sex-related offense during service in the Armed Forces may challenge the terms or characterization of the discharge or separation of the individual from the Armed Forces on the grounds that the terms or characterization were adversely affected by the individual being the victim of such an offense.

(b) CONSIDERATION OF INDIVIDUAL EXPERIENCES IN CONNECTION WITH OFFENSES.—In deciding whether to modify the terms or characterization of the discharge or separation from the Armed Forces of an individual described in

subsection (a), the Secretary of the military department concerned shall instruct boards for the correction of military records—

(1) to give due consideration to the psychological and physical aspects of the individual's experience in connection with the sex-related offense; and

(2) to determine what bearing such experience may have had on the circumstances surrounding the individual's discharge or separation from the Armed Forces.

(c) **PRESERVATION OF CONFIDENTIALITY.**—Documents considered and decisions rendered pursuant to the process required by subsection (a) shall not be made available to the public, except with the consent of the individual concerned.

(d) **SEX-RELATED OFFENSE DEFINED.**—In this section, the term “sex-related offense” means any of the following:

(1) Rape or sexual assault under subsection (a) or (b) of section 920 of title 10, United States Code (article 120 of the Uniform Code of Military Justice).

(2) Forcible sodomy under section 925 of such title (article 125 of the Uniform Code of Military Justice).

(3) An attempt to commit an offense specified in paragraph (1) or (2) as punishable under section 880 of such title (article 80 of the Uniform Code of Military Justice).

(FY15 NDAA, Sec 547)

The ARNG and ANG follow Service-specific regulations, instructions, and directives as it pertains to confidential review of the terms or characterization of discharge for Armed Services members who report being victims of sexual assault.

8.4 Applicability of sexual assault prevention and response and related military justice enhancements to military service academies.

(a) **MILITARY SERVICE ACADEMIES.**—The Secretary of the military department concerned shall ensure that the provisions of title XVII of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113–66; 127 Stat. 950), including amendments made by that title, and the provisions of subtitle D, including amendments made by such subtitle, apply to the United States Military Academy, the Naval Academy, and the Air Force Academy, as applicable. **(FY15 NDAA, Sec 552)**

Not applicable to the National Guard.

8.5 Sexual assault prevention and response training for administrators and instructors of Senior Reserve Officers' Training Corps.

The Secretary of a military department shall ensure that the commander of each unit of the Senior Reserve Officers' Training Corps and all Professors of Military Science, senior military instructors, and civilian employees detailed, assigned, or employed as administrators and instructors of the Senior Reserve Officers' Training Corps receive regular sexual assault prevention and response training and education. **(FY16 NDAA, Sec 540)**

Not applicable to the National Guard.

9. Analytic Discussion

9.1 Military Services/NGB*, provide an analytic discussion (1,000 words or less) of your Military Service's Statistical Report of reported sexual assault cases from the Defense Sexual Assault Incident Database (DSAID). Required elements included on this template are information on Unrestricted Reports; Restricted Reports; Service referrals for victims alleging sexual assault; and case synopses of completed investigations.

***NGB should provide comments based on their available information and data.**

This section shall include such information as:

- **Notable changes in the data over time**
- **Insight or suspected reasons for noted changes, or lack of change, in data**
- **The application of insights from data analyses for programmatic planning, oversight, and/or research**
- **Prevalence vs. reporting (the percentage of Service member incidents captured in reports of sexual assault (Restricted Reports and Unrestricted Reports) (Metric #2)**
- **Total number of Sexual Assaults (Restricted Reports and Unrestricted Reports) over time (since FY08) (Metric #12)**
- **Military Protective Orders issued as a result of an Unrestricted Report (e.g., number issued, number violated)**
- **Approved expedited transfers and reasons why transfers were not approved**
- **The number of sexual assault investigations completed by the MCIO in the FY and the corresponding mean and median investigation length. Case open date can be in any year, but the close date must be by the end of the FY (Metric # 5)**
- **The number of subjects with victims who declined to participate in the military justice process (Metric #8)**
- **Command action for military subjects under DoD legal authority (to be captured using the most serious crime investigated, comparing penetration to contact crimes) (Non-Metric #1)**
- **Sexual assault court-martial outcomes (to be captured using the most serious crime charged, comparing penetration to contact crimes) (Non- Metric #2)**
- **Summary of referral data – Unrestricted and Restricted Reports - either referrals received from other sources or referrals made to other sources (e.g., medical/mental health, command, criminal investigation/security services, legal, civilian or VA authorities, etc.)**
- **Any other data relating to sexual assault case data**

Total number of Sexual Assaults, FY13 – FY16

Sexual Assault reporting in the NG increased concurrently with enhanced efforts to create a culture where Service members feel confident in the sexual assault reporting process

and safe enough to reach out to SAPR first responders for assistance, **(Figure A)**. The total number of all NG sexual assaults reported in FY13 equaled 313 and 435 in FY16, showing an increase of 122 reports of sexual assault over this period. Of the total 435 reports of sexual assault filed involving Guard members in FY16, 102 reports or 23.4% of the total, represented the number of sexual assaults experienced by Guard members on active duty (Title 10) and reported to NG SARCs. The remaining 333 or 76.6% of the total number of reports were cases where the Guard member was either the victim or the subject in the sexual assault incident and not on federal duty. Of those 333 T32 reports, 295 or 88.6% of the reports involved a NG member as the sexual assault victim and the remaining 38 reports involved a U.S. civilian or military dependent as the victim, or a NG member as the subject.

Male Sexual Assault Reporting, FY15 – FY16

Over the past two years, the NG increased efforts to reach out to males in the Guard, specifically male members victimized by a sexual assault. These prevention and response efforts are credited with helping to increase the number of males reporting from 21 or 6.7% of the total reports in FY13 to 67 or 15.4 % of total reports in FY16. On-going and new efforts to create an environment safe for male members to reach out for support is expected to continue to drive male reports to a higher percentage of the reports and increase the total reports from male Service members.

Prevalence versus Reporting

The NG continued efforts to increase the sexual assault reporting rate while addressing prevention efforts to decrease prevalence rates of sexual assault involving members of the NG. Results of the 2015 WGRR survey showed 3.3% of NG female and 0.6% of NG male respondents identified being sexually assaulted in the twelve months prior to taking the survey.

Expedited Transfer Requests

The NG received and approved 11 expedited transfer requests and processed them according to CNGB Instruction 1301.01 in FY16, **(Figure B)**. During the last three FYs, the NG received, approved, and processed 36 expedited transfer requests from Service members making an Unrestricted Report. Expedited transfers in the NG are limited to within the state Army or Air Guard they currently serve in as a NG member.

NGB-JA/OCI Completed Sexual Assault Investigation

After closing 26 investigations in FY2014, NGB-JA/OCI increased the number of completed investigations to 50 in FY15 and 96 in FY16, representing a 92% and 96% increase, respectively, over the last two years, **(Figure C)**. Furthermore, the OCI program intake of sexual assault cases grew significantly each year, as the number of requests from States grew from 35, to 80 and then 106 during FY14 through FY16.

Total Unrestricted Reports, FY13 – FY16

Unrestricted Reporting in the NG maintained a trend line near 75% of the total reports over the past four FYs with the exception of FY15 showing a dip to 68%, **(Figure D)**. Typically, Unrestricted Reports constituted 78% of the reports occurring in a T32 status

over the last four FYs while Unrestricted Reports made up 62% of the Reports for incidents that occurred in Title 10 status.

Latency of Sexual Assault Reporting

The latency from the date the sexual assault occurred to the date the Service member reported the sexual assault to the military identifies how long Service members go without receiving support towards the recovery process. Comparing the report time of T32 and Title 10 Service members in FY16, Guard members reported their sexual assaults to military SAPR first responder within 365 days from the incident approximately 61% of the time. The NG member serving on active duty tended to report a sexual assault to a military SAPR first responder within 365 days only 44% of the time.

Declined to Participate in Investigation and Prosecution

During FY16, only four Unrestricted Reports of sexual assaults in the NG involved individuals that did not want to continue to participate in the investigation and prosecution efforts of a military subject.

Figure A. Total number of National Guard Sexual Assault Reports by Status Type over time (since FY13)

Figure B. Total number of National Guard Expedited Transfer Requests and Command Approvals by FY

Figure C. Investigation Completed by Office of Complex Administrative Investigation by Year

Figure D. Total number of National Guard Restricted Reports and Unrestricted Reports over time FY13 – FY16

9.2 Complete the following table with your numbers as of the end of the fiscal year. Use the job/duty descriptions provided and the following inclusion criteria:

- Include all Reserve and Active Duty military personnel. Army and Air Force do not need to include National Guard personnel, as they will be included in the National Guard Bureau's response.
- Include civilian and contractor personnel
- Only include filled positions
- Indicate the number of full-time and part-time personnel
- Provide the exact number of current personnel, whenever possible. If the number is an estimate, please indicate how the estimate was reached and any other relevant information.

(DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 2, para 6ac)

Job/Duty Title	Description of Job/Duty	Full-Time	Part-Time
Program Managers	Capability in developing policy, or program management and execution; and completion of 40+ hours of Military Service-specific National Advocate Credentialing Program and approved SARC training.	2	0
Dedicated Headquarters-Level Professionals	Include policy, advocacy, and prevention professionals who support the headquarters-level SAPR program offices at each Military Service/National Guard Bureau (<i>not including program managers, who are counted in their own category</i>).	14	0
Uniformed SARCs	Serve as the single point of contact at an installation or within a geographic area to oversee sexual assault awareness, prevention, and response training; coordinate medical treatment, including emergency care, for victims of sexual assault; and track the services provided to victims from the initial report through final disposition and resolution. Certified under the nationally accredited DoD Sexual Assault Advocate Certification Program (D-SAACP).	68	821
Civilian SARCs	See above.	33	0
Uniformed SAPR-VAs	Provide non-clinical crisis intervention, referral, and ongoing non-clinical support to adult sexual assault victims; offer information on available options/resources to victims; coordinate liaison assistance with other organizations and agencies on victim care matters; and report directly to the SARC. Certified under the nationally accredited D-SAACP.	44	1187
Civilian SAPR-VAs	See Uniformed SAPR VAs above.	10	
Sexual Assault-Specific Legal	Legal personnel who specialize in sexual assault cases including prosecutors, Victim Witness Assistance Program personnel, paralegals, legal experts, and Special Victim's Counsel/Victim's Legal Counsel.	25	
Sexual Assault – Specific Investigators	Military Criminal Investigation Office investigators who specialize in sexual assault cases. For NG, this represents NGB-JA/OCI investigators.	25	0
Sexual Assault Medical Forensic Examiners	Medical providers that have completed the DoD course at Fort Sam Houston, or equivalent.	N/A	N/A

Acknowledgments

The Office of People Analytics (OPA) is indebted to numerous people for their assistance with the *2016 Workplace and Gender Relations Survey of Active Duty Members (2016 WGRA)*, which was conducted on behalf of Major General Camille Nichols, Director, DoD Sexual Assault Prevention and Response Office (SAPRO).

Policy officials contributing to the development of this survey include Dr. Nathan Galbreath (Office of the Under Secretary of Defense, Personnel and Readiness, Sexual Assault Prevention and Response Office) and Ms. Shirley Raguindin (Office of the Under Secretary of Defense, Personnel and Readiness, Office of Diversity Management and Equal Opportunity). Service officials contributing to the development and administration of this assessment include Dr. Jessica Gallus (Army), Dr. Paul Garst (Department of Navy, SAPRO), Mr. Paul Rosen and Ms. Kimberly Lahm (Navy), Ms. Melissa Cohen and Dr. Jessica Zabecki (Marine Corps), Mr. James Thompson and Ms. Aileen Richards (Air Force).

Executive Summary

Ms. Lisa Davis, Dr. Elizabeth P. Van Winkle, and Dr. Laura Severance

To address unwanted gender-related issues in the military, each of the Services and DoD has implemented and expanded sexual assault and sexual harassment programs to provide reporting options and survivor care procedures. Continuing evaluation of these programs through cross-component surveys is important to reducing instances of sexual assault and sexual harassment of military members. This report presents findings from the *2016 Workplace and Gender Relations Survey of Active Duty Members (2016 WGRA)*, a key source of information for evaluating these programs and for assessing the gender relations environment across the Services.

Study Background and Methodology

Study Background

The Defense Research, Surveys, and Statistics Center (RSSC), within the Office of People Analytics (OPA)¹, has been conducting the congressionally-mandated gender relations surveys of active duty members since 1988 as part of a quadrennial cycle of human relations surveys outlined in Title 10 U. S. Code Section 481. Past surveys of this population were conducted by OPA in 1988, 1995, 2002, 2006, 2010, and 2012. At the request of Congress, the RAND Corporation conducted the *2014 RAND Military Workplace Study (2014 RMWS)* of military members (both the active duty and Reserve components) to provide an independent assessment of unwanted gender-related behaviors in the military force. The measures for sexual assault and Military Equal Opportunity (MEO) violations developed by RAND for use in the *2014 RMWS* will be used in Workplace and Gender Relations (WGR) surveys hereafter.

The ability to estimate annual prevalence rates is a distinguishing feature of this survey. Results are included for estimated prevalence rates of sexual assault and Military Equal Opportunity (MEO) violations pertaining to sexual harassment and gender discrimination. Historically, to measure sexual assault, OPA's WGR surveys have used a measure of Unwanted Sexual Contact (USC) on surveys conducted in 2006, 2010, and 2012 of active duty members and 2008 and 2012 of Reserve component members. Although the term "USC" does not appear in the UCMJ, it is used to refer to a range of activities that the UCMJ prohibits, including uninvited and unwelcome completed or attempted sexual intercourse, sodomy (oral or anal sex), penetration by an object, and the unwanted touching of genitalia and other sexually related areas of the body. As originally developed, the goal of the USC measure was to act as a proxy for "sexual assault" while balancing the emotional burden to the respondent. The intention of the USC measure was not to provide a crime victimization rate in this regard, but to provide the Department with information about military men and women who indicated experiencing behaviors prohibited by the UCMJ consistent with sexual assault and would qualify the individual to receive Sexual Assault Prevention and Response (SAPR) support services.

¹ Prior to 2016, the Defense Research Surveys, and Statistics Center resided within the Defense Manpower Data Center (DMDC). In 2016, DHRA reorganized and moved RSSC under the newly established Office of People Analytics (OPA).

In 2014, Congressional leaders requested that the Department update their survey metrics to be more specific with regard to the types of crimes experienced by military members. This new measure of sexual assault aligns with the language used in the elements of proof required for sexual assault under Article 120, UCMJ, and meets the requirements of Congress. In 2014, the Department contracted with RAND to conduct a large-scale survey of active duty and Reserve component members on issues of sexual assault. RAND developed this new measure of sexual assault which incorporates UCMJ-prohibited behaviors and consent factors to derive estimated prevalence rates of crimes committed against Service members. While the terms and acts in this sexual assault measure are anatomical and more graphic, RAND had reported the measures provide a reliable estimate of sexual assault. As experiences of behaviors are self-reported on surveys, such experiences may or may not have been investigated, therefore, conclusions that a crime occurred may not be made.

To evaluate the differences between the previous USC metric and the new sexual assault metric, researchers at RAND fielded two versions of the survey: one using the USC question (the *2014 Workplace and Gender Relations Survey*) and one using a newly constructed crime victimization measure aligned with the specific legal definitions of sexual assault and abusive sexual contact as delineated in the UCMJ (*2014 RAND Military Workplace Survey [2014 RMWS]*). Using both measures, and weighting up to the full population for both, they found the estimated rate using the USC question and the estimated rate using a sexual assault crime index were not significantly different. The new sexual assault measure was approved by the Secretary of Defense and the Service Chiefs as the crime victimization measure of sexual assault for DoD and was incorporated on the *2016 WGRA*.² Chapter 1 of this report provides additional information on the construction of the sexual assault metric and how follow up questions allow for construction of an estimated crime rate.

In 2014, RAND also developed new measures of sex-based MEO experiences for the *2014 RMWS* that were designed to align with criteria for a DoD-based MEO violation. RAND developed the new measures of MEO violations that incorporate behaviors and follow-up criteria to derive estimated prevalence rates. The new measure provides an estimated prevalence rate of sexual harassment, which includes behaviors that may be consistent with a sexually hostile work environment and/or sexual quid pro quo, and gender discrimination.³ Chapter 1 provides additional information on the construction of these metrics.

Survey Methodology

OPA conducts DoD cross-component surveys that provide leadership with assessments of attitudes, opinions, and experiences of the entire population of interest using standard scientific methods. OPA's survey methodology meets industry standards that are used by government statistical agencies (e.g., the Census Bureau and Bureau of Labor Statistics), private survey

² As a new sexual assault measure was used in 2014 and 2016, direct comparisons between survey years prior to 2014 are not possible. Although direct comparisons are not possible, the top-line estimates between the new measure and the old USC measure are statistically similar as found by the RAND Corporation in their 2014 bridge study.

³ As experiences of behaviors are self-reported on surveys, such experiences may or may not have been investigated, therefore, conclusions that a crime occurred may not be made.

organizations, and well-known polling organizations. OPA adheres to the survey methodology best practices promoted by the American Association for Public Opinion Research (AAPOR) for all scientifically constructed surveys.⁴

Although OPA has used industry standard scientific survey methodology for many years, it is important to clarify how scientific practices employed by large survey organizations control for bias and allow for generalizability to populations. Appendix C contains frequently asked questions (FAQs) on the methods employed by government and private survey agencies, including OPA. The survey methodology used on prior WGR surveys has remained largely consistent across time, which allows for comparisons across survey administrations. In addition, the scientific methods used by OPA have been validated by independent organizations (e.g., RAND, GAO).⁵ The methodology for selecting the *2016 WGRA* sample, based on a stratified random sampling, is the same as in prior years. However, the methodology used for weighting the respondents to the population is different. To maintain comparability, OPA used the generalized boosted models (GBM) used by RAND for this administration, which adjusts for nonresponse by predicting responses to key survey measures (e.g. sexual assault) on the survey as well as predicting survey response. Additional details about the complex weighting can be found in Chapter 2 of the report and in the 2016 Workplace and Gender Relations Survey of Active Duty Members: Statistical Methodology Report (OPA, 2016a).

Data were collected between July 22 and October 14, 2016. The survey procedures were reviewed by a DoD Human Subjects Protection Officer as part of the DoD survey approval and licensing process. Additionally, OPA received a Certificate of Confidentiality from the Health Resources and Services Administration (HRSA) at the Department of Health and Human Services to ensure the respondent data are protected.⁶

The target population for the *2016 WGRA* consisted of active duty members from the Army, Navy, Marine Corps, Air Force, and Coast Guard who were below flag rank and had been on active duty for approximately five months.⁷ Single-stage, nonproportional stratified random sampling procedures were used in the *2016 WGRA* for the DoD Services. A census of the Coast Guard was taken for this survey as they have a small population.

⁴ AAPOR's "Best Practices" state that, "virtually all surveys taken seriously by social scientists, policy makers, and the informed media use some form of random or probability sampling, the methods of which are well grounded in statistical theory and the theory of probability" (http://aapor.org/Best_Practices1/4081.htm#best3). OPA has conducted surveys of the military and DoD community using these "Best Practices" for over 25 years, tailored as appropriate for the unique design needs of specific surveys.

⁵ In 2014 an independent analysis of the methods used for a 2012 survey on gender relations in the active duty force, which aligns with methods used in the *2016 WGRA*, determined that "[OPA] relied on standard, well accepted, and scientifically justified approaches to survey sampling and derivation of survey results as reported for the *2012 WGRA*." (Morrall, Gore, & Schell, 2014, p. 3). In 2010, GAO conducted an evaluation of OPA's methods. While they found the sampling and weighting procedures aligned with industry standards and were reliable for constructing estimates, recommendations on conducting non-response bias analyses were accepted by OPA and are now standard products for OPA surveys (GAO-10-751R Human Capital).

⁶ This Certificate of Confidentiality means that OPA cannot be forced to disclose information that may identify study participants in any federal, state, or local civil, criminal, administrative, legislative, or other proceedings.

⁷ The sampling frame was developed five months prior to fielding the survey. Therefore, the sampling population including those active duty members with approximately five months of service at the start of survey fielding.

OPA sampled a total of 735,329 active duty service members. Surveys were completed by 151,010 active duty members. The weighted response rate for the 2016 WGRA was 24%, which is typical for large DoD-wide surveys.

OPA scientifically weights the survey data so findings can be generalized to the full population of active duty members. Within this process, statistical adjustments are made so that the sample more accurately reflects the characteristics of the population from which it was drawn. This ensures that the oversampling within any one subgroup does not result in overrepresentation in the total force estimates, and also properly adjusts to account for survey nonresponse. OPA typically weights the data based on an industry standard process that includes 1) assigning a base weight based on a selection probability, 2) adjusting for nonresponse which includes eligibility to the survey and completion of the survey, and 3) adjusting for poststratification to known population totals. Further information on this process can be found in Chapter 2.

The remainder of this Executive Summary details the top-line results from the overview report. The full overview report is not an exhaustive summary of all data points in the survey. Rather, it provides an overview of the primary prevalence metrics and supporting data to help inform sexual assault prevention and response within the Department. References to perpetrator/offender throughout this report should be interpreted as “alleged perpetrator” or “alleged offender” because without knowing the specific outcomes of particular allegations, the presumption of innocence applies unless there is an adjudication of guilt. Additionally, behaviors endorsed by respondents are based on self-reports, therefore, conclusions on whether the events reported occurred are beyond the purview of this survey. References to “sexual assault” throughout the report do not imply legal definitions for sexual assault and should be interpreted as “alleged” events. Additionally, references to “retaliation,” “reprisal,” “ostracism” or “maltreatment,” or perceptions thereof, are based on the negative behaviors as reported by the survey respondents; without knowing more about the specifics of particular cases or reports, this data should not be construed as substantiated allegations of reprisal, ostracism, or maltreatment.

Summary of Top-Line Results

Sexual Assault Among Active Duty Members

Sexual Assault Prevalence Rate Estimates

On the survey, active duty members were asked to think about events that happened in the past 12 months and were asked specifically about the following types of unwanted experiences in which someone:

- Put his penis into their vagina, anus, or mouth
- Put any object or any body part other than a penis into their vagina, anus, or mouth
- Made them put any part of their body or any object into someone’s mouth, vagina, or anus when they did not want to
- Intentionally touched private areas of their body (either directly or through clothing)

- Made them touch private areas of their body or someone else's body (either directly or through clothing)
- Attempted to put a penis, an object, or any body part into their vagina, anus, or mouth, but no penetration actually occurred.

This section provides the estimated overall roll up prevalence rates for members who indicated experiencing these behaviors, who met the UCMJ-based criteria for experiencing a sexual assault, and who indicated the sexual assault happened within the past 12 months.

Overall, 1.2% (± 0.1) of DoD active duty members indicated experiencing **sexual assault** in the past 12 months. This represents approximately 1 in 23 women (4.3%) and 1 in 167 men (0.6%). Based on a constructed 95 percent confidence interval ranging from 14,041 to 15,748, an estimated total of 14,881 DoD active duty members indicated experiencing a **sexual assault** in the past 12 months. Compared to 2014, the percentage of those who indicated experiencing **sexual assault** is a statistically significant *decrease* in 2016 for women (0.6 percentage points) and men (0.3 percentage points). While there were downward trends in **sexual assault prevalence** for all Services, the statistically significant *decrease* for DoD women is driven by the statistically significant *decrease* for Navy women (1.4 percentage points lower than 2014). For men, the statistically significant *decrease* for DoD men overall was driven by the statistically significant *decrease* for Army men (0.3 percentage points lower than 2014).

Rates prior to 2014 used the measure of unwanted sexual contact and therefore trends prior to 2014 are not possible due to measurement differences.

Type of Sexual Assault Members Indicated Experiencing

Of all DoD active duty women, 2.2% indicated the unwanted event was **penetrative sexual assault**, 2.1% indicated experiencing **non-penetrative sexual assault**, and 0.1% indicated experiencing **attempted penetrative sexual assault**. Compared to 2014, the percentage of women who indicated experiencing **non-penetrative sexual assault** showed a statistically significant *decrease* in 2016 (0.5 percentage points) as well as for the percentage of women who indicated experiencing **attempted sexual assault** (0.1 percentage points). The estimated rate of **penetrative sexual assault** remained *statistically unchanged* for women from 2014.

Of all DoD active duty men, 0.2% indicated experiencing **penetrative sexual assault**, 0.4% indicated experiencing **non-penetrative sexual assault**, and <0.1% indicated experiencing **attempted penetrative sexual assault**. Compared to 2014, the percentage of men who indicated experiencing **non-penetrative sexual assault** showed a statistically significant *decrease* in 2016 (0.2 percentage points). The estimated rates of **penetrative sexual assault** and **attempted penetrative sexual assault** remained *statistically unchanged* for men since 2014.

Details of the Most Serious Assault Members Indicated Experiencing

As survivors of sexual assault often experience more than one assault, the 2016 WGRA asked the 4.3% of DoD women and the 0.6% of DoD men who indicated having experienced a sexual assault in the past 12 months to consider the assault that had the biggest effect on them. They were then asked specific questions on the circumstances surrounding this experience. In limiting

responses to this one situation, overall burden on the respondent is minimized. The following details are of this most serious assault.

DoD women (48%) were *more likely* than DoD men (35%) to indicate the most serious behavior experienced to be [penetrative sexual assault](#), while men (59%) were *more likely* than women (43%) to indicate [non-penetrative sexual assault](#) was the most serious behavior experienced. With regard to considering the one situation as involving [hazing or bullying](#), men were *more likely* than women to indicate the one situation involved [hazing](#) (27% for men and 9% for women) and/or [bullying](#) (39% for men and 24% for women). When asked about alcohol use during the one situation, women (59%) were *more likely* than men (39%) to indicate [either they and/or the alleged offender\(s\) had been drinking alcohol](#) at the time of the unwanted event.

When asked to describe where and when the one situation of sexual assault occurred, the majority of women and men (73% for both) indicated the assault occurred [at a military location](#). Women (45%) were *more likely* than men (25%) to indicate the situation occurred [while in their or someone else's home or quarters](#), while men (45%) were *more likely* than women (27%) to indicate it occurred [while at work during duty hours](#).

Sexual assault is often not experienced in isolation and behaviors may be present both prior to, and after, the assault. Over half of DoD women (56%) and DoD men (52%) indicated being [sexually harassed and/or stalked](#) before and/or after the one situation. These findings support the Department's emphasis on reporting as a potential way to stop the alleged offender from continuing or escalating behaviors.

Experiencing sexual assault could lead to members wanting to separate from the Service. In 2016, about one-quarter of women (28%) and men (23%) indicated they [took steps to leave or separate from the military](#) as a result of the one situation they experienced. Future research could examine whether or not members actually do separate from the Service based on their experiences of sexual assault.

In general, DoD women who indicated experiencing sexual assault were *satisfied* with the response and services they received from a majority of individuals or providers. Specifically women *more likely* than men to be *satisfied* with [SARCs](#) (64% for women and 43% for men), [a chaplain](#) (63% for women and 43% for men), and [SVCs/VLCs](#) (62% for women 38% for men). Compared to women, men were *more likely* to indicate they were *dissatisfied* with the responses they received from their chain of command: 53% were *dissatisfied* with their [immediate supervisor](#) (34% for women), 51% were *dissatisfied* with their [senior enlisted advisor](#) (34% for women), and half (50%) were *dissatisfied* with the responses received from their [unit commander/director](#) (31% for women). With the largest levels of dissatisfaction for both women and men, this suggests there is room for improvement in the level and quality of response from leadership when members experience sexual assault.

Characteristics of the Alleged Offender in the One Situation

When asked to describe the alleged offender(s) in the one situation, a little more than two-thirds (67%) of women indicated there was only [one alleged offender](#) and the vast majority (94%) of women indicated the alleged offender(s) was (were) [men](#). More than half (58%) of men

indicated only **one alleged offender** was involved in the one situation, and compared to women, men were *more likely* to indicate the alleged offender(s) was (were) **women** (25% for men and 2% for women) or were **a mix of men and women** (12% for men and 4% for women). Women (58%) were more likely than men (43%) to indicate the alleged offender was **a friend or acquaintance**.

The vast majority of women (90%) and about three-quarters of men (74%) indicated at least one of the alleged offenders were **in the military**, of which, the vast majority (94% of women and 91% of men) indicated they were in the **same Service** as them. The top three rank selections of the alleged offender(s) was (were) all enlisted members: **E5–E6** (39% of women and 43% of men), **E4** (33% of women and men), and **E1–E3** (29% of women and 30% of men). Taking into account the member's rank, over half of women (57%) and men (53%) indicated the alleged **offender was ranked higher than them**. This suggests those who indicated having experienced sexual assault are junior enlisted members who indicate being assaulted by someone who is slightly higher than them but within the enlisted ranks and is an area that could be further analyzed.

Reporting the One Situation

Most members who indicate having experienced sexual assault do not report to a military authority. In 2016, women (31%) were more likely than men (15%) to indicate **reporting sexual assault to the military**. Of the 69% of women and 85% of men who *did not report*, men (78%) were more likely than women (70%) to indicate they **never considered reporting and do not plan to**.

For those who reported to the military, over half of women (54%) and men (55%) **initially made an unrestricted report** and around one-third **initially made a restricted report** (35% of women and 31% of men). If restricted reporting was not an option, over half of DoD women (58%) **would not have reported**, emphasizing the importance of having a restricted reporting option available for members who experience sexual assault (results for DoD men were not reportable). For those that made a restricted report, they could have chosen to convert the report to unrestricted or an independent investigation could have occurred and resulted in a conversion to unrestricted. Therefore, the *final report disposition* for women and men were as follows: 73% of women and 61% of men had an **unrestricted report** while 18% of women and 23% of men still maintained a **restricted report**.

Members who reported their sexual assault to the military were asked to what extent they were provided information and support after reporting. Of the 31% of DoD women who indicated having reported a sexual assault to the military, more than half of women indicated they were **provided information on their right to consult a Special Victims' Counsel (SVC)/Victims' Legal Counsel (VLC) to a large extent** (60%) and were **provided safety planning information regarding their immediate situation and regular contact regarding their well-being to a large extent** (54% for both). Data were not presented for DoD men due to high margins of error. When asked more specifically about the extent to which their leadership took positive actions after the member made a report, women were *more likely* than men to indicate their **leadership expressed concern for their well-being to a large extent** (46% for women and 26% for men). Overall, men were *more likely* than women to indicate **their leadership did not at all provide positive actions as**

a result of reporting sexual assault. This suggests there is a need for increased leadership support for males who experience and report sexual assault.

Two of the top three reasons women and men chose to report sexual assault included wanting to stop the (alleged) offender from hurting others (53% for women and 45% for men) and wanting to stop the (alleged) offender from hurting them again (42% for women and 47% for men).

Additionally, women also reported because someone they told encouraged them to report (44%) and 41% of men indicated they reported because it was their civic or military duty to report it. Based on their overall experience of the reporting process and services available to members who report sexual assault, 67% of women and 59% of men would recommend others to report sexual assault should it happen to them.

For members who *did not report* their sexual assault to the military, the main reason provided was because they wanted to forget about it and move on (68% of women and 47% of men, both of which showed a statistically significant decrease from 2014 of 5 percentage points for women and 17 percentage points for men). The other two main reasons for not reporting included not wanting more people to know about the assault (58% of women and 39% of men) and they felt shamed or embarrassed (52% for women and 37% of men).

Members were asked if they could do it all over again, would they make the same decision on reporting sexual assault. Eleven percent of women and 7% of men indicated they would not make the same decision to report the sexual assault if they could do it over, which would result in a drop in the already low numbers of members reporting sexual assault. Almost half of women (49%) and over half of men (57%) indicated they would make the same decision to not report, supporting the statement where military members tend to not report sexual assaults to the military.

Negative Outcomes Associated With Reporting

The Department strives to create an environment where military members feel comfortable and safe reporting a potential sexual assault to a military authority. To further ensure a safe environment for reporting, the Department has been monitoring whether repercussions, i.e., retaliatory behavior, have resulted from reporting a sexual assault. Specifically, two forms of retaliatory behaviors have been outlined: professional reprisal and ostracism/maltreatment. Professional reprisal, used for purpose of this survey, is a personnel or other unfavorable action taken by the chain of command against an individual for engaging in a protected activity. Ostracism and maltreatment, however, can be negative behaviors, such as actions of social exclusion or misconduct against the military member taken by peers or an individual in a position of authority, because the member reported, or intends to report a criminal offense.

Until 2014, the Department used a general climate measure of “retaliation” to capture these potential experiences. Survey results on estimated rates of perceived experiences of both types of retaliatory behaviors by sexual assault survivors have been relatively constant since first measured in 2006. Specifically, survey findings have consistently shown that more than half of

female military members⁸ who made an unrestricted report perceived some amount of retaliatory behavior.⁹ Using this general measure, the Department was able to gauge perceptions of retaliatory behaviors, but this prior measure did not necessarily align with the specific requirements of policy to allow for an investigation. In 2015, the Secretary of Defense determined that more detailed information was needed on the circumstances of these perceived experiences. As a result, the Secretary of Defense directed the Department to “develop a DoD-wide comprehensive strategy to prevent retaliation against Service members who report or intervene on behalf of victims of sexual assault and other crimes.”¹⁰

This increased focus led to a number of new initiatives, including the revision of survey measures to be more consistent with the directives prohibiting retaliation.¹¹ To develop a more comprehensive measure, which was more consistent with law, but still allowed for measurement of general negative behaviors, SAPRO assembled a Retaliation Roundtable which included subject matter experts from across the Department along with other DoD stakeholders. The goal was to create a detailed set of survey items that more carefully measure ostracism/maltreatment and professional reprisal so that these outcomes associated with reporting a sexual assault could be better addressed by the Department.¹²

The new metric constructed by this group no longer refers to general “retaliation” and instead uses the terms explained previously for professional reprisal, ostracism, and maltreatment. Questions were designed to measure negative behaviors a respondent may have experienced as a result of making a sexual assault report and to account for additional motivating factors as indicated by the member that may be consistent with prohibited actions of professional reprisal, ostracism, and maltreatment in the Uniform Code of Military Justice (UCMJ) and military policies and regulations. This includes the alleged perpetrator having knowledge about the report and that the actions were perceived to be taken with a specific intent (i.e., to discourage the military member from moving forward with the report of sexual assault or to exclude them).

Survey questions are only able to provide a general understanding of the self-reported outcomes that may constitute reprisal, ostracism, or maltreatment and therefore we refer to such outcomes as “perceived.” Ultimately, only the results of an investigation (which takes into account all legal aspects, such as the intent of the alleged perpetrator) can determine whether self-reported negative behaviors meet the requirements of prohibited retaliation. The estimates presented in this section reflect the active duty members' perceptions about a negative experience associated with their reporting of a sexual assault and not necessarily a reported or legally substantiated incident of retaliation. As such, rates for these items are caveated as “perceived.”

⁸ Data for men were not reportable due to the small number of male respondents in this category.

⁹ DMDC (2012), Van Winkle, Rock, Coffey, & Hurley (2014), Morral, Gore, & Schell (2014).

¹⁰ Secretary of Defense (2015, May 1).

¹¹ The implementation of Section 1709(a) of the NDAA for FY 2014 requires the Secretary of Defense to prescribe regulations, or require the Secretaries of the military departments to prescribe regulations, that prohibit retaliation against an alleged victim or other member of the Armed Forces who reports a criminal offense. The section further requires that violation of those regulations be punishable under Article 92 of the UCMJ, 10 U.S.C. § 892 (2012).

¹² As legal definitions of retaliatory behaviors change, survey metrics will be re-evaluated to align with such changes.

Prior to categorizing members as experiencing “perceived” reprisal, ostracism, and/or maltreatment, members had to indicate experiencing a “potential” retaliatory action and/or behavior. Specifically, the member had to indicate experiencing any behavior consistent with professional reprisal or ostracism/maltreatment which would precede the questions to ascertain the member’s perception of the motivating factors of those perceived retaliatory behaviors. Therefore, there may be higher percentages of members who experience “potential” behaviors, but they do not, on their own reflect a “rate.” “Perceived” actions and/or behaviors are those retaliatory behaviors where potential behaviors were experienced and additional motivating factors, as indicated by the member, were present. Details about the construction of this new metric are included in Chapter 1.

Perceived Professional Reprisal. To be included in the estimated rate of perceived professional reprisal, members must have met the following criteria:

- Experienced a sexual assault in the past 12 months,
- Reported the assault to a military authority,
- Experienced at least one behavior consistent with professional reprisal perpetrated by someone in leadership (e.g., was demoted, denied promotion, rated lower than deserved, reassigned, made to perform additional duties, disciplined, etc.),
- Indicated the actions experienced were based only on their report of sexual assault (i.e., not based on conduct or performance), and
- Indicated leadership took these actions to get back at them for making a report, to discourage them from moving forward with the report, and/or because they were mad at them for causing problems.

Of the DoD women and DoD men who indicated experiencing a sexual assault in the past year and reported the assault to a military authority, 36% of women and half (50%) of men indicated experiencing [at least one behavior in line with potential professional reprisal](#), of which, 19% of women and 36% of men indicated experiencing [perceived professional reprisal](#) as a result of reporting sexual assault by meeting the additional motivating factors consistent with prohibited actions to get into the official rate.

Perceived Ostracism. To be included in the estimated rate of perceived ostracism, active duty members must have indicated the event met the following criteria:

- Experienced a sexual assault in the past 12 months,
- Reported the assault to a military authority,
- Experienced at least one behavior consistent with ostracism allegedly perpetrated by a peer or someone in a position of authority (e.g., made insulting or disrespectful remarks/jokes at your expense in public, excluded or threatened to exclude them from social activities/interactions, or ignored them),

- Indicated the alleged perpetrator(s) of the actions knew, or suspected, they had made a report of sexual assault, and
- Indicated the alleged perpetrators(s) took these actions to discourage them from moving forward with the report or discourage others from reporting.

Of the DoD women and DoD men who indicated experiencing a sexual assault in the past year and reported the assault to a military authority, over half (51%) of women and less than half (47%) of men indicated experiencing [at least one behavior in line with potential ostracism](#), of which, only 12% of women and 17% of men indicated experiencing [perceived ostracism](#) as a result of reporting sexual assault by meeting the additional motivating factors consistent with prohibited actions to get into the official rate.

Perceived Maltreatment. To be included in the estimated rate of perceived maltreatment, active duty members must have indicated the event met the following criteria:

- Experienced a sexual assault in the past 12 months,
- Reported the assault to a military authority,
- Experienced at least one behavior consistent with maltreatment allegedly perpetrated by a peer or someone in a position of authority (e.g., made insulting or disrespectful remarks/jokes at your expense in private, showed or threatened to show private images/photos/video to others, bullied them, was physically violent to them etc.),
- Indicated the alleged perpetrator(s) of the actions knew, or suspected, they had made a report of sexual assault, and
- Indicated the alleged perpetrators(s) took these actions to discourage them from moving forward with the report or discourage others from reporting and/or to abuse or humiliate them.

Of the DoD women and DoD men who indicated experiencing a sexual assault in the past year and reported the assault to a military authority, 38% of women and men indicated experiencing [at least one behavior in line with potential maltreatment](#), of which, 18% of women and 19% of men indicated experiencing [perceived maltreatment](#) as a result of reporting sexual assault by meeting the additional motivating factors consistent with prohibited actions to get into the official rate.

Perceived Professional Reprisal, Ostracism, and/or Maltreatment. To be included in the roll-up rate of perceived professional reprisal, ostracism, and/or maltreatment, active duty members must have met criteria for perceived professional reprisal, perceived ostracism, and/or perceived maltreatment.

Of the DoD women and DoD men who indicated experiencing a sexual assault in the past year and reported the assault to a military authority, 58% of women and 60% of men indicated experiencing [at least one behavior in line with potential professional reprisal, ostracism, and/or](#)

maltreatment. Of which, 28% of women and 42% of men indicated experiencing **perceived professional reprisal, ostracism, and/or maltreatment** as a result of reporting sexual assault by meeting the additional motivating factors consistent with prohibited actions to get into the official rate.

Sexual Harassment and Gender Discrimination

Sex-based Military Equal Opportunity (MEO) violations are defined as having at least one self-reported experience that meets the criteria for a DoD-based MEO violation of sexual harassment or gender discrimination. To obtain an estimated prevalence rate for sex-based MEO violations, two requirements must be met:

- Experience of sexual harassment (which includes sexually hostile work environment or sexual *quid pro quo*) and/or gender discrimination behavior(s) by someone in the 12 months prior to the survey and
- Meet at least one of the follow-up legal criteria required for an MEO violation.

Data in this section includes overall estimated prevalence rates for sexually hostile work environment, sexual *quid pro quo*, sexual harassment, gender discrimination, and the estimated overall sex-based MEO prevalence rate. Details on the construction of the sex-based MEO metrics can be found in Chapter 1.

Sexual Harassment Prevalence Rate Estimates

Sexual harassment includes sexually hostile work environment and sexual *quid pro quo*. The estimated prevalence rate for sexual harassment is a “roll up” of those who met criteria for the estimated sexually hostile work environment prevalence rate and/or those who met criteria for the estimated sexual *quid pro quo* prevalence rate.

Overall, 21.3% of DoD women and 5.6% of DoD men indicated experiencing a **sexually hostile work environment** in the past 12 months. Compared to 2014, there was a statistically significant *decrease* in the **sexually hostile work environment** rate for DoD men (1.0 percentage point), driven by a *decrease* for Army men of 1.7 percentage points from 2014 (6.0%). Fewer DoD women (2.2%) and DoD men (0.3%) indicated experiencing **sexual quid pro quo**. Compared to 2014, there was a statistically significant *increase* in the **sexual quid pro quo** rate for DoD women (0.5 percentage points), driven by an *increase* for Navy women of 1.2 percentage points from 2014 (3.4%).

If a member indicated they met criteria for either sexually hostile work environment or sexual *quid pro quo*, they are combined into the full estimated rate of sexual harassment. As estimated rates for sexually hostile work environment are typically higher than sexual *quid pro quo*, the former construct often drives the estimated sexual harassment rates (i.e., estimated sexual harassment rates typically align with rates for sexually hostile work environment). In 2016, 21.4% of DoD women and 5.7% of DoD men indicated experiencing **sexual harassment** in the past 12 months. For men, this showed a statistically significant *decrease* of 0.9 percentage points from 2014, driven by a statistically significant *decrease* for Army men of 1.7 percentage points (6.0%).

Gender Discrimination Prevalence Rate Estimates

Gender discrimination is defined as experiencing behaviors or comments directed at someone because of their gender that harmed or limited their career. To get into the estimated prevalence rate for gender discrimination, members must have indicated experiencing one of these behaviors and endorse a corresponding follow-up item that indicated the actions and/or beliefs harmed or limited their career.

In 2016, 14.1% of DoD women and 2.0% of DoD men indicated experiencing [gender discrimination](#) in the past 12 months. Compared to 2014, there was a statistically significant *increase* in the rate of [gender discrimination](#) for DoD women of 1.7 percentage points, which was driven by a statistically significant *increase* of 2.5 percentage points for Air Force women (9.2%).

Sex-Based MEO Violation Prevalence Rate Estimates

The estimated sex-based MEO violation prevalence rate is a “roll up” of those who met the requirements for inclusion into at least one of the following estimated prevalence rates: sexual harassment (sexually hostile work environment and/or sexual *quid pro quo*) and/or gender discrimination. In 2016, 26.5% of DoD women and 6.8% of DoD men indicated experiencing a [sex-based MEO violation](#).

Details of the Most Serious Sex-Based MEO Violation

As members who experience a sex-based MEO violation may often experience more than one violation, the 2016 WGRA asked the 26.5% of DoD women and the 6.8% of DoD men who indicated experiencing a sex-based MEO violation in the past 12 months to consider the situation that had the biggest effect on them. They were then asked specific questions on the circumstances surrounding this experience. Similar to the sexual assault section, in limiting responses to this one situation, overall burden on the respondent is minimized. The following details are of this most serious sex-based MEO violation allegation.

The vast majority of DoD women (95%) and DoD men (92%) indicated the unwanted situation occurred [at a military location](#), with 92% of women and 88% of men indicating it happened [at a military installation or ship](#). When asked about how long the unwanted situation continued, 40% of women and 32% of men indicated the situation continued for [a few months](#). Compared to 2014, there was a statistically significant *increase* for DoD men who indicated the situation occurred only [one time](#) (28%, increase of 7 percentage points from 2014) and a *decrease* in those who said the situation continued for [a year or more](#) (21%, down 8 percentage points from 2014).

Similar to the sexual assault one situation, members were asked if they would consider the unwanted behaviors they indicated having experienced to be hazing or bullying. Forty-two percent of both DoD women and DoD men indicated they would consider their situation to involve [bullying](#) and 17% of women and 25% of men would consider it as involving [hazing](#). Men (19%) were *more likely* than women (13%) to indicate the situation involved [both hazing and bullying](#), while women (28%) were *more likely* than men (22%) to indicate the situation involved [only bullying](#).

When asked if they took steps to leave or separate from the military based on the reported sex-based MEO experienced they considered to be the most serious, less than one-third of women (29%) and men (27%) indicated they did [take steps to leave](#).

Characteristics of the Alleged Offender in the Sex-Based MEO Violation One Situation.

Members who indicated experiencing a sex-based MEO violation were asked to provide details of the alleged offender in the one situation they considered to be the most serious. For women, 59% indicated [more than one alleged offender](#) was involved (a statistically significant *increase* of 22 percentage points compared to 2014), 77% indicated the alleged offender was [male](#) (a statistically significant *decrease* of 10 percentage points compared to 2014), and 19% indicated [both men and women](#) were involved in the one situation (statistically significant *increase* of 10 percentage points compared to 2014). With regards to the status of the alleged offender, 95% of women indicated [at least one of the alleged offenders were in the military](#). Forty-one percent of women indicated the alleged offender was [someone else in their chain of command](#) and 34% indicated it was [their immediate supervisor](#) or [some other higher ranking military member](#). With regards to the specific rank of the alleged offender, 53% of women identified the alleged offender as an [E5–E6](#), 36% as [E7–E9](#), and about one-quarter (26%) were ranked [E4](#).

For men, 57% indicated [more than one alleged offender](#) was involved (a statistically significant *increase* of 11 percentage points compared to 2014), 53% indicated the alleged offender was [male](#) (a statistically significant *decrease* of 14 percentage points compared to 2014), and 29% indicated [both men and women](#) were involved in the one situation (statistically significant *increase* of 13 percentage points compared to 2014). With regards to the status of the alleged offender, 92% of men indicated [at least one of the alleged offenders were in the military](#). Forty percent of men indicated the alleged offender was [someone else in their chain of command](#), 32% indicated it was [their immediate supervisor](#), and 31% indicated they were [some other higher ranking military member](#). With regards to the specific rank of the alleged offender, 55% of men identified the alleged offender as an [E5–E6](#), 34% as [E7–E9](#), and more than one-quarter (29%) were ranked [E4](#).

Reporting the Sex-Based MEO Violation One Situation. Similar to sexual assault, the majority of active duty members who indicated experiencing a sex-based MEO violation chose not to make a report or to discuss the situation with their supervisor and/or chain of command. However, rates of reporting to a supervisor or member of their chain of command were higher, potentially due to the ability to handle a sex-based MEO violation at the lowest level. Of those DoD women who indicated experiencing a sex-based MEO violation, 50% indicated they [reported and/or discussed the situation with their supervisor/someone in their chain of command](#). For DoD men who indicated experiencing a sex-based MEO violation, 37% indicated they [reported and/or discussed the situation with their supervisor/someone in their chain of command](#). Additional information about the actions taken as a result of the report can be found in Chapter 7.

Bystander Intervention

Prevention of sexual assault is a major line of effort for SAPRO. Part of this prevention effort places the onus on each member to uphold the values of dignity and respect and to confront appropriately those who do not maintain these values. To measure this aspect of prevention, the 2016 WGRA asked active duty members whether they witnessed a potential sexual assault

situation in the past year, and if so what were their actions in response to observing the situation, and what led them to decide to intervene.

The 2016 WGRA found that while few members observe potential sexual assault situations, the vast majority of members took action. Specifically, 8% of DoD women and 4% of DoD men indicated [observing a potential sexual assault situation](#), of which 92% of women and 89% of men [took action](#) as a result. To get a better idea about why members choose to intervene, the 2016 WGRA asked members what contributed to their decision to intervene. The top three responses for women and men were [it was the right thing to do](#) (95% for both women and men), [they were confident in their ability to prevent a sexual assault](#) (69% for women and 72% for men), and [they had a desire to uphold their core military values](#) (65% for women and 66% for men). Additional information on bystander intervention, along with training on sexual assault and sexual harassment, can be found in Chapters 8 and 9.

Leadership Climate

On the 2016 WGRA, active duty members were asked to rate how well members they interact with across ranks demonstrate positive workplace behaviors and actions. Examples of some of the behaviors and actions include making it clear that sexual assault has no place in the military, leading by example by refraining from sexist comments and behaviors, encouraging bystander intervention, and encouraging victims to report sexual assault. Members were asked how well each of the following ranking groups demonstrated these behaviors/actions: E1–E3, E4, E5, E6, E7–E9, O1–O3, O4–O6, O7 and above, and W1–W5.

Overall, DoD women and men indicated members ranked [E1–E3](#) lower overall for encouraging, promoting, and/or demonstrating positive workplace actions or behaviors, while members ranked [O4–O6](#) and [O7 and above](#) better overall. The results suggest junior enlisted members do not promote positive workplace behaviors as well as those ranked higher than them, such as senior enlisted members and officers. Given the large percentage of active duty members indicating they are being sexually assaulted by the more junior enlisted members, targeted improvements in positive workplace behaviors and actions are needed for this group of active duty members.

Additional Analyses

An Analysis of Males Who Indicated Experiencing Sexual Assault

The 2016 prevalence rate of sexual assault was 0.6% for DoD men. Given the large male population in the DoD Services, this equates to a substantial number of survivors. Most of the research examining sexual assault has focused on women given that they are at higher risk for sexual assault than men. However, it is crucial to consider the unique experiences of men who experience sexual assault with an eye toward prevention and response. Therefore, OPA examined the demographic profile of men who indicated experiencing sexual assault before turning to an in-depth examination of hazing and bullying, both of which affect men to a larger degree than women.

Most men who indicated experiencing sexual assault were younger than 25 years of age, enlisted, and within their first five years of service. Targeting efforts toward this population is especially important as these individuals are more likely to experience sexual assault.

One key area in which gender differences emerged is the characterization of the one sexual assault situation with the largest effect as hazing or bullying, as men were far more likely than women to characterize the one situation as hazing or bullying. The demographic profile of men who characterize the one situation as hazing or bullying is largely similar to those who do not, though small differences were observed for level of education, paygrade, and age. However, hazing- and bullying-related sexual assault situations differ from non-hazing and non-bullying situations in several ways. For example, compared to men who did not characterize the one situation as hazing, men who characterized the one situation as hazing were more likely to indicate multiple alleged offenders were involved, both men and women were involved, and alleged offenders were all military members. This fits with the definition of hazing, which generally involves group members engaging in actions intended to humiliate or otherwise abuse a potential new group member. Men who characterized the one situation as hazing or bullying indicated multiple people were often involved and they experienced stalking and/or sexual harassment before the assault, which may indicate such assaults are planned as opposed to spontaneous events. This may be an area of prevention where if others (either leadership or peers) hear about an assault being planned, they may intervene or alert the appropriate party. The finding that alcohol is less likely to be involved in situations characterized as hazing or bullying also lends some support to this notion, as it implies that hazing and bullying are not fueled by impulse-inhibiting substances.

Men who characterized their experience as hazing or bullying were especially likely to indicate the alleged offender(s) was (were) of a higher rank, which may indicate alleged offenders are targeting lower-ranking service members. A power differential between the offender and victim is common in hazing and bullying dynamics and it appears that this finding extends to male Service members. Men who characterized their experience as hazing indicated lower levels of satisfaction with support provided by their unit commander/director and immediate supervisor after the assault. It may be that some higher ranking individuals are permissive of hazing and, at worst, engage in hazing. Accordingly, it is sensible that hazing victims would perceive lower levels of support from these individuals. Additional training on prohibitions against hazing and bullying and how to respond in hazing and bullying situations may be helpful for leadership.

Men who characterized the situation as hazing or bullying were also likely to experience multiple sexual assault incidents over the past 12 months, which indicates that they are repeatedly victimized. This is consistent with the definition of bullying, which entails repeated abuse. This pattern is especially concerning given that repeated sexual abuse is associated with particularly negative outcomes (Creech & Orchowski, 2016).

Workplace climate perceptions also appear to have a relationship with hazing- and bullying-related sexual assault. Men who characterized their sexual assault experience as hazing or bullying were more likely to perceive high levels of workplace hostility than were men who did not. Given that alleged perpetrators of hazing- and bullying-related sexual assault are overwhelmingly coworkers of survivors (i.e., fellow Service members); it follows that survivors of sexual assault might perceive their workplace as especially hostile. In a similar vein, men who characterized sexual assault as hazing or bullying were less likely to indicate that their fellow service members at various paygrades exhibited behaviors consistent with a healthy climate with respect to sexual assault. Again, if a survivor's coworker(s) is (are) perpetrating sexual assault, perceptions of healthy climate with respect to sexual assault are likely to be low.

It is not possible to determine the direction of the relationship between workplace climate and the actual occurrence of sexual assault given the data available. However, these results suggest that environments that are high on workplace hostility and/or have an unhealthy climate with respect to sexual assault are associated with hazing- and bullying-related sexual assault.

Finally, men who characterized their sexual assault experiences as either hazing or bullying were more likely to indicate they had taken steps to separate from the military than those who did not characterize the situation as such. Men who characterized the one situation as bullying were less likely to indicate that they would choose to remain on active duty if given the choice.

Accordingly, hazing- and bullying-related sexual assault may represent a threat to readiness given its effect on retention.

Overall, this detailed information on experiences of males who experience sexual assault may be used to inform prevention efforts with the goal of eliminating these damaging behaviors. Details on this analysis are provided in Chapter 11.

Continuum of Harm

Scientific survey data provides the Department with force-wide estimated prevalence rates on a variety of critical measures and allows for data-driven decisions for policies and resources impacting military members. However, survey data alone may sometimes fail to detect important patterns and interrelationships within the data. As such, additional analyses can identify additional findings to help better understand the top-line survey results. For the *2016 WGRA*, OPA conducted a number of additional analyses, one of which examined the continuum of harm among active duty members who indicated experiencing a sexual assault. This full analysis can be found in Chapter 12.

In the realm of sexual assault, the continuum of harm describes “inappropriate actions, such as sexist jokes, hazing, and cyber bullying that are used before or after the assault and or supports an environment which tolerates these actions” (Department of Defense, 2014a). Results from the *2016 WGRA* showed that DoD active duty members who indicated experiencing unwanted gender-related behaviors were more likely to indicate experiencing a sexual assault. More specifically, those who indicated experiencing a sex-based MEO violation such as sexual harassment (i.e., a sexually hostile work environment and/or sexual quid pro quo) and/or gender discrimination were more likely to indicate experiencing sexual assault than those who did not.

Various workplace factors were also assessed in relation to sexual assault because such factors might contribute to a culture that is tolerant of, or increases risk for, sexual assault. Results from this analysis demonstrated that high levels of workplace hostility, an unhealthy enlisted and officer climate with respect to sexual assault, quality of training, and low presence of female coworkers¹³ were all related to increased likelihood of sexual assault. Of note, enlisted climate and workplace hostility had a strong association with sexual assault. While a climate of high workplace hostility was predictive of higher rates of sexual assault/harassment, a healthy climate with low workplace hostility had a protective effect against sexual assault, even when sexual

¹³ Low presence of female coworkers was not a significant finding for DoD men.

harassment was present. Findings from this analysis support the Department's increased emphasis on leadership engagement and a healthy climate when addressing these issues.

Analysis of LGBT Service Members

Prior to 2016, the Department had not established sexual assault and sexual harassment prevalence rates for those Service members who identify as LGBT. In the civilian sector, rates of sexual assault and harassment are higher for individuals that identify as lesbian, gay, bisexual or transgender (LGBT). The 2016 WGRA included questions addressing sexual orientation and transgender identity to gain a better understanding of the risk of sexual assault and sexual harassment for military members identifying as LGBT and will assist in improved prevention and targeted response efforts for these members.

To analyze experiences of unwanted gender-related behaviors among members who identify as LGBT, responses to the sexual orientation and transgender questions were combined to form two groups: those identifying as LGBT and those who do not. As a result, in 2016 5% of DoD active duty members indicated they identify as LGBT, with 12% of DoD women and 3% of DoD men indicated they identify as LGBT.

Overall, DoD members *identifying as LGBT* were more likely than members who *do not identify as LGBT* to experience unwanted gender-related behaviors:

- Sexual Assault Prevalence Rate: 4.5% for members *identifying as LGBT* and 0.8% for those who *do not identify as LGBT*,
- Sexual Harassment Prevalence Rate: 22.8% for members *identifying as LGBT* and 6.2% for those who *do not identify as LGBT*, and
- Gender Discrimination Prevalence Rate: 8.8% for members *identifying as LGBT* and 3.2% for those who *do not identify as LGBT*.

Given the increased odds members identifying as LGBT have for experiencing unwanted gender-related behaviors, further research should be conducted to explore what makes this population more vulnerable to such crimes. Similar to the research provided on the experience of male victims, analysis of LGBT members who indicate experiencing sexual assault would provide a more in-depth look of their experiences and provide the Department with valuable information on how to better support and increase prevention for this vulnerable population.

Study Background.....	v
Survey Methodology.....	vi
Summary of Top-Line Results	viii
Sexual Assault Among Active Duty Members	viii
Sexual Assault Prevalence Rate Estimates	viii
Type of Sexual Assault Members Indicated Experiencing.....	ix
Details of the Most Serious Assault Members Indicated Experiencing	ix
Characteristics of the Alleged Offender in the One Situation	x
Reporting the One Situation.....	xi
Negative Outcomes Associated With Reporting	xii
Perceived Professional Reprisal.....	xiv
Perceived Ostracism.....	xiv
Perceived Maltreatment.	xv
Perceived Professional Reprisal, Ostracism, and/or Maltreatment.....	xv
Sexual Harassment and Gender Discrimination	xvi
Sexual Harassment Prevalence Rate Estimates	xvi
Gender Discrimination Prevalence Rate Estimates	xvii
Sex-Based MEO Violation Prevalence Rate Estimates	xvii
Details of the Most Serious Sex-Based MEO Violation.....	xvii
Characteristics of the Alleged Offender in the Sex-Based MEO Violation One Situation.	xviii
Reporting the Sex-Based MEO Violation One Situation.	xviii
Bystander Intervention.....	xviii
Leadership Climate	xix
Additional Analyses.....	xix
An Analysis of Males Who Indicated Experiencing Sexual Assault.....	xix
Continuum of Harm	xxi
Analysis of LGBT Service Members.....	xxii

Chapter 1: Introduction

Ms. Lisa Davis and Ms. Amanda Grifka

To address unwanted gender-related issues in the military, each of the Services and Department of Defense (DoD) has implemented and expanded sexual assault and sexual harassment programs to provide reporting options and survivor care procedures. Continuing evaluation of these programs through cross-component surveys is important to identifying areas of improvement for reducing instances of sexual assault and sexual harassment of military members. This report presents findings from the *2016 Workplace and Gender Relations Survey of Active Duty Members (2016 WGRA)*, a source of information for evaluating these programs and for assessing the gender relations environment across the Services. This introductory chapter provides background on why this survey was conducted, a summary of recent DoD policies and programs associated with gender-relations issues, a review of the survey measures, and an overview of the report chapters.

References to perpetrator/offender throughout this report should be interpreted as “alleged perpetrator” or “alleged offender.” Without knowing the specific outcomes of particular allegations, the presumption of innocence applies unless there is an adjudication of guilt. References to “retaliation,” “reprisal,” “ostracism,” or “maltreatment,” or perceptions thereof are based on the negative behaviors as reported by the survey respondents; without knowing more about the specifics of particular cases or reports, this data should not be construed as substantiated allegations of reprisal, ostracism, or maltreatment. Therefore, no legal conclusions can be drawn on whether behaviors meet the definition of an offense having been committed.

DoD Sexual Assault and Equal Opportunity Programs and Policies

The Defense Research, Surveys, and Statistics Center (RSSC), within the Office of People Analytics (OPA),¹⁴ has been conducting the congressionally-mandated gender relations survey of active duty members since 1988 as part of a quadrennial cycle of human relations surveys outlined in Title 10 U. S. Code Section 481. Past surveys of this population were conducted by OPA in 1988, 1995, 2002, 2006, 2010, and 2012. At the request of Congress, the RAND Corporation conducted the *2014 RAND Military Workplace Study (2014 RMWS)* of military members (both the active duty and Reserve components) to provide an independent assessment of unwanted gender-related behaviors in the military force. The measures for sexual assault and Military Equal Opportunity (MEO) violations developed by RAND for use in the *2014 RMWS* will be used in Workplace and Gender Relations (WGR) surveys hereafter.

As a result of the gender relations surveys being moved to a biennial cycle starting in 2013 as mandated by the National Defense Authorization Act (NDAA) Fiscal Year 2013 Section 570, OPA conducted the *2016 WGRA*. This section provides a review of DoD sexual assault and sexual harassment policies and programs, which acts as a foundation for the establishment and

¹⁴ Before 2016, the Defense Research, Surveys, and Statistics Center (RSSC) resided within the Defense Manpower Data Center (DMDC). In 2016, the Defense Human Resources Activity (DHRA) reorganized and moved RSSC under the newly established Office of People Analytics (OPA).

requirements of the 2016 *WGRA*, as well as a description of how results are presented in this report.

DoD Sexual Assault Prevention and Response Policies

Program Oversight

In February 2004, the then-Undersecretary of Defense for Personnel and Readiness (USD[P&R]) testified before the Senate Armed Services Committee on the prevalence of sexual assault in the DoD and the programs and policies planned to address this issue. In accordance with legislative requirements (Ronald W. Reagan National Defense Authorization Act [NDAA] for Fiscal Year 2005), the USD(P&R) issued memoranda to the Services in November and December 2004 to provide DoD policy guidance on sexual assault, including a new standard definition, response capability, training requirements, response actions, and reporting guidance throughout the Department.

DoD Directive (DoDD) 6495.01 charged the USD(P&R) with implementing the Sexual Assault Prevention and Response (SAPR) program and monitoring compliance with the Directive through data collection and performance metrics. It established the DoD Sexual Assault Prevention and Response Office (SAPRO) within the Office of the USD(P&R) to address all DoD sexual assault policy matters, except criminal investigations and legal processes within the responsibility of the Offices of the Judge Advocates General in the Military Departments. DoD SAPRO supported implementation of this new policy and required data to continually assess the prevalence of sexual assault in the Department and the effectiveness of the programs and resources they implemented.

DoD refined its policy on sexual assault prevention and response through a series of directives issued in late 2004 and early 2005. DoDD 6495.01, “Sexual Assault Prevention and Response (SAPR) Program,” was reissued in January 2012, and then updated again in April 2013 and January 2015 by the then-Deputy Secretary of Defense and USD(P&R), to implement DoD policy and assign responsibilities for the SAPR program on prevention of, and response to, sexual assault and the oversight of these efforts. DoDD 6495.01 established a comprehensive DoD policy on the prevention and response to sexual assault (Department of Defense, 2015b). The policy states:

“The DoD goal is a culture free of sexual assault, through an environment of prevention, education and training, response capability (defined in Reference C), victim support, reporting procedures, and appropriate accountability that enhances the safety and well-being of all persons covered by this directive and Reference C.”¹⁵

In addition, the updated 2015 DoD Directive mandated standardized requirements and documents, an immediate, trained response capability at all permanent and deployed locations, effective awareness and prevention programs for the chain of command, and options for both

¹⁵ “Reference C” is Department of Defense. (2008). Sexual assault prevention and response program procedures. (DoD Instruction 6495.02). Washington, DC: Author.

restricted and unrestricted reporting of sexual assaults.¹⁶ It also prohibited the enlistment or commissioning of people convicted of sexual assault.

Defining Sexual Assault

DoDD 6495.01 defines sexual assault as any “intentional sexual contact characterized by use of force, threats, intimidation, or abuse of authority or when the victim does not or cannot consent” (Department of Defense, 2015). Under this definition, sexual assault includes rape, aggravated sexual contact, abusive sexual contact, forcible sodomy (forced oral or anal sex), or attempts to commit these acts. “Consent” shall not be deemed or construed to mean the failure by the victim to offer physical resistance. DoDD 6495.01 defines “consent” as:

“A freely given agreement to the conduct at issue by a competent person. An expression of lack of consent through words or conduct means there is no consent. Lack of verbal or physical resistance or submission resulting from the use of force, threat of force, or placing another person in fear does not constitute consent. A current or previous dating or social or sexual relationship by itself or the manner of dress of the person involved with the accused in the sexual conduct at issue shall not constitute consent. A sleeping, unconscious, or incompetent person cannot consent” (Department of Defense, 2015b).

In Section 522 of the NDAA for FY 2006, Congress amended the Uniform Code of Military Justice (UCMJ) to consolidate and reorganize the array of military sex offenses. These revised provisions took effect October 1, 2007. Article 120, UCMJ, was subsequently amended in FY2012.

As amended, Article 120, UCMJ, “Rape, Sexual Assault, and Other Sexual Misconduct,” defines rape as “a situation where any person causes another person of any age to engage in a sexual act by: (1) using unlawful force; (2) causing grievous bodily harm; (3) threatening or placing that other person in fear that any person will be subjected to death, grievous bodily harm, or kidnapping; (4) rendering the person unconscious; or (5) administering a substance, drug, intoxicant, or similar substance that substantially impairs the ability of that person to appraise or control conduct” (Title 10 U.S. Code Section 920, Article 120). Article 120 of the UCMJ defines “consent” as “words or overt acts indicating a freely given agreement to the sexual act at issue by a competent person.” The term is further explained as:

- An expression of lack of consent through words or conduct means there is no consent
- Lack of verbal or physical resistance or submission resulting from the accused’s use of force, threat of force, or placing another person in fear does not constitute consent
- A current or previous dating relationship by itself or the manner of dress of the person involved with the accused in the sexual conduct at issue shall not constitute consent

¹⁶ Restricted reporting allows a sexual assault victim to confidentially disclose the details of the assault to specified individuals and receive medical treatment and counseling without prompting an official investigation. Unrestricted reporting is for sexual assault victims who want medical treatment, counseling, command notification, and an official investigation of the assault.

- A person cannot consent to sexual activity if he or she is “substantially incapable of appraising the nature of the sexual conduct at issue” due to mental impairment or unconsciousness resulting from consumption of alcohol, drugs, a similar substance, or otherwise, as well as when the person is unable to understand the nature of the sexual conduct at issue due to a mental disease or defect
- Similarly, a lack of consent includes situations where a person is “substantially incapable of physically declining participation” or “physically communicating unwillingness” to engage in the sexual conduct at issue

As described above, the DoDD 6495.01 was revised on October 1, 2007, to be consistent with these changes. It was also subsequently revised January 23, 2012.

DoD Equal Opportunity Sexual Harassment and Gender Discrimination Policies

Program Oversight

The Office of Diversity Management and Equal Opportunity (ODMEO) is the primary office within DoD that sets and oversees equal opportunity policies. ODMEO monitors the prevention and response of sexual harassment and gender discrimination. The overall goal of ODMEO is to provide an “environment in which Service members are ensured an opportunity to rise to the highest level of responsibility possible in the military profession, dependent only on merit, fitness, and capability” (DoDD 1350.2).

Defining Sexual Harassment and Gender Discrimination

The DoD military sexual harassment policy was defined in 1995, and revised in 2015, in DoDD 1350.2 as:

“A form of sex discrimination that involves unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature when:

- Submission to such conduct is made either explicitly or implicitly a term or condition of a person’s job, pay, or career, or
- Submission to or rejection of such conduct by a person is used as a basis for career or employment decisions affecting that person, or
- Such conduct has the purpose or effect of unreasonably interfering with an individual’s work performance or creates an intimidating, hostile, or offensive working environment.¹⁷

Workplace conduct, to be actionable as ‘abusive work environment’ harassment, need not result in concrete psychological harm to the victim, but rather need only be so severe or

¹⁷ NDAA for FY2017 amended this definition by eliminating the word “working.” However, data captured in this survey is based on the definition in effect at the time of the survey administration in July 2016.

pervasive that a reasonable person would perceive, and the victim does perceive, the work environment as hostile or offensive” (Department of Defense, 2015c).

Gender discrimination is defined in DoDD 1350.2 as “unlawful discrimination” in which there is discrimination based on “sex that is not otherwise authorized by law or regulation” (Department of Defense, 2015c).

Measurement of Constructs

Historically, OPA gender relations surveys have been designed to estimate the perceived experiences of sexual harassment and sexual assault in the Services based on self-reported responses from Service members to provide information on a variety of consequences of sexual harassment and sexual assault experiences (Bastian, Lancaster, & Reist, 1996). Prior to 2014, the OPA gender relations surveys captured experiences of sexual assault through its Unwanted Sexual Contact (USC) measure and experiences of sexual harassment were derived from the Sexual Experiences Questionnaire (SEQ; Fitzgerald et al., 1988; Fitzgerald, Gelfand, & Drasgow, 1995), which was adapted for a military population (SEQ-DoD) and was the DoD-approved data collection method for measuring sexual harassment experiences starting in 2002. These measures were used on surveys conducted in 2006, 2010, and 2012 of active duty members and in 2008 and 2012 of Reserve component members. The *2016 WGRA* covers sexual assault and MEO violations described in detail below.

Sexual Assault

In 2014, Congressional leaders requested DoD update its survey methodology to be more specific with regard to the types of crimes military members’ experience. The RAND Corporation developed a new measure of sexual assault incorporating UCMJ-prohibited behaviors and consent factors to derive prevalence rates of crimes committed against military members (Morrall, Gore, & Schell, 2014). This 94-item measure of sexual assault aligned with the elements of proof required for sexual assault under Article 120, UCMJ, and meets the requirements outlined by Congress. This measure was approved by the Secretary of Defense and the Service Chiefs as the crime victimization measure of sexual assault for DoD and was first used on the *2014 RMWS*.

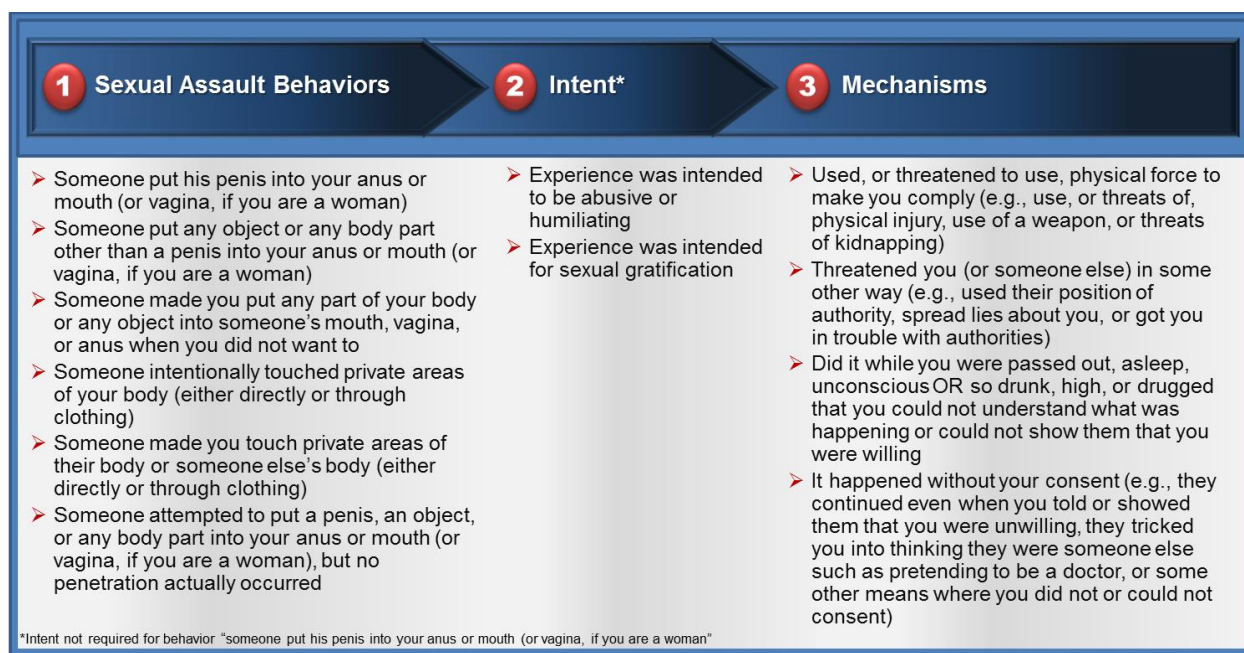

Construction of Sexual Assault Prevalence Rates

Following the guidelines set forth in the *2014 RMWS*, to meet the elements of proof for sexual assault within the UCMJ, OPA used the same steps to construct prevalence rates of sexual assault in the *2016 WGRA*. Sexual assault offenses refer to a range of **behaviors** prohibited by the UCMJ and include: penetrative sexual assault (completed sexual intercourse, sodomy [oral or anal sex], and penetration by an object); non-penetrative sexual assault (unwanted touching of genitalia and other sexually related areas of the body); and attempted penetrative sexual assault (attempted sexual intercourse, sodomy [oral or anal sex], and penetration by an object). Second, these behaviors must be done with the **intent** to either gratify a sexual desire or to abuse, humiliate, or degrade (with the exception of penetration with a penis where intent is not required to meet the criminal elements of proof). Finally, the UCMJ requires that a **mechanism** such as force or threats must be used or, in instances where the assault happened while the victim was

unconscious or drugged, the offender behaved fraudulently, or the victim was unable to provide consent.

As shown in Figure 1, within the *2016 WGRA*, the sexual assault measure is constructed from Q65–Q106 and contains three requirements: (1) the member must indicate experiencing at least one of the six UCMJ-based sexual assault **behaviors**, (2) at least one UCMJ-based **intent** behavior where required,¹⁸ and (3) at least one UCMJ-based coercive **mechanism** that indicated consent was not freely given. If a respondent indicates experiencing any sexual assault behavior classified as meeting the intent and mechanism criteria for a sexual assault, they would only see questions for the remaining sexual assault behaviors—they would not see the follow-up questions on intentions and consent mechanisms for additional behaviors experienced. Additionally, respondents who indicated the incident occurred outside of the past 12 months are coded as “No” for the behaviors they experienced (Q167–Q169). References to past-year sexual assault prevalence rates in this report all require the members to have indicated this time frame.

Figure 1.
Sexual Assault Prevalence Rate Metrics

Using the criteria listed in Figure 2 the *2016 WGRA* produced estimated prevalence rates for three categories of sexual assault using a hierarchical system: **penetrative** sexual assault, **non-penetrative** sexual assault, and **attempted** penetrative sexual assault. Penetrative sexual assault

¹⁸ Intent items were not a requirement for “someone put his penis into your anus or mouth (or vagina, if you are a woman).”

includes members who indicated “Yes” to any of the items that assess penetration of the vagina, anus, or mouth. Non-penetrative sexual assault includes members who indicated “Yes” to either of the behaviors assessing unwanted sexual touching and were not previously counted as penetrative sexual assault. Attempted penetrative sexual assault includes members who indicated “yes” to the item that assesses attempted sexual assault and were not previously counted as having experienced either penetrative or non-penetrative sexual assault. Each of these behaviors must have met the appropriate criteria for the behavior to be included in the prevalence rates. Since the 2016 WGRA and the 2014 RMWS used the same hierarchical measure, OPA is able to provide DoD with comparable estimated sexual assault prevalence rates between 2014 and 2016.

Figure 2.
Hierarchy of Estimated Sexual Assault Prevalence Rates

Sex-Based Military Equal Opportunity (MEO) Violations

Construction of MEO Violation Prevalence Rates

Following the 2014 RMWS guidelines, OPA used a two-step process to determine sex-based MEO violation prevalence rates. First, questions were asked about whether members experienced behaviors prohibited by MEO policy by someone from their military workplace and the circumstances of those experiences. Second, the behaviors were categorized into two types of MEO violations—sexual harassment (defined as either sexually hostile work environment or sexual *quid pro quo*) and gender discrimination—to produce estimated prevalence rates for these two categories.

Similar to the multi-faceted requirements of the new UCMJ-based criminal measure of sexual assault, two requirements are needed in the MEO measure for behaviors experienced to be in violation of DoD policy (DoDD 1350.2). First, MEO offenses refer to a range of sex-based

MEO violations specified by DoDD 1350.2 and include indicating experiencing either sexual harassment (sexually hostile work environment or sexual *quid pro quo*) and/or gender discriminatory behaviors by someone from their military workplace. Second, the member also had to indicate “Yes” to one of the follow-up items assessing persistence and severity of the behaviors experienced.¹⁹

Prevalence rates of sex-based MEO violations were derived from Q8–Q47 and represent a continuum of behaviors, including sexual harassment (sexually hostile work environment and sexual *quid pro quo*) and gender discrimination. The behaviors comprising each of the included MEO violations are described below, with details on prevalence rate construction depicted in Figure 3.

- *Sexual Harassment* (Q8–Q22 and Q25–Q45) includes two behaviors:
 - *Sexually Hostile Work Environment* (Q8–Q20 and Q25–Q43): Includes unwelcome sexual conduct or comments that interfere with a person’s work performance or creates an intimidating, hostile, or offensive work environment, or where the conduct is a condition of a person’s job, pay, or career. Additionally, these behaviors have to either continue after the alleged offender knew to stop, or were so severe that most Service members would have found them offensive, to meet the criteria for inclusion in the prevalence rate.
 - *Sexual Quid Pro Quo* (Q21–Q22 and Q44–Q45): Includes instances of job benefits or losses conditioned on sexual cooperation.
- *Gender Discrimination* (Q23–Q24 and Q46–Q47): Includes comments and behaviors directed at someone because of his/her gender and these experiences harmed or limited his/her career.

¹⁹ The behavior “Intentionally touched you in a sexual way when you did not want them to” does not require any legal criteria follow-up questions. The behavior “Took or shared sexually suggestive pictures or videos of you when you did not want them to and it made you uncomfortable, angry, or upset” does not require the persistence follow-up criteria—only the severity criteria is required.

Figure 3.
Sex-Based MEO Violation Prevalence Rate Metrics

1 Experienced at least one sex-based behavior

2 Met the legal criteria

Sexually Hostile Work Environment

- Repeatedly told sexual "jokes" that made you uncomfortable, angry, or upset
- Embarrassed, angered, or upset you by repeatedly suggesting that you do not act like a [man][woman] is supposed to
- Repeatedly made sexual gestures or sexual body movements that made you uncomfortable, angry, or upset
- Displayed, showed, or sent sexually explicit materials like pictures or videos that made you uncomfortable, angry, or upset
- Repeatedly asked you questions about your sex life or sexual interests that made you uncomfortable, angry, or upset
- Repeatedly told you about their sexual activities in a way that made you uncomfortable, angry, or upset
- Made repeated sexual comments about your appearance or body that made you uncomfortable, angry, or upset
- Took or shared sexually suggestive pictures or videos of you when you did not want them to that made you uncomfortable, angry, or upset*
- Made repeated attempts to establish an unwanted romantic or sexual relationship with you that made you uncomfortable, angry, or upset
- Intentionally touched you in a sexual way when you did not want them to**
 - Repeatedly touched you in any other way that made you uncomfortable, angry, or upset
- They continued this unwanted behavior even after they knew that you or someone else wanted them to stop
- This was severe enough that most Service members would have been offended

Sexual Quid Pro Quo

- Made you feel as if you would get some workplace benefit in exchange for doing something sexual
- Made you feel like you would get punished or treated unfairly in the workplace if you did not do something sexual
- They told you that they would give you a reward or benefit for doing something sexual
- They hinted that you would get a reward or benefit for doing something sexual
- Someone else told you they got benefits from this person by doing sexual things

Gender Discrimination

- Said that [men][women] are not as good as [women][men] at your particular job, or that [men][women] should be prevented from having your job
- Mistreated, ignored, excluded, or insulted you because you are a [man][woman]
- Their beliefs about men/women harmed or limited your job/career
- This treatment harmed or limited your job/career

*Only required the criteria of being severe enough that most Service members would have been offended

**Did not require any follow-up criteria

Negative Outcomes Associated With Reporting a Sexual Assault

The DoD strives to create an environment where military members feel comfortable and safe reporting a potential sexual assault to a military authority. One area the DoD has been monitoring is repercussions (i.e., retaliatory behaviors as a result of reporting sexual assault). Specifically, three forms of retaliatory behaviors have been outlined: professional reprisal, ostracism, and maltreatment. Professional reprisal, as defined in law and policy, is a personnel or other unfavorable action taken by the chain of command against an individual for engaging in a protected activity. Ostracism and maltreatment, however, can be negative behaviors, such as actions of social exclusion (ostracism) or misconduct against the member taken either by peers or an individual in a position of authority (maltreatment), because the military member reported, or intends to report, a criminal offense. The DoD's ability to deter retaliatory behavior was strengthened by section 1714 of the NDAA for FY 2014, enhancing the protections in section 1034 of Title 10, USC. Protections were also strengthened for military members by section 1709, which requires the promulgation of regulations to punish retaliatory behaviors.

Both OPA and RAND survey results on rates of perceived experiences of members who made a report of sexual assault have been relatively constant for these types of retaliatory behavior since first measured in 2006. Specifically, survey findings have consistently shown that more than half of female members²⁰ who made a report perceived some amount of retaliatory behavior.²¹ Therefore, in 2015, the Secretary of Defense determined that more detailed information was needed on the circumstances of these perceived experiences. As a result, the Secretary of Defense directed “that we develop a DoD-wide comprehensive strategy to prevent retaliation against Service members who report or intervene on behalf of victims of sexual assault and other crimes.”²²

This increased focus on retaliation led to a number of new initiatives, including the revision of survey measures to be consistent with the directives prohibiting retaliation and behaviors that allow for departmental action. The implementation of Section 1709(a) of the NDAA for FY 2014 requires the Secretary of Defense to prescribe regulations, or require the Secretaries of the military departments to prescribe regulations that prohibit retaliation against an alleged victim or other member of the Armed Forces who reports a criminal offense. The section further requires that violation of those regulations be punishable under Article 92 of the UCMJ, 10 U.S.C. § 892.

To develop the new comprehensive measures, SAPRO assembled a Retaliation Roundtable, made up of subject matter experts from across the DoD, including representatives from each Service. The goal was to create a detailed set of survey items to more accurately measure perceptions of ostracism, maltreatment, and professional reprisal to better address these potential negative outcomes associated with reporting a sexual assault.

Construction of Metric for Perceived Retaliatory Behaviors

OPA worked closely with the Services and DoD stakeholders to design behaviorally based questions to better capture perceptions of a range of outcomes resulting from reporting sexual assault. The resulting bank of questions were designed to measure negative behaviors a member may have experienced as a result of making a report of sexual assault and to account for additional motivating factors, as indicated by the member, consistent with prohibited actions of professional reprisal, ostracism, and maltreatment in the UCMJ and military policies and regulations. In this way, these questions are able to provide the Department with perceived experiences of the respondents for each of the different types of possible retaliatory behaviors as well as various “roll-up” scales to obtain broader understanding of the issue. These items were reviewed and approved by all Services through the Retaliation Roundtable convened by SAPRO in June 2015. They were also reviewed by SAPRO’s Retaliation, Response, and Prevention Strategy working group in Spring 2016, whose feedback was incorporated into the metric.

Survey questions are only able to provide a general understanding of the self-reported outcomes that may constitute reprisal, ostracism, or maltreatment, and therefore, are referred to as “perceived.” Ultimately, only the results of an investigation (which takes into account all legal aspects, such as the intent of the alleged perpetrator) can determine whether self-reported

²⁰ Data for men were not reportable due to the small number of male respondents in this category.

²¹ DMDC (2012), DMDC (2014a), and Morral, Gore, & Schell (2014).

²² Secretary of Defense (2015, May 1)

negative behaviors meet the requirements of prohibited retaliatory behaviors. The estimates presented in this report reflect the members' perceptions about a negative experience associated with their reporting of sexual assault and not necessarily a reported or legally substantiated incident of retaliation. As such, rates for these items are caveated as "perceived."

Before categorizing members as experiencing "perceived" professional reprisal, ostracism, and/or maltreatment, members had to indicate experiencing a "potential" retaliatory action and/or behavior. Specifically, the member had to indicate experiencing any behavior consistent with professional reprisal, ostracism, or maltreatment, which would precede the questions to ascertain the member's perception of the motivating factors of that perceived retaliatory behavior. Therefore, there may be higher percentages of members who indicated experiencing "potential" behaviors, but they do not, on their own, reflect a "rate." "Perceived" actions and/or behaviors are those retaliatory behaviors in which potential behaviors were experienced and additional motivating factors were present as indicated by the member. Construction of perceived rates of professional reprisal, ostracism, and maltreatment are based on general policy prohibitions. Perceived rates should not be construed as a legal crime victimization rate due to slight differences across the Services on the definition of behaviors and requirements of retaliation and slight differences in the absence of an investigation being conducted to determine a verified outcome.

Perceived Professional Reprisal. (Q143–145): Under the UCMJ, reprisal is defined as "Taking or threatening to take an adverse personnel action, or withholding or threatening to withhold a favorable personnel action, with respect to a member of the Armed Forces because the member reported a criminal offense." Reprisal may occur only if the actions in question were taken by leadership with the intent of having a specific detrimental impact on the career or professional activities of the member who reported the crime. The rate of perceived professional reprisal is a summary measure reflecting whether respondents indicated they experienced unfavorable actions taken by leadership (or an individual with the authority to affect a personnel decision) as a result of reporting sexual assault (not based on conduct or performance) and met the criteria for elements of proof for an investigation to occur. Figure 4 shows the behaviors and two follow-up criteria required to be included in the rate.

Figure 4.
Perceived Professional Reprisal Metric

Perceived Professional Reprisal Rate	1 Experienced at least one behavior from leadership in line with potential professional reprisal
	<ul style="list-style-type: none"> ➤ Demoted you or denied you a promotion ➤ Denied you a training opportunity that could have led to promotion or is needed in order to keep your current position ➤ Rated you lower than you deserved on a performance evaluation ➤ Denied you an award you were previously eligible to receive ➤ Reduced your pay or benefits without doing the same to others ➤ Reassigned you to duties that do not match your current grade ➤ Made you perform additional duties that do not match your current grade ➤ Transferred you to a different unit or installation without your request or agreement ➤ Ordered you to one or more command directed mental health evaluations ➤ Disciplined you or ordered other corrective action ➤ Prevented, or attempted to prevent, you from communicating with the Inspector General or a member of Congress ➤ Some other action that negatively affects, or could negatively affect, your position or career
	2 Belief that the leadership actions experienced were ONLY based on their report of sexual assault (i.e., not based on their conduct or performance)
Perceived Professional Reprisal Rate	3 Belief that the leadership took action for one of the following reasons:
	<ul style="list-style-type: none"> ➤ To get back at you for making a report (unrestricted or restricted) ➤ To discourage you from moving forward with your report ➤ They were mad at you for causing a problem for them

Perceived Ostracism. (Q149–151): Implementing strategies to eliminate retaliatory behaviors such as ostracism, presents some challenges to the Department. For example, enacting prohibitions against ostracism within the context of retaliation requires a specific set of criteria in order to maintain judicial validation against the limitations on the freedom of disassociation. Therefore, the Services crafted policies that implement the regulation of these prohibitions against ostracism outlined in section 1709(a) of the NDAA for FY 2014. In the *Report on Prohibiting Retaliation Against an Alleged Victim or Other Member of the Armed Forces Who Reports a Criminal Offense*, the Department states that “the punitive Service regulations issued in accordance with section 1709(a) of the NDAA for FY 2014 as supplemented by existing UCMJ articles that can be applied to some specific aspects of retaliation—such as Article 93’s prohibition of maltreatment and Article 133’s prohibition of misconduct by commissioned officers, cadets, and midshipmen—are the optimal means of criminalizing retaliation against victims or other members of the Armed Forces who report criminal offenses.”²³

Although the interpretation of ostracism varies slightly across the DoD Services, in general, ostracism may occur if retaliatory behaviors were taken either by a member’s military peers or by leadership for having reported a sexual assault or were planning to report a sexual assault. The rate of perceived ostracism is a summary measure reflecting whether, as a result of reporting a sexual assault, respondents indicated experiencing negative behaviors from military peers and/or coworkers to make them feel excluded or ignored and met the legal criteria for elements of

²³ Department of Defense (2014).

proof for an investigation to occur. Figure 5 shows the behaviors and two follow-up criteria required to be included in the rate.

Figure 5.
Perceived Ostracism Metric

Perceived Ostracism Rate	1 Experienced at least one behavior from military peers and/or coworkers in line with potential ostracism
	<ul style="list-style-type: none"> ➤ Made insulting or disrespectful remarks or made jokes at your expense—in <u>public</u> ➤ Excluded you or threatened to exclude you from social activities or interactions ➤ Ignored you or failed to speak to you (for example, gave you “the silent treatment”)
	2 Belief that at least one individual knew or suspected the respondents made an official report of sexual assault (unrestricted or restricted)
	3 Belief that the action was taken to discourage you from moving forward with your report or discourage others from reporting

Perceived Maltreatment. (Q154–Q156): In the context of retaliation, perceived maltreatment prohibitions must include a specific set of criteria in order to maintain judicial validation against the limitations on the freedom of disassociation. As with perceived ostracism, the Services crafted regulations making certain behavior punitive under Article 92, of the UCMJ, as mandated by Section 1709(a).²⁴ On the survey, cruelty, oppression, and maltreatment are defined as acts that occur without a valid military purpose and may include physical or psychological force or threat or abusive or unjustified treatment that results in physical or mental harm. For the purposes of this report, the construct of “cruelty, oppression, and maltreatment” are referenced broadly as “maltreatment.”²⁵

The rate of perceived maltreatment is a summary measure reflecting whether, as a result of reporting a sexual assault, respondents indicated experiencing negative behaviors from military peers and/or coworkers that occurred without a valid military purpose and may include physical or psychological force, threats, or abusive or unjustified treatment that results in physical or mental harm and met the legal criteria for elements of proof for an investigation to occur. Figure 6 shows the behaviors and two follow-up criteria required to be included in the rate.

²⁴ Department of Defense (2014).

²⁵ Maltreatment as used in this survey comprises maltreatment in the context of reporting an offense and maltreatment defined under Article 93 of the UCMJ.

Figure 6.
Perceived Maltreatment Metric

Perceived Maltreatment Rate	1 Experienced at least one behavior from military peers and/or coworkers in line with potential maltreatment
	<ul style="list-style-type: none"> ➤ Made insulting or disrespectful remarks or made jokes at your expense—to you in <u>private</u> ➤ Showed or threatened to show private images, photos, or videos of you to others ➤ Bullied you or made intimidating remarks about the assault ➤ Was physically violent with you or threatened to be physically violent ➤ Damaged or threatened to damage your property
	2 Belief that at least one individual knew or suspected the respondents made an official report of sexual assault (unrestricted or restricted)
	3 Belief that the action was taken for one of the following reasons:
	<ul style="list-style-type: none"> ➤ To discourage you from moving forward with your report or discourage others from reporting ➤ They were trying to abuse or humiliate you

Perceived Ostracism/Maltreatment. By regulations, ostracism/maltreatment are defined as “ostracism and acts of maltreatment committed by peers or a member of the Armed Forces or by other persons because the member reported a criminal offense.”²⁶ The rate of perceived ostracism/maltreatment is an overall measure showing whether members reported experiencing behaviors or actions by military peers and/or coworkers meeting the requirements for inclusion in the estimates of perceived ostracism and/or maltreatment.

Perceived Professional Reprisal and/or Perceived Ostracism/Maltreatment. The rate of perceived reprisal and/or ostracism/maltreatment is an overall measure reflecting whether respondents experienced either perceived professional reprisal, perceived ostracism, and/or perceived maltreatment by leadership or military peers and/or coworkers for reporting sexual assault.

Overview of Report

The principal purpose of the 2016 WGRA is to report estimated prevalence rates of sexual assault, sexual harassment, and gender discrimination as well as to assess attitudes and perceptions about personnel programs and policies designed to reduce the occurrence of these unwanted behaviors and improve the gender relations climate between men and women.

As depicted in Figure 7, there were two forms of the 2016 WGRA: the short form and the long form. The short form was a paper survey containing survey items used to assess sex-based MEO violations, UCMJ-based sexual assault, and details of the sexual assault that had the greatest impact on the survivor. The long form, or web survey, contained all of the items on the short

²⁶ Section 1709(a) of the NDAA for FY 2014 requires regulations prohibiting retaliation against an alleged survivor or other member of the Armed Forces who reports a crime, and requires that violations of those regulations be punishable under Article 92.

form, but also included additional topics on perceptions of SAPR programs, bystander intervention, culture and climate, and comparisons between sexual assault and sexual harassment in the military versus the nation. For purposes of this report, all references to question numbers refer to the long survey form.

Survey Content by Chapter

- Chapter 2 provides information on the survey methodology including details on the sampling and weighting strategies used for the *2016 WGRA*.
- Chapter 3 covers the estimated past-year prevalence rates of sexual assault, sexual assault experiences since entering the military, before entering the military, and within their lifetime, the number of unwanted events experienced, and whether any unwanted event experienced was considered hazing and/or bullying.
- Chapter 4 provides details about the one situation of sexual assault in the past 12 months that had the biggest effect on members. Included is information about the circumstances pertaining to the most serious experience of sexual assault, such as specific behaviors experienced; considering the unwanted event as involving hazing or bullying; characteristics of alleged offender(s); where and when the one situation occurred; experiences of stalking and harassment before or after the situation; drug and/or alcohol involvement; and outcomes of the one situation.

- Chapter 5 provides details on reporting the one situation of sexual assault in the past 12 months that had the biggest effect on members. Included is information about the type of report made; outcomes of reporting, resources provided, actions from leadership, expedited transfers, including life after the transfer; and recommendation of others to report sexual assault. This chapter also includes information on reasons for reporting and not reporting, and whether the member would make the same decision about reporting in the future. The chapter concludes with negative outcomes associated with reporting the one situation, including perceived professional reprisal, perceived ostracism, and perceived maltreatment, along with characteristics of each—such as the specific behavior experienced, individual(s) who took the actions, and participation in reporting of sexual assault as a result of actions taken—and characteristics of discussing and/or filing a complaint as a result of such actions.
- Chapter 6 covers perceived experiences of sex-based Military Equal Opportunity (MEO) violations in the past 12 months. Included are estimated prevalence rates for perceived sexual hostile work environment, sexual *quid pro quo*, sexual harassment, and gender discrimination, as well as consideration of any of the behaviors as hazing and/or bullying.
- Chapter 7 provides details about the one situation of sex-based MEO violations in the past 12 months that had the biggest effect on members. Included is information about the circumstances pertaining to the most serious experience of sexual assault, such as specific behaviors experienced, characteristics of alleged offender(s), length of time the situation occurred, where and when the one situation occurred, considering the one situation as involving hazing and/or bullying, reporting/discussing the one situation, and reasons for not reporting.
- Chapter 8 addresses the training members receive on sexual assault and sexual harassment prevention and response. Included are estimates on whether members participated in trainings and members' perceptions of the effectiveness of training in preventing sexual assault and sexual harassment.
- Chapter 9 covers topics on workplace climate. Included is the likelihood to encourage a member to come forward to report sexual assault and/or sexual harassment and bystander intervention. This chapter also provides information on positive workplace actions and behaviors demonstrated by fellow members. The chapter concludes with a section on women in the workplace, and social media use in the workplace.
- Chapter 10 addresses perceptions of unwanted gender-related behaviors, including perception of sexual assault and sexual harassment in the military over the last two years and the military's response to such behaviors.
- Chapter 11 covers additional analyses on male Service members who have experienced sexual assault and analysis on males experiencing hazing and/or bullying as part of the sexual assault.
- Chapter 12 covers analysis on the continuum of harm.

- Chapter 13 provides information on lesbian, gay, bi-sexual, and transgender (LGBT) members in the military, including estimated prevalence rates for this population. This chapter also includes analysis on an expanded metric of sexual assault, continuing assessment, and additional research.

Chapter 2: Survey Methodology

Ms. Lisa Davis, Mr. Eric Falk, and Mr. Jeff Schneider

In 2014, at the request of Congress, the RAND Corporation conducted the *2014 Rand Military Workplace Study (2014 RMWS)* and re-evaluated how the Department measures sexual assault and sexual harassment. As a result of this evaluation, RAND administered the *2014 RMWS* which included newly constructed measures of sexual assault and military equal opportunity (MEO) violations that meet elements of proof within the Uniformed Code of Military Justice (UCMJ) and departmental policy. This resulted in metrics that could generate a crime victimization rate for these behaviors (for more details on metrics, please see Chapter 1). OPA adopted the *2014 RMWS* measure construction and weighting methods for the *2016 WGRA* with the exceptions discussed below. This enables OPA to create estimates that can be trended and can evaluate change over time.

Differences Between 2016 WGRA and 2014 RMWS

Consolidation of Sexual Assault Consent Items

To determine the UCMJ-based sexual assault prevalence rate, respondents must experience at least one of the behaviors in line with sexual assault and meet two follow-up criteria. First, the behaviors must have been done with the intent to abuse, humiliate, or degrade or to gratify a sexual desire.²⁷ Second, behaviors must include a coercive mechanism, indicating consent was not given freely. These criteria were maintained between the *2014 RMWS* and *2016 WGRA*. However, based on respondents concerns and to minimize burden, OPA consolidated the consent factors (coercive mechanisms) for the sexual assault behaviors from 11 to four questions in the *2016 WGRA*. Similar factors were grouped together, thus, reducing the number of sexual assault behavior follow-up consent items while maintaining the range of behaviors captured on the *2014 RMWS*. This change to the construct was approved by SAPRO. See Figure 8 for the comparison of consent items between the *2014 RMWS* and *2016 WGRA*.

²⁷ For experiences in which someone put his penis into someone's anus or mouth (or vagina, if she is a woman), intent is not required to meet the criminal elements of proof, and hence not needed to get into the prevalence rate.

Figure 8.
Metric Changes to Sexual Assault Consent Factors

	2014 RMWS	2016 WGRA
Sexual Assault Consent Factors	<ul style="list-style-type: none"> ➤ Used physical force to make you comply ➤ Physically injured you ➤ Threatened to physically hurt you (or someone else) OR threatened you (or someone else) with a weapon OR threatened to seriously injure, kill, or kidnap you (or someone else) ➤ Threatened you (or someone else) in some other way. For example by using their position of authority, by spreading lies about you, or by getting you in trouble with authorities ➤ Did it when you were passed out, asleep, or unconscious ➤ Did it when you were so drunk, high, or drugged that you could not understand what was happening or could not show them that you were unwilling ➤ Did it after you had consumed so much alcohol that the next day you could not remember what happened ➤ It happened without your consent ➤ Continued even when you told/showed them that you were unwilling ➤ Made you so afraid that you froze and could not tell/show them that you were unwilling ➤ Tricked you into thinking that they were someone else or that they were allowed to do it for a professional purpose 	<ul style="list-style-type: none"> ➤ Used, or threatened to use, physical force to make you comply (e.g., use, or threats of, physical injury, use of a weapon, or threats of kidnapping) ➤ Threatened you (or someone else) in some other way (e.g., used their position of authority, spread lies about you, or got you in trouble with authorities) ➤ Did it while you were passed out, asleep, unconscious, or were so drunk, high, or drugged that you could not understand what was happening, or could not show them that you were unwilling ➤ It happened without your consent (e.g., they continued even when you told or showed them that you were unwilling, they tricked you into thinking they were someone else such as pretending to be a doctor, or some other means where you did not or could not consent)

Consolidation of Sexually Hostile Work Environment Criteria

To determine the prevalence rate for a sexually hostile work environment, respondents must experience at least one of the behaviors in line with a sexually hostile work environment and met requirements of the behavior being pervasive or severe. Most items in the set of questions use both the “pervasive” or “severe” criteria. Of those that do, the following modifications were made to the 2016 WGRA questionnaire.

First, for determining if the behaviors either continued after the alleged offender knew to stop, the two questions provided in the 2014 RMWS survey were consolidated into one question in the 2016 WGRA (see Figure 9 for questions). This update maintains the ability to capture the criteria needed to capture behaviors that could constitute a sexually hostile work environment while reducing respondent burden by combining similar questions. Second, the referent was changed from persons of the respondents gender (“most men” or “most women”) to the neutral “most Service members” for the criteria which the behavior had to be so severe that most would have been offended by the behavior (Figure 9). This change aligns with the definition per Section 1560 of US Code Title 10:

*“(b) ...Is so severe or pervasive that **a reasonable person** would perceive, and the victim does perceive, the work environment as hostile or offensive.”*

	<ul style="list-style-type: none"> ➤ [1] Do you think they knew that you or someone else <u>wanted them to stop</u>? If it happened more than once or by more than one person, do you think any of them ever knew? <ul style="list-style-type: none"> ➤ Yes → Go to [2] ➤ No → Go to [3] ➤ [2] Did they <u>continue</u> this unwanted behavior even <u>after</u> they knew that you or someone else wanted them to stop? <ul style="list-style-type: none"> ➤ Yes ➤ No ➤ [3] Do you think that this was ever severe enough that <u>most [men/women]</u> in the military would have been offended by [behavior]? <ul style="list-style-type: none"> ➤ Yes ➤ No 	<ul style="list-style-type: none"> ➤ Did they <u>continue</u> this unwanted behavior even <u>after</u> they knew that you or someone else wanted them to stop? <ul style="list-style-type: none"> ➤ Yes ➤ Not applicable, they did not know I or someone else wanted them to stop ➤ No ➤ Do you think that this was ever severe enough that <u>most Service members</u> in the military would have been offended by [behavior]? <ul style="list-style-type: none"> ➤ Yes ➤ No

Changes to Eligibility Criteria: Separated Military Members

DoD Information Collection policy views military members who have separated from military service as members of the general public who require Office of Management and Budget (OMB) approval before they can be included in a DoD survey. DoD survey regulations limit the surveying of these members without additional approvals required by the OMB under the Paperwork Reduction Act. The Workplace and Gender Relations (WGR) surveys are targeted towards DoD personnel and are not designed for surveying members of the general public (e.g., those who have left military service and DoD contractors).

To ensure the *2016 WGRA* did not inadvertently survey retired or separated members, an eligibility item was included in the survey to filter out members who may have separated or retired after sample design but before survey fielding. If a respondent indicated they had separated or retired, they are not asked additional items and received a sample disposition code of “survey ineligible.” The *2014 RMWS* did not have this additional eligibility item; therefore, RAND may have picked up responses from retired or separated members. For the *2016 WGRA*, only 1,278 (0.2%) sample members self-identified as retired or separated and were coded as ineligible. Additionally, OPA checked the separation status of all members using data from a newer administrative file closer to the survey opening to remove known members who have separated. This process excluded an additional 9,247 (1.2%) from the survey sample.

2016 WGRA Methodology

This section describes the scientific methodology used for the *2016 WGRA*, including the statistical design, survey administration, and analytical procedures. A copy of the *2016 WGRA* long form survey instrument is provided in Appendix A.

OPA conducts cross-Service surveys that provide leadership with assessments of attitudes, opinions, and experiences of the entire population of interest using standard scientific methods. OPA's survey methodology meets, and often exceeds, industry standards that are used by government statistical agencies (e.g., the Census Bureau and Bureau of Labor Statistics), private survey organizations, and well-known polling organizations. OPA adheres to the survey methodology best practices promoted by the American Association for Public Opinion Research (AAPOR).²⁸

Statistical Design

Although OPA has used industry standard scientific survey methodology for many years, it is important to clarify how scientific practices employed by large survey organizations control for bias and allow for generalizability to populations. Appendix B contains frequently asked questions (FAQs) on the methods employed by government and private survey agencies, including OPA. The survey methodology used on prior WGR surveys has remained largely consistent across time, which allows for comparisons across survey administrations. In addition, the scientific methods used by OPA have been validated by independent organizations (e.g., RAND and GAO).²⁹ The methodology for selecting the *2016 WGRA* sample, stratified random sampling, is the same as in prior years. However, the methodology used for weighting the respondents to the population is different. To maintain comparability, OPA—in collaboration with Westat statisticians—decided to use the generalized boosted models (GBM) used by RAND—for this administration, which adjusts for nonresponse by predicting experiences with key survey measures (e.g. sexual assault) as well as adjust by predicting survey response. More details about the complex weighting can be found below and in the *2016 Workplace and Gender Relations Survey of Active Duty Members: Statistical Methods Report* (OPA 2016).

Sampling Design

OPA uses known population characteristics, response rates from prior surveys, and an optimization algorithm for determining sample sizes needed to achieve desired precision levels on key reporting categories (domains). For the *2016 WGRA*, OPA substantially increased the sample size to ensure accurate estimates of important rare events (e.g., sexual assault, sexual harassment, gender discrimination, and perceived experiences of professional reprisal, ostracism, and/or maltreatment as a result of reporting a sexual assault). Overall, the sample was designed to ensure there are enough respondents who submit completed surveys in order to make generalizations to the Total Force. The target population for the *2016 WGRA* consisted of active

²⁸ AAPOR's "Best Practices" state that, "virtually all surveys taken seriously by social scientists, policy makers, and the informed media use some form of random or probability sampling, the methods of which are well grounded in statistical theory and the theory of probability" (http://aapor.org/Best_Practices1/4081.htm#best3). OPA has conducted surveys of the military and DoD community using these "Best Practices" for over 25 years, tailored as appropriate for the unique design needs of specific surveys.

²⁹ In 2014, an independent analysis of the methods used for the *2012 WGRA* determined that "[OPA] relied on standard, well accepted, and scientifically justified approaches to survey sampling and derivation of survey results as reported for the *2012 WGRA*" (Morral, Gore, & Schell, 2014). In 2010, GAO conducted an evaluation of OPA's methods, and although they found the sampling and weighting procedures aligned with industry standards and were reliable for constructing estimates, they provided recommendations on conducting non-response bias analyses are now standard products for OPA surveys (GAO-10-751R Human Capital).

duty members from the Army, Navy, Marine Corps, Air Force, and Coast Guard who were below flag rank and had been on active duty for approximately five months.³⁰ Single-stage, nonproportional stratified random sampling procedures were used in the *2016 WGRA* for the DoD Services. A census of the Coast Guard was taken for this survey as they have a small population.

In stratified random sampling, all members of a population are categorized into homogeneous groups. For example, members might be grouped by gender and Service (e.g., all male Army personnel in one group and all female Army personnel in another). Members are chosen at random within each group. Small groups are oversampled in comparison to their proportion of the population so there will be enough responses from small groups to analyze (e.g., female Marine Corps officers). The sample for the *2016 WGRA* consisted of 735,329 individuals drawn from the sample frame constructed from the Defense Manpower Data Center (DMDC) *Active Duty Master Edit File (ADMF)*. A match to the July *ADMF* was done to remove those from the survey that had separated since the population file was developed, removing 9,247 (1.2%) sample members. Members in the sample also became ineligible if they indicated in the survey or by other contact (e.g., e-mails or telephone calls to the data collection contractor) they were not a member of the active duty Services as of the first day of the survey, July 25, 2016 (0.2% of sample). Details of the sampling strategy for selecting the DoD sample used in the *2016 WGRA* are shown in Figure 10.³¹

Figure 10.
2016 WGRA Stratified Sample Design for DoD Services

³⁰ The sampling frame was developed five months before fielding the survey. Therefore, the sampling population included those active duty members with approximately five months of service at the start of survey fielding.

³¹ A census of active duty Coast Guard members was taken and, therefore, are not including in the stratified sample design.

Survey Administration

Data were collected between July 22 and October 14, 2016, for the *2016 WGRA*. The survey was administered using both web (long form) and paper (short form) survey instruments.

The survey administration process began on July 21, 2016, with the mailing of an announcement letter to sample members. On July 22, 2016, the survey website opened and e-mail announcements were sent to sample members on July 25, 2016.³² The announcement letter and e-mail explained why the survey was being conducted, how the survey information would be used, why participation was important, and opt-out information for those who did not want to participate. Throughout the administration period, up to an additional 10 e-mails and one postal reminder were sent to encourage survey participation. Paper surveys were mailed on August 24, 2016, to sample members who had not previously responded to the web survey. Paper surveys were collected from August 24 through October 5, 2016. Postal mailings and e-mails stopped once the sample member submitted their survey or requested to opt-out of receiving additional communications. Appendix C includes copies of the e-mails and postal letters mailed to sampled members.

The survey procedures were reviewed by a DoD Human Subjects Protection Officer as part of the DoD survey approval and licensing process. Additionally, OPA received a Certificate of Confidentiality from the Health Resources and Services Administration (HRSA) at the Department of Health and Human Services to ensure the respondent's data are protected. This Certificate provides an additional layer of protection, whereby OPA cannot be forced to disclose information that may identify study participants in any federal, state, or local civil, criminal, administrative, legislative, or other proceedings.

Data Weighting

OPA scientifically weighted the *2016 WGRA* respondents to be generalizable to the active duty population using the generalized boosted modeling (GBM) approach. Within this process, statistical adjustments are made to ensure the sample respondents accurately reflect the characteristics of the population from which it was drawn and provide a more rigorous accounting to reduce nonresponse bias in estimates. This ensures oversampling within any one subgroup does not result in overrepresentation in the Total Force estimates.

For the *2016 WGRA*, OPA mirrored a modeling process used by RAND in the *2014 RMWS* (Morrall, Gore, & Schell, 2014) and Westat in the *2015 Workplace and Gender Relations Survey of Reserve Component Members (2015 WGRR)*. This form of weighting produces survey estimates of population totals, proportions, and means (as well as other statistics) that are representative of their respective populations. Unweighted survey data, in contrast, are likely to produce biased estimates of population statistics. The process of weighting for the *2016 WGRA*

³² Each Service also reached out to their members to make them aware of the survey and encouraged members to see if they were part of the survey sample by visiting the survey ticket look-up site. Some survey respondents who used the ticket look-up site were able to access/complete the survey before receiving the initial e-mail announcement from OPA.

consists of the following three steps (described below) and a working example is depicted in Figure 11:

1. *Adjustment for selection probability.* Probability samples, such as the sample for this survey, are selected from lists and each member of the list has a known nonzero probability of selection. For example, if a list contained 10,000 members in a demographic subgroup and the desired sample size for the subgroup was 1,000, one in every tenth member of the list would be selected. During weighting, this selection probability (1/10) is taken into account. The base, or first weight, used to adjust the sample is the reciprocal of the selection probability. In this example, the adjustment for selection probability (base weight) is 10 for members of this subgroup.
2. *Adjustment for nonresponse.* This adjustment develops a model for predicting an outcome to a critical question. OPA used GBM to model the propensity that each member experienced the six outcome variables: sexual harassment, gender discrimination, sexual *quid pro quo*, attempted penetrative sexual assault, non-penetrative sexual assault, and penetrative sexual assault. For example, a female/E1–E4/Army/minority may have a predicted probability of experiencing sexual assault of 4%, whereas a female/E1–E4/Navy/non-minority has a predicted probability of 2%. Next, OPA used GBM to model the response propensity of each member using the six outcome variables modeled in step one. Details regarding the criteria used for selecting the best model are found in OPA, 2016.
3. *Adjustment to known population values.* After the nonresponse adjustments from step two, weighted estimates will differ from known population totals (e.g., number of members in the Army). It is standard practice to adjust the weighted estimates to the known population totals to reduce both the variance and bias in survey estimates. Therefore, OPA performed a final weighting adjustment, called raking, which exactly matches weighted estimates and known population totals for important demographics. For example, suppose the population for the subgroup was 8,500 men and 1,500 women but the nonresponse-adjusted weighted estimates from the respondents were 7,000 men and 3,000 women. To reduce this possible bias and better align with known population totals, we would adjust the weights by 1.21 for men and 0.5 for women so that the final weights for men and women applied to the survey estimates would be 24.3 and 10, providing unbiased estimates of the total and of women and men in the subgroup.

Figure 11.
Three-Step Weighting Process

Note. In reality a female O4–O6 is more likely to respond than a female E1–E3 and thus the adjustments would vary based on demographics. In practice, “Sally” would represent a member among the 207 strata (e.g., Army, female, and E1–E4).

