Department of Defense Annual Report on Sexual Assault in the Military

Fiscal Year 2016

OFFICE OF THE UNDER SECRETARY OF DEFENSE
4000 DEFENSE PENTAGON
WASHINGTON, D.C. 20301-4000

MAY 1 2017

The Honorable John McCain
Chairman
Committee on Armed Services
United States Senate
Washington, DC 20510

Dear Mr. Chairman:

Section 1631 of the Ike Skelton National Defense Authorization Act (NDAA) for Fiscal Year (FY) 2011 (Public Law 111-383), requires the Secretary of Defense to submit to the Committees on Armed Services of the Senate and House of Representatives an annual report on the sexual assaults involving members of the Armed Forces during the preceding year, including reports from each of the Military Departments.

The enclosed "Department of Defense Fiscal Year 2016 Annual Report on Sexual Assault in the Military" presents statistics and analysis of reports of sexual assault during FY 2016 and discusses policy and program improvements to the Sexual Assault Prevention and Response program of the Department of Defense (DoD). The numerical data and statistics contained in this report are drawn from metrics identified in the Department's evaluation plan, which fulfills additional reporting requirements outlined in the NDAA's for FYs 2011, 2012, 2013, and 2015.

This report documents considerable progress to address sexual assault in the military. Results from the "2016 Workplace and Gender Relations Survey" indicate that estimated instances of sexual assault for active duty Service members decreased in FY 2016, while the proportion of Service members choosing to report a sexual assault increased. With sexual assault being a significantly underreported crime, we consider this higher proportion of reporting as an indicator that victims are continuing to gain confidence in their leaders and response personnel to provide them with the care they need and hold alleged perpetrators appropriately accountable.

While this report documents progress to address sexual assault, the Department must continue to emphasize a climate of dignity and respect where male and female victims alike are empowered to report this crime. The DoD will continue in FY 2017 to implement enduring culture change so that this country's most important fighting resource – our men and women in uniform – can operate in a command climate without sexual assault.

I am sending a similar letter, with the Department's report, to the Chairman of the House Committee on Armed Services.

Sincerely,

A. M. Kurta
Performing the Duties of the Under Secretary of
Defense for Personnel and Readiness

*Department of Defense
Annual Report on Sexual Assault in the Military
Fiscal Year 2016*

The estimated cost of report or study for the Department of Defense is approximately \$4,479,000 in Fiscal Years 2016-2017. This includes \$3,336,000 in expenses and \$1,143,000 in DoD labor.

Executive Summary

The Department's Sexual Assault Prevention and Response Program is prevention-focused with an uncompromising commitment to victim assistance. Sexual assault prevention and response policies and actions are evidence-based and data driven. The Department strives to continuously improve the Sexual Assault Prevention and Response Program through Service member feedback, collaboration with external program stakeholders, and inter-Service collaboration.

The Department initially created the Sexual Assault Prevention and Response Program in 2005. However, many of the legal reforms and improvements to the program occurred in years since 2012. These improvements have come from the application of research findings to program tenets, initiatives directed by the Secretary of Defense, and Congressional legislation, to include the most comprehensive reform of the military justice system in 50 years. This year's report shows evidence of significant progress in the Department's efforts to prevent and respond to sexual assault. Nonetheless, there is still much more work to do to continue these trends into the future.

Section 1631 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (Public Law 111-383) requires the Department to provide Congress with an annual report on sexual assaults involving members of the Armed Forces. This report satisfies that requirement. In this report, DoD uses the term "sexual assault" to refer to a range of crimes, including rape, sexual assault, forcible sodomy, aggravated sexual contact, abusive sexual contact, and attempts to commit these offenses, as defined by the Uniform Code of Military Justice (UCMJ).

Fiscal Year 2016 Program Efforts

The Department of Defense worked aggressively during fiscal year 2016 to address four key program efforts:

- Advancing Sexual Assault Prevention,
- Assuring a Quality Response to Service Members Who Report Sexual Assault,
- Improving Response to Male Service Members Who Report Sexual Assault, and
- Combatting Retaliation Associated with Sexual Assault Reporting.

These efforts align toward a common end, which is to reduce, with the goal to eliminate, sexual assault from the military. The report also outlines the many actions advanced by the Department, Military Services, and National Guard Bureau during fiscal year 2016.

Advancing Sexual Assault Prevention

Sexual assault prevention stops violence before it begins. The Department designs its prevention efforts to decrease the occurrence of sexual assault, empower safe intervention in risky situations, detect risk and protective factors within unit climates, and emphasize leadership's central role in advancing workplaces that promote dignity and respect. The Department completed the following major efforts to advance sexual assault prevention in fiscal year 2016:

- **Conducted the first phase of the Installation Prevention Project**, a study intended to identify installation and community risk factors for sexual assault and develop associated actions leadership can take to mitigate sexual violence.

- **Launched the DoD Prevention Collaboration Forum** to serve as a venue to facilitate the development, sharing, and implementation of prevention-related practices which could have an impact across the Department.
- **Initiated development of the 2017-2021 Sexual Assault Prevention Plan of Action** that places primary prevention as a core focus in developing tasks and initiatives that seek to stop the crime of sexual assault before it occurs. The plan aims to achieve unity of effort and purpose across the Department of Defense.

Assuring a Quality Response to Service Members Who Report Sexual Assault

The Department's response system aims to empower victims, facilitate recovery, and encourage crime reporting.¹ The Department completed the following major efforts to ensure a quality response to Service members who report sexual assault in fiscal year 2016:

- **Continued professional development for sexual assault response coordinators and victim advocates through the Department of Defense Sexual Assault Advocate Certification Program**, which ensures that appropriate personnel are appointed, appropriately trained, and in possession of the requisite level of knowledge and expertise to provide assistance throughout the reporting and recovery process.
- **Expanded the outreach of the Department of Defense Safe Helpline** through an increase in efforts and available services. The Safe Helpline provides anonymous crisis intervention support and connects Service members

¹ As used in this report, the term "victim" includes alleged victims and the use of the terms "subject," "offender," or "perpetrator" does not convey any presumption about the guilt or innocence of any individual, nor does the term "incident" or "report" substantiate an occurrence of a sexual assault.

to resources that may ultimately lead to a victim making a report of sexual assault. As such, the Safe Helpline can help to build confidence in the reporting process for those reluctant to use military resources.