Table 1 shows the number of survey respondents and the response rate by subgroups. The weighted response rate for the 2016 WGRA was 24% (including DoD and Coast Guard), and the weighted response rate for total DoD was 23%, both of which are typical for large DoD-wide surveys. This response rate was lower than the 29% response rate for the 2014 RMWS and comparable with the 24% response rate in 2012 WGRA. Differences in the percentages of respondents and population for the reporting categories reflect differences in the number of members included in the sample, as well as differences in response rates.

Table 1.
2016 WGRA Counts of Respondents and Weighted Response Rates

Response Group	Number of Respondents (n)	Weighted Response Rate (%)
Total (DoD and Coast Guard)	151,010	24
Total DoD	132,429	23
Women	39,388	28
Army	12,195	24
Navy	9,116	21
Marine Corps	2,447	22
Air Force	15,630	40
Men	93,041	22
Army	32,587	19
Navy	19,478	19
Marine Corps	11,915	16
Air Force	29,061	34
Total Coast Guard	18,581	48
Women	3,075	54
Men	15,506	47

Presentation of Results

Results of the 2016 WGRA are presented by reporting categories within the report. For each section of the report, results are presented in the following order (including a trend back to prior survey administrations, if applicable):

- DoD
 - Survey year by gender
 - Service by gender
- Coast Guard
 - Survey year by gender

Definitions for the reporting categories above are:

- DoD: Includes Army, Navy, Marine Corps, and Air Force.
- Coast Guard: This category is self-explanatory.
- Gender: Male or Female.

- Survey Year: Current survey year (2016) and trend survey year (2014, and for some, 2012, 2010, and 2006).

Only statistically significant comparisons are discussed in this report. Comparisons are generally made along a single dimension (e.g., Service) at a time. For these comparisons, the responses for one group are compared to the weighted average of the responses of all other groups in that dimension. For example, responses of women in the Army are compared to the weighted averages of the responses from women in the Navy, Marine Corps, and Air Force. When comparing estimates between the *2016 WGRA* and the *2014 RMWS*, the results for each analysis group in 2016 are compared to those in 2014 for the same group (e.g., women in 2016 compared to women in 2014).

For all statistical tests, OPA uses “two-independent sample t-tests” and adjusts for multiple comparisons using the False Discovery Rate (FDR) method to control for the number of statistical tests that are incorrectly determined to be significant (Type I errors; see OPA, 2016 for additional information). The results of comparisons generalize to the population because they are based on weighted estimates.

The tables and figures in the report are numbered sequentially. Unless otherwise specified, the numbers presented are percentages. Ranges of margins of error are shown when more than one estimate is displayed in a table or figure. Each finding in the *2016 WGRA* is presented in graphical or tabular form along with its associated margin of error. The margin of error represents the precision of the estimate, and the confidence interval coincides with how confident we are the interval contains the true population value being estimated. For example, if 55% of respondents selected an answer and the margin of error was ± 3 , although not statistically correct, we often draw conclusions from this one sample that we are 95% confident that the interval 52% to 58% contains the unknown “true” population value being estimated. Because the results of comparisons in the *2016 WGRA* are based on weighted results, the reader can assume the results generalize to the active duty population within the margin of error.

The annotation “NR” indicates that a specific result is not reportable due to low reliability. Estimates of low reliability are not presented based on criteria defined in terms of nominal number of respondents (less than 5), effective number of respondents (less than 15), or relative standard error (greater than 0.225). Effective number of respondents takes into account the finite population correction (fpc) and variability in weights. An “NR” presentation protects the Department, and the reader, from drawing incorrect conclusions or potentially presenting inaccurate findings due to instability of the estimate. Unstable estimates usually occur when only a small number of respondents contribute to the estimate. Caution should be taken when interpreting significant differences when an estimate is not reportable (NR). Although the result of the statistical comparison is sound, the instability of at least one of the estimates makes it difficult to specify the magnitude of the difference.

Elongated bar charts in this report may not extend to the 100% end of the scale. This may be due to a few factors, including rounding and NR estimates. As seen in the example below (Figure 12), there is a small space between the bar chart and the end of the chart for women. This is due to rounding. Additionally, some estimates might be so small as to appear to approach a value of 0. In those cases an estimate of less than 1 (e.g., “<1”) is displayed.

Figure 12.
Example Figure

Chapter 3: Estimated Sexual Assault Prevalence Rates

Ms. Lisa Davis and Ms. Amanda Grifka

Introduction

This chapter examines active duty members' experiences of sexual assault. As described in Chapter 1, sexual assault offenses refer to a range of behaviors prohibited by the UCMJ and include: penetrative sexual assault (completed sexual intercourse, sodomy [oral or anal sex], and penetration by an object); non-penetrative sexual assault (unwanted touching of genitalia); and attempted penetrative sexual assault (attempted sexual intercourse, sodomy [oral or anal sex], and penetration by an object).

This chapter provides the estimated overall sexual assault prevalence rate as well as the estimated individual sexual assault prevalence rates for these three types of behaviors within the past 12 months. Additionally, this chapter provides information for experiences as indicated by respondents on sexual assault before entering the military, since entering the military, and across their lifetime, as well as descriptions of any unwanted events experienced, including the number of events, alleged repeat offenders, and perceptions of events involving hazing and/or bullying. All prevalence rates in this section are estimates that have corresponding margins of error. Results are reported for 2016 by gender by Service and are noted where significant differences exist. Trend comparisons to the 2014 RMWS are provided where data are available.

Estimated Past Year Sexual Assault Prevalence Rates

On the survey, active duty members were asked to think about events that happened in the past 12 months and were asked specifically about the following types of unwanted experiences in which someone:

- Put his penis into their vagina, anus, or mouth;
- Put any object or any body part other than a penis into their vagina, anus, or mouth;
- Made them put any part of their body or any object into someone's mouth, vagina, or anus when they did not want to;
- Intentionally touched private areas of their body (either directly or through clothing);
- Made them touch private areas of their body or someone else's body (either directly or through clothing); or
- Attempted to put a penis, an object, or any body part into their vagina, anus, or mouth, but no penetration actually occurred.

This section provides the estimated overall "roll-up" prevalence rate for members who indicated experiencing these behaviors, who met the UCMJ-based criteria for the sexual offense, and who indicated the offense happened within the past 12 months.

Figure 13 displays the estimated past year sexual assault prevalence rate by gender for active duty DoD members. In 2016, 1.2% (± 0.1) of DoD active duty members indicated experiencing sexual assault in the past 12 months. This represents approximately 1 in 23 women (4.3%) and 1 in 167 men (0.6%). Based on a constructed 95% confidence interval ranging from 14,041 to 15,748, an estimated total of 14,881 DoD active duty members indicated experiencing a sexual assault in the past 12 months.

DoD

As shown in Figure 13, in 2016, 4.3% of DoD women and 0.6% of DoD men indicated experiencing sexual assault in the past year. Compared to 2014, the percentage of those who indicated experiencing sexual assault showed a statistically significant *decrease* in 2016 for both women (0.6 percentage points) and men (0.3 percentage points). Although data are presented for 2006, 2010, and 2012, no direct comparisons can be made between rates before 2014 due to measurement differences as indicated by the dashed lines.

Also shown in Figure 13 are breakouts of the specific sexual assault behaviors making up the sexual assault prevalence rate. In 2016, 2.2% of DoD women indicated the unwanted event was penetrative sexual assault, 2.1% indicated experiencing non-penetrative sexual assault, and 0.1% indicated experiencing attempted penetrative sexual assault. Compared to 2014, the percentage of women who indicated experiencing non-penetrative sexual assault showed a statistically significant *decrease* in 2016 (0.5 percentage points) as well as the percentage of women who indicated experiencing attempted penetrative sexual assault (0.1 percentage points). The estimated rate of penetrative sexual assault remained *statistically unchanged* for women since 2014.

For DoD men, 0.2% indicated experiencing penetrative sexual assault, 0.4% indicated experiencing non-penetrative sexual assault, and <0.1% indicated experiencing attempted penetrative sexual assault. Compared to 2014, the percentage of men who indicated experiencing non-penetrative sexual assault showed a statistically significant *decrease* in 2016 (0.2 percentage points). The estimated rates of penetrative sexual assault and attempted penetrative sexual assault remained *statistically unchanged* for men since 2014.

Figure 13.***Sexual Assault Prevalence Rate Estimates for DoD (Q65–Q85, Q87–Q93, Q95–Q106)³³***

As shown in Figure 14, women in the Marine Corps (7.0%) and Navy (5.1%) were *more likely* to indicate experiencing **sexual assault** than women in the other Services, whereas Air Force women (2.8%) were *less likely*. Compared to 2014, the percentage of women who indicated experiencing **sexual assault** showed a statistically significant *decrease* in 2016 for Navy women (1.4 percentage points).

³³ Due to metrics changes in 2014, data cannot be statistically compared back to 2012, 2010, or 2006. This is indicated by the dashed line in the figure.

Figure 14.***Sexual Assault Prevalence Rate for DoD Women (Q65–Q85, Q87–Q93, Q95–Q105)***

As shown in Figure 15, men in the Navy (0.9%) were *more likely* to indicate experiencing **sexual assault** than men in the other Services, whereas Air Force men (0.3%) were *less likely*. Compared to 2014, the percentage of men who indicated experiencing **sexual assault** showed a statistically significant *decrease* in 2016 for Army men (0.3 percentage points).

Figure 15.***Sexual Assault Prevalence Rate for DoD Men (Q65–Q85, Q87–Q93, Q95–Q106)***

Table 2 shows the breakouts of the specific behaviors experienced for those who indicated experiencing sexual assault. In 2016, women in the Marine Corps (4.3%) were *more likely* than women in the other Services to indicate experiencing **penetrative sexual assault**, whereas Air Force women (1.4%) were *less likely*. Navy women (2.7%) were *more likely* than women in the other Services to indicate experiencing **non-penetrative sexual assault**, whereas Air Force women (1.3%) were *less likely*. Additionally, Air Force women (<0.1%) were *less likely* than women in the other Services to indicate experiencing **attempted penetrative sexual assault**.

Compared to 2014, the percentage of women who indicated experiencing **non-penetrative sexual assault** showed a statistically significant *decrease* in 2016 for Navy (0.9 percentage points), Army (0.5 percentage points), and Air Force women (0.3 percentage points). The percentage of women who indicated experiencing **attempted penetrative sexual assault** showed a statistically significant *decrease* in 2016 for Navy (0.3 percentage points) and Air Force women (0.1 percentage points).

Also shown in Table 2, men in the Navy (0.6%) were *more likely* than men in the other Services to indicate experiencing **non-penetrative sexual assault**, whereas Air Force men (0.1%) were *less likely*. Men in the Air Force (0.1%) were also *less likely* than men in the other Services to indicate experiencing **penetrative sexual assault**. Compared to 2014, the percentage of men who indicated experiencing **non-penetrative sexual assault** showed a statistically significant *decrease* in 2016 for Army (0.4 percentage points).

Table 2.

Sexual Assault Prevalence Rate by Behavior for DoD (Q65–Q85, Q87–Q93, Q95–Q106)

2016 Trend Comparisons ↑ Higher Than 2014 ↓ Lower Than 2014	Within Service Comparisons					
	Survey Year	Total DoD	Army	Navy	Marine Corps	Air Force
<div> <div></div> Higher Response <div></div> Lower Response </div>						
Women						
Penetrative sexual assault	2016	2.2	2.3	2.3	4.3	1.4
	2014	2.1	2.0	2.6	4.3	1.2
Non-penetrative sexual assault	2016	2.1 ↓	2.0 ↓	2.7 ↓	2.5	1.3 ↓
	2014	2.6	2.5	3.6	3.4	1.6

Percent of active duty member who indicated experiencing sexual assault in 2016

Coast Guard

Figure 16 shows the overall prevalence rate of **sexual assault** in 2016 was 2.0% for Coast Guard women and 0.3% for Coast Guard men. Compared to 2014, the percentage of those who indicated experiencing **sexual assault** showed a statistically significant *decrease* in 2016 for Coast Guard women (1 percentage point) and remained statistically *unchanged* since 2014 for Coast Guard men.

Also shown in Figure 16 are breakouts of the specific sexual assault behaviors making up the sexual assault prevalence rate for Coast Guard members. In 2016, 0.8% of Coast Guard women indicated experiencing **penetrative sexual assault**, 1.1% indicated experiencing **non-penetrative sexual assault**, and <0.1% indicated experiencing **attempted penetrative sexual assault**. Compared to 2014, the percentage of Coast Guard women who indicated experiencing **penetrative sexual assault** showed a statistically significant *decrease* in 2016 (0.6 percentage points). The estimated rates of **non-penetrative sexual assault** and **attempted penetrative sexual assault** remained statistically *unchanged* for Coast Guard women since 2014. In 2016, of the 0.3% of Coast Guard men who indicated experiencing sexual assault, 0.1% indicated experiencing **penetrative sexual assault**, 0.2% indicated experiencing **non-penetrative sexual assault**, and <0.1% indicated experiencing **attempted penetrative sexual assault**, all of which remained statistically unchanged since 2014.

Figure 16.

Sexual Assault Prevalence Rate for Coast Guard (Q65–Q85, Q87–Q93, Q95–Q106)³⁴

³⁴ Due to metrics changes in 2014, data cannot be statistically compared back to 2010, or 2006 as indicated by the dashed line in the figure.

Estimated Sexual Assault Rates: Prior to Joining the Military, Since Joining the Military, and Lifetime

In addition to asking about experiencing sexual assault in the past year, active duty members were also asked to think about events that happened prior to the past 12 months, both while in the military or prior to entry into the military, consistent with the following types of behaviors in which someone:

- Put a penis, an object, or any body part into their vagina, anus, or mouth when they did not want it and did not consent;
- Put any object or any body part other than a penis into your vagina, anus, or mouth;
- Made you insert their penis, an object, or body part into someone's mouth, vagina, or anus when they did not want to and did not consent;
- Tried to put a penis, an object, or any body part into their vagina, anus, or mouth, against their will but it did not happen;
- Intentionally touched private areas of their body (either directly or through clothing) when they did not want it and did not consent; or
- Made them touch private areas of their body or someone else's body (either directly or through clothing) when they did not want it and did not consent.

The behaviorally based items for sexual assault prior to joining the military, since joining the military, and lifetime prevalence of sexual assault require affirmative selection of one of the sexual assault behaviors. However, it does not require the legal criteria for intent and/or consent.

Estimated Sexual Assault Rate Prior to Joining the Military

Service members were asked if they experienced any of the unwanted behaviors prior to joining the military.

DoD

Overall, 1.8% (± 0.1) of DoD members indicated experiencing [sexual assault prior to joining the military](#), with a rate of 6.8% for DoD women and 0.9% for DoD men (Figure 17). Marine Corps men (0.7%) were *less likely* than men in the other Services to indicate experiencing [sexual assault prior to joining the military](#).

Figure 17.***Sexual Assault Rate Prior To Joining the Military for DoD (Q171–Q172)*****Coast Guard**

Overall, 1.6% (± 0.2) of Coast Guard members indicated experiencing [sexual assault prior to joining the military](#), with a rate of 7.0% for Coast Guard women and 0.7% for Coast Guard men (Figure 18).

Figure 18.***Sexual Assault Rate Prior To Joining the Military for Coast Guard (Q171a–d, f, 172)***

Estimated Sexual Assault Rate Since Joining the Military

The estimated sexual assault rate since joining the military combines members who indicated experiencing a sexual in the past 12 months with those who were sexually assaulted more than a year ago but after joining the military.

DoD

For the overall DoD, 3.6% (± 0.2) of members indicated experiencing a [sexual assault since joining the military](#), including those that happened in the past 12 months. Breaking this rate out by gender, 13.2% of DoD women and 1.8% of DoD men indicated experiencing [sexual assault since joining the military](#) (Figure 19). In 2016, women in the Air Force (11.2%) were *less likely* than women in the other Services to indicate experiencing [sexual assault since joining the military](#), whereas Navy (14.8%) and Marine Corps women (15.7%) were *more likely*. For DoD men, Army (1.6%), Marine Corps (1.4%), and Air Force men (1.1%) were *less likely* than men in the other Services to indicate experiencing [sexual assault since joining the military](#), whereas men in the Navy (2.9%) were *more likely*.

Figure 19.

Sexual Assault Rate Since Joining the Military for DoD (Q65–Q85, Q87–Q93, Q95–Q106, Q171a–d, f, Q172b)

Coast Guard

In 2016, 3.5% (± 0.3) of Coast Guard members indicated experiencing [sexual assault since joining the military](#). As shown in Figure 20, the rate of [sexual assault since joining the military](#), including those that happened in the past 12 months for Coast Guard women was 14.6% and was 1.5% for Coast Guard men for 2016.

Figure 20.

Sexual Assault Rate Since Joining the Military for Coast Guard (Q65–Q85, Q87–Q93, Q95–Q106, Q171a–d, f, Q172b)

Estimated Lifetime Sexual Assault Rate

The estimated lifetime sexual assault rate includes sexual assaults that occurred in the past year as well as those that occurred more than a year ago, including unwanted events that occurred prior to joining the military.

DoD

For the DoD, 4.3% (± 0.2) of members indicated experiencing [sexual assault in their lifetime](#). Breaking this out by gender, 15.3% of DoD women and 2.2% of DoD men indicated experiencing [sexual assault in their lifetime](#) (Figure 21). In 2016, women in the Air Force (13.7%) were *less likely* than women in the other Services to indicate experiencing [sexual assault in their lifetime](#), whereas women in the Navy (16.8%) and Marine Corps (17.6%) were *more likely*. Men in the Army (2.0%), Marine Corps (1.7%) and Air Force (1.8%) were *less likely* than men in the other Services to indicate experiencing [sexual assault in their lifetime](#), whereas men in the Navy (3.4%) were *more likely*.

Figure 21.***Lifetime Sexual Assault Rate for DoD (Q65–Q85, Q87–Q93, Q95–Q106, Q171a–d, f)*****Coast Guard**

In 2016, 4.0% (± 0.3) of Coast Guard members indicated experiencing [sexual assault in their lifetime](#). As shown in Figure 22, 16.4% of Coast Guard women and 1.9% of Coast Guard men indicated experiencing [sexual assault in their lifetime](#).

Figure 22.***Lifetime Sexual Assault Rate for Coast Guard (Q65–Q85, Q87–Q93, Q95–Q106, Q171a–d, f)***

Description of Unwanted Events Experienced in the Past Year

Active duty members who indicated experiencing sexual assault in the past 12 months were asked a series of questions to provide further details on the unwanted event(s), including the number of unwanted events, if all events were done by the same person, and if any of the unwanted experiences were considered to involve hazing and/or bullying.

Number of Unwanted Events Experienced in the Past Year

DoD

As shown in Figure 23 and Figure 24, of the 4.3% of DoD women and 0.6% of men who indicated experiencing sexual assault in the past 12 months, 62% of women and 67% of men indicated having **more than one** unwanted experience in the past 12 months.

More than one-third (38%) of DoD women indicated experiencing unwanted events **one time in the past 12 months**, while 62% indicated experiencing **more than one** event in the past 12 months. One-quarter (25%) of women indicated unwanted events happened on **five or more separate occasions**. Seventeen percent indicated unwanted events happened **two times**, 14% indicated experiencing unwanted events **three times**, and 6% indicated experiencing unwanted events **four times**. In 2016, Air Force women (50%) were *more likely* than women in the other Services to indicate the unwanted events occurred **one time** and were *less likely* to indicate unwanted events occurred **five or more times** (16%), and **more than one time** (50%; Figure 23). Army women (4%) were *less likely* than women in the other Services to indicate experiencing unwanted events **four times**.

Figure 23.

Number of Unwanted Events Experienced in the Past 12 Months for DoD Women (Q108)

As shown in Figure 24, one-third (33%) of DoD men indicated they experienced unwanted event(s) **one time**, whereas a little more than one-third (35%) indicated experiencing unwanted events on **five or more separate occasions**. Fifteen percent indicated experiencing unwanted events **two times**, 12% indicated **three times**, and 5% of men indicated experiencing unwanted events **four times**. In 2016, Marine Corps men (1%) were *less likely* than men in the other Services to indicate experiencing unwanted events **four times**. Air Force men (19%) were *less likely* than men in the other Services to indicate experiencing unwanted events **five or more times**.

Figure 24.

Number of Unwanted Events Experienced in the Past 12 Months for DoD Men (Q108)

Coast Guard

Figure 25 displays the number of unwanted events Coast Guard members indicated experiencing in the past 12 months. Of the 2% of Coast Guard women and 0.3% of Coast Guard men who indicated experiencing sexual assault in the past 12 months, 57% of women and 76% of men indicated experiencing **more than one** unwanted event in the past 12 months.

Less than half (43%) of Coast Guard women indicated experiencing **one unwanted event** in the past 12 months, whereas more than one-quarter (28%) indicated experiencing unwanted events **five or more times**. Eighteen percent of women indicated the unwanted events occurred **two times**, 10% indicated experiencing events **three times**, and 2% indicated experiencing unwanted events **four times** in the past 12 months.

Forty-four percent of Coast Guard men indicated experiencing unwanted events **five or more times**, whereas a little less than one-quarter (24%) indicated it happened **one time**. Additionally, a little less than one-fifth (18%) indicated experiencing unwanted events **two times**, and 10%

indicated events occurred **three times**. Results for Coast Guard men who indicated experiencing unwanted events **four times** are not reportable.

Figure 25.

Number of Unwanted Events Experienced in the Past 12 Months for Coast Guard (Q108)

Repeat Alleged Offender in Unwanted Events Experienced in the Past Year

DoD

As shown in Figure 26, of the 62% of DoD women who indicated experiencing more than one unwanted event in the past 12 months, more than half (58%) indicated all of the unwanted events they indicated experiencing in the past 12 months were done by **more than one person**. Forty-one percent indicated all of the events were done by **the same person**.

Of the 67% of DoD men who indicated experiencing more than one unwanted event in the past 12 months, 53% indicated all of the unwanted events they indicated experiencing in the past 12 months were done by **more than one person**. Forty-two percent indicated all of the events were done by **the same person**.

Figure 26.***Unwanted Events in the Past 12 Months Done by Same Person for DoD (Q109)***

As shown in Table 3, in 2016, Army women (47%) were *more likely* than women in the other Services to indicate the unwanted events were done by *the same person*, whereas Marine Corps women (28%) were *less likely*. However, Marine Corps women (72%) were *more likely* than women in the other Services to indicate the unwanted events were done by *more than one person*. For men, those in the Army (54%) were *more likely* than men in the other Services to indicate the unwanted events were done by *the same person* and were *less likely* (41%) to indicate they were done by *more than one person*.

Percent of active duty member who indicated experiencing sexual assault and experienced more than one unwanted event in the past 12 months

Coast Guard

Of the 57% of Coast Guard women who indicated experiencing more than one unwanted event in the past 12 months, more than half (57%) indicated the unwanted events in the past 12 months were done by [more than one person](#), whereas less than half (43%) indicated the unwanted events were done by [the same person](#) (Figure 27). Data are not reportable for Coast Guard men.

Figure 27.***Unwanted Events in the Past 12 Months Done by Same Person for Coast Guard (Q109)***

Considered Any Unwanted Event in Past Year as Hazing and/or Bullying

The last section of this chapter addresses issues of hazing and bullying surrounding experiences of sexual assault in the military. Active duty members who indicated experiencing at least one sexual assault in the past 12 months were asked to identify if they would consider any of the events they experienced to be hazing and/or bullying. Hazing refers to things done to humiliate or “toughen up” people before accepting them into a group, whereas bullying refers to repeated verbally or physically abusive behaviors that are threatening, humiliating, or intimidating.

DoD

Of the 4.3% of DoD women who indicated experiencing sexual assault in the past year, 10% would describe any of the behaviors as **hazing** and 27% would consider them as **bullying** (Figure 28). When combining these behaviors to assess whether they considered any of the behaviors to be a combination of hazing and bullying, 9% of women considered any unwanted event to involve **both hazing and bullying**. The majority (72%) would **not** describe any unwanted event to be **hazing or bullying**, whereas 18% would describe them as **bullying (without hazing)** and 1% would describe the unwanted events as **hazing (without bullying)**.

Of the 0.3% of DoD men who indicated experiencing sexual assault in the past year, 26% would describe any behavior as **hazing** and 42% as **bullying** (Figure 28). When combining these behaviors to assess whether they considered any of the behaviors to be a combination of hazing and bullying, 23% of men considered any of the unwanted events to involve **both hazing and bullying**. More than half (55%) would **not** describe any unwanted event as **hazing or bullying**, whereas 19% indicated any unwanted event experienced as **bullying (without hazing)** and 3% as **hazing (without bullying)**.

Figure 28.***Any Unwanted Event Consider as Hazing and/or Bullying for DoD (Q110, Q121)***

As shown in Table 4, when examining the behaviors of hazing and bullying, Army women (15%) were *more likely* than women in the other Services to describe any unwanted event they experienced as **hazing**. When considering the combination of hazing and bullying behaviors experienced, Army women (14%) were *more likely* than women in the other Services to indicate experiencing **both hazing and bullying**, whereas Air Force women (6%) were *less likely*. Marine Corps women (<1%) were *less likely* than women in the other Services to indicate any unwanted event was considered to be **hazing (without bullying)**.

For DoD men, when examining the behaviors of hazing and bullying, Army men (52%) were *more likely* than men in the other Services to indicate experiencing **bullying**, whereas Air Force men (28%) were *less likely*. Air Force men (13%) were *less likely* than men in the other Services to indicate experiencing **hazing**. When considering the combination of hazing and bullying behaviors experienced, Air Force men (72%) were *more likely* than men in the other Services to indicate any unwanted event they experienced to **neither be hazing nor bullying**, and were *less likely* to indicate **both hazing and bullying** (12%) took place during any unwanted event. Army men (28%) were *more likely* than men in the other Services to indicate any unwanted event experienced to be **bullying (without hazing)**.

Table 4.

Any Unwanted Event Consider as Hazing and/or Bullying for DoD (Q110, Q121)

	Within Service Comparisons

Percent of active duty members who indicated experiencing sexual assault

Coast Guard

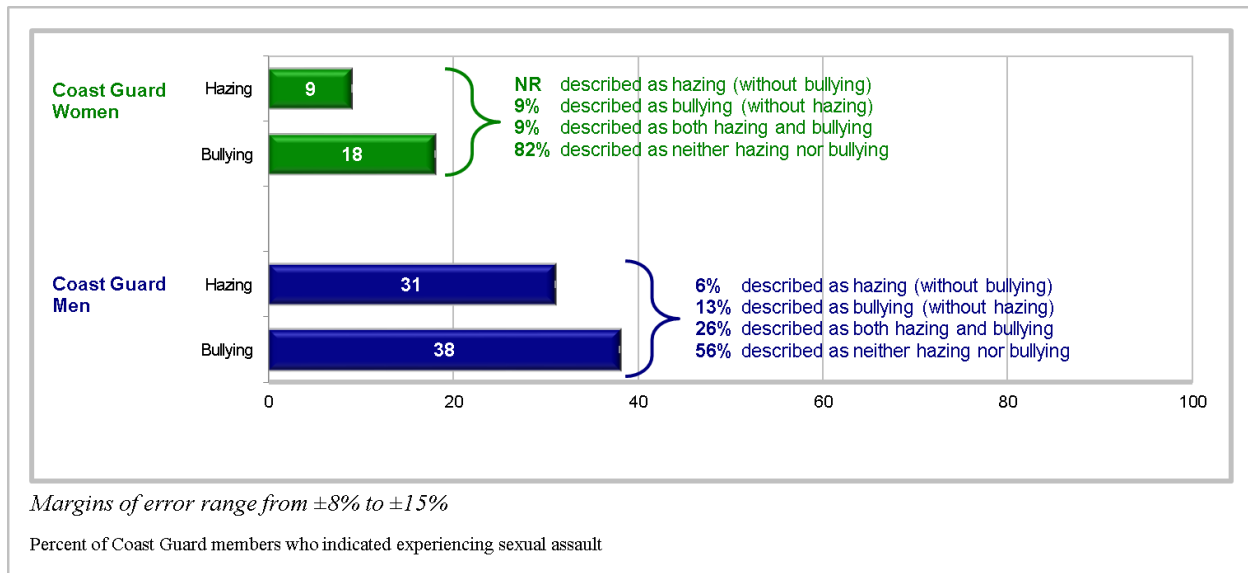

As shown in Figure 29, of the 2.0% of Coast Guard women who indicated experiencing sexual assault in the past year, 9% would describe any of the behaviors as **hazing** and 18% would consider any of the behaviors as **bullying**. When combining these behaviors to assess whether they considered any of the behaviors to be a combination of hazing and bullying, 9% of women considered behaviors as **both hazing and bullying**. The majority (82%) would **not** describe any unwanted event as **hazing or bullying**. Fewer (9%) would describe any unwanted events as **bullying (without hazing)**. Results for **hazing (without bullying)** are not reportable for women.

Of the 0.3% of Coast Guard men who indicated experiencing sexual assault in the past year, 31% would describe any of the behaviors as **hazing** and 38% would consider any of the behaviors as **bullying** (Figure 29). When combining these behaviors to assess whether they considered any of the behaviors to be a combination of hazing and bullying, 26% of men considered behaviors to be **both hazing and bullying**. More than half (56%) would **not** describe any of the behaviors as

hazing or bullying, whereas 6% would describe any unwanted event they experienced as hazing (without bullying) and 13% would describe the behaviors as bullying (without hazing).

Figure 29.

Any Unwanted Event Consider as Hazing and/or Bullying for Coast Guard (Q110, Q121)

Chapter 4: One Situation of Sexual Assault with Biggest Effect

Ms. Lisa Davis and Ms. Amanda Grifka

Introduction

On the 2016 *WGRA*, active duty members who indicated experiencing a sexual assault that met legal criteria³⁵ were asked to consider the one situation experienced in the past 12 months that had the biggest effect on them. Members who indicated experiencing sexual assault outside of this time frame are excluded from the analysis of the one situation with the biggest effect. This chapter provides details on the circumstances in which potential sexual assault incidents occurred. Members were then asked follow-up questions about the one situation in order to provide additional detail on the circumstances surrounding the experience. This chapter addresses the following topics:

Characteristics of the Offender	<ul style="list-style-type: none">▪ Number and gender▪ Military status and rank▪ Employment status▪ Relationship to offender
Characteristics of the Situation	<ul style="list-style-type: none">▪ Where did the situation occur?▪ When did the situation occur?
Bullying/Hazing	<ul style="list-style-type: none">▪ Situation involved bullying and/or hazing
Stalking/Harassment	<ul style="list-style-type: none">▪ Offender stalked and/or harassed member before and/or after the situation
Alcohol/Drugs	<ul style="list-style-type: none">▪ Situation involved alcohol and/or drugs
Reaction to the Situation	<ul style="list-style-type: none">▪ Made member take steps to leave or separate from the military▪ Received a sexual assault forensic exam▪ Satisfaction with response/services

Results are reported for 2016 and trend comparisons to the 2014 *RMWS* are provided where data are available.

³⁵ In addition to meeting the UCMJ-based requirements, members also had to indicate that this experience happened within the past 12 months.

Most Serious Behavior Experienced in the One Situation

The first section of this chapter examines the type of behavior active duty members indicated happened during the unwanted event with the biggest effect. Active duty members were asked to endorse the event considered as the worst or most serious (hereafter referred to as “the one situation”). Responses from this question were used to construct the three-level hierarchical variable of the most serious behavior experienced: penetrative sexual assault, attempted penetrative sexual assault, and non-penetrative sexual assault. It should be noted this hierarchy differs from that used to construct the prevalence rates of sexual assault presented in Chapter 3. The sexual assault prevalence rates hierarchy follows *2014 RMWS* (penetrative sexual assault, non-penetrative sexual assault, attempted penetrative sexual assault), whereas the most serious behavior hierarchy discussed in this chapter uses OPA metrics, which places attempted penetrative sexual assault before non-penetrative sexual assault as described below:

- Penetrative sexual assault includes individuals who indicated “Yes” to any of the items that assess penetration of the vagina, anus, or mouth.
- Attempted penetrative sexual assault includes individuals who indicated “Yes” to the item that assesses attempted sexual assault and were not previously counted as penetrative sexual assault.
- Non-penetrative sexual assault includes individuals who indicated “Yes” to either of the screener items that assess unwanted sexual touching and were not previously counted as having experienced either penetrative sexual assault or attempted penetrative sexual assault.

The most serious behavior discussed in the unwanted event with the biggest effect did not have to meet the legal criteria, as long as one of the sexual assault behaviors endorsed previously met the legal criteria for sexual assault as outlined in Chapter 1.

DoD

As shown in Figure 30, of the 4.3% of DoD women and 0.6% of DoD men who indicated experiencing sexual assault in the past 12 months, a little less than half (48%) of women and more than one-third (35%) of men indicated the most serious behavior experienced was [penetrative sexual assault](#). Eight percent of women and 6% of men indicated [attempted penetrative sexual assault](#) was the most serious behavior they experienced. Furthermore, 43% of women and 59% of men indicated the most serious behavior was [non-penetrative sexual assault](#).

In 2016, Marine Corps women (59%) were *more likely* than women in the other Services to indicate the most serious behavior experienced was [penetrative sexual assault](#), whereas women in the Navy (43%) were *less likely*. Conversely, Navy women (49%) were *more likely* than women in the other Services to indicate the most serious behavior experienced was [non-penetrative sexual assault](#), whereas Marine Corps women (34%) were *less likely*.

For DoD men in 2016, Air Force men (49%) were *more likely* than men in the other Services to indicate the most serious behavior experienced was [penetrative sexual assault](#).

Figure 30.

Most Serious Behavior Experienced in the One Situation for DoD (Q65–Q85, Q87–Q93, Q95–Q106, Q108, Q111)

Coast Guard

The most serious behavior experienced in the one situation for Coast Guard members is presented in Figure 31. Of the 2.0% of Coast Guard women and 0.3% of Coast Guard men who indicated experiencing sexual assault in the past 12 months, more than one-third (38%) of women and men (35%) indicated the most serious behavior experienced was **penetrative sexual assault**. Three percent of women and 4% of men indicated **attempted penetrative sexual assault** was the most serious behavior experienced. Additionally, more than half (59%) of Coast Guard women and a little less than two-thirds (61%) of Coast Guard men indicated **non-penetrative sexual assault** was the most serious behavior experienced.

Figure 31.***Most Serious Behavior Experienced in the One Situation for Coast Guard (Q111)***

Characteristics of the Alleged Offender(s) in the One Situation

Active duty members who indicated experiencing sexual assault in the past 12 months were asked to identify various characteristics of the alleged offender(s) in the one situation that had the biggest effect on them. Characteristics of the alleged offender(s) from the one situation examined in this section include the number of alleged offenders, gender, military status, rank within the military, employment status, and the relationship of the alleged offender(s) to the member.

Number of Alleged Offender(s) in the One Situation

DoD

As shown in Figure 32, of the 4.3% of DoD women who indicated experiencing sexual assault in the past year, a little more than two-thirds (67%) indicated **one person** was involved in the one situation. A little less than one-third (31%) of women indicated **more than one person** was involved in the situation, and 2% of women indicated they were **not sure** how many offenders were involved.

Of the 0.6% of DoD men who indicated experiencing sexual assault in the past year, more than half (58%) indicated **one person** was involved in the one situation. One-third (33%) of men indicated **more than one person** was involved in the situation, and 9% indicated they were **not sure** how many offenders were involved.

In 2016, Air Force women (75%) were *more likely* than women in the other Services to indicate the situation involved **one person** and were *less likely* than women in the other Services to

indicate **more than one person** was involved in the one situation (23%). There were no significant differences between Services for men.

Figure 32.

Number of Alleged Offender(s) in the One Situation for DoD (Q112)

Coast Guard

Figure 33 shows the number of alleged offender(s) in the one situation for Coast Guard members. Of the 2.0% of Coast Guard women who indicated experiencing sexual assault in the past year, the majority (70%) of women indicated **one person** was involved in the one situation, whereas a little less than one-third (30%) indicated **more than one person** was involved.

Of the 0.3% of Coast Guard men who indicated experiencing sexual assault in the past year, a little more than two-thirds (68%) of men indicated **one person** was involved in the one situation, whereas more than one-quarter (26%) indicated **more than one person** was involved. Fewer (5%) were **not sure** of the number of offender(s) involved in the one situation.

Figure 33.***Number of Alleged Offender(s) in the One Situation for Coast Guard (Q112)***

Gender of Alleged Offender(s) in the One Situation

DoD

Of the 4.3% of DoD women who indicated experiencing sexual assault in the past year, the vast majority (94%) of women indicated the alleged offender(s) in the one situation was (were) **men** (Figure 34). Fewer indicated the alleged offender(s) in the one situation was (were) **women** (2%) or **a mix of men and women** (4%).

Of the 0.6% of DoD men who indicated experiencing sexual assault in the past year, more than half (57%) of men indicated the alleged offender(s) in the one situation was (were) **men** (Figure 34). One-quarter (25%) of men indicated the alleged offender(s) was (were) **women** and a little more than one-tenth (12%) indicated they were **a mix of men and women**. Fewer (6%) men indicated they were **not sure** of the gender of the alleged offender(s), which compared to 2014, showed a statistically significant increase in 2016 (6 percentage points).

Figure 34.
Gender of Alleged Offender(s) in the One Situation for DoD (Q113)

In 2016, women in the Marine Corps (<1%) and Army (1%) were *less likely* than women in the other Services to indicate the gender of the alleged offender(s) was (were) **women** (Table 5). There are no significant differences between 2014 and 2016 for DoD women on gender of the alleged offender(s).

In 2016, Air Force men (1%) were *less likely* to indicate they were **not sure** of the gender of the alleged offender(s) (Table 5). Compared to 2014, the percentage of DoD men who indicated they were **not sure** of the gender of the alleged offender(s) showed a statistically significant *increase* in 2016 for Army (7 percentage points) and Marine Corps men (13 percentage points).

Percent of active duty members who indicated experiencing sexual assault

Coast Guard

Of the 2% of Coast Guard women who indicated experiencing sexual assault in the past year, the vast majority (92%) indicated the alleged offender(s) in the one situation was (were) **men** (Figure 35). Fewer indicated the alleged offender(s) in the one situation was (were) **women** (1%) or **a mix of men and women** (7%). Compared to 2014, the percentage of those who indicated the alleged offenders were **a mix of men and women** showed a statistically significant *increase* in 2016 for Coast Guard women (7 percentage points).

For Coast Guard men, of the 0.3% who indicated experiencing sexual assault in the past year, the majority (75%) indicated the alleged offender(s) in the one situation was (were) **men** (Figure 35). Fourteen percent indicated the alleged offender(s) in the one situation was (were) **women**, whereas fewer indicated they were **a mix of men and women** or were **not sure** of the gender of the alleged offender(s) (both 5%). Statistical significance between 2014 and 2016 cannot be calculated because results are not reportable for Coast Guard men in 2014.

Figure 35.
Gender of Alleged Offender(s) in the One Situation for Coast Guard (Q113)

Military Status of Alleged Offender(s) in the One Situation

Active duty members who indicated experiencing sexual assault in the past 12 months were asked to indicate if the alleged offender(s) was (were) in the military. For those who indicated some or all of the alleged offenders were in the military, they were asked if the alleged offenders were in the same Service.

DoD

As shown in Figure 36, of the 4.3% of DoD women who indicated experiencing sexual assault in the past year, the majority (83%) indicated **all** of the alleged offenders in the one situation **were military members**, whereas fewer (7%) indicated **some were military, but not all**. Combining these two results, 90% of DoD women indicated **some or all of the alleged offenders were military members**. Furthermore, 8% of women indicated **none** of the alleged offenders **were military members**, whereas 3% indicated they were **not sure** if the alleged offender(s) was (were) a military member.

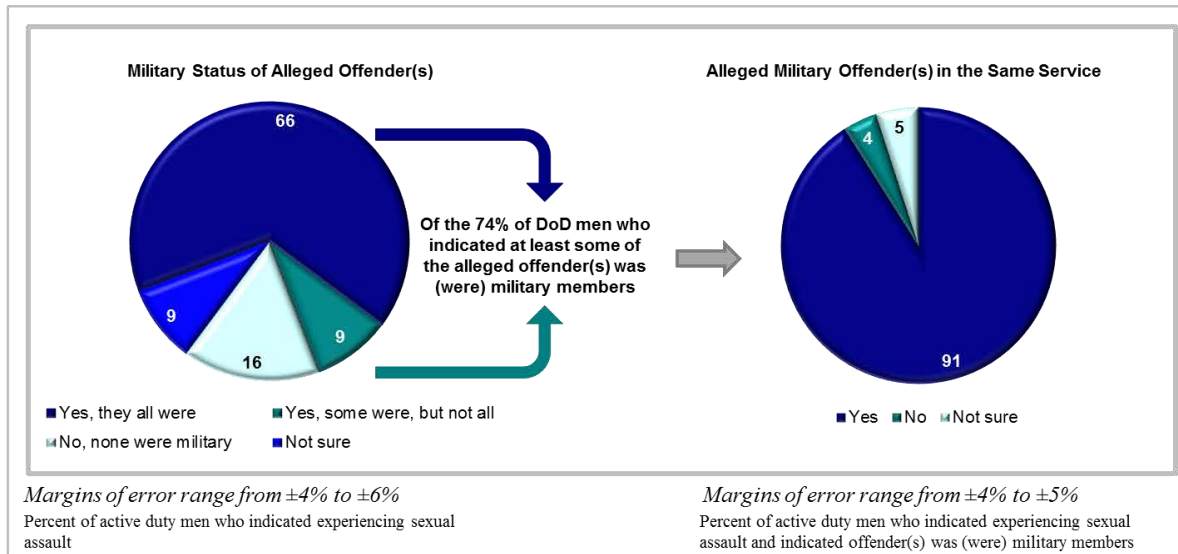

Additionally, of the 90% of DoD women who indicated the alleged offender(s) was (were) military members, the vast majority (94%) indicated the alleged military offender(s) was (were) **in the same Service** as them. Conversely, only 5% of women indicated the alleged military offender(s) was (were) **not in the same Service** and 1% of women were **not sure**.

Figure 36.***Military Status of Alleged Offender(s) in the One Situation for DoD Women (Q114–Q115)***

For DoD men, of the 0.6% who indicated experiencing sexual assault in the past year, two-thirds (66%) indicated **all** of the alleged offenders in the one situation **were military members**, whereas fewer (9%) indicated **some were military, but not all**. Combining these two results, 74%³⁶ of DoD men indicated **some or all of the alleged offenders were military members** (Figure 37). Sixteen percent of men indicated **none** of the alleged offenders **were military members**, whereas 9% indicated they were **not sure** if the alleged offenders were a military member.

Additionally, of the 74% of DoD men who indicated the alleged offender(s) was (were) military members, the vast majority (91%) indicated the alleged military offender(s) was (were) **in the same Service** as them. Conversely, only 4% of men indicated the alleged military offender(s) was (were) **not in the same Service** and 5% were **not sure**.

³⁶ When combining the two data points to create this estimate, it does not add up to the two data points shown due to rounding.

Figure 37.***Military Status of Alleged Offender(s) the One Situation for DoD Men (Q114–Q115)***

In 2016, women in the Marine Corps (92%) and Army (87%) were *more likely* than women in the other Services to indicate **all** of the alleged offenders in the one situation **were in the military**, whereas women in the Air Force (75%) were *less likely* (Table 6). Conversely, Air Force women (14%) were *more likely* than women in the other Services to indicate **none** of the alleged offenders in the one situation **were military**, whereas Marine Corps women (1%) were *less likely*. Army women (1%) were *less likely* than women in the other Services to indicate they were **not sure** of the military status of the alleged offender(s). Additionally, Air Force women (87%) were *less likely* than women in the other Services to indicate the alleged military offender(s) was (were) **in the same Service** as them.

For men in 2016, Air Force men (48%) were *less likely* than men in the other Services to indicate **all** of the alleged offenders in the one situation **were military members** (Table 6). Additionally, Air Force men (32%) were *more likely* than men in the other Services to indicate **none** of the alleged offenders **were military members**.

Percent of active duty members who indicated experiencing sexual assault (Q114)

Percent of active duty members who indicated experiencing sexual and indicated offender(s) was (were) a military member (Q115)

Coast Guard

Figure 38 displays, of the 2.0% of Coast Guard women who indicated experiencing sexual assault in the past year, a little more than two-thirds (68%) indicated **all** of the alleged offenders in the one situation **were military members**, whereas fewer (3%) indicated **some were military, but not all**. Combining these two results, 71% of Coast Guard women indicated **some or all of the alleged offenders were military members**. One-quarter (25%) of women indicated **none** of the alleged offenders **were military members**, whereas 3% indicated they were **not sure** if the alleged offender(s) was (were) a military member.

Additionally, of the 71% of Coast Guard women who indicated the alleged offender(s) was (were) military members, the vast majority (98%) indicated the alleged military offender(s) was

(were) **in the same Service** as them. Conversely, only 2% of women indicated the alleged military offender(s) was (were) **not in the same Service**.

Figure 38.

Military Status of Alleged Offender(s) in the One Situation for Coast Guard Women (Q114–Q115)

As shown in Figure 39, of the 0.3% of Coast Guard men who indicated experiencing sexual assault in the past year, a little more than half (53%) indicated **all** of the alleged offenders in the one situation **were military members**, whereas fewer (5%) indicated **some were military, but not all**. Combining these two results, 57%³⁷ of Coast Guard men indicated **some or all of the alleged offenders were military members**. More than one-third (38%) of men indicated **none** of the alleged offenders **were military members**, whereas 5% indicated they were **not sure** if the alleged offender(s) was (were) in the military.

Additionally, of the 57% of Coast Guard men who indicated the alleged offender(s) was (were) military members, the vast majority (96%) indicated the alleged military offender(s) was (were) **in the same Service** as them. Conversely, only 4% of men indicated the alleged military offender(s) was (were) **not in the same Service**.

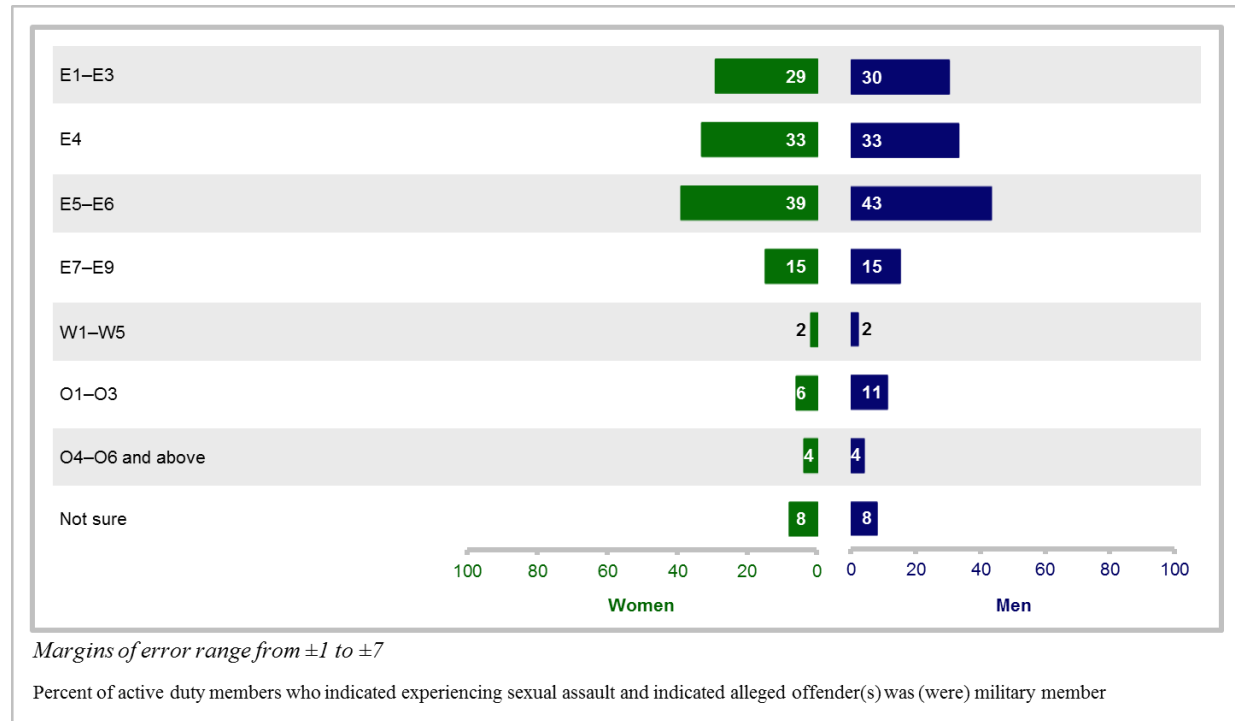

³⁷ When combining the two data points to create this estimate, it does not add up to the two data points shown due to rounding.

Figure 39.***Military Status of Alleged Offender(s) in the One Situation for Coast Guard Men (Q114–Q115)******Rank of Alleged Military Offender(s)***

Members who indicated at least some or all of the alleged offender(s) were in the military were asked to indicate the rank of the alleged offender(s). Members could mark all of the ranks applicable for the alleged offender(s).

DoD

As shown in Figure 40, of the 90% of DoD women and 74% of DoD men who indicated the alleged offender(s) was (were) in the military, more than one-third (39%) of women and less than half (43%) of men indicated the alleged offender(s) was (were) ranked **E5–E6**. One-third of women and men (both 33%), indicated the alleged offender(s) in the one situation was (were) ranked **E4**, whereas 29% of women and 30% of men indicated the alleged offender(s) was (were) ranked **E1–E3**. Fifteen percent of women and men indicated the alleged offender(s) was (were) ranked **E7–E9**, whereas 6% of women and 11% of men indicated the alleged offender(s) was (were) ranked **O1–O3**. Fewer women and men (both 4%) indicated the alleged offender(s) in the one situation was (were) ranked **O4–O6 and above**, and 2% of women and men indicated the alleged offender(s) was (were) ranked **W1–W5**. Eight percent of both women and men indicated they were **not sure** of the rank of the alleged offender(s).

Figure 40.***Rank of Alleged Military Offender(s) in the One Situation for DoD (Q116)***

Comparing the rank of the member to the rank of the alleged offender(s) in the one situation, 57% of DoD women and 53% of DoD men indicated the alleged offender(s) was (were) in a **higher rank** than them (Figure 41). A little more than one-third (38%) of women and 40% of men indicated the alleged offender(s) was (were) in **the same rank** as them and a little less than one-fifth (19%) of women and a little more than one-quarter (29%) of men indicated the alleged offender(s) was (were) in a **lower rank** than them.

Figure 41.

Rank of Member Compared to Rank of Alleged Military Offender(s) in the One Situation for DoD (Q116)

As shown in Table 7, in 2016, Marine Corps women (43%) were *more likely* than women in the other Services to indicate the alleged offender(s) was (were) ranked [E1–E3](#). Air Force women were *more likely* than women in the other Services to indicate the alleged offender(s) was (were) ranked [O4–O6 and above](#) (7%) as well as were *not sure* (15%) of the rank of the offender(s), but were *less likely* (25%) to indicate the alleged offender(s) was (were) ranked [E4](#). Navy women (51%) were *more likely* than women in the other Services to indicate the alleged offender(s) was (were) ranked [E5–E6](#), whereas women in the Marine Corps and Air Force (both 27%) were *less likely*. Army women (19%) were *more likely* than women in the other Services to indicate the alleged offender(s) was (were) ranked [E7–E9](#), whereas Marine Corps (10%) were *less likely*.

When comparing the rank of the member to the rank of the alleged offender(s), Navy women (63%) were *more likely* than women in the other Services to indicate the alleged offender(s) was (were) in a [higher rank](#) than them, while Air Force women (45%) were *less likely* (Table 7).

In 2016, Navy men (58%) were *more likely* than men in the other Services to indicate the alleged offender(s) was (were) ranked [E5–E6](#), whereas Army men (32%) were *less likely* (Table 7). Marine Corps men (4%) were *less likely* than men in the other Services to indicate the alleged offender(s) was (were) ranked [O1–O3](#). There were no significant differences between Services for men when comparing the rank of the member to the rank of the alleged offender(s).

Percent of active duty members who indicated experiencing sexual assault and indicated alleged offender(s) was (were) military member

Coast Guard

As shown in Figure 42, of the 71% of Coast Guard women who indicated the alleged offender(s) was (were) in the military, 40% of women indicated the alleged offender(s) was (were) ranked E5–E6, a little less than one-third (31%) indicated the alleged offender(s) was (were) ranked E4, and more than one-quarter (26%) indicated the alleged offender(s) was (were) ranked E1–E3. A

little less than one-fifth (18%) of women indicated the alleged offender(s) was (were) ranked **E7–E9**, while 12% indicated the alleged offender(s) was (were) ranked **O1–O3**, and fewer indicated the alleged offender(s) was (were) ranked **O4–O6 and above** (5%) or ranked **W1–W5** (3%).

Of the 57% of Coast Guard men who indicated the alleged offender(s) was (were) in the military, a little less than one-fifth (18%) of men indicated the alleged offender(s) was (were) ranked **E7–E9**, 8% indicated the alleged offender(s) was (were) ranked **W1–W5**, and fewer indicated the alleged offender(s) was (were) ranked **O1–O3** (4%) or ranked **O4–O6 and above** (3%). Data for the other ranks of alleged offender(s) were not reportable for Coast Guard men.

Figure 42.

Rank of Alleged Military Offender(s) in the One Situation for Coast Guard (Q116)

Comparing the rank of the member to the rank of the alleged offender(s) in the one situation, 71% of Coast Guard women indicated the alleged offender(s) was (were) in a **higher rank** than them (results for Coast Guard men are not reportable, Figure 43). More than one-quarter (29%) of women indicated the alleged offender(s) was (were) in **the same rank** as them (results for men are not reportable) and a little less than one-quarter (23%) of women and men (24%) indicated the alleged offender(s) was (were) in a **lower rank** than them.

Figure 43.

Rank of Member Compared to Rank of Alleged Military Offender(s) in the One Situation for Coast Guard (Q116)

Status of Alleged Offender(s) in the One Situation

Active duty members were asked to indicate the employment status of the alleged offender(s). Members were asked to mark all applicable statuses of the alleged offender(s) involved in the one situation.

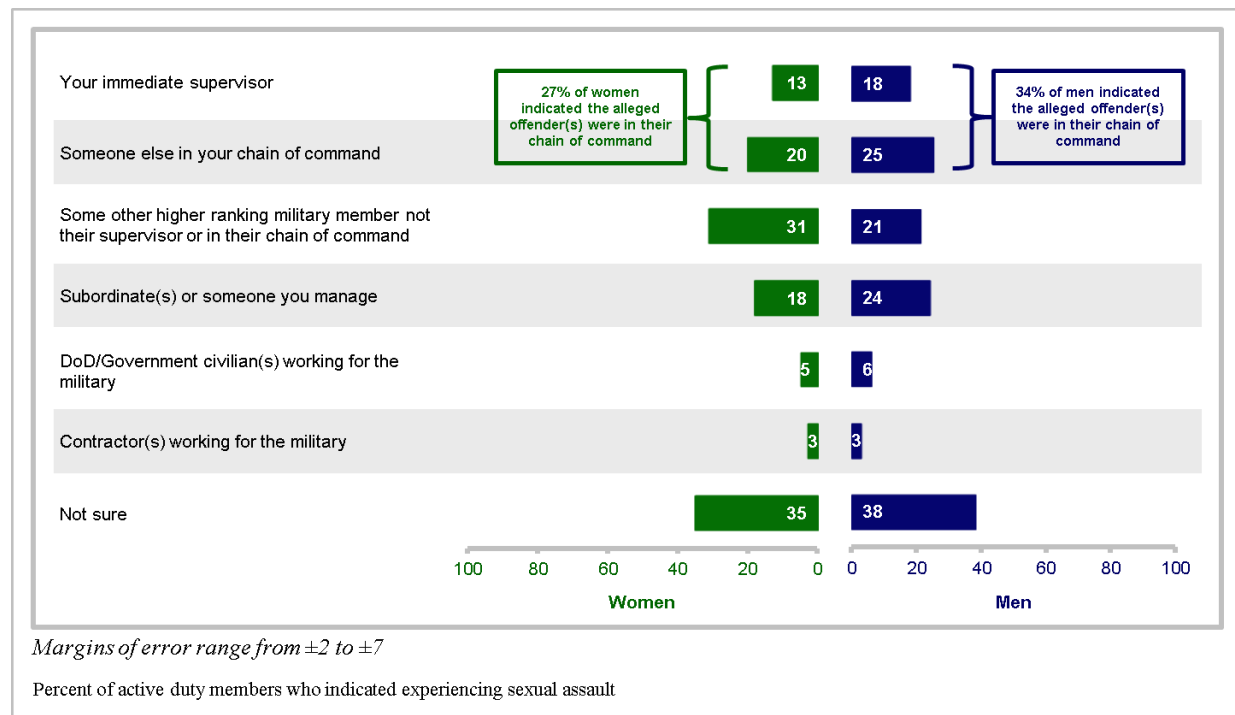

DoD

As shown in Figure 44, of the 4.3% of DoD women who indicated experiencing sexual assault in the past 12 months, more than one-third (35%) indicated they were **not sure** about the status of the alleged offender(s). A little less than one-third (31%) indicated the alleged offender(s) was (were) **some other higher ranking military member not their supervisor or in their chain of command** and 20% indicated the alleged offender(s) was (were) **someone else in their chain of command (excluding their immediate supervisor)**. Additionally, 18% of women indicated the alleged offender(s) was (were) **subordinate(s) or someone they manage**, whereas 13% indicated the alleged offender(s) was (were) **their immediate supervisor**. Fewer women indicated the alleged offender(s) was (were) **DoD or government civilians working for the military** (5%) or **contractor(s) working for the military** (3%). Combining those who indicated the alleged offender(s) was (were) their immediate supervisor or someone else in their chain of command (excluding their immediate supervisor), 27% of women indicated the alleged offender(s) was (were) **in their chain of command**.

Across the 0.6% of DoD men who indicated experiencing sexual assault in the past year, more than one-third (38%) indicated they were **not sure** about the status of the alleged offender(s). One-quarter (25%) of men indicated the alleged offender(s) was (were) **someone else in their chain of command (excluding their immediate supervisor)**, and 24% indicated the alleged offender(s) was (were) **subordinate(s) or someone they manage**. Additionally, 21% of men

indicated the alleged offender(s) was (were) *some other higher ranking military member not their supervisor or in their chain of command*, whereas 18% indicated the alleged offender(s) was (were) *their immediate supervisor*. Fewer men indicated the alleged offender(s) was (were) *DoD or government civilians working for the military* (6%) or *contractor(s) working for the military* (3%). Combining those who indicated the alleged offender(s) was (were) their immediate supervisor or someone else in their chain of command (excluding their immediate supervisor), 34% of men indicated the alleged offender(s) was (were) *in their chain of command*.

Figure 44.
Status of Alleged Offender(s) in the One Situation for DoD (Q117)

In 2016, as shown in Table 8, Air Force women (50%) were *more likely* than women in the other Services to indicate they were *not sure* of the status of the alleged offender(s), but were *less likely* to indicate the alleged offender(s) was (were) *subordinate(s) or someone they manage* (10%) or *their immediate supervisor* (8%). Marine Corps women (1%) were *less likely* than women in the other Services to indicate the alleged offender(s) was (were) *DoD or government civilian(s) working for the military*. Marine Corps and Army women (both 1%) were *less likely* than women in the other Services to indicate the alleged offender(s) was (were) *contractor(s) working for the military*.

In 2016, men in the Air Force (8%) were *less likely* than men in the other Services to indicate the alleged offender(s) was (were) *their immediate supervisor* (Table 8). Men in the Army (3%) were *less likely* than men in the other Services to indicate the alleged offender(s) was (were) *DoD or government civilian(s) working for the military*.

Percent of active duty members who indicated experiencing sexual assault

Coast Guard

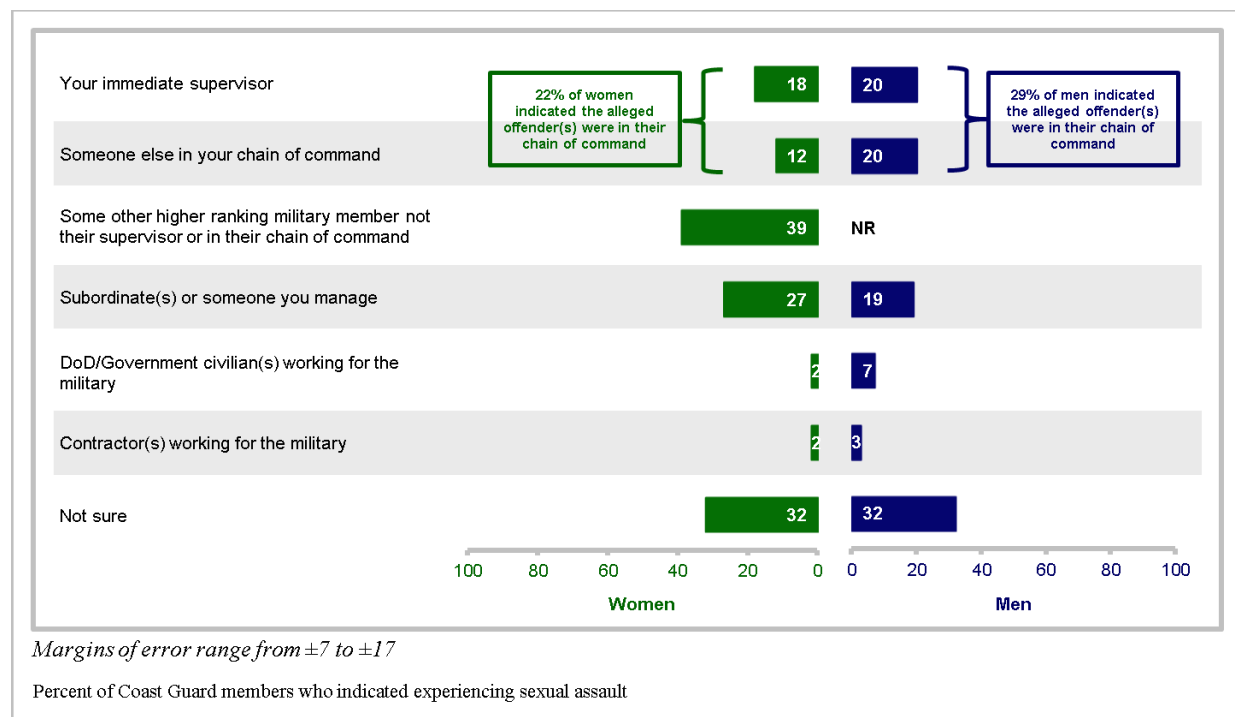

Of the 2.0% of Coast Guard women who indicated experiencing sexual assault in the past year, more than one-third (39%) indicated the alleged offender(s) was (were) **some other higher ranking military member (not their supervisor or in their chain of command)**; Figure 45). A little less than one-third (32%) indicated they were **not sure** of the status of the alleged offender(s), 27% indicated the alleged offender(s) was (were) **subordinate(s) or someone they manage**, and 18% indicate the alleged offender(s) was (were) **their immediate supervisor**. Additionally, 12% of women indicated the alleged offender(s) was (were) **someone else in their chain of command (excluding their immediate supervisor)**, and fewer indicated the alleged offender(s) was (were) **DoD or government civilian(s) working for the military** or **contractor(s) working for the military** (both 2%). Combining those who indicated the alleged offender(s) was (were) their immediate supervisor or someone else in their chain of command (excluding their immediate supervisor), 22% of women indicated the alleged offender(s) was (were) **in their chain of command**.

Also shown in Figure 43, of the 0.3% of Coast Guard men who indicated experiencing sexual assault in the past year, a little less than one-third (32%) indicated they were **not sure** of the status of the alleged offender(s) (Figure 45). One-fifth (20%) of men indicated the alleged

offender(s) was (were) [their immediate supervisor](#) or [someone else in their chain of command \(excluding their immediate supervisor\)](#), whereas 19% indicated the alleged offender(s) was (were) [subordinate\(s\) or someone they manage](#). Fewer men indicated the alleged offender(s) was (were) [DoD or government civilian\(s\) working for the military](#) (7%) or [contractor\(s\) working for the military](#) (3%). Combining those who indicated the alleged offender(s) was (were) their immediate supervisor or someone else in their chain of command (excluding their immediate supervisor), 29% of men indicated the alleged offender(s) was (were) [in their chain of command](#).

Figure 45.

Status of Alleged Offender(s) in the One Situation for Coast Guard (Q117)

Relationship to Alleged Offender(s) in the One Situation

To assess whether members who indicated experiencing sexual assault in the past 12 months knew the alleged offender(s), they were asked to indicate the relationship(s) they have with the alleged offender(s). Members were asked to mark all applicable relationships they had with the alleged offender(s).

DoD

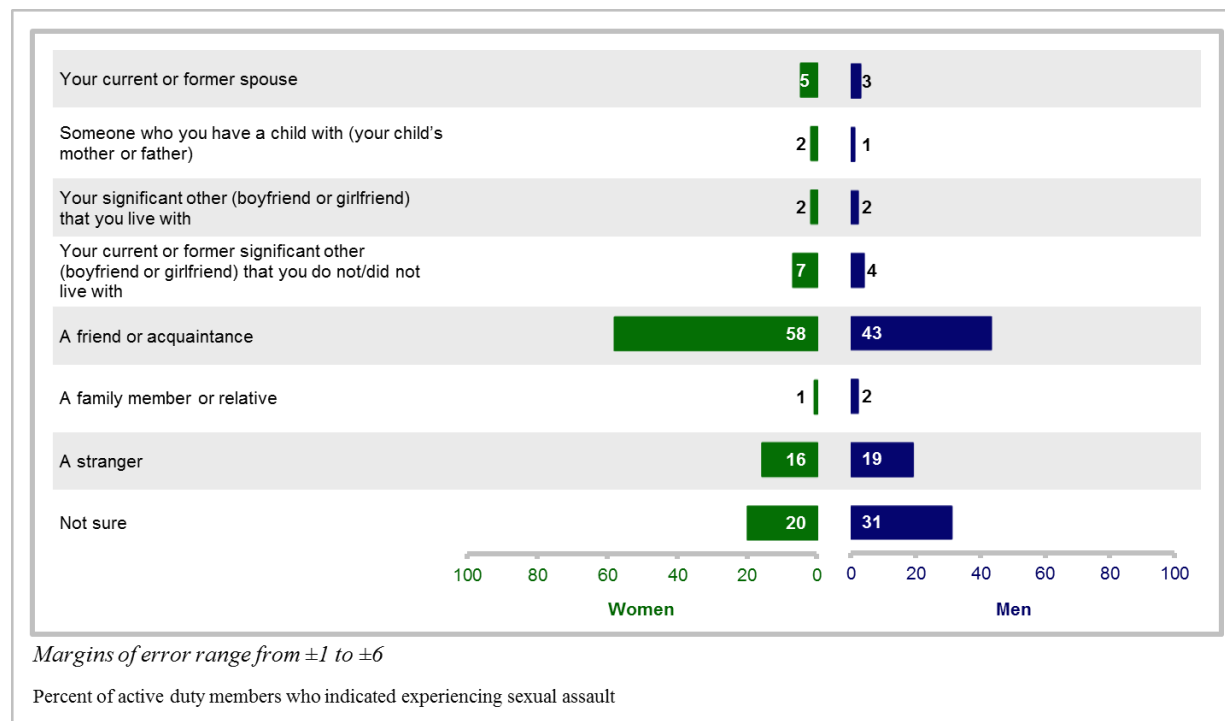

As shown in Figure 46, of the 4.3% of DoD women who indicated experiencing sexual assault in the past year, more than half (58%) indicated the alleged offender(s) in the one situation was (were) [a friend or acquaintance](#). One-fifth (20%) indicated they were [not sure](#) if they had a relationship with the alleged offender(s), and 16% indicated the alleged offender(s) was (were) [a](#)

stranger. Fewer women indicated the alleged offender(s) was (were) a **current or former significant other (boyfriend or girlfriend) they do not or did not live with** (7%) or **their current or former spouse** (5%). Two percent of women indicated the alleged offender(s) was (were) **someone they have a child with** or a **significant other (boyfriend or girlfriend) they live with**, and one percent indicated the alleged offender(s) was (were) a **family member or relative**.

Similar results are shown for DoD men (Figure 46). Of the 0.6% of DoD men who indicated experiencing sexual assault in the past year, less than half (43%) indicated the alleged offender(s) in the one situation was (were) a **friend or acquaintance**. A little less than one-third (31%) indicated they were **not sure** if they had a relationship with the alleged offender(s), and 19% indicated the alleged offender(s) was (were) a **stranger**. Fewer men indicated the alleged offender(s) was (were) a **current or former significant other (boyfriend or girlfriend) they do not or did not live with** (4%) or **their current or former spouse** (3%). Two percent of men indicated the alleged offender(s) was (were) a **family member or relative** or a **significant other (boyfriend or girlfriend) they live with**, and one percent indicated the alleged offender(s) was (were) **someone they have a child with**.

Figure 46.

Relationship to Alleged Offender(s) in the One Situation for DoD (Q118)

In 2016, Air Force women (16%) were *less likely* than women in the other Services to indicate they were **not sure** of the relationship they had with the alleged offender(s) (Table 9). Women in the Navy were *less likely* than women in the other Services to indicate the alleged offender(s) was (were) **their current or former spouse** (3%) or a **family member or relative** (<1%).

In 2016, Navy men (1%) were *less likely* than men in the other Services to indicate the alleged offender(s) was (were) their **current or former significant other (boyfriend or girlfriend) they do not or did not live with** (Table 9).

Percent of active duty members who indicated experiencing sexual assault

Coast Guard

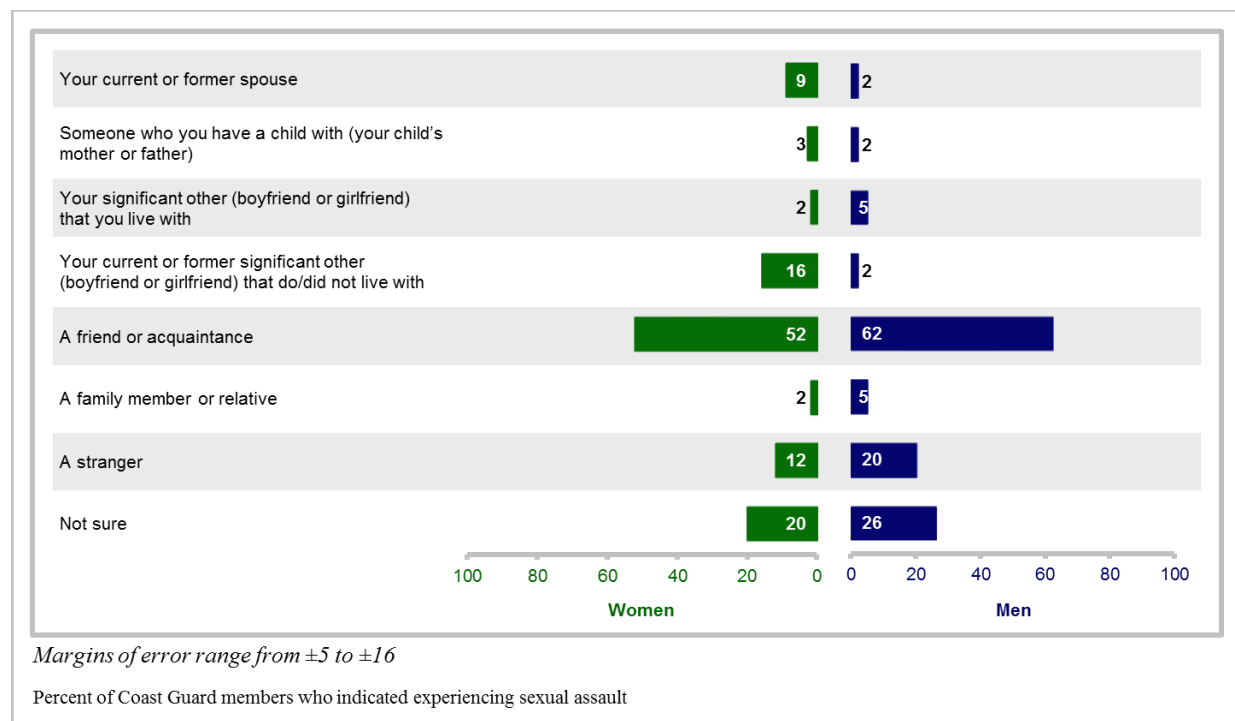

Figure 47 shows of the 2.0% of Coast Guard women who indicated experiencing sexual assault in the past year, a little more than half (52%) indicated the alleged offender(s) in the one situation was (were) **a friend or acquaintance**. One-fifth (20%) of women indicated they were **not sure** of the relationship they had with the alleged offender(s), whereas 16% indicated the alleged offender(s) was (were) **their current or former significant other (boyfriend or girlfriend) they do not or did not live with**. A little more than one-tenth (12%) indicated the alleged

offender(s) was (were) a **stranger**, and 9% indicated the alleged offender(s) was (were) **their current or former spouse**. Additionally, fewer Coast Guard women indicated the offender(s) was (were) **someone they have a child with** (3%), **their significant other (boyfriend or girlfriend) they live with** (2%), or a **family member or relative** (2%).

Of the 0.3% of Coast Guard men who indicated experiencing sexual assault in the past year, a little less than two-thirds (62%) indicated the alleged offender(s) in the one situation was (were) a **friend or acquaintance** (Figure 47). More than one-quarter (26%) of men indicated they were **not sure** of the relationship they had with the alleged offender(s) and 20% indicated the alleged offender(s) was (were) a **stranger**. Fewer men indicated the alleged offender(s) was (were) **their significant other (boyfriend or girlfriend) they live with** (5%) or a **family member or relative** (5%). Two percent of men indicated the alleged offender(s) was (were) **their current or former significant other (boyfriend or girlfriend) they do not or did not live with**, **their current or former spouse**, or **someone they have a child with**.

Figure 47.

Relationship to Alleged Offender(s) in the One Situation for Coast Guard (Q118)

Where and When the One Situation Occurred

Active duty members who indicated experiencing sexual assault in the past 12 months were asked to identify where and when the one situation with the biggest effect took place. This section aims to assess whether the situation occurred while on a military location (where) and during various types of events (when).

Location Where the One Situation Occurred

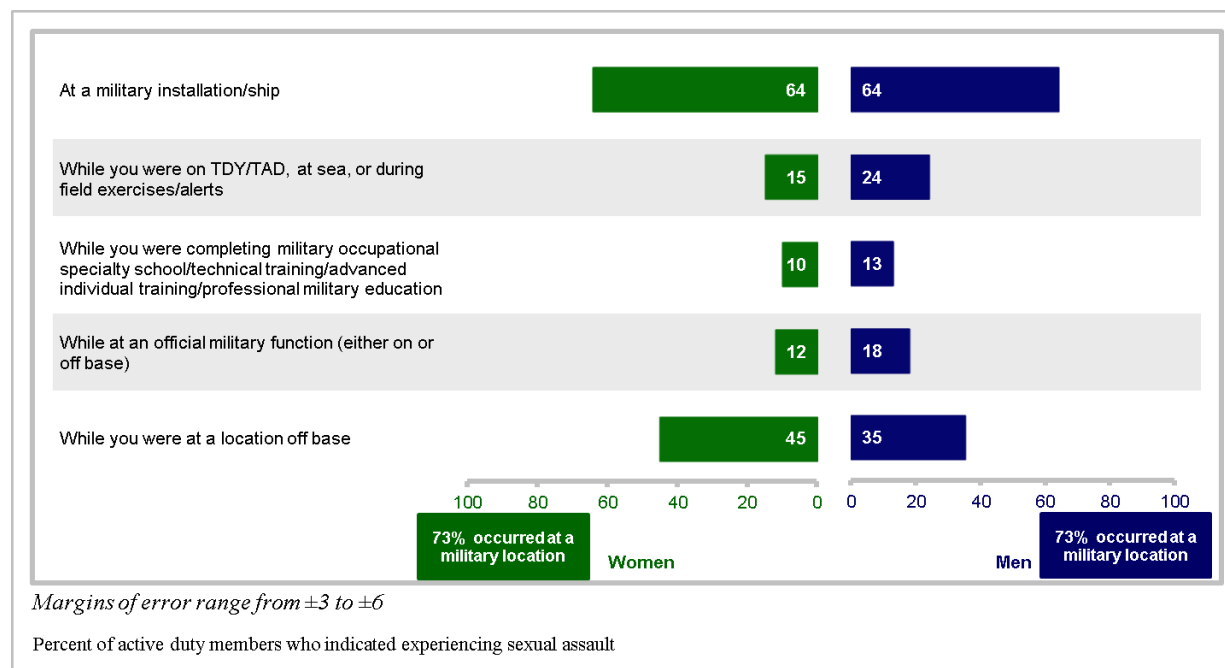

Members were asked to indicate “Yes” or “No” to a series of locations where the one situation may have occurred. Response options were then categorized as either a military location, civilian location, both military and civilian locations, or no location was disclosed. Because the locations are not mutually exclusive, members could select more than one location as “Yes.” Members were instructed to indicate “No” for locations they had not visited or had not performed the indicated activities during the past 12 months.

DoD

In Figure 48, the top five locations (out of 12) where the one situation occurred are shown for the 4.3% of DoD women and 0.6% of DoD men who indicated experiencing sexual assault in the past 12 months. A little less than two-thirds (64%) of both women and men indicated the situation occurred [at a military installation/ship](#). A little less than half (45%) of women and more than one-third (35%) of men indicated the one situation occurred [while at a location off base](#). Fifteen percent of women and 24% of men indicated the situation occurred [while on TDY/TAD, at sea, or during field exercises/alerts](#), whereas 12% of women and 18% of men indicated it occurred while [at an official military function \(either on or off base\)](#), and 10% of women and 13% of men indicated it occurred [while completing military occupational specialty school/technical training/advanced individual training/professional military education](#). When combining response across military locations, 73% of women and men indicated the unwanted event occurred [at a military location](#).

Figure 48.

Top Five Locations Where One Situation Occurred for DoD (Q119)

In 2016, Army women (72%) were *more likely* than women in the other Services to indicate the situation occurred *at a military installation/ship*, whereas Air Force women (51%) were *less likely* (Table 10). Navy women (13%) were *more likely* than women in the other Services to indicate the situation occurred *during an overseas port visit while deployed*, whereas Army and Air Force women (both 2%) were *less likely*. Army women (6%) were *more likely* to indicate the situation occurred *while in recruit or basic training*, whereas Navy women (1%) were *less likely*. Army women (40%) were *less likely* than women in the other Services to indicate the situation occurred *while at a location off base*. Air Force women were *less likely* than women in the other Services to indicate the situation occurred at the following locations: *while on TDY/TAD, at sea, or during field exercises or alerts* (11%), *while at an official military function (either on or off base)* (7%), or *while transitioning between operational theaters* (1%). Army women (79%) were *more likely* than women in the other Services to indicate the situation occurred *at a military location*, while Air Force women (61%) were *less likely*.

Percent of active duty women who indicated experiencing sexual assault

For DoD men in 2016, Navy men (17%) were *more likely* than men in the other Services to indicate the situation occurred *during an overseas port visit while deployed*, whereas men in the Army (5%) and Air Force (3%) were *less likely* (Table 11). Air Force men (51%) were *more likely* than men in the other Services to indicate the situation occurred *while at a location off*

Table 11.
Location Where One Situation Occurred for DoD Men (Q119)

Percent of active duty men who indicated experiencing sexual assault

In 2016, Army women (54%) were *more likely* than women in the other Services to indicate the situation occurred at a **military location**, whereas Air Force women (39%) were *less likely* (Figure 49). Conversely, Air Force women (27%) were *more likely* than women in the other Services to indicate the situation occurred at a **civilian location**, whereas Army women (14%) were *less likely*. Air Force women (12%) were also *more likely* than women in the other Services to **not disclose** where the situation occurred.

For men in 2016, Marine Corps men (69%) were *more likely* than men in the other Services to indicate the situation occurred at a [military location](#), whereas Air Force men (34%) were *less likely*.

Figure 49.

Combinations of Locations Where One Situation Occurred for DoD (Q119)

Coast Guard

The top five locations where the one situation occurred for Coast Guard women and men are displayed in Figure 50. Of the 2.0% of Coast Guard women and 0.3% of Coast Guard men who indicated experiencing sexual assault in the past year, a little less than two-thirds (64%) of women and 40% of men indicated the situation occurred [while at a location off base](#). More than one-quarter (29%) of women and more than half (54%) of men indicated the situation occurred [at a military installation/ship](#), whereas 16% of women and 25% of men indicated it occurred [while on TDY/TAD, at sea, or during field exercises/alerts](#). Sixteen percent of women and 19% of men indicated the situation occurred [during an overseas port visit while deployed](#), whereas 8% of women and 18% of men indicated it occurred [while at an official military function](#) (either on or off base). When combining response across military locations, 42% of women and 62% of men indicated the unwanted event occurred [at a military location](#). Table 12 displays results for all 12 locations for Coast Guard women and men.

Figure 50.

Percent of Coast Guard members who indicated experiencing sexual assault

Coast Guard members could select more than one location where the one situation occurred. Figure 51 displays whether Coast Guard members indicated the situation occurred at a military location, a civilian location, both military and civilian locations, or did not endorse any location.

As shown in Figure 51, a little less than one-fifth (17%) of Coast Guard women and half (50%) of Coast Guard men indicated the situation occurred at a [military location](#), 39% of women and 28% of men indicated it occurred at a [civilian location](#), and 24% of women and 12% of men indicated this situation occurred at [both military and civilian locations](#). A little less than one-fifth (19%) of women and 11% of men [did not disclose](#) where the situation occurred.

Figure 51.

Combinations of Locations Where One Situation Occurred for Coast Guard (Q119)

When the One Situation Occurred

After indicating where the one situation occurred, members were asked to identify when (or in what context) the one situation occurred. Response options included: out with friends or at a party that was not an official military function, on a date, at work during duty hours, on approved leave, while being intimate with the other person, and while in member's or someone else's home or quarters. Because the situations are not mutually exclusive, members could select more than one option.

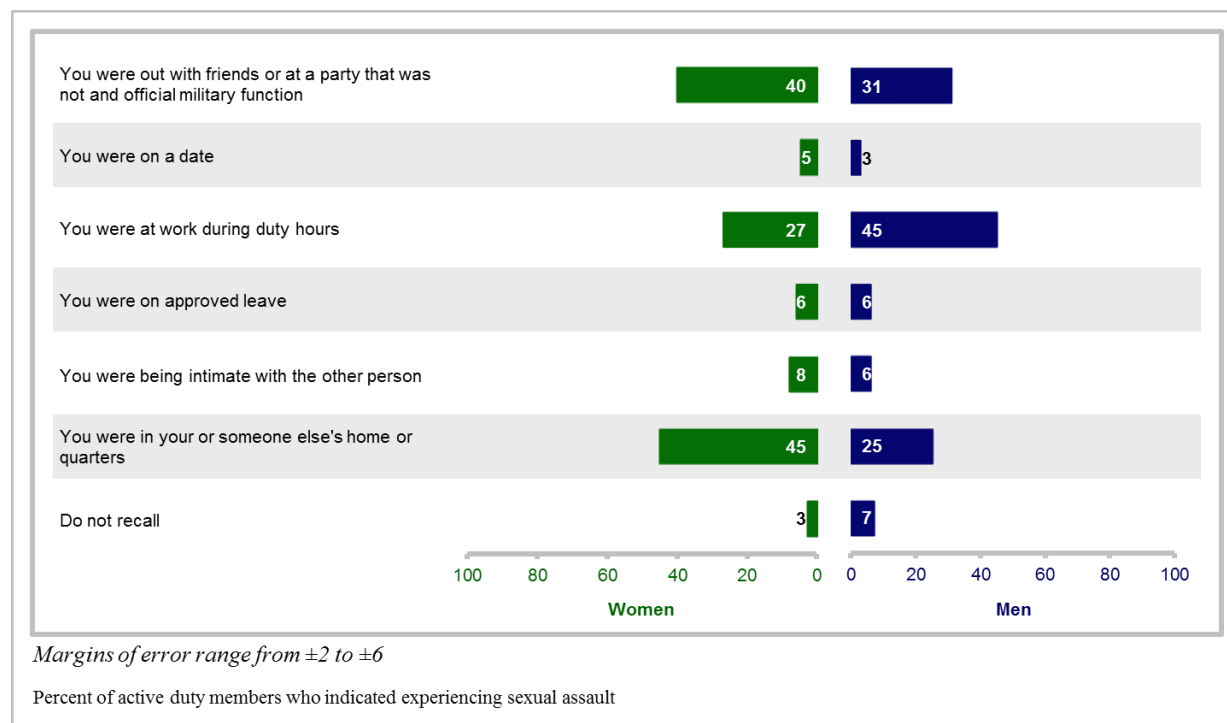

DoD

As shown in Figure 52, of the 4.3% of DoD women who indicated experiencing sexual assault in the past 12 months, less than half (45%) indicated the unwanted event occurred [when they were in their or someone else's home or quarters](#). Forty percent of women indicated the situation happened [when they were out with friends or at a party that was not an official military function](#), whereas more than one-quarter (27%) indicated it happened [when they were at work during duty](#)

hours. Fewer women indicated the situation happened *when they were being intimate with the other person* (8%), *when on approved leave* (6%), or *when on a date* (5%). Three percent of women *could not recall* the context in which the situation occurred.

Of the 0.6% of DoD men who indicated experiencing sexual assault in the past year, less than half (45%) indicated the unwanted event occurred *when they were at work during duty hours*. A little less than one-third (31%) of men indicated the situation happened *when they were out with friends or at a party that was not an official military function*, whereas 25% indicated it happened *when they were in their or someone else's home or quarters*. Fewer men indicated the situation happened *when they were being intimate with the other person* (6%), *when on approved leave* (6%), or *when on a date* (3%). Seven percent of men *could not recall* the context in which the situation occurred.

Figure 52.
When the One Situation Occurred for DoD (Q120)

In 2016, Navy women (33%) were *more likely* than women in the other Services to indicate the situation happened *when at work during duty hours*, whereas women in the Air Force (16%) and Marine Corps (14%) were *less likely* (Table 13). For men, those in the Air Force were *more likely* than men in the other Services to indicate the situation happened *when out with friends or at a party that was not an official military function* (45%) as well as when *they were in their or someone else's home or quarters* (38%), but were *less likely* to indicate the situation happened *when at work during duty hours* (23%). Men in the Navy (<1%) were *less likely* than men in the other Services to indicate the situation occurred *when on a date*.

Percent of active duty members who indicated experiencing sexual assault

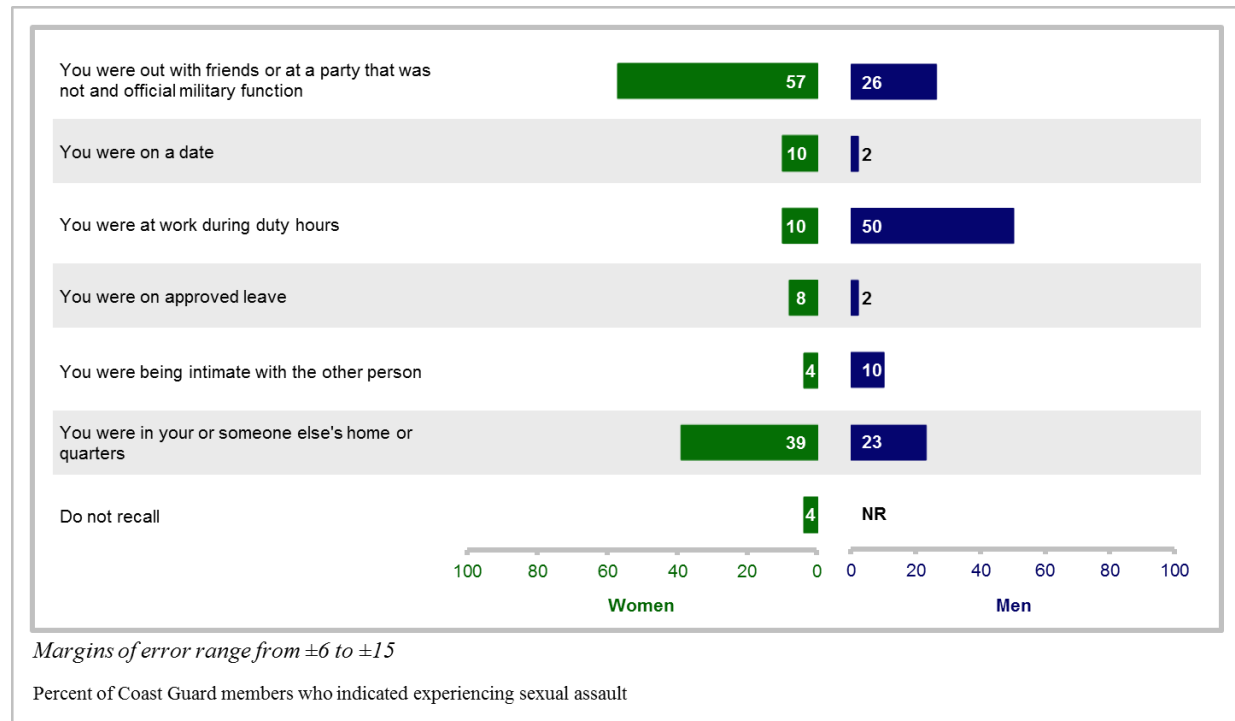

Coast Guard

Figure 53 shows of the 2.0% of Coast Guard women who indicated experiencing sexual assault in the past 12 months, more than half (57%) indicated the unwanted event occurred [when they were out with friends or at a party that was not an official military function](#). More than one-third (39%) indicated it happened [when they were in their or someone else's home or quarters](#), whereas 10% of women indicated it happened [when on a date](#) or [at work during duty hours](#). Fewer women indicated the situation happened [when on approved leave](#) (8%). Four percent indicated they did [not recall](#) the context in which the situation occurred or it happened [when they were being intimate with the other person](#).

Of the 0.3% of Coast Guard men who indicated experiencing sexual assault in the past 12 months, half (50%) indicated the unwanted event occurred [when they were at work during duty hours](#) (Figure 53). More than one-quarter (26%) indicated it happened [when they were out with friends or at a party that was not an official military function](#), and a little less than one-quarter (23%) indicated it happened [when they were in their or someone else's home or quarters](#). One-tenth (10%) of Coast Guard men indicated the situation occurred [when they were being intimate](#)

with the other person, whereas fewer indicated it occurred when on approved leave (2%) or when on a date (2%).

Figure 53.
When the One Situation Occurred for Coast Guard (Q120)

Considered the One Situation as Hazing and/or Bullying

Active duty members who indicated experiencing sexual assault in the past 12 months were asked to indicate if the one situation with the biggest effect could be described as hazing and/or bullying. Hazing refers to things done to humiliate or "toughen up" people before accepting them into a group. Bullying refers to repeated verbally or physically abusive behaviors that are threatening, humiliating, or intimidating.

DoD

As shown in Figure 54, of the 4.3% of DoD women who indicated experiencing sexual assault in the past 12 months, 9% indicated they considered the situation to be hazing and a little less than one-quarter (24%) indicated they considered it to be bullying. When combining these behaviors to assess whether they considered the one situation to be a combination of hazing and bullying, 7% of women considered it to be both hazing and bullying. The majority (74%) would not describe the unwanted event as hazing or bullying, whereas 17% would describe the unwanted event as bullying (without hazing) and 1% would describe the unwanted event as hazing (without bullying).

Of the 0.6% of DoD men who indicated experiencing sexual assault in the past 12 months, more than one-quarter (27%) indicated they considered the situation to be **hazing** and more than one-third (39%) indicated they considered it to be **bullying**. When combining these behaviors to assess whether they considered the one situation to be a combination of hazing and bullying, 22% of men considered it as involving **both hazing and bullying** (Figure 54). More than half (56%) would **not** describe the unwanted event as **hazing or bullying**, whereas 17% would describe the unwanted event as **bullying (without hazing)** and 5% would describe the unwanted event as **hazing (without bullying)**.

Figure 54.
Considered One Situation as Hazing and/or Bullying for DoD (Q121)

As displayed in Table 14, in 2016, Air Force men were *less likely* than men in the other Services to indicate they considered the one situation to be **hazing** (13%) or **bullying** (24%). When combining these behaviors to assess whether they considered the one situation to be a combination of hazing and bullying, Air Force men (73%) were *more likely* than men in the other Services to **not** consider the one situation to be **hazing or bullying** and were *less likely* to indicate the one situation involved **both hazing and bullying** (11%). In 2016, there were no significant differences between Services for DoD women on considering the one situation to be hazing and/or bullying.

Percent of active duty members who indicated experiencing sexual assault

Coast Guard

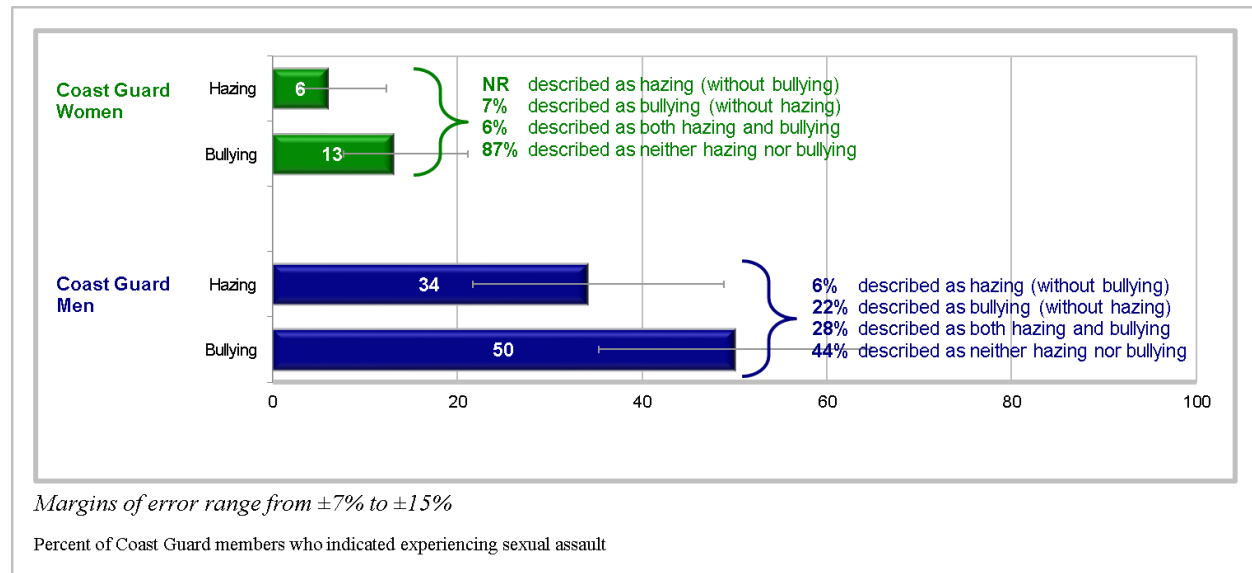

As shown in Figure 55, of the 2.0% of Coast Guard women who indicated experiencing sexual assault in the past 12 months, 6% indicated they considered the situation to be **hazing** and 13% indicated they considered it to be **bullying**. When combining these behaviors to assess whether they considered the one situation to be a combination of hazing and bullying, 6% of women considered it to be **both hazing and bullying**, while the majority (87%) would **not** describe the unwanted event as **hazing or bullying**, whereas 7% would describe the unwanted event as **bullying (without hazing)**.

Of the 0.3% of Coast Guard men who indicated experiencing sexual assault in the past 12 months, more than one-third (34%) indicated they considered the situation to be **hazing** and half (50%) indicated they considered it to be **bullying**. When combining these behaviors to assess whether they considered the one situation to be a combination of hazing and bullying, 28% of men considered it to involve **both hazing and bullying** (Figure 55). Less than half (44%) would **not** describe the unwanted event as **hazing or bullying**, whereas 22% would describe the

unwanted event as **bullying (without hazing)** and 6% would describe the unwanted event as **hazing (without bullying)**.

Figure 55.

Considered One Situation as Hazing and/or Bullying for Coast Guard (Q121)

Experience of Sexual Harassment and/or Stalking Before or After the One Situation

The next section examines whether sexual harassment and/or stalking happened in the time leading up to and/or after the one situation of sexual assault. Active duty members who indicated experiencing sexual assault in the past 12 months were asked whether they experienced sexual harassment or stalking before the situation and/or after the situation.

DoD

Figure 56 shows of the 4.3% of DoD women who indicated experiencing sexual assault in the past 12 months, a little more than one-tenth (12%) indicated they were **sexually harassed and/or stalked** by the alleged offender(s) **before** the one situation, whereas 11% indicated they were **sexually harassed and/or stalked after** the situation. One-third (33%) of women indicated they were **sexually harassed and/or stalked both before and after** the one situation by the alleged offender(s). This percentage represents a statistically significant *increase* of 9 percentage points for DoD women in 2016 compared to 2014. Less than half (44%) of women indicated they were **not harassed or stalked before or after** the one situation, which showed a statistically significant *decrease* compared to 2014 of 9 percentage points.

In 2016, Army women (38%) were *more likely* than women in the other Services to indicate they experienced **sexual harassment and/or stalking both before and after** the one situation, whereas Air Force women (20%) were *less likely*. Air Force women (57%) were *more likely* than women

in the other Services to indicate they were *not harassed or stalked before or after* the one situation. Compared to 2014, the percentage of women who indicated they were *sexually harassed and/or stalked both before and after* the one situation showed a statistically significant *increase* for Army and Marine Corps women (11 percentage points for Army and 17 percentage points for Marine Corps). The percentage of women who indicated they were *not sexually harassed or stalked before or after* the situation showed a statistically significant *decrease* compared to 2014 for Army and Navy women (8 percentage points for Army and 15 percentage points for Navy).

Figure 56.

Experienced Sexual Harassment and/or Stalking Before or After the One Situation for DoD Women (Q122)

As shown in Figure 57, of the 0.6% of DoD men who indicated experiencing sexual assault in the past 12 months, 8% indicated they were *sexually harassed and/or stalked* by the alleged offender(s) *before* the one situation, whereas 9% indicated they were *sexually harassed and/or stalked after* the situation. More than one-third (35%) of men indicated they were *sexually harassed and/or stalked both before and after* the one situation by the alleged offender(s), whereas a little less than half (48%) indicated they were *not sexually harassed or stalked before or after* the one situation.

In 2016, men in the Air Force (18%) were *less likely* than men in the other Services to indicate they were *sexually harassed and/or stalked both before and after* the one situation by the alleged offender(s). There were no significant differences between 2016 and 2014 for men experiencing sexual harassment and/or stalking before and/or after the one situation.

Figure 57.

Experienced Sexual Harassment and/or Stalking Before or After the One Situation for DoD Men (Q122)

Coast Guard

As shown in Figure 58, of the 2.0% of Coast Guard women who indicated experiencing sexual assault in the past 12 months, 11% indicated they were **sexually harassed and/or stalked** by the alleged offender(s) **before** the one situation, which showed a statistically significant *decrease* of 16 percentage points compared to 2014. Twelve percent of Coast Guard women indicated they were **sexually harassed and/or stalked after** the one situation. More than one-quarter (26%) of women indicated they were **sexually harassed and/or stalked both before and after** the one situation by the alleged offender(s), which showed a statistically significant *increase* of 14 percentage points for Coast Guard women in 2016 compared to 2014. A little more than half (51%) of women indicated they were **not sexually harassed or stalked before or after** the one situation.

Of the 0.3% of Coast Guard men who indicated experiencing sexual assault in the past 12 months, 6% indicated they were **sexually harassed and/or stalked** by the alleged offender(s) **before** the one situation, whereas 12% indicated they were **sexually harassed and/or stalked after** the one situation. More than one-quarter (26%) of men indicated they were **sexually harassed and/or stalked both before and after** the one situation by the alleged offender(s) and more than half (56%) indicated they were **not sexually harassed or stalked before or after** the one situation. Significance between 2014 and 2016 cannot be determined for Coast Guard men due to results for 2014 being not reportable.

Figure 58.

Experienced Sexual Harassment and/or Stalking Before or After the One Situation for Coast Guard (Q122)

Alcohol and/or Drug Involvement in the One Situation

Active duty members who indicated they experienced a sexual assault in the past 12 months were asked about alcohol and drug involvement during the one situation. Members were asked whether they or the alleged offender(s) had been drinking alcohol, whether the alleged offender(s) bought them alcohol, and whether they thought they may have been given a drug without knowledge or consent before the sexual assault discussed in the one situation.

DoD

Of the 4.3% of DoD women who indicated experiencing sexual assault in the past year, a little less than half (48%) indicated [they had been drinking alcohol at the time of the unwanted event](#), which showed a statistically significant *increase* of 7 percentage points since 2014. Of those who indicated they had been drinking alcohol at the time of the unwanted event, a little less than two-thirds (64%) indicated the [alleged offender\(s\) had bought or gave them alcohol to drink](#), which showed a statistically significant *increase* of 8 percentage points since 2014 (Figure 59). A little less than half (49%) of women indicated the [alleged offender\(s\) had been drinking alcohol](#), whereas fewer (6%) [thought they may have been given a drug without their knowledge or consent](#) (a statistically significant *increase* of 3 percentage points since 2014). Combining alcohol use by the alleged offender(s) and/or member, more than half (59%) of DoD women indicated [they and/or the person\(s\) who did this to them had been drinking alcohol at the time of the unwanted event](#). When adding in the possibility of being given a drug without their knowledge or consent, 60% of women indicated [drugs and/or alcohol were involved in the one situation](#).

As shown in Table 15, Marine Corps women (58%) were *more likely* than women in the other Services to indicate *they drank alcohol before the situation*. Navy women (3%) were *less likely* than women in the other Services to indicate *they may have been given a drug without their knowledge or consent*. Compared to 2014, the percentage of women who indicated the *person(s) who did this to them bought or gave them alcohol to drink* showed a statistically significance *increase* in 2016 for Navy women (19 percentage points). The percentage of women who indicated *they might have been given a drug without their knowledge or consent* showed a statistically significant *increase* in 2016 for Air Force women (3 percentage points). Additionally, Marine Corps women (73% for both) were *more likely* than women in the other Services to indicate *they and/or the offender(s) used alcohol during the unwanted event* and *they and/or offender(s) used alcohol and/or drugs during the unwanted event*, which showed a statistically significant *increase* in 2016 for Marine Corps women (17 percentage points and 15 percentage points, respectively).

Of the 0.6% of DoD men who indicated experiencing sexual assault in the past year, a little less than one-third (30%) indicated *they had been drinking alcohol at the time of the unwanted event*, of which, more than half (60%) indicated the *alleged offender(s) had bought or gave them alcohol to drink* (Figure 59). More than one-quarter (26%) of men indicated the *alleged offender(s) had been drinking alcohol*, whereas fewer (7%) *thought they may have been given a drug without their knowledge or consent*. Combining alcohol use by the alleged offender(s) and/or member, more than one-third (39%) of DoD men indicated *they and/or the person(s) who did this to them had been drinking alcohol at the time of the unwanted event*. When adding in the possibility of being given a drug without their knowledge or consent, 42% of men indicated *drugs and/or alcohol were involved in the one situation*.

As shown in Table 15, in 2016, Air Force men (56%) were *more likely* than men in the other Services to indicate *they and/or offender used alcohol and/or drugs during the unwanted event*. Compared to 2014, the percentage of men who indicated *they drank alcohol before the situation* showed a statistically significance *decrease* in 2016 for Army men (16 percentage points).

Percent of active duty members who indicated experiencing sexual assault

Coast Guard

Of the 2.0% of Coast Guard women who indicated experiencing sexual assault in the past year, a little less than two-thirds (64%) indicated [they had been drinking alcohol at the time of the](#)

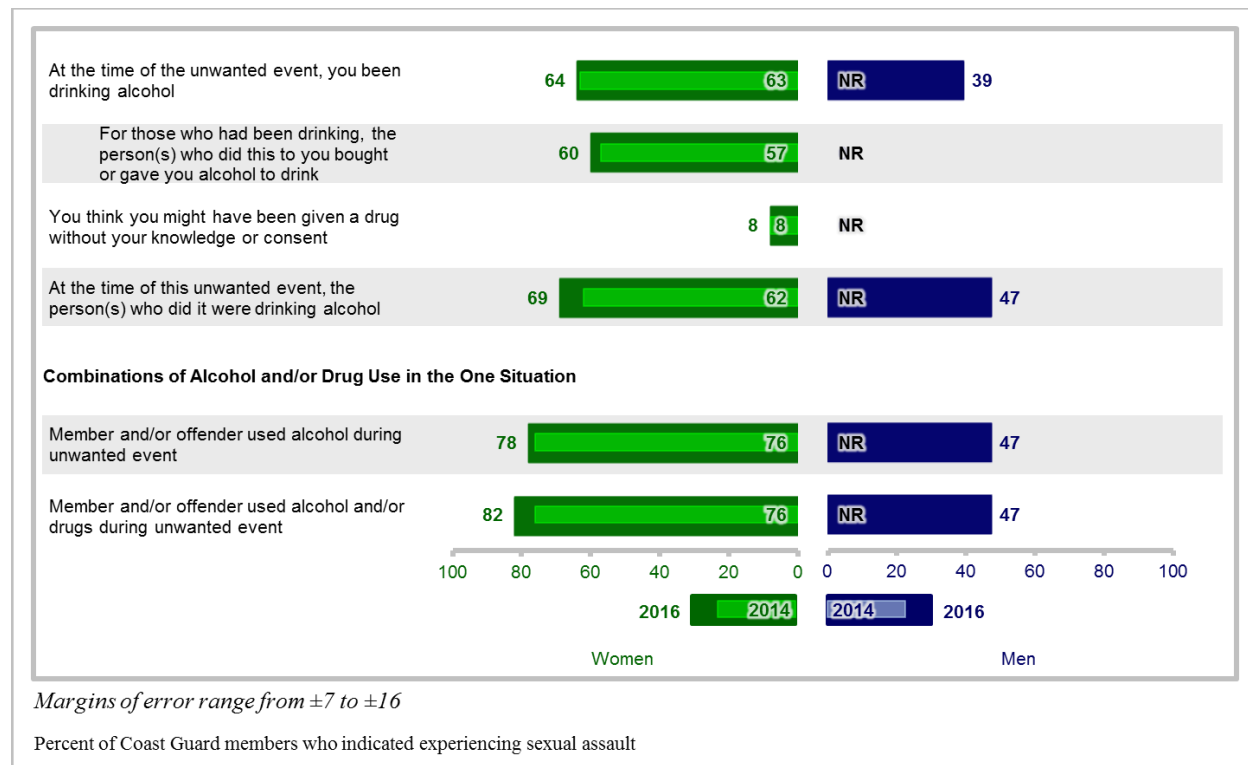

unwanted event, of which, more than half (60%) indicated the alleged offender(s) had bought or gave them alcohol to drink (Figure 60). A little less than two-thirds (69%) of women indicated the alleged offender(s) had been drinking alcohol, whereas fewer (8%) thought they may have been given a drug without their knowledge or consent. Combining alcohol use by the alleged offender(s) and/or member, the majority (78%) of Coast Guard women indicated they and/or the person(s) who did this to them had been drinking alcohol at the time of the unwanted event. When adding in the possibility of being given a drug without their knowledge or consent, 82% of women indicated drugs and/or alcohol were involved in the one situation.

Of the 0.3% of Coast Guard men who indicated experiencing sexual assault in the past year, more than one-third (39%) indicated they had been drinking alcohol at the time of the unwanted event (Figure 58). A little less than half (47%) of men indicated the alleged offender(s) had been drinking alcohol. Combining alcohol use by the alleged offender(s) and/or member, a little less than half (47%) of Coast Guard men indicated they and/or the person(s) who did this to them had been drinking alcohol at the time of the unwanted event. When adding in the possibility of being given a drug without their knowledge or consent, 47% of men indicated drugs and/or alcohol were involved in the one situation.

There were no significant differences in responses between 2014 and 2016 for Coast Guard women and Coast Guard men on alcohol and/or drug use during the one situation.

Figure 60.

Alcohol and/or Drug Involvement in the One Situation for Coast Guard (Q123–Q125)

Outcomes of the One Situation

The last section of this chapter details the outcomes associated with the one situation with the biggest effect. Active duty members who indicated experiencing sexual assault in the past 12 months were asked questions about whether the unwanted event made them take steps to leave the military, if they received a sexual assault forensic exam, and how satisfied they were with the responses/services received regarding the one situation.

Made Member Take Steps to Leave/Separate From the Military

DoD

As shown in Figure 61, of the 4.3% of DoD women and 0.6% of DoD men who indicated experiencing sexual assault in the past 12 months, more than one-quarter (28%) of women and a little less than one-quarter (23%) of men indicated the [unwanted event made them take steps to leave or separate from the military](#). Air Force women (23%) were *less likely* than women in the other Services to indicate the [unwanted event made them take steps to leave or separate from the military](#). There were no significant differences between Services for DoD men.

Figure 61.

One Situation Made Member Take Steps To Leave/Separate From the Military for DoD (Q126)

Coast Guard

Figure 62 shows of the 2.0% of Coast Guard women and 0.3% of Coast Guard men who indicated experiencing sexual assault in the past 12 months, 17% of women and a little less than one-quarter (23%) of men indicated the [unwanted event made them take steps to leave or separate from the military](#).

Figure 62.

One Situation Made Member Take Steps To Leave/Separate From the Military Coast Guard (Q126)

Received a Sexual Assault Forensic Exam

DoD

Figure 63 shows of the 4.3% of DoD women and 0.6% of DoD men who indicated experiencing sexual assault in the past 12 months, 8% of women and 3% of men indicated [receiving a sexual assault forensic exam or “rape exam.”](#) Compared to 2014, the percentage of women who indicated [receiving a sexual assault forensic exam or “rape exam”](#) showed a statistically significant *decrease* for DoD women (13 percentage points), Army women (13 percentage points), Navy women (15 percentage points), and Air Force (9 percentage points). There were no significant differences between Services for DoD women and DoD men. Results are not reportable for DoD men in 2014 and therefore comparisons between 2014 and 2016 are not possible for DoD men.

Figure 63.
Received a Sexual Assault Forensic Exam for DoD (Q127)

Coast Guard

Figure 64 shows of the 2.0% of Coast Guard women and 0.3% of men who indicated experiencing sexual assault in the past 12 months, 5% of women and 7% of men indicated [receiving a sexual assault forensic exam or “rape exam.”](#) There were no significant differences between 2014 and 2016 for the Coast Guard.

Figure 64.***Received a Sexual Assault Forensic Exam for Coast Guard (Q127)***

Satisfaction With Responses/Services Received From Individuals/Providers

Active duty members who indicated experiencing sexual assault in the past year were asked to indicate if they had received services or responses from individuals or providers. If they had interacted with the specified individual or provider, they were asked to provide their level of satisfaction with the services or responses they received from each.

DoD

Shown in Figure 65 are satisfaction levels with responses/services received from individuals/providers DoD women indicated they interacted with. A little less than two-thirds (64%) indicated they were satisfied with the responses/services they received from a [Sexual Assault Response Coordinator \(SARC\)](#) and a [Uniformed Victim Advocate \(UVA\)](#) or [Victim Advocate \(VA\)](#). A little less than two-thirds of women also indicated they were satisfied with the responses/services they received from a [chaplain](#) (63%), [Special Victims' Counsel \(SVC\)](#) or [Victims' Legal Counsel \(VLC\)](#) (62%), and a [mental health provider](#) (61%). More than half (57%) indicated they were satisfied with the responses/services received from a [medical provider not for mental health needs](#), whereas a little less than half (46%) were satisfied with the response from [their unit commander](#).

Further, 44% of DoD women indicated they were satisfied with the response/services they received from [military law enforcement personnel](#), and 42% were satisfied with the response received from [their senior enlisted advisor](#) and [immediate supervisor](#) (Figure 65). More than one-third (34%) indicated satisfaction with the response/services from the [DoD Safe Helpline](#), and one-third (33%) were satisfied with [civilian law enforcement personnel](#).

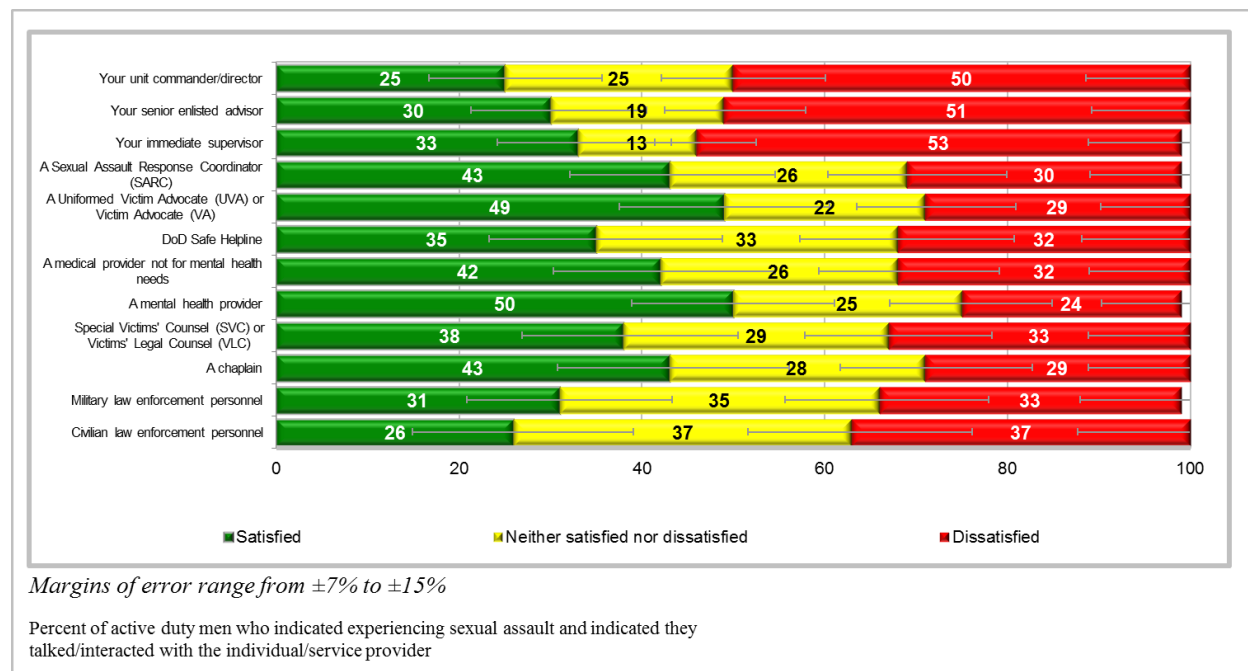

Figure 65.***Satisfaction With Responses/Services Received From Individuals/Providers for DoD Women (Q128)***

Shown in Figure 66 are satisfaction levels with responses/services received from individuals/providers DoD men indicated they interacted with. Half (50%) indicated they were satisfied with the responses/services they received from a [mental health provider](#), and a little less than half (49%) were satisfied with the [UVA/VA](#). Less than half of men also indicated they were satisfied with the responses/services they received from a [chaplain](#) (43%), a [SARC](#) (43%), and a [medical provider not for mental health needs](#) (42%). More than one-third of men indicated they were satisfied with the responses/services received from a [SVC/VLC](#) (38%) and the [DoD Safe Helpline](#) (35%).

Further, one-third (33%) of DoD men indicated they were satisfied with the response/services they received from their [immediate supervisor](#), 31% were satisfied with [military law enforcement personnel](#), and 30% were satisfied with the response received from [their senior enlisted advisor](#) (Figure 66). More than one-quarter (26%) indicated satisfaction with the response/services from a [civilian law enforcement personnel](#), and one-quarter (25%) were satisfied with responses received from [their unit commander](#).

Figure 66.

Satisfaction With Responses/Services Received From Individuals/Providers for DoD Men (Q128)

As shown in Table 16, in 2016, Air Force women were *more likely* than women in the other Services to indicate they were satisfied with a **SARC** (75%), **their unit commander** (57%), and **their senior enlisted advisor** (54%).

Coast Guard

Results on satisfaction with responses or services received as a result of experiencing sexual assault are not reportable for Coast Guard women or men.

Chapter 5: Reporting the One Situation of Sexual Assault

Ms. Lisa Davis and Ms. Amanda Grifka

Introduction

This chapter provides details about reporting of the one situation of sexual assault with the biggest effect on the member. Information from this section of the survey specifically focuses on the type of report made, outcomes of reporting, reasons for reporting and not reporting, and if the member would make the same decision about reporting in the future. The last section of this chapter more closely examines the negative outcomes associated with reporting the one situation to include experiences of perceived professional reprisal, ostracism, and maltreatment. Within each of these three outcomes, members were asked about the individual(s) who took the actions, if the experience(s) was (were) perceived as harmful to the member's career, and participation in the report of sexual assault as a result of actions. This last section also addresses if the member discussed and/or filed a complaint as a result of perceived professional reprisal, ostracism, and/or maltreatment as well as the relationship between the individual(s) who took actions and the perpetrator(s) identified in the sexual assault report.

Results are reported for 2016 and trend comparisons to the 2014 RMWS are provided where data are available.

Reporting the One Situation to the Military

Active duty members who indicated experiencing a sexual assault in the past 12 months were asked to indicate if they reported the unwanted event to the military. Members indicating "Yes" were then asked about the type of initial report made: restricted report, unrestricted report, or unsure. Restricted and unrestricted reports were defined on the survey as:

- Restricted reports allow people to get information, collect evidence, and receive medical treatment and counseling without starting an official investigation of the assault, and
- Unrestricted reports start an official investigation in addition to allowing the services available in restricted reporting.

For those who initially made a restricted report, they were asked about who they made the report to, what happened with their restricted report, and what they would have done if restricted reporting was not available. Members who indicated they did not report their sexual assault were asked if they considered reporting it. Finally, the final disposition of the member's report is provided, accounting for converted reports. Results are reported by gender and Service where reportable.

DoD

Overall, in 2016, of the 4.3% of DoD women who indicated experiencing a sexual assault in the past 12 months, a little less than one-third (31%) indicated [reporting](#) the unwanted event to the military, which remained statistically unchanged since 2014 (Figure 67). Of this 31%, more than

half (54%) initially made an **unrestricted report** and a little more than one-third (35%) made a **restricted report**. In 2016, Marine Corps women were *more likely* to indicate they initially made a **restricted report** (53%) but were *less likely* than women in the other Services to indicate they initially made an **unrestricted report** (35%; Figure 68).

Of the 0.6% of DoD men who indicated experiencing a sexual assault in the past 12 months, 15% indicated **reporting** the unwanted event to the military, which remained statistically unchanged since 2014 (Figure 67). Of the 15% of DoD men who reported, a little more than half (55%) initially made an **unrestricted report** and a little less than one-third (31%) made a **restricted report** (Figure 68). In 2016, Navy men (8%) were *less likely* to **report** than men in the other Services.

Figure 67.
Reported the One Situation to the Military for DoD (Q129)

Figure 68.
Initial Type of Report Made for DoD (Q131)

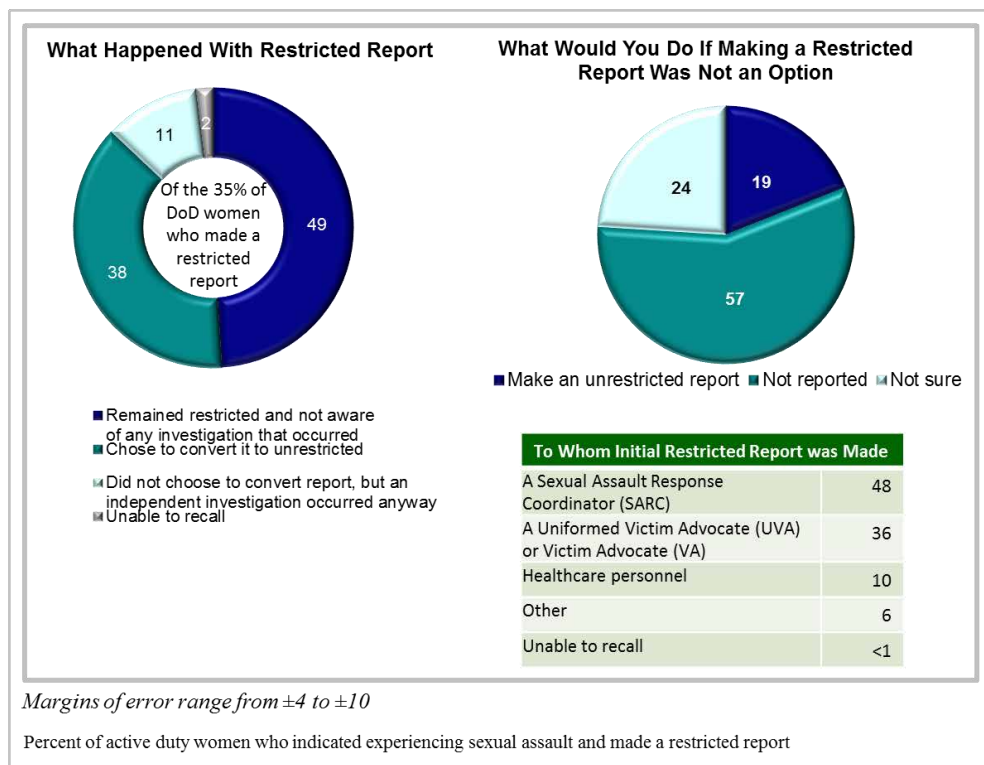

As shown in Figure 69, of the 35% of DoD women who initially made a restricted report, a little less than half (48%) indicated they reported to a [Sexual Assault Response Coordinator \(SARC\)](#) and more than a third (36%) reported to a [Uniformed Victim Advocate \(UVA\)](#) or [Victim Advocate \(VA\)](#). One-tenth (10%) of women indicated they reported to [healthcare personnel](#) and fewer (6%) reported to [some other person or office](#).

Additionally, members who filed restricted reports were asked about whether their restricted report remained restricted. Of the 35% of DoD women who initially made a restricted report, a little less than half (49%) indicated the [report remained restricted and they were not aware of any investigation that occurred](#) and more than one-third (38%) [chose to convert it to an unrestricted report](#) (Figure 69). A little more than one-tenth (11%) [did not choose to convert their report, but an independent investigation occurred anyway](#) and fewer (2%) were [unable to recall](#).

Finally, members were also asked what they would have done had restricted reporting not been an option. As shown in Figure 69, of the 35% of DoD women who made a restricted report initially, more than half (58%) [would not have reported](#), whereas a little less than one-fifth (18%) [would have made an unrestricted report](#), and a little less than one-quarter (23%) were [unsure](#) about what they would do. Results for DoD men are not reportable for questions regarding making an initial restricted report.

Figure 69.
Details on Restricted Reporting for DoD Women (Q132–Q134)

The final report disposition is constructed by combining the initial report type with the results of possible conversions of restricted reports. The majority (73%) of DoD women ended the reporting process with an **unrestricted report**, whereas 18% had a **restricted report**, and 9% were **not sure** of their final report disposition (Figure 70). In 2016, Navy women (2%) were *less likely* to indicate they were **unsure** of their final report type than women in the other Services. For DoD men, a little less than two-thirds (61%) ended the reporting process with an **unrestricted report**, 23% had a **restricted report**, and 16% were **not sure** of their final report disposition.

Figure 70.
Final Report Disposition for DoD (Q131, Q133)

Coast Guard

As shown in Figure 71, of the 2.0% of Coast Guard women who indicated experiencing a sexual assault in the past 12 months, more than one-quarter (28%) indicated **reporting** the unwanted event to the military, which has remained statistically unchanged since 2014. Of this 28%, the majority (83%) of women **initially made an unrestricted report**, whereas fewer (6%) made a **restricted report**, and 12% were **unsure** of the type of report they initially made.

Of the 0.3% of Coast Guard men who indicated experiencing a sexual assault in the past 12 months, a little less than one-fifth (19%) indicated **reporting** the unwanted event to the military (Figure 71). Statistical significance for Coast Guard men cannot be calculated because the 2014 estimate was not reportable for this group. Results are not reportable for Coast Guard men on the initial type of report made.

Results on details of filing an initial restricted report and final report disposition are not reportable for Coast Guard women and men.

Figure 71.

Reported the One Situation to the Military and Initial Type of Report Made for Coast Guard (Q129, Q131)

Outcomes of Reporting

The following section addresses issues regarding outcomes of reporting the one situation of sexual assault. Members were asked about various types of information and resources they were provided after reporting and positive leadership actions as a result of reporting. They were also asked about receiving an expedited transfer and how that affected the member's life. Finally, members were also asked if they would recommend others report a sexual assault based on their experience with the reporting process overall.

Information and Resources Provided After Reporting

Active duty members who indicated experiencing sexual assault in the past 12 months and indicated reporting the incident to the military were asked to what extent they were provided various information and resources following reporting. Members who indicated the information and/or resource were not applicable are excluded from this analysis.

DoD

Of the 31% of DoD women who reported a sexual assault to the military, more than half (60%) were provided information on their right to consult a Special Victims' Counsel (SVC)/Victims' Legal Counsel (VLC) to a large extent (Figure 72). A little more than half (54%) of DoD women indicated they were provided safety planning information regarding their immediate situation and received regular contact regarding their well-being to a large extent. A little more than half (51%) of DoD women indicated they were provided information on their right to request an expedited transfer and half (50%) indicated they were provided information about Victim's Rights (DD Form 2701) to a large extent. A little less than half (48%) of DoD women

indicated they were provided information to address their confidentiality concerns to a *large extent*, 42% were provided information about confidential counseling services through Veterans Affairs (VA) Vet Centers to a *large extent*, and more than one-third (37%) indicated they were provided accurate up-to-date information on their case status to a *large extent*.

Results for DoD men are not presented due to the amount of unreportable data.

Figure 72.

Extent Provided Information/Resources After Reporting Unwanted Event for DoD Women (Q135)

In 2016, women in the Air Force were *more likely* to indicate they received information on their right to consult a SVC/VLC (73%) and received regular contact regarding their well-being (72%) to a *large extent* than women in the other Services (Table 18). Women in the Army were *less likely* than women in the other Services to indicate they were provided accurate up-to-date information on their case status (27%) and information to address their confidentiality concerns (39%) to a *large extent*.

Percent of active duty women who indicated experiencing sexual assault, indicated reporting to military authority, and indicated the information/resource was applicable

Coast Guard

Results for Coast Guard women and Coast Guard men are not reportable for the extent to which they were provided information and/or resources after reporting sexual assault.

Positive Leadership Actions as a Result of Reporting

Along with being asked about the information and resources provided following reporting sexual assault, members were also asked to indicate the extent to which they received positive responses from their leadership as a result of reporting sexual assault. Those who indicated the positive leadership action was not applicable are excluded from this analysis.

DoD

Figure 73 displays the extent to which members received positive leadership actions as a result of reporting their unwanted event. Of the 31% of DoD women who reported a sexual assault to the military, a little more than half (51%) indicated [leadership provided them the flexibility to attend appointments related to their sexual assault as needed to a large extent](#). A little less than half (46%) indicated their [leadership expressed concern for their well-being to a large extent](#), whereas 42% indicated their [leadership made them feel supported to a large extent](#).

Of the 15% of DoD men who reported a sexual assault to the military, more than one-third (38%) indicated their [leadership provided them flexibility to attend appointments related to their sexual assault as needed to a large extent](#) (Figure 73). A little less than one-third (32%) indicated their [leadership made them feel supported to a large extent](#), and more than one-quarter (29%) of men indicated their [leadership discouraged gossip in their work environment to a large extent](#).

More interesting than the results regarding whether their leadership took positive actions to a large extent are the results for men indicating their leadership did not at all take positive actions. A little more than half (51%) of men indicated their leadership did *not at all* [make them feel supported](#), whereas 48% indicated their leadership did *not at all* [express concern for their well-being](#), and 43% indicated they were *not at all* [provided the flexibility to attend appointments related to their sexual assault as needed](#) (Figure 73).

Figure 73.
Positive Leadership Action Taken After Reporting Unwanted Event for DoD (Q136)

In 2016, Air Force women were *more likely* than women in the other Services to indicate their [leadership took positive actions](#) across the specified actions to a *large extent* (Table 19). Results for men by Service on the extent to which they were provided positive actions from their leadership as a result of their report of sexual assault are not reportable.

Table 19.
Positive Leadership Action Taken After Reporting Unwanted Event for DoD Women (Q136)

	Within Service Comparisons				
	Total DoD	Army	Navy	Marine Corps	Air Force
 Higher Response  Lower Response					
Large Extent					
They made me feel supported	42	43	33	45	52
They expressed concern for my well-being	46	47	36	51	56
They provided me flexibility to attend appointments related to my sexual assault as needed	51	50	43	NR	66
They discouraged gossip in my work environment	39	38	32	38	53
Some other positive action	39	40	35	NR	48
<i>Margins of Error</i>	$\pm 7-8$	$\pm 12-13$	$\pm 13-15$	$\pm 15-17$	$\pm 9-11$
Not at all					
They made me feel supported	29	27	34	33	22
They expressed concern for my well-being	26	27	30	20	21
They provided me flexibility to attend appointments related to my sexual assault as needed	20	22	26	10	14
They discouraged gossip in my work environment	38	38	46	36	22
Some other positive action	39	36	44	NR	34
<i>Margins of Error</i>	$\pm 7-8$	$\pm 12-14$	$\pm 13-15$	$\pm 13-17$	$\pm 8-11$

Percent of active duty women who indicated experiencing sexual assault, indicated reporting to military authority, and indicated the leadership action was applicable

Coast Guard

Figure 74 shows Coast Guard women overall indicated their **leadership took positive actions** after they reported sexual assault to a *large extent* (78%–81%). Results for Coast Guard women indicating their leadership did *not at all* take positive actions have large margins of error and caution should be taken when interpreting the results.

Results for men on the extent to which they were provided positive actions from their leadership as a result of their report of sexual assault are not reportable.

Figure 74.***Positive Leadership Action Taken After Reporting Unwanted Event for Coast Guard Women (Q136)*****Expedited Transfers**

Another outcome of reporting addressed receiving an expedited transfer. Active duty members who indicated experiencing sexual assault in the past 12 months and reported the unwanted event were asked to indicate either “Yes” or “No” as to if the member received an expedited transfer as a result of reporting sexual assault. Results are not reportable for Coast Guard women and Coast Guard men.

DoD

As shown in Figure 75, of the 31% of DoD women and the 15% of men who reported a sexual assault to the military, 24% of women and 16% of men [received an expedited transfer](#).

Figure 75.
Expedited Transfers DoD (Q137)

How Aspects of Life Have Changed After Receiving an Expedited Transfer

Members who indicated receiving an expedited transfer were asked how aspects of their life have changed compared to the time before they were transferred. Members were asked to answer each of the aspects as “Better than before,” “About the same as before,” “Worse than before,” or “Not applicable.” The analysis presented excludes those who indicated “Not applicable.” Results for Coast Guard women and Coast Guard men are not reportable.

DoD

Figure 76 shows how different aspects of life have changed as a result of an expedited transfer for DoD women. Of the 24% of DoD women who indicated they received an expedited transfer, a little more than half (54%) indicated their [living situation](#) was *better than before*, while 47% indicated their [treatment by leadership and peers](#) was *better than before*. Forty-five percent indicated their [medical and mental health care](#) was *better than before*, and 42% indicated their [social support](#) and [career progression](#) was *better than before* they received an expedited transfer.

Results for DoD women by Service on how various aspects of life have changed as a result of an expedited transfer are not reportable.

Results are not reportable for DoD men.

Figure 76.
Life Aspects as a Result of Expedited Transfer for DoD Women (Q138)

Recommend Others Report Sexual Assault

Members were asked to indicate whether they would recommend others report their sexual assault based on their overall experience with reporting and the services available. Results are not reportable for Coast Guard women and Coast Guard men.

DoD

As shown in Figure 77, a little more than two-thirds (67%) of women and more than a half (59%) of DoD men indicated they **would recommend others report sexual assault**. Specifically, less than half (44%) of DoD women and more than one-third (34%) of DoD men **would recommend others make an unrestricted report**, and a little less than one-quarter (23%) of women and one-quarter (25%) of men **would recommend others make a restricted report**. Seventeen percent of women and a little less than one-third (32%) of men **would not recommend others report a sexual assault if they were to experience it**, whereas 16% of women and 9% of men were **not sure if they would recommend others report**. In 2016, Air Force women (9%) were *less likely* than women in the others Services **to not recommend others report a sexual assault**.

Figure 77.

Recommend Others Report Sexual Assault Based on Experience With Reporting for DoD (Q140)

Reasons for Reporting the One Situation

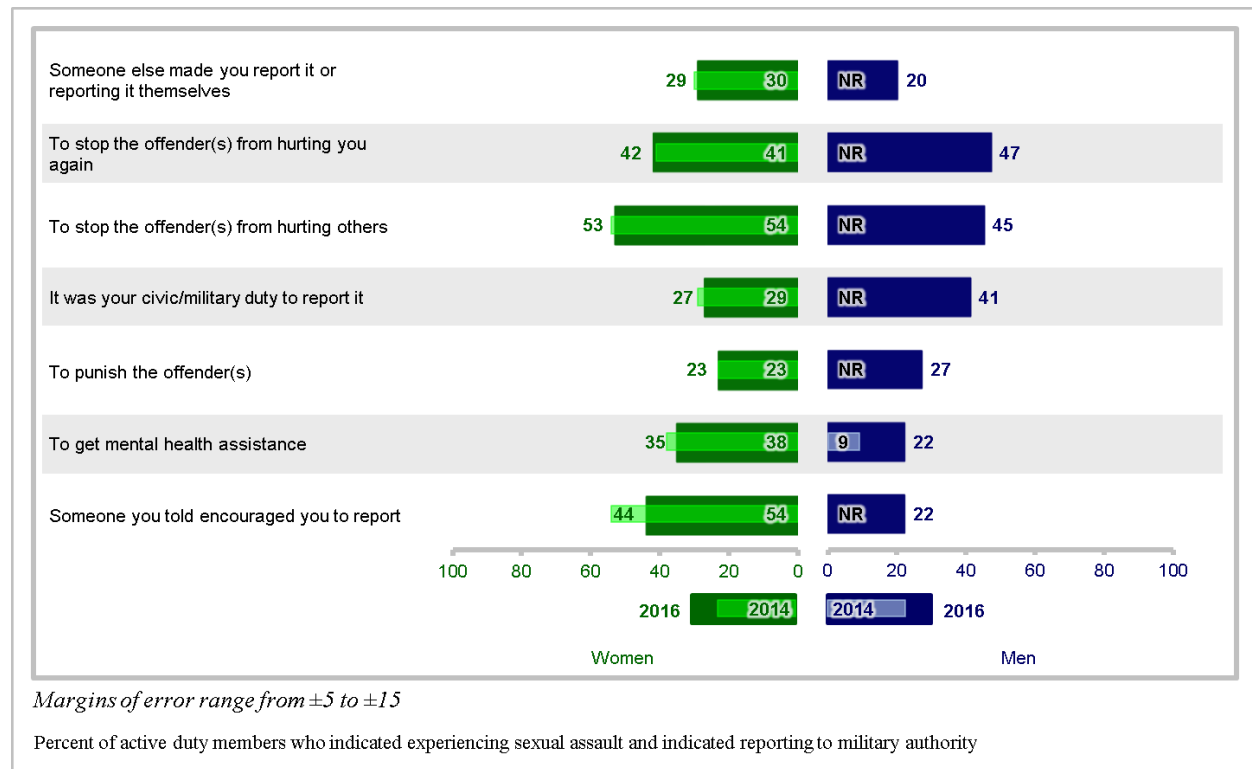

Active duty members who indicated experiencing sexual assault in the past 12 months and who officially reported the unwanted event were asked to indicate why they chose to report it. Members were asked to mark all applicable options from the list of reasons for reporting. Results are not available for Coast Guard women and Coast Guard men.

DoD

The top seven (out of 11) reasons for reporting the one situation are provided in Figure 78 and the top three are discussed here. Of the 31% of DoD women who reported to the military, the top reason for reporting the unwanted event was [to stop the offender from hurting others](#) (53%). Less than half (44%) indicated they reported because [someone they told encouraged them to report](#), and 42% reported [to stop the offender\(s\) from hurting them again](#).

Of the 15% of DoD men who reported to the military, a little less than half (47%) indicated the top reason for reporting the event to a military authority was [to stop the offender\(s\) from hurting them again](#) (Figure 78). A little less than half (45%) indicated they reported [to stop the offender\(s\) from hurting others](#), and 41% indicated reporting because [it was their civic or military duty to report it](#).

Figure 78.
Reasons for Reporting the One Situation for DoD (Q139)

In 2016, Navy women (20%) were *less likely* than women in the other Services to indicate they reported because *someone else made them report it or reported it themselves* (Table 20). Marine Corps women (20%) were *less likely* than women in the other Services to indicate they reported *to stop the offender(s) from hurting them again* and because *it was their civic or military duty to report it* (10%). Army women (21%) were *more likely* than women in the other Services to indicate they reported *to document the incident to get help or benefits from the Department of Veterans Affairs*. Compared to 2014, the percentage of women who indicated they reported because *someone they told encouraged them to report* showed a statistically significant *decrease* in 2016 for Marine Corps women (37 percentage points). Reasons for reporting the one situation are not reportable for DoD men by Service.

Percent of active duty women who indicated experiencing sexual assault and indicated reporting to military authority

Reasons for Not Reporting the One Situation

Active duty members who did not report the unwanted event to the military were asked to indicate why they chose not to report. Responders were asked to mark all applicable reasons for not reporting.

DoD

Figure 79 shows the top 10 reasons for not reporting the one situation with the biggest effect for DoD members. A little more than two-thirds (68%) of DoD women and a little less than half (47%) of DoD men indicated their top reason for not reporting was because they **wanted to forget about it and move on**. This represents a statistically significant *decrease* for both DoD women (5 percentage points) and DoD men (17 percentage points) compared to 2014. More than half (58%) of women and more than one-third (39%) of men indicated they **did not want more people to know**, and a little more than half (52%) of women and more than one-third (37%) of men **felt**

shamed or embarrassed. Compared to 2014, the percentage of women who indicated they did not report because they thought it was not serious enough to report showed a statistically significant decrease of 7 percentage points in 2016. The percentage of women who indicated they did not report because they were worried about potential negative consequences from their coworkers or peers showed a statistically significant increase compared to 2014 (10 percentage points).

Figure 79.

Top 10 Reasons for Not Reporting the One Situation for DoD (Q141)

In 2016, Air Force women were generally *less likely* than women in the other Services to indicate reasons for not reporting the one situation (Table 21). For example, Air Force women (24%) were *less likely* to indicate they did not report because they *thought it would hurt their career*, whereas Navy women (45%) were *more likely* than women in the other Services. Air Force women (25%) were *less likely* than women in the other Services to indicate they *did not think anything would be done*, whereas Navy women (42%) were *more likely*. Women in the Air Force (23%) were also *less likely* than women in the other Services to indicate they did not report because they *did not trust the process would be fair*, whereas Navy women (38%) were *more likely*. Navy women (28%) were *more likely* than women in the other Services to indicate the reason they did not report the one situation was because they *thought it might hurt their performance evaluation/fitness report*, whereas Air Force (13%) and Marine Corps women (12%) were *less likely*.

As shown in Table 21, the percentage of DoD women who indicated they did not report because [they took other actions to handle the situation](#) showed a statistically significant *decrease* in 2016 compared to 2014 (8 percentage points). The percentage of women who indicated they [took other actions to handle the situation](#) also showed a statistically significant *decrease* in 2016 for Army women (10 percentage points) and Marine Corps women (16 percentage points).

The percentage of Navy women who indicated they did not report the one situation because [they did not think they would be believed](#) showed a statistically significant *increase* in 2016 (14 percentage points). Additionally, percentages for Navy women showed statistically significant *increases* compared to 2014 for indicating they did not report because [they were worried about potential negative consequences from their supervisor or someone in their chain of command](#) (15 percentage points) and [they were worried about potential negative consequences from their coworkers or peers](#) (18 percentage points).

Compared to 2014, the percentage of Air Force women who indicated [they did not think it was serious enough to report](#) (9 percentage points) and [they did not think anything would be done](#) (8 percentage points) showed a statistically significant *decrease* in 2016. Conversely, the percentage of Air Force women who indicated [they were worried about potential negative consequences from their supervisor or someone in their chain of command](#) showed a statistically significant *increase* in 2016 (both 6 percentage points).

Percent of active duty women who indicated experiencing sexual assault and did not report to military

*Denotes new item for 2016 WGRA and therefore not comparable to 2014 RMWS

As shown in Table 22, in 2016, Air Force men were *less likely* than men in the other Services to indicate they did not report sexual assault for many of the reasons listed. For example, Air Force men were *less likely* than men in the other Services to indicate they did not report the one situation because *they did not want people to see them as weak* (15%), *they did not think their report would be kept confidential* (10%), and *they did not think anything would be done* (12%). In 2016, Army men were *more likely* than men in the other Services to indicate they did not report because *they did not want to hurt their career* (34%), whereas Air Force men were *less likely* (13%).

Compared to 2014, the percentage of Army men who indicated *they wanted to forget about it and move on* showed a statistically significant *decrease* in 2016 (23 percentage points). The percentage of DoD men who indicated *they took other actions to handle the situation* showed a statistically significant *decrease* in 2016 (15 percentage points).

Percent of active duty men who indicated experiencing sexual assault and did not report to military

*Denotes new item for 2016 WGRA and therefore not comparable to 2014 RMWS

Coast Guard

Table 23 displays reasons why Coast Guard members did not report the one situation of sexual assault and the top three reasons are explained here. Of the Coast Guard women who did not report to the military, the majority (70%) indicated the reason for not reporting was because *they did not want more people to know*. A little more than two-thirds (68%) indicated the reason for not reporting was because *they wanted to forget about it and move on*, and a little less than two-thirds (64%) indicated *they felt shamed or embarrassed*. There were no significant differences between 2014 and 2016 for Coast Guard women on reasons for not reporting sexual assault.

Of the Coast Guard men who did not report the one situation to the military, a little less than one-third indicated the reasons for not reporting were *they thought it was not serious enough to report* (32%), *they did not think anything would be done* (31%), and more than one-quarter (29%) indicated they didn't report because *they felt shamed or embarrassed*.³⁸

Compared to 2014, the percentage of those who indicated they *did not want more people to know* showed a statistically significant *increase* in 2016 for Coast Guard men (17 percentage points). Compared to 2014, the percentage of those who indicated they *did not want to hurt the person's career or family* showed a statistically significant *increase* in 2016 for Coast Guard men (16 percentage points).

³⁸ Caution should be taken when analyzing reasons for not reporting for Coast Guard men due to high margins of error.

Percent of Coast Guard members who indicated experiencing sexual assault and did not report to military

*Denotes new item for 2016 WGRA and therefore not comparable to 2014 RMWS

In Retrospect, Would Members Make the Same Decision About Reporting

Regardless of whether or not an active duty member indicated reporting or not reporting the unwanted event, members were asked if they would make the same decision about reporting if they could do it over again.

DoD

Of the 31% of DoD women and 15% of DoD men who indicated they reported sexual assault to the military, a little less than one-fifth (19%) of DoD women and 8% of DoD men who reported to the military indicated they would [make the same decision to report again](#), whereas a little more than one-tenth (11%) of DoD women and fewer (7%) DoD men [who reported to the military would not make the same decision again](#) (Figure 80). Of the 69% of DoD women and 85% of DoD men who did not report sexual assault to the military, a little less than half (49%) of women and more than half (57%) of men would [make the same decision to not report again](#), whereas 21% of women and 28% of men who [did not report to the military would report if they could do it over](#).

In 2016, Air Force women (7%) were *less likely* than women in the other Services to indicate [they reported to the military but would not make the same decision again](#) (Figure 80). Men in the Army (45%) were *less likely* than men in the other Services to [make the same decision to not report again](#). Navy men (3%) were *less likely* than men in the other Services to indicate they [reported to the military but would not make the same decision again](#). Finally, Air Force men (17%) were *less likely* than men in the other Services to indicate they [did not report to the military but would report if they could do it over](#).

Figure 80.

In Retrospect, Would Members Make the Same Decision About Reporting for DoD (Q129, Q142)

Coast Guard

As shown in Figure 81, of the 28% of Coast Guard women and 19% of Coast Guard men who reported sexual assault to the military, a little more than one-fifth (22%) of Coast Guard women and fewer (9%) Coast Guard men indicated they [would make the same decision to report](#), whereas fewer (5%) women and 10% of men who [would not make the same decision to report again](#). Of the 72% of Coast Guard women and 81% of Coast Guard men who did not report sexual assault, more than half (56%) of women and a little more than half (54%) of men would [make the same decision to not report again](#), whereas 17% of women and 26% of men who [did not report to the military would report if they could do it over](#).

Figure 81.

In Retrospect, Would Members Make the Same Decision About Reporting for Coast Guard (Q129, Q142)

Negative Outcomes Associated With Reporting the One Situation of Sexual Assault

The last section in this chapter provides details on negative outcomes associated with reporting sexual assault including the estimated rates and experiences of perceived professional reprisal, perceived ostracism, and perceived maltreatment, including “roll-up” rates of perceived ostracism and/or maltreatment and perceived professional reprisal, ostracism, and/or maltreatment. This section also addresses issues of perceived ostracism and/or maltreatment involving social media, information about whether or not a complaint was discussed and/or filed as a result of actions, and the relationship between those who took actions and the alleged perpetrator(s) identified in the report of sexual assault. Results for rates of perceived reprisal, ostracism, and/or maltreatment will be presented for total DoD and DoD by gender. The remaining questions on the experiences of negative outcomes will be shown only for DoD women. Results for DoD men, DoD Service by gender, and Coast Guard breakouts are unavailable due to data being not reportable and/or due to large margins of error.

Perceived Professional Reprisal

The overall rate of perceived professional reprisal, along with information on the individual(s) who took actions, if the experience(s) was (were) perceived as harmful to the member’s career, and participation in reporting of the sexual assault as a result of these actions are all discussed in greater detail in this section.

Rate of Perceived Professional Reprisal

The rate of perceived professional reprisal is a summary measure reflecting whether respondents indicated experiencing unfavorable actions taken by leadership (or an individual with the authority to affect a personnel decision) as a result of reporting a sexual assault (not based on conduct or performance) and experienced additional motivating factors for an investigation to occur (e.g., believed leadership took these actions for a specific set of reasons).

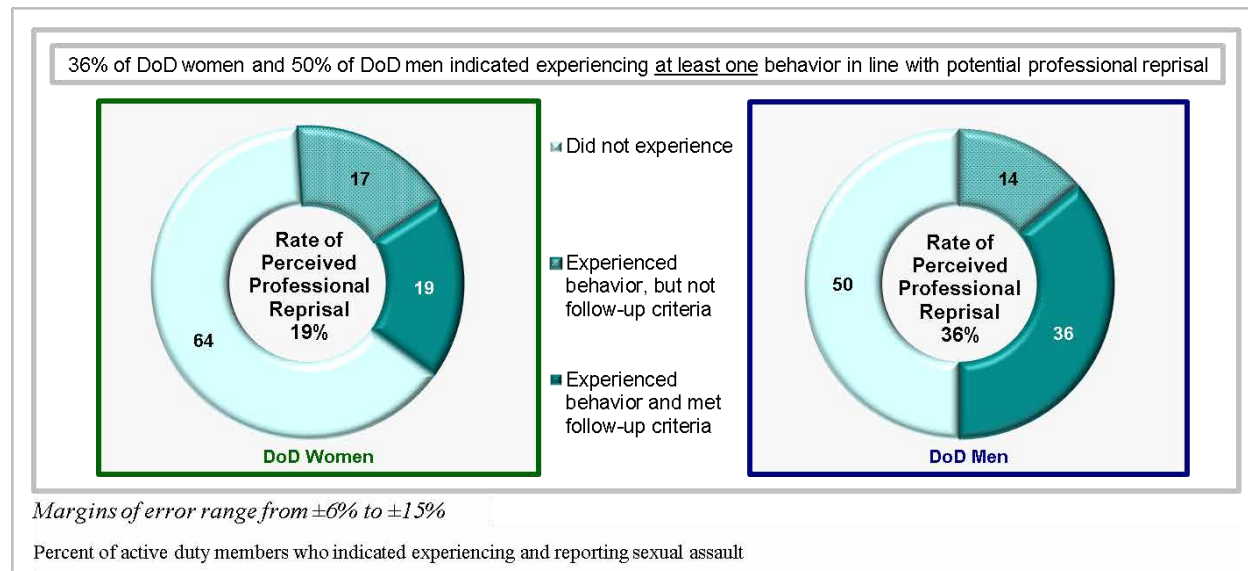

In 2016, 40% of DoD active duty members indicated experiencing **at least one behavior in line with potential professional reprisal**, of which, a little less than one-quarter (23%) of indicated experiencing **perceived professional reprisal** as a result of reporting sexual assault (Figure 82).

Figure 82.

Rate of Perceived Professional Reprisal for Total DoD (Q143–Q145)

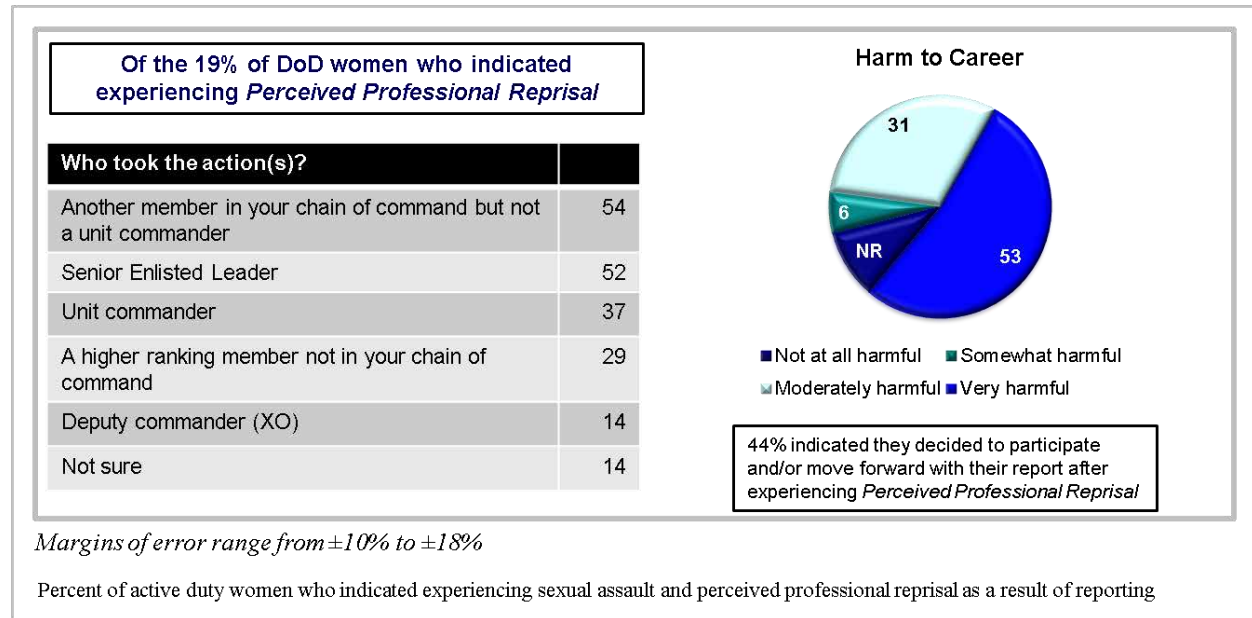

A little more than one-third (36%) of DoD women and half (50%) of DoD men indicated experiencing **at least one behavior in line with potential professional reprisal**, of which, a little less than one-fifth (19%) of women and more than one-third (36%) of men indicated experiencing **perceived professional reprisal** (Figure 83).

Figure 83.***Rate of Perceived Professional Reprisal for DoD by Gender (Q143–Q145)******Findings From Perceived Professional Reprisal***

After indicating the experienced behaviors were in line with perceived professional reprisal, members were asked to indicate all applicable individuals who took the actions. They were also asked to indicate how harmful these experiences would be to their career and whether they decided to participate or move forward with their report of sexual assault as a result of the actions taken against them (perceived professional reprisal).

As shown in Figure 84, over half (54%) of DoD women indicated the person who took these actions was **another member in their chain of command (but not their unit commander)**, whereas 52% indicated it was **their senior enlisted leader** who took the actions, and 37% indicated **their unit commander** took the actions. More than half of women (53%) indicated the behaviors taken by their leadership were **very harmful to their career**, a little less than one-third (31%) indicated the behaviors were **moderately harmful to their career**, and 6% indicated the behaviors were **somewhat harmful to their career**. After indicating they experienced perceived professional reprisal as a result of reporting sexual assault, 44% of women indicated they **decided to participate and/or move forward with their report of sexual assault**.

Figure 84.***Findings From Perceived Professional Reprisal for DoD Women (Q146–Q148)*****Perceived Ostracism**

The overall rate of perceived ostracism, individual(s) is provided in this section, along with who took the actions, and whether the member participated and/or moved forward with their report of sexual assault as a result of these actions.

Rate of Perceived Ostracism

The rate of perceived ostracism is a summary measure reflecting whether, as a result of reporting a sexual assault, respondents indicated experiencing negative behaviors from military peers and/or coworkers to make them feel excluded or ignored and experienced additional motivating factors for an investigation to occur.

As shown in Figure 85, half (50%) of DoD active duty members indicated experiencing **at least one behavior in line with potential ostracism**, of which, 14% of DoD members met the criteria for inclusion in the estimated overall rate of **perceived ostracism**.

Figure 85.
Rate of Perceived Ostracism for Total DoD (Q149–Q151)

A little more than half (51%) of DoD women and a little less than half (47%) of DoD men indicated experiencing at least one behavior in line with potential ostracism, with 12% of women and 17% of men indicating experiencing perceived ostracism (Figure 86).

Figure 86.
Rate of Perceived Ostracism for DoD by Gender (Q149–Q151)

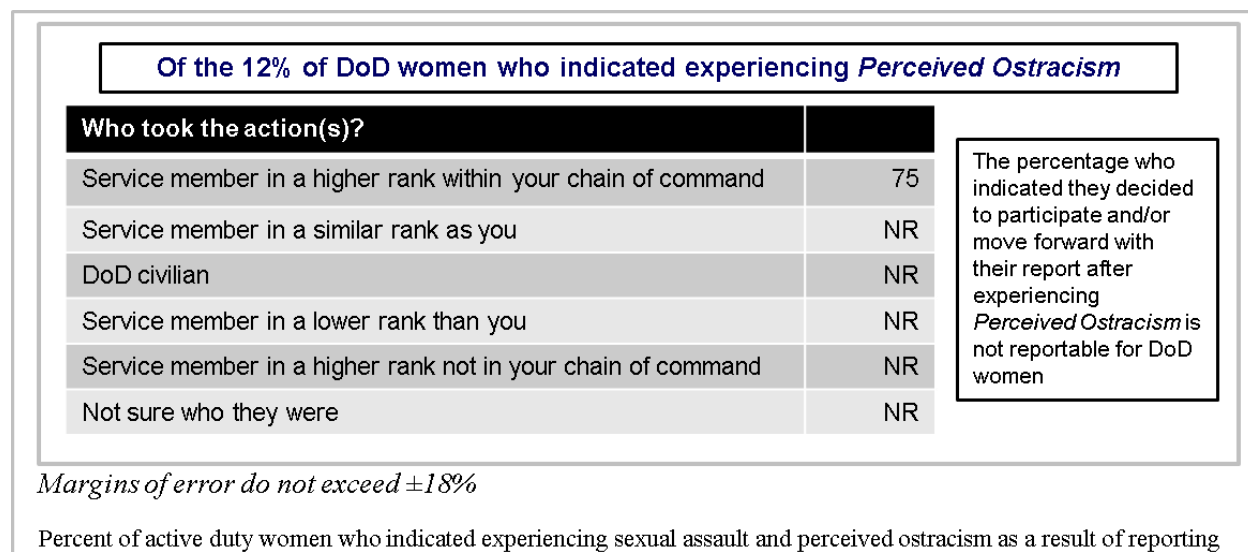

Findings From Perceived Ostracism

After indicating they experienced behaviors in line with perceived ostracism, members were asked to indicate all applicable individuals who took the actions. Members were also asked if they decided to participate or move forward with their report of sexual assault as a result of the actions taken against them (perceived ostracism).

As shown in Figure 87, three-quarters (75%) of DoD women indicated the person who took the actions was a **Service member in a higher rank in their chain of command**. Results for deciding whether to participate or move forward with their report of sexual assault are not reportable for DoD women.

Figure 87.

Findings From Perceived Ostracism for DoD Women (Q152–Q153)

Perceived Maltreatment

The overall rate of perceived maltreatment is provided in this section, followed by details on who took the actions, including whether they were in a position of leadership over them, and whether they participated and/or moved forward with their report of the sexual assault as a result of these actions.

Rate of Perceived Maltreatment

The rate of perceived maltreatment is a summary measure reflecting whether, as a result of reporting a sexual assault, respondents indicated experiencing negative behaviors from military peers and/or coworkers. These behaviors must have occurred without a valid military purpose and may include physical or psychological force, threats, or abusive or unjustified treatment that resulted in physical or mental harm and experienced additional motivating factors for an investigation to occur.

As shown in Figure 88, more than one-third (38%) of DoD members indicated experiencing **at least one behavior in line with potential maltreatment**, of which, a little less than one-fifth (18%) indicated experiencing **perceived maltreatment**.

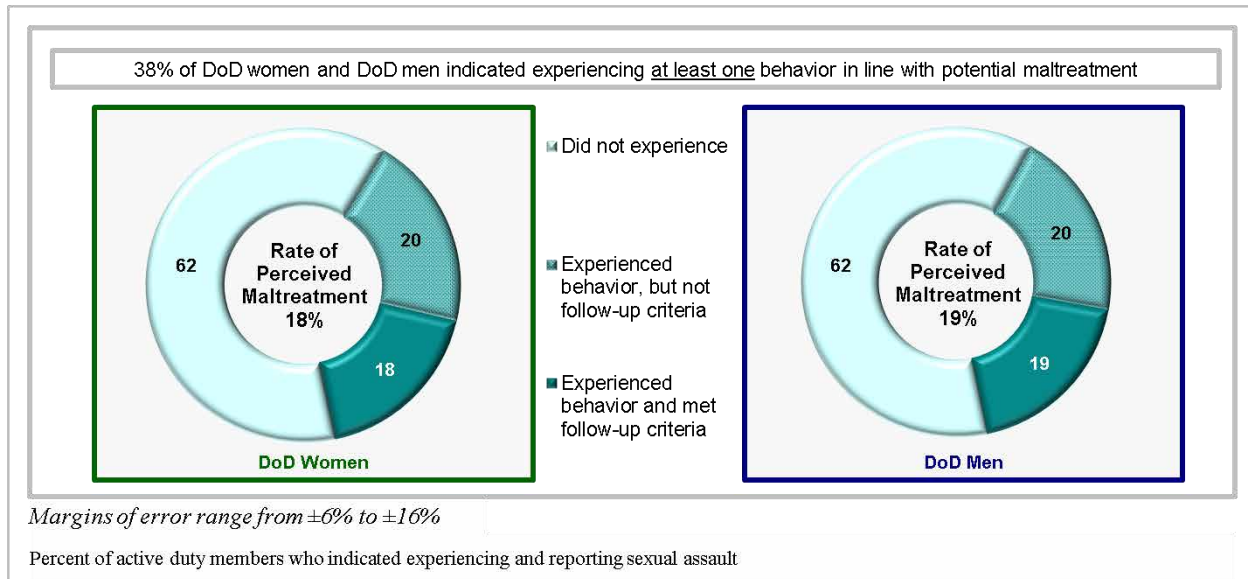

Figure 88.

Rate of Perceived Maltreatment for Total DoD (Q154–Q156)

More than one-third (38%) of DoD women and men indicated experiencing **at least one behavior in line with potential maltreatment**, of which, 18% of women and 19% of men indicated experiencing **perceived maltreatment** (Figure 89).

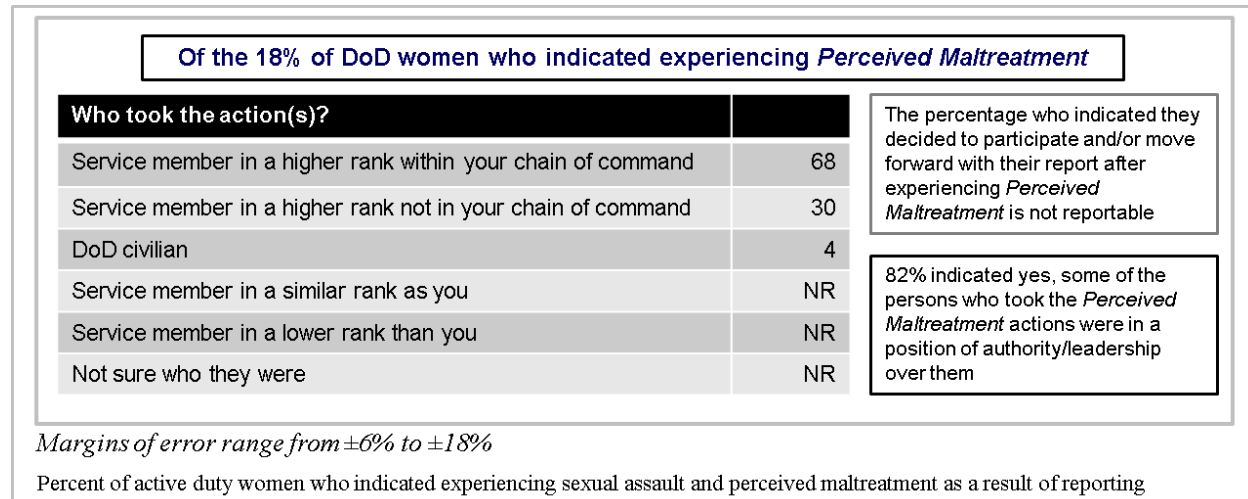

Figure 89.
Rate of Perceived Maltreatment for DoD (Q154–Q156)

Findings From Perceived Maltreatment

After indicating experiencing behaviors in line with perceived maltreatment, members were asked to indicate all applicable individuals who took the actions, along with indicating if they were in a position of authority or leadership over them. Members were also asked if they decided to participate or move forward with their report of sexual assault as a result of the actions taken against them (perceived maltreatment).

As shown in Figure 90, a little more than three-quarters (68%) of DoD women indicated the person who took these actions was a [Service member in a higher rank in their chain of command](#), whereas 30% indicated it was a [Service member in a higher rank not in your chain of command](#). Further, 82% of women indicated the person who took the actions was [in a position of authority or leadership over them](#). The percentage of women who indicated they [decided to participate and/or move forward with their report of sexual assault](#) is not reportable.

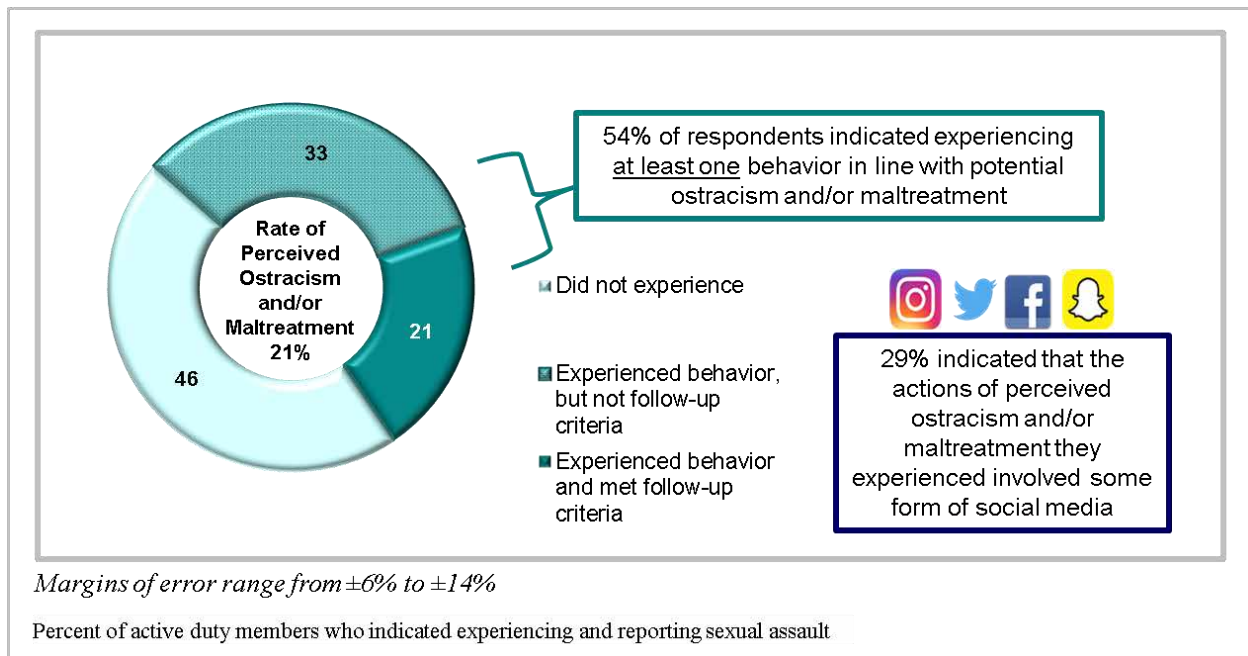

Figure 90.***Findings from Perceived Maltreatment for DoD Women (Q157–Q159)*****Rate of Perceived Ostracism and/or Maltreatment**

The rate of perceived ostracism and/or maltreatment is an overall measure showing whether members who reported experiencing behaviors or actions by military peers and/or coworkers meet the requirements for inclusion in the rates of perceived ostracism and/or perceived maltreatment. Members who indicated experiencing behavior in line with perceived ostracism and/or maltreatment were also asked if any of the actions they marked involved social media. The survey question provided examples of social media as Facebook, Twitter, Kik, Yik Yak, and Snapchat.

Overall, a little more than half (54%) of DoD members indicated experiencing [at least one behavior in line with potential ostracism and/or maltreatment](#), of which, when combining perceived ostracism and perceived maltreatment into one rate, 21% of DoD members indicated experiencing [perceived ostracism and/or maltreatment](#) (Figure 91). Twenty-nine percent indicated the [actions they experienced involved some form of social media](#).

Figure 91.

Rate of Perceived Ostracism and/or Maltreatment for Total DoD (Q149–Q151, Q154–Q156, Q160)

Overall, a little more than half (54%) of DoD women and DoD men indicated experiencing at least one behavior in line with potential ostracism and/or maltreatment, of which, when combining perceived ostracism and perceived maltreatment into one rate, 21% of women and 22% of men indicated experiencing perceived ostracism and/or maltreatment (Figure 92).

Figure 92.

Rate of Perceived Ostracism and/or Maltreatment for DoD by Gender (Q149–Q151, Q154–Q156)

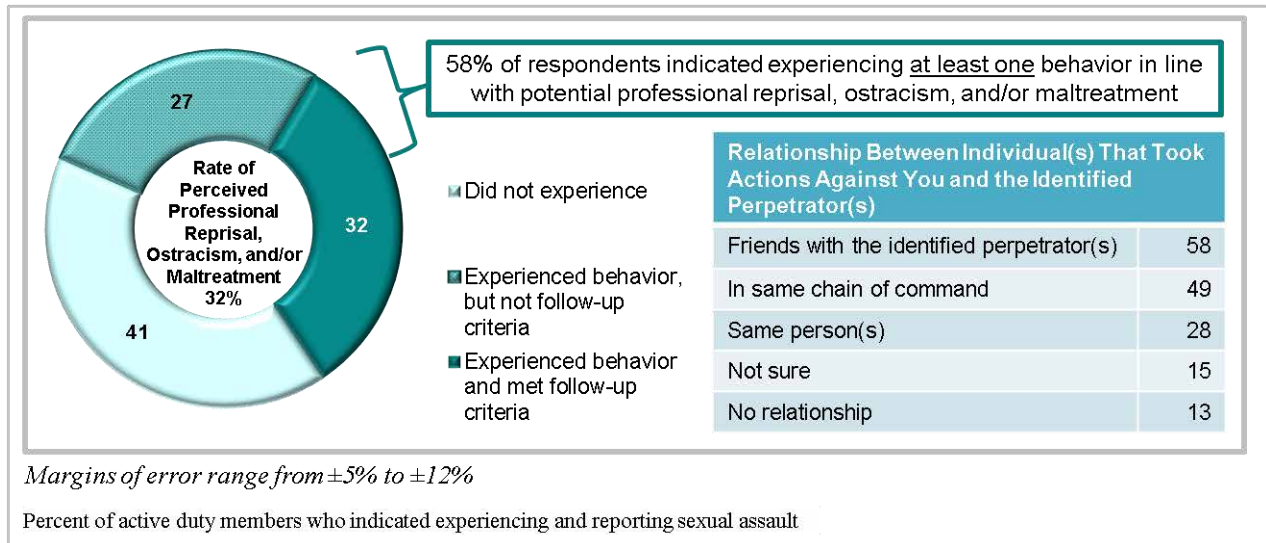

Rate of Perceived Professional Reprisal, Ostracism, and/or Maltreatment

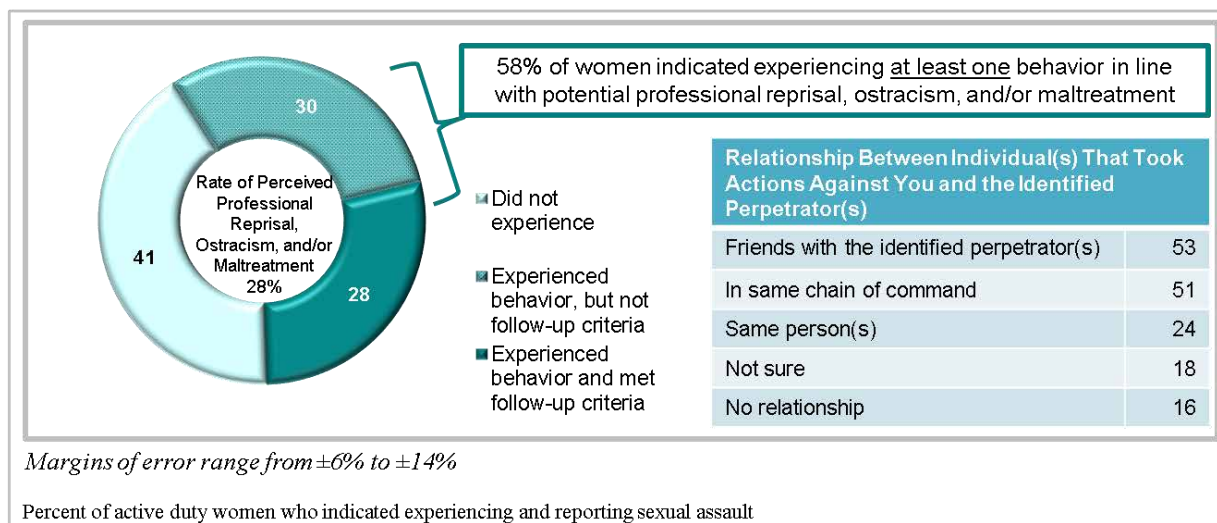

The rate of perceived professional reprisal, ostracism, and/or maltreatment is an overall measure reflecting whether respondents experienced behaviors in line with any of the three negative outcomes as a result of reporting a sexual assault. As shown in Figure 93, more than half (58%) of DoD members indicated experiencing at least one behavior in line with potential professional reprisal, ostracism, and/or maltreatment, of which, 32% of DoD members met criteria for inclusion in the combined rate of perceived professional reprisal, ostracism, and/or maltreatment. When asked what the relationship was between the individual(s) who took the actions against them and the identified perpetrator(s) in the sexual assault, 58% of DoD members indicated the individual(s) was (were) friends with the identified perpetrator(s), 49% were in the same chain of command, and 28% indicated they were the same person(s).

Figure 93.

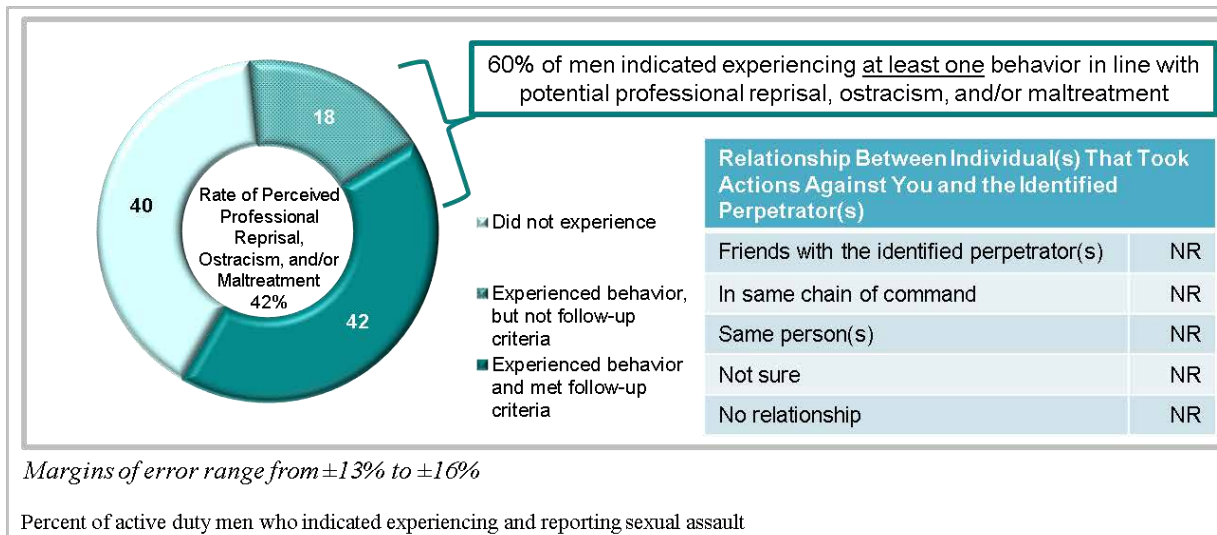

Rate of Perceived Professional Reprisal, Ostracism, and/or Maltreatment for Total DoD (Q143–Q145, Q149–Q151, Q154–Q156, Q166)

As shown in Figure 94, more than half (58%) of DoD women indicated experiencing at least one behavior in line with potential professional reprisal, ostracism, and/or maltreatment, of which, 28% of DoD women met criteria for inclusion in the combined rate of perceived professional reprisal, ostracism, and/or maltreatment. When asked what the relationship was between the individual(s) who took the actions against them and the identified perpetrator(s) in the sexual assault, 53% of women indicated the individual(s) was (were) friends with the identified perpetrator(s), 51% were in the same chain of command, and 24% indicated they were the same person(s).

Figure 94.**Rate of Perceived Professional Reprisal, Ostracism, and/or Maltreatment for DoD Women (Q143–Q145, Q149–Q151, Q154–Q156, Q166)**

As shown in Figure 95, more than half (60%) of DoD men indicated experiencing at least one behavior in line with potential professional reprisal, ostracism, and/or maltreatment, of which, 42% of DoD men met criteria for inclusion in the combined rate of perceived professional reprisal, ostracism, and/or maltreatment. Results on the relationship between the individual(s) who took the actions against them and the identified perpetrator(s) in the sexual assault are not reportable for DoD men.

Figure 95.**Rate of Perceived Professional Reprisal, Ostracism, and/or Maltreatment for DoD Men (Q143–Q145, Q149–Q151, Q154–Q156, Q166)**

Actions Following Negative Behaviors From Leadership or Military Peers, Based on Experiences of Perceived Professional Reprisal, Ostracism, and/or Maltreatment

Members who met the criteria for inclusion in the rate of perceived professional reprisal, ostracism, and/or maltreatment were asked to think about the negative actions they selected that were taken by military coworkers, peers, and/or leadership. Members were asked to indicate who they discussed with/filed a complaint to regarding these actions, along with follow up questions regarding outcomes of the discussions, filing of complaints, and what happened for those who did not file a complaint. Respondents were instructed to mark all appropriate options.

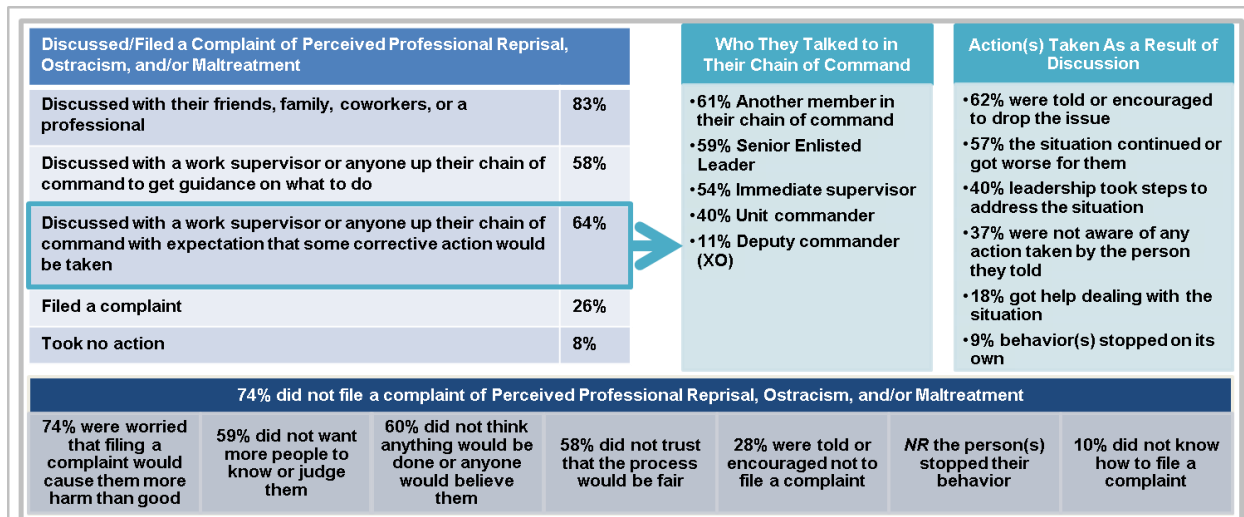

As shown in Figure 96, after experiencing perceived professional reprisal, ostracism, and/or maltreatment, the majority (83%) of DoD women indicated they [discussed the behaviors with their friends, family, coworkers, or a professional](#), whereas more than half (58%) indicated they [discussed with a work supervisor or anyone up their chain of command to get guidance on what to do](#) and 64% [discussed with a work supervisor or anyone up their chain of command with the expectation that some corrective action would be taken](#). About one-quarter (26%) [filed a complaint](#) of perceived professional reprisal, ostracism, and/or maltreatment. Actions taken as a result of filing a complaint are not reportable.

Of the 64% of women who indicated they discussed with a work supervisor or anyone up their chain of command with the expectation that some corrective action would be taken, a little less than two-thirds (61%) indicated they talked with [another member in their chain of command](#), 59% talked with their [senior enlisted leader](#), and 54% indicated they talked to [their immediate supervisor](#) (Figure 96). As a result of this discussion, a little less than two-thirds (62%) indicated they were [told or encouraged to drop the issue](#), more than half (57%) indicated the [situation continued or got worse for them](#), and less than half (40%) indicated [leadership took steps to address the situation](#).

Of the 74% of DoD women who did not file a complaint based on experiences of perceived professional reprisal, ostracism, and/or maltreatment, the top three reasons are discussed. The majority (74%) of women indicated they did not report because they [were worried that filing a complaint would cause them more harm than good](#), more than half (60%) indicated [they did not think anything would be done or anyone would believe them](#), and 59% [did not want more people to know or judge them](#) (Figure 96).

Figure 96.

Actions Following Negative Behaviors From Leadership or Military Peers, Based on Experiences of Perceived Professional Reprisal, Ostracism, and/or Maltreatment for DoD Women (Q161–Q165)

Margins of error range from $\pm 9\%$ to $\pm 18\%$

Percent of active duty women who indicated experiencing perceived professional reprisal/ostracism/maltreatment

Chapter 6: Sex-Based Military Equal Opportunity (MEO) Violations

Ms. Amanda Grifka

Introduction

This chapter examines active duty members' experiences of sex-based military equal opportunity (MEO) violations. As described in Chapter 1, to get to an estimated prevalence rate for sex-based MEO violations, two requirements must be met:

1. Experience gender-related behavior(s) in line with sexual harassment (which includes sexually hostile work environment or sexual *quid pro quo*) and/or gender discrimination by someone in their military workplace in the 12 months before the survey, and
2. Meet at least one of the follow-up criteria for the sex-based MEO violation behavior(s) experienced.

This chapter provides the estimated overall prevalence rates for sexually hostile work environment, sexual *quid pro quo*, sexual harassment, gender discrimination, the overall estimated sex-based MEO prevalence rate, and combinations of sex-based MEO violations they indicated experiencing. In addition, this chapter also provides information on whether the experienced sex-based MEO violation behavior(s) was (were) considered to be bullying and/or hazing.³⁹ All prevalence rates presented are estimates with corresponding margins of error.

Results are reported for 2016 and trend comparisons to the 2014 RMWS are provided where data are available.

Estimated Past Year Sexually Hostile Work Environment Prevalence Rate

Active duty members were asked about behaviors they may have experienced in their military workplace in the 12 months before taking the survey that may have been upsetting or offensive. A sexually hostile work environment includes unwelcome sexual conduct or comments that interfere with a person's work performance or creates an intimidating, hostile, or offensive work environment. For the purpose of this survey, a sexually hostile work environment includes experiences where someone from work:

- Repeatedly told sexual "jokes" that made you uncomfortable, angry, or upset;
- Embarrassed, angered, or upset you by repeatedly suggesting that you do not act like a man/woman is supposed to;

³⁹ The experienced sex-based MEO violation behaviors did not have to meet the criteria for these items.

- Repeatedly made sexual gestures or sexual body movements that made you uncomfortable, angry, or upset;
- Displayed, showed, or sent sexually explicit materials like pictures or videos that made you uncomfortable, angry, or upset;
- Repeatedly told you about their sexual activities in a way that made you uncomfortable, angry, or upset;
- Repeatedly asked you questions about your sex life or sexual interests that made you uncomfortable, angry, or upset;
- Made repeated sexual comments about your appearance or body that made you uncomfortable, angry, or upset;
- Took or shared sexually suggestive pictures or videos of you when you did not want them to and it made you uncomfortable, angry, or upset;
- Made repeated attempts to establish an unwanted romantic or sexual relationship with you and it made you uncomfortable, angry, or upset;
- Intentionally touched you in a sexual way when you did not want them to; or
- Repeatedly touched you in any other way that made you uncomfortable, angry, or upset.

To be included in the estimated prevalence rate for a sexually hostile work environment, members must have indicated experiencing one of the behaviors above along with endorsing “yes” to one of the follow-up items below:⁴⁰

- They continued this unwanted behavior even after they knew you or someone else wanted them to stop;⁴¹ or
- The experience was severe enough that most Service members would have been offended.⁴²

⁴⁰ The behavior “Intentionally touched you in a sexual way when you did not want them to” does not require any legal criteria follow-up questions.

⁴¹ This criteria follow-up question does not apply to the behavior “Took or shared sexually suggestive pictures or videos of you when you did not want them to and it made you uncomfortable, angry, or upset.”

⁴² It should be noted the second endorsement option listed above had a word change from the 2014 RMWS. The 2014 RMWS follow-up question was gender-specific and stated: “Do you think this was ever severe enough that **most [men/women]** in the military would have been offended?” In comparison, the new 2016 question stated: “Do you think the experience was severe enough that **most Service members** would have been offended?” Caution should be used in interpreting trend results between 2014 and 2016.

DoD

In 2016, 8.1% (± 0.2) of DoD active duty members indicated experiencing a **sexually hostile work environment** in the past 12 months. As shown in Figure 97, a little more than one-fifth (21.3%) of DoD women indicated experiencing a **sexually hostile work environment** in the past year, which remained statistically unchanged since 2014. In 2016, women in the Navy (26.9%), Marine Corps (25.5%), and Army (22.6%) were *more likely* to indicate experiencing a **sexually hostile work environment** than women in the other Services, whereas women in the Air Force (13.2%) were *less likely*. There were no significant differences between 2016 and 2014 for DoD women experiencing a sexually hostile work environment.

Figure 97.

Sexually Hostile Work Environment Prevalence Rate for DoD Women (Q8–Q20, Q25–43)

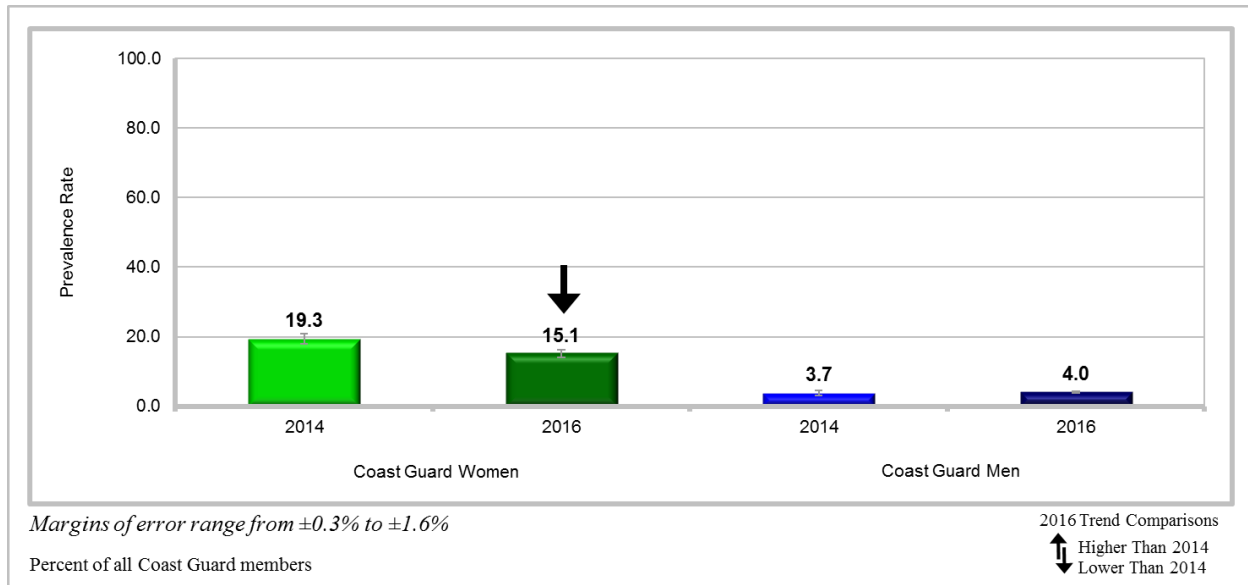

For DoD men, 5.6% (± 0.2) indicated experiencing a **sexually hostile work environment** in 2016 (Figure 98), which compared to 2014, showed a statistically significant *decrease* of 1 percentage point. In 2016, men in the Navy (8.1%) and Army (6.0%) were *more likely* than men in the other Services to indicate experiencing a **sexually hostile work environment**, whereas men in the Marine Corps (4.6%) and Air Force (3.2%) were *less likely*. Compared to 2014, the percentage of those who indicated experiencing a **sexually hostile work environment** showed a statistically significant *decrease* in 2016 for Army men (1.7 percentage points).

Figure 98.***Sexually Hostile Work Environment Prevalence Rate for DoD Men (Q8–Q20, Q25–43)***

Coast Guard

In 2016, 5.7% (± 0.3) of Coast Guard members indicated experiencing a [sexually hostile work environment](#). As shown in Figure 99, 15.1% of Coast Guard women indicated experiencing a [sexually hostile work environment](#), which compared to 2014, showed a statistically significant decrease of 4.2 percentage points. For Coast Guard men, 4.0% indicated experiencing a [sexually hostile work environment](#) in 2016, which remained statistically unchanged since 2014.

Figure 99.***Sexually Hostile Work Environment Prevalence Rate for Coast Guard (Q8–Q20, Q25–43)***

Estimated Past Year Sexual *Quid Pro Quo* Prevalence Rate

Sexual *quid pro quo* behaviors are used to control, influence, or affect one's job, career, or pay. Instances of sexual *quid pro quo* include situations in which job benefits or losses are conditioned on sexual cooperation. To get into the estimated prevalence rate for sexual *quid pro quo*, members must have indicated experiencing one of the two behaviors below, along with endorsing one of the corresponding follow-up items:

- Made you feel as if you would get some military workplace benefit in exchange for doing something sexual, and:
 - They told you that they would give you a reward or benefit for doing something sexual; or
 - They hinted that you would get a reward or benefit for doing something sexual; or
 - Someone else told you that they got benefits from this person by doing sexual things.
- Made you feel like you would get punished or treated unfairly in the military workplace if you did not do something sexual, and:
 - They told you that you would be punished or treated unfairly if you did not do something sexual; or
 - They hinted that you would be punished or treated unfairly if you did not do something sexual; or

- Someone else told you they were punished or treated unfairly by this person for not doing something sexual.

DoD

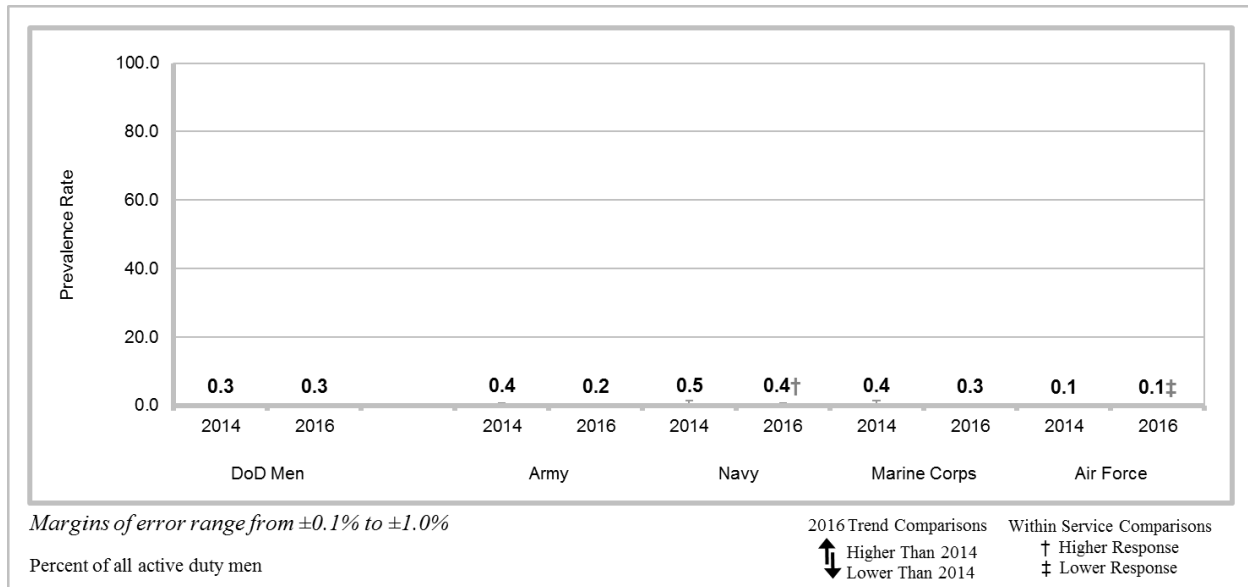

In 2016, 0.6% (± 0.1) of DoD active duty members indicated experiencing *sexual quid pro quo* in the past 12 months. As shown in Figure 100, 2.2% of DoD women indicated experiencing *sexual quid pro quo* in the past year, which compared to 2014, showed a statistically significant increase of 0.5 percentage points. In 2016, women in the Navy (3.4%) and Marine Corps (3.3%) were *more likely* than women in the other Services to indicate experiencing *sexual quid pro quo*, whereas women in the Air Force (0.7%) were *less likely*. Compared to 2014, the percentage of those who indicated experiencing *sexual quid pro quo* showed a statistically significant increase in 2016 for Navy women (1.2 percentage points).

Figure 100.

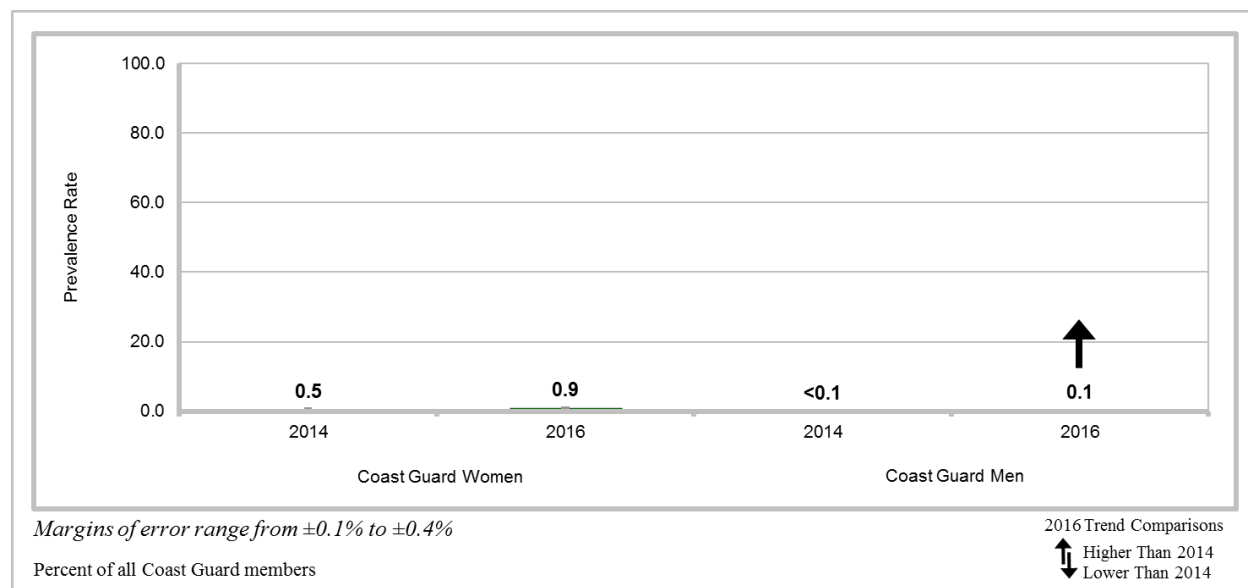

Sexually Quid Pro Quo Prevalence Rate for DoD Women (Q21–Q22, Q44–45)

As shown in Figure 101, 0.3% of DoD men indicated experiencing *sexual quid pro quo* in 2016 which remained statistically unchanged since 2014. In 2016, Navy men (0.4%) were *more likely* than men in the other Services to indicate experiencing *sexual quid pro quo*, whereas Air Force men (0.1%) were *less likely*. There were no significant differences between 2016 and 2014 for men experiencing *sexual quid pro quo*.

Figure 101.***Sexually Quid Pro Quo Prevalence Rate for DoD Men (Q21–Q22, Q44–45)*****Coast Guard**

In 2016, 0.2% (± 0.1) of Coast Guard members indicated experiencing *sexual quid pro quo* in the past year. For Coast Guard women, 0.9% indicated experiencing *sexual quid pro quo* in the past year, which remained statistically unchanged since 2014 (Figure 102). For Coast Guard men, 0.1% indicated experiencing *sexual quid pro quo* in the past year, which compared to 2014, showed a statistically significant *increase* of 0.1 percentage points.

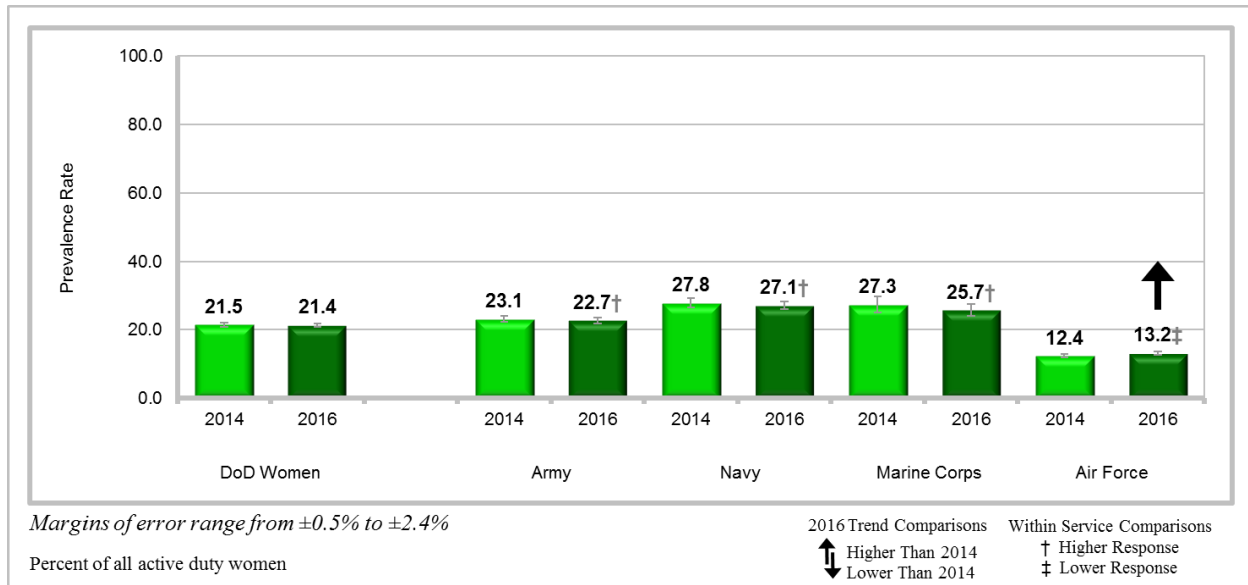

Figure 102.***Sexually Quid Pro Quo Prevalence Rate for Coast Guard (Q21–Q22, Q44–45)***

Estimated Past Year Sexual Harassment Prevalence Rate

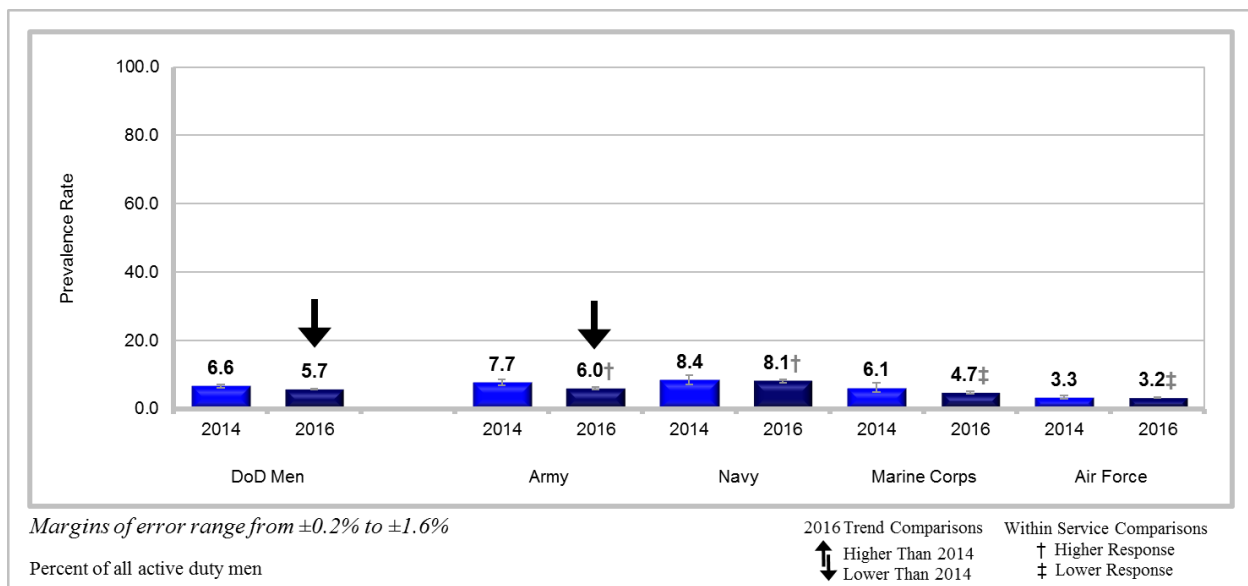

The estimated prevalence rate for sexual harassment is a “roll-up” of those who met criteria for the estimated sexually hostile work environment prevalence rate and/or those who met criteria for the estimated sexual *quid pro quo* prevalence rate.

DoD

In 2016, 8.1% (± 0.2) of DoD active duty members indicated experiencing [sexual harassment](#) in the past 12 months. As shown in Figure 103, 21.4% of DoD women indicated experiencing [sexual harassment](#), which remained statistically unchanged since 2014. In 2016, women in the Navy (27.1%), Marine Corps (25.7%), and Army (22.7%) were *more likely* than women in the other Services to indicate experiencing [sexual harassment](#), whereas women in the Air Force (13.2%) were *less likely*. Compared to 2014, the percentage of women who indicated experiencing [sexual harassment](#) showed a statistically significant *increase* in 2016 for Air Force (0.8 percentage points).

Figure 103.***Sexual Harassment Prevalence Rate for DoD Women (Q8–Q22, Q25–45)***

As shown in Figure 104, 5.7% of DoD men indicated experiencing **sexual harassment** in the past year, which compared to 2014, showed a statistically significant *decrease* of 0.9 percentage points. Men in the Navy (8.1%) and Army (6.0%) were *more likely* to indicate experiencing **sexual harassment** than men in the other Services, whereas Marine Corps (4.7%) and Air Force (3.2%) were *less likely*. Compared to 2014, the percentage of men who indicated experiencing **sexual harassment** showed a statistically significant *decrease* for Army (1.7 percentage points).

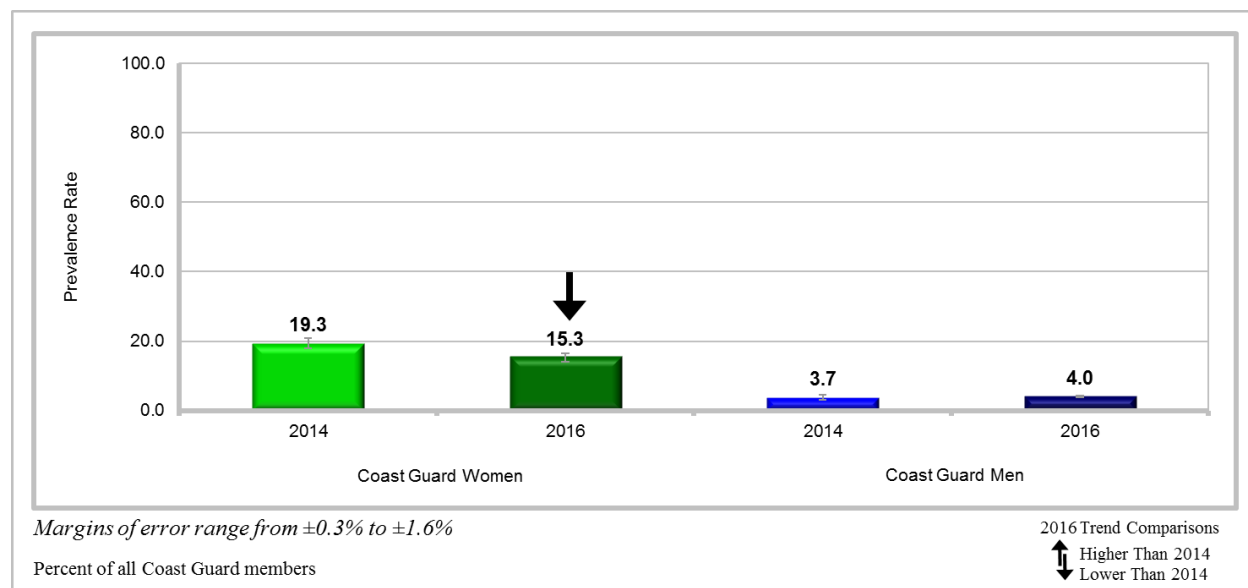

Figure 104.***Sexual Harassment Prevalence Rate for DoD Men (Q8–Q22, Q25–45)***

Coast Guard

In 2016, 5.7% (± 0.3) of Coast Guard members indicated experiencing **sexual harassment** in the past year. As shown in Figure 105, 15.3% of Coast Guard women indicated experiencing **sexual harassment** in the past year, which showed a statistically significant *decrease* in 2016 compared to 2014 (4 percentage points). For Coast Guard men, 4.0% indicated experiencing **sexual harassment**, which remained statistically unchanged since 2014.

Figure 105.

Sexual Harassment Prevalence Rate for Coast Guard (Q8–Q22, Q25–45)

Estimated Past Year Gender Discrimination Prevalence Rate

Gender discrimination includes comments and behaviors directed at someone because of his/her gender that harmed or limited his/her career. To get into the estimated prevalence rate for gender discrimination, members must have indicated experiencing one of the behaviors below and endorsed its corresponding follow-up item:

- Heard someone from work say that men/women are not as good as men/women at your particular job, or that men/women should be prevented from having your job, and:
 - Their beliefs about men/women harmed or limited your career.
- Mistreated, ignored, excluded, or insulted you because you are a man/woman, and:
 - This treatment harmed or limited your career.

DoD

In 2016, 3.9% (± 0.2) of DoD active duty members indicated experiencing **gender discrimination** in the past 12 months. As shown in Figure 106, 14.1% of DoD women indicated experiencing **gender discrimination** in the past year, which compared to 2014, showed a statistically significant *increase* of 1.7 percentage points. In 2016, women in the Marine Corps (18.3%), Navy (16.2%), and Army (15.7%) were *more likely* than women in the other Services to indicate experiencing **gender discrimination**, whereas women in the Air Force (9.2%) were *less likely*. Compared to 2014, the percentage of Air Force women who indicated experiencing **gender discrimination** showed a statistically significant *increase* in 2016 (2.5 percentage points).

Figure 106.

Gender Discrimination Prevalence Rate for DoD Women (Q23–Q24, Q46–47)

For DoD men, 2.0% indicated experiencing **gender discrimination** in the past year, which remained statistically unchanged from 2014 (Figure 107). In 2016, men in the Navy (2.8%) were *more likely* than men in the other Services to indicate experiencing **gender discrimination**, whereas men in the Air Force (1.1%) were *less likely*. Compared to 2014, the percentage of Marine Corps men who indicated experiencing **gender discrimination** showed a statistically significant *increase* in 2016 (1 percentage point).

Figure 107.***Gender Discrimination Prevalence Rate for DoD Men (Q23–Q24, Q46–47)*****Coast Guard**

In 2016, 2.8% (± 0.2) of Coast Guard members indicated experiencing [gender discrimination](#) in the past year. As shown in Figure 108, 11.5% of Coast Guard women and 1.3% of Coast Guard men indicated experiencing [gender discrimination](#) in the past year which remained statistically unchanged since 2014 for both women and men.

Figure 108.***Gender Discrimination Prevalence Rate for Coast Guard (Q23–Q24, Q46–47)***

Estimated Past Year Sex-Based Military Equal Opportunity (MEO) Violation Prevalence Rate

The estimated sex-based MEO violation prevalence rate is a “roll-up” of those who met the requirements for inclusion into at least one of the following estimated prevalence rates: sexual harassment (i.e., sexually hostile work environment and/or sexual *quid pro quo*) and/or gender discrimination.

DoD

In 2016, 9.9% (± 0.2) of DoD active duty members indicated experiencing a **sex-based MEO violation** in the past 12 months. As shown in Figure 109, 26.5% of DoD women indicated experiencing at least one **sex-based MEO violation** in the past year, which remained statistically unchanged since 2014. In 2016, women in the Marine Corps (32.2%), Navy (31.7%), and Army (28.3%) were *more likely* than women in the other Services to indicate experiencing a **sex-based MEO violation**, whereas women in the Air Force (17.8%) were *less likely*. Compared to 2014, the percentage of women who indicated experiencing a **sex-based MEO violation** showed a statistically significant *increase* in 2016 for Air Force (2.1 percentage points).

Figure 109.

Sex-Based MEO Violation Prevalence Rate for DoD Women (Q8–Q47)

In 2016, as shown in Figure 110, 6.8% of DoD men indicated experiencing at least one behavior that was consistent with a **sex-based MEO violation**, which remained statistically unchanged since 2014. In 2016, men in the Navy (9.7%) and Army (7.1%) were *more likely* than men in the other Services to indicate experiencing a **sex-based MEO violation**, whereas men in the Marine Corps (5.8%) and Air Force (4.0%) were *less likely*. Compared to 2014, the percentage of men who indicated experiencing a **sex-based MEO violation** showed a statistically significant *decrease* in 2016 for Army (1.4 percentage points).

Figure 110.***Sex-Based MEO Violation Prevalence Rate for DoD Men (Q8–Q47)*****Coast Guard**

In 2016, 7.3% (± 0.4) of Coast Guard members indicated experiencing a [sex-based MEO violation](#) in the past year. As shown in Figure 111, for Coast Guard women, 20.9% indicated experiencing a [sex-based MEO violation](#) in the past year, which compared to 2014, showed a statistically significant *decrease* of 2.5 percentage points. For Coast Guard men, 4.9% indicated experiencing at least one behavior that was consistent with a [sex-based MEO violation](#) in the past year, which remained statistically unchanged since 2014.

Figure 111.***Sex-Based MEO Violation Prevalence Rate for Coast Guard (Q8–Q47)***

Combination of Sex-Based MEO Violation Behaviors Experienced

It is possible a member could have experienced more than one potential sex-based MEO violation (i.e., sexually hostile work environment, sexual *quid pro quo*, and/or gender discrimination). This section details the combination of experiences making up the estimated sex-based MEO violation prevalence rate and is broken down into the following categories:

- Experienced sexually hostile work environment only;
- Experienced sexual *quid pro quo* only;
- Experienced gender discrimination only;
- Experienced a combination of sex-based MEO violations; and
- Did not experience any sex-based MEO violation.

DoD

As shown in Figure 112, the majority (74%) of women **did not indicate experiencing any sex-based MEO violations** in the past year. A little more than one-tenth (12%) indicated experiencing a **sexually hostile work environment only**, which compared to 2014, showed a statistically significant *decrease* in 2016 (1 percentage point). Additionally, <1% of women indicated experiencing behaviors of **sexual *quid pro quo* only**, which remained statistically unchanged since 2014. Moreover, 5% of women indicated experiencing **gender discrimination only**, which showed a statistically significant *increase* from 2014 (1 percentage point). Finally,

one-tenth (10%) of women indicated experiencing a [combination of behaviors](#) in the past 12 months, which showed a statistically significant *increase* from 2014 (2 percentage points).

In 2016, Air Force women were *less likely* than women in the other Services to indicate experiencing sex-based MEO violations. Specifically, women in the Air Force (82%) were *more likely* than women in the other Services to [not indicate experiencing any sex-based MEO violations](#) in the past 12 months, whereas women in the Army (72%), Navy (68%), and Marine Corps (68%) were *less likely*. Air Force women (8%) were *less likely* than women in the other Services to indicate experiencing a [sexually hostile work environment only](#), whereas Navy women (15%) were *more likely*. Air Force women (<1%) were also *less likely* than women in the other Services to indicate experiencing [sexual quid pro quo only](#) behaviors. Navy and Air Force women (both 5%) were *less likely* than women in the other Services to indicate experiencing [gender discrimination only](#), whereas Army and Marine Corps women (both 6%) were *more likely*. Air Force women (5%) were *less likely* than women in the other Services to indicate experiencing a [combination of behaviors](#), whereas women in the Marine Corps (13%), Navy (12%), and Army (11%) were *more likely*.

Compared to 2014, the percentage of women who indicated they [did not indicate experiencing any sex-based MEO violation behaviors](#) showed a statistically significant *decrease* in 2016 for Air Force (2 percentage points). The percentage of women who indicated experiencing a [sexually hostile work environment only](#) showed a statistically significant *decrease* in 2016 for Army and Navy women (1 percentage point for Army and 2 percentage points for Navy). The percentage of women who indicated experiencing [gender discrimination only](#) showed a statistically significant *increase* in 2016 for women in the Marine Corps and Air Force (2 percentage points for both). Lastly, the percentage of women who indicated experiencing a [combination of behaviors](#) showed a statistically significant *increase* in 2016 for Air Force (1 percentage point).

Figure 112.***Combination of Sex-Based MEO Violation Behaviors for DoD Women (Q8–Q47)***

As shown in Figure 113, the vast majority (93%) of men **did not indicate experiencing any sex-based MEO violations** in 2016. However, 5% indicated experiencing a **sexually hostile work environment only**, which showed a statistically significant *decrease* from 2014 (1 percentage point). Additionally, <1% indicated experiencing **sexual quid pro quo only** (statistically unchanged since 2014), and 1% indicated experiencing **gender discrimination only**, which showed a statistically significant *increase* from 2014 (<1 percentage point). One percent of men indicated experiencing a **combination of behaviors** (statistically unchanged since 2014).

In 2016, Air Force men were *less likely* than men in the other Services to indicate experiencing sex-based MEO violations (Figure 113). Specifically, men in the Air Force (96%) and Marine Corps (94%) were *more likely* than men in the other Services to **not indicate experiencing any sex-based MEO violations** in the past 12 months, whereas men in the Army (93%) and Navy (90%) were *less likely*. Marine Corps (4%) and Air Force men (3%) were *less likely* than men in the other Services to indicate experiencing a **sexually hostile work environment only**, whereas Navy men (7%) were *more likely*. Air Force men (1%) were also *less likely* than men in the other Services to experience **gender discrimination only**, whereas Navy men (2%) were *more likely*. Men in the Air Force (<1%) were *less likely* than men in the other Services to indicate experiencing a **combination of behaviors**, whereas men in the Army and Navy (both 1%) were *more likely*.

Compared to 2014, the percentage of men who indicated they **did not indicate experiencing any sex-based MEO violations** showed a statistically significant *increase* in 2016 for Army (2 percentage points). The percentage of Army men who indicated experiencing a **sexually hostile work environment only** showed a statistically significant *decrease* in 2016 (1 percentage point). The percentage of men who indicated experiencing **gender discrimination only** showed a statistically significant *increase* in 2016 for Marine Corps (<1 percentage point).

Figure 113.***Combination of Sex-Based MEO Violation Behaviors for DoD Men (Q8–Q47)***

Coast Guard

For the Coast Guard, the majority (79%) of women and the vast majority (95%) of men **did not indicate experiencing any sex-based MEO violations** in the past 12 months (Figure 114). Compared to 2014, the percentage of those who indicated they **did not indicate experiencing any MEO violation behaviors** showed a statistically significant *increase* in 2016 for Coast Guard women (2 percentage points) and remained statistically unchanged for men. Nine percent of women and 4% of men indicated experiencing a **sexually hostile work environment only**, which showed a statistically significant *decrease* in 2016 for women (3 percentage points) and remained statistically unchanged since 2014 for men. Additionally, 6% of women and 1% of men indicated experiencing **gender discrimination only**, which showed a statistically significant *increase* in 2016 for women (2 percentage points) and remained statistically unchanged for men. Less than one percent of women and men indicated experiencing **sexual quid pro quo only**, which remained statistically unchanged since 2014. Fewer (6%) women and <1% of men indicated experiencing a **combination of behaviors** in the past 12 months, which showed a statistically significant *decrease* in 2016 for women (2 percentage points) and remained statistically unchanged for men.

Figure 114.***Combination of Sex-Based MEO Violation Behaviors for Coast Guard (Q8–Q47)***

Considered Any Behaviors in Past Year as Hazing and/or Bullying

Active duty members who indicated experiencing any unwanted gender-related behaviors were asked to consider if any of the behaviors they selected as happening to them were hazing and/or bullying. Hazing refers to things done to humiliate or “toughen up” people before accepting them into a group. Bullying refers to repeated verbally or physically abusive behaviors that are threatening, humiliating, or intimidating.

DoD

As shown in Figure 115, of the 41% of DoD women who indicated experiencing any unwanted gender-related behaviors in the past 12 months, 12% would consider any of the behaviors to be **hazing** and 31% would consider any of the behaviors to be **bullying**. When combining these behaviors to assess whether they considered any of the behaviors they indicated experiencing to be a combination of hazing and bullying, 9% of women considered the behaviors to be **both hazing and bullying**. Sixty-six percent **did not consider** any of the unwanted gender-related behaviors as either hazing or bullying, whereas 3% would describe any behavior as **hazing (without bullying)** and 21% would describe any behavior as **bullying (without hazing)**.

Of the 13% of DoD men who indicated experiencing any unwanted gender-related behaviors in the past 12 months, 19% would consider any of the behaviors as **hazing** and 29% would consider any of the behaviors as **bullying** (Figure 115). When combining these behaviors to assess whether they considered any of the behaviors they indicated experiencing to be a combination of hazing and bullying, 14% of men considered the behaviors to be **both hazing and bullying**. Sixty-six percent **did not consider** any of the unwanted gender-related behaviors as being either hazing or bullying in the past year, whereas 5% would describe any behavior as **hazing (without bullying)** and 16% would describe any behavior as **bullying (without hazing)**.

Figure 115.***Considered Any Behaviors in Past Year as Hazing and/or Bullying for DoD (Q49)***

As shown in Table 24, examining the behaviors of hazing and bullying shows Navy women (14%) were *more likely* than women in the other Services to describe any of the unwanted gender-related behaviors as **hazing**, whereas women in the Marine Corps and Air Force (both 10%) were *less likely*. Air Force women (26%) were also *less likely* than women in the other Services to consider the behaviors to involve **bullying**. When considering the combination of behaviors experienced, Air Force women (71%) were *more likely* than women in the other Services to indicate **neither hazing nor bullying** were involved, whereas Army women (65%) were *less likely*. Navy women (12%) were *more likely* than women in the other Services to indicate the unwanted gender-related behaviors they indicated experiencing included **both hazing and bullying**, whereas Air Force women (6%) were *less likely*. Marine Corps women (25%) were *more likely* than women in the other Services to indicate any of the unwanted gender-related behaviors were considered to be **bullying (without hazing)**, whereas Air Force women (20%) were *less likely*. Marine Corps women (2%) were also *less likely* than women in the other Services to indicate the behaviors could be considered **hazing (without bullying)**.

When examining the behaviors of hazing and bullying for men, Army men (20%) were *more likely* than men in the other Services to indicate the behaviors experienced could be described as **hazing**, whereas Marine Corps men (14%) were *less likely* (Table 24). Additionally, Air Force men (24%) were *less likely* than men in the other Services to indicate the upsetting behaviors could be described as **bullying**. When considering the combination of behaviors experienced, Marine Corps and Air Force men (both 70%) were *more likely* than men in the other Services to indicate **neither hazing nor bullying** were involved in any of the unwanted situations, whereas Navy men (63%) were *less likely*. Army men (16%) were *more likely* than men in the other Services to indicate the behaviors involved **both hazing and bullying**, whereas Marine Corps (12%) and Air Force men (11%) were *less likely*. Air Force men (13%) were *less likely* than men in the other Services to indicate the unwanted situations could be described as **bullying (without hazing)**. Air Force men (6%) were *more likely* than men in the other Services to

indicate the unwanted situations could be described as **hazing (without bullying)**, whereas Marine Corps men (3%) were *less likely*.

Percent of active duty members who indicated experiencing at least one unwanted gender-related behavior in the past 12 months

Coast Guard

As shown in Figure 116, of the 20.9% of Coast Guard women who indicated experiencing at least one unwanted gender-related behavior in the past 12 months, 9% would consider any of the behaviors to be **hazing** and 25% would consider any of the behaviors to be **bullying**. When combining these behaviors to assess whether they considered any of the behaviors they indicated experiencing to be a combination of hazing and bullying, 6% considered the behavior(s) as **both hazing and bullying**. The majority (72%) of Coast Guard women **did not consider** any of the unwanted gender-related behaviors to be hazing or bullying in the past year. However, 19% considered the behavior(s) as **bullying (without hazing)**, whereas 2% considered the behavior(s) as **hazing (without bullying)**.

Of the 4.9% of Coast Guard men who indicated experiencing at least one unwanted gender-related behavior in the past 12 months, 14% would consider any of the behaviors to be **hazing** and 21% would consider any of the behaviors to be **bullying**. When combining these behaviors to assess whether they considered any of the behaviors they indicated experiencing to be a combination of hazing and bullying, 9% considered the behavior(s) to involve **both hazing and bullying**. The majority (73%) **did not consider** any of the unwanted gender-related behaviors as either hazing or bullying. However, 13% considered the behavior(s) to be **bullying (without hazing)**, whereas 5% considered the behavior(s) to be **hazing (without bullying)**.

Considered Any Behaviors in Past Year as Hazing and/or Bullying for Coast Guard (Q49)

Chapter 7: One Situation of Sex-Based Military Equal Opportunity (MEO) Violation With the Biggest Effect

Ms. Amanda Grifka and Ms. Lisa Davis

Introduction

This chapter provides details of the circumstances in which perceived sex-based MEO violations occur. Active duty members who indicated experiencing at least one upsetting behavior that is considered to be a sex-based MEO violation were asked to consider the one situation in the past 12 months that had the biggest effect—the one considered to be the worst or most serious. To be counted in the one situation, members must have indicated experiencing at least one upsetting behavior that is consistent with sexual harassment (i.e., hostile work environment and/or sexual *quid pro quo*) and/or gender discrimination and met the legal requirements for the experienced behavior(s) to be considered a sex-based MEO violation. With that one situation in mind, members then reported on the circumstances surrounding the experience.⁴³ This chapter addresses the following topics:

Characteristics of the Offender	<ul style="list-style-type: none">▪ Number and Gender▪ Military status and rank
Characteristics of the Situation	<ul style="list-style-type: none">▪ When did the situation occur?▪ Where did the situation occur?▪ Hazing and/or bullying
Reaction to the Situation	<ul style="list-style-type: none">▪ Made member take steps to leave or separate from the military
Reporting and/or Discussing the Situation	<ul style="list-style-type: none">▪ Reported/discussed the situation▪ Actions taken in response to reporting▪ Satisfaction with reporting▪ Reasons for not reporting

Results are reported for 2016 and trend comparisons to the 2014 *RMWS* are provided where data are available.

⁴³ While all members who responded to questions on the one situation had previously indicated experiencing a sex-based MEO violation, there was no requirement for members to meet legal criteria for the one situation they indicated had the biggest effect on them.

Type of Behavior Experienced in the One Situation as Identified by Members

Members who indicated experiencing at least one sex-based MEO violation in the past 12 months were asked to think about the one situation that had the biggest effect—the one situation considered to be the worst or most serious. In order to better understand if members correctly categorized the various types of sex-based MEO violations they indicated experiencing, members were asked if they would consider the one situation to be a hostile work environment, sexual *quid pro quo*, and/or gender discrimination. Definitions were provided to the respondent for each behavior:

Hostile Work Environment	Repeated unwelcome advances, used language/behavior/jokes of a sexual nature, or offensive physical conduct
Sexual <i>Quid Pro Quo</i>	Someone implied preferential treatment in exchange for your sexual cooperation
Gender Discrimination	Someone mistreated you because of your gender or exposed you to language/behaviors that conveyed offensive or condescending gender-based attitudes

Members were asked to mark “Yes” or “No” for each of the three behaviors to indicate the one situation that had the biggest effect. Respondents could have considered the one situation to include more than one behavior (e.g., sexual *quid pro quo* and gender discrimination).

DoD

As shown in Figure 117, in 2016, of the 21.3% of DoD women and 5.6% of DoD men who indicated experiencing a sexually hostile work environment in the past 12 months, a little more than half (54%) of women and half (50%) of men [identified the most upsetting situation as a sexually hostile work environment](#). Women in the Army (59%) were *more likely* than women in the other Services to [identify the situation as a sexually hostile work environment](#), whereas Air Force women (44%) were *less likely*. Similarly, Army men (56%) were *more likely* than men in the other Services to identify the situation as a [sexually hostile work environment](#), whereas men in the Marine Corps and Air Force (both 43%) were *less likely*.

Figure 117.

Sexually Hostile Work Environment Identified by Members as Most Upsetting Behavior Experienced in the One Situation for DoD (Q51)

Of the 2.2% of DoD women and 0.3% of DoD men who indicated experiencing sexual *quid pro quo*, two-thirds (66%) of women and more than half (57%) of men identified the most upsetting situation as sexual *quid pro quo* (Figure 118). Men in the Army (74%) were more likely than men in the other Services to identify the situation as sexual *quid pro quo*.

Figure 118.

Sexual Quid Pro Quo Identified by Members as Most Upsetting Behavior Experienced in the One Situation for DoD (Q51)

As shown in Figure 119, of the 14.1% of DoD women and 2.0% of DoD men who indicated experiencing gender discrimination, the majority of women (89%) and men (80%) identified the most upsetting situation as gender discrimination. There were no significant differences between the Services for identifying the most upsetting situation as gender discrimination.

Figure 119.

Gender Discrimination Identified by Members as Most Upsetting Behavior Experienced in the One Situation for DoD (Q51)

Coast Guard

As shown in Figure 120, of the 15.1% of Coast Guard women and 4.0% of Coast Guard men who indicated experiencing a sexually hostile work environment in the past 12 months, a little less than half (49%) of Coast Guard women and less than half (43%) of Coast Guard men identified the most upsetting situation as a sexually hostile work environment. Of the 0.9% of Coast Guard women who indicated experiencing sexual *quid pro quo*, more than half (56%) identified the most upsetting situation as sexual *quid pro quo*. Data are not reportable for the 0.1% of Coast Guard men who indicating experiencing sexual *quid pro quo*. Of the Coast Guard members who indicated experiencing gender discrimination—11.5% of women and 1.3% of men—the majority of women (86%) and men (76%) identified the most upsetting situation as gender discrimination.