- **Worked to streamline access from the Department of Defense to the Department of Veterans Affairs** to simplify access to treatment resources when moving from Service member to Veteran status and to close the communications gap between the departments.
- **Assured confidentiality for Service members making a Restricted Report in states with mandatory crime reporting laws.** Federal law now allows Service members to file a Restricted Report in state jurisdictions that have mandatory reporting laws. These reports are kept confidential unless reporting is necessary to prevent or mitigate serious and imminent threat to someone. This removes a potential barrier to reporting, and Department policy now enables Service members who make a Restricted Report at military treatment facilities to receive the necessary care without notifying state officials unless a serious and imminent threat to someone exists.

Improving Response to Male Service Members Who Report Sexual Assault

Sexual assault is a crime that affects both men and women in the military and male Service members who experience sexual assault are less likely to report the incident. The Department completed the following major efforts in fiscal year 2016 to improve response to male Service members who reported sexual assault:

- **Developed the Department of Defense Plan to Prevent and Respond to Sexual Assault of Military Men** that articulates the Department's unified commitment to developing a data-driven prevention and response system that is tailored to military

men and supported by leaders at all levels.

- **Conducted the Department of Defense Safe HelpRoom Webinar to support men who experienced sexual assault** to enhance responders' knowledge about male survivors and highlight the capabilities of the Department of Defense Safe HelpRoom.

Combatting Retaliation Associated with Sexual Assault Reporting

Retaliation associated with reporting a crime or other misconduct not only harms the lives and careers of victims, bystanders/witnesses, and first responders, but also undermines military readiness and weakens the culture of dignity and respect. The Department completed the following major efforts to combat retaliation associated with sexual assault reporting in fiscal year 2016:

- **Published the Department of Defense Retaliation Prevention and Response Strategy** that aligns Departmental efforts in combatting retaliation related to reports of sexual assault and complaints of sexual harassment.
- **Established the Department of Defense Inspector General Whistleblower Reprisal Directorate** to investigate all complaints of reprisal related to a report of sexual assault.

These program efforts are not inclusive of every aspect of the crime of sexual assault, nor does this report detail every action that the Department, Military Services, and the National Guard Bureau are taking to prevent and respond to this crime. Additional program highlights can be found in Appendix A of this report. The Department continues to assess its programs and policies to ensure that it is effectively addressing the needs of Service members.

The Department employed several assessment efforts to learn more about the impact of programs to prevent and respond to

sexual assault. The *2016 Workplace and Gender Relations Survey of Active Duty Members*, the *2016 Military Investigation and Justice Experience Survey*, and other research drives the identification of potential major issues facing the Department's Sexual Assault Prevention and Response Program. The Department uses findings from surveys, focus groups, reports of sexual assault, and other sources to shape its strategic approach and drive future program efforts.

Fiscal Year 2016 Top Line Results

The Department measures progress in this area by a number of metrics, understanding that no one metric is fully reflective of progress. Primarily, the Department strives to decrease the number of Service members who experience a sexual assault (i.e., prevalence), while increasing the proportion of these Service members who choose to come forward to report this crime and receive restorative care (i.e., reporting behaviors).

Reporting Behaviors

The Military Services received 6,172 reports of sexual assault involving Service members as either victims or subjects of criminal investigations throughout fiscal year 2016, which represents a 1.5 percent increase from the reports made in fiscal year 2015. Of the 6,172 reports of sexual assault, 5,350 involved Service member victims. Of those 5,350 Service member victims, 556 Service members (about 10 percent) made a report for incidents that occurred before entering military service. The remaining reports involved 778 victims who were U.S. civilians or foreign nationals and 44 victims for whom status data were not available.

The Department of Defense offers Service members the opportunity to make either an Unrestricted or Restricted Report of sexual assault. The Military Services received

4,591² Unrestricted Reports involving Service members as either victims or subjects in 2016. In addition, the Military Services initially received 1,995 Restricted Reports involving Service members as either victims or subjects. Four hundred fourteen (21 percent) of the initial Restricted Reports later converted to Unrestricted Reports. These 414 converted Restricted Reports are now counted in the 4,591 Unrestricted Reports. Of the initial Restricted Reports, 1,581 reports remained Restricted.

The Department takes appropriate action in every case where it has jurisdiction and the evidence to do so. This year, the Department had sufficient evidence to take some kind of disciplinary action in 64 percent of cases within DoD's legal authority. Disciplinary action was not possible for the remaining 36 percent of cases due to evidentiary or other legal factors, such as the victim declining to participate, insufficient evidence of an offense to prosecute, or other reasons. Appendices B and C of this report detail sexual assault data from fiscal year 2016.

Prevalence

The *Workplace and Gender Relations Survey for Active Duty Members* was conducted in fiscal year 2016 to capture estimates of past-year sexual assault and sexual harassment prevalence (occurrence). In fiscal year 2016, 4.3 percent of active duty women and 0.6 percent of active duty men indicated experiencing sexual assault in the year prior to being surveyed. These rates represent a statistically significant decrease from the rates of sexual assault measured in the *2014 RAND Military Workplace Survey*. Using these rates, the Department estimates

that about 14,900ⁱ Service members experienced some kind of sexual assault in 2016, down from about 20,300 in 2014. Additional results can be found in Annex 1 of this report.

Overall, this year's statistical data indicate that the Department is making progress toward its dual goals of reducing the occurrence of sexual assault and encouraging greater reporting of the crime. In fact, this year's data suggest that about one in three Service members are choosing to report their sexual assault, up from the one in four estimated for 2014 and the one in fourteen estimated ten years ago in 2006.

The Department of Defense remains committed to advancing a military culture where sexist behaviors, sexual harassment, and sexual assault are not tolerated, condoned, or ignored. Military commanders understand that prevention of sexual assault is synonymous with military readiness, and empower their people to take appropriate action to protect each other. The Department's ultimate success relies on every member of the military community understanding his/her role and acting to create a safer and healthier climate within the United States Armed Forces.

² The Department pulls and analyzes data from DSAID six weeks after the end of the FY to allow sufficient time for data validation. During this six-week period, 21 additional Restricted Reports converted to Unrestricted. These 21 reports are included with the 414 reports that converted from Restricted to Unrestricted that DoD counts with FY16 numbers.

Introduction

The Department of Defense (DoD) Fiscal Year (FY) 2016 Annual Report on Sexual Assault in the Military satisfies the following statutory reporting requirements:

- Section 542 of Carl Levin and Howard P. “Buck” McKeon National Defense Authorization Act (NDAA) for FY 2015 (Public Law (P.L.) 113-291);
- Section 575 of NDAA for FY 2013 (P.L. 112-239); and
- Section 1631 of Ike Skelton NDAA for FY11 (P.L. 111-383).

Section 481 of Title 10 of the United States Code (U.S.C.) also requires the Department to conduct the *Workplace and Gender Relations Survey of Active Duty Members (WGRA)* every 2 years. The Office of People Analytics (OPA) conducts the survey using measures created for the *2014 RAND Military Workplace Study (RMWS)* to estimate past-year sexual assault and sexual harassment prevalence in the active force. Active duty members of the Military Services could complete the survey online or on paper. Survey questions asked respondents about their experience of sexual assault, outcomes associated with reporting an incident of sexual assault, and gender-related Military Equal Opportunity violations. Results of the *2016 WGRA* can be found in Annex 1 to this report.

OPA also conducted an additional survey in FY16, the *2016 Military Investigation and Justice Experience Survey (MIJES)*, to assess Service members’ experiences with the investigative and military justice processes. The survey assessed opinions and self-reported experiences associated with making an Unrestricted report of sexual assault. The *2016 MIJES* was a voluntary and anonymous survey. Participants included Service members who filed an Unrestricted Report of an alleged sexual assault by an alleged military perpetrator whose case

reached final disposition at the time the sample was drawn in 2016. Results of the *2016 MIJES* show that Service members continue to value the support provided by Special Victims’ Counsel (SVC)/Victims’ Legal Counsel (VLC) attorneys, Sexual Assault Response Coordinators (SARC), and Sexual Assault Prevention and Response (SAPR) Victim Advocates (VA). Respondents noted continued challenges with support from immediate supervisors and with perceptions of retaliation associated with their report. However, the *2016 MIJES* was not weighted; therefore, results of the study are not generalizable to all Service member victims whose case reached final disposition. Results of the *2016 MIJES* can be found in Annex 2 to this report.

This is the Department’s 13th Annual Report on sexual assault, and it covers sexual assault allegations made during FY16 (October 1, 2015 through September 30, 2016). Enclosed with this report are supplementary reports from the Secretaries of the Military Departments, the Chief of the National Guard Bureau (NGB), and OPA.

The SAPR program addresses sexual assault reports by adults against adults, including sex offenses, as defined in Articles 120 and 125 of the Uniform Code of Military Justice (UCMJ), and Article 80, attempts to commit these offenses. Sexual assaults between spouses or intimate partners fall under the purview of the Family Advocacy Program (FAP). Appendix J of this year’s report contains preliminary data on sexual assaults between spouses and intimate partners that were reported to FAP in FY16.

Military research suggests that sexual assault and sexual harassment are interrelated problems. The *2016 WGRA* demonstrated a clear relationship between sexual harassment and sexual assault. However, the behaviors that constitute sexual

harassment do not always rise to the level of criminal misconduct. Such behavior is nonetheless disruptive to those Service members targeted by the harassment and undermines good order and discipline. Sexual harassment requires a different response than the crime of sexual assault. Sexual harassment falls under the purview of the Office of Diversity Management and Equal Opportunity (ODMEO). Appendix H of this year's report contains data on formal and informal sexual harassment complaints that were made to ODMEO in FY16.

This year's report outlines four key FY16 program efforts where the Department took action to accomplish its mission to reduce, with the goal to eliminate, sexual assault from the military. These program efforts are advancing sexual assault prevention,

assuring a quality response to Service members who report sexual assault, improving response to male Service members who report sexual assault, and combatting retaliation associated with sexual assault reporting. The following pages summarize key efforts and do not detail every action the Department, Military Services, and NGB are taking.

The program efforts described in this report highlight actions to sustain and enhance the DoD prevention and response systems, through both programmatic initiatives, and policy changes to combat sexual assault.

Spotlight: FY16 Data

Advancing Sexual Assault Prevention

Sexual assault prevention stops sexual violence before it begins. The Department takes a public health approach to preventing sexual assault by emphasizing the health, safety; and well-being of the entire military population. DoD strives to provide the maximum benefit for the largest number of people. Prevention also requires understanding the factors that influence sexual violence. The Department uses a modified version of the Centers for Disease Control's social-ecological model (SEM) to better understand the impact of violence across the entire organization and the effect of potential prevention strategies. The SEM model considers the complex interplay between individual, relationship, community, and societal factors. The DoD model uses the same approach, and adds the influence of leadership to drive change within each of these factors. This modification allows for a better understanding of the range of factors that put people at risk for violence, or protect them from experiencing or perpetrating violence. The Department designs its prevention efforts to decrease the occurrence of sexual assault, empower safe intervention in risky situations, detect risk and protective factors within unit climates, and emphasize leadership's central role in advancing workplaces that promote dignity and respect.