Figure 120.***Sex-Based MEO Violation Behavior Indicated by Members as Most Upsetting Behavior Experienced in the One Situation for Coast Guard (Q51)*****Characteristics of the Alleged Offender(s) in the One Situation**

Active duty members who indicated experiencing a sex-based MEO violation in the past 12 months were asked to describe the alleged offender(s) in the most upsetting situation. Members were asked to indicate the number, gender, military status, and rank of the alleged offender(s).

Number and Gender of Alleged Offender(s) in the One Situation**DoD**

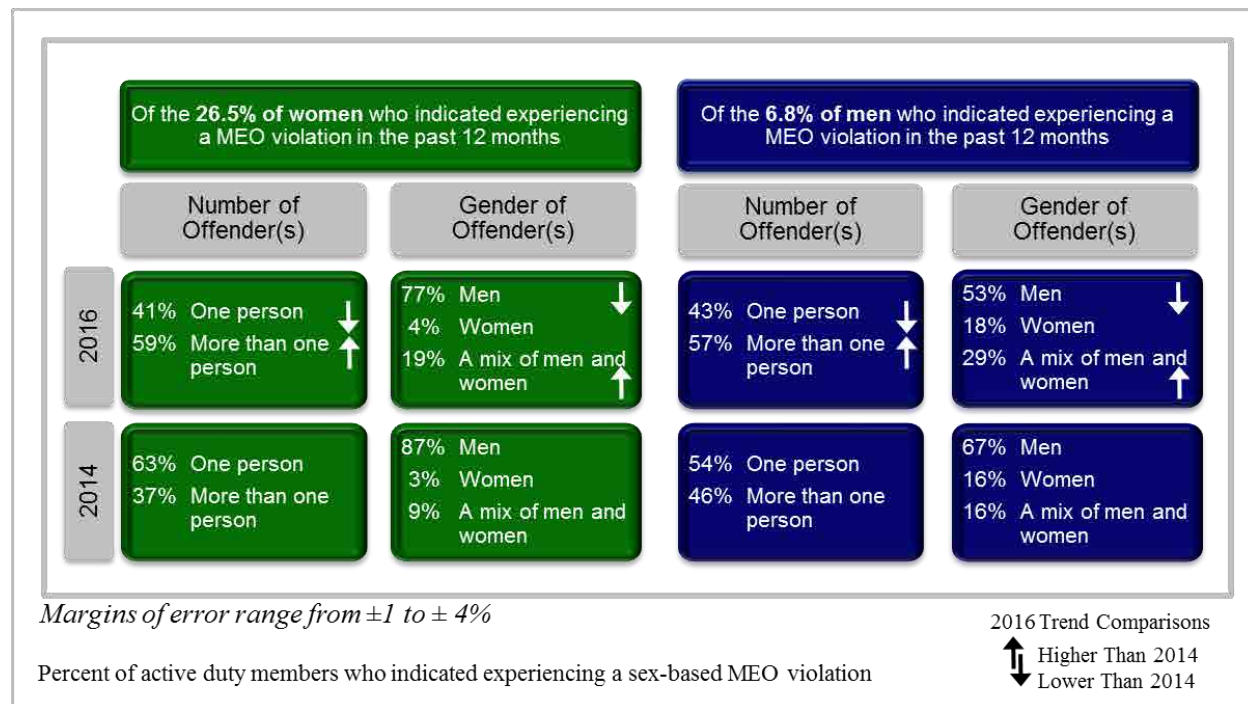

In 2016, of the 26.5% of DoD women who indicated experiencing a sex-based MEO violation, more than half (59%) indicated **more than one person** was involved in the upsetting situation (Figure 121). Compared to 2014, this showed a statistically significant *increase* of 22 percentage points in 2016 for women. With regard to gender of the alleged offender(s), the majority (77%) of women indicated the alleged offender(s) was (were) **men** (a statistically significant *decrease* of 10 percentage points since 2014), whereas only 4% indicated the alleged offender(s) was (were) **women** (statistically unchanged from 2014). Additionally, 19% of women indicated the alleged offenders were **a mix of men and women** (a statistically significant *increase* in 2016 of 10 percentage points since 2014).

Of the 6.8% of DoD men who indicated experiencing a sex-based MEO violation, more than half (57%) indicated **more than one person** was involved in the upsetting situation (Figure 121). Compared to 2014, this showed a statistically significant *increase* in 2016 of 11 percentage points for men. When asked about the gender of the alleged offender(s), a little more than half (53%) indicated the alleged offender(s) was (were) **men**, a little less than one-fifth (19%) indicated the alleged offender(s) was (were) **women**, and more than one-quarter (29%) indicated

they were a mix of men and women. Compared to 2014, there were no significant differences in gender of the alleged offender(s) for DoD men in 2016.

Figure 121.

Number and Gender of Alleged Offender(s) in the One Situation for DoD (Q52–Q53)

As shown in Table 25, in 2016, Navy women (61%) were *more likely* than women in the other Services to indicate *more than one person* was involved in the one situation, whereas Air Force women (56%) were *less likely*. Conversely, Air Force women (44%) were *more likely* to indicate only *one person* was involved in the situation, whereas Navy women (39%) were *less likely*. Compared to 2014, the percentage of women who indicated *more than one person* was involved in the upsetting situation showed a statistically significant *increase* for women in all Services: 23 percentage points for Marine Corps, 22 percentage points for Army and Air Force, and 21 points for Navy.

In 2016, Marine Corps women (2%) were *less likely* than women in the other Services to indicate the alleged offender(s) was (were) *women*, whereas Navy women (21%) were *more likely* to indicate the alleged offenders were a *mix of women and men*. Compared to 2014, the percentage of women who indicated the alleged offender(s) was (were) *men* showed a statistically significant *decrease* across all Services: 14 percentage points for Marine Corps, 11 percentage points for Army, 9 percentage points for Navy, and 8 percentage points for Air Force. With regard to indicating the alleged offender(s) was (were) *women*, compared to 2014, this response showed a statistically significant *increase* of 2 percentage points for Army women in 2016. Compared to 2014, the percentage of women who indicated the alleged offenders were a *mix of men and women* showed a statistically significant *increase* across all Services (13 percentage points for Marine Corps and 9 percentage points for Army, Navy, and Air Force).

As shown in Table 25, in 2016, there were no significant differences between Services for men who indicated the number of alleged offender(s) involved in the one situation. Compared to 2014, the percentage of men who indicated **more than one person** was involved in the upsetting situation showed a statistically significant *increase* for Army (19 percentage points) and Air Force men (14 percentage points).

In 2016, Marine Corps men (14%) were *less likely* than men in the other Services to indicate the alleged offender(s) was (were) **women**, while Army men (27%) were *less likely* to indicate the alleged offenders were **a mix of women and men**. Compared to 2014, the percentage of men who indicated the alleged offender(s) was (were) **men** showed a statistically significant *decrease* in 2016 for men in all Services: 24 percentage points for Marine Corps, 15 percentage points for Army, and 11 percentage points for Navy and Air Force. The percentage of men who indicated the alleged offender(s) was (were) **women** in 2016 showed a statistically significant *increase* of 8 percentage points for Marine Corps men. Compared to 2014, the percentage of men who indicated the alleged offenders were **a mix of men and women** showed a statistically significant *increase* in 2016 for men in all Services: 15 percentage points for Marine Corps, 13 percentage points for Army and Air Force, and 12 percentage points for Navy.

Percent of active duty members who indicated experiencing a sex-based MEO violation

Coast Guard

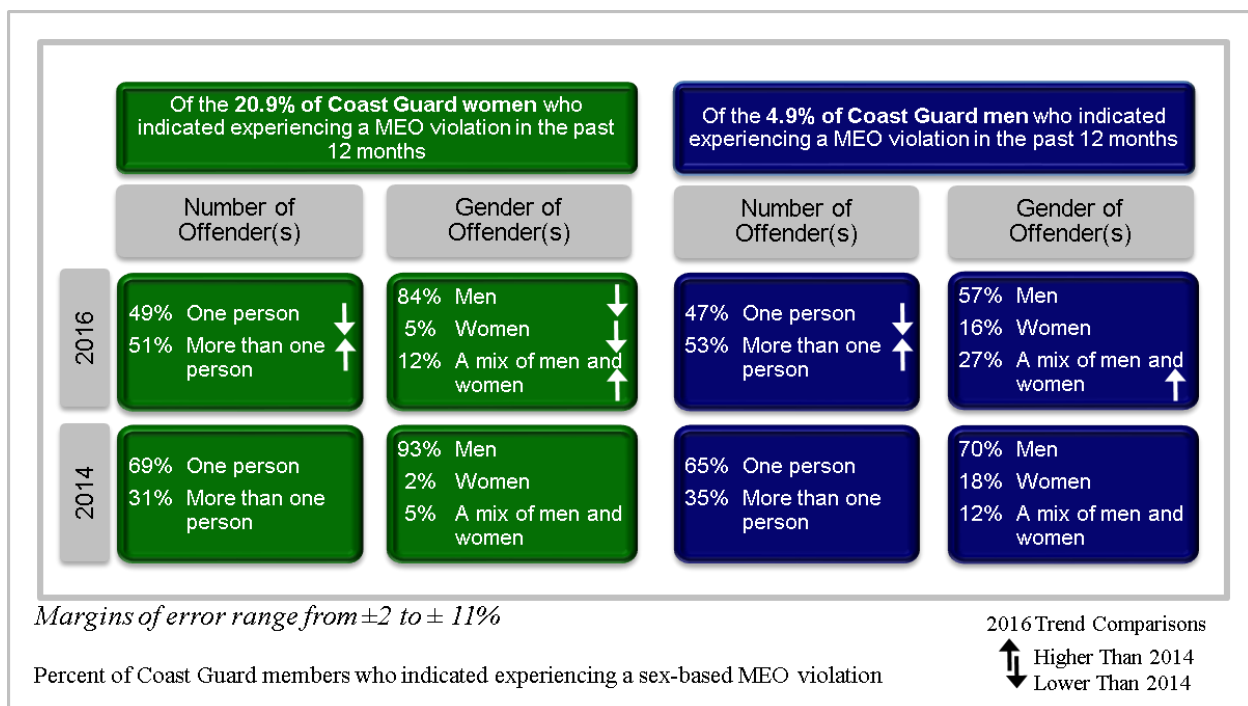

In 2016, of the 20.9% of Coast Guard women who experienced a sex-based MEO violation, more than half (51%) indicated **more than one person** was involved in the upsetting situation (Figure 122). This is a significant *increase* of 14 percentage points compared to 2014. When asked about the gender of the alleged offender(s), the majority (84%) of women indicated the alleged offender(s) was (were) **men**, which showed a statistically significant *decrease* from 2014 of 9 percentage points. Only 5% of Coast Guard women indicated the alleged offender(s) was (were) **women** (a statistically significant *decrease* from 2014 of 3 percentage points) and 12%

indicated they were **a mix of men and women** (a statistically significant *increase* from 2014 of 7 percentage points).

Of the 4.9% of Coast Guard men who indicated experiencing a sex-based MEO violation, more than half (53%) indicated **more than one person** was involved. Compared to 2014, this is a significant *increase* of 18 percentage points. More than half (57%) of Coast Guard men indicated the alleged offender(s) was (were) **men** and 16% indicated the alleged offender(s) was **women**. More than one-quarter (27%) of men indicated the alleged offenders were **a mix of men and women**, which showed a statistically significant *increase* from 2014 of 15 percentage points.

Figure 122.

Number and Gender of Alleged Offender(s) in the One Situation for Coast Guard (Q52–Q53)

Status and Rank of Alleged Military Offender(s) in the One Situation

Active duty members were asked if any of the individuals involved in the one situation were military members. They were also asked about details of the employment status of the alleged offender(s). If a member indicated the alleged offender(s) was (were) a military member, then the member was asked to identify the rank(s) of the member(s).

DoD

As shown in Figure 123, of the 26.5% of DoD women who indicated experiencing a sex-based MEO violation, the majority (83%) indicated all of the offenders in the one situation were **military members**, 12% indicated **some were, but not all**, whereas fewer (4%) indicated **none**

were military, and 1% were not sure. Of the 99% of women who knew the alleged offender(s) military status,⁴⁴ 41% indicated the alleged offender(s) was (were) someone in their chain of command (excluding their immediate supervisor), whereas more than one-third indicated the alleged offender(s) was (were) an immediate supervisor or some other higher ranking military member (both 34%). More than one-quarter (27%) of women indicated the alleged offender(s) was (were) a subordinate(s) or someone they manage, whereas 13% indicated they were a DoD or government civilian working for the military, and 6% indicated they were contractor(s) working for the military. A little more than one-tenth (12%) of women indicated they were not sure of the employment status of the alleged offender(s).

Of the 95% of women who indicated at least some or all of the alleged offender(s) was (were) in the military, a little more than half (53%) indicated the alleged offender(s) was (were) ranked E5–E6, whereas more than one-third (36%) indicated they were ranked E7–E9, and more than one-quarter (26%) indicated they were ranked E4.

⁴⁴ Active duty DoD women who indicated they were not sure of the military status of the alleged offender(s) were not asked this question.

Figure 123.***Military Status and Rank of Alleged Offender(s) for DoD Women (Q54–Q56)***

As shown in Figure 124, of the 6.8% of DoD men who indicated experiencing a sex-based MEO violation, the majority (82%) indicated the alleged offenders in the one situation were **all military members**, whereas 10% indicated **some were, but not all**, and 4% indicated **none were military** or they were **not sure** of the military status of the alleged offender(s). Of the 96% of men who knew the alleged offender(s) military status,⁴⁵ 40% of men indicated they were **someone in their chain of command (excluding their immediate supervisor)**, whereas less than one-third (32%) indicated they were an **immediate supervisor**, and 31% indicated they were **some other higher ranking military** member. More than one-quarter (28%) indicated the alleged offender(s) was

⁴⁵ Active duty DoD men who indicated they were not sure of the military status of the alleged offender(s) were not asked this question.

(were) subordinate(s) or someone they manage, whereas a little more than one-tenth (11%) indicated they were a DoD or government civilian working for the military, and fewer (5%) indicated they were contractor(s) working for the military. Seventeen percent of men were not sure of the employment status of the alleged offender(s).

Of the 92% of DoD men who indicated at least some or all of the alleged offenders were in the military, more than half (55%) indicated the alleged offenders were ranked E5–E6. More than one-third (34%) of men indicated the alleged offenders were ranked E7–E9, and 29% indicated they were ranked E4.

Figure 124.

Military Status and Rank of Alleged Offender(s) for DoD Men (Q54–Q56)

Table 26 shows within Service comparisons for both DoD women and DoD men. In 2016, women in the Marine Corps (89%), Army, and Navy (both 85%) were *more likely* than women in the other Services to indicate the alleged offenders were *all military members*, whereas Air Force women (75%) were *less likely*. Air Force women (16%) were *more likely* than women in the other Services to indicate *some of the alleged offenders were military members, but not all*, whereas Marine Corps women (7%) were *less likely*. Women in the Air Force (7%) were also *more likely* than women in the other Services to indicate *none of the alleged offenders were military members*, whereas Navy (3%) and Marine Corps (1%) were *less likely*.

In 2016, men in the Army (84%) were *more likely* than men in the other Services to indicate the alleged offenders were *all military members*, whereas Air Force men (76%) were *less likely* (Table 26). Air Force men were *more likely* than men in the other Services to indicate *some of the alleged offenders were military members, but not all* (14%) and *none were military* (7%).

Percent of active duty members who indicated experiencing a sex-based MEO violation

As shown in Table 27, with regard to employment status of the alleged offender(s), women in the Navy (37%) were *more likely* than women in the other Services to indicate the alleged offender(s) was (were) an *immediate supervisor*, whereas Air Force women (27%) were *less likely*. Navy women (31%) were also *more likely* than women in the other Services to indicate the alleged offender(s) was (were) *subordinate(s) or someone they manage*, whereas Army (25%) and Air Force women (23%) were *less likely*. Army women (36%) were *more likely* than women in the other Services to indicate the alleged offender(s) was (were) *some other higher ranking military member*, whereas Navy women (32%) were *less likely*. In regards the status of the alleged offender(s) as *DoD or government civilians working for the military*, Air Force women (20%) were *more likely* than women in the other Services to indicate this status, whereas Army (11%) and Marine Corps (5%) women were *less likely*. For *contractor(s) working for the military*, both Air Force (9%) and Navy women (7%) were *more likely* than women in the other

Air Force men were *less likely* than men in the other Services to indicate the status of the alleged offender(s) was (were) an **immediate supervisor** (22%) or a **subordinate(s) or someone they manage** (21%; Table 27). However, Air Force men (20%) were *more likely* than men in the other Services to indicate the alleged offender(s) was (were) **DoD or government civilian(s) working for the military**, whereas Navy men (9%) were *less likely*. Marine Corps men (3%) were *less likely* than men in the other Services to indicate the alleged offender(s) was (were) **contractor(s) working for the military**.

As shown in Table 27, women in the Navy and Marine Corps were *more likely* than women in the other Services to indicate the rank of the alleged military offender(s) was (were) **E1–E3** (23% Navy, 25% Marine Corps) and **E4** (30% Navy, 38% Marine Corps), whereas Army and Air Force women (12% for both for **E1–E3**, 22% for Army and 19% for Air Force for **E4**) were *less likely*. Women in the Army were *more likely* than women in the other Services to indicate the rank of the alleged military offender(s) was (were) **E7–E9** (39%), **W1–W5** (5%), **O1–O3** (19%), and **O4–O6** (19%), but were *less likely* to indicate the alleged military offender(s) was (were) an **E5–E6** (49%). Navy women (61%) were *more likely* than women in the other Services to

indicate the alleged military offender(s) was (were) an **E5–E6**, whereas Air Force women (46%) were *less likely*. Additionally, Navy women were *less likely* than women in the other Services to indicate the rank of the military alleged offender(s) was (were) **W1–W5** (1%), **O1–O3** (10%), and **O4–O6** (12%). Women in the Marine Corps (5%) were *more likely* than women in the other Services to indicate the rank of the alleged offender(s) was (were) **W1–W5**, but were less likely to indicate the alleged military offender(s) was (were) **E7–E9** (27%) or **O4–O6** (10%).

Similar patterns are shown for DoD men (Table 27). Men in the Air Force were *less likely* than men in the other Services to indicate the rank of the alleged military offender(s) was (were) **E1–E3** (16%), **E4** (25%), **E5–E6** (47%), **E7–E9** (30%), and **W1–W5** (1%), but were *more likely* to indicate the alleged military offender(s) was (were) an **O4–O6** (20%). Army men were *more likely* than men in the other Services to indicate the rank of the alleged offender(s) was (were) **E7–E9** (38%), **W1–W5** (5%), **O1–O3** (18%), and **O4–O6** (15%), whereas Navy men were *less likely* (2% for **W1–W5**, 11% for **O1–O3**, and 7% for **O4–O6**). Additionally, Marine Corps men were *more likely* than men in the other Services to indicate the alleged military offender(s) was (were) an **E1–E3** (25%) and **E4** (37%), but were *less likely* to indicate they were ranked **E7–E9** (26%) and **O4–O6** (7%).

Percent of active duty members who indicated experiencing a sex-based MEO violation and indicated offender was a military member

Coast Guard

As shown in Figure 125, of the 20.9% of Coast Guard women who indicated experiencing a sex-based MEO violation, the majority (81%) indicated the alleged offender(s) in the one situation [were all military members](#), whereas 12% indicated [some were, but not all](#). Of the 98% of Coast Guard women who knew the military status of the alleged offender(s), more than one-third indicated the alleged offender(s) was (were) [someone in their chain of command \(excluding their immediate supervisor](#); 38%) or their [immediate supervisor](#) (37%), while 33% indicated the alleged offender(s) was (were) [some other higher ranking military member](#). More than one-quarter (26%) indicated the alleged offender(s) was (were) [subordinate\(s\) or someone they manage](#), 12% indicated they were a [DoD or government civilian\(s\) working for the military](#), and fewer (5%) indicated they were [contractor\(s\) working for the military](#). A little more than one-tenth (11%) of women indicated they were [not sure](#) of the employment status of the alleged offender(s).

Of the women who indicated at least some of the alleged offenders were in the military, a little less than half (46%) indicated they were ranked [E5–E6](#), whereas 32% indicated they were ranked [E7–E9](#), and 21% indicated they were ranked [E4](#).

Figure 125.***Military Status and Rank of Alleged Offender(s) for Coast Guard Women (Q54–Q56)***

As shown in Figure 126, of the 6.8% of Coast Guard men who indicated experiencing a sex-based MEO violation, the majority (82%) indicated the alleged offenders in the one situation were **all military members**, whereas 9% indicated **some were, but not all**, and fewer indicated **none were in the military** (5%) or were **not sure** (4%). Of the 96% of Coast Guard men who knew of the military status of the alleged offender(s), 32% indicated the alleged offender(s) was (were) **someone in their chain of command (excluding their immediate supervisor)**, whereas more than one-quarter indicated the alleged offender was (were) **some other higher ranking military member** (29%), was (were) **subordinate(s) or someone they manage** (27%) or an **immediate supervisor** (26%). Additionally, 12% indicated the alleged offender(s) was (were) **DoD or government civilian(s) working for the military**, and fewer (4%) indicated the alleged

offender(s) was (were) **contractor(s) working for the military**. A little less than one-fifth (18%) of men indicated they were **not sure** of the employment status of the alleged offender(s).

Of the Coast Guard men who indicated at least one of the alleged offenders were in the military, a little less than half (47%) indicated the alleged offender(s) was (were) ranked **E5–E6**. More than one-quarter (26%) of men indicated the alleged military offender(s) was (were) ranked **E7–E9**, whereas 24% indicated they were ranked **E4**.

Figure 126.

Military Status and Rank of Alleged Offender(s) for Coast Guard Men (Q54–Q56)

Margins of error range from ± 2 to ± 4

Percent of Coast Guard men who indicated experiencing a sex-based MEO violation

Length of Time the One Situation Continued

DoD

Of the 26.5% of DoD women and 6.8% of DoD men who indicated experiencing a sex-based MEO violation, a little less than one-fifth (19%) of women and more than one-quarter (28%) of men indicated the most upsetting situation occurred **one time** (Figure 127). Forty percent of DoD women and a little less than one-third (32%) of DoD men indicated the situation continued for **a few months**, whereas 20% of women and 21% of men indicated it continued for **a year or more**. Twelve percent of women and 10% of men indicated the situation continued for **about one month**, and 9% of women and 10% of men indicated the upsetting situation occurred for **about one week**.

Compared to 2014, the percentage of those who indicated the upsetting behavior happened **one time** showed a statistically significant *increase* in 2016 of 7 percentage points in 2016 for men. Conversely, the percentage of men who indicated the upsetting behavior continued for **a year or more** showed a statistically significant *decrease* in 2016 of 8 percentage points. There were no significant differences compared to 2014 on length of time the one situation continued for women.

Figure 127.

Length of Time the One Situation Continued for DoD (Q57)

As shown in Table 28, in 2016, Air Force women were *more likely* than women in the other Services to indicate the upsetting situation **occurred one time** (22%) and continued for **a year or more** (23%). They were also *less likely* than women in the other Services to indicate the upsetting situation continued for **about one week** (8%) and **a few months** (37%). Additionally, Army women (18%) were *less likely* than women in the other Services to indicate the upsetting situation continued for **a year or more**.

Compared to 2014, the percentage of women who indicated the upsetting situation happened **one time** showed a statistically significant *increase* of 3 percentage points in 2016 for Air Force.

In 2016, men in the Army (12%) were *more likely* than men in the other Services to indicate the upsetting situation continued for **about one month**, whereas Navy men (8%) were *less likely* (Table 28). Air Force men were *less likely* to indicate the upsetting behavior occurred for **a few months** (27%), but were *more likely* to indicate it occurred for **a year or more** (24%) compared to men in the other Services.

Compared to 2014, the percentage of men who indicated the upsetting behavior **happened one time** showed a statistically significant *increase* in 2016 for Navy (9 percentage points), Air Force (7 percentage points), and Army (6 percentage points). The percentage of men who indicated the situation continued for **about one week** showed a statistically significant *increase* of 6 percentage points in 2016 for Marine Corps compared to 2014. The percentage of men who indicated the upsetting situation continued for **a year or more** showed a statistically significant *decrease* of 15 percentage points in 2016 for Navy men compared to 2014.

Percent of active duty members who indicated experiencing a sex-based MEO violation

Coast Guard

As shown in Figure 128, of the 20.9% of Coast Guard women who indicated experiencing a sex-based MEO violation, more than one-third (36%) indicated the upsetting situation continued for **a few months**. A little less than one-quarter (23%) indicated it continued for **a year or more**, whereas one-fifth (20%) indicated it happened **one time**. Thirteen percent of Coast Guard women indicated the upsetting situation continued for **about one month** and fewer (8%) indicated it continued for **about one week**.

Of the 4.9% of Coast Guard men who indicated experiencing a sex-based MEO violation, a little less than one-third (32%) indicated the upsetting situation happened **one time** (Figure 128). A little less than one-quarter (23%) indicated it continued for **a few months**, whereas a little more than one-fifth (22%) indicated it continued for **a year or more**. Fourteen percent of Coast Guard men indicated the upsetting situation continued for **about one week**, whereas 10% indicated it

continued for [about one month](#). Compared to 2014, there were no statistically significant differences for Coast Guard women and Coast Guard men in 2016.

Figure 128.

Length of Time the One Situation Continued for Coast Guard (Q57)

Where the One Situation Occurred

Active duty members who indicated experiencing a sex-based MEO violation in the past 12 months were asked to select all applicable locations of where the one situation occurred. Examples of locations include at a military installation or ship, during an overseas port visit while deployed, or while at a location off base. Detailed location information is displayed followed by a “roll-up” of whether the locations selected were military or civilian locations.

DoD

Figure 129 shows the top five (out of 12) locations where the one situation occurred for DoD women and DoD men. Of the 26.5% of women and 6.8% of men who indicated experiencing a sex-based MEO violation in the past 12 months, the majority of women (92%) and men (88%) indicated the upsetting situation occurred [at a military installation/ship](#). A little more than one-fifth (22%) of women and 23% of men indicated the upsetting situation occurred [while on TDY/TAD, at sea, or during field exercises/alerts](#), and similarly, 21% of women and 22% of men indicated the upsetting situation occurred [while at an official military function \(either on or off base\)](#). A little less than one-fifth (19%) of DoD women and 15% of DoD men indicated the situation occurred [while at a location off base](#), whereas 12% of women and 13% of men indicated it occurred [while completing military occupational specialty school or technical training](#).

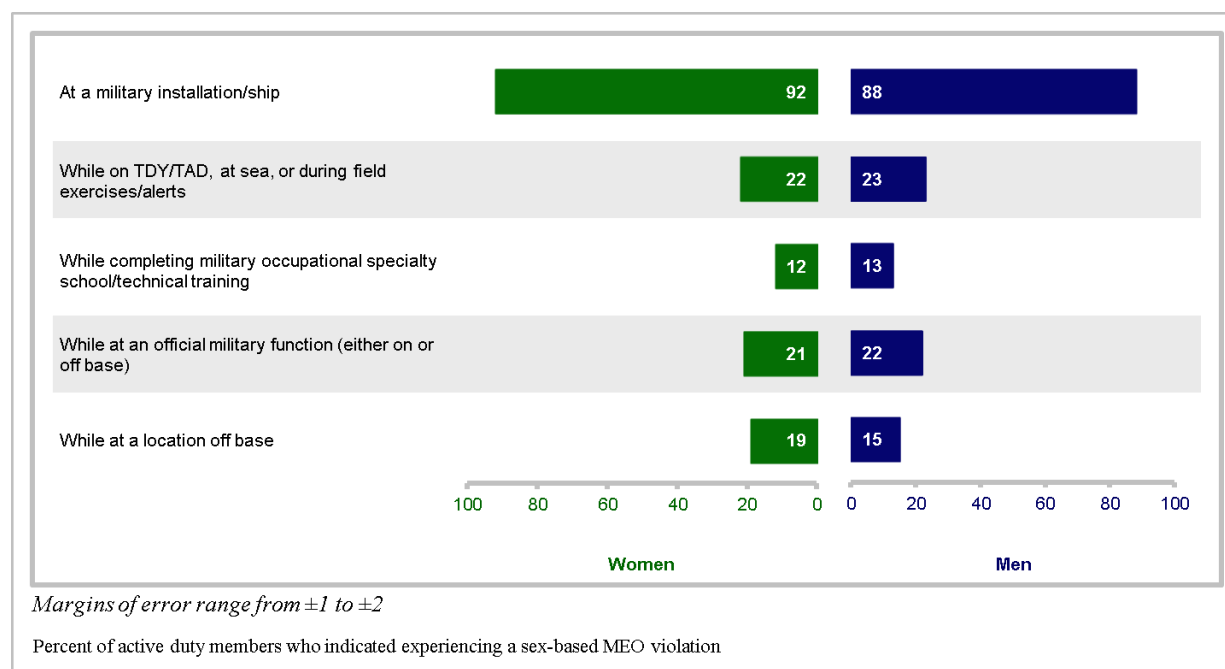

Figure 129.***Top Five Locations Where the One Situation Occurred for DoD (Q58)***

Table 29 displays the gender and Service breakouts for active duty DoD members for all 12 locations provided for members to endorse. To highlight some key differences, in 2016, women in the Air Force were generally *less likely* than women in the other Services to indicate the one situation occurred at a majority of the locations listed. For example, women in the Air Force were *less likely* than women in the other Services to indicate the situation occurred [while at a location off base](#) (17%), [while at an official military function \(either on or off base\)](#) (15%), and [while on TDY/TAD, at sea, or during field exercises/alerts](#) (15%).

In 2016, women in the Army and Marine Corps yielded similar patterns of responses in regard to the locations they each endorsed. For example, they were *more likely* than women in the other Services to indicate the one situation occurred [at an official military function](#) (23% for Army and 25% for Marine Corps) and [while completing military occupational specialty school or technical training](#) (14% for Army and 17% for Marine Corps). Women in the Army (12%) and Marine Corps (13%) were also *more likely* than women in the other Services to indicate the upsetting situation occurred [while in any other military combat training](#) (12% for Army and 13% for Marine Corps), and [while in Officer Candidate or Training School or a Basic or Advanced Officer Course](#) (4% for both Army and Marine Corps women).

Women in the Navy (93%) were *more likely* than women in the other Services to indicate the one situation occurred [at a military installation/ship](#), whereas Marine Corps women (86%) were *less likely*. Women in the Navy were also *more likely* than women in the other Services to indicate the situation occurred [during an overseas port visit while deployed](#) (15%), whereas women in the other Services were *less likely* (4% for Army, 3% for Marine Corps, and 2% for Air Force). Navy women (10%) were also *more likely* than women in the other Services to indicate the

situation occurred *while transitioning between operational theaters*, whereas Army women (5%) and Air Force women (2%) were *less likely*.

Among the Services, patterns of responses for DoD men yielded similar results as DoD women for locations where the one situation occurred (Table 29). Navy men (90%) were *more likely* than men in the other Services to indicate the upsetting situation occurred at a *military installation/ship*, whereas Marine Corps men (79%) were *less likely*. Air Force men were *less likely* than men in the other Services to indicate the upsetting situation occurred at the locations provided. For example, Air Force men were *less likely* to indicate the situation occurred *while at an official military function* (18%), *while on TDY/TAD, at sea, or during field exercises/alerts* (15%), or *while in recruit/basic training* (5%). Many of the locations *more likely* to be endorsed by Army men were *less likely* to be endorsed by Navy men. For instance, the upsetting situation was *more likely* to *occur at an official military function* for Army men (24%) and *less likely* for Navy men (19%). This also applies to *while completing military occupational specialty school/technical training* (15% for Army and 10% for Navy), *while in recruit/basic training* (11% for Army and 5% for Navy), and *while in any other training* (14% for Army and 5% for Navy). Men in the Navy were *more likely* than men in the other Services to indicate the upsetting situation occurred *during an overseas port visit while deployed* (15%) and *while transitioning between operational theaters* (12%).

Percent of active duty members who indicated experiencing a sex-based MEO violation

Combining the locations where active duty members indicated the upsetting situation occurred, results are shown in Figure 130 for whether the situation occurred at a military location, a civilian location, at both locations, or at neither location. Of the 26.5% of DoD women and 6.8% of DoD men who indicated experiencing a sex-based MEO violation in the past 12 months, the majority of women and men (both 77%) indicated the one situation occurred [at a military location](#). A little less than one-fifth (18%) of women and 14% of men indicated it occurred at

both military and civilian locations, whereas fewer (1% for both women and men) indicated the situation occurred only at a civilian location.

Women in the Air Force (79%) were *more likely* than women in the other Services to indicate the situation occurred at a military location, whereas Marine Corps women (70%) were *less likely*. Air Force women (1%) were also *more likely* than women in the other Services to indicate the situation occurred at a civilian location but were *less likely* to indicate it occurred at both military and civilian locations (16%).

Men in the Navy (81%) were *more likely* than men in the other Services to indicate the situation occurred at a military location, whereas Marine Corps men (69%) were *less likely*. However, Navy men (<1%) were *less likely* than men in the other Services to indicate the situation occurred at a civilian location. Marine Corps men (14%) were *more likely* than men in the other Services to not disclose a location, while Navy men (5%) were *less likely*.

Figure 130.
Where the One Situation Occurred for DoD (Q58)

Coast Guard

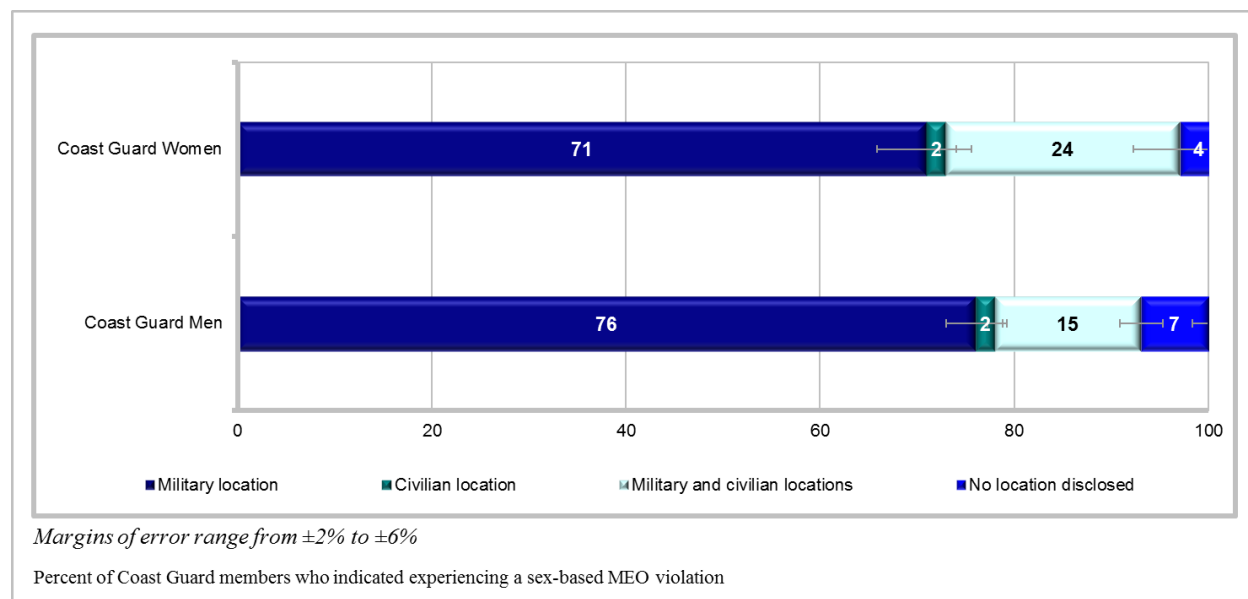

As shown in Table 31, of the 20.9% of Coast Guard women and 4.9% of Coast Guard men who indicated experiencing a sex-based MEO violation in the past 12 months, the majority of Coast Guard women (89%) and Coast Guard men (86%) indicated the one situation occurred at a military installation/ship. One-quarter (25%) of women and 16% of men indicated it occurred while at a location off base, whereas one-fifth (20%) of women and 23% of men indicated the situation occurred while on TDY/TAD, at least, or during field exercises/alerts.

Percent of Coast Guard members who indicated experiencing a sex-based MEO violation

Looking at the combinations of where the location occurred, the majority of Coast Guard women (71%) and Coast Guard men (76%) indicated the one situation occurred [at a military location](#) (Figure 131). Twenty-four percent of women and 15% of men indicated the situation occurred at [both military and civilian locations](#), whereas fewer (2% for both women and men) indicated it occurred [at a civilian location](#).

Figure 131.***Where the One Situation Occurred for Coast Guard (Q58)***

Considered the One Situation as Hazing and/or Bullying

Active duty members who indicated experiencing a sex-based MEO violation in the past 12 months were asked if they would consider the one situation with the biggest effect to be hazing and/or bullying. Hazing refers to things done to humiliate or “toughen up” people before accepting them into a group. Bullying refers to repeated verbally or physically abusive behaviors that are threatening, humiliating, or intimidating.

DoD

As shown in Figure 132, of the 26.5% of DoD women who indicated experiencing a sex-based MEO violation in the past 12 months, 17% indicated they considered the situation to be **hazing**, and 42% indicated it involved **bullying**. When combining these behaviors to assess whether they considered the one situation to be a combination of hazing and bullying, 13% of women considered it to be **both hazing and bullying**. More than half (55%) would **not** describe the one situation as **hazing or bullying**, whereas 28% would describe the unwanted situation as **bullying (without hazing)** and 3% would describe the unwanted situation as **hazing (without bullying)**.

As shown in Figure 132, of the 6.8% of DoD men who indicated experiencing a sex-based MEO violation in the past 12 months, 25% indicated they considered the one situation to be **hazing** and 42% indicated it involved **bullying**. When combining these behaviors to assess whether they considered the one situation to be a combination of hazing and bullying, 19% of men considered the situation to be **both hazing and bullying**. More than half (53%) would **not** describe the unwanted situation as **hazing or bullying**, whereas 22% would describe the unwanted situation as **bullying (without hazing)** and 5% would describe the unwanted situation as **hazing (without bullying)**.

Figure 132.***Considered One Situation as Hazing and/or Bullying for DoD (Q60)***

As shown in Table 30, women in the Navy (19%) were *more likely* than women in the other Services to consider the situation to be **hazing**, whereas Marine Corps and Air Force women (both 13%) were *less likely*. Marine Corps women (47%) were *more likely* than women in the other Services to consider the situation to be **bullying**, whereas Air Force women (37%) were *less likely*. When combining these behaviors together, women in the Air Force (59%) were *more likely* than women in the other Services to indicate **neither hazing nor bullying** took place during the one situation. Navy women (16%) were *more likely* than women in the other Services to consider the unwanted situation to involve **both hazing and bullying**, whereas Air Force women (9%) were *less likely*. Marine Corps women (35%) were *more likely* than women in the other Services to indicate **bullying (without hazing)** took place and were *less likely* to indicate **hazing (without bullying)** took place during the one situation.

Men in the Army (29%) were *more likely* to indicate the situation involved **hazing** than men in the other Services, whereas Marine Corps men (19%) were *less likely* (Table 30). Additionally, Army men (46%) were *more likely* than men in the other Services to consider the one situation to be **bullying**, whereas Air Force men (34%) were *less likely*. When combining these behaviors together, men in the Marine Corps and Air Force (both 59%) were *more likely* than men in the other Services to indicate **neither hazing nor bullying** were involved in the one situation, whereas men in the Army (48%) were *less likely* (Table 30). Army men (23%) were *more likely* than men in the other Services to indicate **both hazing and bullying** took place, whereas Air Force men (15%) were *less likely*. Air Force men (19%) were *less likely* than men in the other Services to indicate they considered **bullying (without hazing)** took place, while Marine Corps men (2%) were *less likely* to indicate **hazing (without bullying)** was involved in the one situation.

Percent of active duty members who indicated experiencing a sex-based MEO violation

Coast Guard

Of the 20.9% of Coast Guard women and 4.9% of Coast Guard men who indicated experiencing a sex-based MEO violation in the past 12 months, 14% of women and 21% of men described the one situation to be **hazing** (Figure 133). Forty percent of women and 32% of men indicated they considered the one situation as involving **bullying**. When combining these behaviors to assess whether they considered the one situation to be a combination of hazing and bullying, 11% of women and 13% of men indicated **both hazing and bullying** took place. More than half of women (58%) and men (60%) considered the one situation to be **neither hazing nor bullying**. More than one-quarter (29%) of women and 19% of men indicated the upsetting situation involved **bullying (without hazing)**, and 3% of women and 8% of men indicated experiencing **hazing (without bullying)**.

Figure 133.***Considered One Situation as Hazing and/or Bullying for Coast Guard (Q60)***

Situation Made Member Take Steps to Leave/Separate From the Military

DoD

Of the 26.5% of DoD women and 6.8% of DoD men who indicated experiencing a sex-based MEO violation in the past 12 months, 29% of women and 27% of men indicated the upsetting situation [made them take steps to leave or separate from the military](#) (Figure 134). Women in the Air Force (25%) were *less likely* than women in the other Services to indicate they [took steps to leave or separate from the military](#) as a result of the upsetting situation. Army men (29%) were *more likely* to indicate they [took steps to leave or separate from the military](#) because of the upsetting situation, whereas Air Force men (20%) were *less likely* than men in the other Services.

Figure 134.***Situation Made Member Take Steps to Leave/Separate From the Military for DoD (Q59)***

Coast Guard

As shown in Figure 135, of the 20.9% of Coast Guard women and 4.9% of Coast Guard men who indicated experiencing a sex-based MEO violation in the past 12 months, 22% of Coast Guard women and 15% of Coast Guard men indicated they [took steps to leave or separate from the military](#) because of the upsetting situation.

Figure 135.

Situation Made Member Take Steps to Leave/Separate From the Military for Coast Guard (Q59)

Reporting/Discussing of the One Situation

Active duty members who indicated experiencing a sex-based MEO violation in the past 12 months were asked to indicate who they discussed the one situation with and if they reported the situation to the military.

DoD

As shown in Figure 136, of the 26.5% of DoD women who indicated experiencing a sex-based MEO violation, the majority (83%) indicated they discussed the situation with family, friends, or coworkers. Less than half (43%) of women indicated they discussed the situation with a supervisor/chain of command to get guidance on what to do, and 40% indicated they discussed the situation with a supervisor/chain of command with the expectation of corrective action. One-quarter (25%) indicated they discussed the situation with a chaplain, counselor, or medical person, and 15% indicated they reported the situation as possible harassment or gender discrimination.

Of the 6.8% of DoD men who indicated experiencing a sex-based MEO violation, a little less than two-thirds (65%) indicated they discussed with family, friends, or coworkers. A little less than one-third (30%) indicated they discussed the situation with a supervisor/chain of command with the expectation of corrective action, and 29% indicated they discussed the situation with a supervisor/chain of command to get guidance on what to do. Sixteen percent indicated they discussed the situation with a chaplain, counselor, or medical person, and 7% indicated they reported the situation as possible harassment or gender discrimination.

Compared to 2014, the percentage of women who indicated [discussing the upsetting situation with a chaplain, counselor, or medical person](#) showed a statistically significant *increase* in 2016 of 2 percentage points. There were no significant differences between 2014 and 2016 for DoD men on reporting or disclosing the one situation.

Figure 136.
Reporting/Discussing the One Situation for DoD (Q61)

As shown in Table 32, Air Force women (85%) were *more likely* than women in the other Services to indicate [discussing the situation with friends, family, or coworkers](#), and were *less likely* to indicate [discussing with a chaplain, counselor, or medical person](#) (21%). Army women (18%) were *more likely* than women in the other Services to indicate [reporting the situation as possible harassment or gender discrimination](#), whereas Air Force women (11%) were *less likely*.

Compared to 2014, the percentage of women who indicated [discussing the upsetting situation with friends, family, or coworkers](#) showed a statistically significant *increase* of 2 percentage points in 2016 for Air Force. The percentage of Navy women who indicated [discussing the upsetting situation with a chaplain, counselor, or medical person](#) showed a statistically significant *increase* of 8 percentage points in 2016 compared to 2014.

In 2016, Marine Corps men were *less likely* than men in the other Services to indicate they [discussed the situation with friends, family, or workers](#) (60%). Army men were *more likely* than men in the other Services to [discuss the situation with a chaplain, counselor, or medical person](#) (20%), whereas Air Force men (11%) were *less likely*. Army men were also *more likely* than men in the other Services to indicate they [reported the situation](#) (9%), whereas Air Force men

were *less likely* (4%). Although Army men were *more likely* than men in the other Services to indicate they *discussed the situation with a supervisor/chain of command with the expectation of corrective action* (32%), Marine Corps men (25%) and Air Force men (26%) were *less likely*. Marine Corps and Air Force men (both 25%) were *less likely* than men in the other Services to indicate they *discussed the situation with a supervisor/chain of command to get guidance on what to do*.

Compared to 2014, the percentage of men who indicated *discussing with a chaplain, counselor, or medical person* showed a statistically significant *increase* in 2016 for Army men (6 percentage points).

Percent of active duty members who indicated experiencing a sex-based MEO violation

*Denotes item is not comparable to 2014 due to wording changes

Coast Guard

Of the 20.9% of Coast Guard women and 4.9 % of Coast Guard men who indicated experiencing a sex-based MEO violation in the past 12 months, the vast majority of women (85%) and a little more than two-thirds (68%) of men indicated [discussing the one situation with family, friends, or](#)

coworkers (Figure 137). Less than half (47%) of women and 26% of men indicated they discussed the situation with a work supervisor or anyone up their chain of command to get guidance, whereas 42% of women and 31% of men indicated they discussed the situation with those individuals with the expectation of some corrective action. Additionally, 22% of women and 10% of men indicated discussing with a chaplain, counselor, or medical person, and fewer (14% of women and 6% of men) indicated they reported the situation. There were no significant differences between 2014 and 2016 for Coast Guard women or Coast Guard men on reporting or disclosing the one situation.

Figure 137.

Reporting/Discussing the One Situation for Coast Guard (Q61)

Actions Taken in Response to Reporting/Discussing the One Situation

Active duty members who indicated experiencing a sex-based MEO violation and either reported the situation or discussed the situation with a supervisor or chain of command, were asked to indicate the actions taken in response to the report/discussion.

DoD

Of the 50% of DoD women and 37% of DoD men who reported or discussed the sex-based MEO violation with a supervisor or someone in the chain of command, 23% of women and 25% of men indicated a positive action was taken in response to reporting/disclosing the one situation (Figure 138). Conversely, 21% of women and 22% of men indicated a negative action was taken, whereas 49% of women and 42% of men indicated experiencing both positive and negative actions taken in response to reporting/disclosing the one situation.

Navy women (52%) were *more likely* than women in the other Services to indicate experiencing *both positive and negative actions*, whereas Air Force women (37%) were *less likely*. However, women in the Navy (19%) were *less likely* than women in the other Services to indicate experiencing *negative actions*, whereas Air Force women (30%) were *more likely*.

In 2016, there were no significant differences between Services for men who indicated experiencing positive and/or negative actions taken in response to reporting/disclosing the one situation.

Figure 138.

Positive and/or Negative Actions Taken in Response to Reporting/Discussing the One Situation for DoD (Q62)

The top four positive and negative actions are shown in Figure 139, and all actions along with Service breakouts are shown in Table 34 (DoD women) and Table 35 (DoD men). As shown in Figure 139, the positive action selected most by DoD women was *the rules of harassment were explained to everyone in the workplace* (44%). Compared to 2014, this showed a statistically significant *decrease* in 2016 (20 percentage points). Forty-one percent of women indicated *someone talked to the person(s) to ask them to change their behavior*, which showed a statistically significant *decrease* from 2014 (8 percentage points). Additionally, 22% of women indicated *their work station or duties were changed to help them avoid the person(s)* and 29% of women indicated the *person(s) stopped their upsetting behavior*, which showed a statistically significant *decrease* from 2014 (3 percentage points).

The top negative action to reporting/discussing the one situation indicated by DoD women was *they were encouraged to drop the issue* (44%). Compared to 2014, this showed a statistically significant *increase* in 2016 (7 percentage points). Thirty-eight percent of women indicated *the person they told took no action*. Additionally, 34% of women indicated *their coworkers treated them worse, avoided them, or blamed them for the problem*, which showed a statistically

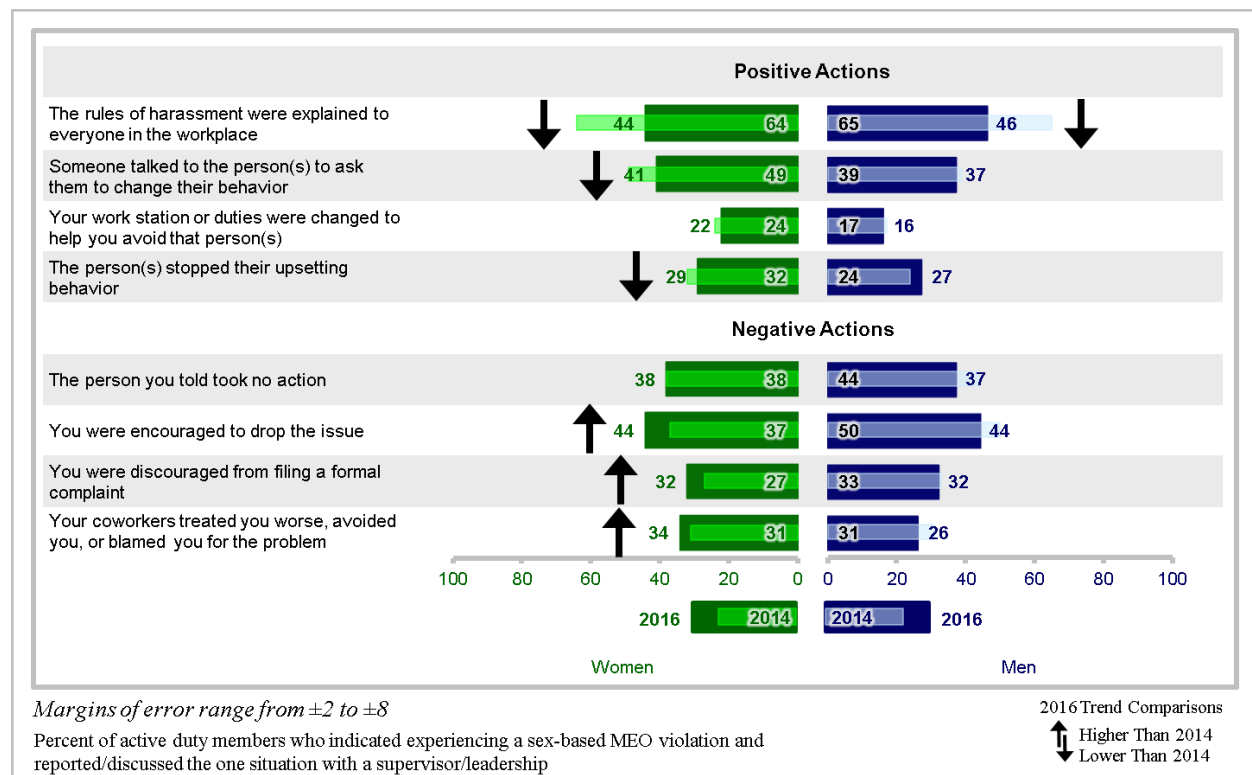

significant *increase* from 2014 (3 percentage points). A little less than one-third (32%) of women indicated *they were discouraged from filing a complaint*, which showed a statistically significant *increase* from 2014 (5 percentage points).

As shown in Figure 139, of the 37% of DoD men who reported or discussed the sex-based MEO violation with a supervisor or someone in the chain of command, the positive action selected most was *the rules of harassment were explained to everyone in the workplace* (46%). Compared to 2014, this showed a statistically significant *decrease* in 2016 for DoD men (19 percentage points). Thirty-seven percent of men indicated *someone talked to the person(s) to ask them to change their behavior*, and 27% indicated the *person(s) stopped their upsetting behavior*. Sixteen percent indicated *their work station or duties were changed to help them avoid the person(s)*.

In 2016, as shown in Figure 139, the top negative action of reporting/discussing the one situation indicated by DoD men was *they were encouraged to drop the issue* (44%). Thirty-seven percent of men indicated *the person they told took no action* and 32% indicated *they were discouraged from filing a complaint*. Additionally, 26% of men indicated *their coworkers treated them worse, avoided them, or blamed them for the problem*.

Figure 139.

Actions Taken in Response to Reporting/Discussing the One Situation for DoD (Q62)

In 2016, as shown in Table 34, Air Force women were *less likely* than women in the other Services to indicate experiencing many of the positive actions taken in response to reporting.

For example, Air Force women were *less likely* than women in the other Services to indicate [someone talked to the person\(s\) to ask them to change their behavior](#) (34%), whereas Marine Corps women (51%) were *more likely*. In addition, Air Force women (33%) were *less likely* than women in the other Services to indicate [the rules of harassment were explained to everyone in the workplace](#), whereas Army women (48%) were *more likely*. Further, Army women (25%) were *more likely* than women in the other Services to indicate [their work station/duties were changed to help avoid the person\(s\)](#), whereas Air Force women (19%) were *less likely*. Army women (33%) were also *more likely* than women in the other Services to indicate [the person\(s\) stopped their upsetting behavior](#), whereas Navy and Air Force women (both 26%) were *less likely*. Marine Corps women (13%) were *more likely* than women in the other Services to indicate [there was some official career action taken against the person\(s\) for their upsetting behavior](#), whereas Navy women (7%) were *less likely*.

Compared to 2014, the percentage of women who indicated [the rules of harassment were explained to everyone in the workplace](#) showed a statistically significant *decrease* in 2016 for all Services: Air Force (24 percentage points), Navy (21 percentage points), Marine Corps (19 percentage points), and Army (18 percentage points). There were also statistically significant *decreases* in 2016 for women who indicated [someone talked to the person\(s\) to ask them to change their behavior](#) (8 percentage points for Air Force and 6 percentage points for Army women) and [the person\(s\) stopped their upsetting behavior](#) compared to 2014 (6 percentage points each for Navy and Air Force women). Further, the percentage of Air Force women who indicated [their work station was changed to help avoid the person\(s\)](#) and [the person\(s\) was \(were\) moved so the member did not have as much contact with them](#) showed statistically significant *decreases* in 2016 (5 percentage points for both). Lastly, the percentage of women who indicated there was [some official career action taken against the person\(s\)](#) showed a statistically significant *decrease* in 2016 for Army (6 percentage points).

Similar to the positive actions experienced from reporting the one situation, in 2016, Air Force women were *less likely* to indicate experiencing many of the negative actions (Table 34). Specifically, Air Force women were *less likely* than women in the other Services to [indicate they were discouraged from filing a formal complaint](#) (26%), whereas Navy women (38%) were *more likely*. Women in the Air Force (29%) were also *less likely* than women in the other Services to [indicate their coworkers treated them worse](#), whereas Navy women (38%) were *more likely*. Air Force women were also *less likely* than women in the other Services to indicate [the person\(s\) who did this took action against them for complaining](#) (22%) and [their supervisor punished them for bringing it up](#) (16%). Additionally, Navy women (48%) were *more likely* to indicate [they were encouraged to drop the issue](#) than women in the other Services.

Compared to 2014, the percentage of women who indicated [their coworkers treated them worse/avoided them/blamed them](#) showed a statistically significant *increase* in 2016 for Navy women (10 percentage points), [they were encouraged to drop the issue](#) (8 percentage points), [they were discouraged from filing a formal complaint](#) (8 percentage points), and [their supervisor punished them for bring it up](#) (6 percentage points).

Percent of active duty women who indicated experiencing a sex-based MEO violation and reported/discussed with a supervisor/leadership

In 2016, as shown in Table 35, men across the Services showed little difference in their likelihood to indicate or not indicate nearly all positive actions taken in response to reporting the one situation. The exceptions include Air Force men (39%) who were *less likely* than men in the other Services to indicate *the rules of harassment were explained to everyone* and Navy men (9%) who were *less likely* than men in the other Services to indicate *the person(s) was (were) moved/reassigned so the member did not have as much contact with them*.

There were also nearly no significant differences among Services for men from 2014 and 2016 for the positive actions, except the percentage of men who indicated *the rules of harassment were explained to everyone in the workplace* which showed a statistically significant *decrease* in 2016

Similar to the positive actions resulting from reporting/disclosing the one situation, there were little differences between Services for men for negative actions (Table 35). However, men in the Army (30%) were *more likely* than men in the other Services to indicate **the person(s) who did this took action against them for complaining**. Compared to 2014, the percentage of men who indicated **the person(s) who did this took action against them for complaining** showed a statistically significant *decrease* for Navy (7 percentage points).

Percent of active duty men who indicated experiencing a sex-based MEO violation and reported/discussed with a supervisor/leadership

Coast Guard

Of the 52% of Coast Guard women and 37% of Coast Guard men who reported or discussed the sex-based MEO violation with a supervisor or someone in the chain of command, 28% of women and 34% of men indicated experiencing a **positive action** taken in response to reporting/discussing the one situation (Figure 140). Conversely, 22% of women and 20% of men indicated experiencing a **negative action**, whereas 39% of women and 36% of men indicated experiencing **both positive and negative actions** taken in response to reporting/discussing the one situation.

Figure 140.

Positive and/or Negative Actions Taken in Response to Reporting/Discussing the One Situation for Coast Guard (Q62)

The top four positive and negative actions taken in response to reporting/discussing the one situation for the Coast Guard are shown in Figure 141, and all actions are shown in Table 36. As shown in Figure 141, the positive action selected most by Coast Guard women was **someone talked to the person(s) to ask them to change their behavior** (40%), which showed a statistically significant *decrease* from 2014 (13 percentage points). More than one-third (35%) of women indicated **the rules of harassment were explained to everyone in the workplace**, which showed a statistically significant *decrease* from 2014 (21 percentage points). Additionally, 32% of women indicated **the person(s) stopped their upsetting behavior** and 18% indicated **their work station or duties were changed to help them avoid the person(s)**.

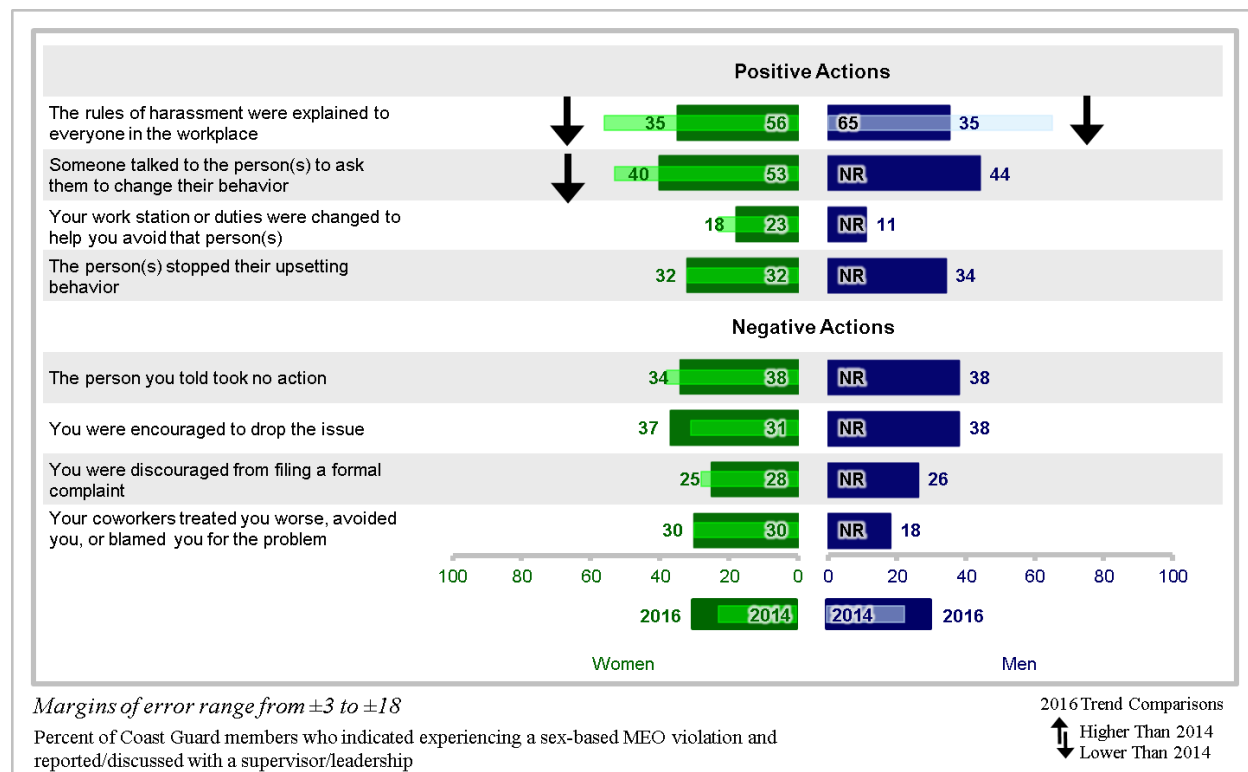

The top negative action indicated by Coast Guard women was **they were encouraged to drop the issue** (37%; Figure 141). Thirty-four percent of women also indicated **the person they told took no action**, and 30% indicated **their coworkers treated them worse, avoided them, or blamed them for the problem**. One-quarter (25%) of women indicated **they were discouraged from filing a formal complaint**. There were no statistically significant differences between 2014 and 2016 for negative actions experienced by Coast Guard women.

As shown in Figure 141, the positive action selected most by Coast Guard men was *someone talked to the person(s) to ask them to change their behavior* (44%). More than one-third (35%) of men indicated *the rules of harassment were explained to everyone in the workplace*, which showed a statistically significant *decrease* from 2014 (30 percentage points). Additionally, 34% of men indicated *the person(s) stopped their upsetting behavior*, and 11% indicated *their work station or duties were changed to help them avoid the person(s)*.

The top negative actions indicated by Coast Guard men were *they were encouraged to drop the issue* and *the person they told took no action* (38% for both; Figure 141). Further, 26% of men indicated *they were discouraged from filing a formal complaint*, and 16% indicated *their coworkers treated them worse, avoided them, or blamed them for the problem*.

Figure 141.

Actions Taken in Response to Reporting/Discussing the One Situation for Coast Guard (Q62)

As shown in Table 36, compared to 2014, the percentage of those who indicated *the person(s) was/were moved/reassigned so that they did not have as much contact with member* showed a statistically significant *decrease* in 2016 for Coast Guard women (7 percentage points). Data are not reportable for 2014 for Coast Guard men for all negative actions; therefore comparisons between survey years are not possible.

Percent of Coast Guard members who indicated experiencing a sex-based MEO violation and reported/discussed with a supervisor/leadership

Satisfaction With Reporting/Discussing the One Situation

For those active duty members who indicated experiencing a sex-based MEO violation and either reported the situation or discussed the situation with their supervisor or someone in the chain of command, they were asked to indicate their level of satisfaction with how the report and/or discussion was handled.

DoD

Of the 50% of DoD women who reported or discussed the sex-based MEO violation with a supervisor or someone in the chain of command, 21% indicated they were **satisfied** with the responses/actions taken by the personnel handling their situation, which showed a statistically

significant *decrease* of 11 percentage points from 2014 (Figure 142). A little less than half (47%) of women were *dissatisfied* with the responses/actions taken, which showed a statistically significant *increase* of 12 percentage points from 2014.

In 2016, women in the Army (24%) were *more likely* than women in the other Services to indicate they were *satisfied* with the responses/actions taken, whereas Navy women (18%) were *less likely*.

Compared to 2014, the percentage of women who indicated they were *satisfied* with the responses/actions taken by the personnel handling their situation showed a statistically significant *decrease* in 2016 for Navy (14 percentage points), Army, and Air Force women (9 percentage points for both). Those who indicated they were *dissatisfied* with responses/actions showed a statistically significant *increase* in 2016 for women in all Services compared to 2014: Navy (15 percentage points), Marine Corps (12 percentage points), Army (11 percentage points) and Air Force (9 percentage points).

Figure 142.

Satisfaction With How the Reporting/Discussion Was Handled for DoD Women (Q63)

As shown in Figure 143, of the 37% of DoD men who indicated they reported or discussed the sex-based MEO violation with a supervisor or someone in the chain of command, 21% indicated they were *satisfied*, whereas a little less than half (45%) indicated they were *dissatisfied* with the response/actions taken by the personnel handling their situation. There were no significant differences among Services between 2014 and 2016 for DoD men on satisfaction with reporting/discussing the one situation.

Figure 143.***Satisfaction With How the Reporting/Discussion Was Handled for DoD Men (Q63)*****Coast Guard**

As shown in Figure 144, of the 28% of Coast Guard women and 34% Coast Guard of men who reported or discussed the sex-based MEO violation with a supervisor or someone in the chain of command, a little more than one-fifth (21%) of women and a little less than one-third (31%) of men indicated they were **satisfied** with the responses/actions taken by the personnel handling their situation. For women, this showed a statistically significant *decrease* from 2014 of 10 percentage points. Less than half (44%) of women and 41% of men indicated they were **dissatisfied** with the responses/actions taken by the personnel handling their situation (statistically unchanged for men and women compared to 2014).

Figure 144.***Satisfaction With How the Reporting/Discussion Was Handled for Coast Guard (Q63)***

Reasons for Not Reporting/Discussing the One Situation With Someone in the Chain of Command With the Expectation of Action

Active duty members who indicated they did not report or discuss their sex-based MEO violation with leadership with the expectation for action to be taken were asked to indicate all applicable reasons for deciding not to report or discuss the one situation.

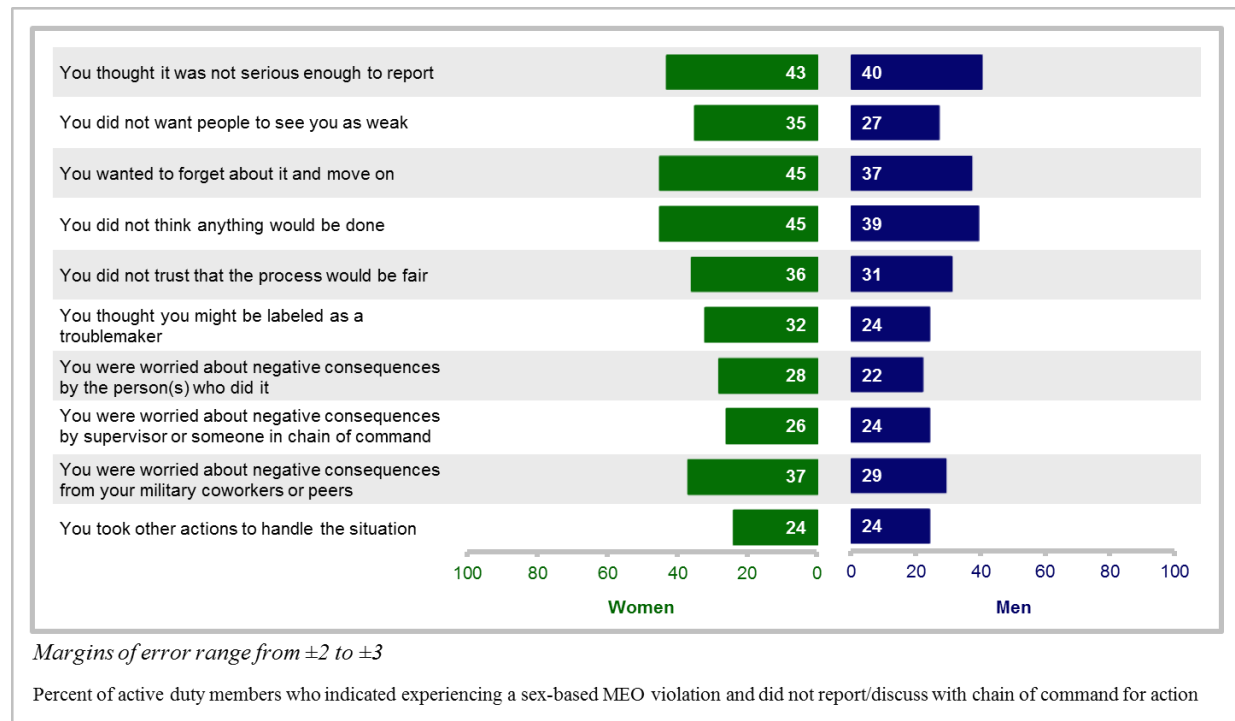

DoD

As shown in Figure 145, the top 10 reasons DoD women selected for not reporting/discussing the situation with someone in the chain of command with the expectation for action are shown and the top three reasons endorsed are described. A little less than half (45%) of women indicated they did not report because *they wanted to forget about it and move on*. Forty-five percent also indicated *they did not think anything would be done*, and 43% of women indicated *they thought it was not serious enough to report*.

For DoD men, 40% indicated they did not report because *they did not think it was serious enough to report*. Thirty-nine percent of men indicated *they did not think anything would be done*, and 37% indicated *they wanted to forget about it and move on*.

Figure 145.

Reasons for Not Reporting/Discussing the One Situation With Someone in the Chain of Command With the Expectation of Action for DoD (Q64)

As shown in Table 37, there is little difference between women in the Services on reasons for not reporting. However, Air Force women were *less likely* than women in the other Services to indicate *they wanted to forget and move on* (41%), *they thought it would hurt their performance evaluation* (19%), *they felt shamed or embarrassed* (18%), *they thought they would get in trouble for something they did* (7%), and *they were concerned for their physical safety* (1%). Air Force women (48%) were *more likely* than women in the other Services to indicate *it was not serious enough to report*, whereas Army women (38%) were *less likely*. Navy women (21%) were *more likely* than women in the other Services to indicate *the offensive behavior stopped on its own*, whereas Marine Corps women (14%) were *less likely*. Marine Corps women (42%) were *more likely* than women in the other Services to indicate *they did not want people to see them as weak*. Additionally, Army women were *more likely* than women in the other Services to indicate *it might hurt their career* (29%) and *they were worried about negative consequences by the person(s) who did it* (29%).

Reasons for Not Reporting/Discussing the One Situation With Someone in the Chain of Command With the Expectation of Action for DoD Women (Q64)

Percent of active duty women who indicated experiencing a sex-based MEO violation and did not report/discuss with chain of command for action

As shown in Table 38, men in the Army were *more likely* than men in the other Services to indicate they did not report/discuss the situation with the chain of command with expectation for action because *they thought they would be labeled as a troublemaker* (28%), *they were worried about negative consequences from the chain of command* (28%), and *they were worried about negative consequences from the person(s) who did it* (26%), but were *less likely* to indicate *they thought it was not serious enough to report* (35%). Navy men were *less likely* than men in the other Services to indicate *they thought they would be labeled as a troublemaker* (21%) and *they felt shamed or embarrassed* (11%). Marine Corps men (20%) were *less likely* than men in the other Services to indicate *they were worried about negative consequences by their supervisor or someone in their chain of command*. Additionally, Air Force men (33%) were *more likely* than

men in the other Services to indicate *they were worried about negative consequences from their peers*, whereas Marine Corps men were *less likely* (23%). Air Force men (1%) were *less likely* than men in the other Services to indicate *they were concerned for their physical safety*.

Chapter 8: Training on Topics Related to Sexual Assault and Sexual Harassment

Mr. Michael Siebel and Ms. Amanda Grifka

Introduction

This chapter provides information on sexual assault and sexual harassment training—the percentage of active duty members who had training in the past 12 months, information on various aspects of training, effectiveness of training, and awareness of resources for prevention of and response to sexual assault.

Results are reported for 2016 and trend comparisons to the 2014 *RMWS* are provided where data are available.

Training on Topics Related to Sexual Assault

DoD

As shown in Figure 146, the vast majority of DoD women (96%) received [training on topics related to sexual assault](#) in the past 12 months, which compared to 2014, showed a statistically significant *decrease* of 1 percentage point. In 2016, Navy women (97%) were *more likely* than women in the other Services to indicate receiving [sexual assault training](#), whereas Army women (95%) were *less likely*. Compared to 2014, the percentage of women who indicated receiving [sexual assault training](#) showed a statistically significant *decrease* in 2016 for Air Force (3 percentage points) and Army women (2 percentage points).

Figure 146.

Training During the Last 12 Months on Topics Related to Sexual Assault for DoD Women (Q199)

As shown in Figure 147, the vast majority of DoD men (97%) received [training on topics related to sexual assault](#) in the past 12 months, which compared to 2014, showed a statistically significant *decrease* of 1 percentage point. In 2016, Navy men (98%) were *more likely* than men in the other Services to indicate receiving [sexual assault training](#), whereas Army men (96%) were *less likely*. Compared to 2014, the percentage of men who indicated receiving [sexual assault training](#) showed a statistically significant *decrease* in 2016 for Navy and Air Force men (1 percentage point for both).

Figure 147.

Training During the Last 12 Months on Topics Related to Sexual Assault for DoD Men (Q199)

Coast Guard

The vast majority of Coast Guard members (96% of women and 98% of men) [received training on topics related to sexual assault](#) in the past 12 months (Figure 148). Compared to 2014, this showed a statistically significant *decrease* in 2016 for women (3 percentage points) and men (1 percentage point).

Figure 148.

Training During the Last 12 Months on Topics Related to Sexual Assault for Coast Guard (Q199)

Effectiveness/Relevance of Sexual Assault Training

Members who indicated they had training in the past 12 months on sexual assault were asked about the effectiveness/relevance of training topics related to sexual assault, such as training provides a good understanding of what actions are considered sexual assault and whether it explained how sexual assault is a mission readiness problem.

DoD

Across all topics of sexual assault training, the majority of DoD members (81%–95% of women, 87%–95% of men) indicated training was *effective* (Table 40 and Table 41). The percentage of women and men who rated the effectiveness of sexual assault training showed a statistically significant *increase* in 2016 on all metrics compared to 2014 (2–4 percentage points for women and 3–5 percentage points for men).

In general, women in the Navy and Air Force were *more likely* than women in the other Services to agree their Service's training was *effective*, and Army women were *less likely* (Table 40). For example, women in the Air Force (94%) were *more likely* than women in the other Services to indicate their Service's *training provides a good understanding of what actions are considered sexual assault*, whereas Army women (93%) were *less likely*. Air Force women (94%) were also *more likely* than women in the other Services to indicate *training teaches you to intervene when you witness a situation involving a fellow Service member*, whereas Army women (91%) were *less likely*. Air Force women were *more likely* than women in the other Services to indicate *training explains reporting options available if a sexual assault occurs* (95%) and *training identifies the point of contact for reporting* (96%). Army women were *less likely* than women in the other Services to indicate *training explains the reporting options* (94%) and *training identifies*

the point of contact for reporting (92%). Additionally, Air Force women were *more likely* than women in the other Services to indicate training *explains the resources available to victims* (94%) and *explains that, in addition to women, men can experience sexual assault* (95%), whereas Army women were *less likely* (*training explains the resources available to victims* [92%] and *training explains men can be victims too* [93%]).

Women in the Navy were *more likely* than women in the other Services to indicate their Service's training *teaches how to intervene when you witness a situation involving a fellow Service member* (94%), *teaches how to avoid situations that might increase the risk of sexual assault* (91%), and *teaches how to obtain medical care following a sexual assault* (91%). Additionally, women in the Navy and Marine Corps were *more likely* than women in the other Services to indicate training *teaches that the consumption of alcohol may increase the likelihood of sexual assault* (93% Navy and 94% Marine Corps) and *explains how sexual assault is a mission readiness problem* (91% Navy and 92% Marine Corps).

Compared to 2014, the percentage of women who indicated *topics were effective and/or relevant to sexual assault training* showed a statistically significant *increase* in general for Army (2–4 percentage points), Navy (3–6 percentage points), and Marine Corps women (5–6 percentage points).

As shown in Table 41, in 2016, there was little difference between Services for men on their views of effectiveness of sexual assault training, with the exceptions of Air Force and Army men. Air Force men generally were *more likely* than men in the other Services to indicate [sexual assault training was effective](#), and Army men were *less likely*. For example, men in the Air Force (94%) were *more likely* than men in the other Services to indicate their Service’s training [explains the role of the chain of command in handling sexual assault allegations](#), whereas Army men (93%) were *less likely*. Air Force men were *more likely* than men in the other Services to indicate training [explains the reporting options available if sexual assault occurs](#) (96%), whereas Army (95%) and Marine Corps men (94%) were *less likely*. Air Force men were *more likely*

than men in the other Services to indicate training [identifies the point of contact for reporting sexual assault](#) (96%), whereas Army and Marine Corps men (94% for both) were *less likely*. Additionally, Air Force men were *more likely* than men in the other Services to indicate [training explains resources available to victims](#) (95%) and [highlights engagement of chain of command outside of formal training](#) (91%), whereas Army men were *less likely* ([explains resources available](#) [94%] and [highlights chain of command outside of formal training](#) [90%]). Men in the Marine Corps (93%) and Navy (93%) were *more likely* than men in the other Services to indicate training [teaches how to avoid situations that might increase risk of being a victim of sexual assault](#), whereas Air Force men (91%) were *less likely*.

Compared to 2014, the percentage of men who [indicated topics were effective and/or relevant to sexual assault training](#) showed a statistically significant *increase* in 2016 for Army (2–4 percentage points), Navy (4–6 percentage points), Marine Corps (4–6 percentage points), and Air Force men (1–2 percentage points).

Coast Guard

As shown in Table 42, the majority of Coast Guard members (90%–97% of women, 94%–97% of men) indicated the majority of the aspects of training regarding sexual assault were *effective*. For example, 83% of Coast Guard women and 92% of men indicated *training effectively highlights engagement of chain of command outside of formal training*. Seventy-three percent of women and 85% of men indicated *training explains the use of social media and community to engage with SAPR prevention*.

Compared to 2014, the percentage of those who indicated they agree [training provides an effective and/or relevant understanding of sexual assault](#) showed a statistically significant increase on all topics in 2016 for Coast Guard women (4–8 percentage points) and Coast Guard men (4–7 percentage points).

Training on Topics Related to Sexual Harassment

DoD

As shown in Figure 149, the vast majority of DoD women (95%) received [training on topics related to sexual harassment](#) in the past 12 months, which compared to 2014, showed a statistically significant *decrease* in 2016 (2 percentage points).

Navy women (96%) were *more likely* than women in the other Services to receive [training on topics related to sexual harassment](#) in the past 12 months, whereas Air Force women (93%) were *less likely* (Figure 149). Compared to 2014, the percentage of women who indicated receiving [training on sexual harassment](#) in the past 12 months showed a statistically significant *decrease* in 2016 for Air Force (4 percentage points) and Army women (2 percentage points).

Figure 149.

Training During the Last 12 Months on Topics Related to Sexual Harassment for DoD Women (Q201)

As shown in Figure 150, the vast majority of DoD men (96%) received [training on topics related to sexual harassment](#) in the past 12 months, which compared to 2014, showed a statistically significant *decrease* in 2016 (2 percentage points).

Navy men (97%) were *more likely* than men in the other Services to receive [training on topics related to sexual harassment](#) in the past 12 months, whereas Air Force men (96%) were *less likely* (Figure 150). Compared to 2014, the percentage of men who indicated receiving [training on sexual harassment](#) in past 12 months showed a statistically significant *decrease* in 2016 for Air Force and Marine Corps men (2 percentage points for both), and Navy men (1 percentage point).

Figure 150.

Training During the Last 12 Months on Topics Related to Sexual Harassment for DoD Men (Q201)

Coast Guard

As shown in Figure 151, the vast majority of Coast Guard members (95% of women and 97% of men) received [training on topics related to sexual harassment](#) in the past 12 months. Compared to 2014, this showed a statistically significant *decrease* in 2016 for Coast Guard women (2 percentage points) but remained statistically unchanged since 2014 for Coast Guard men.

Figure 151.

Training During the Last 12 Months on Topics Related to Sexual Harassment for Coast Guard (Q201)

Effectiveness/Relevance of Sexual Harassment Training

Members who indicated receiving training in the past 12 months on sexual harassment were asked about a series of topics related to sexual harassment, such as whether training explained that, in addition to women, men can experience sexual harassment and whether it identified the point of contact for reporting sexual harassment complaints. Members were asked to indicate the level of effectiveness/relevance for each item.

DoD

The vast majority of DoD members (91%–94% of women, 94%–95% of men), indicated their Service’s sexual harassment training was *effective* in conveying relevant information (Figure 152). Ninety-two percent of women and 95% of men indicated their [training explains the role of the chain of command in handling sexual harassment complaints](#). Ninety-four percent of women and 95% of men indicated [training identifies the point of contact for reporting sexual harassment complaints](#), whereas 91% of women and 94% of men indicated [training explains sexual harassment is a mission readiness problem](#). Additionally, 94% of women and men indicated [training explains that, in addition to women, men can be experience sexual harassment](#).

Figure 152.***Effectiveness/Relevance of Sexual Harassment Training for DoD (Q202)***

As shown in Table 43, there is little difference between Services among DoD women on their views of *effectiveness* of sexual harassment training, with the exceptions of Air Force and Army. Air Force women (94%) were *more likely* than women in the other Services to indicate their Service's *sexual harassment training identifies the points of contact for reporting sexual harassment complaints*. Women in the Air Force (95%) were also *more likely* than women in the other Services to indicate their Service's *sexual harassment training explains that, in addition to women, men can experience sexual harassment*, whereas Army women (93%) were *less likely*.

Similar to DoD women, there is little difference between Services for DoD men on their views of the *effectiveness* of *sexual harassment training*, with the exception of the Air Force (Table 43). Air Force men were *more likely* than men in the other Services to indicate their Service's *sexual harassment training explains the role of the chain of command in handling sexual harassment complaints* (95%) and *identifies the points of contact for reporting sexual harassment* (96%).

Chapter 9: Military Workplace Climate

Mr. Hunter Peebles, Ms. Amanda Grifka, and Ms. Lisa Davis

Introduction

This chapter examines various topics related to the workplace climate within the military. One of the main topics covered within this section is bystander intervention—witnessing a problematic situation that potentially involved sexual assault, the actions taken in response to observing the harmful situation, and what contributed to the decision to intervene. Other important topics on military workplace climate that are discussed below include positive actions and/or behaviors demonstrated by military members within the workplace, female coworkers in the workplace, and the use of social media in the workplace.

Results are reported for 2016 and trend comparisons to the *2014 RMWS* are provided where data are available.

Likelihood to Encourage a Member to Come Forward to Report Sexual Assault and/or Sexual Harassment

Active duty members were asked how likely they would be to encourage a member to come forward to report sexual assault and/or sexual harassment, to tell a military supervisor about sexual harassment if it happened to them, and to report a sexual assault if it happened to them.

DoD

As shown in Table 44 and Table 45, the majority of DoD women and men indicated they would encourage a member to come forward to report sexual assault and/or sexual harassment.

Overall, women in the Army were *more likely* than women in the other Services to indicate that they would be more likely to encourage a member to come forward to report, whereas Marine Corps women were *less likely* (Table 44). For example, Army women were *more likely* than women in the other Services to indicate they would be likely to [encourage someone who has experienced sexual assault to report it](#) (95%), to [encourage someone who has experienced sexual harassment to tell a military supervisor](#) (91%), to [tell a military supervisor about sexual harassment if it happened to them](#) (79%), and to [report a sexual assault if it happened to them](#) (87%). Moreover, Marine Corps women were *less likely* than women in the other Services to indicate they would be likely to [encourage someone who has experienced sexual assault to report it](#) (91%), to [tell a military supervisor about sexual harassment if it happened to them](#) (71%), and to [report a sexual assault if it happened to them](#) (78%).

Additionally, women in the Air Force (97%) were *more likely* than women in the other Services to indicate they would be likely to [encourage someone who has experienced sexual assault to seek counseling](#), while Marine Corps women (94%) were *less likely*. Air Force women were *less likely* than women in the other Services to indicate they would be likely to [encourage someone to tell a military supervisor](#) (87%) and to [tell a military supervisor if it happened to them](#) (75%).

Navy women were *less likely* than women in the other Services to indicate they would be likely to encourage someone who has experienced sexual assault to report it (93%) and to encourage someone who has experienced sexual harassment to tell a military supervisor (87%).

As shown in Table 44, compared to 2014, the percentage of women who indicated they would be likely to encourage someone who has experienced sexual assault to seek counseling and encourage someone who has experienced sexual assault to report it showed statistically significant *increases* in 2016 for Army (3 percentage points for each) and Navy women (3 percentage points and 4 percentage points, respectively). The percentage of women who indicated they would be likely to tell a military supervisor about sexual harassment if it happened to them showed a statistically significant *increase* in 2016 for Army (5 percentage points), Navy (5 percentage points), and Air Force women (2 percentage points). The percentage of women who indicated they would report a sexual assault if it happened to them showed a statistically significant *increase* in 2016 for Army (5 percentage points), Navy (3 percentage points), and Air Force women (2 percentage points).

Percent of active duty women

Overall, men in the Army and Air Force were *more likely* than men in the other Services to indicate they would be likely to encourage a member to come forward to report, while men in the Marine Corps were *less likely* (Table 45). For example, Army (95%) and Air Force men (96%) were *more likely* than men in the other Services to indicate they would be likely to **encourage someone who has experienced sexual assault to report it**, whereas men in the Marine Corps (92%) were *less likely*. Similarly, men in the Army (91%) and Air Force (90%) were *more likely* than men in the other Services to indicate they would be likely to **report a sexual assault if it happened to them**, whereas Navy (89%) and Marine Corps (86%) were *less likely*. Additionally, men in the Army (93%) were *more likely* than men in the other Services to indicate they would be likely to **encourage someone who has experienced sexual harassment to tell a military supervisor**, whereas men in the Marine Corps (90%) and Air Force (92%) were *less likely*. Men in the Army (87%) were *more likely* than men in the other Services to indicate they would be likely to **tell a military supervisor about sexual harassment if it happened to them**, whereas Navy (84%) and Marine Corps men (82%) were *less likely*. Air Force men (97%) were *more likely*

than men in the other Services to indicate they would be likely to [encourage someone who has experienced sexual assault to seek counseling](#), whereas Marine Corps men (93%) were *less likely*.

Compared to 2014, the percentage of men who indicated they would be likely to [encourage someone who has experienced sexual assault to seek counseling](#) showed a statistically significant *increase* in 2016 for Army (4 percentage points) and Air Force men (2 percentage points; Table 45). The percentage of men who indicated they would be likely to [encourage someone who has experienced sexual assault to report it](#) showed a statistically significant *increase* in 2016 for Army (2 percentage points) and Air Force men (1 percentage point), as well as their likelihood to [report sexual assault if it happened to them](#) (Army men by 4 percentage points and Air Force men by 1 percentage point). The percentage of men who indicated they would be likely to [tell a military supervisor about sexual harassment if it happened to them](#) showed a statistically significant *increase* in 2016 for Army men (3 percentage points).

Percent of active duty men

Coast Guard

As shown in Table 46, the vast majority of Coast Guard members were likely to indicate they would [encourage someone who has experienced sexual assault to seek counseling](#) (98% of women and 97% of men), [report a sexual assault if it happened to them](#) (94% of women and 97% of men), and [encourage someone who has experienced sexual harassment to tell a military supervisor](#) (91% of women and 95% of men). The majority of members (80% of women and 90% of men) were likely to indicate they would [tell a military supervisor if sexual harassment happened to them](#) and [report sexual assault if it happened to them](#) (87% of women and 93% of men).

Compared to 2014, the percentage of those who indicated they would be likely to [encourage someone who has experienced sexual assault to seek counseling](#) showed a statistically significant *increase* in 2016 for Coast Guard women and men (1 percentage point for each). The percentage who indicated they would be likely to [report a sexual assault if it happened to them](#) showed a statistically significant *increase* in 2016 for women (3 percentage points) and men (2 percentage points). Additionally, the percentage of those who indicated they would be likely to [tell a military supervisor about sexual harassment if it happened to them](#) showed a statistically significant *increase* in 2016 for Coast Guard women (3 percentage points).

Bystander Intervention

Bystander intervention involves members maintaining vigilance and acting to prevent sexual assault. It focuses on perpetrators of sexual assault and on changing social norms around appropriate sexual behavior in a social setting. To gauge the extent of bystander intervention, members were asked whether they had observed a situation they believed was, or could have led to, sexual assault and, if so, whether and how they had intervened, and what led them to decide to intervene.

Observed a Potential Sexual Assault Situation

DoD

As shown in Figure 154, 8% of DoD women indicated they [observed a situation in the past 12 months they believed was, or could have led to, a sexual assault](#). As shown in Table 47, compared to 2014, this showed a statistically significant *decrease* in 2016 for DoD women (3

percentage points). Of this 8% of DoD women who observed a potential sexual assault situation, the vast majority (92%) indicated [they took action](#).

Figure 154.

Observed a Potential Sexual Assault Situation and Whether Action Was Taken for DoD Women (Q178–Q179)

As shown in Figure 155, 4% of DoD men indicated they [observed a situation in the past 12 months they believed was, or could have led to, a sexual assault](#). As shown in Table 47, compared to 2014, this showed a statistically significant *decrease* in 2016 for DoD men (2 percentage points). Of this 4% of DoD men who observed a potential sexual assault situation, the majority (89%) indicated [they took action](#).

Figure 155.

Observed a Potential Sexual Assault Situation and Whether Action Was Taken for DoD Men (Q178–Q179)

Table 47 shows in 2016, women in the Marine Corps (12%) and Navy (10%) were *more likely* than women in the other Services to indicate [observing a potential sexual assault situation in the past 12 months](#), whereas Air Force women (6%) were *less likely*. Compared to 2014, the percentage of women who indicated they [observed a situation they believed was, or could have led to, a sexual assault](#) showed a statistically significant *decrease* in 2016 for Army (4 percentage points), Navy (3 percentage points), and Air Force women (2 percentage points). There were no significant differences within Services for women who indicated they [took action in response to observing a potential sexual assault](#) in 2016. Compared to 2014, the percentage of women who indicated they [took action in response to observing a potential sexual assault](#) showed a statistically significant *decrease* in 2016 for Air Force women (3 percentage points).

Similar observations were found among DoD men in 2016 (Table 47). Men in the Navy and Marine Corps (5% for both) were *more likely* than men in the other Services to [observe a potential sexual assault situation](#), whereas Air Force men (3%) were *less likely*. Compared to 2014, the percentage of men who indicated they [observed a situation they believed was, or could have led to, a sexual assault](#) showed a statistically significant *decrease* in 2016 for Navy (3 percentage points) and Air Force men (1 percentage point). There were no significant differences within Services from 2014 to 2016 for men who indicated they took action.

Related to bystander intervention, members were also asked to what extent they agreed it is their duty to confront a fellow Service member from doing something potentially harmful to themselves or others in social situations. In 2016, 93% of women indicated that [in a social setting, it is their duty to confront a fellow Service member from doing something potentially harmful to themselves or others](#), which showed a statistically significant *increase* in 2016 by 1 percentage point. Women in the Air Force (95%) were *more likely* than women in the other Services to indicate that [in a social setting, it is their duty to confront a fellow Service member](#)

from doing something potentially harmful to themselves or others, whereas Army women (92%) were *less likely*. Compared to 2014, this showed a statistically significant *increase* in 2016 for Marine Corps (5 percentage points) and Navy women (3 percentage points).

For DoD men, 94% of men indicated that in a social setting, it is their duty to confront a fellow Service member from doing something potentially harmful to themselves or others, which showed a statistically significant *increase* in 2016 by 3 percentage points. Men in the Air Force (95%) were *more likely* than men in the other Services to indicate that in a social setting, it is their duty to confront a fellow Service member from doing something potentially harmful to themselves or others, whereas Army and Marine Corps men (both 93%) were *less likely*. Compared to 2014, this showed a statistically significant *increase* in 2016 for Army men (4 percentage points).

Percent of all active duty members

Coast Guard

For Coast Guard women, 5% indicated they [observed a situation in the past 12 months they believed was, or could have led to, a sexual assault](#) (Figure 156). Compared to 2014, this showed a statistically significant *decrease* for Coast Guard women in 2016 (3 percentage points). Of this 5% of Coast Guard women who observed a potential sexual assault situation, the vast majority (94%) indicated [they took action](#) (statistically unchanged since 2014; Table 48).

Figure 156.

Observed a Potential Sexual Assault Situation and Whether Action Was Taken for Coast Guard Women (Q178–Q179)

As shown in Figure 157, 2% of Coast Guard men indicated they [observed a situation in the past 12 months they believed was, or could have led to, a sexual assault](#). Of this 2%, the vast majority (92%) indicated [they took action](#). There were no statistically significant differences between 2014 and 2016 for Coast Guard men for observing and reacting to a potential sexual assault situation (Table 48).

Figure 157.

Observed a Potential Sexual Assault Situation and Whether Action Was Taken for Coast Guard Men (Q178–Q179)

Related to bystander intervention, members were also asked to what extent they agreed it is their duty to confront a fellow Service member from doing something potentially harmful to themselves or others in social situations. As shown in Table 48, 96% of Coast Guard women indicated *in a social setting, it is their duty to confront a fellow Service member from doing something potentially harmful to themselves or others*, which showed a statistically significant *increase* in 2016 by 5 percentage points. Additionally, 96% of Coast Guard men indicated *in a social setting, it is their duty to confront a fellow Service member from doing something potentially harmful to themselves or others*, which showed a statistically significant *increase* in 2016 by 3 percentage points.

Percent of all Coast Guard members

Actions Taken in Response to Observing Potential Sexual Assault Situation***DoD***

The top three actions taken in response to observing a potential sexual assault situation are the same for DoD women and DoD men (Figure 158). More than a quarter (26%) of women and 20% of men [asked the person who appeared to be at risk if they needed help](#). A little less than one-quarter (23%) of women and men [stepped in and separated the people involved](#). Additionally, 13% of women and 17% of men indicated they [confronted the person who appeared to be causing the situation](#).

Figure 158.***Actions Taken in Response to Observing Potential Sexual Assault Situation for DoD (Q179)***

There is little difference among women in the Services, with the exception of Army women (4%) who were *less likely* than women in the other Services to [ask others to step in as a group and diffuse the situation](#) and Marine Corps women (19%) who were *less likely* to [ask the person who appeared to be at risk if they needed help](#) (Table 49). There is also little difference between women in 2014 and 2016 regarding actions taken. The exception is the percentage of women who indicated they [created a distraction to cause one or more of the people to disengage from the situation](#), which showed a statistically significant *decrease* in 2016 for Air Force women (6 percentage points).

There is no difference among men in the Services on the likelihood to take certain actions (Table 49). However, compared to 2014, the percentage of Marine Corps men who indicated they [asked the person who appeared at risk if they needed help](#) and [created a distraction to cause one or more of the people to disengage from the situation](#) showed statistically significant *increases* in 2016 (13 percentage points and 14 percentage points, respectively). The percentage of men who [told someone in a position of authority about the situation](#) showed a statistically significant *increase* in 2016 for Navy men (5 percentage points).

Percent of active duty members who witnessed a situation believed to be, or could have led to, a sexual assault in the past 12 months

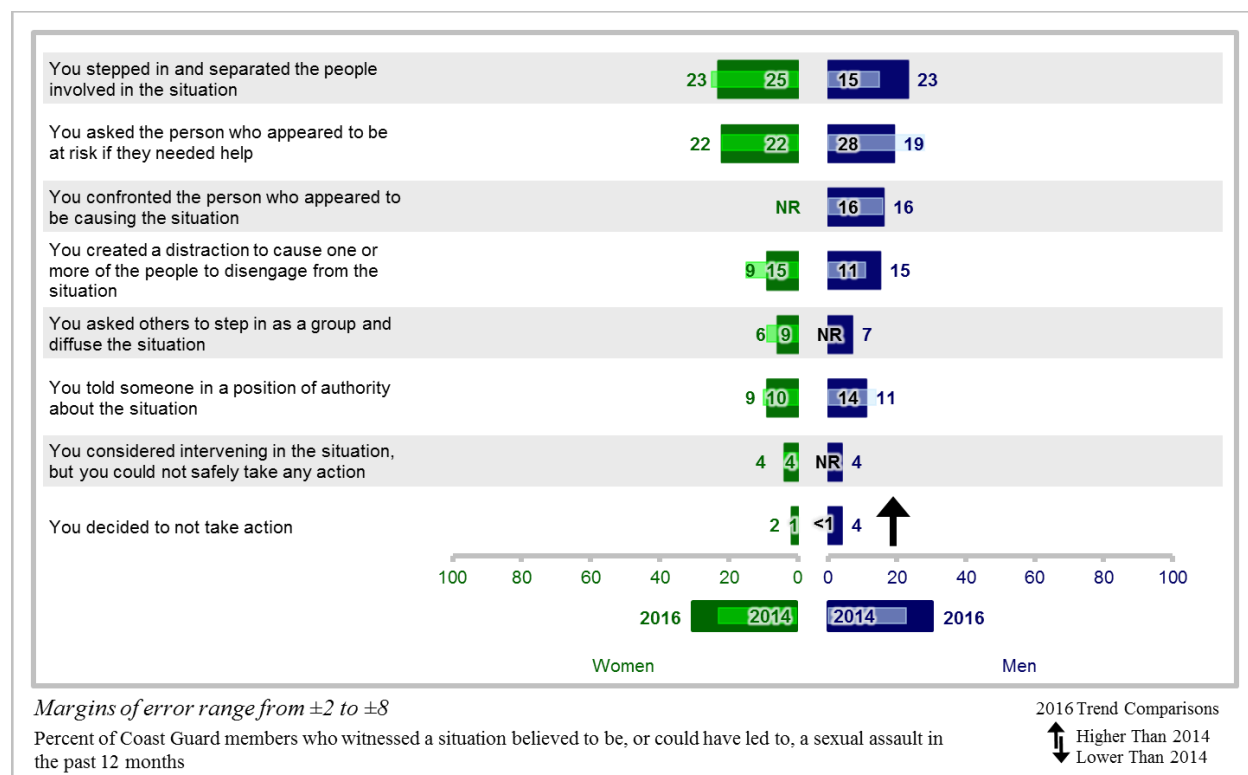

Coast Guard

Figure 159 shows the top actions taken in response to observing a potential sexual assault situation for Coast Guard women and men. Twenty-three percent of women and men **stepped in and separated the people involved**, whereas 22% of women and 19% of men **asked the person who appeared to be at risk if they needed help**. Additionally, 9% of Coast Guard women **created a distraction to cause one or more of the people to disengage from the situation** and 9% also **told someone in a position of authority**. Sixteen percent of men **confronted the person who appeared to be causing the situation** and 15% **created a distraction**.

Compared to 2014, the percentage of those who indicated they **decided to not take action** showed a statistically significant *increase* in 2016 for Coast Guard men (4 percentage points). There were no statistically significant differences between 2014 and 2016 for Coast Guard women (Figure 159).

Figure 159.

Actions Taken in Response to Observing Potential Sexual Assault Situation for Coast Guard (Q179)

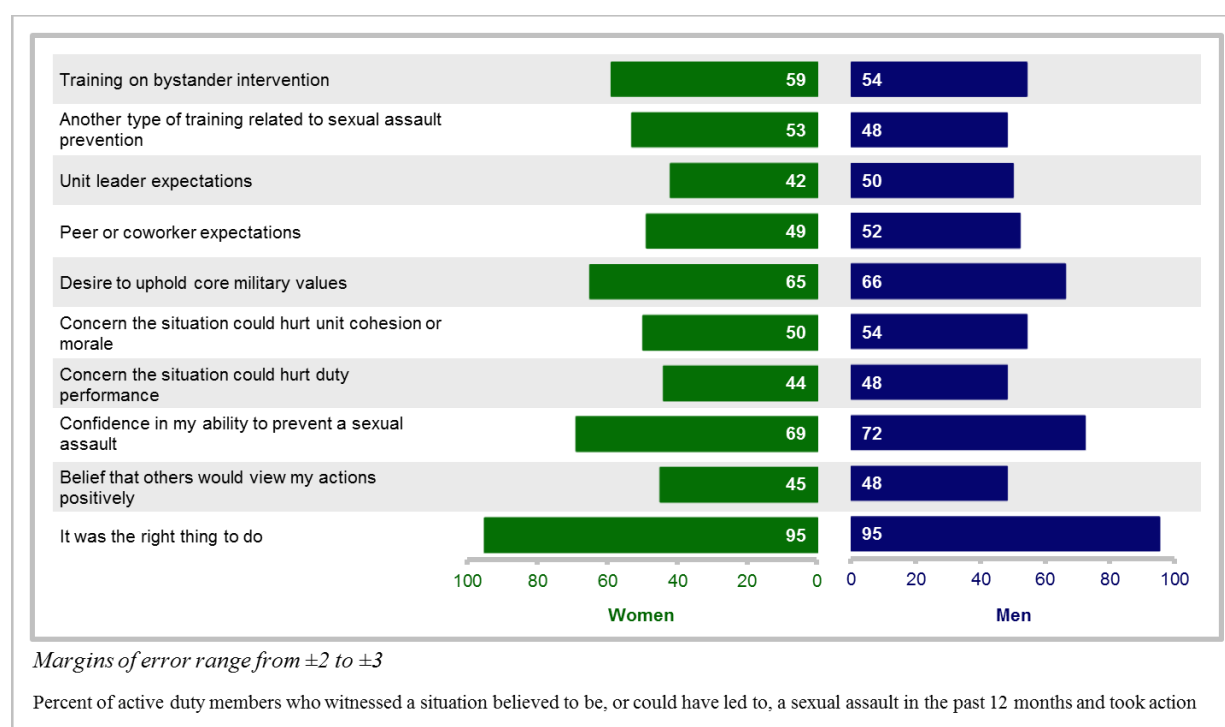

Reasons for Intervening

DoD

As shown in Figure 160, the most selected contribution to the decision to intervene in a situation that was believed to be a sexual assault for DoD women and men (both 95%) was that *it was the right thing to do*. *Confidence in their ability to prevent a sexual assault* was the second highest selected contribution by 69% of women and 72% of men. Additionally, 65% of women and 66% of men indicated a *desire to uphold core military values* was what led to the decision to intervene.

Figure 160.
Reasons for Intervening for DoD (Q180)

In general, Air Force women were *less likely* than women in the other Services to indicate nearly all of the contributions on their decision intervene (Table 50). For example, women in the Navy were *more likely* than women in the other Services to indicate *training on bystander intervention* (69%) and *another type of training related to sexual assault prevention* (58%) contributed to their decision to intervene, whereas Air Force women (*training on bystander intervention* [50%] and *another type of training* [46%]) were *less likely*. Army women were *more likely* than women in the other Services to indicate a *desire to uphold core military values* (71%), *concern the situation could hurt unit cohesion or morale* (54%), and *concern the situation could hurt duty performance* (49%), whereas Air Force women were *less likely* (*desire to uphold core military values* [57%], *harm to unit cohesion/morale* [40%], and *harm to duty performance* [36%]).

Table 50.
Reasons for Intervening for DoD (Q180)

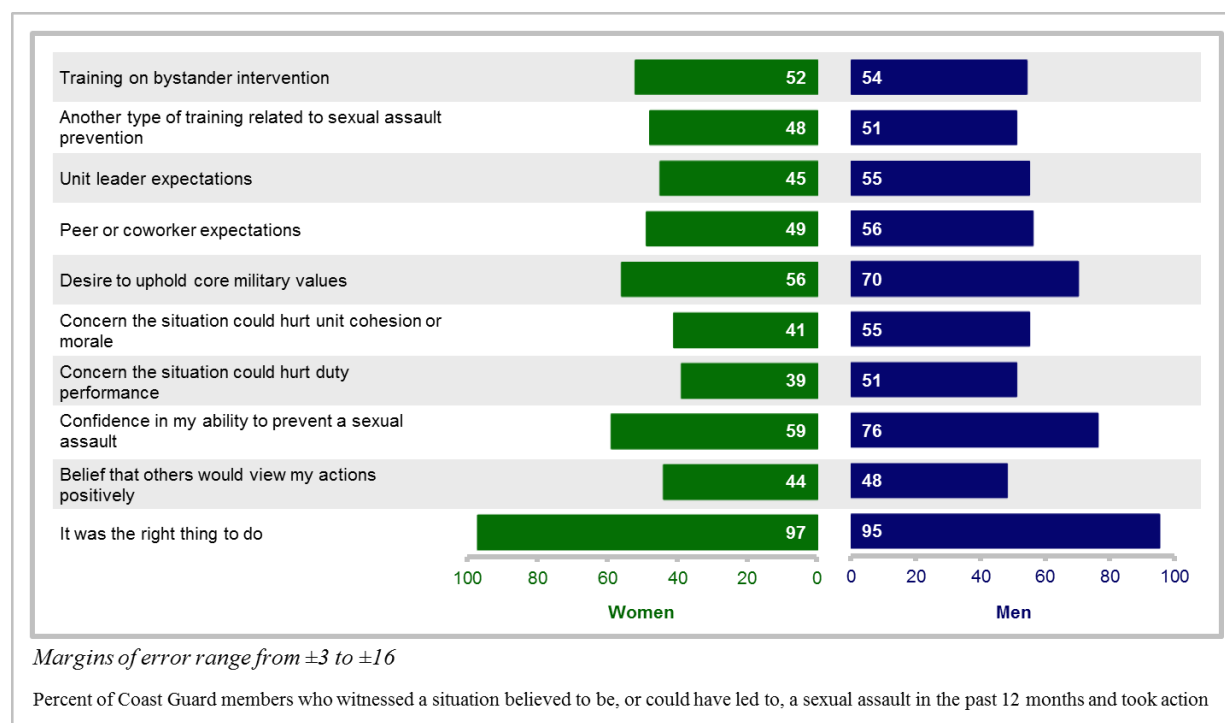

Percent of active duty members who witnessed a situation believed to be, or could have led to, a sexual assault in the past 12 months and took action

Coast Guard

As shown in Figure 161, the vast majority of Coast Guard members (97% of women and 95% of men) intervened because *it was the right thing to do*. More than half (59%) of women indicated they intervened because of *confidence in their ability to prevent a sexual assault*, a *desire to uphold core military values* (56%), and *training on bystander intervention* (52%).

Coast Guard men were motivated to intervene by *confidence in their ability to prevent a sexual assault* (76%), a *desire to uphold core military values* (70%), *peer or coworker expectations* (56%), *unit leader expectations* (55%), and *concern that the situation could hurt unit cohesion or morale* (55%; Figure 161).

Figure 161.
Reasons for Intervening for Coast Guard (Q180)⁴⁶

Positive Workplace Actions/Behaviors Demonstrated by Military Members

Active duty members were asked a series of questions regarding how well military members in specific paygrades encouraged, promoted, and/or demonstrated positive military workplace actions or behaviors regarding sexual assault and sexual harassment in the past 12 months. The

⁴⁶ It should be noted that “some other reason” is not represented in Figure 161, but was selected by 55% of Coast Guard women and 38% of men.

questions asked are provided in Figure 162. Members were asked to select “Not applicable” if they did not have interactions with members of a specific paygrade.

The first part of this section provides an overview of DoD members’ perceptions regarding their leadership. Following this overview, each action/behavior is discussed in further detail for within Service comparisons.

Figure 162.

Questions on Positive Workplace Actions/Behaviors Demonstrated by Military Members

Positive Workplace Actions/Behaviors Demonstrated by Military Members	
Q181	Made it Clear That Sexual Assault Has No Place in the Military
Q182	Promoted a Unit Climate Based on Mutual Respect and Trust
Q183	Led by Example by Refraining From Sexist Comments and Behaviors
Q184	Recognized and Immediately Corrected Incidents of Sexual Harassment
Q185	Created Environment Where Victims Feel Comfortable Reporting
Q186	Encouraged Bystander Intervention
Q187	Publicized Sexual Assault Report Resources
Q188	Encouraged Victims to Report Sexual Assault

DoD

Figure 163 and Figure 164 show how well active duty members believe members across ranks demonstrate a [positive workplace through their actions and behaviors](#). In general, according to both DoD women and men, as a member’s paygrade increases, DoD women’s and men’s views of a positive workplace increase as well.

Figure 163 shows the “well/very well” responses for DoD women by question number and leadership ranking (question response options). The lowest paygrade—[E1–E3](#)—is represented by the dark blue line falling below all other paygrade lines (hence, having the lowest scores overall for encouraging, promoting, and/or demonstrating positive workplace actions or behaviors). Moreover, the two highest paygrades—[O4–O6](#) and [O7 and above](#)—are the top most lines, meaning DoD women indicated members in these paygrade encouraged, promoted, and/or demonstrated positive workplace actions better overall than members in the lower ranks.

Examining the responses across behaviors (question numbers), DoD women overall tended to indicate lower responses to Q184 than the other questions. This suggests DoD women did not indicate military members across the paygrades [recognized and immediately corrected incidents of sexual harassment, such as inappropriate jokes, comments, and behaviors](#) as highly as they indicated military members’ demonstrate other actions or behaviors. Furthermore, 54% of women indicated members ranked [E1–E3 recognized and immediately corrected incidents of](#)

sexual harassment well, and 75% of women indicated the same for members ranked **O7 and above** (Table 51). When looking at an item that falls in the middle, such as whether members across paygrades encouraged bystander intervention to assist others in situations at risk for sexual assault or other harmful behaviors (Q186), 67% of women indicated members ranked **E1–E3** do this well and 81% of women indicated members ranked **O7 and above** do this well. This suggests recognizing and immediately correcting incidents of sexual harassment is viewed less favorable across paygrades among DoD women.

Figure 163.

How Well Members Across Ranks Encouraged, Promoted, and/or Demonstrated Positive Workplace Actions or Behaviors for DoD Women (Q181–Q188)

DoD men (Figure 164) overall indicated all paygrades as more likely to encourage, promote and/or demonstrate positive workplace behaviors or actions more so than DoD women (Figure 163). This is shown by the general shift in the lines (paygrades) being higher for men, indicating a more positive perception than women.

Similar to DoD women, for men, as paygrade increases, so does the overall perception of members encouraging, promoting, and/or demonstrating positive workplace actions or behaviors. The item that asks if military members recognized and immediately corrected incidents of sexual harassment, such as inappropriate jokes, comments, and behaviors tends to be less favorable than the other items. Another interesting finding among DoD men is the dispersion of Q181 among paygrades (response options). As shown in Table 51, for made it clear that sexual assault has no place in the military, 70% of men indicated members within **E1–E3** do this well, while 92% indicated members ranked **O7 and above** do this well.

DoD Within Service Comparisons on How Well Members Across Ranks Promoted a Positive Military Workplace

The second part of this section discusses within Service comparisons on the perceptions of whether members encouraged, promoted, and/or demonstrated positive military workplace actions or behaviors in the past 12 months regarding sexual assault and sexual harassment by each individual question.

Made it Clear That Sexual Assault Has No Place in the Military (Q181)

As shown in Table 52, women in the Air Force were *more likely* than women in the other Services to indicate members in **all paygrades** (except **O1–O3**) made it clear that sexual assault has no place in the military, whereas Army women were *less likely* (except **E7–E9** and **O1–O3**). Marine Corps women were *more likely* than women in the other Services to indicate members in paygrades **E4** (71%), **E6** (85%), **O1–O3** (86%), and **W1–W5** (84%) made it clear that sexual assault has no place in the military. Conversely, Navy women were *less likely* than women in the other Services to indicate members in paygrades **E4** (66%), **E5** (76%), **E7–E9** (85%), **O1–O3** (81%), and **O7 and above** (85%) made it clear that sexual assault has no place in the military.

Men in the Air Force were *more likely* than men in the other Services to indicate members in **all paygrades** (except members ranked **O1–O3**, which were *less likely*) made it clear that sexual assault has no place in the military (Table 52). Army men were *less likely* than men in the other Services (except members ranked **E7–E9** and **O1–O3**, for which Army men were *more likely*) to indicate members **across paygrades** made it clear that sexual assault has no place in the military. Navy men were also *less likely* than men in the other Services to indicate members across **all paygrades** made it clear that sexual assault has no place in the military (except members ranked **E1–E3** and **W1–W5**). Men in the Marine Corps were *more likely* than men in the other Services to indicate members across **all paygrades** made it clear that sexual assault has no place in the military (except members ranked **E7–E9**, **O4–O6**, and **O7 and above**).

How Well Members Across Ranks Promoted a Unit Climate Based on Mutual Respect and Trust (Q182)

As shown in Table 53, Air Force women were *more likely* than women in the other Services to indicate members across **all paygrades** promoted a unit climate based on mutual respect and trust, whereas Army and Navy women were *less likely* (except for members within **W1–W5**). Marine Corps women were *less likely* than women in the other Services to indicate members in paygrades **E1–E3** (62%), **E4** (67%), **E5** (73%), **O4–O6**, and **O7 and above** (79% for both) promoted a unit climate based on mutual respect and trust.