FY16 Assessment of Progress

Sexual Assault Rates for Men and Women Decreased Significantly Since 2014

The Department's primary measure of prevention progress is the estimated past-year prevalence of sexual assault. This measures the number of Service members that experienced behaviors consistent with the sexual assault offenses defined in military law. The 2016 WGRA found an estimated 4.3 percent of military women and an estimated 0.6 percent of military men indicated

experiencing some form of sexual assault in the year prior to being surveyed.ⁱⁱ

These rates represent a statistically significant decrease from the estimated rates of sexual assault measured in the 2014 RMWS. Two years ago, RAND found an estimated 4.9 percent of military women and 0.9 percent of military men experienced some kind of sexual assault in the past year.

The decreases in estimated rates of sexual assault between 2016 and 2014 are statistically significant, meaning the decrease that occurred in the population was not due to random fluctuations in the data.

The Department conducts the WGRA surveys so that the results are representative of the entire active duty force. This approach allows DoD to estimate the number of active duty Service members who experience sexual assault. The Department estimates that about 14,900 Service members experienced some kind of sexual assault in 2016. This figure is down from an estimated 20,300 active duty members experiencing a sexual assault in 2014.ⁱⁱⁱ

2016 Sexual Assault Estimated Prevalence Rate is at a Ten Year Low

It has been ten years since the Department conducted the first WGRA survey in 2006 to estimate the extent of sexual assault in the military. Direct statistical comparisons cannot be made between rates of sexual assault obtained in the 2006 WGRA and the rates obtained in the 2016 WGRA due to changes during the intervening years to its measures and survey content. However, for a non-scientific frame of reference, estimated rates of unwanted sexual contact^{iv} in 2006 were 6.8 percent for women and 1.8

percent for men. In 2006, the Department estimated that roughly 34,200 active duty members experienced some kind of unwanted sexual contact in the year prior to being surveyed. No direct, scientific comparisons can be made between the older survey findings and this year's survey findings described in the following sections. However, the Department can reasonably say this year's estimates are the lowest on record. Nonetheless, more must be done to eradicate this crime from the military.

Risk of Sexual Assault on Military Installations Decreased Since 2006

The circumstances that make up sexual assault in the military have varied over time. In both the 2006 and 2016 *WGRA*, members were asked to think about the one situation of unwanted sexual contact or sexual assault that had the biggest effect on them during the year. Thinking about this situation, they were asked to provide details about when and where the situation occurred.

For instance, the 2006 *WGRA* found that of those who indicated experiencing unwanted sexual contact, 75 percent of women and 74 percent of men indicated the situation occurred at a military installation and 45 percent of women and 68 percent of men indicated the situation occurred during duty hours. DoD has placed greater emphasis on improving workplace climate and installation safety in the intervening years. These efforts appear to have had an effect on making military units and installations somewhat safer. The 2016 *WGRA* found that of those

Fewer incidents of sexual assault are occurring on military installations and in military workplaces

active duty members who indicated experiencing sexual assault, 64 percent of women and men indicated the situation occurred at a military installation, and 27 percent of women and 45 percent of men indicated the situation occurred at work during duty hours. In sum, fewer of the most serious incidents of sexual

assault are occurring on military installations and in military workplaces.

Proportion of Sexual Assaults Committed by Civilians Increased Since 2006

The 2006 and 2016 surveys also found that the vast majority of active duty members indicated the alleged offender in the one situation with greatest impact on them was a military member. For both men and women, the proportion of active duty members who indicated that there were only civilians involved in the most serious incident appear to have doubled from 2006 to 2016 – from 4 percent to 8 percent of women, and from 8 percent to 16 percent of men. Civilians are found both on and off base. However, given the finding that installations and military workplaces pose lesser risk, it follows that some of these civilians are likely being encountered in non-military environments. This important pattern deserves emphasis in prevention programming.

Multiple Alleged Offenders Risk About the Same for Men and Women

Similarly, members in both the 2006 and 2016 surveys were asked how many alleged offenders were involved in the one situation that had the greatest effect on them. A higher percentage of women indicated multiple alleged offenders in 2016 compared to 2006 (21 percent in 2006 and 31 percent in 2016). In contrast, a lower percentage of men indicated multiple alleged offenders in 2016 compared to 2006 (42 percent in 2006 and 33 percent in 2016). This essentially means that in 2016 similar proportions of men and women identify the situation with the greatest effect involved multiple alleged offenders.

Neither survey asked respondents to characterize the situation with multiple alleged offenders. However, the Department expects that additional emphasis on preventing incidents of hazing and bullying may reduce risk of multiple alleged offender incidents.

Alcohol Involvement Increased

Effective prevention requires an understanding of the role alcohol plays in sexual assault. The role of alcohol and/or drugs in the one situation appeared to become more prominent between 2006 and 2016.^v However, relatively few Service members indicated use of drugs by them or the alleged offender. For the vast majority of incidents involving alcohol and/or drugs,

Drug and alcohol facilitated crime accounts for a large proportion of the incidents of sexual assault.

Service members identified alcohol as being the more common substance involved. Nonetheless, drug and alcohol use were combined into a single category for the following analyses. In

the 2006 survey, 32 percent of women and 38 percent of men indicated the one situation involved alcohol and/or drug use by them or the alleged offender. In the 2016 survey, 60 percent of women and 42 percent of men indicated alcohol and/or drugs were involved before the one situation of sexual assault. In sum, drug and alcohol facilitated crime accounts for a larger proportion of those incidents that had the greatest impact on Service members.

LGBT Active Duty Members at Greater Risk for Sexual Assault and Sexual Harassment

The Department works to refine its statistical measures in order to obtain more depth and insight into the extent of sexual assault and its impact on the total force. The Department subsequently uses these data points to establish policies and programs. Since 2006, the Department has broken down WGRA survey results by certain demographic variables, such as sex, rank, and age. This year, these demographic breakdowns also include sexual orientation identifiers – lesbian, gay, bisexual, and transgender (LGBT). The Department took this action based on findings from a systematic review of 75 civilian studies, which

indicates that lesbian, gay, and bisexual individuals may be at increased risk for sexual assault victimization.^{vi}

Five percent of active duty Service members indicated in the 2016 WGRA that they identify as either lesbian, gay, bisexual, and/or transgender. Survey findings show that Service members identifying as LGBT are statistically *more likely* to indicate experiencing sexual assault than members who do not identify as LGBT. The overall sexual assault estimated prevalence rate for active duty members identifying as LGBT is 4.5 percent, compared to 0.8 percent for those who do not identify as LGBT. An estimated 6.3 percent of women who identify as LGBT and 3.5 percent of men who identify as LGBT indicated experiencing sexual assault in 2016, compared to 3.5 percent and 0.3 percent of those who do not identify as LGBT, respectively.

Additionally, Service members identifying as LGBT are statistically *more likely* to indicate experiencing sexual harassment than members who do not identify as LGBT. Overall, the estimated sexual harassment rate for active duty members identifying as LGBT is 22.8 percent, compared to 6.2 percent for those who do not identify as LGBT. An estimated 27.5 percent of women who identify as LGBT and 19.9 percent of men who identify as LGBT indicated experiencing sexual harassment in 2016, compared to 18.3 percent and 4.3 percent who do not identify as LGBT, respectively.

The Department will continue to follow this small segment of the military community in future survey efforts. In addition, DoD will include targeted interventions, communications, and means to empower this population as part of its overall larger efforts to eliminate sexual assault from the military. Further detailed information regarding sexual assault and LGBT Service members can be found in Annex 1 of this report.

Sexual Assault Risk Remains Highly Correlated with Sexual Harassment Experience

Estimated past-year rates of sexual harassment continue to be highly correlated with the experience of sexual assault. In 2016, 21.4 percent of active duty women and 5.7 percent of active duty men indicated experiencing sexual harassment in the year prior to being surveyed. Compared to 2014, this was a significant decrease for active duty men, whereas it remained the same for active duty women. The definition used in the *WGRA* requires the experience of sexual harassment to be both pervasive and severe, meaning that respondents indicated behaviors more serious than a single sexist joke or sexual comment. Respondents indicated experiencing these unwanted behaviors repeatedly and/or after asking the individual behaving inappropriately to stop.

The experience of sexual harassment remains highly correlated with the experience of sexual assault. The odds of being sexually assaulted are approximately 16 times higher for active duty women who indicated experiencing sexual harassment than for active duty women who have not and 50 times higher for active duty men who indicated experiencing sexual harassment than for active duty men who did not. These findings are comparable to observations from the *2014 RMWS*, wherein RAND found a similar relationship between the phenomena: active duty women who indicated experiencing sexual harassment in the past-year were 14 times more likely to experience sexual assault than women who did not experience sexual harassment. Active duty men who indicated experiencing past-year sexual harassment were 49 times more likely to indicate experiencing sexual assault than men who did not indicate experiencing sexual harassment in the past-year. In sum, the Department cannot conclude that sexual harassment causes sexual assault. However, these phenomena appear to occur together. It may be that sexual harassment and other misconduct, such as bullying and hazing, set

the conditions for sexual assault to occur. Such misconduct, when used to exclude individuals from the group, may lead to subsequent sexual assault or serve to ensure the silence of victimized Service members.

The decrease in the past year estimated occurrence of sexual assault is welcomed news. However, continued progress towards further decrements in sexual assault rates requires continued resourcing in prevention efforts. The following section highlights some of the advancements DoD has made in prevention in FY16.

FY16 Actions to Advance Sexual Assault Prevention

Conducted First Phase of the Installation Prevention Project

The DoD Sexual Assault Prevention and Response Office (SAPRO) launched the Installation Prevention Project (IPP) in FY15 in response to a Secretary of Defense directive, requiring a multi-year project to customize prevention efforts at select military installations. This effort intends to identify installation and community risk factors for sexual assault and to develop associated actions leadership can take to mitigate sexual violence.

The IPP is DoD's first comprehensive effort to conduct a systematic review and assessment of the effectiveness of sexual assault prevention programs at the installation level. In FY16, DoD SAPRO engaged commanders and units stationed at five military installations and one joint base.

The first phase of the project found that the IPP installations' prevention efforts predominately emphasized sexual assault awareness, with most efforts focusing on stand-alone events intended to increase knowledge and improve attitudes. Fewer efforts at the installations focused on research-informed actions to build skills and capacity to prevent the crime. Nonetheless, the Department observed strong indications

of a shift in culture, in that old norms that tolerated hazing, sexist attitudes, and verbal/physical abuse appeared to be fading. Further, leaders at the installations understand the importance of the issue and their role in prevention.

Launched the DoD Prevention Collaboration Forum

The Department initiated greater coordination with other DoD and Military Service programs that address readiness-impacting problems, including the FAP, the Defense Suicide Prevention Office, and ODMEQ. This collaborative forum intends to help DoD and Service agencies identify efficiencies and common areas of support that can be leveraged in a more unified approach to prevention. The Collaboration Forum serves as the venue to facilitate the development, sharing, and implementation of prevention-related practices that could have impact across the Department.

Initiated Development of the 2017-2021 Sexual Assault Prevention Plan of Action

The Department has accomplished a great deal with the *2014-2016 DoD Prevention Strategy*; however, an updated Prevention Plan of Action (PPoA) is required to expand further prevention efforts so effective practices become institutionalized at every level of the Department. To move the Department forward, DoD SAPRO began development of the 2017-2021 Sexual Assault PPoA in FY16.

Prevention efforts should ultimately decrease the number of individuals who perpetrate sexual assault and the number of individuals who experience the crime. Many prevention approaches aim to reduce the factors that make the crime more likely while increasing the factors that protect people from harm. Comprehensive prevention strategies address factors at each level of the social environment, including individuals, relationships, the local community, and society as a whole.