Air Force men were *more likely* than men in the other Services to indicate members across **all paygrades** promoted a unit climate based on mutual respect and trust (Table 53). Marine Corps men were also *more likely* than men in the other Services to indicate members ranked **E1–E3** (77%), **E4** (83%), **E5** (86%), and **W1–W5** (88%) promoted a unit climate based on mutual respect and trust and were *less likely* to indicate members ranked **O4–O6** promoted this behavior.

Additionally, Army and Navy men were *less likely* than men in the other Services to indicate *all paygrades* (except members ranked E7–E9, O1–O3 and W1–W5 for Army, and O4–O6 and W1–W5 for Navy) promoted a unit climate based on mutual respect and trust.

How Well Members Led by Example by Refraining From Sexist Comments and Behaviors (Q183)

As shown in Table 54, women in the Air Force were *more likely* than women in the other Services to indicate members across *all paygrades* led by example by refraining from sexist comments and behaviors, whereas Army and Navy women were *less likely* (for all paygrades except E5 and W1–W5 for Army and W1–W5 for Navy). Marine Corps women were *less likely* than women in the other Services to indicate members ranked E1–E3 (57%), E4 (61%), E5 (65%), E6 (73%), and O4–O6 (82%) led by example by refraining from sexist comments and behaviors.

Similar results are shown for DoD men (Table 54). Air Force men were *more likely* than men in the other Services to indicate members across *all paygrades* led by example by refraining from sexist comments and behaviors, whereas Army and Navy men were *less likely* (for *all paygrades* except *O1–O3* and *W1–W5* for Army and *W1–W5* for Navy). Men in the Marine Corps were *more likely* than men in the other Services to indicate members in paygrades *E4* (77%) and *W1–W5* (89%) led by example by refraining from sexist comments and behaviors and *less likely* to indicate members ranked *O4–O6* demonstrated this behavior.

How Well Members Across Ranks Created an Environment Where Victims Would Feel Comfortable Reporting Sexual Harassment or Sexual Assault (Q185)

Table 56 shows women in the Air Force were *more likely* than women in the other Services to indicate members across *all paygrades* (except *W1–W5*) created an environment where victims would feel comfortable reporting sexual harassment or sexual assault, whereas Navy women were *less likely* to indicate members across *all paygrades* (except *W1–W5*) demonstrated this behavior. Army women were *less likely* than women in the other Services to indicate this behavior was demonstrated by members in the following ranks: *E4* (65%), *E5* (71%), *O4–O6*, and *O7 and above* (78% for both). Marine Corps women were *less likely* than women in the other Services to indicate members ranked *E1–E3* (59%), *E4* (63%), and *E5* (69%) created an environment where victims would feel comfortable reporting sexual harassment or sexual assault.

As shown in Table 56, Air Force men were *more likely* than men in the other Services to indicate members across *all paygrades* created an environment where victims would feel comfortable reporting sexual harassment or sexual assault, whereas Army and Navy men were *less likely* (except for members ranked *E7–E9* and *O1–O3* for Army and *E6*, *O4–O6*, *O7 and above*, and *W1–W5* for Navy). Marine Corps men were *more likely* to indicate members ranked *E4* (83%) and *W1–W5* (89%) created an environment where victims would feel comfortable reporting sexual harassment or sexual assault.

How Well Members Across Ranks Encouraged Bystander Intervention to Assist Others in Situations at Risk for Sexual Assault or Other Harmful Behaviors (Q186)

Table 57 shows Air Force women were *more likely* than women in the other Services to indicate members across **all paygrades** encouraged bystander intervention to assist others in situations at risk for sexual assault or other harmful behaviors, whereas Army women were *less likely*. Navy women were *more likely* than women in the other Services to indicate members ranked **E6** (81%), **O1–O3** (81%), **O4–O6** (84%), and **W1–W5** (80%) encouraged bystander intervention to assist others in situations at risk for sexual assault or other harmful behaviors.

Men in the Air Force were *more likely* than men in the other Services to indicate members across **all paygrades** (except **O1–O3**) encouraged bystander intervention to assist others in situations at risk for sexual assault or other harmful behaviors, whereas Army men were *less likely* (Table 57). Men in the Navy were *more likely* than men in the other Services to indicate members ranked **E6** (90%), **E7–E9** (91%), **O4–O6** (92%), and **W1–W5** (89%) encouraged bystander

intervention to assist others in situations at risk for sexual assault or other harmful behaviors. Marine Corps men were *more likely* than men in the other Services to indicate members in paygrades E1–E3 (79%), E4 (84%), E5 (88%), O1–O3 (90%), and W1–W5 (89%) encouraged bystander intervention to assist others in situations at risk for sexual assault or other harmful behaviors.

How Well Members Across Ranks Publicized Sexual Assault Report Resources (Q187)

As shown in Table 58, Air Force women were *more likely* than women in the other Services to indicate members across *all paygrades* (except E6) publicized sexual assault report resources, whereas Army women were *less likely* (except O1–O3). Marine Corps women were *more likely* than women in the other Services to indicate members ranked E4 (69%), E5 (77%), E6 (82%), O1–O3 (82%), and W1–W5 (81%) publicized sexual assault report resources. Additionally,

Marine Corps and Air Force men were *more likely* than men in the other Services to indicate members across **all paygrades** (except **E7–E9** for Marine Corps and **O1–O3** for Air Force) publicize sexual assault report resources, whereas Army men were *less likely* (except **O1–O3**; Table 58). Navy men were *less likely* than men in the other Services to indicate members in paygrades **E7–E9** (89%), **O1–O3** (86%), and **O7 and above** (87%) publicized sexual assault report resources.

How Well Members Across Ranks Encouraged Victims to Report Sexual Assault (Q188)

As shown in Table 59, Air Force women were *more likely* than women in the other Services to indicate members across **all paygrades** (except **O1–O3**) encouraged victims to report sexual assault, whereas Navy women were *less likely* (except members ranked **W1–W5**). Marine Corps women were *more likely* than women in the other Services to indicate members ranked **W1–W5** (80%) encouraged victims to report sexual assault. Women in the Army were *less likely* than women in the other Services to indicate members ranked **O4–O6** and **O7 and above** (80% for both) encouraged victims to report sexual assault.

Air Force men were *more likely* than men in the other Services to indicate members across **all paygrades** (except **O1–O3**) encouraged victims to report sexual assault (Table 59). Marine Corps men were also *more likely* than men in the other Services to indicate members in paygrades **E4** (83%), **E5** (87%), **E6** (90%), and **W1–W5** (89%) encourage victims to report sexual assault. Army men were *less likely* than men in the other Services to indicate members in **all paygrades**—except members ranked **O1–O3** (which was *more likely*), **E6**, and **E7–E9**—encouraged victims to report sexual assault. Additionally, men in the Navy were *less likely* than men in the other Services to indicate **all paygrades**, except members ranked **E6**, **O4–O6**, and **W1–W5**, encouraged victims to report sexual assault.

Coast Guard

Figure 165 and Figure 166 show how well Coast Guard members across ranks demonstrated a positive workplace through their actions and behaviors. As shown in Figure 165, for Coast Guard women, as paygrade increases, members' views of a positive workplace increase as well. Overall, Q184 and Q181 had the lowest responses from Coast Guard women who indicated members do these behaviors/actions *well*. In other words, compared to the other behavior/action questions, those specified in Q184 and Q181 showed lower responses for members demonstrating these behaviors *well/very well*. Specifically, for Q184, *recognized and immediately corrected incidents of sexual harassment, such as inappropriate jokes, comments, and behaviors*, 56% of women indicated members ranked **E1–E3** do this *well*, while 76% indicated members **O7 and above** do this *well*. Similarly, for Q181, *made it clear that sexual assault has no place in the military*, 59% of women indicated members ranked **E1–E3** do this *well*, but as paygrade increases, the higher ranking members tend to be viewed as demonstrating

this behavior *well*. This suggests members within the lower ranks do not demonstrate this behavior as *well/very well* as members in higher ranks.

Figure 165.

How Well Members Across Ranks Encouraged, Promoted, and/or Demonstrated Positive Workplace Actions or Behaviors for Coast Guard Women (Q181–Q188)

As shown in Figure 166, Coast Guard men tend to endorse all paygrades as higher in terms of encouraging, promoting, and/or demonstrating positive workplace behaviors or actions compared to the results of Coast Guard women (Figure 165). The action/behavior ranking lowest (Q187) shows 69% of Coast Guard men indicated members ranked **E1–E3 publicize sexual assault report resources, such as SARC information, UVA/VA information, awareness posters, sexual assault hotline number** *well*.

Figure 166.

How Well Members Across Ranks Encouraged, Promoted, and/or Demonstrated Positive Workplace Actions or Behaviors for Coast Guard Men (Q181–Q188)

Female Coworkers in the Workplace

Over the last three years, the military has opened approximately 110,000 positions to women and have independently studied, developed, and verified operationally relevant standards for them. Anyone who can meet these operationally relevant gender neutral standards, regardless of gender, should be allowed to serve in that position. To assess this change in law, active duty members were asked a series of questions regarding female coworkers in their workplace, including if women are uncommon in the workplace, if their unit/career field has recently been opened up to women, and the perceived impact of opening the unit/career field to women on workplace climate.

Female Coworkers Uncommon in the Workplace

DoD

As shown in Figure 167, 52% of DoD women and 55% of DoD men indicated they currently work in an environment where female coworkers are uncommon (less than 25% of their military coworkers).

Figure 167.***Female Coworkers Uncommon in the Workplace for DoD (Q190)***

Women in the Marine Corps (70%) were *more likely* than women in the other Services to indicate working in an environment where **female coworkers are uncommon**, whereas Air Force women (48%) were *less likely*.

Men in the Marine Corps (69%) and Air Force (64%) were *more likely* than men in the other Services to indicate working in an environment where **female coworkers are uncommon**, whereas Army (50%) and Navy (45%) men were *less likely*.

Coast Guard

A little less than two-thirds of Coast Guard women (61%) and Coast Guard men (60%) indicated they work in an environment where **female coworkers are uncommon** (Figure 168).

Figure 168.***Female Coworkers Uncommon in the Workplace for Coast Guard (Q190)***

Current Unit/Career Field Recently Opened to Women and the Impact of Opening Unit/Career Field to Women on Climate

DoD

A little less than one-fifth (17%) of DoD women indicated they **currently serve in a unit/career field recently opened to women** in the past 12 months (Figure 169). Of this 17%, 10% indicated the climate in their unit is **better than before** being opened to women and 2% indicated it is **worse than before**. More than half (55%) indicated they have **no basis to judge**, and 33% indicated the climate is **about the same**.

Figure 169.

Current Unit or Career Field Recently Opened to Women in the Past 12 Months and the Result of Recent Opening for DoD Women (Q191–Q192)

A little less than one-third (31%) of DoD men indicated they **currently serve in a unit/career field recently opened to women** in the past 12 months (Figure 170). Of this 31%, 8% indicated the climate in their unit is **better than before** being opened to women and 8% indicated it is **worse than before**. Forty-eight percent indicated they have **no basis to judge**, and 36% indicated the climate is **about the same**.

Figure 170.

Current Unit or Career Field Recently Opened to Women in the Past 12 Months and the Result of Recent Opening for DoD Men (Q191–Q192)

As shown in Table 60, women in the Army (3%) were *more likely* than women in the other Services to indicate the climate is *worse than before*, whereas Air Force women (1%) were *less likely*. Air Force women (27%) were also *less likely* than women in the other Services to indicate the climate is *about the same* as before opening the unit/career field to women.

Navy men (10%) were *more likely* than men in the other Services to indicate their climate is *better than before*, whereas Marine Corps men (3%) were *less likely* (Table 60). Men in the Navy (38%) were also *more likely* than men in the other Services to indicate the climate is *about the same*, whereas Marine Corps men (34%) were *less likely*. Additionally, men in the Marine Corps (12%) and Army (9%) were *more likely* than men in the other Services to indicate the climate is *worse than before*, whereas Navy (7%) and Air Force (2%) were *less likely*.

Coast Guard

As shown in Figure 171, 18% of Coast Guard women indicated they **currently serve in a unit/career field recently opened to women** in the past 12 months. Of this 18%, more than half (55%) indicated they have **no basis to judge** how this opening has affected the climate in their unit. A little less than one-fifth (29%) indicated the climate is **about the same**, whereas 15% indicated it is **better than before** being opened to women and 1% indicated the **climate is worse**.

Figure 171.

Current Unit or Career Field Recently Opened to Women in the Past 12 Months and the Result of Recent Opening for Coast Guard Women (Q191–Q192)

For Coast Guard men, more than one-quarter (29%) indicated they [currently serve in a unit/career field recently opened to women](#) (Figure 172). Of this 29%, a little less than half (48%) indicated they have [no basis to judge](#) how this opening has affected the climate in their unit. More than one-third (39%) indicated the climate is [about the same](#). Ten percent indicated it is [better than before](#) being opened to women, whereas 3% indicated the [climate is worse](#).

Figure 172.

Current Unit or Career Field Recently Opened to Women in the Past 12 Months and the Result of Recent Opening for Coast Guard Men (Q191–Q192)

Social Media Use in the Workplace

The last section in this chapter addresses the issue of social media use within the military workplace. Members were asked a series of questions about whether a social media policy exists within their workplace, whether members comply to the policy, awareness of Service members misusing social media, and if so, whether the member notified anyone about such misuse.

Military Workplace Has Formal Policy on Use of Social Media and Compliance With Social Media Policy

DoD

As shown in Figure 173, 55% of DoD women indicated their workplace has a formal policy explaining appropriate and inappropriate use of social media sites. Of this 55%, the majority (78%) indicated members of their work group generally comply with the policy.

Figure 173.

Workplace Has Formal Policy on Use of Social Media Sites and Compliance With Social Media Policy for DoD Women (Q207–Q208)

Two-thirds (66%) of DoD men indicated their workplace has a formal policy explaining appropriate and inappropriate use of social media sites (Figure 174). Of this 66%, the majority (84%) indicated members of their work group generally comply with the policy.

Figure 174.

Workplace Has Formal Policy on Use of Social Media Sites and Compliance With Social Media Policy for DoD Men (Q207–Q208)

Table 61 shows women in the Marine Corps (60%) and Navy (59%) were *more likely* than women in the other Services to indicate their **workplace has a formal policy** explaining appropriate social media use, whereas Air Force women (50%) were *less likely*. However, Air Force women (82%) were *more likely* than women in the other Services to indicate **members generally comply with the policy**, whereas women in the Navy (76%) were *less likely*.

Similar to women, men in the Navy and Marine Corps (both 69%) were *more likely* than men in the other Services to indicate their **workplace has a formal policy** explaining appropriate social media use, whereas men in the Army (65%) and Air Force (61%) were *less likely* (Table 61). Marine Corps and Air Force men (86%) were *more likely* than men in the other Services to indicate **members generally comply with the policy**, whereas men in the Army (84%) and Navy (82%) were *less likely*.

Percent of all active duty members (Q207)

Percent of active duty members whose workplace has formal policy on social media site use (Q208)

Coast Guard

As shown in Figure 175, a little more than half (52%) of Coast Guard women indicated their workplace has a formal policy explaining appropriate and inappropriate uses of social media sites. Of this 52%, the majority (81%) indicated members generally comply with the policy.

Figure 175.

Workplace Has Formal Policy on Use of Social Media Sites and Compliance With Social Media Policy for Coast Guard Women (Q207–Q208)

A little less than two-thirds (63%) of Coast Guard men indicated their workplace has a formal policy for social media use (Figure 176). Of this 63%, the majority (84%) indicated members generally comply with the policy.

Figure 176.

Workplace Has Formal Policy on Use of Social Media Sites and Compliance With Social Media Policy for Coast Guard Men (Q207–Q208)

Awareness of Abuse of Social Media by Service Member(s)

Members were asked whether they were aware of any Service member misusing social media sites to ridicule, abuse, stalk, or harm another military member, their chain of command, their Service, and/or the DoD as a whole. If they were aware of misuse, they were asked to indicate if they notified anyone of this misuse.

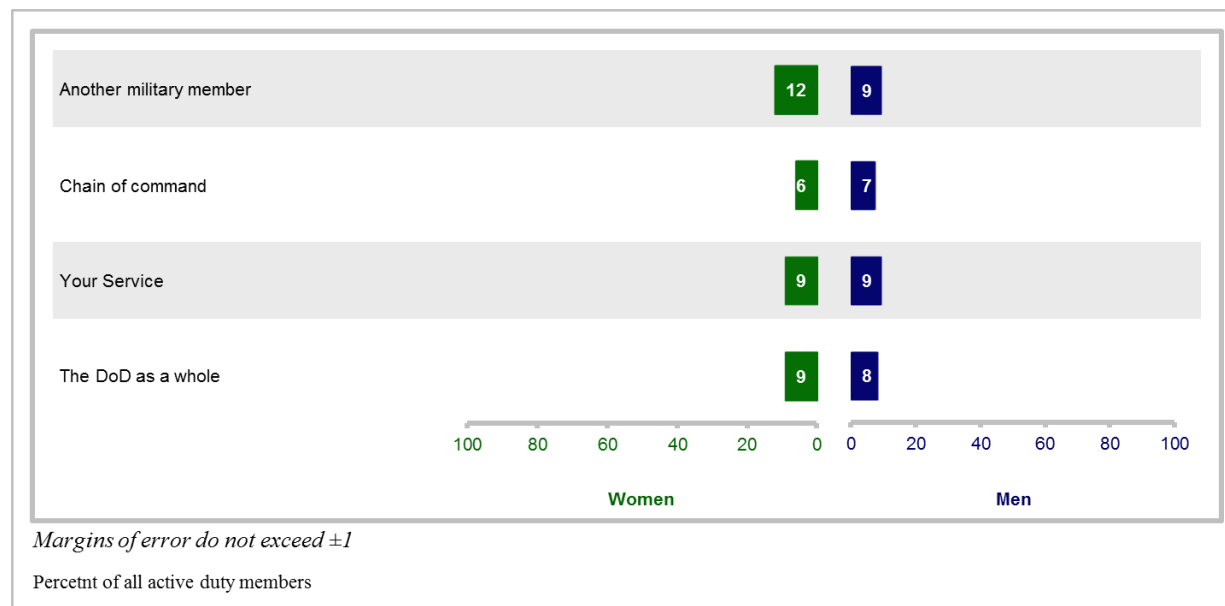

DoD

Twelve percent of DoD women indicated they were aware of a Service member misusing social media to ridicule, abuse, stalk, or harm another military member (Figure 177). Nine percent indicated social media was used to harm their Service as well as used to harm the DoD as a whole. Fewer (6%) indicated social media was used to harm their chain of command.

For DoD men, 9% indicated they are aware of a Service member misusing social media to ridicule, abuse, stalk, or harm another military member and indicated the same for their Service. Fewer (8%) indicated social media was used to harm the DoD as a whole and 7% indicated it was used to harm their chain of command.

Figure 177.

Awareness of Service Member Misuse of Social Media Sites to Ridicule, Abuse, Stalk, or Harm for DoD (Q205)

As shown in Table 62, women in the Navy and Marine Corps were *more likely* than women in the other Services to indicate **all four populations** were ridiculed, abused, stalked, or harmed by a Service member's social media misuse, whereas Air Force women were *less likely*.

Similarly, men in the Navy and Marine Corps were *more likely* than men in the other Services to indicate **all four populations** were ridiculed, abused, stalked, or harmed by a Service member's social media misuse, whereas Air Force men were *less likely* (Table 62). Additionally, Army men were *more likely* than men in the other Services to indicate a Service member misused social media to ridicule, abuse, stalk, or harm **their chain of command**.

Percent of all active duty members

Coast Guard

As shown in Figure 178, 7% of Coast Guard women and 5% of Coast Guard men indicated they are aware of a Service member misusing social media to ridicule, abuse, stalk, or harm **another military member**. Six percent of women and 5% of men indicated it was used to harm **their Service**, and 5% of women and men indicated it was used to harm the **DoD as a whole**. Fewer (3% of women and 4% of men) indicated social media was used to harm their **chain of command**.

Figure 178.

Awareness of Service Member Misuse of Social Media Sites to Ridicule, Abuse, Stalk, or Harm for Coast Guard (Q205)

Made Appropriate Notifications of Social Media Misuse

DoD

As shown in Figure 179, of those who indicated they were aware of a Service member misusing social media, more than half of members (56% of women and 57% of men) notified a [military peer](#) of the misuse of social media. Thirty-nine percent of women and 44% of men notified a [member in their chain of command](#). More than one-quarter (29%) of women and 34% of men notified [another leader outside of their chain of command](#), whereas 31% of women and 37% of men notified [some other person or office](#). Additionally, 17% of women and 26% of men notified [their Service's Inspector General office](#).

Figure 179.***Made Appropriate Notifications on Social Media Misuse for DoD (Q206)***

Women in the Army were *more likely* than women in the other Services to indicate notifying social media misuse to [some other person or office](#) (34%), [another leader outside of their chain of command](#) (32%), and [their Service's Inspector General Office](#) (20%; Table 63). Women in the Navy (28%) were *less likely* than women in the other Services to notify [some other person or office](#), and Air Force women (25%) were *less likely* than women in the other Services to notify [another leader outside of their chain of command](#).

As shown in Table 63, Army men were *more likely* than men in the other Services to indicate they notified [another leader outside of their chain of command](#) (37%) and [their Service's Inspector General Office](#) (28%) of social media misuse. Marine Corps men were *more likely* than men in the other Services to indicate they notified [some other person or office](#) (40%) and [their Service's Inspector General Office](#) (29%). Navy men were *less likely* than men in the other Services to indicate they notified [some other person or office](#) (33%), [another leader outside of their chain of command](#) (31%), and [their Service's Inspector General Office](#) (23%). Men in the Air Force were *less likely* than men in the other Services to indicate they notified a [military peer](#) (54%), a [member of their chain of command](#) (42%), and [another leader outside of their chain of command](#) (30%).

Chapter 10: Perceptions of Unwanted Gender-Related Behaviors in the Military

Mr. William Xav Klauberg, Ms. Lisa Davis, Ms. Amanda Grifka, and Mr. Michael Siebel

Introduction

This chapter examines perceptions of sexual assault and sexual harassment in the military and the military's willingness to act to prevent these behaviors. Service members were asked about sexual assault and sexual harassment as problems in the military over the past two years as well as their perceptions of the military's response to sexual assault and sexual harassment.

Results are reported for 2016 and trend comparisons to the 2014 RMWS are provided where data are available.

Perception of Sexual Assault in the Military

The first section of this chapter examines the perceptions of sexual assault in the military. Members were asked if sexual assault in the military has become more or less of a problem over the past two years as well as how much they agree or disagree with various statements about their trust in the military's response to sexual assault.

Perception of Sexual Assault in the Military Over Past Two Years

DoD

When members were asked to assess how sexual assault in the military compares to two years ago, a little less than one-quarter (23%) of DoD women *agreed* sexual assault is **less of a problem** in the military today (Figure 181). Compared to 2014, this showed a statistically significant *increase* in 2016 for women (7 percentage points). A little more than one-tenth (12%) of women indicated sexual assault is **more of a problem** today. Compared to 2014, this showed a statistically significant *decrease* for women (16 percentage points).

As shown in Figure 181, Air Force women (25%) were *more likely* than women in the other Services to indicate sexual assault in the military is **less of a problem** today than two years ago, whereas Marine Corps (21%) were *less likely*. Women in the Marine Corps (15%) and Army (14%) were *more likely* than women in the other Services to indicate sexual assault in the military is **more of a problem** today.

Compared to 2014, perceptions about sexual assault in the military have *improved* for DoD women (Figure 181). The percentage of women who indicated sexual assault in the military is **less of a problem** today than two years ago showed a statistically significant *increase* for women across all DoD Services in 2016 (10 percentage points for Air Force, 8 percentage points for Army, 6 percentage points for Marine Corps, and 5 percentage points for Navy). Conversely, the percentage of women indicating sexual assault in the military is **more of a problem** today than two years ago showed a statistically significant *decrease* in 2016 for women across all Services (18 percentage points for Army and Air Force, 13 percentage points for Marine Corps, and 12 percentage points for Navy).

Figure 181.***Perception of Sexual Assault in the Military Over Past Two Years for DoD Women (Q210)***

When members were asked to assess how sexual assault in the military compares to two years ago, more than one-third (39%) of DoD men *agreed* sexual assault is *less of a problem* in the military today (Figure 182). Compared to 2014, this showed a statistically significant *increase* in 2016 for men (8 percentage points). Fewer (8%) men indicated sexual assault is *more of a problem* today, which compared to 2014, showed a statistically significant *decrease* for men (11 percentage points).

As shown in Figure 182, Air Force (41%) and Navy men (40%) were *more likely* than men in the other Services to indicate sexual assault in the military is *less of a problem* today than two years ago, whereas Marine Corps men (35%) were *less likely*. Men in the Army (9%) and Marine Corps (8%) were *more likely* than men in the other Services to indicate sexual assault in the military is *more of a problem* today than two years ago.

Compared to 2014, perceptions about sexual assault in the military have also *improved* for DoD men. The percentage of men indicating sexual assault in the military is *less of a problem* today than two years ago showed a statistically significant *increase* in 2016 for Air Force (11 percentage points), Army (10 percentage points), and Navy men (6 percentage points). Conversely, the percentage of men indicating sexual assault in the military is *more of a problem* today than two years ago showed a statistically significant *decrease* in 2016 for men in all Services (12 percentage points for Air Force and Army, 11 percentage points for Marine Corps, and 10 percentage points for Navy).

Figure 182.***Perception of Sexual Assault in the Military Over Past Two Years for DoD Men (Q210)*****Coast Guard**

As shown in Figure 183, more than one-quarter (27%) of Coast Guard women and 42% of Coast Guard men indicated sexual assault is **less of a problem** today than two years ago. Compared to 2014, this showed a statistically significant *increase* for women (7 percentage points) and men (10 percentage points). Six percent of women and 4% of men indicated sexual assault in the military is **more of a problem** today than two years ago, which showed a statistically significant *decrease* for both women and men in 2016 (12 percentage points for both).

Figure 183.***Perception of Sexual Assault in the Military Over Past Two Years for Coast Guard (Q210)*****Perception of Military's Response to Sexual Assault**

Service members were asked to indicate their level of agreement regarding trust in the military system if they were to experience a sexual assault. Members were asked about trusting the military system to protect their privacy, ensure their safety, and to treat them with dignity and respect should they experience a sexual assault while in the military.

DoD

As shown in Figure 184, a little less than two-thirds (62%) of DoD women and the majority (78%) of DoD men indicated if they were sexually assaulted, they would [trust the military system to protect their privacy](#), which showed a statistically significant *increase* compared to 2014 for both women and men (8 percentage points for women and 7 percentage points for men). Conversely, a little less than one-fifth (17%) of women and 8% of men indicated if they were sexually assaulted, they would *not* [trust the military system to protect their privacy](#), which showed a statistically significant *decrease* compared to 2014 for both women and men (2 percentage points for women and 3 percentage points for men).

A little more than two-thirds (69%) of women and the majority (84%) of men indicated they would [trust the military system to ensure their safety](#) if they were sexually assaulted, which showed a statistically significant *increase* compared to 2014 (6 percentage points for women and 5 percentage points for men). Conversely, a little more than one-tenth (11%) of women and 5% of men indicated they would *not* [trust the military system to ensure their safety](#) if they were sexually assaulted, which showed a statistically significant *decrease* compared to 2014 for men (1 percentage point).

Lastly, two-thirds (66%) of women and the majority (82%) of men indicated if they were sexually assaulted, they would [trust the military system to treat them with dignity and respect](#). Compared to 2014, this showed a statistically significant *increase* (6 percentage points for women and men). Conversely, 13% of women and 5% of men indicated if they were sexually assaulted, they would *not* [trust the military system to treat them with dignity and respect](#). Compared to 2014, this showed a statistically significant *decrease* in 2016 for men (2 percentage points).

Figure 184.

Trust in the Military System's Response to Sexual Assault for DoD (Q203b-d)

As shown in Table 64, in 2016, Air Force women were overall *more likely* than women in the other Services to [trust in the military system to protect their privacy](#) (65%), [ensure their safety](#) (73%), and [treat them with dignity and respect](#) (69%) if they were to experience sexual assault. Navy women were *less likely* than women in the other Services to [trust the military system to protect their privacy](#) (59%), and Army (68%) and Navy women (67%) were *less likely* than women in the other Services to [trust the military system to ensure their safety](#). Lastly, both Marine Corps and Navy women (both 63%) were *less likely* than women in the other Services to indicate they would [trust the military system to treat them with dignity and respect](#) if they were to experience sexual assault.

In 2016, Navy women were overall *more likely* than women in the other Services to *not* [trust the military system to protect their privacy](#) (19%), [ensure their safety](#) (13%), or [treat them with dignity and respect](#) (15%) if they were to experience sexual assault (Table 64). In addition, Army women (12%) were *more likely* than women in the other Services to *not* [trust the military system to ensure their safety](#). Marine Corps women (15%) were *more likely* than women in the other Services to *not* [trust the military system to treat them with dignity and respect](#).

Compared to 2014, DoD women from all Services showed a statistically significant *increase* when indicating they [trust in the military system to protect their privacy](#) if they were to experience a sexual assault (10 percentage points for Army, 8 percentage points for Marine Corps, 7 percentage points for Navy, and 5 percentage points for Air Force; Table 64). A statistically significant *increase* was also found for women in the Army, Navy, and Air Force women indicating they [trust the military system to ensure their safety](#) (8 percentage points for Army, 6 percentage points for Navy, and 3 percentage points for Air Force) and [treat them with dignity and respect](#) when compared to 2014 (10 percentage points higher for Army, 6 percentage points higher for Navy, and 4 percentage points higher for Air Force).

For indicating disagreement with trust in the military, Army women showed a statistically significant *decrease* when indicating their level of *distrust* in the military system if they were to experience a sexual assault: [distrust in the military system to protect their privacy](#) (4 percentage points), [distrust in the military system to ensure their safety](#) (3 percentage points), and [distrust in the military system to treat them with dignity and respect](#) (2 percentage points).

As shown in Table 64, Marine Corps (80%) and Air Force men (79%) were *more likely* than men in the other Services to indicate they would [trust the military system to protect their privacy](#) if they were to be sexually assaulted, whereas Navy men (76%) were *less likely*. Conversely, Navy men were *more likely* than men in the other Services to *not* [trust in the military system to protect their privacy](#) (9%). Similarly, Marine Corps and Air Force men (both 85%) were *more likely* than men in the other Services to [trust the military system to ensure their safety](#), whereas Army and Navy men (both 83%) were *less likely*. Conversely, Army men were *more likely* than men in the other Services to indicate they would *not* [trust the military system to ensure their safety](#) (5%). Finally, Air Force men (83%) were *more likely* than men in the other Services to [trust the military system to treat them with dignity and respect](#), whereas Navy men (80%) were *less likely*. Conversely, Navy men were *more likely* than men in the other Services to *not* [trust the military system to treat them with dignity and respect](#) (6%) if they were to experience sexual assault.

Compared to 2014, as displayed in Table 64, percentages for men from all Services showed a statistically significant *increase* when indicating they [trust the military system to protect their privacy](#) (10 percentage points for Army, 8 percentage points for Marine Corps, 6 percentage points for Navy, and 4 percentage points for Air Force). A statistically significant *increase* in responses from men in the Army and Air Force was also found when indicating they would [trust the military system to ensure their safety](#) if they were to experience sexual assault compared to responses from 2014 (9 percentage points for Army and 2 percentage points for Air Force). Men in the Army, Marine Corps, and Air Force showed a statistically significant *increase* for indicating they [trust the military system to treat them with dignity and respect](#) compared to responses from 2014 (9 percentage points for Army, 6 percentage points for Marine Corps, and 3 percentage points for Air Force). For indicating disagreement with trust in the military, Marine Corps men showed a statistically significant *decrease* when indicating their level of *distrust* in the military system if they were to experience a sexual assault: [distrust in the military system to protect their privacy](#) (6 percentage points), [distrust in the military system to ensure their safety](#) (3 percentage points), and [distrust in the military system to treat them with dignity and respect](#) (4 percentage points).

Percent of all active duty members

Coast Guard

As shown in Figure 185, more than half (60%) of Coast Guard women and the majority (78%) of Coast Guard men indicated if they were sexually assaulted, they would [trust the military system](#)

to protect their privacy. Compared to 2014, this showed a statistically significant *increase* (11 percentage points for women and 10 percentage points for men). Conversely, a little less than one-fifth (18%) of women and 7% of men indicated if they were sexually assaulted, they would *not trust the military system to protect their privacy*, which showed a statistically significant *decrease* compared to 2014 for both women and men (4 percentage points for women and men).

The majority (70%) of women and men (85%) indicated they would *trust the military system to ensure their safety*, which showed a statistically significant *increase* compared to 2014 (6 percentage points for both women and men). Conversely, a little more than one-tenth (11%) of women and 4% of men indicate they would *not trust the military system to ensure their safety*, which remained statistically unchanged in 2016 compared to 2014.

A little less than two-thirds (64%) of women and the majority (82%) of men indicated they would *trust the military system to treat them with dignity and respect* if they were to experience sexual assault, which showed a statistically significant *increase* from 2014 of 10 percentage points for women and 6 percentage points for men. Conversely, 13% of women and 5% of men indicate they would *not trust the military system to treat them with dignity and respect*, which remained statistically unchanged in 2016 compared to 2014.

Figure 185.

Trust in the Military System's Response to Sexual Assault for Coast Guard (Q203b–d)

Perceptions of Sexual Harassment in the Military

The second section of this chapter examines the perceptions of sexual harassment in the military. Service members were asked about sexual harassment in the military today compared to two years ago, their perception of how their supervisor or chain of command would react to instances of sexual harassment, and to what extent they would be willing to act to prevent sexual harassment.

Perception of Sexual Harassment in the Military Over Past Two Years

DoD

As shown in Figure 186, 25% of DoD women indicated sexual harassment in the military is *less of a problem* today compared to two years ago, which showed a statistically significant *increase* compared to 2014 (8 percentage points). Conversely, a little more than one-tenth (12%) of women indicated sexual harassment in the military is *more of a problem* today than two years ago. Compared to 2014, this showed a significant *decrease* for women (16 percentage points).

Figure 186 shows in 2016, Air Force women (27%) were *more likely* than women in the other Services to indicate sexual harassment in the military is *less of a problem* today than two years ago, whereas Army (24%) and Marine Corps (20%) women were *less likely*. Women in the Marine Corps (15%) and Army (14%) were *more likely* than women in the other Services to indicate sexual harassment in the military is *more of a problem* today than two years ago.

Compared to 2014, the percentage of women who indicated sexual harassment in the military is *less of a problem* today than two years ago showed a statistically significant *increase* in responses for women in the Air Force, Army, and Navy in 2016 (9 percentage points for Air Force, 8 percentage points for Army, and 7 percentage points for Navy). Responses from women in all Services indicating sexual harassment in the military is *more of a problem* today showed a statistically significant *decrease* compared to responses in 2014 (18 percentage points for Army and Air Force, 16 percentage points for Marine Corps, and 13 percentage points for Navy).

Figure 186.

Perception of Sexual Harassment in the Military Over Past Two Years for DoD Women (Q209)

As shown in Figure 187, 40% of DoD men indicated sexual harassment in the military is *less of a problem* today compared to two years ago, which showed a statistically significant *increase* compared to 2014 (9 percentage points for men). Conversely, 8% of men indicated sexual harassment in the military is *more of a problem* today than two years ago. Compared to 2014, this showed a significant *decrease* for men (12 percentage points).

In 2016, Air Force men (43%) were *more likely* than men in the other Services to indicate sexual harassment in the military is *less of a problem* today than two years ago, whereas men in the Army (39%) and Marine Corps (36%) were *less likely*. Army (10%) and Marine Corps (9%) men were *more likely* than men in the other Services to indicate sexual harassment is *more of a problem* today compared to two years ago.

Compared to 2014, the percentage of men who indicated sexual harassment in the military is *less of a problem* today than two years ago showed a statistically significant *increase* for Air Force (12 percentage points), Army (10 percentage points), and Navy men (7 percentage points). Responses from men across all Services indicating sexual harassment in the military is *more of a problem* today than two years ago showed a statistically significant *decrease* compared to responses in 2014 (13 percentage points for Army, 12 percentage points for Navy and Air Force, and 10 percentage points for Marine Corps).

Figure 187.

Perception of Sexual Harassment in the Military Over Past Two Years for DoD Men (Q209)

Coast Guard

As shown in Figure 188, a little less than one-third (30%) of Coast Guard women and less than half (44%) of Coast Guard men indicated sexual harassment is *less of a problem* today than it was two years ago. Fewer (6%) women and men (4%) indicated sexual harassment in the military is *more of a problem* today than compared to two years ago.

Compared to 2014, responses from Coast Guard women and men indicating sexual harassment is *less of a problem* today than two years ago showed a statistically significant *increase* (11 percentage points for men and 9 percentage points for women). A statistically significant *decrease* was also found for Coast Guard women and men indicating sexual harassment is *more of a problem* today compared to 2014 (13 percentage points for women and 12 percentage points for men).

Figure 188.

Perception of Sexual Harassment in the Military Over Past Two Years for Coast Guard (Q209)

Perception of Leadership's Response to Sexual Harassment

DoD

As shown in Figure 189, a little less than one-third (30%) of DoD women indicated they *would not be treated differently by their supervisor or chain of command if they reported they were sexually harassed*, whereas a little less than half (47%) indicated they *would be treated differently*. Air Force women (33%) were *more likely* than women in the other Services to indicate they *disagree* that *their supervisor or chain of command would treat them differently if they reported being sexually harassed*, whereas Navy (29%) and Marine Corps (25%) women were *less likely* to *disagree*. Marine Corps (52%) and Navy women (48%) were *more likely* than women in the other Services to *agree* they *would be treated differently by leadership*.

More than one third (34%) of DoD men indicated *their supervisor or chain of command would not treat them differently if they reported that they were sexually harassed*, whereas 48% indicated they *would be treated differently* (Figure 189). Army and Air Force men (35% for both) were *more likely* than men in the other Services to indicate they *disagree leadership would treat them differently if they reported being sexually harassed*, whereas Marine Corps (30%)

were *less likely* to *disagree*. Men in the Marine Corps (51%) were *more likely* than men in the other Services to indicate they *agree leadership would treat them differently if they reported being sexually harassed*.

Figure 189.

Perception of Being Treated Differently by Leadership if Member Reports Member Was Sexually Harassed for DoD (Q203e)

As shown in Figure 190, more than one-third (38%) of women indicated *their supervisor or chain of command would not treat them differently if they reported someone else was sexually harassed*; however, the same percentage (38%) *agreed they would be treated differently*. Air Force women (42%) were *more likely* than women in the other Services to indicate they *disagree leadership would treat them differently if they reported someone else was sexually harassed*, whereas Army (36%), Navy (36%), and Marine Corps women (35%) were *less likely* to *disagree*. Women in the Marine Corps (41%) and Army (40%) were *more likely* than women in the other Services to indicate they *agree leadership would treat them differently*.

Forty percent of men indicated they *disagreed their supervisor or chain of command would treat them differently if they reported that someone else was sexually harassed*; however, 42% *agreed they would be treated differently*. Navy (41%) and Air Force men (41%) were *more likely* than men in the other Services to indicate they *disagree leadership would treat them differently if they reported someone else was sexually harassed*, whereas Marine Corps (36%) were *less likely* to *disagree*. Marine Corps men (46%) were also *more likely* than men in the other Services to *agree leadership would treat them differently*.

Figure 190.

Perception of Being Treated Differently by Leadership if Member Reports Someone Else Was Sexually Harassed for DoD (Q203f)

Coast Guard

As shown in Figure 191, a little less than one-third (32%) of Coast Guard women and more than one-third (38%) of Coast Guard men indicated their supervisor or chain of command would not treat them differently if they reported being sexually harassed; however, a little less than half (46%) of women and less than half (44%) of men indicated they would be treated differently. With regard to reporting someone else was sexually harassed, less than half (43%) of women and men (44%) indicated they would not be treated differently by leadership if they reported. One-third (33%) of women and more than one-third (38%) of men indicated leadership would treat them differently if they reported someone else was sexually harassed.

Figure 191.

Perception of Being Treated Differently by Leadership if Member Reports Member Was Sexually Harassed (Q203e) and if Reports Someone Else Was Sexually Harassed (Q203f) for Coast Guard

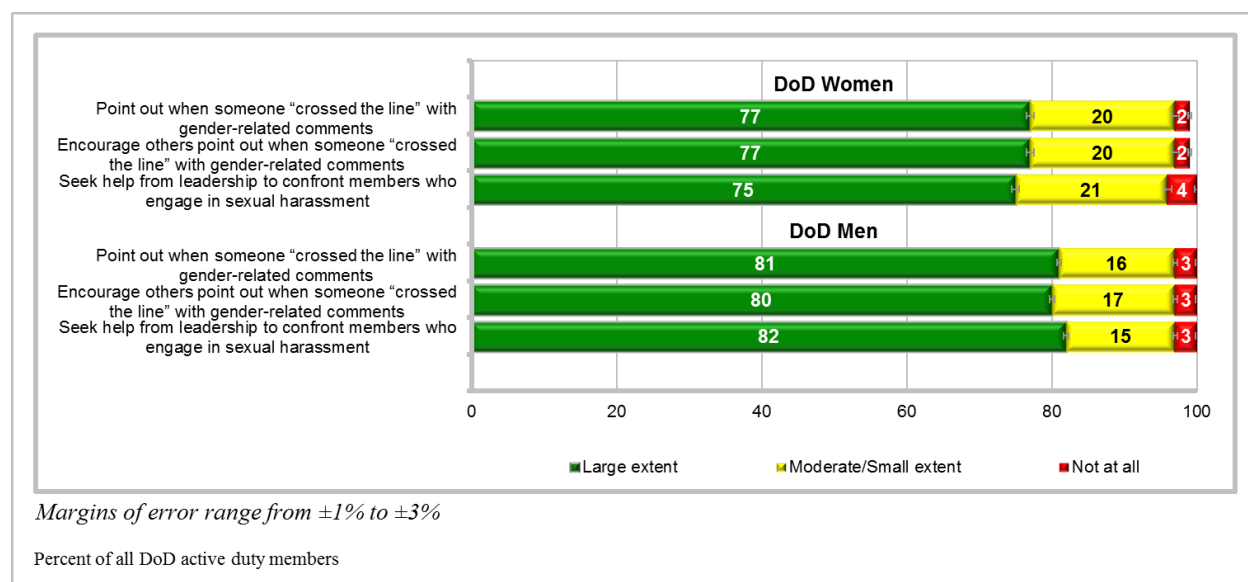

Willingness to Act to Prevent Sexual Harassment

Active duty members were asked to indicate to what extent they are willing to respond to various situations involving sexual harassment, such as to point out when someone “crossed the line” with gender-related comments or jokes, their willingness to encourage other Service members to do the same, and their willingness to seek help from their chain of command.

DoD

As shown in Figure 192, the majority of DoD women (77%) and DoD men (81%) indicated they would point out when they think someone “crossed the line” with gender-related comments or jokes to a *large extent* and would encourage others to point out when they think others “crossed the line” (77% of women and 80% of men). Additionally, the majority of women (75%) and men (82%) indicated they would seek help from their chain of command to confront Service members who continue to engage in sexual harassment. Conversely, fewer women (2%–4%) and men (3%) would *not at all* intervene to prevent sexual harassment.

Figure 192.***Willingness to Act to Prevent Sexual Harassment for DoD (Q204)***

As shown in Table 65, women in the Army and Air Force (both 79%) were *more likely* than women in the other Services to indicate they would [point out to someone when they think they "crossed the line" with gender-related comments or jokes](#) to a *large extent*, whereas women in the Navy (75%) and Marine Corps (75%) were *less likely*. Similarly, women in the Army (78%) and Air Force (79%) were *more likely* than women in the other Services to indicate they would [encourage others to point out when they think others "crossed the line" with gender-related comments or jokes](#) to a *large extent*, whereas women in the Navy (75%) and Marine Corps (73%) were *less likely*. Lastly, Air Force women (78%) were *more likely* than women in the other Services to indicate they would [seek help from their chain of command to confront members who continue to engage in sexual harassment](#), whereas women in the Navy (73%) and Marine Corps (70%) were *less likely*.

As far as *not intervening at all*, Army women (5%) were *more likely* than women in the other Services to indicate [they would not seek help from leadership to confront members who continue to engage in sexual harassment](#). Marine Corps women (3%) were *more likely* than women in the other Services to indicate they would *not* [point out to someone when they "crossed the line" with gender-related comments or jokes](#).

Men in the Army (83%) and Air Force (82%) were *more likely* than men in the other Services to indicate they would [point out to someone when they think they "crossed the line" with gender-related comments or jokes](#) to a *large extent*, whereas Navy (80%) and Marine Corps men (77%) were *less likely* (Table 65). Similarly, Army (82%) and Air Force (81%) men were *more likely* than men in the other Services to indicate they would [encourage others to point out when they think others "crossed the line" with gender-related comments or jokes](#) to a *large extent*, whereas men in the Navy (78%) and Marine Corps (76%) were *less likely*. Army (83%) and Air Force men (84%) were *more likely* than men in the other Services to indicate they would [seek help](#)

from their chain of command to confront members who continue to engage in sexual harassment, whereas men in the Navy (80%) and Marine Corps (77%) were *less likely*.

As far as *not intervening at all*, Army and Marine Corps men were *more likely* than men in the other Services to indicate they would not point out to someone when they “crossed the line” with gender-related comments or jokes (3% for Army men and 4% for Navy men), they would not encourage others to point out when they think others “crossed the line” with gender-related comments or jokes (4% for both), and they would not seek help from leadership to confront members who continue to engage in sexual harassment (4% for both).

Seek help from chain of command to confront members who continue to engage in sexual harassment	3	4	4	4	2
<i>Margins of Error</i>	±1	±1	±1	±1	±1

Percent of all active duty members

Coast Guard

As shown in Figure 193, the majority of Coast Guard women (79%) and Coast Guard men (85%) indicated they would point out to someone when they think they “crossed the line” with gender-related comments or jokes. The majority of women (77%) and men (84%) indicated they would encourage others to point out when they think others “crossed the line,” and would seek help

from chain of command to confront members who continue to engage in sexual harassment (79% of women and 87% of men). Fewer Coast Guard women (1%–3%) and Coast Guard men (2%) would *not at all* act to prevent sexual harassment.

Figure 193.

Willingness to Act to Prevent Sexual Harassment for Coast Guard (Q204)

Predictive Capabilities

The 2016 WGRA provides important information on how members' trust in the military system affects their perception of the DoD in preventing instances of sexual assault and sexual harassment. This section connects actionable policy items related to military culture with DoD members' perception regarding the effectiveness of sexual assault and sexual harassment prevention strategies. Specifically, this chapter seeks to understand whether increases in members' trust in the military system to protect sexual assault victims lead to perceived improvements in preventing sexual assault. Analysis is then extended to sexual harassment by observing whether increases in members' willingness to speak openly about sexual harassment issues or to seek help from the chain of command leads to perceived improvements in preventing of sexual harassment in the military.

Perceptions of Sexual Harassment and Sexual Assault

Earlier in this chapter, members' responses to whether sexual assault and sexual harassment in the military is *more or less of a problem* today than two years ago were discussed. As shown in Figure 194 and Figure 195, DoD active duty members generally hold positive perceptions regarding the DoD's handling of sexual assault and sexual harassment in the military, with only 8% (for each) indicating *more of a problem today* compared to two years ago.

In order to analyze these perceptions, the next sections will examine what potentially contributes to predicting three outcomes. These three outcomes include members indicating there is **more of a problem today** compared to two years ago, **less of a problem today** compared to two years ago, and it is **same as two years ago**. To accomplish this, only members who indicated one of the previously mentioned response options were examined; members who did not endorse one of these response options or indicated they did not know are excluded from this analysis as it is assumed they do not hold an opinion on sexual assault or sexual harassment in the military.

As shown in Figure 194 and Figure 195, among members who indicated they had an opinion on sexual assault or sexual harassment in the military, more than half indicated sexual assault and sexual harassment (both 55%) was **less of a problem today** than two years ago. In both cases, 12% of members indicated it was **more of a problem today** than two years ago.

Figure 194.

Perception of Sexual Assault in the Military Over the Past Two Years for Total DoD—Removing “Do not know” (Q210)

Figure 195.

Perception of Sexual Harassment in the Military Over the Past Two Years for Total DoD—Removing “Do not know” (Q209)

Trust in the Military’s Response to Sexual Assault

Members were asked to indicate their level of agreement regarding trust of the military system if they were to experience a sexual assault. Members were asked about trusting the military system to protect their privacy, ensure their safety, and treat them with dignity and respect should they experience a sexual assault while in the military. These responses were combined into a single index based on their inter-item covariances ($\alpha = 0.94$), which measures members’ trust in the military’s response to sexual assault (Trust in the Military System index).

An ordered logistic regression was used to capture the relationship between members’ opinions of sexual assault as a problem in the military over the last two years and their trust in the military’s response to sexual assault. An open climate in which members trust the military system to protect sexual assault victims is hypothesized to yield a perceived improvement in the military in regards to issues related to sexual harassment. The regression holds members’ Service, race, gender, and experiences of sexual assault at their mean and only applies to members who indicated having an opinion on the problem of sexual assault in the military.

While holding all other variables at their means, Figure 196 displays predicted probabilities of members’ [opinions of sexual assault as a problem in the military](#) as their [agreement](#) regarding [trust in the military’s system](#) changes from *strongly disagree* to *strongly agree*. For members who are the *least trusting in the military system*, the predicted probability of perceiving sexual assault as *less of a problem today* is 18%. The predicted probability of this positive perception rises to 63% as members’ [trust in the military system](#) *increases*. By contrast, the predicted probabilities of perceiving sexual assault as *more of a problem today* *decreases* from 40% to 8% as members’ [trust in the military system](#) moves from *disagreement* to *agreement*.

Members were *more likely* to perceive that sexual assault is becoming *less of a problem today* compared to *more of a problem* if they indicated a response beyond *disagree* regarding *their trust in the military system*. As members continue to mark *higher* responses on the Trust in the Military System index, their positive perception of the DoD's sexual assault prevention grows at a high rate, demonstrating a strong relationship between policy and reality. In other words, a member's higher level of trust in the military system about sexual assault-related issues potentially causes a very large difference between predicted probabilities of positive (63%) and negative perceptions (8%) about problems in the military; specifically a 55-percentage-point gap.

Figure 196.

Trust in the Military System's Response to Sexual Assault for DoD Active Duty Members by Perceptions of Sexual Assault (Q203b–d, Q210)

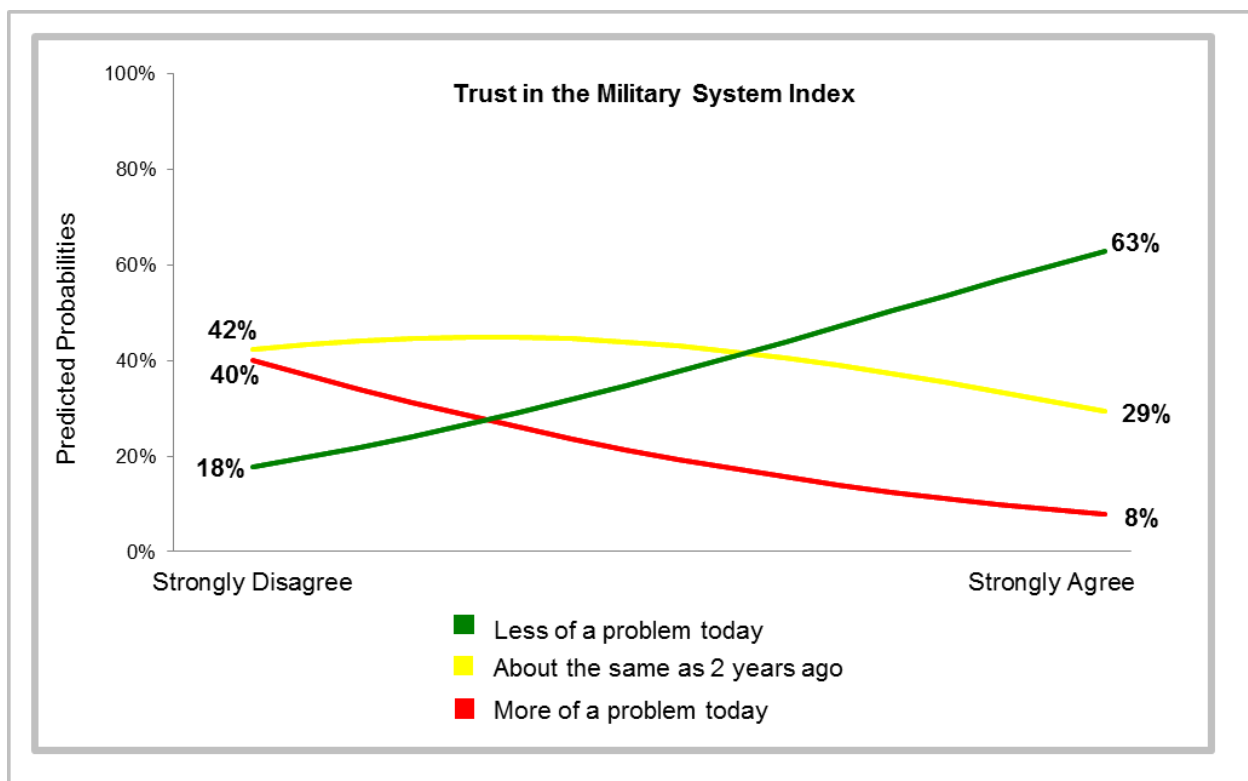

Figure 197 displays predicted probabilities of the same model—while distinguishing between DoD men and women using marginal standardization.⁴⁷ The predicted probabilities for DoD men indicating sexual assault was *less of a problem today* is 20% among DoD men that are the *least trusting in the military system*. The predicted probability of this positive perception is expected to *rise* to 66% as male members maximize *their trust in the military system*. As *trust in the military system* moves from *disagreement* to *agreement*, the predicted probabilities among DoD women indicating sexual assault as *less of a problem today* *increases* from 13% to 54%.

⁴⁷ Members indicating no change in sexual harassment as a problem in the military for the past two years are not displayed for easier interpretability. Service, race, and experiences of sexual harassment are held at their means.

Figure 197.

Changes in Gender—Trust in the Military System’s Response to Sexual Assault for DoD Active Duty Members by Perceptions of Sexual Assault (Q203b–d, Q210)

Using marginal standardization, Figure 198 displays predicted probabilities distinguishing between members who experienced sexual assault and those who did not. Among those who *did not experience sexual assault*, the predicted probability for members indicating sexual assault is *less of a problem today* is 18% for members who are the *least trusting in the military system*. Among those who indicated *experiencing a sexual assault*, the predicted probability of members indicating sexual assault is *less of a problem today* is 12% for members who are the *least trusting of the military system*. The predicted probabilities of these positive perceptions of the military’s response to sexual assault *rise* to 63% among members who *did not experience sexual assault*, whereas the predicted probabilities *increase* to 51% for members who *experienced sexual assault*.

In order for the predicted probability for members who indicated sexual assault is becoming *less of a problem today* to be *higher* among those who *did not experience sexual assault*, members needed to indicate a response beyond *disagreement* in *their trust in the military system*. However, members who *experienced sexual assault* needed to indicate a response beyond *neither agreeing nor disagreeing* in *their trust in the military system* in order to *increase* the predicted probability for a positive perception.

Figure 198.

Changes Based on Experienced Sexual Assault—Trust in the Military System’s Response to Sexual Assault for DoD Active Duty Members by Perceptions of Sexual Assault (Q203b–d, Q210)

Willingness to Act to Prevent Sexual Harassment

Members were asked to indicate to what extent they are willing to respond to various situations involving sexual harassment. Specifically, they were asked how willing they were to point out when someone “crossed the line” using gender-related comments or jokes, to encourage other members to do the same, and to seek help from their chain of command. Responses to these assessments were combined into a single index based on their inter-item covariances ($\alpha = 0.92$), which measures members’ willingness to act to prevent sexual harassment (Willingness to Act index).

An ordered logistic regression was used to capture the relationship between members’ opinions of sexual harassment as a problem in the military over the last two years and their willingness to act to prevent sexual harassment. An open climate in which members feel they are able to speak openly about sexual harassment and/or seek help from their chain of command is hypothesized to yield a perceived improvement in the military in regards to issues related to sexual harassment in the past two years. The regression holds members’ Service, race, gender, and experiences of sexual harassment at their mean and only applies to members who indicated having an opinion on the problem of sexual harassment in the military.

While holding all other variables at their means, Figure 199 displays predicted probabilities of members' *opinions of sexual harassment as a problem in the military* as their *willingness to act to prevent sexual harassment* changes from *not at all* to *very large extent*. These predicted probabilities show as members feel more willing to prevent sexual harassment, they were *more likely* to have positive perceptions about sexual harassment in the military. For example, the predicted probability of members perceiving sexual harassment is *less of a problem today* is 32% for those who were *not at all willing to act to prevent sexual harassment*. The predicted probability of this positive perception *rises* to 59% as members maximize their *willingness to act to prevent sexual harassment*. By comparison, this same change in the *Willingness to Act index* shows a *decrease* in the predicted probabilities of members perceiving sexual harassment is *more of a problem today* from 26% to 10%.

In a climate where members are *not at all willing to discuss or seek help regarding sexual harassment*, they are *more likely* to hold a positive perception regarding sexual harassment in the military (32%). However, this positive perception has a predicted probability of only 6 percentage points *higher* than the predicted probability of a negative perception (26%). Meanwhile, positive perceptions (59%) have a predicted probability of 49 percentage points *higher* than the predicted probability of negative perceptions (10%) in a climate where all members feel *willing to act to prevent sexual harassment*. This shows that although assessments of how the DoD handles sexual harassment are mostly positive, effective policy aimed at fostering a climate where members can speak openly about sexual harassment issues and/or seek help from their chain of command can greatly increase overall perceptions on sexual harassment in the military.

Figure 199.

Willingness to Act to Prevent Sexual Harassment for DoD Active Duty Members by Perceptions of Sexual Harassment (Q204, Q209)

Figure 200 displays predicted probabilities of the same model, while distinguishing between men and women using marginal standardization.⁴⁸ The predicted probability of DoD men who indicated sexual harassment is *less of a problem today* is 35% for those that are *not at all* willing to act to prevent sexual harassment. By comparison, the predicted probability for DoD women is 24%. The predicted probabilities for these positive perceptions *rise* to 62% among DoD men and 49% for DoD women who are among the *most* willing to act to prevent sexual harassment.

DoD men were *more likely* to hold positive perceptions about occurrences of sexual harassment in the military. By contrast, DoD women only become *more likely* to indicate that sexual harassment is becoming *less of a problem today* if they indicate their willingness to act to prevent sexual harassment is beyond a *small extent*.

⁴⁸ Members indicating no change in sexual harassment as a problem in the military for the past two years are not displayed for easier interpretability. Service, race, and experiences of sexual harassment are held at their means.

Figure 200.

Changes in Gender—Willingness to Act to Prevent Sexual Harassment for DoD Active Duty Members by Perceptions of Sexual Harassment (Q204, Q209)

Using marginal standardization, Figure 201 shows the same relationship while distinguishing between members who experienced sexual harassment and those who did not. The gap between those experiencing sexual harassment and those who did not is considerably large. Among members who *did not experience sexual harassment*, the predicted probability of indicating sexual harassment is becoming *less of a problem today* increases from 33% to 60% across the *Willingness to Act index*. This same change in predicted probabilities *increases* from 18% to 40% among those who *experienced sexual harassment*.

Again, the predicted probability of positive perceptions is always *higher* than negative perceptions among those who *did not experience sexual harassment*. Among members who *experienced sexual harassment*, positive perceptions were *more likely* to occur for members who indicated their *willingness to act to prevent sexual harassment* was beyond a *moderate extent*. Figure 201 suggests that policies targeted at improving workplace climate might help incline members who experienced sexual harassment to believe sexual harassment is becoming less of a problem in the military. Further, it also suggests policies should establish a strong willingness among members to speak openly about sexual harassment issues and/or seek help from their chain of command.

Figure 201.

Changes based on Experienced Sexual Harassment—Willingness to Act to Prevent Sexual Harassment for DoD Active Duty Members by Perceptions of Sexual Harassment (Q204, Q209)

In summary, specific policies that foster openness between military members and their chain of command increase the probability of members' positive assessment of the DoD's handling of sexual harassment and sexual assault in the military. Particularly, policy aimed at increasing a member's confidence to speak to a higher authority in the military on matters of sexual assault makes a substantial difference in the viewpoint of all members. This research suggests focusing on improving both dialogue and trust between members and their military superiors regarding gender-based issues would have an impact on the overall DoD workplace climate.

Chapter 11: Analysis of Men Who Indicated Experiencing Sexual Assault

Dr. Laura Severance, Dr. Jason Debus, and Ms. Lisa Davis

The goal of this chapter is to examine men who indicated experiencing sexual assault. To date, most of the research on sexual assault both in the military and beyond has focused on women, largely due to the fact that sexual assault is more prevalent among women than men. However, due to the large male population in the military, sexual assault remains an issue that affects a high number of men (Schry et al., 2015). The negative consequences of sexual assault make this an important area for further exploration. Research conducted by Tolin and Foa (2008) and Tewksbury (2007) showed that the consequences of sexual assault, although similar in kind, are not similar in severity in men and women. Both women and men experience various physical, emotional, psychological, and behavioral effects of sexual assault, with women more likely to meet the criteria of Post-Traumatic Stress Disorder (PTSD) than men (Tolin & Foa, 2008). Male survivors of sexual assault, on the other hand, face issues that do not necessarily occur among women who experience sexual assault. For example, men struggle to seek treatment and acceptance as survivors of sexual assault. In fact, Donnelly and Kenyon (1996) found that some treatment facilities did not believe that sexual assault could even occur among men. Javaid (2014) made the observation that men experiencing sexual assault are often not well-supported and that the lack of treatment options after an assault may contribute to underreporting. This observation is supported by research in which men tend to underreport to a greater extent than women, partially due to gender-based stereotypes and culturally-defined roles that impede survivors from reporting the assault (Turchik, Bucossi, & Kimerling, 2014).

Another unique factor is that men are more likely to be victims of same-sex perpetrators which, for some men, calls into question their masculinity, sexual orientation, and gender identity (Bell, Turchik, & Karpenko, 2014). This is a core difference in the experiences between male and female survivors of sexual assault. Men are more likely to face gender identity, sexual orientation, and sexual identity issues as a result of the assault than women. This contributes to higher instances of self-harm and other negative psychological effects (Walker, Archer, & Davies, 2005). In a military environment where traditional gender roles are emphasized and masculinity is a valued commodity, for males who have experienced sexual assault, that role is called into question, which may lead to feelings of shame, guilt, and embarrassment (Sable, Danis, Mauzy, & Gallagher, 2006).

To aid in our understanding of the dynamics surrounding men who experience sexual assault, we first sought to explore how men and women who indicated experiencing sexual assault differ with respect to demographic characteristics. We also examined demographic differences between men who do and do not indicate experiencing sexual assault. Understanding such differences may help the Department target prevention and/or support efforts to more vulnerable populations—the first focus on this chapter. The second part of this chapter outlines top-level gender differences, highlighting where results of the 2016 *WGRA* have shown statistical differences between the circumstances of women and men who indicated experiencing a sexual assault. Of note, this preliminary analysis provides only simple single-dimensional statistical findings.

We then turn our attention to one focal issue—the characterization of sexual assault as hazing and/or bullying. Men are *far more likely* to characterize the one sexual assault situation that had the largest effect on them (henceforth referred to as the “one situation”) as hazing or bullying than women. More specifically, 27% of men who indicated experiencing sexual assault characterized the one situation as hazing compared to only 9% of women, and 39% of men who indicated experiencing sexual assault characterized the one situation as bullying compared to 24% of women. Understanding the dynamics surrounding hazing-related and bullying-related sexual assault may aid the Department in developing prevention-related efforts. Toward this end, we examine demographic differences between those who characterize the one situation as hazing or bullying versus those who do not to identify whether certain subpopulations are particularly vulnerable. Subsequently, we examine characteristics of hazing and bullying sexual assault situations to gain an understanding of how and when these incidents occur.

The *WGRA 2016* false discovery rate⁴⁹ for within year between subgroup analyses of $p = .024$ was used as the significance level for analyses conducted in this chapter. Analyses involving interactions were conducted in Stata. Analyses involving subgroup comparisons were conducted using OPA’s Statistical Analysis Macro program. Analyses are limited to the DoD active duty Services.

Demographic Differences Between Women and Men Who Indicated Experiencing Sexual Assault

We sought to explore the **demographic profile** of men who indicated experiencing **sexual assault**, focusing on how they may differ from women who indicated experiencing sexual assault. To do so, we examined interactions between **gender** and **demographic variables** of interest (i.e., age, years of service, race/ethnicity, paygrade, education, Armed Forces Qualification Test [AFQT] category, and deployment within the last 12 months) on the likelihood of experiencing sexual assault. We chose to examine the interaction between **gender** and **demographic characteristics** rather than simply conducting comparisons between men and women who indicated experiencing **sexual assault** on **demographic characteristics**, because men and women *overall* (i.e., the total population of men and women in the Services) differ on certain demographic characteristics (such as race/ethnicity). Examining the interaction between **gender** and **demographic characteristics** allows us to identify any predictors of sexual assault that may be unique to men or women. Results showed **age** was the only unique demographic factor that placed men versus women at risk of **sexual assault**. Results are described in more detail below.

With the exception of age, there were no unique demographic factors that place men versus women at risk of sexual assault.

Results showed a significant interaction between **gender** and **age** on experiencing **sexual assault**, with women who indicated experiencing sexual assault tending to be *slightly younger* and men tending to be *slightly older* (odds ratio = .96, $p < .001$; age was included as a continuous variable in the regression equation but is shown as a categorical variable in the table below). As shown in Table 66, 24% of women who indicated experiencing **sexual assault** were **under the age of 21**

⁴⁹ For more information, see the *WGRA 2016* Statistical Methods Report.

compared to only 12% of men who indicated experiencing [sexual assault](#). In contrast, 29% of men who indicated experiencing [sexual assault](#) were above the [age of 30](#) compared to only 15% of women who indicated experiencing [sexual assault](#).

Table 66.

Age of Women and Men Who Did and Did Not Indicate Experiencing Sexual Assault

	Indicated Experiencing Sexual Assault		Did Not Indicate Experiencing Sexual Assault	
	Women	Men	Women	Men
<21	24%	12%	11%	10%
21 to 24.9	37%	37%	24%	22%
25 to 29.9	24%	22%	25%	23%
30 and older	15%	29%	39%	46%

A marginally significant interaction emerged between [gender](#) and [years of service](#), with women who indicated experiencing [sexual assault](#) tending to have *fewer years of service* and men who indicated experiencing [sexual assault](#) tending to have *more years of service*. For example, as seen in Table 67, 9% of women who indicated experiencing [sexual assault](#) had [ten or more years of service](#) compared to 14% of men (odds ratio = .70, $p = .029$). It is important to note, however, that women who did not experience [sexual assault](#) also tend to have *fewer years of service* than men who did not experience [sexual assault](#).

Table 67.

Years of Service of Women and Men Who Did and Did Not Indicate Experiencing Sexual Assault

	Indicated Experiencing Sexual Assault		Did Not Indicate Experiencing Sexual Assault	
	Women	Men	Women	Men
1 to 2 years	57%	46%	36%	31%
3 to 5 years	23%	27%	22%	20%
6 to 9 years	11%	13%	15%	14%
10+ years	9%	14%	28%	34%

There were no significant interactions between [gender](#) and [AFQT](#) category (Table 68), [level of education](#) (Table 69), [race/ethnicity](#) (Table 70), [paygrade](#) (Table 71), or [deployment status](#) (Table 72) on experiencing [sexual assault](#).

Demographics Differences Between Men Who Did and Did Not Indicate Experiencing Sexual Assault

Subsequently, we compared the **demographic characteristics** of **men** who did and did not indicate experiencing **sexual assault**. Results revealed that, relative to men who did not indicate experiencing **sexual assault**, those who did were *younger*, had *fewer years of service*, had *less education*, were in *lower pay grades*, had *higher AFQT scores*, were *more likely to have been deployed in the last 12 months*, were *less likely to be Black*, and were *more likely to be multi-racial*. This information may help to identify men who are at higher risk of **sexual assault** so that the Department may focus efforts on these individuals. Table 73 summarizes the **demographic characteristics** on which **men** who did and did not indicate experiencing **sexual assault** differ; statistically significant differences are bolded.

Table 73.***Summary of Demographic Differences Between Men Who Did and Did Not Indicate Experiencing Sexual Assault***

	Indicated Experiencing Sexual Assault	Did Not Indicate Experiencing Sexual Assault

Note: Bolded categories indicate statistically significant differences between men who did and did not indicate experiencing sexual assault. T-Tests were computed and the significance level of $p < .024$ was used.

These results indicate it may be helpful to target general sexual assault prevention efforts toward men who are within their first five years of service, who are younger than 25 years of age, and who are enlisted, as these appear to be the most defining characteristics of men who indicate experiencing sexual assault.

Characteristics of Sexual Assault: Differences Between Men and Women

This section provides top-level gender differences to highlight which results of the 2016 WGRA have shown statistical differences between the circumstances of women and men who indicated

experiencing a sexual assault. Also noted are any statistically different results from the 2016 WGRA survey to the 2014 RMWS.

Findings

Rates of Men Who Indicated Experiencing Sexual Assault

As reported in Chapter 3, in 2016, 0.6% of DoD men indicated experiencing **sexual assault** in the past 12 months, which showed a statistically significant *decrease* in 2016 compared to 2014 (0.3 percentage points). Breaking down this rate by the type of sexual assault experienced, 0.4% indicated experiencing **non-penetrative sexual assault** (or unwanted sexual touching), 0.2% indicated experiencing **penetrative sexual assault**, and <0.1% indicated experiencing **an attempted penetrative sexual assault**. As shown in Table 74, for any experiences of sexual assault in the past 12 months, 67% of men indicated they experienced **more than one unwanted event** in the past 12 months, and specifically, men were *more likely* than women to indicate they experienced **five or more unwanted events** in the past year (35%). Men were also *more likely* than women to classify those unwanted events as involving **hazing** (26%) or **bullying** (42%).

Table 74.
Characteristics of Any Unwanted Event(s) in the Past 12 Months for DoD

	Higher Response	Lower Response	Women	Men
Experienced more than one unwanted event in the past 12 months			62	67
Indicated five or more unwanted events in the past 12 months			25	35
Unwanted events in past 12 months done by same person			41	42
Unwanted events in past 12 months done by more than one person			58	53
Considered any unwanted experience in past 12 months as bullying			27	42
Considered any unwanted experience in past 12 months as hazing			10	26
Margins of error			±3–5	±6–8

Male Profile For Those Who Indicated Experiencing Sexual Assault

Summarized below is the profile of males who indicated experiencing sexual assault in the past 12 months. Top findings for males are described below regarding the alleged offender(s) and where and when the one situation occurred. Table 74 and Table 75 display this data and the comparisons of DoD men to DoD women in more detail.

Respondents were asked to identify the one experience they felt was the most serious. If respondents indicated more than one behavior was the most serious, a hierarchy was applied to identify the one behavior: penetrative, attempted penetrative, then non-penetrative. Therefore, if a respondent indicated the one situation included both penetrative and non-penetrative, they would be categorized as just penetrative. DoD men were *more likely* than women to indicate the most serious situation was **a non-penetrative sexual assault** (59%), and *less likely* to indicate the one situation to be the most serious was **penetrative sexual assault** (35%). Fewer (6%) men indicated the one situation involved **an attempted penetrative sexual assault**. For the remainder

of the survey, respondents were asked to think about this one situation they considered the most serious when answering the remaining questions.

As shown in Table 75, when describing the alleged offender(s) in the one situation, men were *less likely* to say there was only **one person** involved (58%). Although 57% of men indicated the alleged offender(s) was (were) also **men**, compared to women, men were *more likely* to indicate the alleged offender(s) was (were) **women** (25%) or **a mix or men and women** (12%). Although most men indicated the offenders were **all military members** (66%), men were *more likely* than women to indicate the alleged offenders **were not in the military** (16%). When a military member was identified as the alleged offender(s), 53% indicated the alleged offender(s) was (were) of **a higher rank** and 40% was (were) **the same rank** as them. When compared to women, men were *more likely* to indicate the offender(s) was (were) of **a lower rank than them** in the military (29%).

For the status of the alleged offender(s), although 38% of men indicated they were **not sure** of the alleged offender(s) status, 25% indicated the alleged offender(s) was (were) **someone else in their chain of command (not their immediate supervisor)** and 24% indicated the alleged offender(s) was (were) a **subordinate(s) or someone they managed**. When compared to women, men were *less likely* to indicate the alleged offender(s) was (were) **some other higher ranking military member not previously listed** (21%). Although 43% of men indicated the alleged offender(s) was (were) **a friend or acquaintance**, they were *less likely* to indicate this than DoD women. Men were *more likely* to indicate they were **not sure** (31%) of the relationship to the alleged offender(s), and 19% of men indicated the person was **a stranger**.

As shown in Table 76, the top three locations men indicated the one situation occurred were *at a military installation or ship* (64%), *while at a location off base* (35%, where men were *less likely* to indicate than women), and *while on TDY/TAD, at sea, or during field exercises or alerts* (24%, where men were *more likely* to indicate than women). Further comparisons to women showed that men were *more likely* to indicate the situation occurred *while at an official military function (either on or off base)* (18%), *during an overseas port visit while deployed* (11%), or *while in any other type of military combat training* (9%). Compared to 2014, the percentage (9%) who indicated the situation occurred *while you were deployed to a combat zone/area where you drew imminent danger pay/hostile fire pay* showed a statistically significant *decrease* in 2016 for DoD men (11 percentage points).

When asked about when the one situation occurred, men were *more likely* to indicate it occurred *while at work during duty hours* (45%). Men were *less likely* than women to indicate the one situation occurred *while out with friends or at a party that was not an official military function* (31%) or *while in your or someone else's home or quarters* (25%).

Characteristics of the One Situation of Sexual Assault

Members who indicated experiencing sexual assault were asked about behaviors that were part of the unwanted situation, such as the situation being described as hazing and/or bullying, whether alcohol or drugs were involved, if they experienced any sexual harassment or stalking before or after this unwanted situation, or if they took steps to leave the military as a result of the one situation. Table 77 displays these characteristics and the comparisons of DoD men to DoD women in more detail.

With regard to considering the unwanted situation as bullying or hazing, men were *more likely* than women to indicate they would consider the one situation to be **bullying** (39%) or **hazing** (27%). Fifty-two percent of men experienced sexual harassment or stalking before or after the one situation occurred. For alcohol use before the one situation occurred, men were *less likely* than women to indicate **they drank alcohol at the time of the unwanted event** (30%), the **offender had been drinking alcohol** (26%), and the combination of **either them and/or the alleged**

offender(s) using alcohol before the one situation (39%). Twenty-three percent of men also indicated this unwanted event made them take steps to leave or separate from the military. Compared to women, men were *less likely* to receive a sexual assault forensic exam following the unwanted event (3%).

Table 77.
Behaviors Part of the One Situation of Sexual Assault for DoD

Received a sexual assault forensic exam or “rape exam”		8	3
<i>Margins of error</i>		±2–5	±4–11

Satisfaction With Services Received in Response to the One Situation of Sexual Assault

Various individuals and providers are available for military members who experience a sexual assault. Members were asked to rate their satisfaction with the responses and/or services they received from such individuals or providers. All responses are out of those who reached out to the individual specified or used the service noted. Table 78 displays the details on the responses from DoD men compared to DoD women and are summarized here.

When asked about their satisfaction with responses and services received, men were generally *more likely* to be dissatisfied with a majority of the responses and/or services received from individuals and/or providers, including their leadership (unit commander/director [50%], senior enlisted advisor [51%], and immediate supervisor [53%]), Sexual Assault Prevention and Response providers (SARCs [30%], VAs [29%], SVCs/VLCs [33%]), and other providers such as a chaplain (29%) and medical providers not for mental health needs (32%). This suggests improvements could be made in providing responses and services to men who experience sexual assault.

Table 78.***Satisfaction With Responses/Services Received From Individuals/Providers for DoD***

Reporting Behaviors

Of those who indicated experiencing a sexual assault, men (15%) were *less likely* than women to indicate they [reported the situation to the military](#) (Table 79). Of those who did not report the situation to the military, men (78%) were *more likely* than women to indicate [they never considered reporting and/or do not plan to report](#) and were *less likely* than women to indicate [they considered reporting but decided not to](#) (17%).

For the 15% of men who reported the one situation to the military, 55% indicated they initially made an [unrestricted report](#) and 31% indicated they made a [restricted report](#). Details on men who initially made a restricted report, such as to whom they made the report to, what happened with their restricted report, and what they would do if restricted reporting were not an option, are not reportable. However, the final report disposition, taking into account the initial type of report made and whether their restricted report was converted to an unrestricted report, indicated 61%

of men ended up with an [unrestricted report](#), and 23% with a [restricted report](#). Further detailed data on reporting is provided in Table 79.

After reporting the unwanted event, members were asked to provide the extent to which they were provided information and resources, which is displayed in Table 80. Male responses ranged from 27% to 32% for whether they were provided the listed resources or information to *a large extent*, and responses ranged from 22% to 30% for *not* being provided the listed resources or information *at all*. This suggests improvements could be made to ensure men are provided more resources or information after reporting an unwanted event.

Table 80.***Extent Provided Information/Resources After Reporting Unwanted Event for DoD***

When asked to what extent their leadership took positive actions after reporting the unwanted event (Table 81), men were more likely than women to indicate their leadership did *not at all* take positive actions such as their [leadership made them feel supported](#) (51%), [expressed concern for their well-being](#) (48%), and [provide them the flexibility to attend appointments related to their sexual assault as needed](#) (43%). This suggests improvements in leadership response to males who experience sexual assault.

Table 81.***Positive Leadership Action After Reporting Unwanted Event***

Margins of error				±7–8	±16–17

For reasons why they reported the one situation, the top three responses from men are provided (see Table 82 for data on all reasons). Forty-seven percent of men indicated they reported the situation [to stop the offender\(s\) from hurting them again](#), 45% [to stop the offender\(s\) from hurting others](#), and 41% because it was [their civic or military duty to report it](#). When compared to women, men were *less likely* to indicate they reported because [someone they told encouraged them to report](#) (22%). When asked if they would recommend others report sexual assault based on their experience with reporting, 59% of men said they would [recommend others report sexual assault](#), out of which 34% would recommend others make an [unrestricted report](#) and 25% a [restricted report](#) (Table 83).

Table 82.***Reasons for Reporting Sexual Assault for DoD***

	Higher Response	Lower Response	Women	Men
Someone else made you report it or reported it themselves			29	20
To stop the offender(s) from hurting you again			42	47
To stop the offender(s) from hurting others			53	45
It was your civic/military duty to report it			27	41
To punish the offender(s)			23	27
To discourage other potential offenders			21	20
To get medical assistance			20	15
To get mental health assistance			35	22
To stop rumors			10	14
Someone you told encouraged you to report			44	22
You wanted to document the incident so you could get help or benefits from the Department of Veterans Affairs (VA) in the future			14	23
<i>Margins of error</i>				±5–6 ±11–15

Table 83.***Recommend Others Report Sexual Assault Based on Experience With Reporting for DoD***

 Higher Response	 Lower Response	Women	Men
Based on overall experience of the reporting process/services available, recommend others report		67	59
Yes, recommend others make an unrestricted report		44	34
Yes, recommend others make a restricted report		23	25
No		17	32
Not sure		16	9
<i>Margins of error</i>		$\pm 5-6$	$\pm 11-16$

For men who indicated they did not report their sexual assault to the military, the top reasons why are provided (see Table 84 for data on all reasons). Forty-seven percent of men indicated they did not report because they [wanted to forget about it and move on](#). Compared to 2014, this showed a statistically significant *decrease* in 2016 for DoD men (17 percentage points). Thirty-nine percent of men indicated the reason they did not report their sexual assault was because they [did not want more people to know](#), and 37% indicated they [thought it was not serious enough to report](#) or [felt shamed or embarrassed](#). Compared to 2014, the percentage (25%) of those who indicated they [took other actions to handle the situation](#) showed a statistically significant *decrease* in 2016 for DoD men (15 percentage points).

Table 84.
Reasons for Not Reporting Sexual Assault for DoD

 Higher Response	 Lower Response	Women	Men
You thought it was not serious enough to report		39	37
You did not want more people to know		58	39
You did not want people to see you as weak		35	32
You wanted to forget about it and move on		68	47
You did not think your report would be kept confidential		31	25
You did not think anything would be done		35	29
You did not think you would be believed		32	27
You did not trust the process would be fair		31	30
You felt partially to blame		40	20
You thought other people would blame you		41	19
You thought you might get in trouble with something you did		20	14
You thought you might be labeled a troublemaker		30	20
You felt shamed or embarrassed		52	37
You were concerned for your physical safety		13	7
You or the person(s) who did it knew the person you would report the event to		7	7
You thought it might hurt your performance evaluation/fitness report		20	20
You thought it might hurt your career		36	24
You did not want to hurt the person's career or family		37	27
You were worried about potential negative consequences from the person(s) who did it		31	21
You were worried about potential negative consequences from a supervisor or someone in your chain of command		27	26
You were worried about potential negative consequences from your coworkers or peers		36	30
You took other actions to handle the situation		28	25
<i>Margins of error</i>		$\pm 3-4$	$\pm 5-7$

When asked if they would make the same decision about reporting if they were to experience another sexual assault in the future, men (57%) were *more likely* than women (49%) to indicate they would [make the same decision to not report again](#) (Table 85). Men were also *more likely* than women to indicate they [did not make a report but would report if they experienced a sexual assault again](#) (28% for men and 21% for women).

Table 85.***In Retrospect, Would You Make Same Decision Again About Reporting for DoD***

 Higher Response	 Lower Response	Women	Men
Yes, and I made a report		19	8
Yes, and I did not make a report		49	57
No, and I made a report		11	7
No, and I did not make a report		21	28
<i>Margins of error</i>		±3–4	±4–6

Members were asked a battery of questions relating to experiencing negative outcomes associated with reporting sexual assault. As shown in Table 86, for men, the combined [rate of perceived professional reprisal, ostracism, or maltreatment](#) was 42%. Breaking these negative outcomes into individual rates, the rate of [perceived professional reprisal](#) for men was 36%, the rate of [perceived ostracism](#) was 17%, and the rate of [perceived maltreatment](#) was 19%. There were no gender differences on rates of perceived professional reprisal, ostracism, and/or maltreatment.

Table 86.***Outcomes Associated With Reporting Sexual Assault for DoD***

	Women	Men
Rate of Perceived Professional Reprisal, Ostracism, or Maltreatment	28	42
Rate of Perceived Professional Reprisal	19	36
Rate of Perceived Ostracism	12	17
Rate of Perceived Maltreatment	18	19
<i>Margins of error</i>	±5–6	±14–16

Exploration of Differences Between Men Who Did and Did Not Characterize the Situation as Hazing or Bullying

One area of interest to the Department is the characterization of sexual assault as hazing or bullying. Hazing refers to things done to humiliate or “toughen up” people before accepting them into a group, whereas bullying refers to repeated verbally or physically abusive behaviors that are threatening, humiliating, or intimidating.⁵¹ As noted, men are more likely to characterize the one sexual assault situation with the greatest effect as hazing or bullying than are women (27% versus 9% for hazing and 39% versus 24% for bullying). We sought to explore whether characteristics of the individual and the one sexual assault situation might vary between situations characterized as hazing or bullying from those that were not. First, examining factors that underlie hazing and bullying is helpful to provide context for understanding why and how it occurs.

⁵¹ These definitions were included on the survey instrument.

To date, research on hazing and bullying has primarily focused on the educational setting with a small amount being conducted in the military setting. However, there is reason to believe that hazing, in particular, is prevalent within the military, as evidenced by a recent the Government Accountability Office report that indicated that hazing remains an issue for the DoD Services (GAO, 2016). One explanation for why hazing occurs in the military context is because it is motivated by dominance and group solidarity (Cimino, 2011), both of which are defining characteristics of military culture. From this perspective, hazing serves to (1) generate cohesion, (2) allow for the expression of dominance, and (3) allow for the selection of committed members to the group. These characteristics (i.e., cohesion, dominance, and commitment) are valued by the military community. Men, in particular, are more likely to engage in hazing behavior to become part of the group and be accepted than women (Goldman & Hogg, 2016).

Although group solidarity, cohesion and dominance are desirable and can result from certain types of initiation (LaFerney, 2016), hazing is not by definition initiation. In its most benign form it is pranking but, most often hazing can cross the line into bullying (Groah, 2005) and can sometimes turn into sexual assault (Kirby & Wintrup, 2002; LaFerney, 2016). Van Raalte, Cornelius, Linder, and Brewer (2007) reported that hazing is actually detrimental to group cohesion, whereas team-building produces more team cohesion.

Bullying is similar to hazing in many ways. For example, both are types of abuse that allow for the expression of dominance. Despite their commonalities, however, hazing and bullying are unique constructs. For example, hazing is necessarily tied to gaining membership in a group, whereas bullying is not (Bersani, Nesci, & Pozzi, 1980). In a similar vein, hazing is generally perpetrated by multiple people, whereas bullies may act alone. Bullying also involves repeated acts over time, whereas hazing may be a singular instance (Østvik & Rudmin, 2001). That said, in practice, there is a large degree of overlap between situations that may be construed as hazing or bullying. Indeed, of men who characterized the one sexual assault situation as hazing, 83% also characterized it as bullying. Further, both hazing and bullying result in negative consequences for victims and are the focus of prevention initiatives within the Department.

This research looks to further inform the Department on how they can bolster policy and training to reduce the incidence of hazing-related and bullying-related sexual assault. Below, we first examine the demographic differences between men who do and do not characterize the one situation as hazing or bullying. Subsequently, we examine how situations characterized as hazing or bullying versus not differ on a wide range of characteristics such as alleged offenders, time, location, and separation actions.

Hazing

T-Tests were computed to compare men who did and did not characterize the one situation as [hazing](#), and a significance level of $p < .024$ was used. Only statistically significant differences are discussed. Overall, men who characterized the one situation as [hazing](#) *did not differ* largely from those who did not with respect to [demographic factors](#). There were small differences with respect to [level of education](#), [age](#), [paygrade](#), and [deployment status](#), but there were *no differences* with respect to [years of service](#), [race/ethnicity](#), or [AFQT category](#). More specifically, men who characterized the one situation as hazing were *more likely* to have [no college](#) (81%) than men who did not (70%). Men who characterized the one situation as [hazing](#) were *less likely* to be

younger than 21 years old (4%) than those who did not (14%). In addition, men who characterized the one situation as **hazing** were *less likely* to be O1–O3 (1%) or O4–O6 (<1%) than men who did not (of whom 9% were O1–O3 and 2% were O4–O6). In addition, men who characterized the one situation as **hazing** were *less likely* to have been **deployed in the past 12 months** (20%) than those who did not (34%).

With respect to Service differences, the Army (27%), Navy (28%), and Marine Corps (33%) were *similar* with respect to the proportion of men who characterized the one situation as **hazing**, whereas the Air Force was *lower* (13%).

Looking across Services, men who characterized the one situation as hazing described the one situation in many different ways than those who did not characterize the one situation as hazing, which may aid the Department in better understanding hazing-related sexual assault. It is important to note that the results presented in this section provide an understanding of sexual assault situations described as hazing relative to those not described as hazing. This is helpful in identifying characteristics that uniquely define hazing-related sexual assault (in comparison to non-hazing-related sexual assault). However, it does not provide a “snapshot” of what hazing-related sexual assault looks like in an absolute sense.

High level findings indicate that, relative to men who did not characterize the one situation as hazing, **men who characterized the one situation as hazing were *more likely* to indicate:**

- *multiple people were involved in the one situation*
- *both men and women were involved in the one situation*
- *the alleged offender(s) was (were) all military members*
- *the alleged offender(s) was (were) people of a higher rank*
- *a higher number of sexual assault incidents took place during the last 12 months*
- *they were sexually harassed or stalked both before and after the situation*
- *the one situation occurred on a military installation or ship, on TDY/TAD, while in some type of training program, or at an official military function*
- *they took steps to separate from the military*
- *they perceive high levels of workplace hostility*

Men who characterized the one situation as hazing were *less likely* to indicate:

- *alcohol was involved*
- *only women were involved*
- *they were satisfied with the support they received from their unit commander/director and immediate supervisor*
- *they perceive healthy levels of climate with respect to sexual assault among both enlisted and officer members*

More specifically, men who characterized the one situation as hazing were *more likely* to indicate **more than one person** was involved (53%) than those who did not (25%). They were also *more likely* to indicate a **mix of men and women** were involved (22%) than those who did

not (5%) and *less likely* to indicate **only women** were involved (6%) than those who did not (34%). Men who characterized the one situation as hazing were also *more likely* to indicate they had experienced **five or more sexual assaults** within the past 12 months (53%) than those who did not (30%). They were *more likely* to indicate the alleged **offenders were all military members** (82%) than those who did not (60%). In terms of consequences of the sexual assault, they were *more likely* to indicate the situation made them **take steps to separate from the military** (43%) than those who did not (15%).

Table 87 shows that men who characterized the one situation as hazing were *more likely* to indicate that the alleged **offender(s) was (were) their immediate supervisor, someone else in their chain of command, or some other higher ranking military member**. Further, men who characterized the sexual assault as **hazing** were *more likely* to indicate that they were **sexually harassed and stalked both before and after the one situation**, as displayed in Table 88.

Table 87.

Characteristics of Alleged Offender(s) for Men Who Did and Did Not Characterize the One Situation as Hazing

	Characterized Situation as Hazing	Did Not Characterize Situation as Hazing
Your immediate supervisor	38%	10%
Someone else in your chain of command (excluding your immediate supervisor)	40%	16%
Some other higher ranking military member	35%	14%

Table 88.

Sexual Harassment and Stalking for Men Who Did and Did Not Characterize the One Situation as Hazing

	Characterized Situation as Hazing	Did Not Characterize Situation as Hazing
Sexually harass you <u>before</u> the situation	60%	31%
Stalk you <u>before</u> the situation	23%	11%
Sexually harass you <u>after</u> the situation	58%	31%
Stalk you <u>after</u> the situation	33%	16%

When indicating where the one situation occurred, men who characterized the situation as **hazing** were more likely to indicate nearly every response option, as demonstrated in Table 89. The largest differences observed were for **while in any other type of military combat training, while at an official military function, and while on TDY/TAD, at sea, or during field exercises/alerts**.

This suggests that hazing is more likely to occur in training-related contexts or at official military functions.

Table 89.

Location of the One Situation for Men Who Did and Did Not Characterize the One Situation as Hazing

	Characterized Situation as Hazing	Did Not Characterize Situation as Hazing
At a military installation/ship (for example, on base, on shore duty, etc.)	79%	59%
While you were on TDY/TAD, at sea, or during field exercises/alerts*	39%	19%
While transitioning between operational theaters (for example, going to or returning from forward deployment)	14%	4%
While you were in a delayed entry program	12%	2%
While you were in recruit training/basic training	13%	2%
While you were in any other type of military combat training*	24%	3%
While you were completing military occupational specialty school/technical training/advanced individual training/professional military education	21%	9%
While at an official military function (either on or off base)*	35%	12%

* Categories with the three largest t-test values.

In addition, alcohol use is *less common* in situations described as [hazing](#). More specifically, only 12% of men who described the one situation as [hazing](#) indicated that [they had used alcohol before or during the one situation](#) compared to 37% of men who did not characterize the situation as hazing. Further, 11% of men who described the situation as [hazing](#) indicated that the alleged [offender used alcohol](#) before or during the one situation, compared to 33% of those who did not characterize the situation as [hazing](#). As such, alcohol does not appear to be a key factor in hazing-related sexual assault.

Men who characterized the one situation as [hazing](#) indicated *lower* levels of [satisfaction with the support provided by their unit commander/director](#) and [immediate supervisor](#) as displayed in Table 90. It is worth noting that roughly 40% of men who characterized the one situation as [hazing](#) indicated that the alleged offender was their [immediate supervisor](#), [someone else in their chain of command](#), or [some other higher ranking military member](#) (see Table 87). As such, it follows that they might perceive lower levels of support from these individuals.

Table 90.

Satisfaction With Services for Men Who Did and Did Not Characterize the One Situation as Hazing

	Characterized Situation as Hazing	Did Not Characterize Situation as Hazing
Your unit commander/director	14%	38%
Your immediate supervisor	19%	46%

Men who characterized the one situation as **hazing** were *more likely* to indicate high levels of **workplace hostility** (50%) than those who did not (12%). It is worth noting that this is a metric on which a significant gender difference between men and women who indicated experiencing sexual assault emerged. Men who indicated experiencing **sexual assault** were far *more likely* to perceive high levels of **workplace hostility** (22%) than women who indicated experiencing **sexual assault** (8%).

We also explored perceptions of **workplace climate with respect to sexual assault**; for example, do fellow service members recognize and immediately correct incidents of sexual harassment; encourage bystander intervention to assist others in situations at risk for sexual assault or other harmful behaviors, or publicize sexual assault report resources? Climate was assessed for Service members in different pay grades and results showed men who characterized their experience as **hazing** had *lower* perceptions of a **healthy workplace climate with respect to sexual assault** when assessing fellow Service members at nearly all paygrades (Table 91).

Table 91.

Perceptions of a Healthy Climate With Respect to Sexual Assault for Men Who Did and Did Not Characterize the One Situation as Hazing

	Characterized Situation as Hazing	Did Not Characterize Situation as Hazing
E5	16%	30%
E6	18%	35%
E7–E9	23%	44%
O1–O3	25%	48%
O4–O6	33%	56%

Bullying

Findings regarding bullying are similar to those for hazing. As noted, 83% of men who characterized the one situation as [hazing](#) also characterized it as [bullying](#). However, there are some characteristics of the one situation that are unique to [bullying](#).

T-Tests were computed to compare men who did and did not characterize the one situation as [bullying](#) and a significance level of $p < .024$ was used. Only statistically significant differences are discussed. Overall, men who characterized the one situation as [bullying](#) *differ little* from those who did not with respect to [demographic factors](#). There was a small effect of [age](#), as those who characterized the one situation as bullying were *less likely* to be [under 21 years of age](#) (4%) than those who did not (17%). There was also a small effect for [paygrade](#), with those who described the one situation as bullying being slightly *less likely* to be an [O4–O6](#) (<1%) than those who did not (2%). No differences were observed for [years of service](#), [education](#), [race/ethnicity](#), [AFQT category](#), or [deployment status](#).

With respect to Service differences, the Army (46%), Navy (33%), and Marine Corps (45%) were *similar* with respect to the proportion of men who characterized the one situation as [bullying](#), whereas the Air Force was *lower* (24%). As shown in Figure 202, this mirrors the same trend as hazing.

Figure 202.

Proportion of Men Who Characterized the One Situation as Hazing or Bullying, by Service

Looking across Services, men who characterized the one situation as bullying described the one situation in many different ways than those who did not characterize the one situation as bullying.

High level findings indicate that, relative to men who did not characterize the one situation as bullying, **men who characterized the one situation as bullying were *more likely* to indicate:**

- *multiple people were involved in the one situation*
- *both men and women were involved in the one situation*
- *the alleged offender(s) was (were) military members*
- *the alleged offender(s) was (were) people of a higher rank*
- *a higher number of sexual assault incidents took place*
- *they were sexually harassed both before and after the situation*
- *they were stalked before the situation*
- *the one situation occurred during normal duty hours*
- *the one situation occurred on a military installation or ship, on TDY/TAD, while deployed to a combat zone, while transitioning between operational theaters, while in some type of training program, or at an official military function*
- *take steps to separate from the military*
- *they perceive high levels of workplace hostility*

Men who characterized the one situation as bullying were *less likely* to indicate:

- *alcohol was involved*
- *only women were involved*
- *the one situation occurred when they were out with friends or at a party*
- *the alleged offender(s) was (were) a friend or acquaintance*
- *they would choose to remain on active duty*
- *they perceive healthy levels of climate with respect to sexual assault among both enlisted and officer members*

More specifically, men who characterized the one situation as **bullying** were *more likely* to indicate **more than one person** was involved (50%) than those who did not (22%). They were also *more likely* to indicate a **mix of men and women** were involved (20%) than those who did not (5%) and *less likely* to indicate **only women** were involved (15%) than those who did not (33%). Men who characterized the one situation as bullying were also *more likely* to indicate they had experienced **five or more sexual assaults** within the past 12 months (50%) than those who did not (28%). They were *more likely* to indicate the alleged **offender(s) was (were) all military members** (79%) than those who did not (58%). In terms of consequences of the sexual assault, they were *more likely* to indicate the situation made them **take steps to separate from the military** (40%) than those who did not (12%), and they were *less likely* to indicate they would **choose to remain on active duty** (30%) than those who did not (47%).

Men who characterized the one situation as **bullying** were *more likely* to indicate the one situation happened when they were **at work during normal duty hours** (73%) than those who did not (28%), and they were *less likely* to indicate it happened when they were **out with friends or at a party that was not an official military function** (20%) than those who did not (39%).

Table 92 shows that men who characterized the one situation as bullying were *more likely* to indicate the alleged offender(s) was (were) their immediate supervisor, someone else in their chain of command, or some other higher ranking military member and *less likely* to indicate they were not sure.

Table 92.

Alleged Offender(s) of the One Situation for Men Who Did and Did Not Characterize the One Situation as Bullying

	Characterized Situation as Bullying	Did Not Characterize Situation as Bullying
Your immediate supervisor	34%	7%
Someone else in your chain of command (excluding your immediate supervisor)	36%	15%
Some other higher ranking military member not listed above	28%	15%
Not sure	23%	49%

In addition, men who characterized the one situation as bullying were *less likely* to indicate the alleged offender(s) was (were) a friend or acquaintance or none of the above (see Table 93). Men who characterized the one situation as bullying were *more likely* to indicate the offender was none of the individuals listed in Table 87. Men who characterized the one situation as bullying were slightly *more likely* to indicate the alleged offender was a current or former spouse, someone with whom they have a child, a significant other they live with, or a family member or relative, but it should be noted these options were indicated by a very small proportion of men.

Table 93.

Relationship with Alleged Offender(s) for Men Who Did and Did Not Characterize the One Situation as Bullying

	Characterized Situation as Bullying	Did Not Characterize Situation as Bullying
Your current or former spouse	6%	1%
Someone who you have a child with (your child's mother or father)	4%	<1%
Your significant other (boyfriend or girlfriend) you live with	5%	<1%
A friend or acquaintance	35%	50%
A family member or relative	4%	<1%
None of the above	45%	21%
Not sure	11%	10%

When indicating where the one situation occurred, men who characterized the situation as **bullying** were *more likely* to indicate nearly every response option, as demonstrated in Table 94. The largest differences observed were at a **military installation/ship, while on TDY/TAD, at sea, or during field exercises/alerts**, and **while at an official military function**.

Table 94.
Location of the One Situation for Men Who Did and Did Not Characterize the One Situation as Bullying

	Characterized Situation as Bullying	Did Not Characterize Situation as Bullying
At a military installation/ship (for example, on base, on shore duty, etc.) *	81%	53%
While you were on TDY/TAD, at sea, or during field exercises/alerts*	38%	15%
While you were deployed to a combat zone or to an area where you drew imminent danger pay or hostile fire pay	16%	4%
While transitioning between operational theaters (for example, going to or returning from forward deployment)	11%	4%
While you were in a delayed entry program	8%	2%
While you were in recruit training/basic training	9%	1%
While you were in any other type of military combat training	17%	4%
While at an official military function (either on or off base)*	30%	11%

* Categories with the three largest T-test values.

Further, men who characterized the sexual assault as **bullying** were *more likely* to indicate they were **sexually harassed both before and after the one situation**, and **stalked before the situation**, as displayed in Table 95.

Table 95.
Sexual Harassment and Stalking for Men Who Did and Did Not Characterize the One Situation as Bullying

	Characterized Situation as Bullying	Did Not Characterize Situation as Bullying
Sexually harass you <u>before</u> the situation	60%	26%
Stalk you <u>before</u> the situation	21%	10%
Sexually harass you <u>after</u> the situation	59%	26%

Like hazing, alcohol use was *less common* in situations described as **bullying**. More specifically, only 15% of men who described the one situation as **bullying** indicated **they had used alcohol before or during the one situation** compared to 40% of men who did not characterize the situation as bullying. Further, 14% of men who described the situation as bullying indicated that the

alleged offender(s) used alcohol before or during the one situation, compared to 35% of those who did not characterize the situation as bullying.

Men who did and did not characterize the one situation as bullying indicated *similar levels* of satisfaction with support provided by individuals and service providers.

Men who characterized the one situation as bullying were *more likely* to indicate high levels of workplace hostility (36%) than those who did not (12%). Analyses examining workplace climate for sexual assault showed men who characterized their experience as bullying had *lower perceptions* of a healthy workplace climate with respect to sexual assault when assessing fellow Service members at nearly every paygrade (see Table 96).

Table 96.

Perceptions of a Healthy Climate With Respect to Sexual Assault for Men Who Did and Did Not Characterize the One Situation as Bullying

	Characterized Situation as Bullying	Did Not Characterize Situation as Bullying
E4	16%	35%
E5	15%	37%
E6	19%	37%
E7–E9	28%	46%
O1–O3	31%	50%
O4–O6	39%	57%

Discussion

The 2016 prevalence rate of sexual assault was 0.6% for DoD men. Given the large male population in the DoD Services, this equates to a substantial number of survivors. Most of the research examining sexual assault has focused on women given that they are at higher risk for sexual assault than men. However, it is crucial to consider the unique experiences of men who experience sexual assault with an eye toward prevention and response. This chapter examined the demographic profile of men who indicated experiencing sexual assault and topline gender differences in sexual assault experiences before turning to an in-depth examination of hazing and bullying, both of which affect men to a larger degree than women.

Most men who indicated experiencing sexual assault are younger than 25 years of age, enlisted, and within their first five years of service. Targeting efforts toward this population is especially important as these individuals are more likely to experience sexual assault.

One key area in which gender differences emerged is the characterization of the one sexual assault situation with the largest effect as hazing or bullying, as men were far more likely than women to characterize the one situation as hazing or bullying. The demographic profile of men who characterize the one situation as hazing or bullying is largely similar to those who do not, although small differences were observed for level of education, paygrade, and age. As such, hazing and bullying victims do not have a unique demographic profile in comparison men who do not characterize the one situation as hazing or bullying.

However, hazing- and bullying-related sexual assault situations differ from non-hazing and non-bullying situations in several ways. For example, compared to men who did not characterize the one situation as hazing, men who characterized the one situation as hazing were more likely to indicate multiple alleged offenders were involved, both men and women were involved, and alleged offenders were all military members. This fits with the definition of hazing, which generally involves group members engaging in actions intended to humiliate or otherwise abuse a potential new group member. Men who characterized the one situation as hazing or bullying indicated multiple people were often involved and they experienced stalking and/or sexual harassment before the assault, which may indicate such assaults are planned as opposed to spontaneous events. This may be an area of prevention because if others (either leadership or peers) hear about an assault being planned, they may intervene or alert the appropriate party. The finding that alcohol is less likely to be involved in situations characterized as hazing or bullying also lends some support to this notion, as it implies that hazing and bullying are not fueled by impulse-inhibiting substances.

Men who characterized their experience as hazing or bullying were especially likely to indicate the alleged offender(s) was (were) of a higher rank, which may indicate offenders are targeting lower-ranking Service members. A power differential between the offender and victim is common in hazing and bullying dynamics and it appears that this finding extends to male Service members. Men who characterized their experience as hazing indicated lower levels of satisfaction with support provided by their unit commander/director and immediate supervisor after the assault. It may be that some higher ranking individuals are permissive of hazing and, at worst, engage in hazing. Accordingly, it is sensible that hazing victims would perceive lower levels of support from these individuals. Additional training on prohibitions against hazing and bullying and how to respond in hazing and bullying situations may be helpful for leadership.

Men who characterized the situation as hazing or bullying were also likely to experience multiple sexual assault incidents over the past 12 months, which indicates that they are repeatedly victimized. This is consistent with the definition of bullying, which entails repeated abuse. This pattern is especially concerning given that repeated sexual abuse is associated with particularly negative outcomes (Creech & Orchowski, 2016).

Men indicated hazing- and bullying-related sexual assault takes place at multiple locations. Compared to those who did not characterize their experience as hazing or bullying, those who did were particularly likely to indicate the situation occurred at a military installation/ship; while on TDY/TAD, at sea, or during field exercises/alerts; while at an official military function; or while in any other type of military combat training. Bullying (but not hazing) was less likely to occur when out with friends or at a party and more likely to occur during normal duty hours.

Overall, hazing- and bullying-related sexual assault is happening in Service members' regular place of work and training rather than in solely social situations or during trips off base.

Workplace climate perceptions also appear to have a relationship with hazing- and bullying-related sexual assault. Men who characterized their sexual assault experience as hazing or bullying were more likely to perceive high levels of workplace hostility than men who did not. Given that alleged perpetrators of hazing- and bullying-related sexual assault are overwhelmingly coworkers of survivors (i.e., fellow Service members); it follows that survivors of sexual assault might perceive their workplace as especially hostile. In a similar vein, men who characterized sexual assault as hazing or bullying were less likely to indicate that their fellow Service members at various paygrades exhibited behaviors consistent with a healthy climate with respect to sexual assault. Again, if a survivor's coworker(s) is (are) perpetrating sexual assault, perceptions of healthy workplace climate with respect to sexual assault are likely to be low. It is not possible to determine the direction of the relationship between workplace climate and the actual occurrence of sexual assault given the data available. However, these results suggest that environments that are high on workplace hostility and/or have an unhealthy climate with respect to sexual assault are associated with hazing- and bullying-related sexual assault.

Finally, men who characterized their sexual assault experiences as either hazing or bullying were more likely to indicate they had taken steps to separate from the military than those who did not characterize the situation as such. Men who characterized the one situation as bullying were less likely to indicate that they would choose to remain on active duty if given the choice. Accordingly, hazing- and bullying-related sexual assault may represent a threat to readiness given its effect on retention.

This chapter provides an understanding of hazing- and bullying-related sexual assault toward men. This information may be used to inform prevention efforts with the goal of eliminating these damaging behaviors.

Chapter 12:

The Continuum of Harm: Workplace Factors and Unwanted Gender-Related Behaviors in Association With Sexual Assault

Dr. Ashlea Klahr, Dr. Jason Debus, and Dr. Laura Severance

In the realm of sexual assault, the continuum of harm describes “inappropriate actions, such as sexist jokes, hazing, cyber bullying, that are used before or after the assault and/or supports an environment which tolerates these actions” (Department of Defense, 2014a). Analysis of the data from the 2016 *WGRA* demonstrated that DoD active duty Service members who indicated experiencing unwanted gender-related behaviors, such as sexual harassment or gender discrimination, were more likely to experience sexual assault. In addition, workplace factors, including workplace hostility, enlisted climate with respect to sexual assault, officer climate with respect to sexual assault, quality of sexual assault training, and the presence of female coworkers, were related to the likelihood of sexual assault. Among these workplace factors, workplace hostility and enlisted climate with respect to sexual assault were the strongest predictors of sexual assault. These results highlight the continuum of harm understanding of sexual assault, whereby lower level offenses, such as workplace hostility or sexual harassment are associated with the occurrence of sexual assault. Efforts to reduce workplace hostility and bolster a healthy workplace climate with respect to sexual assault are recommended as areas of emphasis in efforts to prevent sexual assault.

Background

The risk of sexual assault among military Service members can be understood along a continuum of harm of behaviors that generally decrease in prevalence and increase in severity moving along the continuum, ranging from workplace factors (e.g., workplace hostility, presence of female coworkers) to sexual harassment and related behaviors to sexual assault (Department of Defense, 2014a, Department of Defense, 2014b; see Figure 203). Numerous studies have demonstrated the interconnected nature of sexual assault and other types of aggression (e.g., Defense Manpower Data Center, 2014; Espelage, Low, Polanin, & Brown, 2013; Tjaden & Thoennes, 1998; Wilkins, Tsao, Hertz, Davis, & Klevens, 2014; Stockdale & Nadler, 2012). Furthermore, research has shown that falling victim to one type of violence increases the likelihood that survivors will either (a) commit a violent act (Wilkins et. al, 2014) or (b) experience later victimization (Gidycz, Coble, Latham, & Layman, 1993).

Sexual harassment and its detrimental nature in the workplace are well-documented, and sexual harassment is often accompanied by bullying and other forms of mistreatment (Lim & Cortina, 2005). Organizational factors in civilian workplaces that increase the likelihood for these types of behaviors include a climate of tolerance for sexual harassment, permissive leadership attitudes toward sexual harassment, imbalanced gender ratios, high power differentials between men and women, and the presence of other types of discrimination (based on gender or based on other characteristics such as race/ethnicity; Bell, Quick, & Cacyota, 2002; Fitzgerald, Swan, & Fischer, 1995; Harned, Ormerod, Palmieri, Collinsworth, & Reed, 2002). Consistent with research on civilian populations, sexual harassment is associated with multiple workplace factors among military Service members, such as workplace hostility and an unhealthy climate with respect to sexual assault (Defense Manpower Data Center, 2016; Fitzgerald, Drasgow, &

Magley, 1999). In addition, unwanted gender-related experiences, such as sexual harassment, are associated with significantly increased likelihood of sexual assault in the military (Defense Manpower Data Center, 2016; Sadler et al., 2003). It is important to note that the cross-sectional nature of most existing studies, as well as the current study, precludes the determination of whether unwanted gender-related experiences generally precede sexual assault or whether these experiences happen afterward, the research only suggests that these types of experiences often co-occur. It is not suggested that being a victim of sexual harassment *causes* an individual to become a victim of sexual assault. Instead, it is suggested that both types of experiences are related and may be indicative of environmental/cultural problems that increase risk for multiple types of adverse experiences.

Figure 203.

The Continuum of Harm in Relation to Sexual Assault

Approach

To further understand the continuum of harm as it relates to active duty Service members, OPA analyzed statistical relationships among rates of unhealthy workplace environments, unwanted gender-related behaviors, and past-year prevalence rates of sexual assault presented in the 2016 *WGRA*. It is important to reiterate that these analyses do not imply causation (i.e., they do not imply that the experience of an unwanted behavior, such as sexual harassment, causes sexual assault), but simply explore the association between unwanted gender-related behaviors and sexual assault (i.e., they examine whether sexual harassment and sexual assault are related).

Methodology

In the studies that follow, the associations between various continuum of harm behaviors and sexual assault rates are explored. First, associations between unwanted gender-related behaviors were examined using logistic regression. Subsequently, workplace factors—including workplace hostility, unit climate with respect to sexual assault at both the enlisted and the officer level, quality of sexual assault training, and presence of female coworkers in the workplace—were examined in relation to sexual assault using logistic regression. Dominance analysis was then used to rank these workplace factors in order of importance in terms of their association with sexual assault. Finally, the third study examined interactions between workplace factors and sexual harassment in predicting sexual assault in order to assess whether certain workplace factors might exacerbate or protect against the risk for sexual assault in the presence of sexual harassment. All analyses in this section were conducted using Stata 14.1 and included only DoD active duty Service members. Coast Guard members were excluded. Analyses were conducted using survey weighted data with adjustments for strata and finite population correction (fpc).

Study 1: Unwanted Gender-Related Behaviors and Sexual Assault

Across the Services, the rate of [sexual assault](#) was 4.3% for women and 0.6% for men (see Chapter 3 for a thorough overview of this topic). In order to test whether unwanted gender-related behaviors are part of a continuum of harm that increases risk for sexual assault, we examined whether [sexual assault](#) rates were higher for those who experienced [other unwanted gender-related behaviors](#) compared to those who did not. Table 97 displays the [sexual assault](#) rates for women and men who experienced and did not experience other [unwanted gender-related behaviors](#), including [sexual harassment](#) (which is further broken into [sexually hostile work environment](#) and [sexual quid pro quo](#)), [gender discrimination](#), and [sex-based MEO violations](#) (which includes both sexual harassment and gender discrimination that meet legal criteria for a violation).⁵²

As shown in Table 97, rates of [sexual assault](#) were *higher* among women and men who experienced [other unwanted gender-related behaviors](#). For example, among women who experienced [sexual harassment](#), 15.9% reported experiencing [sexual assault](#). Among women who did not experience [sexual harassment](#), 1.2% reported experiencing [sexual assault](#). These associations were further examined using logistic regression, first without any statistical control variables and then controlling for the following demographic factors: paygrade group, Service, and deployment status (whether the individual was deployed within the last 12 months). Odds ratios from both sets of regressions are displayed in Table 97. An odds ratio represents the odds that an outcome (i.e., sexual assault) will occur given a particular exposure (i.e., sexual harassment). For example, the odds ratio for women for sexual harassment (15.77) indicates that the odds of being sexually assaulted are approximately 16 times higher for women who have experienced sexual harassment than for women who have not. Across all comparisons, the odds ratios were statistically significant ($p < 0.001$), indicating that men and women who experienced

⁵² Chapter 1 details the construction of both the sexual assault measure and the sex-based MEO measures including specific criteria required to be included in the rate.

other unwanted gender-related behaviors in the past year were statistically *more likely* to experience a sexual assault compared to those who did not experience such behaviors.

Table 97.

Sexual Assault Rate and Odds Ratio Estimates for Women and Men Who Did and Did Not Experience Other Unwanted Gender-related Behaviors Along the Continuum of Harm

Unwanted Behaviors	Sexual Assault Rate for Women				Sexual Assault Rate for Men			
	Experienced Behavior	Did Not Experience Behavior	Odds Ratio	Odds Ratio with controls	Experienced Behavior	Did Not Experience Behavior	Odds Ratio	Odds Ratio with controls
Sexual Harassment	15.9%	1.2%	15.77	14.58	7.7%	0.2%	49.64	42.78
Hostile Work Environment	15.9%	1.2%	15.82	14.63	7.7%	0.2%	49.30	42.50
Sexual Quid Pro Quo	34.2%	3.6%	13.76	11.03	30.4%	0.5%	84.79	65.97
Military Equal Opportunity Violation	13.1%	1.2%	12.82	12.34	6.6%	0.2%	47.00	40.88
Gender Discrimination	11.7%	3.1%	4.15	4.16	7.3%	0.5%	17.46	14.96

Note: All odds ratios are significant at $p < .001$. Paygrade group, Service, and deployment status were included as controls.

Study 2: Workplace Factors and Sexual Assault

Workplace factors may contribute to a culture that is tolerant of or increases risk for sexual assault. The following workplace factors were examined in relation to sexual assault rates: workplace hostility, climate with respect to sexual assault among enlisted Service members and officers (i.e., the extent to which unit members display intolerance toward sexual harassment and promote a respectful climate), quality of sexual assault training, and presence of female coworkers in the workplace. Table 98 displays sample items for each workplace scale. The internal reliability of each scale was calculated using Cronbach's alpha. All scales demonstrated excellent internal consistency. In order to report proportions, continuous scale scores (values of 1–5) were dichotomized into healthy versus unhealthy categories. For the purpose of these analyses, low presence of female coworkers was considered an unhealthy or “risk” environment (versus a high presence of female coworkers). The measures of climate by paygrade were collapsed into summary scales of enlisted climate (E1–E9) and officer climate (O1–O6 and above, and W1–W5).

The proportion of the overall sample reporting unhealthy levels of workplace factors ranged from 7% (workplace hostility) to 54% (low presence of female coworkers). One-quarter of respondents reported an unhealthy quality of sexual assault training. Unhealthy climate proportions differed by rank, with 45% reporting an unhealthy climate among E1–E3 members to 23% reporting an unhealthy climate among O4–O6 members. Overall, a higher proportion of respondents reported an unhealthy climate among enlisted members (32%) than among officers (24%).

Table 98.***Question Wording and Sample Items, Proportions, and Standard Errors of Workplace Factors***

Workplace Variable (Cronbach's Alpha Reliability Statistic)	Question Wording and Sample Items	Coding	Proportion of the Full Sample Reporting an Unhealthy Environment	St. Error
Workplace hostility ($\alpha = 0.91$)	Q193: How often have you experienced any of the following behaviors, where military coworkers or supervisors... <ul style="list-style-type: none"> – <i>Used insults, sarcasm, or gestures to humiliate you?</i> – <i>Gossiped/talked about you?</i> – <i>Did not provide information or assistance when you needed it?</i> 	Moderate-to-high scores (3–5) coded as unhealthy	6.75%	0.0010
Enlisted climate ($\alpha = 0.96$)	Q181–Q188: In the past 12 months, how well have military members of the following paygrades... <ul style="list-style-type: none"> – <i>Promoted a unit climate based on mutual respect and trust?</i> – <i>Led by example by refraining from sexist comments and behaviors?</i> 	Low-to-moderate scores (1–3.99) coded as unhealthy	32.32%	0.0017
E1–E3 climate ($\alpha = 0.95$)			44.79%	0.0019
E4 climate ($\alpha = 0.95$)			40.74%	0.0018
E5 climate ($\alpha = 0.94$)			33.70%	0.0017
E6 climate ($\alpha = 0.94$)			28.11%	0.0016
E7–E9 climate ($\alpha = 0.94$)			24.10%	0.0016
Officer climate ($\alpha = 0.97$)			23.51%	0.0015
O1–O3 climate ($\alpha = 0.94$)			26.51%	0.0016
O4–O6 climate ($\alpha = 0.94$)			22.62%	0.0015
O7 and above climate ($\alpha = 0.95$)			23.27%	0.0017
W1–W5 climate ($\alpha = 0.95$)			28.03%	0.0023

Table 97. (continued)

Workplace Variable (Cronbach's Alpha Reliability Statistic)	Question Wording and Sample Items	Coding	Proportion of the Full Sample Reporting an Unhealthy Environment	St. Error
Quality of sexual assault training ($\alpha = 0.97$)	Q200: My Service's sexual assault training... – <i>Provides a good understanding of what actions are considered sexual assault.</i> – <i>Explains the reporting options available if a sexual assault occurs.</i>	Low-to-moderate scores (1–3.99) coded as unhealthy	24.88%	0.0015
Presence of female coworkers	Q190: Are you currently in a military work environment where female coworkers are uncommon (less than 25% of your military coworkers)?	Yes (females coworkers are uncommon coded as unhealthy)	54.44%	0.0017

Note: α = Cronbach's alpha.

Table 99 displays the [sexual assault](#) rates and odds ratio estimates for women and men who reported unhealthy versus healthy levels of workplace factors. Paygrade group, Service, and deployment status were included as control variables in the logistic regressions and workplace factor variables were treated as continuous when possible. Across nearly all comparisons, the odds ratios were statistically significant ($p < 0.001$), indicating that Service members in [unhealthy military workplace environments](#) were statistically *more likely* to indicate experiencing a [sexual assault](#). As an example, the odds ratio for men for [workplace hostility](#) (2.85) indicates that the odds of being [sexually assaulted](#) are roughly 3 times *higher* for men who indicated experiencing an [unhealthy level of workplace hostility](#) compared to men who did not experience [workplace hostility](#). Although these results point to an association between workplace factors and sexual assault, it is important to note that, because this is a cross-sectional study, it is possible that individuals who experience sexual assault are more likely to describe their workplace as unhealthy following the assault (and not necessarily before the assault).

Table 99.

Rates of Sexual Assault by Unhealthy Versus Healthy Levels of Workplace Factors, Separately by Gender

Workplace Factor	Sexual Assault Rate for Women			Sexual Assault Rate for Men		
	Unhealthy Level	Healthy Level	Odds Ratio Estimate With Controls	Unhealthy Level	Healthy Level	Odds Ratio Estimate With Controls
Workplace Hostility	10.49%	3.18%	1.92**	3.40%	0.29%	2.85**
Enlisted Climate	6.37%	1.62%	2.42**	1.17%	0.17%	3.33**
Officer Climate	6.03%	2.46%	1.98**	1.22%	0.27%	2.58**
Quality of Training	6.22%	2.71%	2.20**	0.90%	0.29%	2.44**
Presence of Female Coworkers	4.64%	2.96%	1.47**	0.50%	0.52%	0.96

Note: ** $p < .01$

Dominance Analysis of Workplace Factors

The results of the logistic regressions demonstrated that almost all workplace variables were related to [sexual assault](#) for both women and men (only presence of female coworkers was non-significant, and this was only for men). Thus, a dominance analysis was conducted, separately by gender, to identify which workplace variables are the strongest predictors of [sexual assault](#) among female and male Service members (see Table 100).⁵³ Results demonstrated that [enlisted climate with regard to sexual assault](#) was the strongest predictor of [sexual assault](#) for women, with [workplace hostility](#) as the second strongest predictor. For men, [workplace hostility](#) was the strongest predictor of [sexual assault](#), followed by [enlisted climate](#). [Presence of female coworkers](#) was the weakest predictors for both men and women, whereas [officer climate](#) and [quality of sexual assault training](#) fell in the middle for both men and women.

⁵³ Dominance analysis is a statistical technique that allows for the determination of relative importance among a set of independent variables in a statistical model. The approach is based on a mathematical comparison of all possible subset models. The model calculates a standardized dominance statistic for each independent variable, which is used to rank predictors in order to importance (Azen & Traxel, 2009; Budescu, 1993; Luchman, 2013, 2014).

Table 100.

Results of Dominance Analyses Examining the Relative Importance of Workplace Factors in Predicting Sexual Assault, by Gender

Variable	Women		Men	
	Standardized Dominance Statistic	Rank	Standardized Dominance Statistic	Rank
Enlisted Climate	0.3179	1	0.3050	2
Workplace Hostility	0.1555	2	0.3397	1
Officer Climate	0.1266	3	0.1079	3
Quality of Training	0.1108	4	0.0682	4
Presence of Female Coworkers	0.0108	5	0.0014	5

Study 3: Interactions Between Sexual Harassment and Workplace Factors in Predicting Sexual Assault

Following examination of the association between unwanted gender-related behaviors and workplace factors on sexual assault as described above, we examined whether [sexual harassment](#) and [workplace factors](#) interact to predict [sexual assault](#) (i.e., whether workplace factors moderate the association between sexual harassment and sexual assault) using logistic regression.⁵⁴ [Sexual harassment](#) was chosen for examination from the list of previously examined unwanted gender-related behaviors because of its strong association with [sexual assault](#). This moderation model allowed us to examine, for example, whether workplace hostility might exacerbate the link between sexual harassment and sexual assault or whether the quality of sexual assault training provided might attenuate the link between sexual harassment and sexual assault.

Consistent with prior models, paygrade group, Service, and deployment status were included as control variables. In order to maximize power for detecting significant effects among many potential interactions, analyses were run for women and men combined and gender was added as a control variable. All interaction terms were modeled simultaneously in order to mitigate the effects of multiple testing. Only one interaction reached statistical significance: [Sexual harassment](#) by [Workplace hostility](#) (Odds ratio = 0.67, $p < .001$).

As shown in Figure 204, [workplace hostility](#) acts to exacerbate the link between [sexual harassment](#) and [sexual assault](#). Although [sexual harassment](#) is a robust predictor of [assault](#) (regardless of workplace hostility), [workplace hostility](#) strengthens the link between [sexual harassment](#) and [sexual assault](#). Individuals who experience both [sexual harassment](#) and [workplace hostility](#) are at particularly high risk of [sexual assault](#). Conversely, in the absence of [workplace hostility](#) and [sexual harassment](#), the rate of [sexual assault](#) is extremely low.

⁵⁴ The logistic regression model included the main effects of sexual harassment and all workplace variables, interactions between sexual harassment and all workplace variables, and control variables (gender, paygrade, Service, and deployment status).

Figure 204.

Association Between Sexual Harassment and Sexual Assault Across Levels of Workplace Hostility

Note: Bars indicate predictive margins with 95% confidence intervals.

Discussion

Results from the 2016 WGRA suggest that there is a continuum of harm that is associated with sexual assault, with “lower-level” behaviors, including unwanted gender-related behaviors (e.g., sexual harassment) and workplace factors (e.g., workplace hostility, low quality sexual assault prevention training), increasing the likelihood of sexual assault for both men and women. These lower level problems, which occur at higher rates than sexual assault itself, are more readily visible in the workplace and are appropriate targets for prevention and intervention policies seeking to decrease the occurrence of sexual assault.

Among workplace factors, workplace hostility emerged as a salient predictor of sexual assault, particularly among men but also among women. Sexual assault is an extreme type of hostile workplace behavior, so it is perhaps unsurprising that the presence of other hostile behaviors (e.g., insulting or humiliating coworkers) is associated with sexual assault. Tolerance of these types of hostile behaviors may communicate that such behaviors are acceptable—and for some, hostile behaviors may escalate to the point of sexual assault or allow for a culture that accepts these behaviors from others.

The climate among enlisted Service members was also an important predictor of sexual assault and was the strongest predictor for women. Young adults often look to their peers to set the standard for acceptable behavior (Arnett, 2007), and young adults in the military are no exception. Although leadership behaviors are crucial, the typical Service member spends more time interacting with individuals of a similar rank. For the vulnerable junior enlisted population, the climate among fellow junior enlisted personnel is highly important. When enlisted Service members create a climate that demonstrates intolerance for behaviors such as sexist comments and instead promotes an atmosphere of mutual respect, the likelihood of sexual assault is decreased. This finding emphasizes that building a respectful environment and preventing sexual assault is not only the responsibility of leadership. Every Service member has a role to play in fostering a military workplace environment that is free from sexual assault.

Chapter 13: Additional Descriptive Analyses and Future Directions

Ms. Lisa Davis, Dr. Ronald P. Vega, and Mr. Jeffrey McLeod

The 2016 WGRA is scientifically conducted to allow for generalization to the full active duty force. As such, it provides the Department with important information to inform policies and resources. Additional analyses are often required to fully understand the patterns and trends contained in the survey data. This chapter provides additional analyses on topics of interest to the Department. Specifically, this chapter covers two areas of interest: an analysis of prevalence rates for those who identify as lesbian, gay, bisexual, or transgender (LGBT) and an analysis of an expanded metric of sexual assault.

Statistical comparisons provided in the following sections are used to assess observed differences between groups but cannot provide predictive interpretations or be used to measure causation. Many analyses, although informative, may raise additional questions. Where applicable, each section identifies these gaps in understanding and provides considerations for future analyses.

Analysis of LGBT Service Members

Before 2016, the Department had not established sexual assault and sexual harassment prevalence rates for those Service members who identify as LGBT. The 2016 WGRA included questions addressing sexual orientation and transgender identity to gain a better understanding of the risk of sexual assault, sexual harassment, and gender discrimination for military members identifying as LGBT and will assist in improved prevention and targeted response efforts for these members.

Self-Report Identification as LGBT

As shown in Figure 205, in 2016, the majority of DoD women (79%) and DoD men (90%) indicated they were **heterosexual or straight**. Six percent of women and 1% of men indicated they were **gay or lesbian**, 5% of women and 1% of men indicated they were **bisexual**, and 2% of women and 1% of men indicated **some other sexual orientation**. Eight percent of women and 6% of men indicated they **preferred not to answer** the question.

Figure 205.
Self-Reported Sexual Orientation for DoD (Q211)

As shown in Figure 206, only 1% of DoD women and DoD men indicated they identified as **transgender**. The vast majority of women (95%) and men (93%) indicated they are **not transgender**. Only 1% of women and men were unsure, and 3% of women and 5% of men preferred not to answer.

Figure 206.
Self-Reported Identification as Transgender for DoD (Q212)

To analyze experiences of unwanted gender-related behaviors among members who identify as LGBT, responses to the sexual orientation and transgender questions were combined to form two groups: those identifying as LGBT and those who do not. As a result, in 2016, 5% (± 1) of DoD active duty members indicated they identify as LGBT. As shown in Figure 207, 12% of DoD women and 3% of DoD men indicated they identify as LGBT.

Figure 207.

Self-Reported Identification as LGBT for DoD (Q211–Q212)

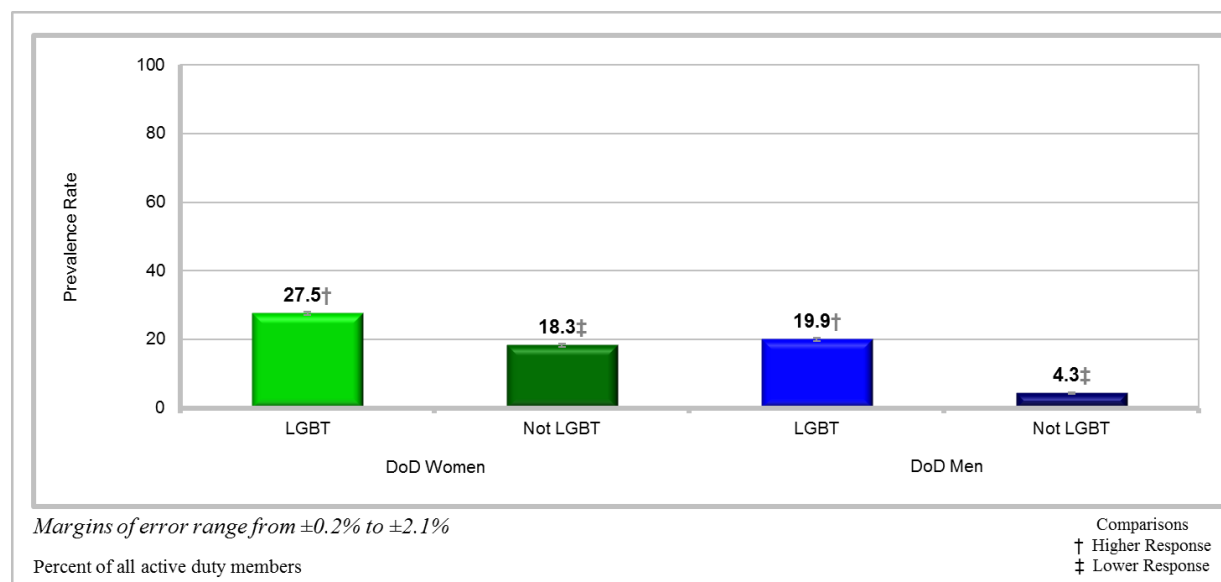

Prevalence Rates for LGBT Members

The [sexual assault prevalence rate](#) for DoD members *identifying as LGBT* is 4.5% (± 0.8) compared to 0.8% (± 0.1) for those who *do not identify as LGBT*. Members *identifying as LGBT* are *more likely* to indicate experiencing [sexual assault](#) than members who *do not identify as LGBT*. When looking at the rates by self-reported gender, the same is true: women and men who *identify as LGBT* (6.3% for women and 3.5% for men) are more likely to indicate experiencing [sexual assault](#) than those who *do not identify as LGBT* (3.5% for women and 0.3% for men; Figure 208).

Figure 208.***Sexual Assault Past Year Prevalence Rate for DoD by LGBT Identification***

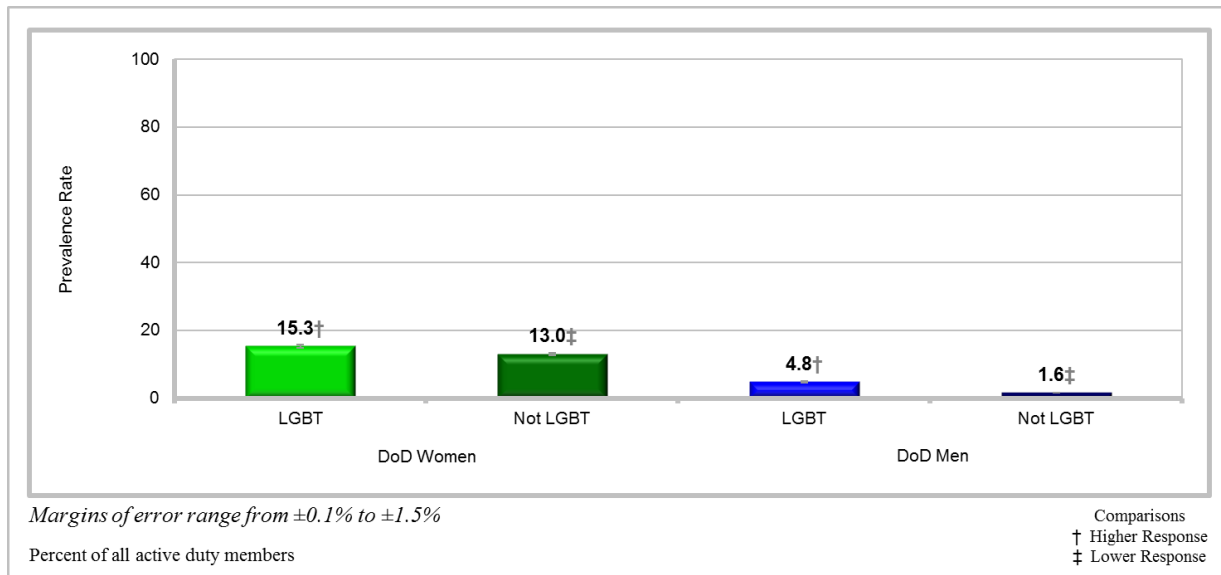

The **sexual harassment** rate for DoD members *identifying as LGBT* is 22.8% (± 1.5) compared to 6.2% (± 0.2) for those who *do not identify as LGBT*. Members *identifying as LGBT* are *more likely* to indicate experiencing **sexual harassment** than members who *do not identify as LGBT*. When looking at the rates by self-reported gender, the same is true: women and men who *identify as LGBT* (27.5% for women and 19.9% for men) are more likely to indicate experiencing **sexual harassment** than those who *do not identify as LGBT* (18.3% for women and 4.3% for men; Figure 209).

Figure 209.***Sexual Harassment Past Year Prevalence Rate for DoD by LGBT Identification***

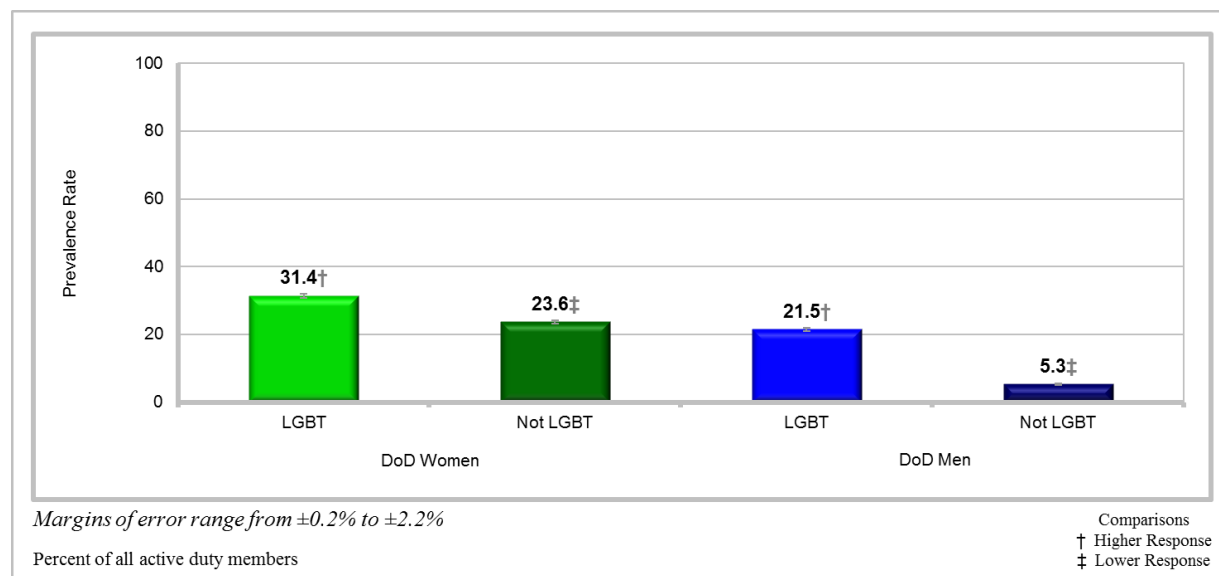

The **gender discrimination** rate for DoD members *identifying as LGBT* is 8.8% (± 1.0) compared to 3.2% (± 0.2) for those who *do not identify as LGBT*. Members *identifying as LGBT* are *more likely* to indicate experiencing **gender discrimination** than members who *do not identify as LGBT*. When looking at the rates by self-reported gender, the same is true: women and men who *identify as LGBT* (15.3% for women and 4.8% for men) are more likely to indicate experiencing **gender discrimination** than those who *do not identify as LGBT* (13.0% for women and 1.6% for men; Figure 210).

Figure 210.

Gender Discrimination Past Year Prevalence Rate for DoD by LGBT Identification

The **sex-based MEO violation** rate for DoD members *identifying as LGBT* is 25.3% (± 1.5) compared to 7.8% (± 0.2) for those who *do not identify as LGBT*. Members *identifying as LGBT* are *more likely* to indicate experiencing a **sex-based MEO violation** than members who *do not identify as LGBT*. When looking at the rates by self-reported gender, the same is true: women and men who *identify as LGBT* (31.4% for women and 21.5% for men) are more likely to indicate experiencing a **sex-based MEO violation** than those who *do not identify as LGBT* (23.6% for women and 5.3% for men; Figure 211).

Figure 211.***Sex-Based MEO Violation Past Year Prevalence Rate for DoD by LGBT Identification*****Continuum of Harm and Odds Ratios for LGBT Members**

In order to test whether unwanted gender-related behaviors are part of a continuum of harm that increases risk for sexual assault, we examined whether sexual assault rates were higher for those who experienced other unwanted gender-related behaviors compared to those who did not. Table 95 displays the sexual assault rates for women and men who experienced and did not experience sexual harassment.

As seen in Table 101, rates of sexual assault were higher among DoD members who experienced sexual harassment, including among DoD members identifying as LGBT. For example, among LGBT women who experienced sexual harassment, 19.6% reported experiencing sexual assault. Among LGBT women who did not experience sexual harassment, 1.2% reported experiencing sexual assault. These associations were further examined using logistic regression, first without any statistical control variables and then controlling for the following demographic factors: paygrade group, Service, and deployment status (whether the individual was deployed within the last 12 months). Odds ratios from both sets of regressions are displayed in Table 102. An odds ratio represents the odds that an outcome (i.e., sexual assault) will occur given a particular exposure (i.e., sexual harassment). For example, the odds ratio for LGBT women for sexual harassment (20.4) indicates that the odds of being sexually assaulted are approximately 20 times higher for LGBT women who have experienced sexual harassment than for LGBT women who have not. The odds ratio (likelihood of sexual assault given sexual harassment) is higher among LGBT women (20.4) than non-LGBT women (13.0); however, among men, the odds ratio is higher among non-LGBT men (48.4) than LGBT men (11.1).

Table 101.

Sexual Assault Rate and Odds Ratio Estimates for LGBT and Non-LGBT DoD Members Who Did and Did Not Experience Sexual Harassment

Sexual Assault Rates among LGBT Members				Sexual Assault Rates Among Non-LGBT Members		
	Experienced Sexual Harassment	Did Not Experience Sexual Harassment	Odds Ratio with Controls	Experienced Sexual Harassment	Did Not Experience Sexual Harassment	Odds Ratio with Controls
Total DoD	15.8%	1.2%	14.7	8.8%	0.2%	38.9
DoD Women	19.6%	1.2%	20.4	13.8%	1.1%	13.0
DoD Men	12.6%	1.2%	11.1	5.5%	0.1%	48.4

Note. All odds ratios significant at $p < .01$ while controlling for Service, paygrade, and deployment status

As shown in Table 102, LGBT DoD members report higher rates of sexual harassment and sexual assault than non-LGBT members, both overall and looking at DoD women and DoD men separately.

Table 102.

Odds Ratios for LGBT Sexual Assault and Sexual Harassment Rates Versus Non-LGBT Sexual Assault and Sexual Harassment Rates for DoD

	Rate Among LGBT Members	Rate Among Non-LGBT Members	Odds Ratio with Controls
Total DoD			
Sexual Harassment	22.8%	6.2%	3.9
Sexual Assault	4.5%	0.8%	5.0
DoD Women			
Sexual Harassment	27.5%	18.3%	1.5
Sexual Assault	6.3%	3.5%	1.5
DoD Men			
Sexual Harassment	19.9%	4.3%	4.8
Sexual Assault	3.5%	0.3%	8.6

Note. All odds ratios significant at $p < .01$, while controlling for Service, paygrade, and deployment status

Discussion

Given the increased odds that members identifying as LGBT have for experiencing unwanted gender-related behaviors, further research should be conducted to explore what makes this population more vulnerable to such crimes. Similar to the research provided on the experience of male victims, analysis of LGBT members who indicate experiencing sexual assault would

provide a more in-depth look of their experiences and provide the Department with valuable information on how to better support and increase prevention for this vulnerable population.

Expanded Sexual Assault Metric

Background

In 2012, the definition of the term “sexual act” was revised per Article 120, UCMJ, to include “any touching, or causing another person to touch, either directly or through the clothing, any body part of any person, if done with an intent to arouse or gratify the sexual desire of any person. Touching may be accomplished by any part of the body.” The sexual assault metric used in the *2014 RMWS* did not account for this revision to expand touching to any part of the body. When developing the sexual assault metric for the *2014 RMWS*, RAND explained where the metric does and does not align with the law and provided the following rationale for not including the revised touching of any part of the body when asking about non-penetrative crimes:

“...the screening questions do not attempt to comprehensively assess a new type of Sexual Contact that was introduced in the 2012 version of the code. Specifically, contact for a sexual purpose that does not involve the designated private body areas (see Article 120[g][2][B]). This instrument only counts such instances if they occurred as part of an attempted penetrative Sexual Act. Thus the instrument may miss some unusual types of sexual assaults (e.g., sexual practices involving only those body parts that are not usually seen as private areas). RAND has omitted this class because such behaviors cannot be measured without a highly detailed and lengthy series of questions,” (RAND, 2014).

For the *2016 WGRA*, OPA worked with SAPRO and the Office of General Counsel (OGC) to expand the sexual assault metric to account for this change in the definition of non-penetrative crimes. While maintaining the ability to trend back to the measure in the *2014 RMWS*, OPA identified two additional sexual assault behaviors for unwanted touching to include in the *2016 WGRA* that reference “any” body part. Respondents were only presented these new questions about touching of “any” body part if they indicated they did not experience touching of private areas, which allows OPA to trend back to the *2014 RMWS* sexual assault prevalence rates. See Figure 212 for the comparison of behaviors from the *2014 RMWS* and *2016 WGRA*.

Figure 212.
Metric Changes for Sexual Assault Behaviors

	<ul style="list-style-type: none"> ➤ Someone attempted to put a penis, an object, or any body part into your vagina, anus, or mouth, but no penetration actually occurred 	<ul style="list-style-type: none"> ➤ Someone attempted to put a penis, an object, or any body part into your vagina, anus, or mouth, but no penetration actually occurred

This chapter evaluates the expanded measure to determine if we can conclude with reasonable certainty that the choice between the two measures (the original metric and the expanded metric) would not alter the conclusions of this report. Results from this analysis can be used to determine which metric should be used in future gender relations surveys.

To achieve this goal, a literature review was conducted to determine the relationships between sexual assault and other physical, psychological, and social attributes, resulting in a network of related antecedents and outcomes of sexual assault. Below is a discussion of the results of this literature review and the results of the analyses comparing the two metrics. For additional information regarding the calculation of the sexual assault metric, please refer to Chapters 1 and 2.

Previous research has suggested that sexual assault is related to attributes of the social climate surrounding the sexual assault. For example, Willness et. al., (2007) show meta-analytically that gendered job context and organizational climate predict reports of sexual harassment in the workplace. An organizational climate for sexual harassment and sexual assault has three characteristics: First, individuals feel there is risk connected with complaining or reporting sexual assault or harassment, such as receiving poorer performance evaluations or becoming a social outcast. Second, individuals have a perceived lack of punishment for perpetrators. Third, and finally, individuals feel as if their complaints or reports of sexual harassment or assault are not taken seriously. In another study examining risk and preventative factors outside of the organizational context, several additional climate factors were identified such as aggressiveness, training about sexual assault prevention, and a socially hostile climate (Harrell & Castaneda,

2009; Tharp et. al., 2013). For these reasons, the current analysis examined the relationship between the sexual assault rate and a supportive sexual assault reporting climate, supportive leadership attitudes toward sexual assault prevention, Workplace Aggression, perceived ease of reporting, sexual assault training, and threatening social media use.

Previous research has also identified the impact of experiencing sexual assault on social and psychological outcomes. Experiencing sexual assault has been shown to be related to depression and Post Traumatic Stress Disorder (PTSD; Harrell & Castaneda, 2009; Willness et al., 2007). Additionally, experiencing sexual harassment in the workplace has predicted turnover (Willness et al., 2007). For the investigation of the relationships between the two sexual assault metrics and outcomes, the analysis will focus on depression, PTSD, and retention intention.

Methodology

In order to examine the relationships between the above mentioned attributes and characteristics (e.g., PTSD, Workplace Aggression) and the two approaches to operationalizing sexual assault (current metric and expanded metric), a survey weighted Pearson correlation was calculated for each relationship. The goal of this analysis was to investigate whether the current metric and expanded metric had similar relationships with other attributes of sexual assault (e.g., PTSD, Workplace Aggression), thus suggesting that policy implications and conclusions of this report would be the same if the expanded definition of sexual assault was used instead of the current definition. In null-hypothesis significance testing language, we are hypothesizing the null (i.e., there are no differences between the two groups of analyses) and therefore statistical comparisons of the groups would be inappropriate. Alternatively, a qualitative comparison of the two groups of relationships will be conducted by comparing the direction and statistical significance of each relationship to determine whether the two metrics are comparable. The operational definitions of the attributes are discussed below. For variables that are reported as a mean score, this analysis used all available data by including any participant that responded to at least one question in the item set. This decision was made to ensure maximal amount of data was used due to the low prevalence of sexual assault.

Supportive Sexual Assault Reporting Environment

[Supportive sexual assault reporting environment](#) was generated by averaging items Q177a–Q177e. These items ask respondents how likely they would be to encourage others to report sexual harassment and sexual assault. This scale score had a sufficient Cronbach Alpha, suggesting that the items do indeed represent a similar construct ($\alpha = .86$).

Supportive Leadership/Peer Attitudes Toward Sexual Assault Prevention

[Supportive leadership and peer attitudes toward sexual assault prevention](#) were generated by averaging items Q181a–Q181i. These items ask respondents how well military members across different paygrades made it clear that sexual assault has no place in the military. This scale score had a sufficient Cronbach Alpha, suggesting that the items do indeed represent a similar construct ($\alpha = .93$).

Workplace Aggression

Workplace aggression was generated by averaging items Q193a–Q193i. These items ask respondents whether coworkers or supervisors engage in behaviors such as provide excessively harsh criticism, yell when they were angry, and damage or steal property. This scale score had a sufficient Cronbach Alpha suggesting that the items do indeed represent a similar construct ($\alpha = .91$).

Perceived Ease of Reporting

Perceived ease of reporting was generated by averaging items Q203a–Q203f. These items focus on respondents' perceptions that they trusted that if they were sexually assaulted or harassed that they would be treated properly (e.g., with dignity and respect). This scale score had a sufficient Cronbach Alpha, suggesting that the items do indeed represent a similar construct ($\alpha = .71$).

Sexual Assault Prevention Training

The indicator used to identify whether a participant has had **sexual assault prevention training** in the previous 12 months was Q199.

Threatening Social Media Use

Threatening social media use was measured by a series of items (Q205a–Q205d) that ask if the participant was aware of a Service member misusing social media sites to ridicule, abuse, stalk, or harm another military member, a member of the participant's chain of command, another leader outside of the participant's chain of command, or the DoD as a whole.

Depression

Depression was generated by averaging items Q198a–Q198h. These items focus on the frequency symptoms of depression, including feeling down, depressed, or hopeless. This scale score had a sufficient Cronbach Alpha, suggesting that the items do indeed represent a similar construct ($\alpha = .92$).

PTSD

The **PTSD** metric was constructed using items Q197a–Q197e. This series of items asks respondents who have experienced an especially traumatic event if in the past month they have experienced negative outcomes such as nightmares about the event and feelings of guilt about the event.

Retention Intention

Retention intention was measured by asking participants how likely they would be to stay on active duty.

Results

The *unweighted* frequency counts for the current sexual assault are 1,682 respondents who indicated experiencing sexual assault and 130,740 respondents who indicated not experiencing sexual assault. The *unweighted* frequency counts for the expanded sexual assault are 2,043 respondents who indicated experiencing sexual assault and 130,375 respondents who indicated not experiencing sexual assault. Given that the expanded metric only identifies 361 additional respondents as having indicated experiencing sexual assault, the below analyses have a limited ability to compare the new and expanded metrics. In light of this, the similarities between the two metrics should be interpreted cautiously.

Overall, the results of this analysis suggest that the current and expanded metrics of sexual assault are very comparable and displayed similar patterns and magnitudes of relationships with known correlates of sexual assault (see Table 103). Each of the expected relationships were significant and in the anticipated direction based on previous research (Harrell & Castaneda, 2009; Tharp et al., 2013; Willness, et al., 2007). On both metrics, [workplace aggression](#), [threatening social media use](#), [depression](#), and [PTSD](#) had a positive relationship with experiencing sexual assault. Again, on both metrics, a [supportive sexual assault reporting climate](#), [supportive leadership attitudes toward sexual assault prevention](#), [perceived ease of reporting](#), [sexual assault prevention training](#), and [retention intention](#) had a negative relationship with sexual assault.

Table 103.

Relationships Between Current and Expanded Metrics of Sexual Assault and Other Attributes

	Current SA Metric	Expanded SA Metric
Supportive sexual assault reporting environment	-.13*	-.13*
Supportive leadership/peer attitudes toward sexual assault prevention	-.11*	-.12*
Workplace aggression	.12*	.13*
Perceived ease of reporting	-.10*	-.10*
Sexual assault prevention training	-.03*	-.02*
Threatening social media use	.05*	.05*
Depression	.12*	.12*
PTSD	.09*	.09*
Retention intention	-.05*	-.06*

Note. Sexual assault coded 0, 1 with 1 representing participant reporting experiencing sexual assault

Note. * $p < .02388$ (family-wise error rate adjusted p-value)

Discussion

The conclusions and policy recommendations drawn from this report are dependent on the survey methodological and analytic decisions made to generate the report content. One such decision was determining to report the current or expanded version of the sexual assault metric. Although the rationale for this decision has been discussed at length in previous chapters of this report (see Chapter 2), statistical analyses were used in this section to determine whether the results or recommendations might have been different had the other metric been used for

reporting. The results of these analyses suggest that the expanded and current metrics of sexual assault are comparable. By investigating the nomological network of sexual assault based on previous research, we can conclude with reasonable certainty that the choice between the two metrics would not alter the conclusion from this report.

Continuing Assessment

The *2016 WGRA* is part of a biennial cycle of the active duty military designed to provide results comparable across survey years for evaluation of progress. On non-survey years, focus groups of active duty members at varying installations are conducted to delve deeper into current issues and to seek further understanding of findings which were not fully captured during the survey administration. Results from the focus groups aid in developing new survey questions more relevant to the current state of the active duty force, including any new areas of interest to the Department. Examples are provided below.

The *2016 WGRA* showed concerning levels of dissatisfaction with leadership response to men who experience sexual assault in the military. Therefore, *2017 WGRA* focus groups could explore why men are dissatisfied with the leadership response when they come forward to report a sexual assault. The results would help the Department understand where military leadership is falling short in response to sexual assault and identify areas for future improvement.

Recent news has highlighted the misuse of social media sites across the military. While the *2016 WGRA* provides some data regarding such misuse, results are limited due to the nature of the survey questions. Asking such questions at the focus groups could shed more light onto the misuse of social media from active duty members' perspectives from the focus groups. Information could be used by the Department to further identify areas of risk of social media and help formulate policy and guidelines for proper use of social media sites for military members. In addition, results could help develop future survey items for inclusion on the next *WGRA*.

Additional Research

The *2016 WGRA* report provides extensive information taken directly from analyses of the survey. While this information is valuable to the Department and Service leaders, further analyses can provide more targeted results. For example, while individual questions provide estimates of rates, behaviors, and perceptions of the active duty military, taking these questions and combining the results can provide a more complete look at situations or constructs of interest. OPA conducts ongoing analyses of survey data using complex modeling techniques to explore and quantify potential covariates in the data. Survey notes are published based on such efforts and posted on https://www.dmdc.osd.mil/appj/dwp/dwp_surveys.jsp. Future analyses will include further analysis of leadership climate and hazing and bullying.

2016 Workplace and Gender Relations Survey of Active Duty Members

PRIVACY ACT STATEMENT & INFORMED CONSENT INFORMATION

Your name and contact information have been used only for the distribution of this survey. Your responses to the demographic questions will allow DoD to better analyze all responses among varying demographic groups. Responding to this survey is voluntary. The survey is confidential. DoD is promising confidentiality to those who were selected to participate in this important survey. Therefore, any responses you provide regarding experiences of unwanted gender-related behaviors will not impact your reporting options. Defense Manpower Data Center (DMDC) has received a federal "Certificate of Confidentiality" that provides DMDC with additional protection against any attempt to subpoena confidential survey records. Most people can complete the survey in 30 minutes. There is no penalty to you if you choose not to respond. However, maximum participation is encouraged so the data will be complete and representative. This survey assesses the respondent's perspective regarding experiences of sexual harassment and sexual assault. Any reference to a perpetrator is not intended to convey guilt or innocence of any person.

Additional Information

10 USC Sections 136, 481, 1782, 2358, 14 USC 1 and Section 570 of the FY13 NDAA, authorize the Department of Defense to conduct this survey. Reports will be provided to the Department of Defense (DoD), each Military Department, and the Joint Chiefs of Staff.

DMDC uses well-established, scientific procedures to randomly select a sample representing the Defense community based on combinations of demographic characteristics (for example, Service and gender).

Identifying information will be used only by government and contractor staff engaged in, and for purposes of, survey research. In no case will individual identifiable survey responses be reported.

The data collection procedures are not expected to involve any risk or discomfort to you.

Survey data may be shared with DoD researchers or organizations outside the DoD who are conducting research on DoD personnel. DMDC performs a disclosure avoidance analysis to reduce the risk of there being a combination of demographic variables which can single out an individual.

Your responses could be used in future research. Results from these surveys will be posted on the web: https://www.dmdc.osd.mil/app/dwp/dwp_surveys.jsp

If you answer any items or indicate distress or being upset, etc., you will not be contacted for follow-up purposes. However, if you indicate a direct threat to harm yourself or others within responses or communications about the survey, because of concern for your welfare, DMDC may notify an office in your area for appropriate action.

A respondent who experienced sexual harassment or sexual assault may experience discomfort and/or other emotions while completing the survey. Contact information is provided below for those who experience such discomfort.

- If you are a victim of sexual assault, or a person who wishes to prevent or respond to this crime, you may want to contact a Sexual Assault Response Coordinator (SARC) or Victim Advocate (VA).
 - To reach Military OneSource 24/7 for restricted/unrestricted reporting and established DoD Sexual Assault Services, call a hotline number:
 - Stateside: 1-800-342-9647
 - Overseas: 00-800-3429-6477 or call collect 1-484-530-5908
 - Worldwide: <http://www.militaryonesource.com/> or www.sapr.mil/
- If you are a victim of sexual harassment, or a person who wishes to prevent or respond to it, you may want to contact your Service's local sexual harassment or equal opportunity office.
 - To reach a hotline for your Service, call:

Army: 1-800-267-9964

Marine Corps: 703-784-9371

Navy: 1-800-253-0931

Air Force: 1-800-616-3775

Coast Guard: 1-888-992-7387

If you experience any difficulties while taking the survey, please contact the Survey Processing Center by sending an e-mail to wgr-survey@mail.mil or calling, 1-800-881-5307. If you have concerns about your rights as a research participant, please contact the OUSD(P&R) Research Regulatory Oversight Office at 703-681-6522/ 703-681-8320 or e-mail DHRA.R202.PR@mail.mil.

2016 Workplace and Gender Relations Survey of Active Duty Members

Once you start answering the survey, if you desire to withdraw your answers, please notify the Survey Processing Center prior to September 28, 2016. Please include in the e-mail or phone message your name and Ticket Number. Unless withdrawn, partially completed survey data may be used after that date.

Click **Continue** if you agree to take the survey.

HOW TO CONTACT US

If you have questions or concerns about this survey, you have three ways to contact the Survey Operations Center:

- **Call:** 1-800-881-5307
- **E-mail:** wgr-survey@mail.mil
- **Fax:** 1-763-268-3002

FREQUENTLY ASKED QUESTIONS

What is Defense Manpower Data Center (DMDC)?

- DMDC maintains the largest archive of personnel, manpower, training, and financial data in the Department of Defense (DoD). DMDC also conducts Joint-Service surveys including the Status of Forces Surveys, QuickCompass Surveys, and Health and Resilience Surveys for the DoD. To learn more, visit the DMDC website.

<http://www.dmdc.osd.mil/>

What is the Health and Resilience Program?

- Health and Resilience is a DoD personnel program that features paper and web-based surveys sponsored by the Under Secretary of Defense for Personnel and Readiness (USD[P&R]).
- These surveys enable DoD to regularly assess the attitudes and opinions of the DoD community, including active duty and Reserve component members, on the full range of personnel issues.

How do I know this is an official, approved DoD survey?

- In accordance with DoD Instruction 8910.01, all data collection in DoD must be licensed and show that license as a Report Control Symbol (RCS). The RCS for this survey is RCS# DD-P&R(QD)1947.

How did you pick me?

- DMDC uses well-established, scientific procedures to randomly select a sample that represents the Defense community based on combinations of demographic characteristics (e.g., Service and gender).

Why should I participate?

- This is your chance to be heard on issues that directly affect you, including policies and practices regarding general workplace respect issues as well as sexual assault, and other gender-related issues.
- Your responses on this survey **make a difference**.

What is wgr-survey@mail.mil?

- The official e-mail address for communicating with active duty members about Health and Resilience. "WGR-Survey" is short for Workplace and Gender Relations Survey.

Why am I being asked to use the web?

- Web administration enables us to get survey results to senior Defense leaders faster.

Why are you using a .net instead of a .mil domain to field your survey?

- The survey is administered by our contractor, Data Recognition Corporation, an experienced survey operations company. The survey collection tool starts on a .mil site within DMDC. Once you enter your ticket number, you are redirected to a contractor site which uses a .net domain. This allows everyone to access the survey, even from a non-government computer.

Do I have to answer all questions?

- No, it is not necessary to answer every question. Within the survey screen, you have four control buttons: *Next Page* (→), *Previous Page* (←), *Clear Responses*, and *Save and Return Later*. Use these buttons to navigate through the survey or skip questions. Use *Save and Return Later* to give yourself flexibility to complete the survey

2016 Workplace and Gender Relations Survey of Active Duty Members

at some point in your participation in the survey where you had stopped.

Why does the survey ask personal questions?

- DOD requires information about some of your characteristics to ensure that the survey is representative of all genders and to conduct these analyses we need demographic information from respondents.
- A lot of results will show trends of interest. These information about the history and frequency of a behavior of respondents that we can use to see.
- Some of the survey questions are used to determine program needs, our programs and research. A lot of data from the survey will help us to see the results.

Will my answers be kept private?

- All data will be reported in the aggregate and no name or data will be reported.
- We need to give you the option to opt out of the survey. If you do not opt out, we will use your data in the survey. We will not use your data in the survey if you do not opt out. We will not use your data in the survey if you do not opt out. We will not use your data in the survey if you do not opt out.
- If you do not opt out, we will use your data in the survey. We will not use your data in the survey if you do not opt out. We will not use your data in the survey if you do not opt out.

Can I withdraw my answers once I have started the survey?

- If you do not opt out, we will use your data in the survey. We will not use your data in the survey if you do not opt out. We will not use your data in the survey if you do not opt out.

Will I ever see the results of the survey?

- DOD will post the survey results on the following website:

<https://www.military.com/active-duty/2016-workplace-and-gender-relations-survey>

2016 Workplace and Gender Relations Survey of Active Duty Members

BACKGROUND INFORMATION

Thank you for agreeing to participate in this important study. Please answer each question thoughtfully and truthfully. This will allow us to provide an accurate picture of the different experiences of today's military members. If you prefer not to answer a specific question for any reason, just leave it blank. Some of the questions in this survey will be repeated. For your privacy, you may want to take this survey where other people won't see your screen.

1. Were you on active duty on [OPEN DATE]?

- ☒ Yes
☒ No, I was separated or retired

2. Are you...?

- ☒ Male
☒ Female

3. In the past 12 months, have you been deployed longer than 90 consecutive days?

- ☒ Yes, currently deployed
☒ Yes, deployed in the past 12 months, but not currently deployed
☒ No

4. [As of 01/1/17, if you "currently deployed" or (1) a "has been deployed in the past 12 months, but not currently deployed"] Where are/were you deployed?

- ☒ OCONUS
☒ CONUS

TIME REFERENCE

Most of this survey asks about experiences that have happened within the past 12 months. When answering these questions, please do NOT include any events that occurred before Close of Year: X Date.

Please try to think of any important events in your life that occurred near [X Date] such as birthdays, weddings, or family activities. These events can help you remember which things happened before [X Date] and which happened after as you answer the rest of the survey questions.

The following questions will help you think about your life one year ago.

5. Do you currently live in the same house or building that you did on [X Date]?

- ☒ Yes
☒ No
☒ Do not remember

6. Are you the same rank today that you were on [X Date]?

- ☒ Yes
☒ No
☒ Do not remember

7. Were you married or dating someone on [X Date]?

- ☒ Yes
☒ No
☒ Do not remember

GENDER-RELATED EXPERIENCES IN THE MILITARY

In this section, you will be asked about several things that someone from work might have done to you that were creating or offensive, and that happened AFTER [X Date].

When the questions say "someone from work," please include any person(s) you have contact with as part of your military duties. Someone from work could be a supervisor, someone above or below you in rank, or a civilian employee/contractor. They could be in your unit or in other units.

These things may have occurred on-duty or off-duty, on-base or off-base. Please include them as long as the person who did them to you was someone from work.

Remember: all the information you share will be kept confidential.

"Someone from work" includes any person you have contact with as part of your military duties. "Someone from work" could be a supervisor, someone above or below you in rank, or a civilian employee/contractor. They could be in your unit or in other units. These things may have occurred off-duty or off-base. Please include them as long as the person who did them to you was someone from work.

8. Since [X Date], did someone from work repeatedly tell sexual "jokes" that made you uncomfortable, angry, or upset?

- ☒ Yes
☒ No

2016 Workplace and Gender Relations Survey of Active Duty Members

"Someone from work" includes any person you have contact with as part of your military duties. "Someone from work" could be a supervisor, someone above or below you in rank, or a civilian employee/contractor. They could be in your unit or in other units. These things may have occurred off-duty or off-base. Please include them as long as the person who did them to you was someone from work.

9. Since [X Date], did someone from work embarrass, anger, or upset you by repeatedly suggesting that you do not act like a [man] [woman] is supposed to? For example, by calling you [a woman, a fag, or gay] [a dude or butch].

☒ Yes

☒ No

"Someone from work" includes any person you have contact with as part of your military duties. "Someone from work" could be a supervisor, someone above or below you in rank, or a civilian employee/contractor. They could be in your unit or in other units. These things may have occurred off-duty or off-base. Please include them as long as the person who did them to you was someone from work.

10. Since [X Date], did someone from work repeatedly make sexual gestures or sexual body movements (for example, thrusting their pelvis or grabbing their crotch) that made you uncomfortable, angry, or upset?

☒ Yes

☒ No

"Someone from work" includes any person you have contact with as part of your military duties. "Someone from work" could be a supervisor, someone above or below you in rank, or a civilian employee/contractor. They could be in your unit or in other units. These things may have occurred off-duty or off-base. Please include them as long as the person who did them to you was someone from work.

15. Since [X Date], did someone from work either take or share sexually suggestive pictures or videos of you when you did not want them to?

☒ Yes

☒ No

2016 Workplace and Gender Relations Survey of Active Duty Members

16. [Ask if Q15 = "Yes"] Did this make you uncomfortable, angry, or upset?

☒ Yes

☐ No

"Someone from work" includes any person you have contact with as part of your military duties. "Someone from work" could be a supervisor, someone above or below you in rank, or a civilian employee/contractor. They could be in your unit or in other units. These things may have occurred off-duty or off-base. Please include them as long as the person who did them to you was someone from work.

17. Since [X Date], did someone from work make repeated attempts to establish an unwanted romantic or sexual relationship with you? These could range from repeatedly asking you out on a date to asking you for sex or a "hook up."

☒ Yes

☐ No

18. [Ask if Q17 = "Yes"] Did these attempts make you uncomfortable, angry, or upset?

☒ Yes

☐ No

"Someone from work" includes any person you have contact with as part of your military duties. "Someone from work" could be a supervisor, someone above or below you in rank, or a civilian employee/contractor. They could be in your unit or in other units. These things may have occurred off-duty or off-base. Please include them as long as the person who did them to you was someone from work.

19. Since [X Date], did someone from work intentionally touch you in a sexual way when you did not want them to? This could include touching your genitals, breasts, buttocks, or touching you with their genitals anywhere on your body.

☒ Yes

☐ No

"Someone from work" includes any person you have contact with as part of your military duties. "Someone from work" could be a supervisor, someone above or below you in rank, or a civilian employee/contractor. They could be in your unit or in other units. These things may have occurred off-duty or off-base. Please include them as long as the person who did them to you was someone from work.

20. [Ask if Q18 = "Always" or Q19 = "No"] Since [X Date], did someone from work repeatedly touch you in any other way that made you uncomfortable, angry, or upset? This could include almost any unnecessary physical contact including hugs, shoulder rubs, or touching your hair, but would not usually include handshakes or routine uniform adjustments.

☒ Yes

☐ No

"Someone from work" includes any person you have contact with as part of your military duties. "Someone from work" could be a supervisor, someone above or below you in rank, or a civilian employee/contractor. They could be in your unit or in other units. These things may have occurred off-duty or off-base. Please include them as long as the person who did them to you was someone from work.

21. Since [X Date], has someone from work made you feel as if you would get some workplace benefit in exchange for doing something sexual? For example, they might hint that they would give you a good evaluation/fitness report, a better assignment, or better treatment at work in exchange for doing something sexual. Something sexual could include talking about sex, undressing, sharing sexual pictures, or having some type of sexual contact.

☒ Yes

☐ No

"Someone from work" includes any person you have contact with as part of your military duties. "Someone from work" could be a supervisor, someone above or below you in rank, or a civilian employee/contractor. They could be in your unit or in other units. These things may have occurred off-duty or off-base. Please include them as long as the person who did them to you was someone from work.

22. Since [X Date], has someone from work made you feel like you would get punished or treated unfairly in the workplace if you did not do something sexual? For example, they hinted that they would give you a bad evaluation/fitness report, a bad assignment, or bad treatment at work if you were not willing to do something sexual. This could include being unwilling to talk about sex, undress, share sexual pictures, or have some type of sexual contact.

☒ Yes

☐ No

2016 Workplace and Gender Relations Survey of Active Duty Members

"Someone from work" includes any person you have contact with as part of your military duties. "Someone from work" could be a supervisor, someone above or below you in rank, or a civilian employee/contractor. They could be in your unit or in other units. These things may have occurred off-duty or off-base. Please include them as long as the person who did them to you was someone from work.

23. Since [X Date], did you hear someone from work say that (men) (women) are just as good as (women) (men) at your particular job, or that (men) (women) should be prevented from having your job?

- ☒ Yes
☐ No

"Someone from work" includes any person you have contact with as part of your military duties. "Someone from work" could be a supervisor, someone above or below you in rank or a civilian employee/contractor. They could be in your unit or in other units. These things may have occurred off-duty or off-base. Please include them as long as the person who did them to you was someone from work.

24. Since [X Date], do you think someone from work mistreated, ignored, excluded, or insulted you because you are a (man) (woman)?

- ☒ Yes
☐ No

You indicated that, after [X Date], someone from work made you uncomfortable, angry, or upset by repeatedly telling sexual "jokes."

25. [Ask if Q3 = "Yes"] Did they continue this unwanted behavior even after they knew that you or someone else wanted them to stop?

- ☒ Yes
☐ Not applicable, they did not know I or someone else wanted them to stop
☒ No

26. [Ask if Q3 = "Yes"] Do you think that this was ever severe enough that most service members would have been offended by these jokes if they had heard them? If you are not sure, please the best answer.

- ☒ Yes
☒ No

You indicated that, after [X Date], someone from work made you embarrassed, angry, or upset by repeatedly suggesting that you do not act like a man/woman it supposed to. For example, by calling you (a woman, a lag, or gay) (a dyke or butch).

27. [Ask if Q3 = "Yes"] Did they continue this unwanted behavior even after they knew that you or someone else wanted them to stop?

- ☒ Yes
☐ Not applicable, they did not know I or someone else wanted them to stop
☒ No

28. [Ask if Q3 = "Yes"] Do you think that this was ever severe enough that most service members would have been offended if someone had said these things to them? If you are not sure, choose the best answer.

- ☒ Yes
☒ No

You indicated that, after [X Date], someone from work made you uncomfortable, angry, or upset by repeatedly making sexual gestures or sexual body movements.

29. [Ask if Q3 = "Yes"] Did they continue this unwanted behavior even after they knew that you or someone else wanted them to stop?

- ☒ Yes
☐ Not applicable, they did not know I or someone else wanted them to stop
☒ No

30. [Ask if Q3 = "Yes"] Do you think that this was ever severe enough that most service members would have been offended by these gestures? If you are not sure, choose the best answer.

- ☒ Yes
☒ No

You indicated that, after [X Date], someone from work made you embarrassed, angry, or upset by displaying, showing, or sending sexually explicit materials like pictures or videos.

31. [Ask if Q3 = "Yes"] Did they continue this unwanted behavior even after they knew that you or someone else wanted them to stop?

- ☒ Yes
☐ Not applicable, they did not know I or someone else wanted them to stop
☒ No

2016 Workplace and Gender Relations Survey of Active Duty Members

32. [ASK IF Q11 = "Yes"] Do you think that this was ever severe enough that most Service members would have been offended by seeing these sexually explicit materials? If you are not sure, choose the best answer.

☒ Yes
☒ No

You indicated that, after [X Date], someone from work made you uncomfortable, angry, or upset by repeatedly talking to you about their sexual activities.

33. [ASK IF Q12 = "Yes"] Did they continue this unwanted behavior even after they knew that you or someone else wanted them to stop?

☒ Yes
☒ Not applicable, they did not know I or someone else wanted them to stop.
☒ No.

34. [ASK IF Q12 = "Yes"] Do you think that this was ever severe enough that most Service members would have been offended by hearing about these sexual activities? If you are not sure, choose the best answer.

☒ Yes
☒ No.

You indicated that, after [X Date], someone from work made you embarrassed, angry, or upset by asking you questions about your sex life or sexual interests.

35. [ASK IF Q13 = "Yes"] Did they continue this unwanted behavior even after they knew that you or someone else wanted them to stop?

☒ Yes
☒ Not applicable, they did not know I or someone else wanted them to stop.

☒ Yes
☒ No.

2016 Workplace and Gender Relations Survey of Active Duty Members

You indicated that, after [X Date], someone from work made you uncomfortable, angry, or upset by upsetting you unnecessarily.

43. [Ask if Q14 = "Missing" or Q15 = "No"] AND Q20 = "Yes": Did they continue this unwanted behavior even after they knew that you or someone else wanted them to stop?
- ☒ Yes
- ☒ Not applicable: they did not know for someone who wanted them to stop
- ☒ No

40. [Ask if Q12 = "Missing" or Q13 = "No"] AND Q22 = "Yes": Do you think that this was ever severe enough that most Service members would have been offended by this unnecessary harassment? If you are not sure, choose the best answer.
- ☒ Yes
- ☒ No

You indicated that, after [X Date], someone from work made you feel as if you would get some undesirable benefit in exchange for doing something sexual.

44. [Ask if Q21 = "Yes"] What led you to believe that you would get a workplace benefit if you agreed to do something sexual? Mark "Yes" or "No" for each item.

	Yes	No
a. They told you that they would give you a reward or benefit for doing something sexual.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
b. They hinted that you would get a reward or benefit for doing something sexual. For example, they reminded you about your evaluation/fitness report about the same time that they expressed sexual interest.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
c. Someone else told you they got benefits from the division by doing sexual things.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

You indicated that, after [X Date], someone from work made you feel as if you would get punished or treated unfairly in the workplace if you did not do something sexual.

45. [Ask if Q22 = "Yes"] What led you to believe that you would get punished or treated unfairly in the workplace if you did not do something sexual? Mark "Yes" or "No" for each item.
- | | Yes | No |
|---|-------------------------------------|-------------------------------------|
| a. They told you that you would be punished or treated unfairly if you did not do something sexual. | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> |

	Yes	No
b. They hinted that you would be punished or treated unfairly if you did not do something sexual. For example, they reminded you about your evaluation/fitness report about the same time that they expressed sexual interest.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
c. Someone else told you they were punished or treated unfairly by this person for not doing something sexual.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

You indicated that, after [X Date], someone from work said that sexual harassment was not as serious as [harassment] based on your personal job or that they [punish or threaten] from having your job.

46. [Ask if Q23 = "Yes"] Do you think their beliefs about [men] [women] ever harmed or limited your career? For example, did they hurt your evaluation/fitness report, affect your chances of promotion or your next assignment?
- ☒ Yes
- ☒ No

You indicated that, after [X Date], someone from work threatened, punished, or treated you because you are a [man] [woman].

47. [Ask if Q24 = "Yes"] Do you think this treatment ever harmed or limited your career? For example, did it hurt your evaluation/fitness report, affect your chances of promotion or your next assignment?
- ☒ Yes
- ☒ No

After you answered questions about upsetting or offensive things that someone from work did since [X Date],

49. [Ask if Q8 = "Yes" or Q9 = "Yes" or Q10 = "Yes" or Q11 = "Yes" or Q12 = "Yes" or Q13 = "Yes" or Q14 = "Yes" or Q15 = "Yes" or Q16 = "Yes" or Q17 = "Yes" or Q18 = "Yes" or Q19 = "Yes" or Q20 = "Yes" or Q21 = "Yes" or Q22 = "Yes" or Q23 = "Yes" or Q24 = "Yes"] Would you consider any of the behaviors that you collected as happening to you to be... Mark "Yes" or "No" for each item.

	Yes	No
a. Sexual harassment?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
b. Gender discrimination?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

2016 Workplace and Gender Relations Survey of Active Duty Members

49. [Ask if Q0 = "Yes" or Q8 = "Yes" or Q10 = "Yes" or Q11 = "Yes" or Q12 = "Yes" or Q13 = "Yes" or Q14 = "Yes" or Q15 = "Yes" or Q16 = "Yes" or Q17 = "Yes" or Q18 = "Yes" or Q19 = "Yes" or Q20 = "Yes" or Q21 = "Yes" or Q22 = "Yes" or Q23 = "Yes" or Q24 = "Yes"]
Would you consider any of the behaviors that you selected as happening to you to be... Mark "Yes" or "No" for each item.

	No	Yes
a. Hazing? Hazing refers to things done to humiliate or "toughen up" people prior to accepting them into a group.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Bullying? Bullying refers to repeated verbally or physically abusive behaviors that are threatening, humiliating, or intimidating.	<input type="checkbox"/>	<input checked="" type="checkbox"/>

GENDER-RELATED EXPERIENCES IN THE MILITARY WITH BIGGEST EFFECT

Based on your answers earlier, if anyone has at least one person you worked with in the last 12 months acted in a way that resulted in upsetting or offensive work discrimination:

50. [Ask if Q0 = "Yes" or Q8 = "Yes" or Q10 = "Yes" or Q11 = "Yes" or Q12 = "Yes" or Q13 = "Yes" or Q14 = "Yes" or Q15 = "Yes" or Q16 = "Yes" or Q17 = "Yes" or Q18 = "Yes" or Q19 = "Yes" or Q20 = "Yes" or Q21 = "Yes" or Q22 = "Yes" or Q23 = "Yes" or Q24 = "Yes"] The following section includes additional questions about the upsetting situation(s) you experienced, including those situations in which someone from work:
- Repeatedly told sexual jokes.
 - Repeatedly suggested that you do not act like a [man/woman] or supposed to.
 - Repeatedly made sexual gestures or sexual body movements.
 - Displayed, showed you, or sent you sexually explicit materials like pictures or videos.
 - Repeatedly told you about their sexual activities.
 - Repeatedly asked you questions about your sex life or sexual interests.
 - Made repeated sexual comments about your appearance or body.
 - Took or shared sexually suggestive pictures or videos of you.
 - Made repeated attempts to establish an unwanted romantic or sexual relationship with you.
 - Touched you in a sexual way.
 - Touched you in any other way that made you uncomfortable, angry, or upset.
 - Made you feel like you would get some workplace rewards in exchange for doing something sexual.
 - Made you feel like you would get punished or treated unfairly if you refused to do something sexual.
 - Said that [men/women] are not as good as [women/men] at your job, or that they should be prevented from having that job.
 - Misgendered, ignored, or rejected you because you were a [man/woman].

You indicated you had at least one upsetting experience. Please think about the one situation since Q10 that had the biggest effect on you—the one you consider to be the worst or most serious.

51. [Ask if Q0 = "Yes" or Q8 = "Yes" or Q10 = "Yes" or Q11 = "Yes" or Q12 = "Yes" or Q13 = "Yes" or Q14 = "Yes" or Q15 = "Yes" or Q16 = "Yes" or Q17 = "Yes" or Q18 = "Yes" or Q19 = "Yes" or Q20 = "Yes" or Q21 = "Yes" or Q22 = "Yes" or Q23 = "Yes" or Q24 = "Yes"] Would you consider this upsetting situation to be... Mark "Yes" or "No" for each item.

	No	Yes
a. Harassment or discrimination? For example, repeated unwanted sexual advances, used language or sexist remarks of a sexual nature, or offensive physical conduct.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. Quid pro quo? For example, someone offered preferential treatment in exchange for your sexual involvement.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c. Gender discrimination? For example, mistreated you because of your gender or exposed you to language or comments that conveyed offensive or disrespectful gender-based attitudes.	<input type="checkbox"/>	<input checked="" type="checkbox"/>

52. [Ask if Q0 = "Yes" or Q8 = "Yes" or Q10 = "Yes" or Q11 = "Yes" or Q12 = "Yes" or Q13 = "Yes" or Q14 = "Yes" or Q15 = "Yes" or Q16 = "Yes" or Q17 = "Yes" or Q18 = "Yes" or Q19 = "Yes" or Q20 = "Yes" or Q21 = "Yes" or Q22 = "Yes" or Q23 = "Yes" or Q24 = "Yes"] Please indicate how many people were involved in this upsetting situation.

- ☒ One person
☒ More than one person.

53. [Ask if Q0 = "Yes" or Q8 = "Yes" or Q10 = "Yes" or Q11 = "Yes" or Q12 = "Yes" or Q13 = "Yes" or Q14 = "Yes" or Q15 = "Yes" or Q16 = "Yes" or Q17 = "Yes" or Q18 = "Yes" or Q19 = "Yes" or Q20 = "Yes" or Q21 = "Yes" or Q22 = "Yes" or Q23 = "Yes" or Q24 = "Yes"] Please indicate the gender(s) of this person(s).

- ☒ Men
☒ Women
☒ A mix of men and women

54. 54. (Ask if Q80: FLAW = "True" and Q80: L = "No" and Q81 = < "Yes") or Q81 = < "Yes" and Q81 = < "No") What were your reasons for not discussing it with someone above you in your chain of command with the expectation of corrective action or not reporting it to a person who enforces sexual harassment regulations? Mark all that apply.

- ☒ The offensive behavior stopped on its own.
- ☒ You thought it was not serious enough to report.
- ☒ You did not want more people to know.
- ☒ You did not want people to see you as weak.
- ☒ You did not know who to discuss/report the situation to.
- ☒ You wanted to forget about it and move on.
- ☒ You did not think anything would be done.
- ☒ You did not think you would be believed.
- ☒ You did not feel that the process would be fair.
- ☒ You felt pity for the person.
- ☒ You thought other people would blame you.
- ☒ You thought you might get in trouble for reporting you did.
- ☒ You thought you might be labeled as a troublemaker.
- ☒ You felt ashamed or embarrassed.
- ☒ You were concerned for your physical safety.
- ☒ You thought it might hurt your performance evaluation/fitness report.
- ☒ You thought it might hurt your career.
- ☒ You did not want to hurt the person's career or family.
- ☒ You were worried about negative consequences by the person(s) who did it.
- ☒ You were worried about negative consequences by a supervisor or someone in your chain of command (for example, being labeled a problem, discipline, made to perform additional duties, etc.).
- ☒ You were worried about negative consequences from your military commander or peers (for example, excluding you from social activities, giving you, making insulting or disrespectful remarks, etc.).
- ☒ You took other actions to handle the situation.
- ☒ None of the above.

GENDER-RELATED EXPERIENCES

Please read the following general instructions before answering the survey.

Questions in this next section ask about unwanted experiences of an abusive, humiliating, or sexual nature. These types of unwanted experiences vary in severity. Some of them could be viewed as an assault. Others could be viewed as teasing or some other type of unwanted experience. They can happen to both women and men.

The next questions include some graphic words. They describe events that DoD regulations define with precise anatomical language. It is important to use the same names of the specific body parts the DoD uses. This is the best way to determine whether or not people have had these types of experiences.

When answering these questions, please include experiences no matter who did it to you or where it happened. It could be done to you by a male or female, service member or civilian, someone you knew or a stranger.

Please include experiences even if you or others had been drinking alcohol, using drugs, or were intoxicated.

The following questions will ask you about events that happened AFTER (X Date).

You will have an opportunity to describe experiences that happened BEFORE (X Date) later in the survey.

Remember, all the information you share will be kept confidential.

55. Since (X Date), did you have any unwanted experiences in which someone put his penis into your anus or mouth (or vagina, if you are a woman)?

- ☒ Yes
- ☒ No

The following statements are about things that might have happened to you when you had this experience. In these statements, "my" means the person or people who did this to you.

Please indicate which of the following happened.

56. (Ask if Q55 = "Yes") They used, or threatened to use, physical force to make you comply. For example, use, or threats of, physical injury, use of a weapon, or threats of kidnapping.

- ☒ Yes
- ☒ No

- ☐ Yes
☐ No

102. [Ask if (SA3PlayCum) = "Not true" and Q100 = "Yes"]. Do you believe the person did it for a sexual reason? For example, they did it because they were sexually aroused or to get sexually aroused. If you are not sure, choose the best answer.

- ☐ Yes
☐ No

The following statements are about things that might have happened to you when you had this experience. In these statements, "they" means the person or people who did this to you.

Please indicate which of the following happened:

103. [Ask if (SA3PlayCum) = "Not true" and Q100 = "Yes" and (Q101 = "Yes" or Q102 = "Yes")]. **They used, or threatened to use, physical force to make you comply.** For example, use of threats of physical injury, use of a weapon, or threats of kidnapping.

- ☐ Yes
☐ No

The following statements are about things that might have happened to you when you had this experience. In these statements, "they" means the person or people who did this to you.

Please indicate which of the following happened:

104. [Ask if (SA3PlayCum) = "Not true" and Q100 = "Yes" and (Q101 = "Yes" or Q102 = "Yes")]. **They threatened you (or someone else) in some other way.** For example, by using their position of authority, by spreading lies about you, or by getting you in trouble with authorities.

- ☐ Yes
☐ No

The following statements are about things that might have happened to you when you had this experience. In these statements, "they" means the person or people who did this to you.

Please indicate which of the following happened:

105. [Ask if (SA3PlayCum) = "Not true" and Q100 = "Yes" and (Q101 = "Yes" or Q102 = "Yes")].

They did it while you were passed out, asleep, unconscious, or so drunk, high, or drugged that you could not understand what was happening or could not show them that you were unwilling.

- ☐ Yes
☐ No

2016 Workplace and Gender Relations Survey of Active Duty Members

The following statements are about things that might have happened to you when you had this experience. In these statements, "they" means the person or people who did this to you.

Please indicate which of the following happened:

105. [ASK IF (BAPLAW) = "True" and Q100 = "Yes" and Q101 = "Yes" or Q101 = "Yes"] If it happened without your consent. For example, they continued even when you said no or showed them that you were unwilling, they pushed you into thinking they were doing you good, or some other means where you did not or could not consent.

☒ Yes

☒ No

I thank you for answering the questions so far. Remember that your answers are confidential.

Based on your previous answer, you indicated that you had at least one of these unwanted experiences since [X Date].

107. [ASK IF (BAPLAW) = "True" and Q100 = "Yes" or Q100 = "Yes"] The items that follow will ask for additional information about the unwanted event(s) in which someone:

- Put their penis into your anus or mouth (or vagina, if you are a woman).
- Put any object or any body part other than a penis into your anus or mouth (or vagina, if you are a woman).
- Made you put any part of your body or any object into someone's mouth, vagina, or anus.
- ~~Intentionally~~ touched private areas of your body.
- ~~Intentionally~~ touched ANY area of your body.
- Made you touch private areas of their body or someone else's body.
- Made you touch ANY area of their body or someone else's body.
- ~~Attempted~~ to put a penis, an object, or any body part into your anus or mouth (or vagina, if you are a woman). but no penetration actually occurred.

108. [ASK IF (BAPLAW) = "True"] Thinking about the past 12 months, please give your best estimate of how many separate occasions you had these unwanted experiences.

Times

You indicated that you had more than one unwanted event since [X Date].

109. [ASK IF (BAPLAW) = "True" and Q100 = "Yes"] Were all these events done by the same person?

☒ Yes

☒ No, more than one person

☒ Not sure

110. [ASK IF (BAPLAW) = "True" and Q100 = "Yes"] Would you describe any of these unwanted experiences as... Mark "Yes" or "No" for each item.

	Yes	No
1. Harassment? Harassment refers to things done to humiliate or "bring out" people prior to bringing them into a group.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
2. Bullying? Bullying refers to repeated verbally or physically abusive behavior or threats, intimidating, humiliating, or embarrassing.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

GENDER-RELATED EXPERIENCES WITH BIGGEST EFFECT

The following questions ask about the unwanted event that had the biggest effect on you. Before you continue, please choose the one unwanted event since [X Date] that you consider to be the worst or most serious.

111. [ASK IF (BAPLAW) = "True" and Q100 = "Yes" and Q107 = "Yes" and Q108 = "1" and Q109 = "Yes"] Which of the following experiences happened during the event you chose as the worst or most serious? Mark "Yes" or "No" for each item.

	Yes	No
1. Did their penis enter your anus or mouth (or vagina, if you are a woman)?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
2. Put any object or any body part other than a penis into your anus or mouth (or vagina, if you are a woman)?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
3. Made you put any part of your body or any object into someone's mouth, vagina, or anus.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
4. Intentionally touched private areas of your body.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
5. Intentionally touched ANY area of your body.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
6. Made you touch private areas of their body or someone else's body.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
7. Made you touch ANY area of their body or someone else's body.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
8. Attempted to put a penis, an object, or any body part into your anus or mouth (or vagina, if you are a woman). <u>but no penetration actually occurred.</u>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

112. [ASK IF (BAPLAW) = "True"] How many people did this to you?

2016 Workplace and Gender Relations Survey of Active Duty Members

DoD provides two types of sexual assault reports:

- **Restricted** reports allow people to get information, collect evidence, and receive medical treatment and counseling without starting an official investigation of the assault.
- **Unrestricted** reports start an official investigation in addition to allowing the services available in restricted reporting.

129. [Ask if (SAFLAG) = "True"] Did you officially report this unwanted event in the military? This could have been either a restricted or unrestricted report.

- ☒ Yes
- ☒ No

130. [Ask if (SAFLAG) = "True", and Q129 = "Yes"] Are you considering reporting, or ever considered reporting?

- ☒ Yes, I am currently considering whether or not to report
- ☒ Yes, I considered reporting but decided not to
- ☒ No, I never considered reporting and do not plan to report

DoD provides two types of sexual assault reports:

- **Restricted** reports allow people to get information, collect evidence, and receive medical treatment and counseling without starting an official investigation of the assault.
- **Unrestricted** reports start an official investigation in addition to allowing the services available in restricted reporting.

131. [Ask if (SAFLAG) = "True" and Q129 = "Yes"] Did you initially make...

- ☒ A Restricted report?
- ☒ An Unrestricted report?
- ☒ Unsure what type of report I initially made

132. [Ask if (SAFLAG) = "True" and Q129 = "Yes" and Q131 = "A Restricted report?"] To whom did you make this initial restricted report? Mark one.

- ☒ A Sexual Assault Response Coordinator (SARC)
- ☒ A Confidential Victim Advocate (CVA) or Victim Advocate (VA)
- ☒ Healthcare personnel
- ☒ Other
- ☒ Unable to recall

133. [Ask if (SAFLAG) = "True" and Q129 = "Yes" and Q131 = "A Restricted report?"] What happened with your restricted report? Mark one.

- ☒ It remained reported and I am not aware of any investigation that occurred
- ☒ I chose to convert it to unrestricted
- ☒ I did not choose to convert my report, but an independent investigation occurred anyway (for example, someone you talked to about it notified your chain of command and they initiated an investigation)
- ☒ Unable to recall

134. [Ask if (SAFLAG) = "True" and Q129 = "Yes" and Q131 = "A Restricted report?"] If making a restricted report was not an option, what would you have done? Mark one.

- ☒ Made an unrestricted report
- ☒ Not reported
- ☒ Not sure

135. [Ask if (SAFLAG) = "True" and Q129 = "Yes"] After reporting this unwanted event, to what extent were you provided the following? Mark one answer for each item.

- | | Not applicable | Not at all | Small extent | Moderate extent | Large extent | Very large extent |
|--|-------------------------------------|-------------------------------------|-------------------------------------|-------------------------------------|-------------------------------------|-------------------------------------|
| a. Safety planning information regarding your immediate situation (for example, steps to take should the offender try to contact you; information regarding a Military Protective Order or Civilian Protective Order, risk assessment) | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> |
| b. Accurate up-to-date information on your case status | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> |

- ☒ You felt partially to blame
- ☒ You thought other people would blame you
- ☒ You thought you might get in trouble for something you did. For example, underage drinking or fraternization
- ☒ You thought you might be labeled as a troublemaker
- ☒ You felt shamed or embarrassed
- ☒ You were concerned for your physical safety
- ☒ You or the person(s) who did it knew the person you would report the event to (the available GRC, RUCAP, IJA/VA)
- ☒ You thought it might hurt your performance evaluation/fitness report
- ☒ You thought it might hurt your career
- ☒ You did not want to hurt the person's career or family
- ☒ You were worried about potential negative consequences from the person(s) who did it
- ☒ You were worried about potential negative consequences from a supervisor or someone in your chain of command
- ☒ You were worried about potential negative consequences from your commanders or peers
- ☒ You took other actions to handle the situation
- ☒ Other valid reason

142. [ASK IF (DISPLAY) = "True" and Q128 = "Yes" or Q128 = "No"] In retrospect, would you make the same decision about reporting if you could do it over?

- ☒ Yes
- ☒ No

2016 Workplace and Gender Relations Survey of Active Duty Members

OUTCOMES ASSOCIATED WITH REPORTING

143. [Ask if (DAFLNO) = "True" and Q129 = "Yes"]
As a result of you reporting a sexual assault, has your leadership, or another individual who has the authority to affect a personnel decision, either done or threatened to do any of the following? Mark all that apply.

- ☒ Denied you or denied you a promotion
- ☒ Denied you a training opportunity that could have led to promotion or is needed in order to keep your current position
- ☒ Retard your time that you deserved on a performance evaluation
- ☒ Denied you an award you were previously eligible to receive
- ☒ Reduced your pay or benefits without doing the same to others
- ☒ Reassigned you to duties that do not match your current grade
- ☒ Made you perform additional duties that do not match your current grade
- ☒ Transferred you to a different unit or installation without your request or agreement
- ☒ Ordered you to one or more command directed mental health evaluations
- ☒ Disciplined you or ordered other corrective action
- ☒ Discouraged, or attempted to prevent, you from communicating with the Inspector General or a member of Congress
- ☒ Some other action that negatively affects, or could negatively affect, your position or career
- ☒ Does not apply, you have not experienced any of the above

[Ask if (DAFLAQ) = "True" and Q129 = "Yes" and Q143 is "Marked"] Please specify the other negative action taken as a result of you reporting a sexual assault. Please do not use identifying names or information.

144. [ASK IF (DAFLNO) = "True" and Q129 = "Yes" and (Q142 a = "Marked" or Q142 b = "Marked" or Q143 a = "Marked" or Q143 b = "Marked" or Q143 c = "Marked" or Q143 d = "Marked" or Q143 e = "Marked" or Q143 f = "Marked" or Q143 g = "Marked" or Q143 h = "Marked" or Q143 i = "Marked" or Q143 j = "Marked" or Q143 k = "Marked" or Q143 l = "Marked" or Q143 m = "Marked" or Q143 n = "Marked" or Q143 o = "Marked" or Q143 p = "Marked" or Q143 q = "Marked" or Q143 r = "Marked" or Q143 s = "Marked" or Q143 t = "Marked" or Q143 u = "Marked" or Q143 v = "Marked" or Q143 w = "Marked" or Q143 x = "Marked" or Q143 y = "Marked" or Q143 z = "Marked") Do you have reason to believe that any of the actions you marked in the previous item were only based on your report of sexual assault (i.e., not based on your conduct or performance)?

- ☒ Yes
- ☒ No
- ☒ Not sure

145. [ASK IF (DAFLNO) = "True" and Q129 = "Yes" and (Q142 a = "Marked" or Q142 b = "Marked" or Q143 a = "Marked" or Q143 b = "Marked" or Q143 c = "Marked" or Q143 d = "Marked" or Q143 e = "Marked" or Q143 f = "Marked" or Q143 g = "Marked" or Q143 h = "Marked" or Q143 i = "Marked" or Q143 j = "Marked" or Q143 k = "Marked" or Q143 l = "Marked" or Q143 m = "Marked" or Q143 n = "Marked" or Q143 o = "Marked" or Q143 p = "Marked" or Q143 q = "Marked" or Q143 r = "Marked" or Q143 s = "Marked" or Q143 t = "Marked" or Q143 u = "Marked" or Q143 v = "Marked" or Q143 w = "Marked" or Q143 x = "Marked" or Q143 y = "Marked" or Q143 z = "Marked") Why do you believe this individual(s) took the actions you marked as happening to you? Mark all that apply.

- ☒ They were trying to get back at you for making a report (unrestricted or restricted)
- ☒ They were trying to discourage you from reporting further with your report
- ☒ They did not believe you
- ☒ They were mad at you for causing a problem for them
- ☒ They did not understand the situation
- ☒ They were trying to help you
- ☒ They were following established protocol by temporarily reassigning you during recovery
- ☒ They were friends with the person(s) whom you indicated committed the sexual assault
- ☒ They were addressing an issue or collateral misconduct
- ☒ Some other reason
- ☒ Not sure

What is the relationship between the individual(s) that took these actions against you and the perpetrator(s) identified in your report of sexual assault?

Mark all that apply.

- ☒ Same person(s).
- ☒ Friends with the identified perpetrator(s).
- ☒ In same chain of command.
- ☒ No relationship.
- ☒ Not sure.

GENDER-RELATED EXPERIENCES

Earlier in the survey you indicated that you experienced an unwanted event.

It can be difficult to remember the exact date when events occurred. In this study, it is important to know which events happened in the last 12 months, and which events happened earlier.

107. [ASK IF (SAFL107) = "True"] **Thinking about when the event occurred, how certain are you that it occurred in the last 12 months? If the event occurred over a long time, think about whether it ever happened after (X) Never.**

- ☒ Definitely occurred AFTER (X) Never.
- ☒ Not sure if it occurred BEFORE or AFTER (X) Never.
- ☒ Definitely occurred BEFORE (X) Never.

108. [ASK IF (SAFL108) = "True" and Q105 = "Yes" and Q107 = "Definitely occurred BEFORE (X) Never"] **Earlier in the survey you indicated that you experienced more than one unwanted event in which someone...**

- a. Put their penis into your anus or mouth (or vagina, if you are a woman).
- b. Put any object or any body part other than a penis into your anus or mouth (or vagina, if you are a woman).
- c. Made you put any part of your body or any object into someone's mouth, vagina, or anus.
- d. Intentionally touched private areas of your body.
- e. Intentionally touched ANY area of your body.

2016 Workplace and Gender Relations Survey of Active Duty Members

- touch your touch private areas of their body or someone else's body.
- Made you touch ANY area of their body or someone else's body.
- Attempted to put a penis, an object, or any body part into your anus or mouth (or vagina, if you are a woman). Before penetration actually occurred.

100. [AUXID] [PAFLANG] = "True" and [DET] = "Definitely occurred BEFORE [X Date]" and [G1387] = 1. What was the date of your MOST RECENT unwanted event like this?

Month:

Year:

Thank you for sharing these details about the unwanted event you chose as the worst or most serious. For the next question, please consider any unwanted event that happened to you.

170. [AUXID] [PAFLANG] = "True" For your unwanted experiences since [X Date], did you initial and sign a form labeled VICTIM REPORTING PREFERENCE STATEMENT (DD Form 2910 or CO Form 6066) in response to a past year event? This form allows you to decide whether to make a restricted or unrestricted report of sexual assault. A Sexual Assault Response Coordinator (SARC) or Victim Advocate (VA) would have assisted you with completing this form. To see a version of this form, click here.

- ☒ Yes
- ☒ No
- ☒ Not sure

PRIOR EXPERIENCES

The questions we're here, focus about things that occurred in the past year. For the next questions, please think about events that happened since [X Date] your last deployment or leave. These are all experiences that you did not tell us about earlier in the survey.

These questions assess experiences of an abusive, humiliating, or sexual nature, and that occurred even though you did not want it and did not consent.

Please include an experience regardless of when and if you or anyone is hurt.

"Did not consent" means that you told or showed them that you were unwilling, that they used physical force or threats to make you do it, or that they did it to you when you were unconscious, asleep, or so high or drunk that you could not understand what was happening.

171. Before [X Date], had anyone... Mark "Yes" or "No" for each item.

	Yes	No
1. Put a penis, an object, or any body part into your anus or mouth (or vagina, if you are a woman) when you did not want it and did not consent?	<input type="checkbox"/>	<input type="checkbox"/>
2. Made you insert an object or body part into someone's mouth, vagina, or anus when you did not want to and did not consent?	<input type="checkbox"/>	<input type="checkbox"/>
3. <u>Attempted to</u> put a penis, an object, or any body part into your anus or mouth (or vagina, if you are a woman) against your will but it did not happen?	<input type="checkbox"/>	<input type="checkbox"/>
4. <u>Intentionally</u> thrust your penis, breast, or your body (either directly or through clothing) when you did not want it and did not consent? (Private areas include buttocks, inner thigh, breasts, groin, anus, vagina, penis, or breasts)	<input type="checkbox"/>	<input type="checkbox"/>
5. <u>Inappropriately</u> touched ANY area of your body (either directly or through clothing) when you did not want it and did not consent?	<input type="checkbox"/>	<input type="checkbox"/>
6. Made you touch private areas of their body or someone else's body (either directly or through clothing) when you did not want it and did not consent? This might have involved the person touching the private areas on you. (Private areas include buttocks, inner thigh, breasts, groin, anus, vagina, penis, or breasts)	<input type="checkbox"/>	<input type="checkbox"/>
7. Made you touch ANY area of their body or someone else's body (either directly or through clothing) when you did not want it and did not consent?	<input type="checkbox"/>	<input type="checkbox"/>

	No	Yes
a. <u>Before</u> you joined the military?	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b. <u>After</u> you joined the military?	<input type="checkbox"/>	<input checked="" type="checkbox"/>

173. [A116 (Q171) = "Yes" OR Q171 U = "Yes" OR Q171 C = "Yes" OR Q171 (I = "Yes" OR Q171 S = "Yes" OR Q171 F = "Yes" OR Q171 U = "Yes" AND Q172 U = "Yes"] Did you make an official report to a military authority for any of these unwanted experiences that happened prior to [X Date] while you were in the military? (This could have been either a restricted or unrestricted report)

☒ Yes
☒ No

ADDITIONAL BACKGROUND INFORMATION

174. What is your current relationship status?

☒ Married
☒ Living with a boyfriend or girlfriend
☒ In a committed intimate relationship, but not living together
☒ Single
☒ Other or prefer not to say

175. Are you Spanish/Hispanic/Latino?

☒ No, not Spanish/Hispanic/Latino
☒ Yes, Mexican, Mexican-American, Chicano, Puerto Rican, Cuban, or other Spanish/Hispanic/Latino

176. What is your race? Mark one or more races to indicate what you consider yourself to be.

☒ White
☒ Black or African American
☒ American Indian or Alaska Native
☒ Asian (for example, Asian Indian, Chinese, Filipino, Japanese, Korean, or Vietnamese)
☒ Native Hawaiian or other Pacific Islander (for example, Samoan, Guamanian, or Chorroese)

YOUR MILITARY WORKPLACE

177. How likely would you be to... Mark one answer for each item.

	very unlikely	unlikely	neither likely nor unlikely	likely	very likely
a. Encourage someone who has experienced sexual harassment to tell a military supervisor?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b. Encourage someone who has experienced sexual assault to seek counseling?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c. Encourage someone who has experienced sexual assault to report it?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d. Tell a military supervisor who if sexual harassment if it happened to you?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e. Report a sexual assault if it happened to you?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

178. In the past 12 months, did you witness a situation that you believed was, or could have led to, a sexual assault?

☒ Yes
☒ No

179. [A116 (Q178) = "Yes"] Select the one response that most closely resembles your actions.

☒ You stepped in and separated the people involved in the situation
☒ You asked the person who appeared to be at fault if they needed help
☒ You confronted the person who appeared to be causing the situation
☒ You provided a distraction to cause one or more of the people to change/leave from the situation
☒ You asked others to step in as a group and diffuse the situation
☒ You told someone in a position of authority about the situation
☒ You considered intervening in the situation, but you could not safely take any action
☒ You decided not to take action

OPA 33

2016 Workplace and Gender Relations Survey of Active Duty Members

100. Read Q117A = "Yes" and Q117B = "You stepped in and supported the people involved in the situation" or Q117A = "You asked the person who appeared to be at risk if they needed help" or Q117B = "You encouraged the person who appeared to be causing the situation" or Q117A = "You created a distraction to cause two or more of the people to disengage from the situation" or Q117B = "You asked others to step in as a group and diffuse the situation" or Q117A = "You told someone in a position of authority about the situation" **Did any of the following contribute to your decision to intervene? Mark "Yes" or "No" for each item.**

	Yes	No
a. Training on bystander intervention	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
b. Another type of training related to sexual assault prevention	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
c. Unit leader expectations	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

QFA

2016 Workplace and Gender Relations Survey of Active Duty Members

Over the last three years, the Military Services have opened up 110,000 positions to women and have independently studied, developed, and verified operationaly relevant standards for them. Anyone who can meet operationaly and relevant gender neutral standards, regardless of gender, should be allowed to serve in that position.

101. Are you currently serving in a unit or career field that has been opened up to women in the past 12 months?

- ☒ Yes
☒ No

102. (Ask if Q101 = "Yes") How has opening this unit or career field to women affected the climate in your unit?

- ☒ Better than before
☒ About the same as before
☒ Worse than before
☒ No basis to judge

103. During the past 12 months, how often have you experienced any of the following behaviors, where coworkers or supervisors... Mark one answer for each item.

	Never	Once or twice	Sometimes	Often	very often
a. Intentionally interfered with your work performance?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
b. Did not provide information or assistance when you needed it?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
c. Were excessively harsh in their criticism of your work performance?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
d. Took credit for work or ideas that were yours?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
e. Gossiped about you?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
f. Used insults, sarcasm, or gestures to mortify you?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
g. Yelled when they were angry with you?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
h. Swore at you in a hostile manner?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
i. Damaged or stole your property or equipment?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

104. Suppose that you have to decide whether to stay on active duty. Assuming you could stay, how likely is it you would choose to do so?

- ☒ Very likely
☒ Likely
☒ Neither likely nor unlikely
☒ Unlikely
☒ Very unlikely

6THGG, HEALTH, AND WELL-BEING

105. In general, would you say your health is...?

- ☒ Excellent
☒ Very good
☒ Good
☒ Fair
☒ Poor

Sometimes things happen to people that are unusual, or especially frightening, horrible, or traumatic. For example, a serious accident or fire, physical or sexual assault or abuse, meningitis or flu, heat, seeing someone be killed or seriously injured, or facing a loved one die through homicide or suicide.

106. Have you ever experienced this kind of event?

Please count any event in your entire life.

- ☒ Yes
☒ No

107. (Ask if Q106 = "Yes") In the past month, have you... Mark "Yes" or "No" for each item.

	No	Yes
a. I had nightmares about the event(s) or thoughts about the event(s) when you did not want to?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
b. Tried hard not to think about the event(s) or went out of your way to avoid situations that reminded you of the event(s)?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
c. Been unusually nervous, watchful, or easily startled?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
d. Felt numb or detached from people, activities, or your surroundings?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
e. Felt guilty or unable to stop blaming yourself or others for the event(s) or any problems the event(s) may have caused?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

420 | OPA

2016 Workplace and Gender Relations Survey of Active Duty Members

201. Have you had any military training during the past 12 months on topics related to sexual harassment?

☒ Yes

☒ No

202. (Ask if YES to "201") My Service's sexual harassment training...

	Strongly disagree	Disagree	Neither agree nor disagree	Agree	Strongly agree
a. Explains the role of the chain of command in handling sexual harassment complaints	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. Identifies the points of contact for reporting sexual harassment complaints	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Explains how sexual harassment is a mission readiness problem	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. Explains that in addition to women, men can experience sexual harassment	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

203. How much do you agree with the following statements? Mark one answer for each item.

	Strongly disagree	Disagree	Neither agree nor disagree	Agree	Strongly agree
a. When you are in a social setting, it is your duty to confront a fellow Service member from doing something potentially harmful to themselves or others	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b. If you are <u>sexually assaulted</u> , you can trust the military system to protect your privacy	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. If you are <u>sexually assaulted</u> , you can trust the military system to ensure your safety following the incident	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
d. If you are <u>sexually assaulted</u> , you can trust the military system to treat you with dignity and respect	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
e. You believe you will be treated differently by your supervisor or chain of command if you report you were <u>sexually harassed</u>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
f. You believe you will be treated differently by your supervisor or chain of command if you report someone else was sexually harassed	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

204. To what extent are you willing to... Mark one answer for each item

	Not at all	Small extent	Moderate extent	Large extent	Very large extent
a. Point out to someone when you think they crossed the line with gender-related comments or jokes?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

OPA 41

2016 Workplace and Gender Relations Survey of Active Duty Members

	Not at all	Small extent	Medium extent	Large extent	Very large extent
b. Encourage others to point out to someone when they think he or she "crossed the line" and gender-related comments or jokes?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
c. Seek help from the chain of command in confronting other Service members who continue to engage in sexual harassment after having been previously spoken to?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

SOCIAL MEDIA USE

205. Are you aware of a Service member misusing social media sites to ridicule, abuse, stalk, or harm... Mark "Yes" or "No" for each item.

	Yes	No
a. Another military member?	<input type="checkbox"/>	<input type="checkbox"/>
b. Your chain of command?	<input type="checkbox"/>	<input type="checkbox"/>
c. Your Service?	<input type="checkbox"/>	<input type="checkbox"/>
d. The DoD as a whole?	<input type="checkbox"/>	<input type="checkbox"/>

206. (Ask if Q205 is a "Yes" or Q208 is a "Yes" or Q209 is a "Yes" or Q210 is a "Yes") Did you notify any of the following individuals of this misuse of social media? Mark "Yes" or "No" for each item.

	Yes	No
a. A military peer	<input type="checkbox"/>	<input type="checkbox"/>
b. A member of your chain of command	<input type="checkbox"/>	<input type="checkbox"/>
c. Another leader outside of your chain of command	<input type="checkbox"/>	<input type="checkbox"/>
d. My Service's Inspector General office	<input type="checkbox"/>	<input type="checkbox"/>
e. Some other person or office	<input type="checkbox"/>	<input type="checkbox"/>

207. Does your workplace have a formal policy explaining appropriate or inappropriate uses of social media sites?

- ☐ Yes
☐ No
☐ Do not know

208. (Ask if Q207 is a "Yes") Do members of your work group generally comply with the policy on uses of social media?

- ☐ Yes
☐ No
☐ Do not know

HOW ARE WE DOING?

209. In your opinion, has sexual harassment in the military become more or less of a problem over the last 2 years?

- ☐ Less of a problem today
☐ About the same as 2 years ago
☐ More of a problem today
☐ Do not know

210. In your opinion, has sexual assault in the military become more or less of a problem over the last 2 years?

- ☐ Less of a problem today
☐ About the same as 2 years ago
☐ More of a problem today
☐ Do not know

ADDITIONAL INFORMATION

211. Do you consider yourself to be... MARK ONE

- ☐ Heterosexual or straight?
☐ Gay or lesbian?
☐ Bisexual?
☐ Other (for example, questioning, asexual, transgender, self-identified, unknown)
☐ Prefer not to answer

2016 Workplace and Gender Relations Survey of Active Duty Members

212. Some people describe themselves as transgender when they experience a different gender identity from their sex at birth. For example, a person born into a male body, but who feels female or lives as a woman. Do you consider yourself to be transgender? Mark one.

- ☒ Yes, transgender, male to female
- ☒ Yes, transgender, female to male
- ☒ Yes, transgender, gender non-conforming
- ☒ No
- ☒ I refuse
- ☒ Don't put an answer

TRAINING AND CULTURE

213. [Ask if [GENDER] = "Male" or [GENDER] = "Female"] In your opinion, what percentage of sexual assault reports are made by individuals when they know the report is not true?

- ☒ Less than 10%
- ☒ 11-25%
- ☒ 26-50%
- ☒ 51-75%
- ☒ 76-100%

214. [Ask if [GENDER] = "Male" or [GENDER] = "Female"] AND [Q213 = "Less than 10%" or Q213 = "11-25%" or Q213 = "26-50%" or Q213 = "51-75%" or Q213 = "76-100%"] Why do you think that percent of sexual assault reports are not true? Mark all that apply.

- ☒ I have had someone make a false report about me
- ☒ I am aware of a false report made about a friend or colleague
- ☒ I don't see anyone getting convicted or punished
- ☒ The person making the report is unreliable
- ☒ The person making the report has told me it was false
- ☒ The person making the report is only interested in a transfer
- ☒ Other/other reason

215. [Ask if [GENDER] = "Male"] To what extent... Mark one answer for each item.

	NOT AT ALL	Small extent	Moderate extent	Large extent	Very large extent
a. Does your immediate supervisor encourage sailors to challenge sexual harassment and gender discrimination when they witness it?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
b. Does your immediate supervisor encourage sailors to challenge sexual behaviors when they witness them?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
c. Do you think individuals within your work center would fully support someone who came forward with a complaint of gender discrimination?	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

216. [Ask if [GENDER] = "Male"] Are you currently stationed on an aircraft carrier or large deck amphibious assault ship?

- ☒ Yes, I am currently stationed on a carrier/ship
- ☒ No, but I have been stationed on a carrier/ship in the past 12 months
- ☒ No, and it has been more than 12 months since I've been stationed on a carrier/ship
- ☒ No, and I have never been stationed on a carrier/ship

217. [Ask if [GENDER] = "Male" and [Q216 = "Yes, I am currently stationed on a carrier/ship" or Q216 = "No, but I have been stationed on a carrier/ship in the past 12 months" or Q216 = "Yes, and it has been more than 12 months since I've been stationed on a carrier/ship"] Have you heard of the Deployed Resiliency Counselors (DRCs)?

- ☒ Yes, and I have received services from them
- ☒ Yes, but I have not received services from them
- ☒ No, I have never heard of the DRCs

2016 Workplace and Gender Relations Survey of Active Duty Members

210. [ASK IF (JCSERVICE) = "Very" and (Q216) = "Yes, I am currently stationed on a carrier/ship" or (Q216) = "No, but I have been stationed on a carrier/ship in the past 12 months" or (Q216) = "Yes, and I have been more than 12 months since I've been stationed on a carrier/ship" or (Q217) = "Yes, and I have received services from them." Based on your experience working with the Deployed Resiliency Counselors (DRCs), to what extent... Mark one answer for each item.

	Not at all	Small extent	Moderate extent	Large extent	Very large extent
a. Were they appropriate?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. Were they helpful?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. Were they accessible?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d. Were you able to get one on to see the counselor?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e. Did you prefer having a civilian counselor who is not in your chain of command?	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

210. [ASK IF (JCSERVICE) = "Very" and (Q216) = "Yes, I am currently stationed on a carrier/ship" or (Q216) = "No, but I have been stationed on a carrier/ship in the past 12 months" or (Q216) = "Yes, and I have been more than 12 months since I've been stationed on a carrier/ship" or (Q217) = "Yes, and I have received services from them." or (Q217) = "Yes, but I have not received services from them." To what extent do you agree or disagree with the following statements regarding Deployed Resiliency Counselors (DRCs)? Mark one answer for each item.

	Strongly disagree	Disagree	Neither agree nor disagree	Agree	Strongly agree
a. The embedded nature of the DRCs is critical to making services accessible aboard carrier/ships (either in port or underway)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

	Strongly disagree	Disagree	Neither agree nor disagree	Agree	Strongly agree
b. I am confident in the DRC's ability to meet my needs	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

TAKING THE SURVEY

224. If you have comments or concerns that you were not able to express in answering this survey, please enter them in the space provided. Please do not use identifying names or information. Your feedback is useful and appreciated.

225. [Ask if Q2 = "No, I was surprised or behind"]

Based on your answer to the previous question, you are ineligible to take this survey. If you feel you have encountered this message in error, click the back arrow button and check your answer.

To submit your answer click Submit. For further help, please call our survey Processing Center toll-free at 1-800-851-5307, e-mail wgr-survey@mail.mil, or send a fax to 1-763-268-3000.

Appendix B.

Frequently Asked Questions

Frequently Asked Questions

2016 Workplace and Gender Relations Survey of Active Duty Members Office of People Analytics

The Defense Research, Surveys, and Statistics Center (RSSC), Office of People Analytics (OPA), has been conducting surveys of gender issues for the active duty military since 1988. RSSC uses scientific state of the art statistical techniques to draw conclusions from random, representative samples of the active duty populations. To construct estimates for the 2016 Workplace and Gender Relations Survey of Active Duty Members (2016 WGRA), OPA used complex sampling and weighting procedures to ensure accuracy of estimates to the full active duty population. This approach, though widely accepted as the standard method to construct generalizable estimates, is often misunderstood. The following details some common questions about our methodology as a whole and the 2016 WGRA specifically.

1. What was the population of interest for the 2016 WGRA?

The target population consisted of members from the active duty from the Army, Navy, Marine Corps, Air Force, and Coast Guard who were below flag rank and have at least four months of service.

OPA sampled 50% of men and 75% of women, consisting of 735,329 members. Data were collected between 22 July and 14 October 2016.

The weighted total DoD response rate for the 2016 WGRA was 23%, which is typical for large DoD-wide surveys. This rate was similar to the 29% response rate for the 2014 Rand Military Workplace Survey and the 24% response rate in the 2012 Workplace and Gender Relations Survey of Active Duty Members.

2. The 2016 WGRA uses “sampling” and “weighting.” Why are these methods used and what do they do?

Simply stated, sampling and weighting allows for data, based on a sample, to be accurately generalized up to the total population. In the case of the 2016 WGRA, this allows OPA to generalize to the full population of active duty members that meet the criteria listed above.

In stratified random sampling, all members of a population are categorized into homogeneous groups. For example, members might be grouped by gender and component (e.g., all male Army personnel in one group, all female Army personnel in another). Members are chosen at random within each group so that all eligible military members have an equal chance of selection to participate in the survey. Small groups are oversampled in comparison to their proportion of the population so there will be enough responses (approximately 500) from small groups to provide reliable estimates for population subgroups.

OPA scientifically weights the data so findings can be generalized to the full population of active duty members. Within this process, statistical adjustments are made to ensure the sample more accurately reflects the characteristics of the population from which it was drawn. This ensures that the oversampling within any one subgroup does not result in overrepresentation in the total force estimates, and also properly adjusts to account for survey nonresponse.

This methodology meets industry standards used by government statistical agencies including the Census Bureau, Bureau of Labor Statistics, National Agricultural Statistical Service, National Center for Health Statistics, and National Center for Education Statistics. In addition, private survey firms including RAND, WESTAT, and RTI use this methodology, as do well-known polling firms such as Gallup, Pew, and Roper.

3. **Are survey estimates valid with only a 23% weighted response rate?**

Response rates to the 2016 WGRA are consistent with response rate levels and trends for both the 2014 Rand Military Workplace Survey (29% response rate) and the 2012 Workplace and Gender Relations Survey of Active Duty Members (24% response rate). Experts in the field have found that surveys with similar response rates, or lower, are able to produce reliable estimates. While non-response bias due to low response rates is always a concern, OPA has knowledge, based on administrative records, of the characteristics of both survey respondents and survey nonrespondents, and uses this information to make statistical adjustments that compensate for survey non-response. This important advantage improves the quality of estimates from OPA surveys that other survey organizations rarely have.

OPA uses accurate administrative records (e.g., demographic data) for the active duty population both at the sample design stage as well as during the statistical weighting process to account for survey non-response and post-stratification to known key variables or characteristics. Prior OPA surveys provide empirical results showing how response rates vary by many characteristics (e.g., paygrade and Service). OPA uses this information to accurately estimate the optimum sample sizes needed to obtain sufficient numbers of respondents within key reporting groups (e.g., Army, female). After the survey is complete, OPA makes statistical weighting adjustments so that each subgroup (e.g., Army, E1-E3, and female) contributes toward the survey estimates proportional to the known size of the subgroup.

In addition, OPA routinely conducts “Non-Response Bias Analyses” on the Gender Relations surveys. This type of analyses measures whether respondents to the survey are fundamentally different from non-responders on a variety of dimensions. If differences are found, this may be an indication that there is bias in the estimates produced. Using a variety of methods to gauge potential non-response bias, OPA has found no evidence of non-response bias on the Gender Relations Surveys (OPA, 2016a).

4. **Is 23% a common response rate for other military or civilian surveys?**

Response rates of less than 30% are not uncommon for surveys that use similar sampling and weighting procedures. Many civilian surveys often do not have the same knowledge about the composition of the total population in order to generalize results to the full population via sampling and weighting. Therefore, these surveys often require much higher response rates in order to construct accurate estimates. For this reason, it is difficult to compare civilian survey response rates to OPA survey response rates. However, many of the large-scale surveys conducted by DoD or civilian survey agencies rely on similar sampling and weighting procedures as OPA to obtain accurate and generalizable findings with response rates lower than 30% (see Q5). Of note, OPA has a further advantage over these surveys by maintaining the administrative record data (e.g., demographic data) on the full population. This rich data, rarely available to survey organizations, is used to reduce bias associated with the weighted estimates and increase the precision and accuracy of estimates.

5. **Can you give some examples of other studies with similar response rates that were used by DoD to understand military populations and inform policy?**

The 2011 Health and Related Behaviors Survey, conducted by ICF International on behalf of the Tricare Activity Management, had a 22% response rate weighted up to the full active duty military population. This 22% represented approximately 34,000 respondents from a sample of about 154,000 active duty military members. In 2010, Gallup conducted a survey for the Air Force on sexual assault within the Service. Gallup weighted the results to generalize to the full population of Air Force members based on about 19,000 respondents representing a 19% response rate. Finally, in 2011, the U.S. Department of Defense Comprehensive Review Working Group, with the assistance of Westat and OPA, conducted a large-scale survey to measure the impact of overturning the Don't Ask Don't Tell (DADT) policy. The DADT survey, which was used to inform DoD policy, was sent to 400,000 active duty and Reserve members. It had a 28% response rate and was generalized up to the full population of military members, both active duty and Reserve. The survey methodology used for this survey, which used the OPA sampling design, won the 2011 Policy Impact Award from The American Association for Public Opinion Research (AAPOR), which “recognizes outstanding research that has had a clear impact on improving policy decisions practice or discourse, either in the public or private sectors.”

6. **What about surveys that study the total U.S. population? How do they compare?**

Surveys of sensitive topics and rare events rely on similar methodology and response rates to project estimates to the total U.S. adult population. For example, the 2010 National Intimate Partner and Sexual Violence Survey, conducted by the Centers for Disease Control and Prevention, calculated population estimates on a variety of sensitive measures based on about 18,000 interviews, reflecting a weighted response rate of between 28% to 34%.

Dear Sample A Sample:

One of my primary objectives as a military leader is to ensure you are provided the best military work environment possible. The 2016 Workplace and Gender Relations Survey of Active Duty Members assesses any experiences you may have had directly with sexual harassment and sexual assault. This is the only survey the Department uses to construct official rates of those behaviors across the force. Results from this survey will be used by DoD to refine the policies that support you and your fellow military members. Your participation is essential to an understanding of military life informed by fact instead of anecdote.

DoD remains committed to combating inappropriate behaviors. One of the ways to understand what is happening in your military workplace is through surveys. While I recognize you receive numerous requests to take surveys, this survey is the only one of its kind given to active duty members this year. It is vital to DoD's ability to understand the prevalence or absence of these problems in the military workplace. The survey is voluntary, but your response is encouraged to ensure the results we obtain are truly representative. The survey is confidential to the extent permitted by law. All responses will be reported in the aggregate, and no individual data will be reported.

The survey is currently open at the Defense Manpower Data Center (DMDC) website: <https://www.dodsurveyx.mil>. At the website, you will be asked to enter your Ticket Number. Your ticket number is ABCDEF.

Because this survey is considered *Official Business*, it can be completed using your government computer or your own computer if you choose. This is your chance to share your experiences and help us to continue improving policies and programs in the military workplace.

For questions pertaining to the survey, please call our Survey Processing Center at 1-800-881-5107, e-mail WGR.survey@mail.mil or send a fax to 1-763-768-3003. If you do not wish to participate or to receive reminders about this survey, you may remove yourself from the mailing list by contacting the Survey Processing Center. Be sure to include your Ticket Number in all communications. If you wish to withdraw your answers after starting this survey, notify the Survey Processing Center prior to September 28, 2016. You will be required to provide your Ticket Number.

Thank you for helping us continue to make the U.S. military the most innovative profession in the world. **"Know Your Part; Do Your Part!"**

Sincerely,

Cassia M. Nichols, Major General, U.S. Army
Director, Sexual Assault Prevention and Response Office

August 23, 2016

Dear Sample A, Sample:

You were recently sent a letter inviting you to participate in the 2016 Workplace and Gender Relations Survey of Active Duty Members. If you have completed the survey, thank you for your time. If you have not already done so, please take the time to complete it today. The survey is voluntary. Although your participation in the survey is voluntary, I hope you will recognize its importance and find a few minutes to answer these questions about your experiences. I realize you receive requests to take many surveys, but this critical survey is the only one of its kind given to active duty members this year.

This is an opportunity for you to help us continue to focus our efforts on preventing sexual assault and sexual harassment in our ranks. As the Department's official survey on these issues, the MIA HGRS is critical to DoD's ability to understand the presence or absence of these problems in the military workplace. This is a difficult topic, but the Department wants to know about your experiences and thoughts on gender relations in the military, positive or negative.

If you are a survivor, please know: your experiences cannot be summed up in a survey. For many of you, you just want to put this behind you and move on. We hope, despite this, you will consider sharing your experiences. Regardless of your decision to take the survey, please consider getting help and support if you have not done so already, whether it is support from within the military community or outside of the military community.

This survey is considered Official Document and can be completed at work if you choose. You can either complete the paper survey that is included in this package or access the survey website. The survey is available at the Defense Manpower Data Center (DAMDC) website: <http://www.dodsurvey.mil>. At the website, you will be asked to enter your Ticket Number. Your ticket number is ABCDEF.

For questions pertaining to the survey, please call our Survey Processing Center at 1-800-881-5307, e-mail WGR-survey@mail.mil or send a fax to 1-763-268-0002. If you do not wish to participate or to receive reminders about this survey, you may remove yourself from the mailing list by contacting the Survey Processing Center. Be sure to include your Ticket Number in all communications. If you wish to withdraw your answers after starting this survey, notify the Survey Processing Center prior to September 28, 2016. You will be required to provide your Ticket Number.

Thank you for helping us continue to make the U.S. military the best profession in the world.
 "Know Your Fact, Do Your Part!"