Continued Bystander Intervention Training

DoD policy requires the Military Services and NGB to employ the active bystander intervention approach as part of required annual SAPR training, professional military education, and other prevention initiatives. This requirement is based on the premise that many sexual assaults begin in social settings where others may detect a potential offender's attempts to groom and isolate a potential victim. The Military Services are designing these education and training efforts as frameworks to teach intervention, acceptable behavior, and healthy relationships – all of which are important parts of a prevention program. The following are examples of efforts that the Military Services and NGB are taking to implement bystander intervention training:

- Army – An Army installation supported a grassroots movement called the “Guardians.” The Guardians is a junior leader volunteer community outreach program whose mission is to eliminate sexual harassment and sexual assault through a collective effort involving senior leader mentoring, peer-to-peer accountability, and bystander intervention. The program models positive behaviors and empowers junior leaders to act. Three Guardians received Commanding General Volunteer Awards as recognition for their efforts.
- Navy – The Navy’s “Chart the Course” force-wide training initiative emphasizes positive professional behavior and decision-making. The training uses scenario-based videos and facilitator-led discussions to help Sailors determine how to make the right decisions, understand consequences, and behave professionally when facing difficult situations. Facilitated discussions among peer groups covered a spectrum of behaviors and emphasized the importance of leaders at every level to “step up, and step in.”
- Marine Corps – The Marine Corps created a Public Service Announcement

entitled “Dear Drill Instructor,” that focused on prevention messaging, highlighting how bystander intervention can help protect any Marine who may find himself or herself in a high-risk situation. The PSA featured a Non-Commissioned Officer (NCO) writing an email to his former Drill Instructor (DI), thanking the DI for teaching him what it means to be a Marine, both on and off the battlefield. Because of the DI’s influence, the NCO writes that he stepped up to protect a fellow Marine in a high-risk situation. The Marine Corps posted this PSA to the official Marine Corps social media page and reached more than 123,000 people. Additionally, the Marine Corps completed an assessment of its “Step Up” Bystander Intervention Training for junior Marines. Originally developed in FY14, the program teaches Marines practical peer-to-peer bystander intervention strategies. The assessment, conducted through pre- and post-tests, found that identification of bystander intervention techniques increased 12.4 percent for training participants.

- Air Force – The Air Force implemented Green Dot, an evidence-based bystander intervention approach. Green Dot is a three-pronged community mobilization

approach that was adapted for use in the Air Force and has separate modules for leaders, peer influencers, and the general Air Force population. In addition, a version of Green Dot was adapted for and used by Air National Guard and Air Force Reserve members to address their unique requirements and time limitations.

- NGB – Teaching bystander intervention techniques and empowering members to act are primary techniques used throughout the NGB to help prevent the crime.

Way Forward on Prevention in FY17

Continue Development of the 2017-2021 Sexual Assault PPOA

The Department aims to achieve unity of effort and purpose across all of DoD in the execution of sexual assault prevention initiatives and activities. To develop the PPOA, the Department will continue to look to incorporate insights from the Military Services and prevention subject matter experts who have experience in developing evidence-based prevention methods.

Assuring a Quality Response to Service Members Who Report Sexual Assault

The Department's response system aims to empower victims, facilitate recovery, and encourage crime reporting. Victims who report the crime are more likely to engage medical care and support services that can help them restore their lives.^{vii} In addition, reports of sexual assault provide the Department a means with which to hold alleged offenders appropriately accountable. This section describes highlights from the Department's sexual assault data sources, major actions, and planned activities for FY17.

FY16 Assessment of Progress

The Department's approach to victim assistance follows empowerment methods^{viii} by providing choices and quality services that Service members will see as beneficial to their recovery and participation in the military justice process, as desired. The following section summarizes the strengths and challenges observed through the many sources DoD uses to assess the progress of the SAPR program.

Sexual Assault Reporting Continues to Increase

The decision to report a sexual assault remains an intensely personal choice for anyone who has experienced it. The Department recognizes that some Service members will never consider reporting the crime given the stigma and scrutiny sexual assault victims encounter in U.S. society. Nonetheless, efforts to increase reporting are important because doing so connects a greater number of Service members with restorative care and support. This year, more Service members chose to report a sexual assault than ever before.

Of the 6,172 sexual assault reports received in FY16, 5,350 involved a Service member victim. This represents a 2 percent increase from the 5,240 Service members reporting sexual assault in FY15. The remaining 822 of the total 6,172 reports come from civilian victims or others who were not on active duty status with the U.S. Armed Forces.

The Department's scientific survey of the active duty in 2016 estimates that about 4.3 percent of active duty women and 0.6 percent of active duty men experienced some kind of sexual assault in the year prior to being surveyed.

The methods used to conduct the survey allow the results to be generalized to the full population of the active duty force. Consequently, an estimated 14,900 active duty members experienced a sexual

assault in FY16. Based on this result, the Department estimates that 32 percent – or about 1 in 3 – Service members who indicated experiencing a sexual assault on the 2016 WGRA made a Restricted or Unrestricted Report for an incident that occurred during Military Service in FY16. This is an increase from the estimated 1 in 4 reporting Service members in 2014, and the 1 in 14 estimated in 2006.

About 1 in 3 Service members who indicated experiencing a sexual assault during military service made a Restricted or Unrestricted Report in FY16

Recent Rates of Restricted Report Conversions Remain Relatively High

Restricted Reporting gives a victim time to access services and pursue healing before a criminal investigation occurs, while providing victims with the opportunity to

convert his or her report at any time to an Unrestricted Report and participate in the military justice process. This year, 414 (about 21 percent) of the 1,995 victims initially making Restricted Reports converted their report.³ This is about the same share of victims who converted their report to Unrestricted by the end of FY15. Nonetheless, conversion rates in recent years are greater than the 14 to 17 percent conversion rates observed from FY07 through FY13.

Restricted Reports Converting More Quickly

The Service members who converted their reports from Restricted to Unrestricted before the end of FY16 did so after an average of about 27 days. This average is fewer than the 30 days observed in FY15 and the 36 days observed in FY14. The median number of days - or the midpoint in the frequency distribution of the number of days it took to convert a report - has also decreased. In FY16, the median number of days to convert was 9 days, compared to 10 days in FY15 and 12 days in FY14. The Department does not require Service members to identify their specific reasoning for converting from a Restricted to an Unrestricted Report, nor does it pressure them to do so within a given time period. Nonetheless, a generally accepted belief in both criminal investigations and justice circles is that evidence is less likely to be lost in cases that proceed to the justice process more quickly.