Sincerely,

 Candice M. Nichols, Major General, U.S. Army
 Director, Sexual Assault Prevention and Response Office

In accordance with DoD Instruction 9910.01, all data collection in the Department must be licensed and allow full access at a Report Center Number (RCN) with an expiration date. The RCN for this survey is F000201101, expiring 03-22-21.

September 08, 2016

Dear Sample A, Sample:

Recently, I contacted you about participating in the 2016 Workplace and Gender Relations Survey of Active Duty Members. Your completed responses have not yet been received and our deadline of September 28, 2016 is fast approaching. If you have not already done so, please take the time to complete the survey today.

The DoD remains committed to combating these unwanted behaviors. Although this is a difficult topic, the Department wants to know about your experiences and thoughts, positive or negative. This survey is the primary way of gathering quantifiable and systematic data from as many people as possible, in the light of what is happening in the active duty. However, surveys often feel impersonal and to most accurately measure some of these experiences based on industry standards for measuring criminal acts, we have to use language and terminology that is not easy to read and even more difficult to answer. We are committed to providing leadership with your important and confidential feedback with our utmost respect for your comfort level.

While participation is voluntary, your opinions are very important. These surveys are Official Business; you may complete the survey at your duty station, using government equipment. The survey is confidential to the extent permitted by law. All data will be reported in the aggregate, and no individual data will be reported. To access the survey, go to <https://www.dodsurvey3.mil> and enter your Ticket Number: ABCDEF.

If you have partially completed the survey but have not clicked the "Submit Button," please go back, log onto the website, complete as many items as you can, and submit your responses. After September 28, 2016, we will consider the items you have completed to be your intended response.

For questions pertaining to the survey, please call our Survey Processing Center at 1-800-881-5207, e-mail WGR-survey@mail.mil or send a fax to 1-763-268-3002. If you do not wish to participate or to receive reminders about this survey, you may remove yourself from the mailing list by contacting the Survey Processing Center. Be sure to include your Ticket Number in all communications. If you wish to withdraw your answers after starting this survey, notify the Survey Processing Center prior to September 28, 2016. You will be required to provide your Ticket Number.

Thank you for helping us continue to make the U.S. military the best profession in the world. "Know Your Part; Do Your Part!"

Sincerely,

Camille M. Nichols, Major General, U.S. Army
Director, Sexual Assault Prevention and Response Office

In accordance with DoD Instruction 5400.07, all data collection in the Department must be licensed and stored that format as a Report Control Symbol (RCS) with an expiration date. The RCS for this survey is FALC/QJ1194, expiring 03/2027.

64110000013

FOR VIDEORECORDING: CMC has set up a telephone line for anyone who wishes to receive more information. Call 332 1084 from 9am to 5pm on either afternoon. We will be able to provide details to interested or licensed CMC members. If you do not have access to a fax or e-mail, please call 332 179 2094. This is a 24-hour helpline. If you are a CMC member, please contact your local office.

For joint dissemination, dated here, copy of a submission, here for subject, and include the priority of the survey or investigation. Call 17-1084 from one and an alternate contact number, telephone area and box, if alternate data collection by interview only, subject. If you do not wish access to a submission, you can call 17-1082-102-1011. This precluded list does not include surveys being conducted by other DOD units.

 Subject: 2016 Workplace and Gender Relations Survey of Active Duty Members (JEDWD)
 Signed By: [mailto:surveyteam@doj.mil]

Dear Department Members,

Your Ticket Number: B591487

You and your unit have been asked to complete the 2016 Workplace and Gender Relations Survey of Active Duty Members. Thank you for your participation in helping us learn to provide the best possible environment for all members of the Department.

The website for the survey is: <https://www.dhs.gov/survey>. If you find it difficult to access the survey but experienced technical problems with the survey tool, please try logging in from a different device. If you are still having trouble, please contact the survey helpdesk at surveyhelp@doj.mil. The helpdesk is available from 9 a.m. to 5 p.m. Eastern Standard Time, Monday through Friday. Please note that the survey is not available to members of the Department who are currently on active duty in a combat zone. If you are currently in a combat zone, please contact the survey helpdesk at surveyhelp@doj.mil for more information.

If you have previously completed the survey, you will not be asked to complete it again. Please do not provide any identifying information, such as your name, email address, or phone number, on the survey.

We assure you that all data will be kept confidential and no individual data will be reported.

Thank you for participating in the 2016 Workplace and Gender Relations Survey of Active Duty Members.

Sincerely,
 Dr. Elizabeth P. Davis
 Principal Investigator, Workplace and Gender Relations Survey
 Office of the Assistant Secretary for Policy

Department members are asked to complete the survey as soon as possible and to provide as much information as possible. Your participation is important to the success of the survey. Please do not provide any identifying information, such as your name, email address, or phone number, on the survey. If you have any questions or concerns, please contact the survey helpdesk at surveyhelp@doj.mil.

If you have any questions or concerns, please contact the survey helpdesk at surveyhelp@doj.mil. The helpdesk is available from 9 a.m. to 5 p.m. Eastern Standard Time, Monday through Friday. Please note that the survey is not available to members of the Department who are currently on active duty in a combat zone. If you are currently in a combat zone, please contact the survey helpdesk at surveyhelp@doj.mil for more information.

For more information, please contact the survey helpdesk at surveyhelp@doj.mil. The helpdesk is available from 9 a.m. to 5 p.m. Eastern Standard Time, Monday through Friday. Please note that the survey is not available to members of the Department who are currently on active duty in a combat zone. If you are currently in a combat zone, please contact the survey helpdesk at surveyhelp@doj.mil for more information.

^a Fors Marsh Group (FMG)

**Office of People Analytics
4800 Mark Center Drive, Suite 06E22
Alexandria, VA 22350-4000**

Acknowledgments

The Office of People Analytics (OPA) is indebted to numerous people for their assistance with the 2016 Military Investigation and Justice Experience Survey (2016 MIJES), which was conducted on behalf of Major General Camille Nichols, Director, DoD Sexual Assault Prevention and Response Office (SAPRO). The survey was conducted under the leadership of Dr. Elizabeth P. Van Winkle, former Director of the *Defense Research, Surveys, and Statistics Center for Health and Resilience* (RSSC[H&R]) and Ms. Kristin Williams, acting Director RSSC[H&R]. The project manager for this effort was Dr. Ashlea Klahr, Fors Marsh Group, LLC.

DoD SAPRO officials contributing to the development and administration of this assessment include Dr. Nathan Galbreath. Service/National Guard officials contributing to the development and administration of this survey include Dr. Jessica Gallus (Army), Mr. Paul Rosen and Ms. Kimberly Lahm (Navy), Dr. Paul Garst (Department of Navy, SAPRO), Ms. Aileen Richards (Air Force), Dr. Jessica Zabecki (Marine Corps), and Mr. James Thompson (National Guard).

The lead survey design analyst for this survey is Ms. Natalie Namrow, Fors Marsh Group, LLC. Ms. Namrow and Ms. Sarah De Silva, Fors Marsh Group, LLC, designed the unique presentation of complex items used in this report. Ms. Margaret Coffey, Team Lead of Survey Operations, is responsible for the survey database construction and archiving. The lead operations analysts on this survey were Ms. Sarah De Silva, who used OPA's Statistical Analysis Macros to calculate the results presented in this report.

Ms. Sue Reinhold provided assistance with programming and merging contact information.

Ms. Mary Padilla, Fors Marsh Group, LLC, formatted and assembled the charts in this report using OPA's Survey Reporting Tool. A team consisting of Ms. Natalie Namrow, Ms. Sarah De Silva, Ms. Amanda Barry, Dr. Ashlea Klahr, Mr. Brock Brothers, Mr. William Xav Klauberg, Ms. Yvette Claros, Ms. Margaret Coffey, Dr. Katherine Ely, and Ms. Kristin Williams completed quality control for this report.

The results of this report would not be possible without the courage of the survivors who shared their opinions and experiences with us.

Executive Summary

The Department of Defense (DoD) has a strong commitment to providing Sexual Assault Prevention and Response (SAPR) resources and services to all military members who report a sexual assault. The Department, under the guidance of the DoD Sexual Assault Prevention and Response Office (SAPRO), has worked to create and improve programs in an effort to provide support to military sexual assault survivors. The *Military Investigation and Justice Experience Survey (MIJES)* is an anonymous survey designed to assess the investigative and legal processes experienced by military members that have made a report of sexual assault, have gone through the military investigation process, and who have agreed to voluntarily participate in this survey. Administered in fiscal year 2016 (FY16), the *2016 MIJES* reflects the attitudes and opinions of 225 military members who brought forward a report of sexual assault to military officials and completed the military justice process from investigation to case closure. The *2016 MIJES* was not weighted; therefore, results of the study are not generalizable to those Service members who had a closed case in Defense Sexual Assault Incident Database (DSAID).

Study Background and Methodology

This overview report discusses findings from the *2016 MIJES*, which includes data collected between August 29 to December 6, 2016. This survey was conducted in response to a Secretary of Defense Directive requiring that a standardized and voluntary survey for military members who brought forward a report of sexual assault and participated in the military justice process, be developed and regularly administered to “provide the sexual assault victim/survivor the opportunity to assess and provide feedback on their experiences with SAPR victim assistance, the military health system, the military justice process, and other areas of support” (Secretary of Defense, 2014). The Defense Research, Surveys, and Statistics Center (RSSC) within the Office of People Analytics (OPA) was tasked with this effort.

The *2016 MIJES* focuses specifically on military members who made a report of sexual assault and have a closed case (e.g., investigation done, disposition complete, and case information entered into DSAID) between April 1, 2015 and March 31, 2016 (FY15 Q3–FY16 Q2).¹ Uniformed military members include members of the active duty (Army, Navy, Marine Corps, and Air Force), the Reserve (Army Reserve, Navy Reserve, Marine Corps Reserve, and Air Force Reserve), and the National Guard (Army National Guard and Air National Guard). All military members who met the above criteria were eligible to participate in the survey. Additionally, respondents who were not currently uniformed military members, whose report did not result in a criminal investigation by a Military Criminal Investigative Organization (MCIO), whose alleged perpetrator was not a military member, or who chose not to participate in the investigation or military justice process were ineligible.² The survey instrument and methodology were designed with input from SAPR representatives from Department leadership, the Services, the National Guard Bureau, and other DoD stakeholders. All representatives had a shared goal of gathering accurate data on survivor experiences, while balancing respect for the survivor and the need for anonymity. The population of interest for this survey is very specific.

¹ The total eligible sample number was 2,041 members.

² *2016 MIJES* Q1, Q10, Q11, Q16.

As such, a non-probability survey approach was appropriate to gather data on this specific subpopulation. As a result of this approach, the *2016 MIJES* does not employ statistical sampling or scientific weighting. Therefore results from this survey cannot be generalized to the full population of military members who made a report of sexual assault; results can only be attributed to those eligible respondents who completed the survey.

The survey administration process began on August 29, 2016, with an e-mail announcement message to military members in the sample.³ This anonymous survey was administered via the web and paper-and-pen. Data were collected via the web between August 29, 2016 and December 6, 2016. Data were collected via paper-and-pen surveys between September 27, 2016 and December 2, 2016.⁴ During the administration period, the *2016 MIJES* had 225 completed surveys (188 completed web surveys and 37 completed paper surveys). Results in this report are presented at the Total DoD level. No personally identifiable information was attached to survey data.

The remainder of this executive summary provides a general overview of top-line results from the *2016 MIJES*. Additional information about the construction of metrics and rates, as well as additional data on findings can be found in the full report. References to a “perpetrator” or “offender” throughout this report should be interpreted as “alleged perpetrator” or “alleged offender”; without knowing the specific outcomes of particular allegations, the presumption of innocence applies unless there is an adjudication of guilt. References to “sexual assault” throughout the report do not imply legal definitions for sexual assault. Additionally, references to “retaliation,” “professional reprisal,” “ostracism,” “maltreatment,” or perceptions thereof, are based on negative behaviors as reported by the eligible survey respondents. Without knowing the specifics of cases or reports, this data should not be construed as substantiated allegations of professional reprisal, ostracism, or maltreatment.

General Satisfaction With Individuals/Resources

Throughout the military justice process, a military member may interact with a number of individuals and resources. The *2016 MIJES* assessed respondents satisfaction with various aspects of these interactions. The majority of respondents to the *2016 MIJES* were satisfied with the overall services provided.⁵ However, responses about SAPR-specific resources (i.e., Sexual Assault Response Coordinator [SARC], Uniformed Victim Advocate/Victim Advocate [UVA/VA], and Special Victims’ Counsel/Victims’ Legal Counsel [SVC/VLC]) were generally more positive and received the highest rates of satisfaction, whereas members of leadership, (e.g., senior enlisted advisors, unit commanders, immediate supervisors) received lower ratings.

³ Prior to administration, a notification e-mail was sent to sample members by SAPRO Director, Major General Camille Nichols, to validate the survey’s legitimacy as well as to make sample members aware that they would be receiving the survey via e-mail or United Parcel Service (UPS) package requiring signature. UPS was used to increase response rates and to provide additional assurance that the survivor alone (e.g., not a family member, roommate) would receive the survey package.

⁴ All sample members who had not taken the survey by early September received a paper survey via UPS. The package required the recipient’s signature to ensure the sample member was the only one to receive the package in order to maximize privacy.

⁵ Respondents were first asked if they interacted with each individual/resource. Rates of satisfaction are only of those respondents who interacted with these individuals during the military justice process. Data on the percent of respondents who interacted with each individual/resource are included in the full report.

Specifically, 78% of respondents were satisfied with overall services provided by the SVC/VLC during the military justice process, 79% were satisfied with the services provided by the UVA, 75% were satisfied with the services provided by the VA, and 73% were satisfied with the services provided by the SARC. Across these respondents, less than 20% were actively dissatisfied with the services provided by SAPR-specific resources.

Individuals involved more directly in the military justice process, such as the military trial counsel and MCIOs, also received generally high marks in satisfaction; 64% of respondents indicated they were satisfied with the services provided by the military trial counsel and 53% indicated satisfaction with the services provided by the MCIO. Between 23% and 28%, respectively, indicated they were actively dissatisfied with the services provided by the military trial counsel or MCIO.

While about half of respondents indicated satisfaction with the interactions they had with their unit commander, senior enlisted advisor, or immediate supervisor, comparatively these individuals received the lowest marks. Specifically, 58% indicated they were satisfied with the interactions with their senior enlisted advisor, 57% indicated they were satisfied with the interactions with their unit commander, and 50% indicated they were satisfied with the interactions with their immediate supervisor. However, about one-third of respondents indicated they were dissatisfied with their interactions with these individuals. Of note, higher marks of dissatisfaction might reflect the dissimilarities between the expectations for these individuals to provide specific amounts of support compared to SAPR-specific resources. For example, the amount of knowledge the individual had about handling sexual assault cases, their comfort about handling sexual assault cases, and their overall involvement in the military justice process are comparatively different to other resources.

Perceived Professional Reprisal, Ostracism, and Maltreatment

The Department strives to create an environment where military members feel comfortable and safe reporting a potential sexual assault to a military authority. To further ensure a safe environment for reporting, the Department has been monitoring perceived repercussions (i.e. retaliatory behavior) as a result of reporting a sexual assault. Specifically, two forms of retaliatory behaviors have been outlined: professional reprisal and ostracism/maltreatment. Professional reprisal is a personnel or other unfavorable action taken by the chain of command against an individual for engaging in a protected activity. Ostracism and maltreatment can be negative behaviors, such as actions of social exclusion or misconduct against the military member taken by peers or an individual in a position of authority, because the military member reported, or intends to report a criminal offense.

Similar to metrics on the 2015 *MIJES*, questions were designed to measure negative behaviors a respondent may have experienced as a result of making a sexual assault report and to account for additional motivating factors that may be consistent with prohibited actions of professional reprisal, ostracism, and maltreatment in the Uniform Code of Military Justice (UCMJ) and military policies and regulations. This includes the alleged perpetrator having knowledge about the report and that the actions were perceived to be taken with a specific intent (i.e., to discourage the military member from moving forward with the report of sexual assault or to

abuse or humiliate the respondent). A full description of these measures can be found in Chapter 4 of this report.

Survey questions are only able to provide a general understanding of the self-reported outcomes that may constitute professional reprisal, ostracism, or maltreatment and therefore OPA refers to such outcomes as “perceived.” Ultimately, only the results of an investigation can determine whether self-reported negative behaviors meet the requirements of prohibited retaliation. Therefore, the percentages discussed reflect the respondents’ perceptions about a negative experience associated with their report of a sexual assault and not necessarily a reported or legally substantiated incident of retaliation.

To better align with legal indicators, additional questions about the perceived intent regarding negative behaviors or actions were used to calculate a metric accounting for additional motivating factors that are consistent with prohibited actions.⁶ Once these additional motivating factors were overlaid, the 2016 MIJES found that 38% of respondents indicated experiencing perceived professional reprisal, ostracism, and/or maltreatment. Specifically, 28% of respondents indicated experiencing perceived professional reprisal, while 27% perceived experiencing ostracism/maltreatment (17% perceived experiencing ostracism and 24% perceived experiencing maltreatment). Of note, respondents who perceived experiencing these negative behaviors were asked whether these actions impacted their decision to continue participating and/or moving forward with their report; the majority indicated they chose to continue.

Respondents who indicated experiencing perceived professional reprisal and/or perceived ostracism/maltreatment were asked whether they chose to file a complaint. About one-quarter, 23%, filed a complaint (e.g., with the Inspector General, Military Equal Opportunity Office, commander). Of those who filed a complaint, one-third indicated the situation continued or got worse, were told/encouraged to drop the issue, or were not aware of any action taken by the person they told, whereas 28% indicated they got help dealing with the situation and 17% indicated their leadership took steps to address the situation. The top reasons for not filing a complaint included the respondent was worried reporting would cause more harm than good (67%), they did not trust that the process would be fair (66%), they did not think anything would be done or anyone would believe them (59%), and/or they did not want more people to know and/or judge them (48%). Approximately one-third (34%) of respondents who chose not to file a complaint indicated they did not know how to report.

Of respondents who indicated experiencing perceived professional reprisal and/or perceived ostracism/maltreatment, 44% indicated they discussed these with a work supervisor or anyone up their chain of command to get guidance on what to do. These respondents most often indicated the discussion was held with another member in their chain of command (57%), their senior enlisted leader (51%), or their immediate supervisor (43%). Of these respondents, 52% indicated as a result of their discussion they are not aware of any action taken by the person that they told. These respondents also indicated as a result of their discussion, the situation continued or got worse for them (44%), they were told/encouraged to drop the issue (42%), they got help dealing

⁶ Construction of perceived reprisal, ostracism, and maltreatment rates are based on general policy prohibitions and should not be construed as a legal crime victimization rate due to slight differences across the Services on the definition of behaviors and requirements of retaliation.

with the situation (21%), and/or their leadership took steps to address the situation (17%). In summary, 29% of these respondents indicated they received help or assistance as a result of their discussion of these behaviors.

Discretion, Preparedness, and Provision of Information

The criminal justice process is often a difficult process for any survivor, military or civilian. While all resources, including command, were assessed somewhat positively in providing support to the respondent during the military justice process, survey responses highlighted a few areas for the Department to note. Overall, 41% of respondents indicated they were kept up to date on the progress of their case to a large extent/very large extent and 51% indicated they had been kept up to date to a small extent/moderate extent; 8% indicated they were not at all kept up to date on the progress of their case during the military justice process. Continuing to improve communication for all resources may be an opportunity for the Department to strengthen its ability to serve military members during the military justice process. Data from the *2016 MIJES* also highlight that certain resources can improve upon their use of discretion in discussing details about a case as well as aiding respondents in preparing for the military justice process. The majority of respondents agreed that SAPR-specific resources used discretion in sharing details of their case, whereas less than two-thirds indicated their unit commander/director (64%), their senior enlisted advisor (57%), or their immediate supervisor (55%) used discretion. The Department has also worked to prepare military members who bring forth a report of sexual assault for the process as best as possible. The *2016 MIJES* found that 41% of respondents indicated that based on the services provided, they felt well prepared for the military justice process, whereas 23% felt poorly prepared. The 23% of respondents who indicated they were poorly prepared for the military justice process were asked to specify what could have helped to better prepare them. The most frequently mentioned actions in the qualitative comments included needing better explanation of the military justice process and their rights and better support overall. Of those who felt well-prepared, the majority credited SAPR-specific resources with 69% indicating the SVC/VLC helped prepare them, 53% indicating the SARC, and 50% indicating the UVA/VA helped prepare them for the process. Qualitative comments from the survey further identified friends and family, SAPR-specific services, and mental health providers as playing a large role in supporting and assisting them in preparation for the justice process.

General Perceptions of the Military Justice Process

The *2016 MIJES* reflects varied opinions from respondents on how they navigated the military justice process. While most respondents were satisfied with the services provided to them, some resources and individuals were more beneficial to them, while others were less so. Further, while the majority of respondents did not perceive experiencing any retribution as a result of making a report of sexual assault, 38% did perceive retribution. Overall, ***77% of all respondents said they would recommend others in the military make a report if they experienced a sexual assault.*** This rate speaks to the potential benefit of reporting within the military, but also to the benefit of many of the SAPR-specific resources provided to military members who bring forward a report of sexual assault.

The *2016 MIJES* represents the attitudes and opinions of eligible respondents of the survey. OPA will continue to collect data from this important population to gauge progress and target

areas for improvement. Results will help to inform current and future resources and programs with the goal of assisting and supporting military members who bring forward a report of sexual assault navigate through the military justice process.

Chapter 1: Study Background and Design

The Department of Defense (DoD) has a strong commitment to providing Sexual Assault Prevention and Response (SAPR) resources and services to all military members who report a sexual assault. Over the years, the Department, under the guidance of the DoD Sexual Assault Prevention and Response Office (SAPRO), has worked to create and improve programs in an effort to provide support to military sexual assault survivors. The 2016 Military Investigation and Justice Experience Survey (*MIJES*) is the second administration of this DoD-wide survey effort designed to assess the investigative and legal processes experienced by military members that have made a formal report of sexual assault. This overview report for the *2016 MIJES* is based on findings from investigations that were closed/adjudicated during Quarter 3 and Quarter 4 of fiscal year 2015 (FY2015) and Quarter 1 and Quarter 2 of fiscal year 2016 (FY2016).

Study Background

This overview report discusses findings from the *2016 MIJES*, which includes data collected from August 29 to December 6, 2016. The *2016 MIJES* is designed to assess the investigative and legal processes experienced by military members that have made a formal report of sexual assault. This survey was conducted in response to a Secretary of Defense Directive requiring that a standardized and voluntary survey for military members who brought forward a report of sexual assault be developed and regularly administered to “provide the sexual assault victim/survivor the opportunity to assess and provide feedback on their experiences with (Sexual Assault Prevention and Response) SAPR victim assistance, the military health system, the military justice process, and other areas of support” (Secretary of Defense, 2014). The Defense Research, Surveys, and Statistics Center (RSSC), within the Office of People Analytics (OPA), was tasked with this effort.⁷ For over 25 years, RSSC has been DoD’s lead organization for conducting impartial and objective scientific survey and focus group research for the Department.

By focusing on military members who made a formal report of sexual assault and have a closed case (e.g., investigation done, disposition complete, and case information entered into the Defense Sexual Assault Incident Database [DSAID]), OPA is assessing the military justice experiences of a unique population that has not previously been studied. The *2016 MIJES* was designed with input from SAPR representatives from the DoD, the Services, the National Guard Bureau, the Office of Inspector General, and other DoD stakeholders. All representatives had a shared goal of gathering accurate data on the experiences of military members who brought forward a report of sexual assault, while balancing respect for the military member and the need for anonymity. The *MIJES* is not intended to be a probability-based survey (i.e., employing statistical sampling and weighting). It is an anonymous effort providing the responding military members maximum protection of their privacy concerns. This is the only formal assessment of this population across DoD, including active duty and Reserve component members.

⁷ Prior to 2016, the Defense Research Surveys, and Statistics Center (RSSC) resided within the Defense Manpower Data Center (DMDC). In 2016, the Defense Human Resource Activity (DHRA) reorganized and moved RSSC under the newly established Office of People Analytics (OPA).

The *MIJES* fielded in the last quarter of FY2016 in order to capture findings from those eligible military members that made a formal report of sexual assault any time after October 1, 2013, and the disposition of their case was complete and entered into DSAID between April 1, 2015 and March 31, 2016 (FY15 Q3–FY16 Q2). The survey focuses on experiences with the military investigation and justice process only and does not ask military members questions about the circumstances or details of the assault. This chapter outlines report content by chapter and provides an overview of the 2016 *MIJES* methodology. References to perpetrator/offender throughout this report should be interpreted as “alleged perpetrator” or “alleged offender” because without knowing the specific outcomes of particular allegations, the presumption of innocence applies unless there is an adjudication of guilt. References to “sexual assault” throughout the report do not imply legal definitions for sexual assault. Additionally, references to “retaliation,” “reprisal,” “ostracism” or “maltreatment,” or perceptions thereof, are based on the negative behaviors as reported by the survey respondents; without knowing more about the specifics of particular cases or reports, this data should not be construed as substantiated allegations of reprisal, ostracism, or maltreatment.

Survey Content by Chapter

The goal of the *MIJES* is to hear directly from military members in the active duty, Reserve, and National Guard, who made a formal report of sexual assault and have a closed case, about the investigative and legal processes they experienced. OPA worked closely with representatives from DoD SAPRO and SAPR across all of the Services and National Guard to create a survey that would enable the DoD to gauge whether the investigative and military justice processes are effectively meeting the needs of military members who bring forward a report of sexual assault. Areas that were of specific interest to the Department were: the reporting process and details about the military member’s choice to report; experience and satisfaction with specific SAPR resources (including Sexual Assault Response Coordinators [SARCs], Uniformed Victims’ Advocates/Victims’ Advocates [UVAs/VAs], military criminal investigators, military trial counsel, Special Victims’ Counsel [SVC]/Victims’ Legal Counsel [VLC], and Victim Witness Assistance Providers [VWAP]) as well as the military member’s command; outcomes associated with reporting (e.g., perceived professional reprisal, ostracism, and maltreatment as a result of reporting a sexual assault); satisfaction with the overall military justice experience; and experiences with expedited transfers. With these interests in mind, the *MIJES* was developed to provide self-reported details related to the overall military justice experience of military members who brought forward a report of sexual assault.

Specific topics covered in this report are organized across six chapters:

- Chapter 2 summarizes the type of report initially made by the eligible respondent,⁸ and for those respondents who made a restricted report, whether their report was converted to an unrestricted report and the time frame in which it was converted. Additionally, this chapter highlights whether their report resulted in a criminal investigation by a Military Criminal Investigative Organization (MCIO), indication that at least one alleged

⁸ Respondents who were not currently uniformed military members, whose report did not result in a criminal investigation by a Military Criminal Investigative Organization, whose alleged perpetrator was not a military member, and who chose not to participate in the investigation or military justice process were ineligible (2016 Q1, Q10, Q11, Q16 *MIJES*).

perpetrator of the reported sexual assault was a military member, the time frame for when their report was made in relation to the sexual assault, whether the respondent was made aware of their legal rights, whether the respondent participated in any part of the investigation or military justice process for their sexual assault case, and the time frame in which the sexual assault investigation was closed.⁹

- Chapter 3 summarizes the experiences, satisfaction, and interactions of respondents with SAPR resources and command during the military justice process. Specific SAPR resources include the SARC, UVA/VA, military criminal investigators, military trial counsel, SVC/VLCs, and Victim Witness Assistance Providers (VWAP). Command includes the respondent's unit commander or other member of their chain of command including senior enlisted advisor or immediate supervisor.
- Chapter 4 summarizes other perceived outcomes associated with reporting, specifically behaviorally-based questions designed to capture examples of perceived professional reprisal, perceived ostracism, and perceived maltreatment as a result of reporting a sexual assault along with questions regarding who took the action(s), overall perceived impact of these experiences on the respondent's career, involvement of social media, and actions that may have occurred as a result of these perceived behaviors. The estimates presented in this chapter reflect the respondents' perceptions about a negative experience associated with their reporting of a sexual assault and not necessarily a reported or legally substantiated incident of retaliation.
- Chapter 5 summarizes the experiences of respondents with the overall military justice process. This includes the extent respondents felt up to date on the progress of the case, their awareness of individuals involved with the case using discretion, whether charges were preferred or if there was an Article 32 preliminary hearing, whether official actions were taken against the alleged perpetrator, overall perceptions about the military justice process, and experiences of respondents with expedited transfers.
- Chapter 6 provides a summary of chi square analyses investigating potential influences on overall respondent choice to recommend to another survivor to make a report. A merged dataset combining data from the 2016 MIJES and 2015 MIJES¹⁰ administrations was used for all analyses.
- Chapter 7 provides a summary of all findings.

Appendix A contains Frequently Asked Questions (FAQs). Appendix B includes the dynamic Service-specific language presented on the web survey. Appendix C presents findings from members who were not eligible to respond to the full survey because they chose not to participate in the investigation or military justice process; findings summarize why these members chose not to report and whether they received supportive services and resources.

⁹ Appendix C provides findings for three questions, Q17, Q18, and Q127, which are not included in this report because they were only seen by members who were not eligible to complete the survey. These members indicated they chose not to participate in any part of the investigation or military justice process, but were asked follow-up questions about their decision not to participate.

¹⁰ Namrow, N., Hurley, M., Van Winkle, E., & De Silva, S. (2016).

Methodology

OPA conducts both web-based and paper-and-pen surveys to support the personnel information needs of the Under Secretary of Defense for Personnel and Readiness (USD[P&R]). These surveys assess the attitudes and opinions of the entire DoD community on a wide range of personnel issues. This section details the methodology employed for the *2016 MIJES*.

Population and Reporting Categories

The population of interest for the *2016 MIJES* was current uniformed military members who had a closed case (e.g., investigation done, disposition complete, and case information entered into DSAID) between April 1, 2015 and March 31, 2016 (FY14 Q3–FY15 Q2).¹¹ Uniformed military members include members of the active duty (Army, Navy, Marine Corps, and Air Force), the Reserve (Army Reserve, Navy Reserve, Marine Corps Reserve, and Air Force Reserve), and the National Guard (Army National Guard and Air National Guard). All respondents who met the above criteria were eligible to participate in the survey. Respondents who were not currently uniformed military members, whose report did not result in a criminal investigation by an MCIO, whose alleged perpetrator was not a military member, or who chose not to participate in the investigation or military justice process were ineligible.¹²

Results are presented in this report at the Total DoD level.¹³ Survey items were constructed to be dynamic for web data collection so as to match the Service-specific resources available to each respondent. For example, for items that referenced “Uniformed Victims’ Advocate/Victims’ Advocate,” Army and Army Reserve respondents saw “SHARP Victim Advocate” and Navy and Navy Reserve respondents saw “Unit Sexual Assault Prevention and Response Victim Advocate (Unit SAPR VA) or Sexual Assault Prevention and Response Victims’ Advocate (SAPR VA).” The Tabulation of Responses (OPA, 2017) includes the glossary of specific language presented on the paper survey; both the Tabulation of Responses and Appendix B include the dynamic text used on the web version of the survey.

The survey opened August 29, 2016 and represents data for the first half of FY16 (Q1/Q2), as well as past fiscal years. This survey was conducted across all DoD components including the Reserve/National Guard members. As previously mentioned, the *2016 MIJES* was designed with input from a wide range of SAPR representatives with a shared goal of gathering accurate data on experiences of military members who brought forward a report of sexual assault, while balancing respect for the military member and the need for anonymity. As such, the *2016 MIJES* is an anonymous and voluntary survey and does not use scientific sampling/weighting which would allow generalizability to the full population of military members who have participated in the military investigative and justice processes. Although not generalizable to the full population

¹¹ The total eligible sample number was 2,041 members. There is a distinction between eligibility of respondents and the availability of the data in DSAID. Data were collected on military members whose investigation was completed in FY15 and FY16; therefore to be eligible for *MIJES*, a military member’s case had to be completed after October 1, 2013. However, the sample for the *2016 MIJES* included military members whose cases were entered into DSAID during Q3/Q4 of 2015 (beginning April 1, 2015) and Q1/Q2 of 2016 (through March 31, 2016).

¹² *2016 MIJES* Q1, Q10, Q11, Q16.

¹³ Full results of data provided in the 2016 Military Investigation and Justice Experience Survey: Tabulations of Responses: August 31–December 4, 2015 (OPA, 2016).

of military sexual assault survivors, *MIJES* results provide a rich data source based on the responses of hundreds of military members who brought forward a report of sexual assault, data that has not previously been available.

This anonymous survey was administered via the web and paper-and-pen. The survey administration process began on August 29, 2015, with an e-mail announcement message to military members in the sample.¹⁴ This announcement e-mail explained the *2016 MIJES* data collection effort, why the survey was being conducted, how the survey information would be used, how to access the survey, why participation was important, as well as information about how to opt out of the survey if the sample member did not want to participate. Throughout the administration period, a limited number of additional e-mail reminders were sent to sample members to remind them of the survey effort and to encourage them to take the survey. Data were collected via the web between August 29, 2016 and December 6, 2016. Data were collected via paper-and-pen surveys between September 27, 2016 and December 2, 2016.¹⁵

The initial sample population for the *2016 MIJES* consisted of 3,230 military members who brought forward a report of sexual assault who had a closed case (e.g., investigation done, disposition completed, and case information entered into DSAID) between April 1, 2015 and March 31, 2016 (FY15 Q3 – FY16 Q2). Of the 3,230 military members in the initial sample, 2,041 were current military members as of the Defense Manpower Data Center (DMDC) May 2016 Active Duty Master File (ADMF) or Reserve Master File (RMF) and therefore comprised the eligible sample population. Those who were no longer members of the military as of the May ADMF and RMF were not selected. OPA used contact data to ensure the survey was directed to eligible respondents, however it was not used for any part of the data collection effort and all survey responses received (on both web and paper surveys) were completely anonymous. OPA maintained response anonymity by breaking the link between the sample members' addresses and the survey returns to ensure there was no way to link the respondents' identities to their responses. Additionally, disclosure protection was afforded by the OPA policy on sharing data and management of data per regulations.¹⁶

Overall, 308 members responded to the *2016 MIJES*. Of the respondents who took the survey, 83 were ineligible to answer all the survey questions based on their responses to four eligibility questions and whether they met completion criteria. Specifically, the four eligibility items confirmed that respondents who were not currently uniformed military members, whose report did not result in a criminal investigation by a Military Criminal Investigative Organization, whose perpetrator was not a military Service member, and who chose not to participate in the investigation or military justice process were ineligible respondents (Q1, Q10, Q11, Q16).

¹⁴ Prior to administration, a notification e-mail was sent to sample members by SAPRO Director, Major General Camille Nichols, to validate the survey's legitimacy as well as to make sample members aware that they would be receiving the survey via e-mail or United Parcel Service (UPS) package requiring signature. UPS was used to increase response rates and to provide additional assurance that the survivor alone (e.g., not a family member, roommate) would receive the survey package.

¹⁵ All sample members who had not taken the survey by early September received a paper survey via UPS. The package required the recipient's signature to ensure the sample member was the only one to receive the package in order to maximize privacy.

¹⁶ DMDC (2014). The Office of the Under Secretary of Defense (Personnel and Readiness) Research Regulatory Oversight Office reviewed the *MIJES* and determined that the study was not research involving human subjects according to Department of Defense Instruction 3216.02.

Completion criteria for the survey is defined as answering 50% or more of the questions asked of all respondents.

As seen in Figure 1, after accounting for these five criteria, the 2016 MIJES had 225 responders (188 completed web surveys and 37 completed paper surveys) who met all criteria, and therefore are considered eligible responders.

Figure 1.
2016 MIJES Responders

Table 1 shows the number of respondents for the 2016 MIJES broken out by individual reporting categories: Total DoD, Gender, Service, Age, and Time When Report Was Made.

- Gender is broken out into two categories: male and female.
- Service is broken out into five categories: Army, Navy, Marine Corps, Air Force, and National Guard. Reserve members are included in the Service totals (e.g., Army Reserve is included in the Army results). National Guard results include both Army National Guard and Air National Guard.
- Age is broken out into three groups: 24 Years Old and Younger, 25-33 Years Old, and 34 Years Old and Older.
- Time When Report Was Made includes four categories: Pre-FY14, FY14, FY15, and FY16. For the 2016 MIJES, this is based on when the *final* report was made.¹⁷

¹⁷ A military member who initially makes a restricted report may decide to convert the report to unrestricted. Alternatively, a military member may have their report involuntarily converted if the command or law enforcement is made aware of the incident. Therefore, *final* report indicates the type of report last made by the respondent.

Respondents who made their report before October 1, 2013 are included in *Pre-FY14*; respondents who made their report between October 1, 2013 and September 30, 2014 are included in *FY14*; respondents who made their report between October 1, 2014 and September 30, 2015 are included in *FY15*; and respondents who made their report between October 1, 2015 and March 31, 2016 are included in *FY16*.

Table 1.
Number of Respondents by Reporting Category

	Count	Percent
Total DoD	225	100%
Gender		
Men	22	10%
Women	201	89%
Service/Component		
Army	77	34%
Navy	44	20%
Marine Corps	24	11%
Air Force	68	30%
National Guard	10	4%
Age		
24 Years Old and Younger	80	36%
25-33 Years Old	107	48%
34 Years Old and Older	37	16%
Time When Report Was Made		
Pre-FY14	21	9%
FY14	87	39%
FY15	99	44%
FY16	16	7%

Note. Some reporting category percentages may not add up to 100% due to item nonresponse and/or rounding. Respondents who were not currently uniformed military members, whose report did not result in a criminal investigation by an MCIO, whose alleged perpetrator was not a military member, and who chose not to participate in the investigation or military justice process were ineligible (2016 Q1, Q10, Q11, Q16 *MIJES*).

Results from this survey represent the experiences of survey respondents only and cannot be generalized to the population of all military sexual assault survivors. For some categories, cell sizes were too small to report results without potentially identifying a respondent. In these cases, the cell will reflect “NR” for “Not Reportable.” Due to the anonymous nature of the survey, no administrative data was used to confirm the Service, gender, or paygrade of respondents. Therefore, data in these categories are classified according to self-reported data.

Presentation of Results

Some findings in the *2016 MIJES* are presented in graphical form. Elongated bar charts in this report may not extend to the 100% end of the scale due to rounding. As seen in Figure 2, if this occurs, there is a small space between the bar chart and the end of the chart for results.

Figure 2.
Example Figure

As the data from the *2016 MIJES* are unweighted, results may reflect a “true” 0% (i.e., no respondents endorsed the option). This will be reflected in text and chart form as “0.”

Comparative Analysis

All military members who brought forward a report of sexual assault who met the eligibility criteria during the targeted time frame, and were current military members as of May 2016 were invited to participate in the *2016 MIJES*; however, because the *2016 MIJES* is an anonymous survey, no scientific sampling/weighting was performed, and therefore no margins of error were calculated. Therefore, caution should be taken when interpreting results based on small numbers.

Comparative analyses will be reported in Chapter 6. Estimates reported in this chapter will reflect a “merged” dataset combining parallel data from the *2016 MIJES* and *2015 MIJES* administrations. Caution should be taken when interpreting results based on these analyses as they reflect the responses of those who chose to take the survey and do not represent all members who made a report of sexual assault.

Qualitative Analyses

Within *2016 MIJES*, ten open-ended questions asked respondents to provide additional details or to make suggestions for improvement. For example, Question 97 asked all respondents to specify which services received during the military justice process were the most useful to them. Other questions asked for suggestions for improvements. For example, Question 102 asked all respondents to specify what the DoD could do to help future survivors of sexual assault through the military justice process.

Each open-ended question was content coded by two reviewers to identify the major themes or concerns expressed. Because not every respondent left comments, no attempt was made to quantify comments or make general assertions about the population of respondents based on the comments. However, the summaries of these comments provide insights for consideration by the Department.

Summary

The following chapters provide results from the *2016 MIJES*. As mentioned, findings from this survey only reflect data from the sample members who responded to the survey and cannot be generalized to all military members who made a report of sexual assault. Overall, from August 29 to December 6, 2016, the *2016 MIJES* had 225 completed surveys (188 completed web surveys and 37 completed paper surveys). This is the second administration of the *MIJES*; survey results will continue to be reported out each year.

Chapter 2: Reporting Sexual Assault

This chapter provides information on the method used by the respondent to report the sexual assault. The Department offers military members who experienced a sexual assault two options for formal reporting: *restricted* and *unrestricted* reporting. *Restricted* reporting allows military members to access medical care, mental health care, and advocacy services, without initiating a criminal investigation or notifying their command. An *unrestricted* report allows military members to access the same care as those who file a restricted report, but the report is also referred for investigation to a Military Criminal Investigative Organization (MCIO) and the military member's command is notified of the incident. Military members may also initially make a restricted report, but may later choose to convert this report to an unrestricted report in order to initiate an investigation. Conversely, once a military member makes an unrestricted report, he/she cannot convert this to a restricted report. Respondents who were not currently uniformed military members, whose report did not result in a criminal investigation by an MCIO, whose alleged perpetrator was not a military member, and who chose not to participate in the investigation or military justice process were ineligible.¹⁸

This section includes data on the type of initial report respondents made; for respondents who made a restricted report, whether their report was converted to an unrestricted report, and the time frame in which it was converted; whether the report resulted in a criminal investigation by an MCIO; indication that at least one alleged perpetrator of the reported sexual assault was a military member; time frame for when the report was made in relation to the sexual assault; whether respondents were made aware of their legal rights and who to contact to help them assert their rights; whether respondents participated in any part of the investigation or military justice process for their sexual assault case; and when the sexual assault investigation was closed. Results are presented for survey respondents at the Total DoD level.

Type of Initial Report

As seen in Figure 3, 57% of respondents indicated they initially made an *unrestricted report*, whereas 23% indicated they initially made a *restricted report* and 18% indicated that *command or law enforcement was notified before they could make a reporting option choice*. Only 1% of respondents were *unable to recall* what type of initial report they made. The eligible number of respondents who answered the question is 224.

¹⁸ 2016 MIJES Q1, Q10, Q11, and Q16.

Figure 3.
Type of Initial Report Made

Restricted Report Converted to Unrestricted Report

As mentioned, a military member who initially makes a restricted report may decide to convert the report to unrestricted in order to initiate an investigation by an MCIO. Alternatively, if command or law enforcement is made aware of the incident, an investigation may proceed without the military member's participation.

The survey asked respondents to indicate whether their restricted report was converted to an unrestricted report for any reason. As seen in Figure 4, of the 23% of respondents who initially made a restricted report, 69% indicated *they chose to convert it to unrestricted* and 31% indicated *they did not choose to convert their report, but an independent investigation occurred anyway (for example, someone they talked to about it notified their chain of command and they initiated an investigation)*. The eligible number of respondents who answered the question is 52.

Figure 4.
Restricted Report Converted to Unrestricted Report

Final Report Type

As seen in Figure 5, 73% of respondents indicated their final report, including those restricted reports that were converted to unrestricted, was an *unrestricted report*, 25% indicated *command or law enforcement was notified*, and 1% indicated they were *unable to recall*. The eligible number of respondents who answered the question is 225.

Figure 5.
Final Report Type

Time to Convert Restricted Report to Unrestricted Report

There are several factors that may impact a military member's decision to convert a restricted report to an unrestricted report. Therefore, military members might take their time in deciding whether or not to make this decision. As seen in Figure 6, for respondents who converted their restricted report to an unrestricted report, 31% indicated that they converted their report *within 2 months to less than 1 year* after the sexual assault occurred, 28% indicated *within 2-3 days*, 14% indicated *within 4-14 days*, 8% indicated *within 24 hours*, 8% indicated *within 15-30 days*, 6% indicated *within 1 to 3 years of the initial restricted report*, 3% indicated *over 3 years after the initial restricted report* and 3% indicated that they *prefer not to answer*. The eligible number of respondents is 36.

Figure 6.
Time to Convert Restricted Report to Unrestricted Report

Q9

Percent of eligible respondents who took the survey and converted their restricted report to an unrestricted report.

Details of Reporting

Respondents were asked to specify certain details about the report they made. Specifically, they were asked whether their report resulted in a criminal investigation by an MCIO,¹⁹ if at least one alleged perpetrator was a military member, the time frame for when they made their report, and how soon after the sexual assault occurred they chose to make their report.

Report Resulted in a Military Criminal Investigation

Per eligibility requirements, all respondents to the 2016 MIJES must have participated in a criminal investigation. Each Service has its own MCIO to conduct these investigations. To

¹⁹ The MCIOs for the Services are as follows: Criminal Investigation Command (CID) [Army], Naval Criminal Investigative Service (NCIS) [Navy/Marine Corps], and Office of Special Investigations (OSI) [Air Force].

ensure eligibility, respondents were asked on the 2016 MIJES whether they made a formal report. Of respondents who made a formal report, 100% indicated that their report of sexual assault resulted in a criminal investigation by an MCIO.

Alleged Perpetrator Was a Military Member

An MCIO investigation is often dependent on whether the alleged perpetrator of the crime is a military member. Per eligibility requirements, all respondents to the 2016 MIJES must have indicated that at least one alleged perpetrator(s) was a military member. As seen in Figure 7, 91% of respondents indicated that *yes, an active duty member* was the alleged perpetrator of the sexual assault and 9% indicated that *yes, a National Guard or Reserve member* was the alleged perpetrator. The eligible number of respondents who answered the question is 224.

Figure 7.
Alleged Perpetrator Was a Military Member

Time Frame for When Report Was Made

There have been many improvements and implementation of additional supports for military members in Sexual Assault and Prevention Response (SAPR) resources and programs over the last few years. In order for the Department to know which services were available to the military member immediately after their report of sexual assault, respondents were asked to indicate the time frame that most accurately represents when they reported their sexual assault.²⁰ As seen in Figure 8, 7% of respondents indicated that their report was made *between 1 October 2015–30 September 2016* (FY16), 44% indicated their report was made *between 1 October 2014–30*

²⁰ Respondents who made an *unrestricted report*, were asked to provide information on that report. Those whose restricted report was *converted to an unrestricted report* were asked to provide information on the unrestricted report. Those whose report was *investigated before they could make a reporting option choice* were asked to provide information for when the command was notified.

September 2015 (FY15), 39% indicated their report was made *between 1 October 2013–30 September 2014* (FY14), and 9% indicate their report was made *before 1 October 2013* (pre-FY14). The eligible number of respondents who answered the question is 223.

Figure 8.
Time Frame for When Report Was Made

Time Frame for How Soon the Report Was Made After the Sexual Assault Occurred

The length of time between when an assault occurs and when a report is made can often impact the outcome of an investigation. Therefore it is of interest to the Department to know how long after the assault most military members report. As seen in Figure 9, of respondents who reported a sexual assault, 27% indicated their report was made *within 24 hours* of the sexual assault, 21% indicated that they made their report *within 2 months to less than 1 year* of the sexual assault occurring, 20% indicated that they made their report *within 2-3 days*, 14% indicated *within 4-14 days*, 9% indicated *within 15-30 days*, 4% indicated *within 1 to 3 years of the sexual assault*, 4% indicated that they chose to report *over 3 years after the sexual assault*, and 2% indicated that they *preferred not to answer*. The eligible number of respondents who answered the question is 225.

Figure 9.
Time Frame for How Soon the Report Was Made After the Sexual Assault Occurred

Q13

Percent of eligible respondents who took the survey.

Military Justice Process Details

Throughout the remainder of the survey, respondents were asked about their experience with the “military justice process.” While agencies often work together when handling sexual assault cases, for the purposes of this survey, OPA uses the term “military justice process” to refer only to the military justice legal proceedings associated with the report of sexual assault, separate from the investigation. It is up to military members to decide whether or not they want to participate in the military justice process, though participation often assists the investigation and legal proceedings. Respondents were asked about their awareness of their legal rights, whether they decided to participate in any part of the investigation or military justice process for their sexual assault case, and how long ago their sexual assault investigation was closed.

Made Aware of Legal Rights Throughout the Military Justice Process

Military members who report a sexual assault are to be made aware of their legal rights including their right to be heard, right to confer with an attorney, and right to proceedings without unreasonable delay. Respondents were asked whether they had been made aware of their legal rights throughout the military justice process. As seen in Figure 10, 74% indicated *yes*, they were made aware, 14% indicate *no*, and 12% indicated they were *not sure*. The eligible number of respondents who answered the question is 225.

Figure 10.***Made Aware of Legal Rights Throughout the Military Justice Process******Knew Who to Contact to Help Assert Rights***

As indicated above, military members who report a sexual assault have legal rights throughout the military justice process. Members who choose to report a sexual assault should be provided information regarding who they can contact to help them assert these legal rights. As seen in Figure 11, of respondents who indicated they had been made aware of their legal rights throughout the military justice process, 78% indicated *yes*, they knew who to contact to help assert their rights, 15% indicated *no*, and 7% indicated they were *not sure*. The eligible number of respondents who answered the question is 166.

Figure 11.
Knew Who to Contact to Help Assert Rights

Participation in any Part of the Investigation or Military Justice Process

Per eligibility requirements, all respondents to the 2016 MIJES must have indicated that they participated in some part of the investigation and/or military justice processes for their sexual assault case. Of respondents who reported a sexual assault, 100% indicated that *yes, they participated in all or some of the investigation and/or military justice process.*

Time Frame for When Sexual Assault Investigation Closed²¹

Criteria for eligibility to take the 2016 MIJES includes SAPR personnel indicating that the military member's case had been closed in Defense Sexual Assault Incident Database (DSAID). However, often there is a delay in entering this information into DSAID, and OPA cannot assure information is entered immediately after the case is closed. Therefore, the Department asked MIJES respondents when they believed the investigation closed.

As seen in Figure 12, of respondents who made a report of sexual assault, 38% indicated that the investigation closed *more than a year ago*, 30% indicated the investigation closed *7-12 months ago*, 15% indicated they were *unable to recall* when their investigation closed, 12% indicated *4-6 months ago*, 3% indicated *1-3 months ago*, and 3% indicated that their sexual assault investigation was closed *within the last 30 days* before taking the survey. The eligible number of respondents who answered the question is 223.

²¹ If a respondent did not participate in the investigation, they are unable to gauge their satisfaction with resources and were, therefore, not included as an eligible respondent. Thus, questions 17 ("Were you assigned a Special Victims' Counsel (SVC) or Victims' Legal Counsel (VLC)") and 18 ("Why did you choose not to participate in the investigation or military justice process?") in the 2016 MIJES were not included in this report because they were designed to capture information on respondents who were ineligible for the survey. Similar questions were asked of eligible respondents.

Figure 12.
Time Frame for When Sexual Assault Investigation Closed

Q19

Percent of eligible respondents who took the survey.

The following chapter reflects respondents' opinions about the SAPR resources and programs available to them during the military justice process.

Chapter 3:

Experiences With Sexual Assault Prevention and Response (SAPR) Resources and Command

Military members who make an unrestricted report of sexual assault have a variety of resources available to them throughout the military justice process. This chapter provides information about the experiences and assessments of resources that respondents elected to use and interact with during the military justice process as well as experiences with command. Resources include the Sexual Assault Response Coordinator (SARC), the Uniformed Victim Advocate (UVA)/Victim Advocate (VA), military criminal investigators, military trial counsel, Special Victims' Counsel (SVC) or Victims' Legal Counsel (VLC), and Victim Witness Assistance Provider (VWAP). Command includes the respondent's unit commander and their immediate supervisor and/or senior enlisted advisor. Results are presented for respondents at the Total DoD level.

Interaction With SAPR Resources and Command

As seen in Figure 13, 96% of respondents indicated interacting with *a military criminal investigator after their report of sexual assault*, 84% indicated interacting with *a SARC* and 74% indicated interacting with *a UVA or a VA*. Sixty-nine percent indicated interacting with *a SVC or VLC*, 65% indicated interacting with *their unit commander*, 61% indicated interacting with *military trial counsel*, 58% indicated interacting with their *immediate supervisor*, and 58% indicated interacting with their *senior enlisted advisor* during the military justice process. Nine percent indicated they interacted with a *VWAP* during the military justice process. These percentages are of the total population of respondents. All information about resources used or available and levels of command highlighted in the rest of the chapter are based only on those respondents indicating that they interacted with the specific resource. These percentages are out of the total population of eligible respondents.

Figure 13.
Interaction With SAPR Resources and Command

Q20, Q23, Q30, Q33, Q37, Q48, Q52, Q55, Q58

Experiences With Sexual Assault Response Coordinator (SARC)

The position of the SARC was established to coordinate sexual assault victim care. Upon receipt of a report of sexual assault, the SARC assigns a VA to help military members obtain necessary services and provides crisis intervention, referrals, and ongoing nonclinical support. This support includes providing information on available options and resources so the military member can make informed decisions about the case.

The SARC serves as the single point of contact to coordinate sexual assault victim care. The term “Sexual Assault Response Coordinator” is a term utilized throughout DoD and the Services to facilitate communication and transparency regarding sexual assault response capability. The SARC is responsible for providing a variety of resources to military members who bring forward a report of sexual assault, including ensuring there is 24/7 response capability, ensuring appropriate care is coordinated and provided to military members, and tracking the services provided from initial report through final disposition.

Interaction With a SARC During the Military Justice Process

84% of respondents indicated interacting with a SARC during the military justice process.

The eligible number of respondents who answered the question is 223. The remaining items in this section are of this 84%.

Assessment of Experiences With SARC

As seen in Figure 14, respondents who interacted with a SARC during the military justice process were asked whether they **agreed** with statements pertaining to their experience with the

SARC. Overall, 79% indicated the SARC *supported them throughout the military justice process*; 69% indicated the SARC *helped them work with military criminal investigators, attorneys, and commanders*; and 67% indicated the SARC *contacted them on a regular basis regarding their well-being while their case was open*. Of respondents who interacted with a SARC during the military justice process, respondents indicated they **disagreed** that the SARC *contacted them on a regular basis regarding their well-being while their case was open* (22%); *helped them work with military criminal investigators, attorneys, and commanders* (17%); and *supported them throughout the military justice process* (13%). The eligible number of respondents who answered the question ranges from 183-186. Results exclude those who indicated “Not applicable.”

Figure 14.
Assessment of Experiences With SARC

Q21

Percent of eligible respondents who took the survey and interacted with a SARC during the military justice process.

Satisfaction With SARC During the Military Justice Process

As seen in Figure 15, of respondents who interacted with a SARC during the military justice process, 73% indicated that they were *satisfied* with the services of their SARC during the military justice process; 16% were *dissatisfied*. The eligible number of respondents who answered the question is 186.

Figure 15.
Satisfaction With SARC During the Military Justice Process

Experiences With Uniformed Victim Advocate (UVA)/Victim Advocate (VA)

The Department offers survivors of sexual assault assistance and services from SARCs and UVAs/VAs. A UVA is a Uniformed Victims' Advocate (typically a military member) and a VA is an installation-level Victims' Advocate (typically a DoD civilian). A military member who makes a report of sexual assault may interact with a UVA, a VA, or potentially both.²² As Services and components have different names for these providers, for the paper mode of the survey, a glossary was provided, and for the web version of the survey, dynamic text was used.²³ For the purposes of this report, these resources, when combined, will be referred to as UVA/VA.

UVAs/VAs are professionals trained to support victims of crime. UVAs/VAs offer information, emotional support, and help finding resources and filling out paperwork to military members who bring forward a report of sexual assault. A UVA/VA will accompany these military members to interviews and appointments and may continue to assist them until they no longer feel a need for support. UVAs/VAs also provide direct assistance to military members who bring forward a report of sexual assault, listen to their needs, and then connect them with appropriate resources, including medical care, mental health care, legal advice, and spiritual support. UVAs/VAs work with military members to help them make informed choices and then support them each step of the process. UVAs/VAs report directly to the SARC for Victim Advocate duties, specifically that they are available to respond 24 hours a day, 7 days a week, provide ongoing nonclinical support, facilitate care for the military member, provide information on options and resources, assist the military member with accessing resources, accompany the

²² A military member may interact with both a UVA and a VA in certain circumstances, including if the military member makes an initial report to the UVA and the UVA refers him/her to the installation VA.

²³ Dynamic text used for the web version of the survey is provided in Appendix B. Glossary presented for paper mode is provided in the 2016 Military Investigation and Justice Experience Survey: Tabulations of Responses: August 29–December 6, 2016 (OPA, 2016).

military member to appointments, if desired, and provide monthly case status updates to the military member.

Interaction With a UVA/VA During the Military Justice Process

74% of respondents indicated interacting with a UVA and/or a VA during the military justice process.

The eligible number of respondents who answered the question is 224. The remaining items in this section are of this 74%.

Type of UVA/VA the Respondent Interacted With

As seen in Figure 16, of respondents who interacted with a UVA or VA during the military justice process, 32% indicated they interacted with an *UVA*, 33% indicated they interacted with a *VA*, 20% indicated interacting with *both a UVA and VA*, whereas 15% were *unable to recall* with which type of advocate they interacted. Therefore, of those who indicated interacting with a UVA and/or a VA, 52% indicated using a UVA and 53% used with a VA. The eligible number of respondents who answered the question is 165.

Figure 16.

Type of UVA/VA the Respondent Interacted With

Worked With Same UVA/VA Throughout the Military Justice Process

As seen in Figure 17, of respondents who interacted with a UVA or VA during the military justice process, 60% indicated *yes*, they worked with the same UVA/VA during the military justice process. 22% of respondents indicated *no, they worked with two UVAs and/or VAs*, 12% indicated *no, they worked with more than two UVAs and/or VAs*, and 5% indicated they were *not sure* if they worked with the same UVA/VA throughout the military justice process.

Figure 17.
Worked With Same UVA/VA Throughout the Military Justice Process

Assessment of Experiences With UVA

As seen in Figure 18, respondents who interacted with a UVA during the military justice process were asked whether they **agreed** with statements pertaining to their experience with the UVA. Overall, 85% indicated the UVA *supported them throughout the military justice process*; 80% indicated the UVA *helped them work with military criminal investigators, attorneys, and commanders*; and 80% indicated the UVA *contacted them on a regular basis regarding their well-being while their case was open*. Of respondents who interacted with the UVA during the military justice process, respondents indicated they **disagreed** that the UVA *contacted them on a regular basis regarding their well-being while their case was open* (14%); *helped them work with military criminal investigators, attorneys, and commanders* (12%); and *supported them throughout the military justice process* (11%). The eligible number of respondents ranges from 84-85. Results exclude those who indicated “Not applicable.”

Figure 18.
Assessment of Experiences With UVA

Q26

Percent of eligible respondents who took the survey and interacted with a UVA during the military justice process.

Satisfaction With UVA During the Military Justice Process

As seen in Figure 19, of respondents who interacted with a UVA during the military justice process, 79% indicated that they were *satisfied* with the services of their UVA during the military justice process, whereas 10% were *dissatisfied*. The eligible number of respondents who answered the question is 84.

Figure 19.
Satisfaction With UVA During the Military Justice Process

Q27

Percent of eligible respondents who interacted with a UVA during the military justice process

Assessment of Experiences With VA

As seen in Figure 20, respondents who interacted with a VA during the military justice process were asked whether they **agreed** with statements pertaining to their experience with the VA. Overall, 80% indicated the VA *supported them throughout the military justice process*; 69% indicated the VA *helped them work with military criminal investigators, attorneys, and commanders*; and 71% indicated the VA *contacted them on a regular basis regarding their well-being while their case was open*. Of respondents who interacted with the VA during the military justice process, respondents indicated they **disagreed** that the VA *helped them work with military criminal investigators, attorneys, and commanders* (19%); *contacted them on a regular basis regarding their well-being while their case was open* (18%); and *supported them throughout the military justice process* (14%). The eligible number of respondents ranges from 84-88. Results exclude those who indicated “Not applicable.”

Figure 20.
Assessment of Experiences With VA

Q28

Percent of eligible respondents who took the survey and interacted with a VA during the military justice process.

Satisfaction With VA During the Military Justice Process

As seen in Figure 21, of respondents who interacted with a VA during the military justice process, 75% indicated that they were *satisfied* with the services of their VA during the military justice process, whereas 15% were *dissatisfied*. The eligible number of respondents who answered the question is 88.

Figure 21.
Satisfaction With VA During the Military Justice Process

Experiences With Military Criminal Investigative Organizations (MCIO)

The DoD Inspector General (IG) has statutory authority in accordance with the Inspector General Act of 1978, as amended, for policy, oversight, and performance evaluation with respect to “all DoD activities relating to criminal investigation programs.” This guidance directs the DoD IG to develop policy and to oversee the Department’s criminal investigative organizations’ investigations of sexual assaults. Within the Department, the Military Criminal Investigative Organizations (MCIOs) are responsible for investigating all adult sexual assaults.²⁴ The MCIOs are also responsible for the development of specific investigative policies and requirements to govern the investigation of adult sexual assault, as well as training assigned special agents in accordance with the Services’ training standards.

DoDD 6495.01 requires:

“[A]n immediate, trained sexual assault response capability shall be available for each report of sexual assault in all locations, including in deployed locations. The response time may be affected by operational necessities, but will reflect that sexual assault victims shall be treated as emergency cases.”

Within the Department, MCIOs provide a trained response capability to investigate reports of sexual assaults in all locations. DoDI 6495.02 establishes requirements and responsibilities for DoD Components, including SAPRO, the DoD IG, and the Secretaries of the Military Departments, relating to DoD’s response to sexual assault incidents. The Instruction designates the MCIO criminal investigators as DoD sexual assault first responders. DoDI 5505.18

²⁴ The MCIOs include the U.S. Army Criminal Investigation Command (CID), Naval Criminal Investigative Service (NCIS), and Air Force Office of Special Investigations (OSI).

establishes policy, assigns responsibilities, and provides procedures for the investigation of sexual assault with adult victims within the DoD. It is DoD policy that MCIOs will initiate investigations of all offenses of adult sexual assault of which they become aware.²⁵

Military members who brought forward a report of sexual assault may interact with several military criminal investigators throughout the investigation process. Therefore respondents were asked to think about their overall experience working with military criminal investigator(s).

Interaction With a Military Criminal Investigator

96% of respondents indicated interacting with a military criminal investigator after their report of sexual assault.

The eligible number of respondents who answered the question is 224. The remaining items in this section are of this 96%.

Assessment of Experiences With Military Criminal Investigator

As seen in Figure 22, respondents who interacted with a military criminal investigator (MCI) after their report of sexual assault were asked whether they **agreed** with statements pertaining to their experience with the MCI. Overall, 82% indicated the MCI *was professional in interactions with them*, 77% indicated the MCI *took their report seriously*, 77% indicated the MCI *gave them sufficient time and professional consideration in hearing their complaint*, 77% indicated the MCI *treated them with dignity and respect*, 75% indicated the MCI *answered their questions about the investigative process*, 70% indicated the MCI *provided initial information for victims (DD2701) and explained their legal rights*, 68% indicated the MCI *informed them of the availability of Special Victims' Counsel (SVC) or Victims' Legal Counsel (VLC) assistance*, 68% indicated the MCI *allowed them provide information at their own pace*, 67% indicated the MCI *listened to them without judgment*, 64% indicated the MCI *took steps to address their safety*, and 55% indicated the MCI *provided information about the progress of their investigation*.

Of respondents who interacted with a MCI after their report of sexual assault, respondents indicated they **disagreed** that the MCI *provided information about the progress of their investigation* (31%), *allowed them provide information at their own pace* (23%), *took steps to address their safety* (20%), *listened to them without judgment* (20%), *informed them of the availability of Special Victims' Counsel (SVC) or Victims' Legal Counsel (VLC) assistance* (17%), *provided initial information for victims (DD2701) and explained their legal rights* (14%), *treated them with dignity and respect* (14%), *gave them sufficient time and professional consideration in hearing their complaint* (13%), *took their report seriously* (12%), *answered their questions about the investigative process* (11%), and *was professional in interactions with them* (10%). The eligible number of respondents who answered the question ranges from 204-214. Results exclude those who indicated "Not applicable."

Figure 22.
Assessment of Experiences With Military Criminal Investigator

Q31

Percent of eligible respondents who took the survey and interacted with a military criminal investigator after their report of sexual assault.

Satisfaction With Military Criminal Investigators During the Criminal Investigation Process

As seen in Figure 23, of respondents who interacted with a military criminal investigator after their report of sexual assault, 53% indicated that they were *satisfied* with the military criminal investigator(s) during the criminal investigation process, whereas 28% were *dissatisfied*. The eligible number of respondents who answered the question is 214.

Figure 23.***Satisfaction With Military Criminal Investigators During the Criminal Investigation Process*****Experiences With Military Trial Counsel**

Respondents were asked about their experiences with military trial counsel (i.e., the military attorney who prosecuted their case). Military members who brought forward a report of sexual assault may interact with more than one military trial counsel throughout the military justice process, and therefore respondents were asked to think about their overall experience working with one or more attorneys from the military trial counsel office.

Interaction With a Military Trial Counsel

61% of respondents indicated interacting with military trial counsel during the military justice process.

The eligible number of respondents who answered the question is 225. The remaining items in this section are of this 61%.

Overall Information Provided by the Military Trial Counsel

As seen in Figure 24, respondents who interacted with a military trial counsel during the military justice process were asked whether they discussed specific topics with the military trial counsel. Overall, 89% indicated the military trial counsel discussed *the actions that could be brought against the perpetrator*, 84% indicated the military trial counsel discussed *the status of trial proceedings against the perpetrator*, 83% indicated the military trial discussed *their rights as a crime victim*, and 77% indicated the military trial counsel discussed *the availability of a Military Protective Order and how to obtain a Civilian Protective Order*. The eligible number of

respondents who answered the question ranges from 124-136. Results exclude those who indicated “Not applicable.”

Figure 24.

Overall Information Provided by the Military Trial Counsel

Q34

Percent of eligible respondents who took the survey and interacted with military trial counsel during the military justice process.

Assessment of Experiences With Military Trial Counsel

As seen in Figure 25, respondents who interacted with military trial counsel during the military justice process were asked whether they **agreed** with statements pertaining to their experience with the military trial counsel. Overall, 88% indicated the military trial counsel *was professional in interaction with them*, 84% indicated the military trial counsel *took their report seriously*, 82% indicated the military trial counsel *answered their questions*, 82% indicated the military trial counsel *treated them with dignity and respect*, 82% indicated the military trial counsel *communicated with their Special Victims' Counsel (SVC)/Victims' Legal Counsel (VLC) with their consent*, 79% indicated the military trial counsel *listened to them without judgement*, 77% indicated the military trial counsel *took steps to protect their safety*, and 74% indicated the military trial counsel *informed them about the progress of their case*.

Of respondents who interacted with military trial counsel during the military justice process, respondents indicated they **disagreed** that military trial counsel *informed them about the progress of their case* (17%), *counsel took steps to protect their safety* (14%), *listened to them without judgement* (13%), *took their report seriously* (12%), *communicated with their Special Victims' Counsel (SVC)/Victims' Legal Counsel (VLC) with their consent* (10%), *answered their questions* (9%), *treated them with dignity and respect* (8%), and *was professional in interaction with them* (6%). The eligible number of respondents who answered the question ranges from 134-138. Results exclude those who indicated “Not applicable.”

Figure 25.
Assessment of Experiences With Military Trial Counsel

Q35

Percent of eligible respondents who took the survey and interacted with military trial counsel during the military justice process.

Satisfaction With Military Trial Counsel During the Military Justice Process

As seen in Figure 26, of respondents who interacted with military trial counsel during the military justice process, 64% indicated that they were *satisfied* with the military trial counsel during the military justice process, whereas 23% were *dissatisfied*. The eligible number of respondents who answered the question is 138.

Figure 26.***Satisfaction With Military Trial Counsel During the Military Justice Process*****Experiences With Special Victims' Counsel (SVC) or Victims' Legal Counsel (VLC)**

The legal process for prosecuting sexual assault cases can often be daunting and confusing for military members who report a sexual assault. The Department, working with the Services, has established policy to provide legal advice and representation for members, while maintaining the member's confidentiality. Military members can access this support regardless of filing a restricted or unrestricted report of sexual assault.

The Army, Air Force, and National Guard refer to these professionals as SVC, while the Navy and Marine Corps have labeled them VLC. Whether an SVC or VLC, these lawyers have experience trying cases in military courts and often in civilian courts as well. They understand the legal process and are able to guide military members through the military justice process and act as the member's legal advocate.

Interaction With SVC/VLC

69% of respondents indicated interacting with a SVC or VLC during the military justice process.

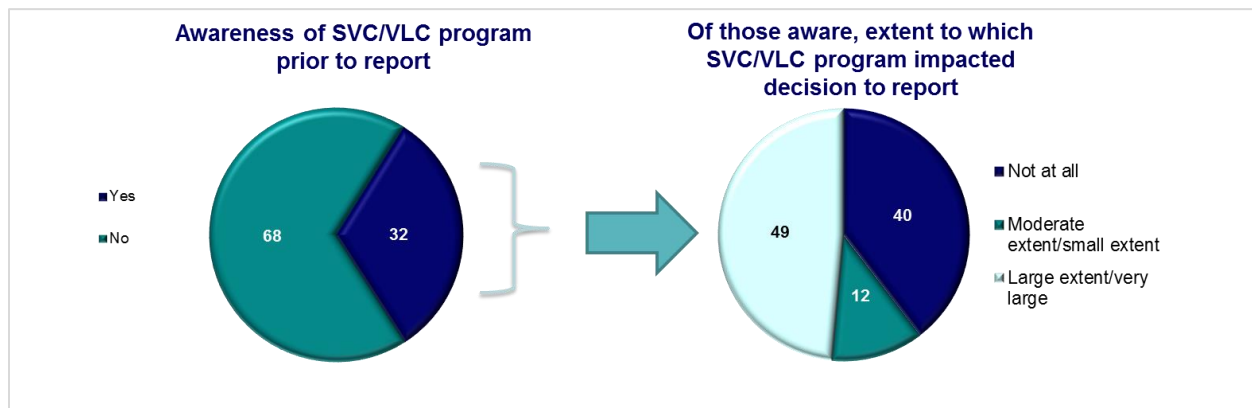

The eligible number of respondents who answered the question is 223. The remaining items in this section are of this 69%.

Awareness of SVC/VLC Prior to Report

Of respondents who interacted with a SVC/VLC during the military justice process, 32% indicated that *yes*, prior to their report, they were aware that SVCs/VLCs were available as a resource. Figure 27 highlights the impact that knowledge about the SVC/VLC program had for

respondents who interacted with the resource. Of the 32% of respondents who interacted with a SVC/VLC and who were aware of the SVC/VLC program prior to their report, 49% indicated that their awareness of the program impacted their decision to report to a *large extent/very large extent* and 12% indicated it impacted their decision to a *moderate extent/small extent*, whereas 40% indicated their awareness of the services did *not at all* influence their decision to report. The eligible number of respondents who answered the question ranges from 49-152. Results exclude those who indicated “Not applicable.”

Figure 27.
Awareness and Influence of SVC/VLC Prior to Report

Q38, Q39

Percent of eligible respondents who took the survey and interacted with a SVC/VLC during the military justice process.

Assignment of SVC/VLC

Of respondents who interacted with a SVC/VLC during the military justice process, **95%** indicated that they were assigned a SVC/VLC. The eligible number of respondents who answered the question is 153.

Supported by More Than One SVC/VLC Throughout the Military Justice Process

Analysis of the 2015 MIJES revealed that respondents potentially interacted with more than one SVC/VLC during the military justice process which impacted how often those personnel were available. Therefore the 2016 MIJES included questions pertaining to the number of SVCs/VLCs with which respondents interacted. Of respondents who interacted with a SVC/VLC during the military justice process, **32%** indicated that they were supported by more than one SVC/VLC during the military justice process. The eligible number of respondents who answered the question is 151.

Number of SVCs or VLCs That Supported the Respondent Throughout the Military Justice Process

As seen in Figure 28, of those respondents who indicated they were supported by multiple SVCs/VLCs, 71% indicated they were supported by 2 SVCs/VLCs, 27% indicated they were

supported by 3-4 SVCs/VLCs, and 2% indicated they were supported by *5 or more* SVCs/VLCs during the military justice process. The eligible number of respondents who answered the question is 49.

Figure 28.

Number of SVCs or VLCs That Supported the Respondent Throughout the Military Justice Process

Impact of Changing SVC or VLC on Assistance Received

As seen in Figure 29, of those respondents who indicated they were supported by multiple SVCs/VLCs, 53% indicated *no*, changing SVCs/VLCs did not impact the assistance they received, whereas 29% indicated changing SVCs/VLCs *improved the assistance they received*, and 18% indicated the change *negatively impacted the assistance they received*. The eligible number of respondents who answered the question is 49.

Figure 29.
Impact of Changing SVC or VLC on Assistance Received

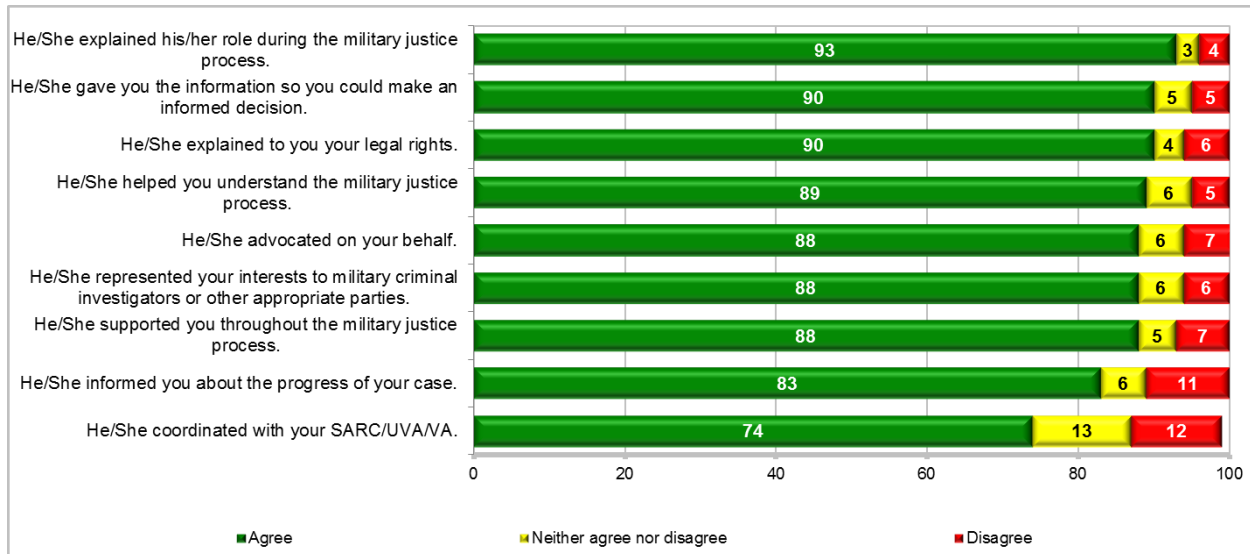

Assessment of Experiences With SVC/VLC

As seen in Figure 30, respondents who interacted with SVCs/VLCs during the military justice process were asked whether they **agreed** with statements pertaining to their experience with the SVCs/VLCs. Overall, 93% indicated the SVCs/VLCs *explained his/her role during the military justice process*, 90% indicated the SVCs/VLCs *gave them the information so that they could make an informed decision*; 90% indicated the SVC/VLC *explained to them their legal rights*; 89% indicated the SVCs/VLCs *helped them understand the military justice process*; 88% indicated the SVC/VLC *advocated on their behalf*; 88% indicated the SVC/VLC *represented their interests to military criminal investigators, military justice officials, or other appropriate parties*; 88% indicated the SVCs/VLCs *supported them throughout the military justice process*; 83% indicated the SVC/VLC *informed them about the progress of their case*; and 74% indicated *the SVC/VLC coordinated with their SARC/UVA/VA*.

Of respondents who interacted with SVCs/VLCs during the military justice process, respondents indicated they **disagreed** that the SVCs/VLCs *coordinated with their SARC/UVA/VA* (12%); *informed them about the progress of their case* (11%); *supported them throughout the military justice process* (7%); *advocated on their behalf* (7%); *represented their interests to military criminal investigators, military justice officials, or other appropriate parties* (6%); *explained to them their legal rights* (6%); *helped them understand the military justice process* (5%); *gave them the information so that they could make an informed decision* (5%); and *explained his/her role during the military justice process* (4%). The eligible number of respondents who answered the question ranges from 141-152. Results exclude those who indicated “Not applicable.”

Figure 30.
Assessment of Experiences With SVC/VLC

Q44

Percent of eligible respondents who took the survey and interacted with a SVC/VLC during the military justice process.

SVC/VLC Availability

Of respondents who interacted with a SVC/VLC during the military justice process, 98% indicated the SVC/VLC was available when they needed them. As seen in Figure 31, 57% indicated the SVC/VLC was *always available*, 31% indicated the SVC/VLC was *usually available*, 10% indicated the SVC/VLC was *sometimes available*, whereas only 2% indicated the SVC/VLC was *never available*. The eligible number of respondents who answered the question is 153.

Figure 31.
SVC/VLC Availability

Overall Role of SVC/VLC

As seen in Figure 32, of respondents who interacted with a SVC/VLC during the military justice process, 84% indicated the SVC/VLC *attended other meetings involving trial counsel and/or defense attorneys*, 77% indicated the SVC/VLC *attended other meetings involving military criminal investigators*, 77% indicated the SVC/VLC *attended the court-martial*, 74% indicated the SVC/VLC *assisted them with any legal matters outside the military criminal investigation*, and 73% indicated the SVC/VLC *attended the Article 32 preliminary hearing*. The eligible number of respondents who answered the question ranges from 98-128. Results exclude those who indicated “Not applicable.”

Figure 32.
Overall Role of SVC/VLC

Q46

Satisfaction With SVC/VLC

As seen in Figure 33, of respondents who interacted with a SVC/VLC during the military justice process, overall, 78% indicated that they were *satisfied* with the SVC or VLC during the military justice process, whereas 9% were *dissatisfied*. The eligible number of respondents who answered the question is 153.

Figure 33.
Satisfaction With SVC/VLC

Experiences With Victim Witness Assistance Provider (VWAP)

Once an MCIO investigation is initiated, a VWAP is available to support military members who brought forward a report of sexual assault. A VWAP (for example, Victim Witness Coordinator/Victim Witness Liaison) may provide support to military members by assisting them in understanding their federally mandated rights as well as with navigating the military justice process. VWAPs may also provide information on services and resources, and interact with military trial counsel and commanders. They also help ensure that the military member's situation is respected, that military members have a voice in the process, and that military members are kept informed of the status of the investigation and prosecution throughout the military justice process.

Interaction With a VWAP

9% of respondents indicated interacting with a VWAP during the military justice process.

The eligible number of respondents who answered the question is 223. The remaining items in this section are of this 9%.

Overall Role of VWAP

As seen in Figure 34, of respondents who interacted with a VWAP during the military justice process, respondents indicated the VWAP **discussed** the availability of a *Military Protective Order and how to obtain a Civilian Protective Order (also sometimes called a Restraining Order [67%])*, *other safety or protection options beyond a protective order and pre-trial restraint (63%)*, *the actions that could be brought against the perpetrator (for example, court-martial charges, non-judicial punishment, administrative discharge [63%])*, *the status of trial*

proceedings against the perpetrator (for example, Article 32 preliminary hearing and court-martial [63%]), and pre-trial restraint options for the perpetrator that were available to the commander (for example, placing the perpetrator in jail prior to trial [47%]). The eligible number of respondents who answered the question is 19. Results exclude those who indicated “Not applicable.”

Figure 34.
Overall Role of VWAP

Q49

Percent of eligible respondents who took the survey and interacted with a VWAP during the military justice process.

Assessment of Experiences With VWAP

As seen in Figure 35, respondents who interacted with a VWAP during the military justice process were asked whether they **agreed** with statements pertaining to their experience with the VWAP. Overall, 76% indicated the VWAP was *professional in his/her interactions with them*, 76% indicated the VWAP *treated them with dignity and respect*, 71% indicated the VWAP *provided them with information on services and resources that were available to them*, 71% indicated the VWAP *answered their questions*, 71% indicated the VWAP *helped them understand the overall military justice process*, 65% indicated the VWAP *ensured they had a voice in the military justice process*, and 59% indicated the VWAP *kept them informed about the status or progress of their case*.

Of respondents who interacted with a VWAP during the military justice process, respondents indicated they **disagreed** that the VWAP *kept them informed about the status or progress of their case* (29%), *ensured they had a voice in the military justice process* (29%), *helped them understand the overall military justice process* (29%), *answered their questions* (24%), *provided them with information on services and resources that were available to them* (24%), *treated them with dignity and respect* (24%), and *was professional in his/her interactions with them* (24%).

The eligible number of respondents who answered the question is 17. Results exclude those who indicated “Not applicable.”

Figure 35.
Assessment of Experiences With VWAP

Q50

Percent of eligible respondents who took the survey and interacted with a VWAP during the military justice process.

Satisfaction With a VWAP

As seen in Figure 36, of respondents who interacted with a VWAP during the military justice process, overall, 63% indicated that they were *satisfied* with the VWAP during the military justice process, whereas 26% were *dissatisfied*. The eligible number of respondents who answered the question is 19.

Figure 36.
Satisfaction With a VWAP

Experiences With Leadership

Another area of interest to the Department is the response of the military member's chain of command, if notified of the incident. When a military member makes an unrestricted report of sexual assault, it prompts both an official investigation and notification of the military member's command. Respondents were asked about whether they interacted with their unit commander and/or other members in their chain of command (e.g., senior enlisted advisor, immediate supervisor).

Interaction With Unit Commander

65% of respondents indicated interacting with their unit commander during the military justice process.

The eligible number of respondents who answered the question is 224. The remaining items in this section are of this 65%.

Satisfaction With Unit Commander Actions During the Military Justice Process

As seen in Figure 37, of respondents who interacted with their unit commander during the military justice process, 60% indicated they were **satisfied** with how their unit commander *supported them throughout the military justice process*, and 48% were **satisfied** with how their unit commander *informed them about the progress of their case*. Overall, 38% were **dissatisfied** with how their unit commander *informed them about the progress of their case*, and 32% were **dissatisfied** with how that their unit commander *supported them throughout the military justice*

process. The eligible number of respondents who answered the question is 146. Results exclude those who indicated “Not applicable.”

Figure 37.

Satisfaction With Unit Commander Actions During the Military Justice Process

Q53

Percent of eligible respondents who took the survey and interacted with their unit commander during the military justice process.

Satisfaction With Unit Commander Response During the Military Justice Process

As seen in Figure 38, of respondents who interacted with their unit commander during the military justice process, overall, 57% indicated that they were *satisfied* with the response from their unit commander during the military justice process, whereas 34% were *dissatisfied*. The eligible number of respondents who answered the question is 146.

Figure 38.
Satisfaction With Unit Commander Response During the Military Justice Process

Interaction With Immediate Supervisor

58% of respondents indicated interacting with their immediate supervisor during the military justice process.

The eligible number of respondents who answered the question is 225. The remaining items in this section are of this 58%.

Assessment of Experiences With Immediate Supervisor

As seen in Figure 39, of respondents who interacted with their immediate supervisor during the military justice process, respondents **agreed** that their immediate supervisor *supported them throughout the military justice process* (61%), whereas 32% **disagreed**. Respondents **agreed** that their immediate supervisor *informed them about the progress of their case* (41%), whereas 46% **disagreed**.²⁶ The eligible number of respondents who answered the question ranges from 89-131. Results exclude those who indicated “Not applicable.”

²⁶ Air Force, Air Force Reserve, and Air National Guard were excluded from this question.

Figure 39.
Assessment of Experiences With Immediate Supervisor

Q56

Percent of eligible respondents who took the survey and interacted with their immediate supervisor during the military justice process.

Satisfaction With Immediate Supervisor

As seen in Figure 40, of respondents who interacted with their immediate supervisor during the military justice process, overall, 50% indicated that they were *satisfied* with the response from their immediate supervisor during the military justice process, whereas 36% were *dissatisfied*. The eligible number of respondents who answered the question is 131.

Figure 40.
Satisfaction With Immediate Supervisor

Interaction With Senior Enlisted Advisor

Senior enlisted advisors include First Sergeants or Master Sergeants and Chief Petty Officers.

58% of respondents indicated interacting with their senior enlisted advisor during the military justice process.

The eligible number of respondents who answered the question is 225. The remaining items in this section are of this 58%.

Assessment of Experiences With Senior Enlisted Advisor

As seen in Figure 41, of respondents who interacted with their senior enlisted advisor during the military justice process, respondents **agreed** that their senior enlisted advisor *supported them throughout the military justice process* (63%), whereas 28% **disagreed**. Respondents **agreed** that their senior enlisted advisor *informed them about the progress of their case* (47%), whereas 38% **disagreed**.²⁷ Eligible number of respondents who answered the question ranges from 80-131. Results exclude those who indicated “Not applicable.”

²⁷ Air Force, Air Force Reserve, and Air National Guard were excluded from this question.

Figure 41.
Assessment of Experiences With Senior Enlisted Advisor

Q59

Percent of eligible respondents who took the survey and interacted with their senior enlisted advisor during the military justice process.

Satisfaction With Senior Enlisted Advisor

As seen in Figure 42, of respondents who interacted with their senior enlisted advisor during the military justice process, overall, 58% indicated that they were *satisfied* with the response from their senior enlisted advisor during the military justice process, whereas 31% were *dissatisfied*. The eligible number of respondents who answered the question is 131.

Chapter 4:

Outcomes Associated With Reporting

The Department strives to create an environment where military members feel comfortable and safe reporting a potential sexual assault to a military authority. Since 2005, DoD has established a number of policies to encourage more survivors to come forward.²⁸ In 2012, DoD created two distinct types of reporting options for sexual assault survivors—*restricted* and *unrestricted*. *Restricted reporting* is a confidential option for those who want to obtain medical and mental health services, but do not want an official investigation into the assault, or their command to be notified. *Unrestricted reporting* is for military members who not only want access to medical and mental health services, but who also want to have the assault officially investigated. These reporting options were established so that military members could feel more comfortable seeking help/treatment without necessarily having the situation result in an official military investigation or notification of their leadership. Military members also have the option to convert a restricted report into an unrestricted report at any time. Conversely, an unrestricted report cannot be converted to restricted report.

One area the Department has been monitoring is repercussions, i.e. retaliatory behavior, as a result of reporting a sexual assault. Specifically, two forms of retaliatory behaviors have been outlined: professional reprisal and ostracism/maltreatment. Professional reprisal, as defined in law and policy, is a personnel or other unfavorable action taken by the chain of command against an individual for engaging in a protected activity. Ostracism and maltreatment, however, can be negative behaviors, such as actions of social exclusion or misconduct against the military member taken either by peers or an individual in a position of authority, because the military member reported or intends to report a criminal offense. The Department's ability to deter retaliatory behavior was strengthened by section 1714 of the NDAA for FY 2014, enhancing the protections in section 1034 of title 10, United States Code, for military members reporting criminal offenses. Protections were also strengthened for military members by section 1709, which requires the promulgation of regulations to punish retaliatory behaviors. Survey results on rates of perceived experiences of military members who made a report of sexual assault have been relatively constant for both types of retaliatory behavior since first measured in 2006. Prior survey data indicate that over half of female military members who make an unrestricted report of sexual assault perceive some amount of retaliatory behavior.²⁹ In 2015, the Secretary of Defense determined that more detailed information was needed on the circumstances of these perceived experiences of retaliation. As a result, the Secretary of Defense directed "that we develop a DoD-wide comprehensive strategy to prevent retaliation against Service members who report or intervene on behalf of victims of sexual assault and other crimes."³⁰

²⁸ Examples of policies established include the implementation of the DoD Safe Helpline, the National Defense Authorization Act for Fiscal Year 2014, and the Special Victims' Counsel/Victims' Legal Counsel Program (Lucero, 2015).

²⁹ DMDC (2013), Van Winkle, E., Rock, L., Coffey, M., & Hurley, M. (2014), and RAND (2014). Data for men were not reportable due to the small number of male respondents in this category.

³⁰ Secretary of Defense (2015, May 1).

This increased focus led to a number of new initiatives, including the revision of survey measures to be consistent with the directives prohibiting retaliation and behaviors that allow for Departmental action.³¹ To develop the comprehensive measure to assess perceptions of retaliation, SAPRO assembled a Retaliation Roundtable which included subject matter experts from across the Department, including representatives from each Service, as well as DoD stakeholders. The goal was to create a detailed set of survey items that more accurately measure perceptions of ostracism/maltreatment and professional reprisal so that these outcomes associated with reporting a sexual assault could be better addressed by the Department.

Construction of Items

OPA worked closely with the Services and DoD stakeholders to design behaviorally-based questions that would better capture perceptions of a range of outcomes resulting from the report of a sexual assault. The resulting bank of questions was designed to measure negative behaviors a respondent may have experienced as a result of making a sexual assault report and to account for additional motivating factors, as indicated by the respondent, that are consistent with prohibited actions of professional reprisal, ostracism, and maltreatment in the Uniform Code of Military Justice (UCMJ) and military policies and regulations. In this way, these questions are able to provide the Department with perceived experiences of the respondents for each of the different types of possible retaliatory behaviors as well as various “roll up” scales to obtain broader understanding of the issue. These items were reviewed and approved by all Services via the Retaliation Roundtable convened by SAPRO in June 2015.

Survey questions are only able to provide a general understanding of the self-reported outcomes that may constitute professional reprisal, ostracism, or maltreatment; ultimately, only the results of an investigation (which takes into account all legal aspects, such as the intent of the alleged perpetrator) can determine whether self-reported negative behaviors meet the requirements of prohibited retaliation. The percentages presented in this chapter reflect the respondents’ perceptions about a negative experience associated with their reporting of a sexual assault and not necessarily a reported or legally substantiated incident of retaliation. As such, rates for these items are caveated as “perceived.”

Prior to categorizing respondents as experiencing “perceived” professional reprisal, ostracism, and/or maltreatment, respondents had to indicate experiencing a “potential” retaliatory action and/or behavior. Specifically, the respondent had to indicate experiencing any behavior consistent with professional reprisal, ostracism, and/or maltreatment which would precede the questions to ascertain the respondent’s perception of the motivating factors of those potential retaliatory behaviors. Therefore, there are higher percentages of respondents who experience “potential” behaviors, but they do not, on their own, reflect a “rate.” “Perceived” actions and/or behaviors are those retaliatory behaviors where potential behaviors were experienced and additional motivating factors, as indicated by the respondent, were present. Construction of perceived professional reprisal, ostracism, and maltreatment is based on general policy

³¹ The implementation of Section 1709(a) of the NDAA for FY 2014 requires the Secretary of Defense to prescribe regulations, or require the Secretaries of the military departments to prescribe regulations, that prohibit retaliation against an alleged victim or other member of the Armed Forces who reports a criminal offense. The section further requires that violation of those regulations be punishable under Article 92 of the UCMJ, 10 U.S.C. § 892 (2012).

The percentages presented in this chapter reflect the respondents' perceptions about a negative experience associated with their reporting of a sexual assault and not necessarily a reported or legally substantiated incident of retaliation.

prohibitions and should not be construed as a legal crime victimization rate due to slight differences across the Services on the definition of behaviors and requirements of retaliation and in the absence of an investigation being conducted to determine a verified outcome.

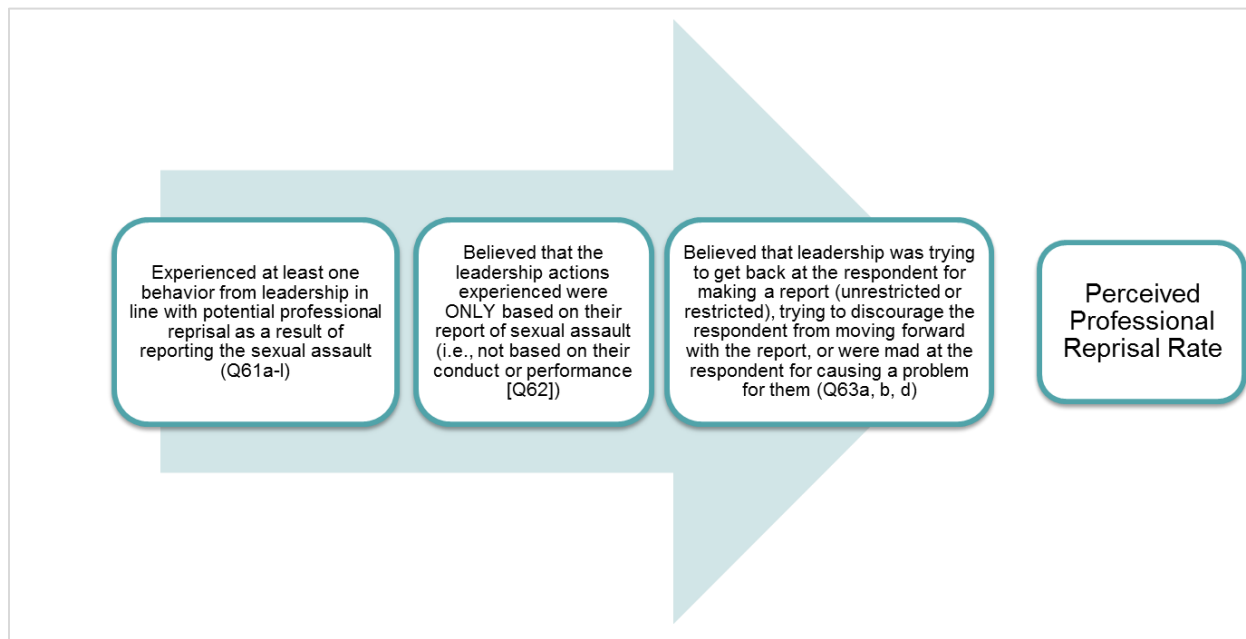

Perceived Professional Reprisal

Reprisal is defined as “taking or threatening to take an adverse personnel action, or withholding or threatening to withhold a favorable personnel action, with respect to a member of the Armed Forces because the member reported a criminal offense.”³² Per the definition in law and policy, reprisal may only occur if the actions in question were taken by leadership with the intent of having a specific detrimental impact on the career or professional activities of the military member who reported a crime.

As depicted in Figure 43, the *Perceived Professional Reprisal* rate in the 2016 MIJES is a summary measure reflecting whether respondents indicated they perceived experiencing at least one negative action by leadership as a result of reporting a sexual assault (not based on conduct or performance [Q61]). Further, the respondent must perceive these leadership actions were ONLY based on their report of sexual assault (i.e., the action taken was not based on conduct or performance [Q62]), and the respondent must believe leadership took these actions for a specific set of reasons: they were trying to get back at the respondent for making a report (unrestricted or restricted), they were trying to discourage the respondent from moving forward with the report, or they were mad at the respondent for causing a problem for them (Q63).

³² Military Whistleblower Protection Act (10 U.S.C. 1034); Section 1709(a) of the NDAA for FY 2014 requires regulations prohibiting retaliation against an alleged victim or other member of the Armed Forces who reports a crime, and requires that violations of those regulations be punishable under Article 92.

Figure 43.
Construction of Perceived Professional Reprisal Rate

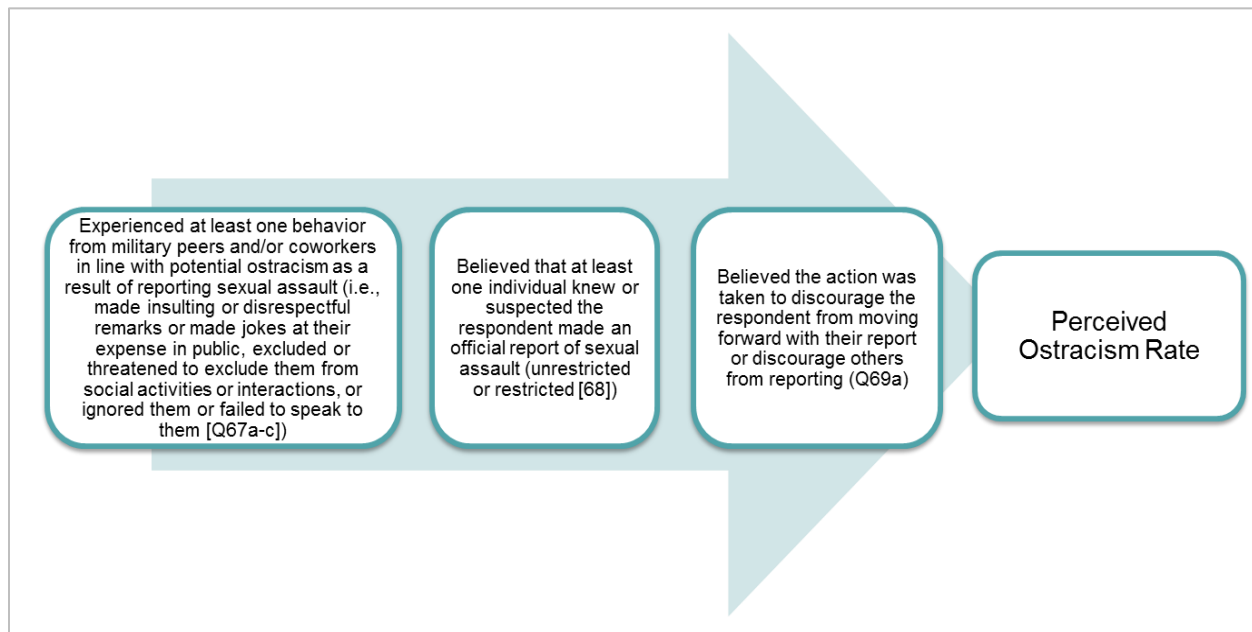

Perceived Ostracism

Implementing strategies to eliminate retaliatory behaviors such as ostracism presents some challenges to the Department. For example, enacting prohibitions against ostracism within the context of retaliation requires a specific set of criteria in order to maintain judicial validation against the limitations on the freedom of disassociation. Therefore, the Services crafted policies which implement the regulation of these prohibitions against ostracism outlined in statute 1709(a). In the *Report on Prohibiting Retaliation Against an Alleged Victim or Other Member of the Armed Forces Who Reports a Criminal Offense*, the Department states that “the punitive Service regulations issued in accordance with section 1709(a) of the NDAA for FY 2014 as supplemented by existing UCMJ articles that can be applied to some specific aspects of retaliation—such as Article 93’s prohibition of maltreatment and Article 133’s prohibition of misconduct by commissioned officers, cadets, and midshipmen—are the optimal means of criminalizing retaliation against victims or other members of the Armed Forces who report criminal offenses.”³³ Although the interpretation of ostracism varies slightly across the DoD Services, in general, ostracism may occur if retaliatory behaviors were taken either by a military member’s military peers or coworkers. Examples of ostracism include improper exclusion from social acceptance, activities, or interactions; denying privilege of friendship due to reporting or planning to report a crime; blaming the military member for the report or assault; and/or subjecting the military member to insults or bullying.

³³ DoD (2014).

As depicted in Figure 44, the *Perceived Ostracism* rate in the 2016 MIJES is a summary measure reflecting whether respondents indicated they perceived experiencing at least one negative action by military peers and/or coworkers as a result of reporting a sexual assault intended to make them feel excluded or ignored, specifically: someone made insulting or disrespectful remarks or made jokes at the respondent's expense in public, excluded or threatened to exclude the respondent from social activities or interactions, or ignored or failed to speak to the respondent (Q67). To be included in this rate, respondents also needed to indicate they perceived at least one individual who took the action knew or suspected the respondent made an official report of sexual assault (unrestricted or restricted) (Q68). Further, respondents had to indicate they believed the action was taken to discourage them from moving forward with their report or discourage others from reporting (Q69).

Figure 44.
Construction of Perceived Ostracism Rate

Perceived Maltreatment

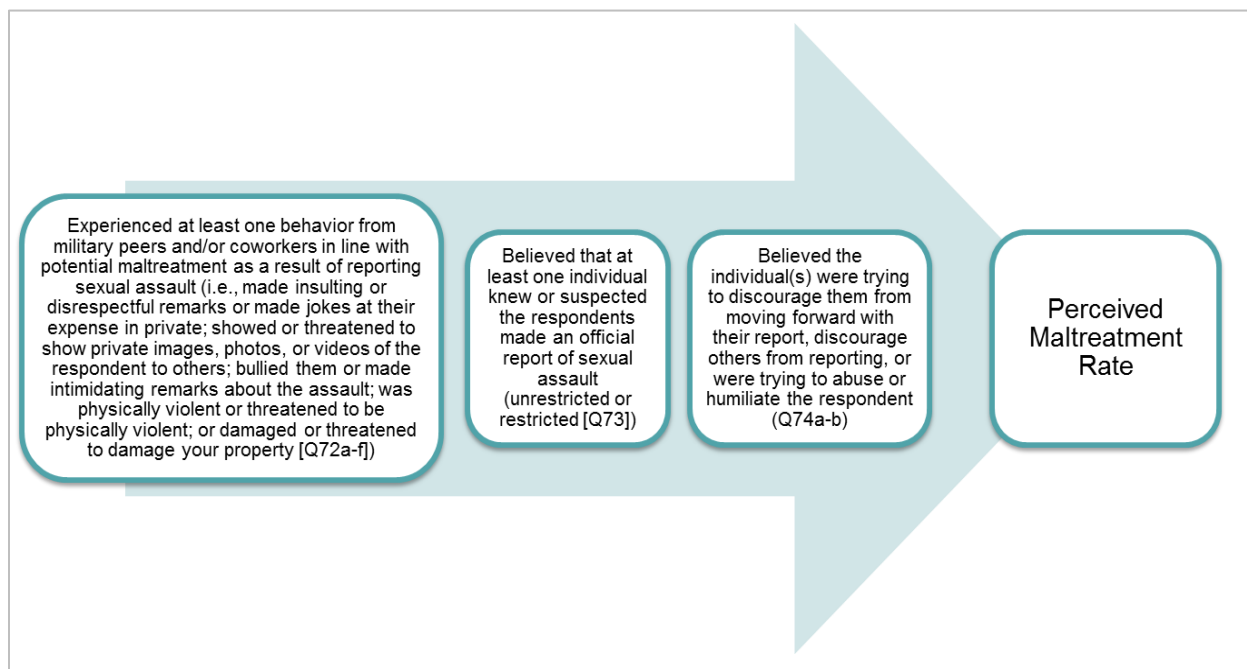

In the context of retaliation, perceived maltreatment prohibitions must include a specific set of criteria in order to maintain judicial validation against the limitations on the freedom of disassociation. As with perceived ostracism, the Services crafted regulations making certain behavior punitive under Article 92, of the UCMJ, as mandated by Section 1709(a).³⁴ Cruelty, oppression, and maltreatment are acts that occur without a valid military purpose, and may include physical or psychological force or threat or abusive or unjustified treatment that results in physical or mental harm done with the intent to deter the reporting of a criminal offense or

³⁴ DoD (2014).

participation in the military justice process. For the purposes of this report, the construct of “cruelty, oppression, and maltreatment” are referenced broadly as “maltreatment.”³⁵

As depicted in Figure 45, the *Perceived Maltreatment* rate is a summary measure that includes perceived experiences of at least one negative action by military peers and/or coworkers as a result of reporting a sexual assault which may include physical or psychological force, threat, or abusive or unjustified treatment that results in physical or mental harm, specifically: someone made insulting or disrespectful remarks or made jokes at the respondent’s expense in private; showed or threatened to show private images, photos, or videos of the respondent to others; bullied the respondent or made intimidating remarks about the assault; was physically violent with the respondent or threatened to be physically violent; or damaged or threatened to damage the respondent’s property (Q72). To be included in this rate, respondents also needed to indicate they perceived at least one person who took the action knew or suspected they made an official (unrestricted or restricted) sexual assault report (Q73) and they believed that person(s) were trying to discourage the respondent from moving forward with the report, discourage others from reporting, or was trying to abuse or humiliate the respondent (Q74).

Figure 45.
Construction of Perceived Maltreatment Rate

³⁵ Maltreatment as used in this survey comprises both maltreatment in the context of reporting an offense and under Article 93 of the UCMJ.

Perceived Ostracism/Maltreatment

By regulations, ostracism/maltreatment is defined as “ostracism and acts of maltreatment committed by peers of a member of the Armed Forces or by other persons because the member reported a criminal offense.”³⁶ As depicted in Figure 46, the *Perceived Ostracism/Maltreatment* rate is an overall measure reflecting whether respondents reported experiencing behaviors and actions by military peers and/or coworkers in order to fulfill requirements for inclusion in the rate for either *Perceived Ostracism* and/or *Perceived Maltreatment* (Q67-Q69, Q72-Q74).

Figure 46.
Construction of Perceived Ostracism/Maltreatment Rate

Perceived Professional Reprisal and/or Perceived Ostracism/Maltreatment

As depicted in Figure 47, the overall *Perceived Professional Reprisal and/or Perceived Ostracism/Maltreatment* rate is an overall measure reflecting whether members indicated experiencing negative actions from their leadership, military peers, and/or coworkers as a result of reporting a sexual assault, and which meets the requirements for inclusion in the estimates of *Perceived Professional Reprisal*, *Perceived Ostracism*, and/or *Perceived Maltreatment* (Q61-Q63, Q67-Q69, and Q72-Q74).

³⁶ Section 1709(a) of the NDAA for FY 2014 requires regulations prohibiting retaliation against an alleged survivor or other member of the Armed Forces who reports a crime, and requires that violations of those regulations be punishable under Article 92.

Figure 47.***Construction of Perceived Professional Reprisal and/or Perceived Ostracism/Maltreatment Rate***

The next sections detail the rates and perceived experiences of respondents based on the aforementioned construction criteria. Results are presented for respondents at the Total DoD level.

Perceived Professional Reprisal

As seen in Figure 48, for respondents overall, the *Perceived Professional Reprisal Rate* was 28%. Overall, 16% of respondents perceived experiencing a behavior consistent with potential professional reprisal from their leadership, but did not experience additional motivating factors, as indicated by the respondent, needed to be included in the overall rate. Those respondents included in the *Perceived Professional Reprisal* rate reported experiencing a behavior consistent with potential professional reprisal from their leadership, believed that the leadership actions experienced were based on their report of sexual assault, and believed their leadership was trying to get back at them for making a report (unrestricted or restricted), trying to discourage the respondent from moving forward with the report, or were mad at the respondent for causing a problem for them. Specific details of this rate follow.

The percentages presented in this chapter reflect the respondents' perceptions about a negative experience associated with their reporting of a sexual assault and not necessarily a reported or legally substantiated incident of retaliation.

Figure 48.***2016 Perceived Professional Reprisal Rate of MIJES Respondents******Behaviors Consistent With Perceived Professional Reprisal***

Table 2 presents the list of behaviors that align with perceived professional reprisal. Data found in Table 2 include estimates for eligible respondents overall, as well as respondents who fell into the *Perceived Professional Reprisal Rate* (i.e., indicated experiencing a behavior consistent with perceived professional reprisal from their leadership, believed that the leadership actions experienced were based on their report of sexual assault, and believed their leadership was trying to get back at them for making a report [unrestricted or restricted], trying to discourage them from moving forward with the report, or were mad at the survivor for causing a problem for them).

Of respondents who met criteria³⁷ for *Perceived Professional Reprisal*, the majority (76%) indicated experiencing *some other action that negatively affects, or could negatively affect, their position or career* from leadership, whereas 56% indicated leadership *rated them lower than they deserved on a performance evaluation*, 39% indicated leadership *denied them a training opportunity that could have led to promotion or is needed in order to keep their current position*, 39% indicated leadership *reassigned them to duties that do not match their current grade*, 35% indicated leadership *denied them an award they were previously eligible to receive*, 34% indicated leadership *disciplined them or ordered other corrective action*, 27% indicated leadership *demoted them or denied them a promotion*, 23% indicated leadership *prevented, or attempted to prevent, them from communicating with the Inspector General or a member of Congress*, 21% indicated leadership *made them perform additional duties that do not match their current grade*, 21% indicated leadership *transferred them to a different unit or installation without their request or agreement*, 16% indicated leadership *ordered them to one or more command directed mental health evaluations*, and 5% indicated leadership *reduced their pay or benefits without doing the same to others*.

³⁷ To note, of the respondents who met criteria for *Perceived Professional Reprisal*, 65% indicated experiencing *some other action that negatively affects, or could negatively affect, their position or career* from leadership and also indicated some other behavior in line with perceived professional reprisal done by leadership (of the behaviors listed in Table 2).

Table 2.
Behaviors in Line With Perceived Professional Reprisal

Behaviors in Line With Perceived Professional Reprisal	Percent of Eligible Respondents	Percent of Eligible Respondents Who Met Criteria For Perceived Professional Reprisal
Some other action that negatively affects, or could negatively affect, your position or career	30%	76%
Rated you lower than you deserved on a performance evaluation	19%	56%
Reassigned you to duties that do not match your current grade	14%	39%
Denied you a training opportunity that could have led to promotion or is needed in order to keep your current position	13%	39%
Denied you an award you were previously eligible to receive	13%	35%
Disciplined you or ordered other corrective action	12%	34%
Demoted you or denied you a promotion	8%	27%
Prevented, or attempted to prevent, you from communicating with the Inspector General or a member of Congress	8%	23%
Made you perform additional duties that do not match your current grade	8%	21%
Transferred you to a different unit or installation without your request or agreement	8%	21%
Ordered you to one or more command directed mental health evaluations	7%	16%
Reduced your pay or benefits without doing the same to others	2%	5%
<i>Eligible number of respondents</i>	220	62

Note. Q61-Q63. Respondents were allowed to mark more than one option, and therefore, the sum of subitems does not equal 100%.

As discussed above, 76% of respondents who met criteria for *Perceived Professional Reprisal* indicated experiencing *some other action that negatively affects, or could negatively affect, their position or career* from leadership. However, of respondents overall, regardless of whether they met criteria, 30% indicated experiencing *some other action that negatively affects, or could negatively affect, their position or career* from leadership. These respondents were asked to specify the other negative actions leadership took. Overall, 62 respondents specified a variety of

The percentages presented in this chapter reflect the respondents' perceptions about a negative experience associated with their reporting of a sexual assault and not necessarily a reported or legally substantiated incident of retaliation.

negative actions, the majority of which were behaviors akin to ostracism or maltreatment. Of the negative actions related to professional reprisal, the most frequently mentioned actions taken by leadership included belief that leadership *breached confidentiality*, leadership forced the respondent to *involuntarily separate or transfer*, or the respondent was *unwarrantedly disciplined*. Examples of these negative actions include the following quotations:

Breach of confidentiality

- “Made it a point to put my information out for everyone to know about.”
- “My case was not kept confidential, and was the subject of gossip even after I left.”
- “My leadership talking about the case outside a need to know basis created a hostile work environment for me. It encouraged the spread of rumors and made it difficult for me to work with males both in my unit that the event occurred and once I PCS’d due to many of the same people relocating to the same location as me.”
- “My flight leadership made a point of contacting my future leadership to ‘warn’ them about me when I received a new assignment. Other members of my flight also made a point of contacting members of my new flight to ensure that everyone knew about my case and that I had ‘gotten someone kicked out.’”

Involuntary separation or transfer

- “Moved me from my position without notice. Removed me from deployment.”
- “Was labeled a trouble maker and hurried through an administrative separation for an [medical] disorder... still facing repercussions and was transferred from previous duty station.”
- “I was barred from reenlistment, and then [they] move[d] me to a unit within the same brigade instead of moving me to a OCONUS [outside the continental United States] place of my choice as my VA promised me.”

Unwarranted discipline

- *“Tr[ie]d charging me for malingering trying to deny me time to speak with therapists forcing me to be in similar places with assaulter.”*
- *“Denied opportunity to be put up for BTZ [Below the Zone promotion].”*
- *“Threatened to demote and send my two roommates who were in another room during the incident to Mast if I decided to go forward with the report, and told me they would likely be punished severely despite not being the offender or having any wrong doing.”*
- *“I was not allotted the same opportunities when it came to training or experiences. I was held back because my receiving shop [ERANK] felt like I was handicapped because of what happened to me. I was treated as a lesser part of the shop.”*

Perceived Reasons Why Leadership Took the Actions Aligned With Perceived Professional Reprisal

The third criterion used to construct the *Perceived Professional Reprisal Rate* is the respondent's perception of why their leadership chose to take the action against them as a result of reporting their sexual assault. To be included in the rate, respondents needed to indicate that they perceived that their leadership was trying to get back at them for making a report (unrestricted or restricted), trying to discourage them from moving forward with the report, or were mad at them for causing a problem for them. As seen in Figure 49, of respondents who indicated experiencing negative behaviors and believed the leadership actions experienced were only based on their report of sexual assault, 73% indicated leadership took the action because *they were mad at the respondent for causing a problem for them*, and 39% indicated *they were trying to discourage them from moving forward with their report and/or they were trying to get back at them for making a report (unrestricted or restricted)*. The eligible number of respondents who answered the question is 82.