³ The Department pulls and analyzes data from DSAID six weeks after the end of the FY to allow sufficient time for data validation. During this six-week period, 21 additional Restricted Reports converted to Unrestricted. These 21 reports are included with the 414 reports that converted from Restricted to Unrestricted that DoD counts with FY16 numbers.

The Restricted Reporting Option Promotes Overall Reporting by Service Members

The Department developed the Restricted Reporting option in 2005, based on a recommendation from civilian and military experts that some victims will never report sexual assault if they must also engage the justice process. The number of reports remaining Restricted at the end of the year now accounts for about a quarter of total annual reporting. The data gathered this year in the *2016 WGRA* indicate that having both options likely brings more Service members forward to report than having the single, Unrestricted means of reporting. The survey asked Service members who indicated experiencing a sexual assault in the past year what they would have done had Restricted Reporting not been an option. Of the DoD women who indicated experiencing sexual assault and making a Restricted report, more than half (58%) indicated they would not have reported without the option, while fewer than one-fifth (19%) would have made an Unrestricted Report, and about one-quarter (24%) were unsure about what they would have done. Results for DoD men are not reportable due to the small number of respondents in this category.

About Ten Percent of Those Reporting Seek Assistance with a Pre-Service History of Sexual Assault

Most reported incidents in FY16 occurred within the fiscal year; however, some incidents occurred in prior years and/or prior to military service. Of the 5,350 Service members making a report in FY16, 556 reports involved incidents that occurred before the member entered military service. Prior-to-service incident reporting has remained steady over the past few years; roughly, 10 percent of Service member reports each year involve pre-service incidents. However, this reporting pattern varies by military service. About 20 percent of reports received by the Marine Corps this year involved a pre-service sexual assault.

The other three services were at or below the DoD average of 10 percent. Restorative care, counseling, and other support exist for all Service members, regardless of when or where the sexual assault occurred.

Most Response Services Rated Higher by Women Than Men

The 2016 WGRA asked active duty members who indicated experiencing sexual assault in the past year to indicate if they had received services or responses from individuals or providers. If they had interacted with the specified individual or provider, they were asked to provide their level of satisfaction with the services or responses they received from each. Respondents could indicate if they were satisfied, dissatisfied, or neither satisfied or dissatisfied.

Nearly two-thirds of women indicated satisfaction with the support they received from a SARC, a SAPR VA, a chaplain, an SVC/VLC, and a mental health provider. Over half of women were satisfied with the support received from medical providers. About one-third of women indicated satisfaction with support from the DoD Safe Helpline, and likewise, the support they received from civilian law enforcement personnel. Satisfaction with the response from the unit commander, senior enlisted advisor, and one's immediate supervisor scored 46 percent, 42 percent, and 42 percent, respectively. However, women also had the greatest levels of dissatisfaction with their unit commander, senior enlisted advisor, and immediate supervisor, with about one-third of women reporting dissatisfaction.

Satisfaction with support services varied between men and women. Men rated their satisfaction highest with mental health providers (50 percent), SAPR VAs (49 percent), SARCs (43 percent), and chaplains (43 percent). Men had lowest satisfaction with the response from their unit commander (25 percent satisfied), civilian law enforcement (26 percent satisfied), their senior enlisted advisor (30 percent satisfied), and military law

enforcement (31 percent satisfied). Men had the greatest rates of dissatisfaction for their immediate supervisor (53 percent dissatisfied), their senior enlisted advisor (51 percent dissatisfied), and their unit commander (50 percent dissatisfied).

Results from the smaller, non-generalizable 2016 MIJES echoed the findings from the 2016 WGRA. Of the roughly 200, mostly female respondents to the 2016 MIJES, SAPR resources such as SVCs/VLCs, SAPR VAs, and SARCs received the highest satisfaction ratings. MIJES respondents also indicated that their SVCs/VLCs were the most beneficial in preparing them for the military justice process, provided them with the most information regarding the progress of their case, and used discretion in sharing details of their case.

Reasons for Not Reporting a Sexual Assault Stayed Fairly Stable: Denial, Stigma, and Shame

The Department estimates suggest that roughly two-thirds of Service members did not report their sexual assault.^{ix} Some victims may never consider reporting a sexual assault, as they may minimize the incident or cope in other private ways. Active duty women who indicated a sexual assault in the past year on the 2016 WGRA endorsed the following reasons for not reporting the most:

- Wanted to forget about it and move on (68 percent)
- Did not want more people to know (58 percent)
- Felt shamed or embarrassed (52 percent)

Comparatively, active duty men who indicated a sexual assault in the past-year endorsed the following as the main reasons for not reporting the incident:

- Wanted to forget about it and move on (47 percent)
- Did not want more people to know (39 percent)

- Thought it was not serious enough to report (37 percent)
- Felt shamed or embarrassed (37 percent)

Reasons for not reporting showed a few changes this year, compared to 2014. Women who indicated experiencing a sexual assault in the past year on the 2014 RMWS endorsed *Wanted to forget about it and move on* (73 percent), *Did not want more people to know* (63 percent), and *Thought it was not serious enough to report* (46 percent) as the three primary reasons for not reporting. Men who indicated experiencing a sexual assault on the 2014 RMWS most often indicated the following as reasons for not reporting: *Wanted to forget about it and move on* (64 percent), *Did not want more people to know* (51 percent), and *Not serious enough to report* (49 percent).