The percentages presented in this chapter reflect the respondents' perceptions about a negative experience associated with their reporting of a sexual assault and not necessarily a reported or legally substantiated incident of retaliation.

Figure 49.***Perceived Reasons Why Leadership Took the Actions Aligned With Perceived Professional Reprisal******Q61-Q63***

Percent of eligible respondents who indicated experiencing negative actions from their leadership in line with potential professional reprisal and who believed the leadership actions experienced were only based on their report of sexual assault. Respondents were allowed to mark more than one option, and therefore, the sum of subitems does not equal 100%.

Table 3 provides a complete breakout of all response options that respondents who indicated experiencing negative actions from their leadership and believed the leadership actions experienced were only based on their report of sexual assault could have indicated. Of these members, half or more indicated they thought leadership took other actions, which were not in line with *Perceived Professional Reprisal*, because *they did not believe the respondent* (63%); *they did not understand the situation* (52%); and *they were friends with the person(s) who committed the sexual assault* (49%).

Table 3.***Reasons That Leadership Took the Perceived Professional Reprisal Actions***

Reasons That Leadership Took the Perceived Professional Reprisal Actions	Percent of Eligible Respondents Who Believed the Leadership Actions Were Based on Report
Perceived Professional Reprisal Criteria Response Options	
They were mad at you for causing a problem for them	73%
They were trying to discourage you from moving forward with your report	39%
They were trying to get back at you for making a report (unrestricted or restricted)	39%
Other Reasons	
They did not believe you	63%
They did not understand the situation	52%
They were friends with the person(s) who committed the sexual assault	49%
Some other reason	27%
They were addressing the issue of collateral misconduct	10%
Not sure	7%
They were trying to help you	6%
They were following established protocol by temporarily reassigning you during recovery	4%
<i>Eligible number of respondents</i>	82

Note. Q61-Q63. Respondents were allowed to mark more than one option, and therefore, the sum of subitems does not equal 100%.

Individual(s) Who Took the Perceived Professional Reprisal Action

As seen in Figure 50, of respondents who indicated experiencing *Perceived Professional Reprisal*, 66% indicated *another member in their chain of command, but not a unit commander* took the action, whereas 56% indicated their *Senior Enlisted Leader* took the action, 50% indicated their *unit commander* took the action, 40% indicated a *higher ranking member not in the respondent's chain of command* took the action, 6% indicated the *deputy commander (XO)* took the action, and 5% indicated they were *not sure* who took the action(s). The eligible number of respondents who answered the question is 62.

The percentages presented in this chapter reflect the respondents' perceptions about a negative experience associated with their reporting of a sexual assault and not necessarily a reported or legally substantiated incident of retaliation.

Figure 50.
Individual(s) Who Took the Perceived Professional Reprisal Action

Q64

Percent of eligible respondents who took the survey and met criteria for *Perceived Professional Reprisal*. Respondents were allowed to mark more than one option, and therefore, the sum of subitems does not equal 100%.

Perceived Harm to Career

Of importance to the Department is determining the perceived impact of professional reprisal behaviors on a military member's career. For this item, if the respondent indicated the actions taken by leadership are likely to have both a short-term and lasting impact on their career, then the actions were *very harmful*; if the actions are likely to have a short-term impact and some lasting impact on their career, then the actions were *moderately harmful*; if the actions are likely to have a short-term impact, but not a lasting impact on their career, then the actions were *somewhat harmful*; but if the actions are unlikely to have a short-term or lasting impact on their career, then the actions were considered *not at all harmful*.

As seen in Figure 51, of respondents who indicated experiencing *Perceived Professional Reprisal*, 56% believed that behaviors taken by their leadership were *very harmful*, 23% indicated these behaviors were *moderately harmful*, 16% indicated these behaviors were *somewhat harmful* and 5% indicated these behaviors taken by their leadership were *not at all harmful*. The eligible number of respondents who answered the question is 61.

Figure 51.
Perceived Harm to Career

Decision to Participate or Move Forward With Report as a Result of Experiencing Perceived Professional Reprisal

As described in the construction of the *Perceived Professional Reprisal* rate, part of leadership's motivation in undertaking these behaviors might involve trying to discourage the respondent from moving forward with the report. Therefore, it is of interest to the Department to know whether experiencing these behaviors impacts a person's decision to move forward with their report. As seen in Figure 52, the majority (79%) of respondents who indicated experiencing *Perceived Professional Reprisal* indicated they decided to participate and/or move forward with their report. However, 21% indicated that as a result of the actions taken against them, they chose not to participate or move forward with their report. The eligible number of respondents who answered the question is 61.

The percentages presented in this chapter reflect the respondents' perceptions about a negative experience associated with their reporting of a sexual assault and not necessarily a reported or legally substantiated incident of retaliation.

Figure 52.

Decision to Participate or Move Forward With Report as a Result of Experiencing Perceived Professional Reprisal

Perceived Ostracism

As seen in Figure 53, for respondents overall, the *Perceived Ostracism Rate* was 17%. Overall, 39% of respondents perceived experiencing a behavior consistent with potential ostracism from their military peers and/or coworkers, but did not experience additional motivating factors, as indicated by the respondent, needed to be included in the overall rate. Those respondents included in the *Perceived Ostracism* rate reported experiencing a behavior consistent with potential ostracism from their military peers and/or coworkers, believed that these actions experienced were based on their report of sexual assault, and believed their military peers and/or coworkers were trying to discourage the respondent from moving forward with the report or discourage others from reporting. Specific details of this rate follow.

Figure 53.
2016 Perceived Ostracism Rate of MIJES Respondents

Behaviors Consistent With Perceived Ostracism

Table 4 presents the list of behaviors that align with perceived ostracism. Data found in Table 4 include estimates for eligible respondents overall, as well as respondents who fell into the *Perceived Ostracism Rate* (i.e., indicated experiencing a behavior consistent with perceived ostracism from their military peers and/or coworkers; believed that those who took the actions knew or suspected the respondent made an official [unrestricted or restricted] sexual assault report; and those who took the actions were trying to discourage them from moving forward with the report, or discourage others from reporting). Of respondents who met criteria for *Perceived Ostracism*, the majority indicated military peers and/or coworkers *ignored them or failed to speak to them (for example, gave them "the silent treatment"; 89%), made insulting or disrespectful remarks or made jokes at their expense—in public (86%), and excluded them or threatened to exclude them from social activities or interactions (81%)*.

The percentages presented in this chapter reflect the respondents' perceptions about a negative experience associated with their reporting of a sexual assault and not necessarily a reported or legally substantiated incident of retaliation.

Table 4.
Behaviors in Line With Perceived Ostracism

Behaviors in Line With Perceived Ostracism	Percent of Eligible Respondents	Percent of Eligible Respondents Who Met Criteria For Perceived Ostracism
Ignored you or failed to speak to you (for example, gave you "the silent treatment")	47%	89%
Made insulting or disrespectful remarks or made jokes at your expense—in public	39%	86%
Excluded you or threatened to exclude you from social activities or interactions	35%	81%
<i>Eligible number of respondents</i>	223	37

Note. Q67-Q69. Respondents were allowed to mark more than one option, and therefore, the sum of subitems does not equal 100%.

Perceived Reasons Why Military Peers and/or Coworkers Took the Actions Aligned With Perceived Ostracism

The third criterion used to construct the *Perceived Ostracism Rate* is the respondent's perception of why their peers and/or coworkers chose to take the action against them as a result of reporting their sexual assault. To be included in the rate, respondents needed to indicate that they perceived that their peers and/or coworkers were trying to discourage them from moving forward with their report, or discourage others from reporting. As seen in Figure 54, of respondents who indicated experiencing negative actions from their military peers and/or coworkers in line with ostracism, and believed that the person(s) who took these actions knew or suspected they made an official sexual assault report, 33% indicated their military peers and/or coworkers took the action because *they were trying to discourage them from moving forward with their report, or discourage others from reporting*, whereas 100% indicated *some other behavior and/or not sure*. The eligible number of respondents who answered the question is 111.

Figure 54.***Perceived Reasons Why Military Peers and/or Coworkers Took the Actions Aligned With Perceived Ostracism****Q67-Q69*

Percent of eligible respondents who indicated experiencing negative actions from their military peers and/or coworkers in line with ostracism, and believed that the person(s) who took these actions knew or suspected they made an official sexual assault report. Respondents were allowed to mark more than one option, and therefore, the sum of subitems does not equal 100%.

Table 5 provides a complete breakout of all response options that respondents who indicated experiencing negative actions from their military peers and/or coworkers in line with ostracism, and believed that the person(s) who took these actions knew or suspected they made an official sexual assault report could have indicated. Of these members, half or more indicated they thought the person(s) who took the other actions, which were not in line with *Perceived Ostracism*, because *they were friends with the person(s) who committed the sexual assault* (84%); *they did not believe the respondent* (68%); and *they were trying to make the respondent feel excluded* (49%).

The percentages presented in this chapter reflect the respondents' perceptions about a negative experience associated with their reporting of a sexual assault and not necessarily a reported or legally substantiated incident of retaliation.

Table 5.

Reasons That Military Peers/Coworkers Took the Perceived Ostracism Actions

Reasons That Military Peers/Coworkers Took the Perceived Ostracism Actions	Percent of Eligible Respondents Who Believed Person(s) Who Took Actions Knew or Suspected They Made an Official Report
Perceived Ostracism Criteria Response Options	
They were trying to discourage you from moving forward with your report, or discourage others from reporting	33%
Other Reasons	
They were friends with the person(s) who committed the sexual assault	84%
They did not believe you	68%
They were trying to make you feel excluded	49%
Some other reason	27%
Not sure	7%
<i>Eligible number of respondents</i>	111

Note. Q67-Q69. Respondents were allowed to mark more than one option, and therefore, the sum of subitems does not equal 100%.

Individual(s) Who Took the Perceived Ostracism Action

As seen in Figure 55, of respondents who indicated experiencing *Perceived Ostracism*, 78% indicated a *Service member in a similar rank as them* took the action, whereas 73% indicated a *Service member in a higher rank within their chain of command* took the action, 65% indicated a *Service member in a higher rank not in their chain of command* took the action, 51% indicated a *Service member in a lower rank than them* took the action, and 14% indicated a *DoD civilian* took the action. No one indicated they were *not sure who they were*. The eligible number of respondents who answered the question is 37.

Figure 55.
Individual(s) Who Took the Perceived Ostracism Action

2016 MIJES Q70

Percent of eligible respondents who took the survey and met criteria for *Perceived Ostracism*. Respondents were allowed to mark more than one option, and therefore, the sum of subitems does not equal 100%.

Decision to Participate or Move Forward With Report as a Result of Experiencing Perceived Ostracism

As described in the construction of the *Perceived Ostracism* rate, part of the motivation in undertaking these behaviors might involve trying to discourage the respondent from moving forward with the report. Therefore, it is of interest to the Department to know whether experiencing these behaviors impacts a person's decision to move forward with their report. As seen in Figure 56, of respondents who indicated experiencing *Perceived Ostracism*, the majority (81%) indicated they decided to participate and/or move forward with their report. However, 19% indicated that as a result of the actions taken against them, they chose not to participate or move forward with their report. The eligible number of respondents who answered the question is 37.

The percentages presented in this chapter reflect the respondents' perceptions about a negative experience associated with their reporting of a sexual assault and not necessarily a reported or legally substantiated incident of retaliation.

Figure 56.

Decision to Participate or Move Forward With Report as a Result of Experiencing Perceived Ostracism

Perceived Maltreatment

As seen in Figure 57, for respondents overall, the *Perceived Maltreatment Rate* was 24%. Overall, 20% of respondents perceived experiencing a behavior consistent with potential maltreatment from their military peers and/or coworkers, but did not experience additional motivating factors, as indicated by the respondent, needed to be included in the overall rate. Those respondents included in the *Perceived Maltreatment* rate reported experiencing a behavior consistent with potential maltreatment from their military peers and/or coworkers; believed that these actions experienced were based on their report of sexual assault; and believed their military peers and/or coworkers were trying to discourage them from moving forward with their report, discourage others from reporting, or were trying to abuse or humiliate the respondent. Specific details of this rate follow.

Figure 57.
2016 Perceived Maltreatment Rate of MIJES Respondents

Behaviors Consistent With Perceived Maltreatment

Table 6 presents the list of behaviors that align with perceived maltreatment. Data found in Table 4 include estimates for eligible respondents overall, as well as respondents who fell into the *Perceived Maltreatment Rate* (i.e., indicated experiencing a behavior consistent with perceived maltreatment from their military peers and/or coworkers; believed that those who took the actions knew or suspected the respondent made an official [unrestricted or restricted] sexual assault report; and those who took the actions were trying to discourage them from moving forward with their report, discourage others from reporting, or were trying to abuse or humiliate the respondent). Of respondents who met criteria for *Perceived Maltreatment*, 72% indicated their military peers and/or coworkers *made insulting or disrespectful remarks or made jokes at their expense—to them in private*, 66% indicated these persons *bullied them or made intimidating remarks about the assault*, 62% indicated they experienced *some other negative action*, 15% indicated these persons *showed or threatened to show private images, photos, or videos of them to others*, 13% indicated these persons were *physically violent with them or threatened to be physically violent*, and 13% indicated these persons *damaged or threatened to damage their property*.³⁸

³⁸ Of the respondents who met criteria for *Perceived Maltreatment*, 49% indicated experiencing *some other negative action* from military peers and/or coworkers and also indicated some other behavior in line with perceived maltreatment (of the behaviors listed in Table 6).

Table 6.
Behaviors in Line With Perceived Maltreatment

Behaviors in Line With Perceived Maltreatment	Percent of Eligible Respondents	Percent of Eligible Respondents Who Met Criteria For Perceived Maltreatment
Made insulting or disrespectful remarks or made jokes at your expense—to you in private	30%	72%
Bullied you or made intimidating remarks about the assault	22%	66%
Some other negative action	24%	62%
Showed or threatened to show private images, photos, or videos of you to others	5%	15%
Was physically violent with you or threatened to be physically violent	4%	13%
Damaged or threatened to damage your property	4%	13%
<i>Eligible number of respondents</i>	220	53

Note. Q72-Q74. Respondents were allowed to mark more than one option, and therefore, the sum of subitems does not equal 100%.

As discussed above, 62% of respondents who met criteria for *Perceived Maltreatment* indicated experiencing *some other negative action* from their military peers and/or coworkers. However, of respondents overall, regardless of whether they met criteria, 24% indicated experiencing *some other negative action* from their military peers and/or coworkers. These respondents were asked to specify the other negative actions these individuals took. Overall, 39 respondents specified a variety of negative actions. Of these negative actions, the most frequently mentioned included these individuals *ostracized* the respondent, military peers and/or coworkers *spreading rumors* about the respondent, or they were *intimidated, threatened, or bullied*. Examples of these negative actions include the following quotations:

Respondent was ostracized

- *“I’ve had people unfriend and exclude me because they know about my past.”*
- *“People treated me like I was invisible to them... I felt very excluded from the unit I belong to and that resulted [for] me to PCS out.. I could not take that place anymore.”*
- *“Everyone in my office stopped talking to me.”*
- *“I was shunned by everyone except for a couple of females I socialized with.”*

Rumors spread about respondent

- *“Rumors spread like wildfire around the [LOCATION] and no one wanted to interact with me, they would call me a ‘liar’ and say I was seeking attention.”*
- *“They spread vicious rumors about me both at the location where the event occurred and when we PCS’d to my new unit. A Senior NCO told my peers at a new unit to be cautious working with me because I would ‘call SHARP’ on them. I left the country [when] the event occurred, but I couldn’t stop the rumor mill from continuing at my new location.”*
- *“People started rumors and said nasty things behind my back because they were friends with him, and whenever I passed by them I would get nasty looks from some of them.”*

Respondent was intimidated, threatened, or bullied

- *“The perpetrator sent his friend to my personal property to intimidate me from reporting. That same person also threatened me verbally not to report.”*
- *“He said he was going to come after me for making the report.”*
- *“Verbal degradation and emotional abuse/harassment.”*
- *“I was approached in front of over 100 senior [ORANK]s and Officers, and was threatened to the point of tears by a fellow [ORANK].”*

The percentages presented in this chapter reflect the respondents' perceptions about a negative experience associated with their reporting of a sexual assault and not necessarily a reported or legally substantiated incident of retaliation.

Perceived Reasons Why Military Peers and/or Coworkers Took the Actions Aligned With Perceived Maltreatment

The third criterion used to construct the *Perceived Maltreatment Rate* is the respondent's perception of why their peers and/or coworkers chose to take the action against them as a result of reporting their sexual assault. To be included in the rate, respondents needed to indicate that they perceived that their peers and/or coworkers were trying to discourage them from moving forward with their report, discourage others from reporting, or were trying to abuse or humiliate the respondent. As seen in Figure 58, of respondents who indicated experiencing negative actions from their military peers and/or coworkers in line with maltreatment, and believed that the person(s) who took these actions knew or suspected they made an official sexual assault report, 96% indicated *some other behavior and/or not sure*, 49% indicated their military peers and/or coworkers took the action because *they were trying to abuse or humiliate the respondent*, and 42% indicated these persons were *trying to discourage them from moving forward with their report or discourage others from reporting*. The eligible number of respondents who answered the question is 84.

Figure 58.

Perceived Reasons Why Military Peers and/or Coworkers Took the Actions Aligned With Perceived Maltreatment

Q72-Q74

Percent of eligible respondents who indicated experiencing negative actions from their military peers and/or coworkers in line with maltreatment, and believed that the person(s) who took these actions knew or suspected they made an official sexual assault report. Respondents were allowed to mark more than one option, and therefore, the sum of subitems does not equal 100%.

Table 7 provides a complete breakout of all response options that respondents who indicated experiencing negative actions from their military peers and/or coworkers in line with maltreatment, and believed that the person(s) who took these actions knew or suspected they

made an official sexual assault report could have indicated. Of these members, three-fifths or more indicated they thought the person(s) took other actions, which were not in line with *Perceived Maltreatment*, because *they were friends with the person(s) who committed the sexual assault* (78%) and *they did not believe the respondent* (60%).

Table 7.
Reasons That Military Peers/Coworkers Took the Perceived Maltreatment Actions

Reasons That Military Peers/Coworkers Took the Perceived Maltreatment Actions	Percent of Eligible Respondents Who Believed Person(s) Who Took Actions Knew or Suspected They Made an Official Report
Perceived Maltreatment Criteria Response Options	
They were trying to abuse or humiliate you	49%
They were trying to discourage you from moving forward with your report, or discourage others from reporting	42%
Other Reasons	
They were friends with the person(s) who committed the sexual assault	78%
They did not believe you	60%
Some other reason	16%
Not sure	8%
<i>Eligible number of respondents</i>	85

Note. Q72-Q74. Respondents were allowed to mark more than one option, and therefore, the sum of subitems does not equal 100%.

Were Military Peers and/or Coworkers Who Took Maltreatment Actions in a Position of Authority/Leadership

As seen in Figure 59, of respondents who indicated experiencing *Perceived Maltreatment*, 75% indicated *yes*, some of the persons who took the *Perceived Maltreatment* actions were in a position of authority/leadership over them, whereas 21% indicated *no*, the person was not in a position of authority/leadership over them, and 4% indicated they were *not sure*. The eligible number of respondents who answered the question is 53.

Figure 59.

Were Military Peers and/or Coworkers Who Took Maltreatment Actions in a Position of Authority/Leadership

Individual(s) Who Took the Perceived Maltreatment Action

As seen in Figure 60, of respondents who indicated experiencing *Perceived Maltreatment*, 74% indicated a *Service member in a higher rank within their chain of command* took the action, 68% indicated a *Service member in a similar rank as them* took the action, 49% indicated a *Service member in a higher rank not in their chain of command* took the action, 42% indicated a *Service member in a lower rank than them* took the action, 13% indicated a *DoD civilian* took the action, and 4% indicated they were *not sure who they were*. The eligible number of respondents who answered the question is 53.

Figure 60.***Individual(s) Who Took the Perceived Maltreatment Action***

Q76

Percent of eligible respondents who took the survey and met criteria for *Perceived Maltreatment*. Respondents were allowed to mark more than one option, and therefore, the sum of subitems does not equal 100%.

Decision to Participate or Move Forward With Report as a Result of Experiencing Perceived Maltreatment

As described in the construction of the *Perceived Maltreatment* rate, part of the motivation in undertaking these behaviors might involve trying to discourage the respondent from moving forward with the report. Therefore, it is of interest to the Department to know whether experiencing these behaviors impacts a person's decision to move forward with their report. As seen in Figure 61, of respondents who indicated experiencing *Perceived Maltreatment*, the majority (83%) indicated they decided to participate and/or move forward with their report. However, 17% indicated that as a result of the actions taken against them, they chose not to participate or move forward with their report. The eligible number of respondents who answered the question is 53.

The percentages presented in this chapter reflect the respondents' perceptions about a negative experience associated with their reporting of a sexual assault and not necessarily a reported or legally substantiated incident of retaliation.

Figure 61.

Decision to Participate or Move Forward With Report as a Result of Experiencing Perceived Maltreatment

Perceived Ostracism/Maltreatment

The overall *Perceived Ostracism/Maltreatment* rate is inclusive of the *Perceived Ostracism* and *Perceived Maltreatment* rates. As shown in Figure 62, for respondents overall, the *Perceived Ostracism/Maltreatment Rate* was 27%. This rate is a composite of respondents who reported experiencing *Perceived Ostracism* and/or *Perceived Maltreatment* by other military peers and/or coworkers for reporting a sexual assault. Overall, 35% of respondents perceived experiencing a behavior consistent with potential ostracism and/or potential maltreatment, but did not meet additional criteria to be included in the overall rate. Criteria include experiencing potential ostracism and/or potential maltreatment behaviors as a result of reporting a sexual assault, believing that the person(s) who took these actions knew or suspected they made an official (unrestricted or restricted) sexual assault report, and believing the individual(s) was trying to discourage them from moving forward with the report, or discourage others from reporting, or were trying to abuse or humiliate them. Specific details of this rate follow.

The percentages presented in this chapter reflect the respondents' perceptions about a negative experience associated with their reporting of a sexual assault and not necessarily a reported or legally substantiated incident of retaliation.

Figure 62.**2016 Perceived Ostracism/Maltreatment Rate of MIJES Respondents****Actions Involving Social Media**

The Department has also shown interest in whether social media plays a role in behaviors consistent with ostracism/maltreatment. Of respondents who reported experiencing *Perceived Ostracism/Maltreatment*, 29% indicated that the actions they experienced involved some form of social media (e.g., Facebook, Twitter, Kik, Yik Yak, Snapchat). The eligible number of respondents who answered the question is 58.

Perceived Professional Reprisal, Perceived Ostracism, and/or Perceived Maltreatment

The *Perceived Professional Reprisal, Perceived Ostracism, and/or Perceived Maltreatment* rate is an overall measure reflecting whether respondents reported experiencing *Perceived Professional Reprisal* and/or *Perceived Ostracism/Maltreatment* by leadership or other military peers and/or coworkers for reporting a sexual assault (Q61-Q63, Q67-Q69, and Q72-Q74). In this sense, it is a roll-up of possible perceived retaliatory behaviors.

As shown in Figure 63, for respondents overall, the *Perceived Professional Reprisal, Perceived Ostracism, and/or Perceived Maltreatment Rate* was 38%. This rate is a composite of respondents who reported experiencing *Perceived Professional Reprisal* and/or *Perceived Ostracism/Maltreatment* for reporting a sexual assault.³⁹ Overall, 31% of respondents perceived experiencing a behavior consistent with potential professional reprisal, potential ostracism, and/or potential maltreatment, but did not indicate additional motivating factors to be included in the overall rate. Specific details of this rate follow.

³⁹ *Perceived Professional Reprisal* and *Perceived Ostracism/Maltreatment* are not summed to create the *Perceived Professional Reprisal, Perceived Ostracism, and/or Perceived Maltreatment* rate. Respondents could report experiencing one or more behaviors and/or criteria to enter into the rate, and therefore there is overlap between the two individual rates *Perceived Professional Reprisal* and *Perceived Ostracism/Maltreatment*.

Figure 63.***2016 Perceived Professional Reprisal, Perceived Ostracism, and/or Perceived Maltreatment Rate of MIJES Respondents***

Figure 64 presents a Venn Diagram which highlights the overlap between the rates of *Perceived Professional Reprisal*, *Perceived Ostracism*, and/or *Perceived Maltreatment*. Overall, of the 28% of respondents who reported experiencing *Perceived Professional Reprisal* and the 27% who reported experiencing *Perceived Ostracism/Maltreatment*, 18% of respondents reported experiencing both *Perceived Professional Reprisal* and *Perceived Ostracism/Maltreatment* (10% reported experiencing only *Perceived Professional Reprisal* and 11% reported experiencing only *Perceived Ostracism/Maltreatment*).⁴⁰ Further interpretation of these rates revealed that of respondents who reported experiencing *Perceived Professional Reprisal*, 62% also reported experiencing *Perceived Ostracism/Maltreatment*. Of respondents who indicated experiencing *Perceived Ostracism/Maltreatment*, 64% also reported experiencing *Perceived Professional Reprisal*. The eligible number of respondents who answered the question is 217.

⁴⁰ These percentages may not add up to the Prevalence Rates due to rounding.

Figure 64.

Venn Diagram of Perceived Professional Reprisal, Perceived Ostracism, and/or Perceived Maltreatment

Q61-Q63, Q67-Q69, Q72-Q74

Percent of eligible respondents who took the survey and met criteria for *Perceived Professional Reprisal*, *Perceived Ostracism*, and/or *Perceived Maltreatment*.

Actions Following Negative Behaviors From Leadership or Military Peers

Data found in Table 8 are of respondents who are included in the *Perceived Professional Reprisal*, *Perceived Ostracism*, and/or *Perceived Maltreatment* rate. Of respondents who reported experiencing *Perceived Professional Reprisal* and/or *Perceived Ostracism/Maltreatment*, as a result of the negative behaviors, 80% indicated that they *discussed these behaviors with their friends, family, coworkers, or a professional*, 61% indicated they *discussed these behaviors with a work supervisor or anyone up their chain of command with the expectation that some corrective action would be taken*, 44% indicated they *discussed these behaviors with a work supervisor or anyone up their chain of command to get guidance on what to do*, 23% indicated that they *filed a complaint (for example, with the Inspector General, Military Equal Opportunity Office, commander)*, and 8% indicated that they chose *none of the other actions*.

The percentages presented in this chapter reflect the respondents' perceptions about a negative experience associated with their reporting of a sexual assault and not necessarily a reported or legally substantiated incident of retaliation.

Table 8.***Actions Following Negative Behaviors From Leadership or Military Peers/Coworkers***

Actions Following Negative Behaviors From Leadership or Military Peers	Percent of Eligible Respondents Who Met Criteria For Perceived Professional Reprisal, Perceived Ostracism, and/or Perceived Maltreatment
Discuss these behaviors with your friends, family, coworkers, or a professional?	80%
Discuss these behaviors with a work supervisor or anyone up your chain of command with the expectation that some corrective action would be taken?	61%
Discuss these behaviors with a work supervisor or anyone up your chain of command to get guidance on what to do?	44%
File a complaint (for example, with the Inspector General, Military Equal Opportunity Office, commander)?	23%
None of the other actions	8%
<i>Eligible number of respondents</i>	80

Note. Q79. Percent of eligible respondents who took the survey and met criteria for *Perceived Professional Reprisal, Perceived Ostracism, and/or Perceived Maltreatment*. Respondents were allowed to mark more than one option, and therefore, the sum of subitems does not equal 100%.

Agreement to Bring Allegation to a Case Management Group (CMG) Following Discussion

The Department has made efforts to improve response and reporting opportunities to provide survivors with restorative care and support. Though the military justice process is outside the purview of the SAPR program, SAPR professionals help survivors navigate and participate within the justice process. Therefore, unrestricted sexual assault cases are reviewed monthly at installation Case Management Group meetings (CMGs) where senior commanders ensure that appropriate care and services have been offered, and that cases are progressing through the investigative and military justice processes.

DoDI 6495.02 requires the Services and National Guard Bureau to review new and ongoing sexual assault cases each month within installation CMGs. In FY14, the Secretary of Defense instructed that CMGs also discuss allegations of retaliation, and directed they take action to refer such allegations to the appropriate agency for follow-up. This allows survivors who experience retaliation to receive services, and also provides CMGs better management opportunities of situations where retaliation may be occurring.

As seen in Figure 65, of respondents who experienced negative actions in line with *Perceived Professional Reprisal, Perceived Ostracism, and/or Perceived Maltreatment* and discussed these behaviors with friends, family, coworkers, professionals, a work supervisor, or anyone up their chain of command, 14% indicated yes, they agreed to bring their allegation to a Case

Management Group (CMG), whereas 50% indicated *no*, they did not agree to bring their allegation to a CMG, and 36% indicated they were *not sure*. The eligible number of respondents who answered the question is 72.

Figure 65.

Agreement to Bring Allegation to a Case Management Group (CMG) Following Discussion

Individual With Whom Behaviors Were Discussed With Expectation for Corrective Action

As seen in Figure 66, of respondents who experienced negative actions in line with *Perceived Professional Reprisal*, *Perceived Ostracism*, and/or *Perceived Maltreatment* and discussed these behaviors with a work supervisor or anyone up their chain of command with the expectation that some corrective action would be taken, 57% indicated they discussed the behaviors with *another member in their chain of command*, 51% indicated they discussed the behaviors with their *Senior Enlisted Leader*, 43% indicated they discussed the behaviors with their *immediate supervisor*, 32% indicated they discussed the behaviors with their *unit commander*, and 9% indicated they discussed the behaviors with the *deputy commander (XO)*. The eligible number of respondents who answered the question is 47.

Figure 66.***Individual With Whom Behaviors Were Discussed With Expectation for Corrective Action***

Q81

Percent of eligible respondents who took the survey and met criteria for *Perceived Professional Reprisal/Ostracism/Maltreatment* and Discussed With Expectation for Corrective Action. Respondents were allowed to mark more than one option, and therefore, the sum of subitems does not equal 100%.

Actions Taken in Response to Discussion With Expectation For Corrective Action

Data found in Table 9 are of respondents who are included in the *Perceived Professional Reprisal, Perceived Ostracism, and/or Perceived Maltreatment* rate who discussed these behaviors with a work supervisor or anyone up their chain of command with the expectation that some corrective action would be taken. Of these respondents, 52% indicated as a result of their discussion *they are not aware of any action taken by the person that they told*. Respondents also indicated as a result of their discussion, *the situation continued or got worse for them* (44%), *they were told/encouraged to drop the issue* (42%), *they got help dealing with the situation* (21%), *their leadership took steps to address the situation* (17%), and relatively few (2%) indicated that *the behavior(s) stopped on their own*. In summary, 29% of these respondents indicated they received help or assistance as a result of their discussion of these behaviors.

Table 9.
Actions Taken in Response to Discussion With Expectation For Corrective Action

Actions Taken in Response to Discussion With Expectation For Corrective Action	Percent of Eligible Respondents Who Met Criteria For Perceived Professional Reprisal, Perceived Ostracism, and/or Perceived Maltreatment
You are not aware of any action taken by the person that you told	52%
The situation continued or got worse for you	44%
You were told/encouraged to drop the issue	42%
You got help dealing with the situation	21%
Your leadership took steps to address the situation	17%
The behavior(s) stopped on their own	2%
<i>Eligible number of respondents</i>	48

Note. Q82. Percent of eligible respondents who took the survey, met criteria for *Perceived Professional Reprisal*, *Perceived Ostracism*, and/or *Perceived Maltreatment*, and discussed these behaviors with a work supervisor or anyone up their chain of command with the expectation that some corrective action would be taken. Respondents were allowed to mark more than one option, and therefore, the sum of subitems does not equal 100%.

Respondents Who Reported Experiencing Perceived Professional Reprisal, Perceived Ostracism, and/or Perceived Maltreatment and Chose to File a Complaint

Data found in Table 11 are of respondents who are included in the *Perceived Professional Reprisal*, *Perceived Ostracism*, and/or *Perceived Maltreatment* rate and chose to file a complaint. As a result of filing complaint, respondents indicated *the situation continued or got worse for them*, *they were told/encouraged to drop the issue*, or *they were not aware of any action taken by the person that they told* (all 33%). Fewer respondents indicated that as result of filing a complaint, they got help dealing with the situation (28%), or *their leadership took steps to address the situation* (17%), whereas 6% indicated *the behavior(s) stopped on its own*.

The percentages presented in this chapter reflect the respondents' perceptions about a negative experience associated with their reporting of a sexual assault and not necessarily a reported or legally substantiated incident of retaliation.

Table 10.

Respondents Who Reported Experiencing Perceived Professional Reprisal, Perceived Ostracism, and/or Perceived Maltreatment and Chose to File a Complaint

Respondents Who Reported Experiencing Perceived Professional Reprisal, Perceived Ostracism, and/or Perceived Maltreatment and Chose to File a Complaint	Percent of Eligible Respondents Who Met Criteria For Perceived Professional Reprisal, Perceived Ostracism, and/or Perceived Maltreatment
The situation continued or got worse for you	33%
You were told/encouraged to drop the issue	33%
You are not aware of any action taken by the person that you told	33%
You got help dealing with the situation	28%
Your leadership took steps to address the situation	17%
The behavior(s) stopped on its own	6%
<i>Eligible number of respondents</i>	18

Note. Q83. Percent of eligible respondents who took the survey, met criteria *Perceived Professional Reprisal, Perceived Ostracism, and/or Perceived Maltreatment*, and filed a complaint. Respondents were allowed to mark more than one option, and therefore, the sum of subitems does not equal 100%.

Respondents Who Reported Experiencing Perceived Professional Reprisal, Perceived Ostracism, and/or Perceived Maltreatment and Chose Not to File a Complaint

Data found in Table 11 are of respondents who are included in the *Perceived Professional Reprisal, Perceived Ostracism, and/or Perceived Maltreatment* rate who reported they chose not to file a complaint. Of these respondents, reasons for choosing not to file a complaint included *they were worried that reporting would cause more harm to them than good* (67%), *they did not trust that the process would be fair* (66%), *they did not think anything would be done or anyone would believe them* (59%), *they did not want more people to know and/or judge them* (48%), *they did not know how to report it* (34%), *they were told/encouraged not to file a complaint* (24%), *some other reason* (17%), and very few respondents indicated that they chose not to file a complaint because *the person(s) stopped their behavior* (3%).

Table 11.

Respondents Who Reported Experiencing Perceived Professional Reprisal, Perceived Ostracism, and/or Perceived Maltreatment and Chose Not to File a Complaint

Respondents Who Reported Experiencing Perceived Professional Reprisal, Perceived Ostracism, and/or Perceived Maltreatment and Chose Not to File a Complaint	Percent of Eligible Respondents Who Met Criteria For Perceived Professional Reprisal, Perceived Ostracism, and/or Perceived Maltreatment
You were worried that reporting would cause more harm to you than good	67%
You did not trust that the process would be fair	66%
You did not think anything would be done or anyone would believe you	59%
You did not want more people to know and/or judge you	48%
You did not know how to report it	34%
You were told/encouraged not to file a complaint	24%
Some other reason	17%
The person(s) stopped their behavior	3%
<i>Eligible number of respondents</i>	58

Note. Q84. Percent of eligible respondents who took the survey, met criteria *Perceived Professional Reprisal, Perceived Ostracism, and/or Perceived Maltreatment*, and did not file a complaint. Respondents were allowed to mark more than one option, and therefore, the sum of subitems does not equal 100%.

Relationship Between Individual(s) Who Took Actions and Offender in Report of Sexual Assault

Of interest to the Department, beyond who the individual(s) is who commits these negative actions, is their relationship, if any, to the alleged offender. Of respondents who are included in the *Perceived Professional Reprisal, Perceived Ostracism, and/or Perceived Maltreatment* rate, 65% indicated the individuals committing negative actions were *friends with the identified perpetrator(s)* and 61% indicated they were *in the same chain of command*, whereas 22% indicated the individual(s) was the *same person(s)* and 19% indicated there was *no relationship*. Fewer (9%) indicated they were *not sure* what type of relationship the individual(s) had with the alleged offender. The eligible number of respondents who answered the question is 79.

The percentages presented in this chapter reflect the respondents' perceptions about a negative experience associated with their reporting of a sexual assault and not necessarily a reported or legally substantiated incident of retaliation.

Figure 67.
Relationship Between Individual(s) Who Took Actions and Offender in Report of Sexual Assault

Q85

Percent of eligible respondents who took the survey and met criteria for *Perceived Professional Reprisal/Ostracism/Maltreatment*. Respondents were allowed to mark more than one option, and therefore, the sum of subitems does not equal 100%.

Chapter 5: Overall Military Justice Experience

This section provides information on the respondent's overall experience with the military justice process. This includes details on whether the respondent believed discretion was used in regards to their case (i.e., individuals involved in their case only shared information with people who needed to know), the official actions taken against the alleged perpetrator, their belief about the ease of and their preparedness for the military justice process, whether the respondent would suggest others report their sexual assault, and whether they requested and received an expedited transfer. Results are presented for respondents at the Total DoD level.

Extent Respondents Felt Up to Date on the Progress of the Case

Analysis of the 2015 MIJES revealed that some respondents did not feel that they had been kept up to date on the progress of their case. In response, the 2016 MIJES asked respondents to indicate the overall extent to which they felt that had been kept up to date on the progress of their case. As seen in Figure 68, 41% indicated during the military justice process they were kept up to date on the progress of their case to a *large extent/very large extent* and 51% indicated they had been kept up to date to a *small extent/moderate extent*, whereas 8% indicated they were *not at all* kept up to date on the progress of their case. The eligible number of respondents who answered the question is 221.

Figure 68.
Extent Respondents Felt Up to Date on the Progress of the Case

Individuals or Services Which Provided Majority of Information About the Progress of the Case

Respondents who indicated they felt they had been kept up to date on the progress of their case during the military justice process to a large extent/very large extent were asked which individuals or services provided them with the majority of that information. As seen in Figure 69, the top three individuals or services which provided the majority of information about the progress of their case were SAPR provided resources or SVCs/VLCs: 53% of these respondents indicated the SVC/VLC provided the majority of information about the progress of the case, 16% the UVA/VA provided the majority of information, and 12% indicated the SARC provided the majority of information. The eligible number of respondents who answered the question is 90.

Figure 69.

Individuals or Services Which Provided Majority of Information About the Progress of the Case

Q87

Percent of eligible respondents who felt they were kept up to date on the progress of their case to a large extent or very large extent.

Overall, 1% of respondents who indicated they had been kept up to date on the progress of their case during the military justice process to a large extent/very large extent indicated that another individual or service than the ones listed provided them with the majority of information about the progress of their case. These respondents were asked to specify the other individuals or services, however, as there were three respondents who chose to specify, themes are not reportable.

Assessment of Discretion Used

As seen in Figure 70, the majority of respondents indicated they **agreed** that *their Special Victims' Counsel or Victims' Legal Counsel (SVC/VLC; 88%), their Uniformed Victim Advocate*

(UVA) or Victim Advocate (VA; 85%), their Sexual Assault Response Coordinator (SARC; 82%), used discretion in sharing details of their case. Respondents indicated to a lesser degree that they **agreed** that the military trial counsel (74%), the military criminal investigator(s) (72%), their Victim Witness Assistance Provider (VWAP; 68%), their unit commander/director (64%), their senior enlisted advisor (for example, First or Master Sergeant, Chief Petty Officer; 57%) and their immediate supervisor (55%) used discretion.

Overall, respondents indicated they **disagreed** that their immediate supervisor (30%), their senior enlisted advisor (for example, First or Master Sergeant, Chief Petty Officer; 28%), their unit commander/director (24%), their Victim Witness Assistance Provider (VWAP; 11%), the military criminal investigator (11%), the military trial counsel (8%), their Sexual Assault Response Coordinator (SARC; 8%), their Uniformed Victim Advocate (UVA) or Victim Advocate (VA; 8%), and/or their Special Victims' Counsel or Victims' Legal Counsel (SVC/VLC; 5%) used discretion. The eligible number of respondents who answered the question ranges from 82-213. Results exclude those who indicated "Not applicable."

Figure 70.
Assessment of Discretion Used

Q88

Percent of all respondents who took the survey.

Charges Preferred Against the Alleged Perpetrator⁴¹

As seen in Figure 71, overall, 57% of respondents indicated *yes*, charges were preferred against the perpetrator, whereas 34% indicated *no*, charges had not been preferred and 9% indicated they were *unable to recall*. The eligible number of respondents who answered the question is 221.

⁴¹ References to perpetrator/offender throughout this section should be interpreted as "alleged perpetrator" or "alleged offender" as without knowing the specific outcomes of particular allegations, the presumption of innocence applies unless there is an adjudication of guilt.

Figure 71.
Charges Preferred Against the Alleged Perpetrator

Article 32 Preliminary Hearing on Case

As seen in Figure 72, overall, 48% of respondents indicated *yes*, there was an Article 32 preliminary hearing on their case, whereas 28% indicated *no*, and 23% indicated they were *unable to recall*. The eligible number of respondents who answered the question is 219.

Figure 72.
Article 32 Preliminary Hearing on Case

Satisfied With the Charges Preferred Against the Alleged Perpetrator

Respondents who indicated charges were preferred against the perpetrator or were not able to recall if charges had been preferred and indicated there was an Article 32 hearing on their case were asked whether they were satisfied with the charges that were preferred against the perpetrator. As seen in Figure 73, 43% of these respondents indicated *yes, the charges were what they had expected*, whereas 1% indicated *no, they were more severe than they had expected*, 45% indicated *no, they were less severe than they had expected*, and 10% indicated *they did not have any expectations*. The eligible number of respondents who answered the question is 86.

Figure 73.

Satisfied With the Charges Preferred Alleged Against the Perpetrator

Perceived Action(s) Taken Against the Alleged Perpetrator

As seen in Figure 74, overall, 25% of respondents indicated there was *no action taken against the perpetrator* and 23% indicated they *did not know what final action was taken against the perpetrator*. Other respondents indicated the official action(s) taken against the alleged perpetrator included *administrative discharge or resignation in lieu of court-martial (Chapter 4, Discharge in Lieu of Court Martial [DILO]/Resignation in Lieu of Court Martial [RILO]; 17%); administrative action (for example, Letter of Counseling [LOC], Letter of Admonishment [LOA], Letter of Reprimand [LOR]; 14%); non-judicial punishment (Article 15; 13%); court-martial conviction for some other offense (not sexual assault; 11%); court-martial conviction for a sexual assault offense (9%); and/or court-martial acquittal for all offenses (6%)*. Overall, 68%

of respondents who knew if action had been taken indicated that an official action was taken against the alleged perpetrator.⁴² The eligible number of respondents is 218.

Figure 74.
Perceived Action(s) Taken Against the Perpetrator

Q92

Percent of all respondents who took the survey. Respondents were allowed to mark more than one option, and therefore, the sum of subitems does not equal 100%.

Satisfaction With Official Action(s) Taken Against the Alleged Perpetrator

As seen in Figure 75, 20% of respondents indicated that they were *satisfied* with the official action(s) taken against the alleged perpetrator, whereas 61% indicated that they were *dissatisfied*. The eligible number of respondents who answered the question is 219.

⁴² This percentage is out of those respondents who knew whether there was an official action taken, therefore percentages in chart will not add up to 68%.

Figure 75.
Satisfaction With Official Action(s) Taken Against the Alleged Perpetrator

Ease of Military Justice Process

As seen in Figure 76, 68% indicated they felt the military justice process was *difficult/very difficult*, whereas 15% indicated that the process was *easy/very easy*. The eligible number of respondents who answered the question is 220.

Figure 76.
Ease of Military Justice Process

Helpful Resources During Challenging Times

Overall, 68% of respondents indicated that the military justice process was difficult or very difficult. These respondents were asked what helped them the most during the challenging times. Of these respondents, 135 indicated a variety of supports that helped them through the military justice process during challenging times. Three of the most frequently mentioned services and groups that helped were their *family and friends*, the *SVC/VLC*, and *mental health providers and counselors*. Examples of these top three groups include the following quotations.

Family and friends

- *“My friends who I could trust helped me through emotionally and my personal courage to ignore all the negativities around me. I felt like I was alone and I could not trust anyone but few.”*
- *“Honestly the only thing that helped me was my family; no other support offered was helpful to me.”*
- *“Support group of friends that I could talk to.”*
- *“Having family as my support and having a few friends that knew what was happening that gave me support.”*

SVC/VLC

- *“Victims legal counsel; I knew that he had my back when my chain of command did not.”*
- *“Having a SVC that actually cared about my well-being and my case was the only support system throughout the justice system.”*
- *“My VLC was most helpful, always maintaining contact with me, and making sure that I was in a good place (mentally) and taking care of myself.”*
- *“I would have to say my SVC helped me the most, in getting myself out of the extremely toxic and debilitating work environment.”*

Mental health providers and counselors

- *“At my next and current duty station, the mental health providers have been tremendously helpful in giving me a peace of mind and guidance on the process and helped me find closure.”*
- *“The availability to go to Behavior Health.”*
- *“The thing that helped me the most was the Fleet and Family Center. I was attending therapy sessions there.”*

Of note, several respondents also indicated that *nothing* was able to help them. Examples of this are provided in the following quotations:

Nothing

- *“Nothing. The entire process was extremely stressful, uninformative. No one helped with anything and I still don’t know what happened.”*
- *“Nothing! I was left to fend for myself. All of my ‘friends’ abandoned me. Leadership was terrible and made their disdain for me public.”*
- *“There was nothing that helped me.”*

Overall, 15% of respondents indicated that the military justice process was easy or very easy. These respondents were asked to specify what helped make the process easier for them. Of these respondents, 31 indicated a variety of supports that helped make the military justice process easier. The most frequently mentioned groups included the *SVC/VLC*, which was also one of the top cited resources for those who found the military justice process difficult or very difficult, as well as *SAPR services* (e.g., UVA/VA, SARC). Respondents also indicated that *staying informed* about their case made the process easier. Examples of these top three groups include the following quotations:

SVC/VLC

- *“Hav[ing] the VLC and the support of the SARC was the most helpful. I would not have taken my report from restricted to unrestricted without the VLC. I felt comfortable that my interests were being looked after and that I understood what could happen because of the VLC.”*
- *“My SVC was the most amazing legal representative in and out of the court room.”*

SAPR services

- *“Having my Victim Advocate with me every step of the way. He made sure I was okay and that all my needs were met, and also made sure to keep me up to date on everything that happened.”*
- *“The cooperation of the SARC personnel, AFOSI, Victim Advocate, and SVC. These individuals kept me up to date, made sure my well-being was at the forefront of the investigation, and kept the discretion private even though it was an unrestricted report. I commend them all on their expertise and professionalism.”*

Staying informed

- *“Being informed throughout the process, though not consistently, but enough to keep my updated on what was going on really helped.”*
- *“The fact that I was aware of everything going on. The communication between myself and the others that were involved with my case.”*

Most Helpful Resources Received During Military Justice Process

All respondents were asked to specify which services they found to be most useful to them during the military justice process and indicated a variety of services that were found to be the most helpful during the military justice process. Similar to the prior section, the most frequently mentioned services indicated to be the most helpful were the *SVC/VLC*, the *SARC*, and the *UVA/VA*, as well as *mental health providers*. Examples of these top themes include the following quotations:

SVC/VLC

- *“The SVC was incredible. I cannot thank him enough for the work that he did.”*
- *“The absolute most helpful service throughout the entire ordeal was my SVC. He was the only person in the entire system that was worth while and had even an ounce of empathy.”*
- *“The SVC especially helped encourage me to make the report because I felt more at ease knowing that there was somebody on my side to help me with all of the legal aspects of the case.”*
- *“My SVC. He helped me through the entire process, was understanding and caring, and ultimately was on my side when everyone else wasn’t.”*
- *“Victim legal counsel—they had the most answers.”*

SARC

- *“I found my SARC to be the most helpful. She even made herself available to answer my questions while on vacation.”*
- *“MY SARC was phenomenal.”*
- *“The SARC office was amazing and very comforting during the whole process.”*
- *“I found that the monthly updates from the SARC and my unit [ORANK] were most helpful. I know everyone is busy and it’s a hassle to do that every month but it really meant a lot to me while I was going through the investigation and waiting for it to be over.”*

UVA/VA

- *“The availability of my Victim Advocate was the most/only helpful service.”*
- *“My initial Victim Advocate who was there when I was being treated. Whenever I needed her, she was there.”*
- *“My VA was very supportive and moved quickly on my behalf, and she did not judge me... very encouraging.”*
- *“I appreciated how the VA could be the only person I talk to. It took away a lot of stress and re-hashing everything to multiple people.”*
- *“My civilian Victim Advocate, and all her support is what kept me going, when I wanted to quit.”*

Mental health providers

- *“The SARC referred me to a therapist immediately following the assault. She was phenomenal and made the recovery process much smoother.”*
- *“Being able to see a counselor to help me find outlets for my anger, and ways to cope with my depression.”*
- *“Being able to go to Behavior Health to speak to someone about how I was feeling.”*
- *“Counseling; the only time I wasn’t worried about something happening to me.”*

Of note, several respondents also indicated that *nothing* was helpful. Examples of this are provided in the following quotations:

Nothing

- *“Nothing. There was no update on the case and I was told months later that the case was closed without updating on the result.”*
- *“None of them. I found NONE of them to be helpful.”*
- *“I found nothing to be helpful to me. I was treated terrible throughout the process, and moved to a new unit where they were instructed to continue the terrible treatment. There was no justice for me and I fear that I am not the only one who had an experience like that or will be the only one in the future.”*
- *“Nothing, I felt like the person in the wrong.”*
- *“I don’t feel like I got all the help I could have gotten because I PCS’d.”*
- *“I did not find many of the services provided from the military during the military justice process helpful.”*
- *“I do not think any service was helpful. [There] were a lot of questions that went unanswered and I was left in the dark concerning my case and the process. I also did not receive a lot of support which left me feeling overwhelmed.”*

Least Helpful Resources Received During the Military Justice Process

All respondents were asked to specify which services they received during the military justice process were found to be least useful to them and indicated a variety of services that were found to be the least helpful during the military justice process. The most frequently mentioned services indicated to be the least helpful were members of their *command* (e.g., leadership, supervision) and the *military criminal investigator*. Examples include the following quotations:

Command

- *“Being told to ‘get over it’, ‘it could be a lot worse,’ and to ‘stop using sexual assault as a crutch’ by command.”*
- *“My chain of command handled everything so poorly. The way they intimidated me shortly after the incident really messed up all the events following.”*
- *“My entire chain of command was not helpful.”*
- *“Not so much a ‘service,’ but my squadron leadership was so uneducated and inexperienced in the SA realm that it damaged the entire squadron.”*

Military criminal investigator

- “The NCIS agent assigned to my case was very judgmental and I believe her opinions undermined her reports and the overall investigation.”
- “CID, one CID agent said ‘She’s lying, it didn’t happen’ They didn’t believe me from the start, I didn’t want to report, but I just couldn’t live with myself if I didn’t.”
- “Talking to the investigators. They were extremely intimidating and I got the feeling they were judging me. They weren’t nice at all.”
- “My investigator was rude in the extreme, belittled my experience, and believes that over 70% of sexual cases are lies.”

Preparedness for the Military Justice Process

As seen in Figure 77, 41% of respondents indicated that based on the services provided, they felt *well prepared/very well prepared* for the military justice process, whereas 23% felt *poorly prepared/very poorly prepared*. The eligible number of respondents who answered the question is 219.

Figure 77.
Preparedness for the Military Justice Process

The 23% of respondents who indicated that they were *poorly prepared* or *very poorly prepared* for the military justice process were asked to specify what could have helped to better prepare them and indicated a variety of things that could have helped to better prepare them for the

military justice process. The most frequently mentioned aspects that could potentially have helped to better prepare respondents for the military justice process include *better explanation of the military justice process and their rights*, and *better support* overall. Examples of these top aspects include the following quotations:

Better explanation of the military justice process and their rights

- *“I think that whenever a Soldier files an unrestricted report that they should be given information on how the justice process works, and about how much time each leg of the journey takes. When I filed my report I had no idea what would happen next. A flow chart would be so helpful.”*
- *“A class explaining the painful process.”*
- *“While SHARP classes discuss how to file a report, they rarely delve into what it is like to make a report and the commitment that comes with it. At many points in time, the process was so painful and I wished I could go back and not make a report.”*
- *“Knowing my rights as a person who was going through with an unrestricted complaint. I found that I was unprepared for how I would be question[ed] and portrayed during the proceedings.”*

Better support

- *“Support and having more information with the process of my case. I did not have support from my leadership nor SARC. I do not feel like I had any support all around which led to me dropping the case because it was all becoming overwhelming.”*
- *“More support from the command and VA.”*
- *“Have leadership that actually cared about the process.”*

Individuals and/or Services Beneficial in Preparing for the Military Justice Process

As seen in Figure 78, respondents who indicated they were *well prepared* or *very well prepared* for the military justice process were asked who was beneficial in preparing them for the military justice process. Overall, 69% indicated the *Special Victims’ Counsel or Victims’ Legal Counsel (SVC/VLC)*, 53% indicated the *Sexual Assault Response Coordinator (SARC)*, 50% indicated the *Uniformed Victim Advocate (UVA) or Victim Advocate (VA)*, 35% indicated the *military trial counsel*, 30% indicated the *mental health provider (for example, counselor)*, 23% indicated the *military criminal investigator(s)*, 15% indicated *their unit commander*, 14% indicated *their*

senior enlisted advisor (for example, First or Master Sergeant, Chief Petty Officer), 12% indicated their immediate supervisor, 10% indicated the chaplain, 8% indicated another individual or service, 8% indicated the medical provider, not for mental health needs (for example, someone from a military medical treatment facility or civilian treatment facility), and 3% indicated their Victim Witness Assistance Provider (VWAP) were beneficial in preparing them for the military justice process. Eligible number of respondents who answered the question is 86.

Figure 78.

Individuals and/or Services Beneficial in Preparing for the Military Justice Process

Q100

Percent of eligible respondents who took the survey and indicated they were well prepared or very well prepared for the military justice process. Respondents were allowed to mark more than one option, and therefore, the sum of subitems does not equal 100%.

As seen in Figure 78, 8% of respondents indicated they were *well prepared* or *very well prepared* for the military justice process and were supported by some other resource. These respondents were asked to specify what other individuals and/or services were beneficial in preparing them for the military justice process and indicated a variety of individuals and/or services that were beneficial in preparing them for the military justice process, other than the resources listed for them in the question text. The most frequently mentioned “other” individuals and/or services were their *family and friends*. Examples of these include the following quotations:

Family and friends

- “Husband.”
- “My friends and family, but also some supervision that really helped me get through this.”
- “My husband helped me cope with my anxiety.”
- “Family and Friends.”

Would Recommend Others Who Experience a Sexual Assault Make a Report

As seen in Figure 79, when asked whether they would recommend to another survivor to make a report, 51% of respondents indicated *yes, an unrestricted report*, 26% indicated *yes, a restricted report*, and 23% indicated *no*. Eligible number of respondents who answered the question is 213.

Figure 79.

Would Recommend Others Who Experience a Sexual Assault Make a Report

Opportunities to Help Future Military Members Who Bring Forward a Report of Sexual Assault Through the Military Justice Process

All respondents were asked to specify what the DoD could do to help future military members through the military justice process and they suggested a variety of ways that the Department could employ to help future military members through the military justice process. The most recommended course of action for the Department is *training*, specifically training which

encompasses the unit level, command and leadership, investigators, trial team, and other members working on sexual assault issues.

Improve training

- *“Train our senior leaders. I’ve seen [ORANK] make or break a case, by their influence alone. We need to train them on common traits of perpetrators (like that they’re often very well-liked Soldiers), how not to victim blame, and how to take care of Soldiers that they may not like (since this is such a common occurrence).”*
- *“The DoD needs to make it very clear to their employees that sexual assault is not the fault of the victim. DoD needs to train their military criminal investigators to better handle a victim of sexual assault. They can be unbiased and show compassion, there is no reason why the victim should feel like they are the perpetrator. It’s already horrific enough to experience a sexual assault without having to be treated like you’re a criminal for reporting your assault.”*
- *“Military lawyers need more experience in court cases, they’re all afraid of trying a case because they’re afraid to have a loss on their record.”*
- *“Better educate military members and leadership of how to handle and support airmen going through the military justice process.”*
- *“Provide more training to military lawyers.”*
- *“Make sure the NCIS agents handling the cases have better sensitivity training when it comes to dealing with victims of sexual assault.”*

Other recommendations include *enforcement of confidentiality and discretion, offering legal assistance outside of the military justice process, keeping the survivor informed about the progress of their case, and making the whole process faster.*⁴³

Expedited Transfer

Military members who make an unrestricted report of sexual assault have the option to request an expedited transfer to another unit/installation. Per policy, military members who make a report should be informed of this option by their SARC or UVA/VA at the time they make their report. This request may extend to either a temporary or permanent expedited transfer from their assigned command or installation to a different command or installation, or a temporary or

⁴³ Further analysis of these findings is presented in Chapter 6.

permanent expedited transfer to a different location within their assigned command or installation.⁴⁴

Received an Expedited Transfer

43% of respondents indicated that they requested and received an expedited transfer as a result of their report of sexual assault.

The eligible number of respondents who answered the question is 218. The remaining items in this section are of this 43%.

Aspects of Life Following Expedited Transfer

As seen in Figure 80, of respondents who requested and received an expedited transfer, compared to the time before they were transferred, their *living situation* (69%), *treatment by leadership* (61%), *treatment by peers* (59%), *social support* (56%), *medical/mental health care* (51%), and their *career progression* (47%) were **better** than before. Of respondents who requested and received an expedited transfer, compared to the time before they were transferred, their *career progression* (22%), *medical/mental health care* (16%), *social support* (16%), *treatment by leadership* (12%), *treatment by peers* (10%), and their *living situation* (10%) were **worse** than before. The eligible number of respondents who answered the question ranges from 85-91. Results exclude those who indicated “Not applicable.”

⁴⁴ 32 CFR 105.4 - Policy.

Aspects of Life Following Expedited Transfer

Q104

Percent of eligible respondents who took the survey and received an expedited transfer.

Chapter 6: Additional Analysis

The *MIJES* is a valuable tool for understanding survivors' experiences in order to make improvements to the military justice process. Qualitative analysis of open-ended questions on the *2016 MIJES* revealed recommendations for opportunities to help future military members who bring forward a report of sexual assault through the military justice process. In response to these recommendations, additional analyses were performed to gain better insight into respondents' experiences with the military justice process. This chapter describes analyses performed on items that might be beneficial to the Department to better understand the types of experiences respondents have and the impact these particular influences play in determining how members who make a report of sexual assault feel about the military justice process. Estimates reported in this chapter will reflect a "merged" dataset combining parallel data from the *2016 MIJES* and *2015 MIJES* administrations. The merged dataset not only provides a larger sample to analyze, but allows for more in-depth observation of differences between fiscal years.

Military members represented in the *2016 MIJES* may have made a report any time between October 2013 and March 2016. In this chapter, findings will be presented by fiscal year as they provide a more complete picture for the Department to use. The combined analysis is out of 593 respondents, and a full breakout of demographics is provided in Table 12. However, all differences between fiscal years should be interpreted with caution as they are only averages of responses from military members who chose to participate in the survey. As data in the survey were not scientifically weighted, statistical calculations should be interpreted with caution as they are not generalizable to the population. All statistical analyses were performed using SAS® and confirmed using Stata®. All statistical tests were compared against a p value of .05.

Table 12.

Number of Eligible Respondents by Reporting Category for 2015 MIJES and 2016 MIJES Administrations

	2015 MIJES Count	2015 MIJES Percent	2016 MIJES Count	2016 MIJES Percent	Combined Count	Combined Percent
Total DoD	323	100%	225	100%	548	100%
Gender						
Men	39	12%	22	10%	61	11%
Women	284	88%	201	89%	485	89%
Service/Component						
Army	107	33%	77	34%	184	34%
Navy	72	22%	44	20%	116	21%
Marine Corps	31	10%	24	11%	55	10%
Air Force	102	32%	68	30%	170	31%
National Guard	9	3%	10	4%	19	3%
Age						
24 Years Old and Younger	132	41%	80	36%	212	39%
25-33 Years Old	146	45%	107	48%	253	46%
34 Years Old and Older	45	14%	37	16%	82	15%
Time When Report Was Made						
Pre-FY14	134	41%	21	9%	155	28%
FY14	152	47%	87	39%	239	44%
FY15	34	11%	99	44%	133	24%
FY16	NA	NA	16	7%	16	3%

Note. Some reporting category percentages may not add up to 100% due to item nonresponse and/or rounding. Respondents who were not currently uniformed military members, whose report did not result in a criminal investigation by an MCIO, whose alleged perpetrator was not a military member, and who chose not to participate in the investigation or military justice process were ineligible (2015 MIJES Q1, Q10, Q11, Q14; 2016 MIJES Q1, Q10, Q11, Q16).

Decision to Recommend to Others to Make a Report

One question of interest to the Department is whether the respondent would recommend to another survivor to make a report, either restricted or unrestricted. This item can be perceived as an overall barometer for how well the Department is doing and the effectiveness of the investigative and military justice process. In both survey administrations, **77%** of respondents indicated they would recommend others who experience a sexual assault to make a report. As this item is potentially a useful gauge for satisfaction with the military justice process, ad hoc analyses were performed on it to investigate the impact of specific topics, particularly those

discussed in open-ended comments where respondents were asked to specify what the Department could do to help future military members through the military justice process.

Speed of Military Justice Process

One recommendation made, in both survey administrations, was for the Department to improve the military justice process by **making the whole process faster**.

“Let the process be faster so there isn’t a long drawn out process constantly reminding you of what happened... I want it over with.”

“Make the investigation go faster/smoothen... The longer the investigation takes, the longer the entire process takes and the worse it is for the victims, the harder it is for them to move on.”

Measuring how long the full military justice process takes for respondents is somewhat difficult as OPA strives to maintain the anonymity of each respondent. As described in Chapter 2, respondents were asked to indicate the time frame that most accurately represents when they reported their sexual assault. For the 2015 and 2016 survey administrations, respondents could indicate that their report was made *between 1 October 2015–30 September 2016* (FY16), *between 1 October 2014–30 September 2015* (FY15), *between 1 October 2013–30 September 2014* (FY14), and *before 1 October 2013* (pre-FY14).

The time frame in which a case is entered into DSAID (which is an inclusion criterion for the survey) serves as a rough estimate for when a case was closed, though there may be a delay in entering this information into DSAID, and OPA cannot independently assure that information is entered immediately after the case is closed. However, for the purposes of this analysis, to determine an estimate for the overall speed of the military justice process, the time frame for when the respondent indicated making their initial report was compared to survey administration year.

As seen in Table 13, overall speed of the military justice process was broken into three categories: fast, moderate, and slow. Cases that began more than two years prior to entry into DSAID are classified as **slow** resolution and account for **242** cases between the 2015 and 2016 administration (3 cells highlighted in red); cases that began a year prior to entry into DSAID are classified as **moderate** resolution and account for **251** cases (2 cells highlighted in yellow); cases that began and resolved within a year are classified as **fast** resolution and account for **50** cases (2 cells highlighted in green).

Table 13.
Number of Respondents for Survey Administration Year, by Time When Report Was Made

	Pre-FY14	FY14	FY15	FY16
2015 MIJES	134	152	34	NA
2016 MIJES	21	87	99	16

Figure 81 displays estimates for respondents who indicated they would recommend to a survivor to make a report by the speed of their military justice process. Overall, the choice to recommend does not appear to vary by speed of case resolution; 79% of respondents who had a fast case resolution would recommend reporting, whereas 78% who had a moderate case resolution and 76% who had a slow case resolution would recommend reporting. Chi square analysis confirmed that there was no association between the speed of the military justice process and the decision to recommend to another survivor to report $\chi^2(1) = .33, p > .05$ (Table 14). Therefore, though many respondents indicated that they were displeased with the length of the military justice process in the open-ended comments, speed appears to have very little influence on their decision to recommend reporting to another survivor.

Figure 81.

Recommendation to Make a Report by Speed of Military Justice Process

Table 14.

Number of Eligible Respondents for Analysis of Overall Speed of Military Justice Process and Recommendation to Make a Report

	Slow Resolution	Moderate Resolution	Fast Resolution
Recommend Yes	173	186	37
Recommend No	55	53	10

Note. Numbers of respondents are of those who endorsed an option for each speed category of the military justice process and whether they would recommend to another survivor to make a report.

Discretion Used

Several respondents specified that stronger **enforcement of confidentiality and discretion** was needed for the Department to help future military members through the military justice process.

“I think that the process could be kept more confidential. I am not sure what happened but everyone knew my business after my assault. It made it all worse because that’s when the harassment and rumors started.”

“The chain of command did not help by week one of the reporting the entire brigade knew what was going on. The victim ends up becoming twice a victim because of the judging and humiliation that comes along with reporting and no one believing you.”

Disclosure of a sexual assault is a challenging decision for many survivors as control over personal information is given to individuals who might not hold their information with an appropriate amount of discretion. In both survey administrations, the majority of respondents indicated they *agreed* that SAPR-specific resources (e.g., SVC/VLC, UVA/VA, SARC) used discretion in sharing details of their case, whereas more than one-quarter of respondents *disagreed* that members of their command (e.g., immediate supervisor, senior enlisted advisor, unit commander/director) used discretion. As such, identifying the impact of discretion used by individuals who have been provided details about a sexual assault report, specifically members of command, is of interest.

Figure 82 displays estimates for respondents who indicated they would recommend to a survivor to make a report by the agreement that their unit commander used discretion. Overall, choice to recommend appears to vary by agreement that discretion was used by members of command; a higher percentage of respondents recommend reporting if they perceived that members of their command used discretion. Chi square analyses confirmed a significant association between agreement that discretion was used by their *unit commander* and the decision to recommend $\chi^2(4) = 25.56, p < .05$, between agreement that discretion was used by their *senior enlisted advisor* and the decision to recommend $\chi^2(4) = 16.35, p < .05$, and between agreement that discretion was used by their *immediate supervisor* and the decision to recommend $\chi^2(4) = 24.04, p < .05$ (Table 15). Therefore, it appears that the perception of members of command using discretion about details of their case influences a respondent’s decision to recommend reporting to another survivor.

Figure 82.***Recommendation to Make a Report by Discretion Used by Members of Command*****Table 15.*****Number of Eligible Respondents for Analysis of Discretion Used by Members of Command and Recommendation to Make a Report***

		Strongly Disagreed Used Discretion	Disagreed Used Discretion	Neither Agreed Nor Disagreed	Agreed Used Discretion	Strongly Agreed Used Discretion
Unit Commander	Recommend Yes	38	31	46	94	170
	Recommend No	30	13	14	26	30
Senior Enlisted Advisor	Recommend Yes	52	32	57	72	144
	Recommend No	27	16	14	21	24
Immediate Supervisor	Recommend Yes	55	27	55	72	136
	Recommend No	28	17	21	14	20

Note. Numbers of respondents are of those who endorsed an option for agreement that a member of their command used discretion and whether they would recommend to another survivor to make a report.

Overall Preparedness for Military Justice Process

Overall, 207 respondents indicated they were well prepared/very well prepared for the military justice process, whereas 120 respondents indicated they were poorly prepared/very poorly prepared. Several open-ended responses specified **keeping the survivor informed about the progress of their case and preparation for the military justice process** was needed for the Department to help future military members through the military justice process.

“Contact them with details of their case, and explain fully the process they are going through.”

“Keep them up to date on what is going on with the process and be certain that the soldier has a POC if things continue to happen in response to the report.”

Figure 83 displays estimates for respondents who indicated they would recommend to a survivor to make a report by overall preparedness for the military justice process. Overall, for respondents who indicated they were well prepared/very well prepared, the percentage who would recommend to a survivor to make a report was higher than for those who indicated they were poorly prepared/very poorly prepared for the military justice process. Therefore it would appear that preparation for the military justice process influences the decision to recommend. Chi square analysis confirmed a significant association between preparedness for the military justice process and the decision to recommend $\chi^2 (4) = 29.61, p < .05$ (Table 16). Therefore, preparedness appears to have a significant influence on their decision to recommend reporting to another survivor.

Figure 83.

Recommendation to Make a Report by Overall Preparedness for Military Justice Process

Table 16.

Number of Eligible Respondents for Analysis of Overall Preparedness for Military Justice Process and Recommendation to Make a Report

	Very Poorly Prepared	Poorly Prepared	Neither Well Nor Poorly Prepared	Well Prepared	Very Well Prepared
Recommend Yes	27	45	155	124	46
Recommend No	25	22	42	22	8

Note. Numbers of respondents are of those who endorsed an option for preparedness for the military justice process and whether they would recommend to another survivor to make a report.

Satisfaction With Perceived Action(s) Taken Against the Alleged Perpetrator

Overall, 116 respondents indicated they were satisfied/very satisfied with the official action(s) taken against the perpetrator, whereas 304 respondents indicated they were dissatisfied/very dissatisfied. Qualitative comments also revealed that some respondents specified **harsher punishments for perpetrators** were needed for the Department to help future military members through the military justice process.

“I don’t think the perpetrators punishment was enough but I settled with what they offered to go for since I was not mentally or emotionally strong enough to go to the court trial and testify.”

“Make sure the person who did the assaulting got a[n] appropriate punishment. I have developed depression and panic attacks from this and I will suffer with this pain for life and [alleged offender] is still in the military.”

Figure 84 displays estimates for respondents who indicated they would recommend to a survivor to make a report by their satisfaction with the official action(s) taken against the perpetrator. Overall, for respondents who indicated they were satisfied/very satisfied, the percentage who would recommend to a survivor to make a report was higher than for those who indicated they were dissatisfied/very dissatisfied with the official action(s) taken against the alleged perpetrator. Therefore it would appear that satisfaction with the official action(s) taken against the alleged perpetrator influences the decision to recommend. Chi square analysis confirmed a significant association between satisfaction with the official action(s) taken against the perpetrator and the decision to recommend $\chi^2(4) = 51.96, p < .05$ (Table 17). Therefore, satisfaction with official action(s) taken against the alleged perpetrator appears to have a significant influence on a respondent’s decision to recommend reporting to another survivor.

Figure 84.

Recommendation to Make a Report by Satisfaction With Perceived Action(s) Taken Against the Perpetrator

**Table 17.**

Number of Eligible Respondents for Analysis of Satisfaction With Perceived Action(s) Taken Against the Perpetrator and Recommendation to Make a Report

	Very Dissatisfied With Action(s)	Dissatisfied With Action(s)	Neither Satisfied Nor Dissatisfied	Satisfied With Action(s)	Very Satisfied With Action(s)
Recommend Yes	134	59	97	73	33
Recommend No	77	24	12	3	3

Note. Numbers of respondents are of those who endorsed an option for satisfaction with official action(s) taken against the perpetrator and whether they would recommend to another survivor to make a report.

Expedited Transfer

Overall, 211 respondents between the two survey administrations indicated that they had requested and received an expedited transfer. Though not one of the most frequent recommendations, several respondents indicated that expedited transfers are something that would be useful for future survivors, especially if the alleged perpetrator is in his/her unit.

“If the perpetrator is in the same workplace, remove the victim immediately. Send them PCA or TDY for the entirety of the military investigation. Ensure that they know they have the right to an Expedited Transfer.”

Figure 85 displays estimates for respondents who indicated they would recommend to a survivor to make a report by whether they received an expedited transfer. Overall, whether a survivor requests and receives an expedited transfer does not appear to impact choice to recommend; 74% of respondents who received an expedited transfer would recommend reporting, whereas 79% of respondents who did not receive an expedited transfer would recommend reporting. To confirm, using chi square analysis, no significant association was found between receiving an expedited transfer and the decision to recommend to another survivor to report $X^2(1) = 2.21, p > .05$ (Table 18). Though the opportunity to receive an expedited transfer is intended to help survivors reestablish a safe place, receiving a transfer does not influence their decision to recommend reporting to another survivor.

Figure 85.

Recommendation to Make a Report by Receiving an Expedited Transfer

Table 18.

Number of Eligible Respondents for Analysis of Receiving an Expedited Transfer and Recommendation to Make a Report

	Transferred Received	Did Not Receive Transfer
Recommend Yes	150	247
Recommend No	54	65

Note. Numbers of respondents are of those who endorsed an option for received an expedited transfer and whether they would recommend to another survivor to make a report.

Summary of Analysis

Qualitative analysis of open-ended questions on the *2016 MIJES* yielded several suggestions for opportunities to help future military members who bring forward a report of sexual assault through the military justice process. Analysis was performed to determine whether these qualitative recommendations were supported by the quantitative data collected in the survey. These analyses were not performed to invalidate the suggestions, but to determine the overall impact these issues may have on perceptions about whether a respondent would choose to recommend to another survivor to make a report. Using chi square analysis, the amount of discretion used by members of their command, being well prepared for the military justice process, and satisfaction with the perceived action(s) taken against the perpetrator all had significant relationships on whether a respondent would recommend another survivor make a report. While the analysis did not show a relationship between the speed of the military justice process and willingness to recommend another survivor make a report, we were limited in the ability to classify the speed of the case.

Other suggestions which were not analyzed include perceptions of training and being kept up to date with the progress of the case. Analysis of these items was not possible as specific items were not asked on the previous administration of the survey. A future consideration is to include a question on the next administration of the survey which asks members about their perception of how well personnel that they interact with have been trained. Another consideration for analysis is to investigate whether respondents felt they were kept up to date on the progress of their case; more data will be available on this topic on the merged dataset in 2017. However, discussion about the information on the progress of respondents' cases from the *2016 MIJES* is provided in Chapter 7.

Chapter 7: Discussion

Summary of Findings

The results of *2016 MIJES* presented in this report represent the culmination of an extensive effort by OPA to assist the Department in assessing the investigative and legal processes/services experienced by military members who have made a report of sexual assault. The opinions and experiences measured in *2016 MIJES* are often quite private, and therefore difficult to gauge through measurement methods that involve direct observation or analyses of program data. While all surveys have limitations in scope, the *2016 MIJES* is a valuable tool for the Department to evaluate its SAPR programs/resources, as well as command and their combined utility in assisting survivors through the military justice process.

The findings from this assessment are beneficial in revealing what is working for military members who bring forward a report of sexual assault, and what can be improved. As in the 2015 administration, the *2016 MIJES* revealed that overall, respondents were most satisfied with their experiences with SVCs/VLCs and SAPR resources (i.e., SARC, UVA/VA), whereas improvements could be made regarding the experiences of military members with their command (i.e. senior enlisted advisor, immediate supervisor, unit commander). While all resources, including command, were generally assessed positively in providing support to the respondent during the military justice process, there were a few areas indicated where changes might be beneficial. Similar to findings from the *2015 MIJES*, respondents indicated that communicating with or contacting the respondent to inform them about the progress of their case was consistently lowest among assessment scores for all resources. Continuing to improve points of communication for all resources may be an opportunity for the Department to strengthen its ability to serve military members during the military justice process. Data from the *2016 MIJES* also highlight that certain resources can improve upon their use of discretion in discussing details about a case as well as aiding respondents in preparing for the military justice process.

There are several themes apparent in the results of *2016 MIJES* which underscore ways in which specific programs and resources provide support to military members who bring forward a report of sexual assault. The following sections discuss these themes and offer opportunities for action or acknowledgment.

Reporting Sexual Assault

Restricted Report Converted to Unrestricted Report. To be eligible to participate in *2016 MIJES*, a respondent's case needed to be closed. Though there are a few exceptions, the nature of having a closed case entails that the military member's report is unrestricted. Therefore it is not unexpected that 73% of respondents indicated that their final report type was unrestricted and 25% indicated that command or law enforcement had been notified. What may be interesting is the percentage of respondents who initially made a restricted report and chose to convert their report or who did not choose to convert their report but an independent investigation occurred anyway. Specifically, of the 23% of respondents who indicated initially making a restricted

report, 100% indicated their report was converted to either an unrestricted report (69% indicated by choice; 31% indicated not by choice). For those respondents who chose to convert their restricted report to an unrestricted report, 58% converted their report within 30 days after the sexual assault occurred. Though a little more than two-thirds of respondents indicated they chose to convert their report, a little less than one-third indicated that conversion was not by choice.

Experiences with SAPR Resources and Command

Interaction With SAPR Resources and Command. Making an unrestricted report of sexual assault triggers an investigation, and therefore it makes sense that 96% of respondents indicated *interacting with a military criminal investigator after their report of sexual assault*. As seen in Figure 86, the majority also indicated interacting with SAPR-specific resources during the military justice process, primarily with a *SARC*, a *UVA* or a *VA*, or a *SVC/VLC*, and were satisfied with those interactions. Less than two-thirds indicated interacting with members of their command or military trial counsel during the military justice process, and were slightly less satisfied with the services those individuals provided.

Figure 86.

2016 Sexual Assault Prevention and Response Resources: Use and Satisfaction

Experience With Military Criminal Investigator (MCI). As seen in Figure 87, 96% of respondents indicated interacting with a MCI after their report of sexual assault; however, 28% were **dissatisfied** with the resource and the services that were provided. To break this down, though more than half (64%–82%) of respondents who interacted with a MCI **agreed** that the MCI was *professional in interactions with them, took their report seriously, gave them sufficient time and professional consideration in hearing their complaint, treated them with dignity and*

respect, answered their questions about the investigative process, provided initial information for victims (DD2701) and explained their legal rights, informed them of the availability of Special Victims' Counsel (SVC) or Victims' Legal Counsel (VLC) assistance, allowed them provide information at their own pace, listened to them without judgment, and took steps to address their safety. Of note, 31% indicated they **disagreed** that the MCI provided information about the progress of their investigation, and separately, 6% of all respondents indicated the majority of information about the progress of their case was provided by a MCI. Other potential areas for improvement include discretion used when sharing details of a case and/or helping members who make a report prepare for the military justice process. Overall, 72% of respondents indicated that the MCI used discretion in sharing details of their case and 23% indicated the MCI was beneficial in preparing them for the military justice process. As most members who make an unrestricted report of sexual assault interact with MCIs early on in the investigation process, there is an opportunity for these personnel to provide more "up front" information about the process as a whole to better prepare members.

Figure 87.
Experience With MCI(s)

Experience With Sexual Assault Response Coordinator (SARC). As seen in Figure 88, overall, 84% of respondents indicated interacting with a SARC during the military justice process, and 73% indicated that they were **satisfied** with their services. Similar to respondents rates of satisfaction, more than two-thirds indicated they **agreed** that the SARC *supported them throughout the military justice process, helped them work with military criminal investigators, attorneys, and commanders, and/or contacted them on a regular basis regarding their well-being while their case was open*. As with other resources, contact was the least endorsed activity; 22% indicated they **disagreed** that the SARC *contacted them on a regular basis regarding their well-being while their case was open* and 12% of respondents overall indicated the majority of information about the progress of their case was provided by the SARC. While 82% of respondents overall indicated the SARC used discretion in sharing details of their case, a little over half (53%) indicated the SARC was beneficial in preparing them for the military justice process, which may be an area for improvement.

Figure 88.
Experience With a SARC

Experience With Uniformed Victim Advocate (UVA)/Victim Advocate (VA). Overall, 74% of respondents indicated interacting with a Uniformed Victims' Advocate (UVA) and/or a Victims' Advocate (VA) during the military justice process; breaking this out, 32% indicated interacting with a *UVA*, 33% indicated interacting with a *VA*, 20% indicated interacting with *both a UVA and VA*, and 15% indicated they were *unable to recall*. As seen in Figure 89, of those who indicated interacting with a UVA and/or a VA, 52% indicated using a UVA and 53% used a VA. Respondents who indicated interacting with a UVA indicated slightly higher levels of satisfaction with the services provided than those who interacted with a VA. Assessment of the actions provided by the UVA also reflect this difference when compared to respondent assessment of experiences with the VA. For those respondents who interacted with a UVA, the majority indicated they **agreed** that the UVA *supported them throughout the military justice process, helped them work with military criminal investigators, attorneys, and commanders, and/or contacted them on a regular basis regarding their well-being while their case was open*, whereas members who indicated interacting with a VA were a little less likely to agree. These differences are of interest as findings from the 2015 MIJES indicated that regardless of interaction with a UVA or VA, there was not a quantifiable difference in providing satisfactory support to respondents. Overall, 16% of respondents indicated the majority of information about the progress of their case was provided by a UVA/VA, 85% indicated that the UVA/VA used discretion in sharing details of their case, and 50% indicated the UVA/VA was beneficial in preparing them for the military justice process.

Figure 89.
Experience With a UVA/VA

Experience With Special Victims' Counsel (SVC) or Victims' Legal Counsel (VLC). As seen in Figure 90, 69% of respondents indicated interacting with SVCs/VLCs and 78% indicated they were **satisfied**, while 9% indicated that they were **dissatisfied** with their services. Similar to overall satisfaction, the majority of respondents who interacted with a SVC/VLC indicated they **agreed** their SVC/VLC provided them with the relevant supportive actions, and few **disagreed**. Again, providing information about the progress of their case was one of the least endorsed actions though still relatively high at 83% agreement; also, 53% of respondents overall indicated the SVC/VLC provided them with the majority of information about the progress of the case which was much greater than any other resource. For respondents overall, SVCs/VLCs were also the highest rated resource for use of discretion in sharing details of their case (88%) as well as being beneficial in preparing the respondent for the military justice process (69%). The vast majority (98%) of respondents who interacted with a SVC/VLC indicated the SVC/VLC was available when needed, and the majority indicated the SVC/VLC *attended other meetings involving trial counsel and/or defense attorneys, attended other meetings involving military criminal investigators, attended the court-martial, assisted them with any legal matters outside the military criminal investigation, and attended the Article 32 preliminary hearing*. These ratings might reflect the particularity of the respondent's case, but might be of note to the Department.

The majority (95%) of respondents who interacted with a SVC/VLC indicated that they had been assigned a SVC/VLC; OPA was not able to assess how the remaining 5% of respondents got in contact with their SVC/VLC. Findings from the 2015 MIJES revealed that some respondents were dissatisfied with how often they were reassigned a new SVC/VLC. The 2016 administration found that of the 32% of respondents who indicated being supported by more than one SVC/VLC during the military justice process, 53% indicated there was *no impact* on the assistance they received, 29% indicated the change *improved* the assistance received, and 18% indicated the change *negatively impacted* the assistance received. Overall awareness of the SVC/VLC program is of interest to the Department as knowing that this resource exists might encourage survivors to feel more comfortable making a report. For example, 68% of respondents who interacted with an SVC/VLC were not aware of the program prior to their report. Of the 32% who were aware, 60% indicated that their awareness of the program impacted their decision to report to some extent.

Figure 90.
Experience With a SVC/VLC

Experience With Unit Commander. As shown in Figure 91, overall, 65% of respondents indicated interacting with their unit commander during the military justice process, and though 57% were **satisfied** with their response, 34% were **dissatisfied**. More than one-third of respondents who interacted with their unit commander also **disagreed** that their unit commander *supported them throughout the military justice process* or *informed them about the progress of their case*. Only 2% of respondents overall indicated their unit commander provided the majority of information about the progress of the case. However, dissatisfaction might reflect a few issues (e.g., the amount of knowledge the individual had about handling sexual assault cases, their comfort about handling sexual assault cases, their overall involvement in the military justice process). Overall, 64% of respondents indicated their unit commander used discretion in sharing details of their case, while 15% indicated their unit commander was beneficial in preparing them for the military justice process.

Figure 91.
Experience With a Unit Commander

Experience With Military Trial Counsel. As shown in Figure 92, overall 61% interacted with military trial counsel. The majority of these respondents indicated they **agreed** that military trial

counsel was professional in interaction with them, took their report seriously, answered their questions, treated them with dignity and respect, communicated with their Special Victims' Counsel (SVC)/Victims' Legal Counsel (VLC) with their consent, listened to them without judgement, and took steps to protect their safety. Similar to other resources, informing the respondent about the progress of the case was the least endorsed action, and overall, 6% of respondents indicated the military trial counsel provided the majority of information about the progress of the case. Of respondents who interacted with military trial counsel, the majority indicated the military trial counsel discussed the actions that could be brought against the perpetrator, the status of trial proceedings against the perpetrator, their rights as a crime victim, and the availability of a Military Protective Order and how to obtain a Civilian Protective Order. As such, 35% of respondents overall indicated the military trial counsel was beneficial in preparing them for the military justice process and 74% indicated they used discretion in sharing details of their case.

Figure 92.
Experience With Military Trial Counsel

Experience With Senior Enlisted Advisor. As shown in Figure 93, interactions and experiences with their senior enlisted advisor were similar to those who interacted with their unit commander. Overall, 58% indicated interacting with their senior enlisted advisor during the military justice process. This resource yielded a higher percentage of **dissatisfaction** (31%). These ratings are also reflected in respondents' assessments of the activities provided. Of these members, 63% indicated they **agreed** that their senior enlisted advisor *supported them throughout the military justice process*, whereas 28% **disagreed**. Less than half (47%) indicated they **agreed** that their senior enlisted advisor *informed them about the progress of their case*, whereas 38% **disagreed**,⁴⁵ and for respondents overall, only 3% indicated their senior enlisted advisor provided the majority of information about the progress of the case. These percentages might reflect a multitude of elements (e.g., how involved command is allowed to be in the military justice process), that the perspective of the respondent might not take into account, which might also include the reason why the assessment for contact about the progress of the case is low. Similarly, overall, respondents indicated that their senior enlisted advisor was not as

⁴⁵ Air Force, Air Force Reserve, and Air National Guard members did not receive this item.

beneficial as other resources in preparing them for the military justice process (14%) or in using discretion in sharing details about their case (57%).

Figure 93.
Experience With Senior Enlisted Advisor

Experience With Immediate Supervisor. As shown in Figure 94, interactions and experiences with their immediate supervisor were similar to those who interacted with their senior enlisted advisor or unit commander. Like interactions with senior enlisted advisors, overall 58% indicated interacting with their immediate supervisor during the military justice process. This resource also yielded a high percentage of **dissatisfaction** (36%). These lower ratings are reflected in respondents' assessments of the activities provided. Of these members, 61% indicated they **agreed** that their immediate supervisor *supported them throughout the military justice process*, whereas 32% **disagreed**. Forty-one percent indicated they **agreed** that their immediate supervisor *informed them about the progress of their case*, whereas almost half (46%) **disagreed**,⁴⁶ and for respondents overall, only 1% indicated their immediate supervisor provided the majority of information about the progress of the case. As discussed above, these percentages might reflect elements that a respondent might not take into account, which might also include the reason why the assessment for contact about the progress of the case is low. Similarly, overall, respondents indicated that their immediate supervisor was not as beneficial as other resources in preparing them for the military justice process (12%) or in using discretion in sharing details about their case (55%).

⁴⁶ Air Force, Air Force Reserve, and Air National Guard members did not receive this item.

Figure 94.
Experience With Immediate Supervisor

Experience With Victim Witness Assistance Provider (VWAP). As shown in Figure 95, though this resource was the least endorsed as someone whom the respondents indicated interacting with (9%), respondents were mostly **satisfied** (63%) with the services provided. The majority of those who interacted with a VWAP **agreed** the VWAP was *professional in his/her interactions with them, treated them with dignity and respect, provided them with information on services and resources that were available to them, answered their questions, helped them understand the overall military justice process, and ensured they had a voice in the military justice process*. Consistent to the other resources, keeping the respondent informed about the status and progress of their case was the least endorsed action; overall, no respondent indicated that the majority of information about the progress of the case was provided by a VWAP. Of respondents who interacted with a VWAP, about two-thirds indicated the VWAP discussed *the availability of a Military Protective Order and how to obtain a Civilian Protective Order, other safety or protection options beyond a protective order and pre-trial restraint, the actions that could be brought against the perpetrator, and the status of trial proceedings against the perpetrator*, while less than half indicated the VWAP discussed *pre-trial restraint options for the perpetrator that were available to the commander*. Overall, only 3% of respondents indicated the VWAP was beneficial in preparing them for the military justice process and 68% indicated they used discretion in sharing details of their case.

Figure 95.
Experience With VWAP

Outcomes Associated With Reporting

Perceived Professional Reprisal. As shown in Figure 96, for respondents overall, the *Rate of Perceived Professional Reprisal* was 28%, though 16% of respondents indicated experiencing a behavior consistent with potential professional reprisal from their leadership, but did not indicate meeting the criteria included in the overall rate.

Of respondents who met criteria for *Perceived Professional Reprisal*, the majority (76%) indicated experiencing *some other action that negatively affects, or could negatively affect, their position or career* from leadership. Follow-up open-ended questions revealed that the most frequently mentioned “other” actions taken by leadership included belief that leadership *breached confidentiality*, leadership forced the respondent to *involuntarily separate or transfer*, or the respondent was *unwarrantedly disciplined*. Two-thirds of respondents who indicated experiencing *Perceived Professional Reprisal* indicated *another member in their chain of command, but not a unit commander* took an action, whereas 56% indicated their *Senior Enlisted Leader* took an action and 50% indicated their *unit commander* took an action. Overall, 95% of respondents who reported experiencing *Perceived Professional Reprisal* indicated that the behaviors taken by their leadership yielded harm to their career and 79% indicated despite experiencing these behaviors, they decided to participate and/or move forward with their report.

Figure 96.
Rate of Perceived Professional Reprisal

Perceived Ostracism. For respondents overall, the *Rate of Perceived Ostracism* was 17%. About three-fourths of respondents who indicated experiencing *Perceived Ostracism* indicated a *Service member in a similar rank as them* or a *Service member in a higher rank within their chain of command* took the action. For those that experienced *Perceived Ostracism*, 81% indicated they decided to participate and/or move forward with their report despite experiencing *Perceived Ostracism*.

Perceived Maltreatment. For respondents overall, the *Rate of Perceived Maltreatment* was 24%. Of respondents who met criteria for *Perceived Maltreatment*, 62% indicated experiencing *some other negative action* from their military peers and/or coworkers. Follow-up open-ended questions revealed that the most frequently mentioned “other” actions included individuals *ostracizing* the respondent, military peers and/or coworkers *spreading rumors* about the respondent, or they were *intimidated, threatened, or bullied*. Of those who experienced *Perceived Maltreatment*, 75% indicated some of the persons who took the *Perceived Maltreatment* actions were in a position of authority/leadership over them; 74% indicated a *Service member in a higher rank within their chain of command* took the action, while 68% indicated a *Service member in a similar rank as them*. For those that experienced *Perceived Maltreatment*, 83% indicated they decided to participate and/or move forward with their report despite experiencing *Perceived Maltreatment*.

Perceived Ostracism/Maltreatment. In Figure 97, for respondents overall, the *Rate of Perceived Ostracism/Maltreatment* was 27%. This rate is a composite of respondents who reported experiencing *Perceived Ostracism* and/or *Perceived Maltreatment*. Thirty-five percent of respondents perceived experiencing a behavior in line with potential ostracism and/or potential maltreatment, but did not indicate additional motivating factors to be included in the overall rate. Of respondents who experienced *Perceived Ostracism/Maltreatment*, 29% indicated the actions they experienced involved some form of social media.

Figure 97.
Rate of Perceived Ostracism/Maltreatment

Perceived Professional Reprisal and/or Perceived Ostracism/Maltreatment. As shown in Figure 98, for respondents overall, the *Rate of Perceived Professional Reprisal and/or Perceived Ostracism/Maltreatment* was 38%. This rate is a composite of respondents who reported experiencing *Perceived Professional Reprisal* and/or *Perceived Ostracism/Maltreatment* for reporting a sexual assault. Thirty-one percent of respondents overall perceived experiencing a behavior consistent with potential professional reprisal, potential ostracism, and/or potential maltreatment, but did not indicate additional motivating factors to be included in the overall rate.⁴⁷ Of respondents who experienced *Perceived Professional Reprisal*, *Perceived Ostracism*, and/or *Perceived Maltreatment*, 65% indicated the individuals committing negative actions were *friends with the identified perpetrator(s)* and 61% indicated they were *in the same chain of command*, whereas 22% indicated the individual(s) was the *same person(s)* and 19% indicated there was *no relationship*.

Of respondents who reported experiencing *Perceived Professional Reprisal and/or Perceived Ostracism/Maltreatment*, as a result of the negative behaviors, 80% indicated that they *discussed these behaviors with their friends, family, coworkers, or a professional*, 61% indicated they *discussed these behaviors with a work supervisor or anyone up their chain of command with the expectation that some corrective action would be taken*, 44% indicated they *discussed these behaviors with a work supervisor or anyone up their chain of command to get guidance on what to do*, and 23% indicated that they *filed a complaint (for example, with the Inspector General, Military Equal Opportunity Office, commander)*. Of respondents who experienced negative actions in line with *Perceived Professional Reprisal*, *Perceived Ostracism*, and/or *Perceived Maltreatment* and discussed these behaviors with friends, family, coworkers, professionals, a work supervisor, or anyone up their chain of command, 14% indicated they agreed to bring their allegation to a Case Management Group (CMG), whereas 50% indicated they did not agree to bring their allegation to a CMG, and 36% indicated they were *not sure*.

Of respondents who experienced negative actions in line with *Perceived Professional Reprisal*, *Perceived Ostracism*, and/or *Perceived Maltreatment* and discussed these behaviors with a work supervisor or anyone up their chain of command with the expectation that some corrective action

⁴⁷ Chapter 4 provides additional detail on the definitions of and construction of rates for *Perceived Professional Reprisal*, *Perceived Ostracism* and *Perceived Maltreatment*.

would be taken, 57% indicated they discussed the behaviors with *another member in their chain of command*, 51% indicated they discussed the behaviors with their *Senior Enlisted Leader*, 43% indicated they discussed the behaviors with their *immediate supervisor*, 32% indicated they discussed the behaviors with their *unit commander*, and 9% indicated they discussed the behaviors with the *deputy commander (XO)*. Of these respondents, 52% indicated as a result of their discussion *they are not aware of any action taken by the person that they told*. Respondents also indicated as a result of their discussion, *the situation continued or got worse for them* (44%), *they were told/encouraged to drop the issue* (42%), *they got help dealing with the situation* (21%), *their leadership took steps to address the situation* (17%), and relatively few (2%) indicated that *the behavior(s) stopped on their own*. In summary, 29% of these respondents indicated they received help or assistance as a result of their discussion of these behaviors.

As a result of filing a complaint, respondents indicated *the situation continued or got worse for them*, *they were told/encouraged to drop the issue*, or *they were not aware of any action taken by the person that they told* (all 33%). Fewer respondents indicated that as result of filing a complaint, they got help dealing with the situation (28%), or *their leadership took steps to address the situation* (17%), whereas 6% indicated *the behavior(s) stopped on its own*. For those who chose not to file a complaint, reasons for choosing not to file a complaint included *they were worried that reporting would cause more harm to them than good* (67%), *they did not trust that the process would be fair* (66%), *they did not think anything would be done or anyone would believe them* (59%), *they did not want more people to know and/or judge them* (48%), *they did not know how to report it* (34%), *they were told/encouraged not to file a complaint* (24%), *some other reason* (17%), and very few respondents indicated that they chose not to file a complaint because *the person(s) stopped their behavior* (3%).

Figure 98.

Rate of Perceived Professional Reprisal and/or Perceived Ostracism/Maltreatment

Overall Military Justice Experience

Extent Respondents Felt Up to Date on the Progress of the Case. Analysis of the 2015 MIJES revealed that some respondents did not feel that they had been kept up to date on the progress of their case. In response, the 2016 MIJES asked respondents to indicate the overall extent to which they felt that had been kept up to date on the progress of their case. Overall, 41% indicated during the military justice process they were kept up to date on the progress of their case to a

large extent/very large extent and 51% indicated they had been kept up to date to a *small extent/moderate extent*, whereas 8% indicated they were *not at all* kept up to date on the progress of their case. Overall, of respondents who felt they were kept up to date on the progress of their case to a *large extent/very large extent*, the top three individuals or services which provided the majority of information about the progress of their case were SAPR-specific resources (e.g., SVC/VLC, UVA/VA, SARC).

Charges Preferred Against Perpetrator. Overall, 57% of respondents indicated charges were preferred against the perpetrator and 48% indicated there was an Article 32 preliminary hearing on their case. Of these respondents, 43% indicated *the charges were what they had expected*, whereas 1% indicated *they were more severe than they had expected*, and 45% indicated *they were less severe than they had expected*.

Official Action(s) Taken Against the Alleged Perpetrator. Overall, of respondents who knew whether there was an action taken, 68% indicated that an official action was taken against the alleged perpetrator. Overall, 20% of respondents indicated that they were **satisfied** with the official action(s) taken against the alleged perpetrator, whereas 61% indicated that they were **dissatisfied**.

Ease of and Preparedness for the Military Justice Process. Overall, 68% of respondents indicated they felt the military justice process was *difficult/very difficult*, whereas 15% indicated that the process was *easy/very easy*. Open-ended responses revealed that three of the most frequently mentioned services and groups that were the most helpful during difficult times were their *family and friends*, the *SVC/VLC*, and *mental health providers and counselors*, whereas three of the most frequently mentioned services and groups that helped make the process easier included the *SVC/VLC*, the *SAPR services* (e.g., UVA/VA, SARC), and overall *staying informed* about their case made the process easier. Forty-one percent of respondents indicated that based on the services provided, they felt *well prepared/very well prepared* for the military justice process, whereas 23% felt *poorly prepared/very poorly prepared*. Of respondents who indicated they were *well prepared* or *very well prepared* for the military justice process, the top three individuals and/or services that were beneficial in preparing respondents for the military justice process were again SVCs/VLCs and SAPR-specific resources. Of respondents who indicated they were *poorly prepared/very poorly prepared* for the military justice process, the most frequently mentioned aspects that could potentially have helped to better prepare them for the military justice process include *better explanation of the military justice process and their rights* and *better support*.

Recommend Others Report Sexual Assault Based on Overall Experiences With Military Justice Process. When asked whether they would recommend to another survivor to make a report of sexual assault, 77% of respondents indicated that they would recommend others who experience a sexual assault make a report. Specifically, 51% of respondents indicated *yes, an unrestricted report*, 26% indicated *yes, a restricted report*, and 23% indicated *no*.

Expedited Transfer. Overall, 43% of respondents indicated that they requested and received an expedited transfer as a result of their report of sexual assault. Of respondents who requested and received an expedited transfer, compared to the time before they were transferred, their *living situation* (69%), *treatment by leadership* (61%), *treatment by peers* (59%), *social support* (56%),

medical/mental health care (51%), and their *career progression* (47%) were **better** than before. Of respondents who requested and received an expedited transfer, compared to the time before they were transferred, their *career progression* (22%), *medical/mental health care* (16%), *social support* (16%), *treatment by leadership* (12%), *treatment by peers* (10%), and their *living situation* (10%) were **worse** than before.

Future Directions

The 2016 *MIJES* is the second administration of the survey which provides the Department with a description of military members' experiences with the military justice process after reporting a sexual assault. As described in Chapter 6, ongoing analysis of qualitative and quantitative findings from the survey will provide the Department with a better and more detailed account of the experiences of these military members as well as the types of impact programs and personnel have during the military justice process for this vulnerable population. The nature of the *MIJES* provides an opportunity to continue exploring these findings in greater detail over time.

Appendix A. Frequently Asked Questions

Frequently Asked Questions

2016 Military Investigation and Justice Experience Survey (2016 MIJES)

Defense Research, Surveys, and Statistics Center (RSSC)

Office of People Analytics (OPA)

The Office of People Analytics (OPA) Research, Surveys, and Statistics Center (RSSC) conducts comprehensive research and analyses to support the information needs of the Department of Defense (DoD). One way to meet this need is through surveys. OPA conducts Joint-Service surveys including the Status of Forces surveys, QuickCompass surveys, and Health & Resilience surveys for the DoD on a variety of topics of interest to the Department. This survey, the *2016 Military Investigation and Justice Experience Survey (MIJES)*, is the second administration of the only DoD-wide survey effort designed to assess the investigative and legal processes experienced by survivors that have made a formal report of sexual assault. The following details some common questions about the survey content and methods used to conduct the *2016 MIJES*.

1. What is the Military Investigation and Justice Experience Survey?

- The *Military Investigation and Justice Experience Survey (MIJES)* is a voluntary survey designed to assess the investigative and legal processes experienced by survivors that have made a formal report of sexual assault. By focusing on military members who have made an unrestricted report or converted from a restricted to an unrestricted report, OPA is assessing the military justice experiences of a unique population that has not previously been studied: those survivors with a recently closed sexual assault case (e.g., verdict made, investigation complete). The *2016 MIJES* was designed with input from DoD Sexual Assault Prevention and Response Office (SAPRO) representatives, the Services, the National Guard Bureau, the Office of Inspector General (OIG), as well as the Office of General Counsel (OGC). This is the only formal survey assessment of this population across DoD, including active duty and Reserve component members. The survey focuses on experiences with the military investigation and justice processes only and does not ask survivors questions about the circumstances or details of the assault.

2. Why was the MIJES conducted?

- The *2016 MIJES* is designed to assess the investigative and legal processes experienced by survivors that have made a formal report of sexual assault. This survey was conducted in response to a Secretary of Defense Directive requiring that a standardized and voluntary survey for survivors be developed and regularly administered to “provide the sexual assault victim/survivor the opportunity to assess and provide feedback on their experiences with (Sexual Assault Prevention and Response) SAPR victim assistance, the military health system, the military justice process, and other areas of support” (Secretary of Defense, 2014). The Defense Research, Surveys, and Statistics Center (RSSC) within the Office of People Analytics (OPA) was tasked with this effort.

3. *What was the population of interest for the 2016 MIJES?*

- The population of interest for the *2016 MIJES* consisted of current uniformed military members (i.e., Title 10 or Title 32 status, even if part-time), who have a closed case (e.g., investigation done, disposition complete, and case information entered into DSAID) between April 1, 2015 and March 31, 2016 (FY15 Q3-FY16 Q2). Uniformed military members include members of the active duty (Army, Navy, Marine Corps, and Air Force), the Reserve (Army Reserve, Navy Reserve, Marine Corps Reserve, and Air Force Reserve), and the National Guard (Army National Guard and Air National Guard). All sexual assault survivors who met the above criteria were eligible to participate in the survey. In addition, respondents were excluded if they indicated via self-report that they:
 - were not currently uniformed military members,
 - did not have a report that resulted in a criminal investigation by a Military Criminal Investigative Organization,
 - did not have a perpetrator that was a military Service member, and
 - did not choose to participate in the investigation or military justice process.
- The population for the *2016 MIJES* consisted of 3,230 members who made a report of sexual assault and who had a closed case between April 1, 2015 and March 31, 2016. Of the 3,230 members who made a report of sexual assault and who met the eligibility criteria in this time frame, 2,041 survivors were current military members as of the Defense Manpower Data Center *May 2016 Active Duty Military Personnel (ADMP) Master File* or *May 2016 Reserve Components Common Personnel Data System (RCCPDS) Master File* and comprised the eligible sample population. Completed surveys were received from 225 respondents.

4. *Is this survey anonymous? How did you make sure to protect anonymity?*

- The survey is anonymous. OPA used information provided in the Defense Sexual Assault Incident Database (DSAID) only to ensure the survey is directed to eligible respondents; it was not used for any part of the data collection effort and all survey responses received (on both web and paper surveys) were completely anonymous. OPA maintained response anonymity by breaking the link between the sample member's address and survey returns to ensure there is no way to link the respondent's identity to their responses. There is no way to merge the survey respondent data with the record data. Random ticket numbers were assigned to ensure that only eligible respondents have access to the survey, however the ticket number was unique and not linked to the survivor's name, Service or paygrade. Additionally, disclosure protection is afforded by the OPA policy on sharing data.

5. *How did you identify survivors to take the survey and how were they notified?*

- Contact information was provided from DSAID. Contact information was only used to ensure the survey is directed to eligible respondents; it was not used for any part of the

data collection effort and all survey responses received (on both web and paper surveys) were completely anonymous. The web survey administration process began on August 29, 2016 with an e-mail announcement message to survivors in the sample. The announcement e-mail explained the 2016 MIJES data collection effort, why the survey was being conducted, how the survey information would be used, why participation was important, as well as information about how to opt out of the survey if the survivor did not want to participate. Throughout the administration period, a limited number of additional e-mail reminders (three in total) were sent to survivors to remind them of the survey effort and to encourage them to take the survey. Paper-and-pen surveys were mailed in a survey packet (requiring signature) through UPS to eligible sample members in September 2016. Prior to administration, a notification e-mail was sent to sample members by the DoD Sexual Assault Prevention and Response Office Director, Major General Nichols, to validate the survey's legitimacy as well as to make sample members aware that they would be receiving the survey via e-mail or UPS package requiring a signature.

6. *Can I assume these estimates represent the views of all survivors?*

- No. The 2016 MIJES is an anonymous and voluntary survey and does not use scientific sampling/weighting which would allow generalizability to the full population of survivors who have participated in the military investigative and justice processes. Therefore, estimates in the 2016 MIJES only represent the views of the survivors who met eligibility criteria and submitted completed surveys. Although not generalizable to the full population of survivors, MIJES results provide a source based on the responses of hundreds of survivors across the DoD; this data has never been available previously.

7. *Does this survey include Reserve and National Guard members?*

- Yes. This survey was conducted across all DoD components including the Reserves and National Guard. In addition to active duty members, our definition of "uniformed military member" included individuals in the Reserve (Army Reserve, Navy Reserve, Marine Corps Reserve, and Air Force Reserve), and the National Guard (Army National Guard and Air National Guard). However, numbers of Reserve and National Guard members that completed surveys for the 2016 MIJES were small, and therefore results for these members should be interpreted with caution.

8. *Why are the rates different between FY15 and FY16? Can I interpret this difference as a trend over time?*

- Survivors represented in the 2016 MIJES may have made a report any time between October 2013 until March 2016. Because many services, resources, and policies were not in place prior to FY16, the Department is interested in hearing about the experiences respondents have had who made their reports in different fiscal years. Findings presented by fiscal year are provided in Chapter 6 of the Overview Report to give a more complete picture of respondent experiences over time. However, all differences between fiscal years should be interpreted with caution as they are only averages of responses from survivors who chose to participate in the survey. As data in the survey were not

scientifically weighted, calculating statistical differences is not advisable, and therefore OPA cannot say with scientific certainty that findings between fiscal years are statistically significantly different. Findings for FY16 will not be provided in the Overview Report due to the small respondent sample that made a report in FY16, as only half of the fiscal year (Q1 and Q2) was captured for the purposes of the survey. Full fiscal year findings for FY16 will be provided in the *2017 MIJES* Overview Report.

9. Some of the estimates provided in the report show “NR” or “Not Reportable.” What does this mean?

- The estimates become “Not Reportable” when they do not meet the criteria for statistically reliable reporting. This can happen for a number of reasons including high variability or too few respondents. This process helps ensure that the estimates we provide in our analyses and reports are accurate and precise.

10. Do the results on retaliation for reporting sexual assault mean that people experienced retaliation?

OPA worked closely with SAPRO, OGC, and OIG to design behaviorally-based questions that would better capture a range of outcomes resulting from the report of a sexual assault than previous measures. The resulting bank of questions is intended to capture data on experiences of survivors who perceived professional reprisal, ostracism, or maltreatment as a result of reporting a sexual assault. These questions, included on the *2016 MIJES* as well as several other surveys in 2016, were designed to align with the legal elements of professional reprisal, ostracism, and maltreatment in the Uniform Code of Military Justice (UCMJ) and Department policy and regulation. However, ultimately, only the results of an investigation (which takes into account behaviors experienced as well as other aspects, such as the intent of the perpetrator) can determine whether self-reported negative behaviors meet the requirements of prohibited retaliation. Therefore, measures of perceived retaliatory behaviors captured on the *2016 MIJES* reflect member perceptions only and should not be interpreted as meeting the elements of proof for retaliation contained within UCMJ policy.

Appendix B.
Service-Specific Language Presented on the
Web Survey

MIJES1601 used dynamic text to present Service specific terms. The tables below indicate what text was presented to respondents by Service. Use this table in concert with the other appendices to determine what text question and response option text.

Survey Note: Analysis of Members Who
Chose Not to Participate in the Military
Justice Process

Office of
People
Analyses
(OPA)

Defense Research, Surveys, and Statistics Center (DSSC)

APPENDIX C

2016 Military Investigation and Justice Experience Survey: Analysis of Members Who Chose Not to Participate in the Military Justice Process

Issue

To be an eligible participant in the 2016 *Military Investigation and Justice Experience Survey* (MIJES), respondents were required to be currently uniformed military members, whose report resulted in a criminal investigation by a Military Criminal Investigative Organization, whose perpetrator was a military Service member, and who chose to participate in the investigation or military justice process. Overall, 308 members initially responded to the survey. Of these respondents, 225 members were eligible to take the survey based on criteria including choosing to participate in any part of the investigation or military justice process for their sexual assault case. Of the 83 responders who did not meet eligibility criteria, 21 members indicated they chose not to participate in the military justice process, and were therefore excluded from general survey results.

However, members who choose not to participate in the investigation or military justice process are of interest to the Sexual Assault and Prevention and Response Office (SAPRO). Understanding why these members chose not to report, and whether they received supportive services and resources, might influence modifications to programs which are beneficial to these members. Therefore the 2016 *MIJES* included three questions directed at respondents who indicated they chose not to participate in any part of the investigation or military justice process for their sexual assault case. These respondents were not eligible to participate in the remainder of the survey.

Reasons for Not Participating

The 21 members who indicated they chose not to participate in the investigation or military justice process were asked to specify why they chose not to participate. Sixteen members left comments specifying their reasons. Analysis of these 16 comments yielded 4 themes: they had no choice, they were not invited to participate, they were too emotionally vulnerable to participate, or there was a general lack of trust with the process.

No choice

Some members indicated they felt they had no choice in whether their case went forward, regardless of their participation. Specifically, some felt the case advanced without their permission, and control was taken away from them.

- *"I had my choice taken away from me. Improper reporting resulted in being taken to the wrong agency first. I did not want the report to go unrestricted like it did, and I no longer wanted to relive the events that occurred. I felt like that would happen every day until the matter was resolved and could not put myself through that kind of stress."*
- *"My rights were infringed upon and I want nothing to do with OSI, my former command, or the Air Force."*

2016 Military Investigation and Justice Experience Survey Analysis of Members Who Chose Not to Participate in the Military Justice Process

- *"The entire situation was absolutely out of my control and I had absolutely no say in how the investigation was carried out... I was never offered an option of whether or not to begin an investigation, which should have never come about... Nothing I could say taken into consideration at all. I'm extremely dissatisfied by the way everything was carried out."*

Not invited to participate

Some members indicated they were *not invited to participate* in the investigation or that they did not know an investigation was occurring.

- *"We're not offered to."*
- *"I was not given the opportunity to participate. The assault was reported as fraternization by my command, so I was also being investigated for wrong doing on my part."*
- *"I did not know about it."*
- *"I was not asked to participate in the investigation. I had to chase people down for answers. Felt like I was being assaulted all over again."*
- *"I was never requested back regarding the case or to do anything other than my initial statement."*

Emotional vulnerability

Some members indicated they were *emotionally vulnerable* and felt their participation in the investigation would be too painful or impact their ability to heal.

- *"We're too emotionally unstable to deal with legal proceedings of any kind."*
- *"I did not want to be interrogated nor [did I] want to feel like a victim anymore."*

Lack of trust

Some members indicated they *lacked trust* in the system or they were too afraid to participate.

- *"I do not trust OSI."*
- *"Fear."*

Assignment of Special Victims Counsel (SVC) or Victims' Legal Counsel (VLC)

The 21 members who indicated they chose not to participate in the military justice process were also asked about whether they were assigned a Special Victims Counsel (SVC) or Victims' Legal Counsel (VLC) despite choosing not to participate. As seen in Figure 1, of these members, 71% indicated *yes*, they were assigned a SVC/VLC, whereas 29% indicated *no*, they were not assigned a SVC/VLC.

2016 Military Investigation and Justice Experience Survey
Analysis of Members Who Chose Not to Participate in the Military Justice Process

Figure 1.
Assignment of Special Victim Counsel (SVC) or Victim Legal Counsel (VLC)

Overall, results from the 2016 MIJES indicated that having a SVC/VLC was beneficial to respondents in preparing them for the military justice process.¹ Therefore, members who chose not to participate in the investigation or military justice process and were assigned a SVC/VLC were asked whether this assignment influenced their decision to participate. Only members who were in the Army, Army Reserve, Army National Guard, Air Force, Air Force Reserve, or Air National Guard were presented this question. As seen in Figure 1, of these respondents, 89% indicated no, having a SVC assigned to them did not influence their decision not to participate, whereas 11% indicated they were unable to recall.