This year, the percentage of women and men indicating *Wanted to forget about it and move on* decreased by 5 percentage points and 17 percentage points, respectively. Compared to 2014, the percentage of women who indicated they did not report because they thought it was not serious enough showed a statistically significant decrease of 7 percentage points. However, the percentage of women who indicated they did not report because they were worried about potential negative consequences from their coworkers or peers showed a statistically significant increase compared to 2014 (10 percentage point increase), as did the percentage of women who did not think they would be believed (7 percentage point increase).

In sum, this year's results suggest a growing proportion of Service members who see a benefit in reporting the crime. Continued increases in reporting will only come by ensuring all Service members, responders, and resources provide an environment that encourages and supports everyone who comes forward to report this crime, while victims weigh the benefits and risks associated with reporting. The Department employed this perspective and

other scientific research, victim feedback, and survey results to inform its response improvement efforts in FY16.

FY16 Actions to Promote a Quality Response

Continued Professional Development for SARCs and SAPR VAs through D-SAACP

All SARCs and SAPR VAs must be credentialed through the DoD Sexual Assault Advocate Certification Program (D-SAACP). In order to meet the unique needs of the military, the Department adapted the certification program from the standards established by the National Advocacy Credentialing Program.

SARCs assist and advocate for men and women who report sexual assault, coordinate with installation leadership, and manage relationships with military and civilian agencies that support victims. SARCs and SAPR VAs must maintain a specialized skillset that is built on competence, character, and commitment. They are encouraged to grow in their abilities through verification of experience and continuing education as demonstrated by renewing their certification at higher levels. Over 400 SARCs and over 8,000 SAPR VAs earned new certifications in FY16. Many SARCs and SAPR VAs renewed their certification at higher levels of proficiency within the D-SAACP. In FY16, 382 SARCs renewed their certification, with 53 (or 14 percent) earning a higher certification level. Additionally, 3,072 SAPR VAs renewed their certification, with 100 applicants earning a higher certification.

The D-SAACP ensures that suitable personnel are appointed, appropriately trained, and possess the essential level of knowledge and expertise to provide a professional, high-quality response throughout the reporting and recovery process.

Expanded the Outreach of the DoD Safe Helpline

The Safe Helpline supports the Military Department's SAPR programs by providing the DoD community with an anonymous and confidential resource apart from local bases and installations. Victims may connect one-on-one with specially trained staff and receive crisis support and information about military resources and reporting options. The availability of both anonymous and confidential resources through the DoD Safe Helpline provides Service members with important information and support. DoD Safe Helpline educates all users about the greater level of care and resources available through the official reporting of sexual assault.

The DoD Safe Helpline expanded its visibility in FY16 by increasing the number of SARC requested outreach materials by 19 percent compared to FY15, with over 300,000 outreach material requests. The DoD Safe Helpline also increased its online advertising efforts and participated in 50 outreach events and installation visits. This included its first presentation outside the continental United States to South Korea where 450 individuals from across three bases participated.

The increased outreach likely helped more individuals in the military community understand that the DoD Safe Helpline is an important and unique resource for everyone. These marketing efforts also likely contributed to 633,796 unique users accessing the website in FY16, which is an all-time high.

In FY16, 16,913 users (10,579 phone users and 6,334 online session users) contacted the DoD Safe Helpline. Overall usage increased by 67 percent (specifically, 54 percent for online sessions and 76 percent for phone sessions) in FY16, compared to FY15. It is important to note that not all users of the DoD Safe Helpline are survivors of sexual assault. Some users are family members and friends wanting to help a friend or loved one. The DoD Safe Helpline targets

its marketing efforts and resources to the military community.

The Department also expanded the Safe HelpRoom by allowing 24/7 access. The Safe HelpRoom is an anonymous, moderated online group chat service that allows individuals who have experienced sexual assault in the military to connect with and support one another.

Users frequently contact the DoD Safe Helpline to discuss reporting-related concerns and connect to resources that might ultimately lead to an official report. The helpline fulfills victims' needs to disclose in a safe context, receive validation, and air their concerns safely and securely. As such, the DoD Safe Helpline can help to build confidence in the reporting process for victims who are reluctant to use military resources. See Appendix G for more information on DoD Safe Helpline usage.

Worked to Streamline Access from the DoD to the Department of Veterans Affairs

The Department participated in the Joint Executive Committee (JEC) in support of the Department of Veterans Affairs (DVA) and DoD efforts to ensure continuity of care for military sexual assault victims and other at risk Service members. The committee addressed the need to streamline accessibility to the VA for Service members without a DoD referral for care and expand beyond DVA healthcare facilities, in accordance with Section 402 of the Veterans Access, Choice, and Accountability Act of 2014. The JEC also worked to create outreach materials for sexual assault victims visiting DVA and DoD healthcare facilities in order to bridge the communication gap between agencies.

Assured Confidentiality for Service Members Making a Restricted Report in States with Mandatory Crime Reporting Laws

Prior to the enactment of the NDAA for FY16, Service members making a Restricted Report often risked losing their requested confidentiality because of the required mandatory reporting regulations in certain states. The law now states, “that in the case of a Restricted Report, any State law or regulation that would require an individual...to disclose the personally identifiable information of the adult [Service member] victim or alleged perpetrator of the sexual assault to a State or local law enforcement agency shall not apply, except when reporting is necessary to prevent or mitigate a serious and imminent threat to the health or safety of an individual.” As such, a Restricted Report may be made and remain confidential if the report is made on a DoD installation, and there is no serious or imminent threat to someone.

Consulted with Other Government Agencies to Promote Improved Sexual Assault and Harassment Prevention and Response

Leadership from DoD SAPRO, and others within the Department, met with representatives from the U.S. Department of Interior, the National Park Service, the Bureau of Land Management, the U.S. Department of Transportation, the U.S. Merchant Marine Academy, the Canadian Armed Forces, the British Armed Forces, the French Armed Forces, and Armed Forces of the Argentine Republic to provide advice and insights on organizational approaches to addressing sexual assault and sexual harassment. DoD SAPRO explained its data-driven approach to preventing and responding to sexual assault and discussed ways to assess the scope of the problems, promote a healthier culture, prevent the crime, and hold offenders appropriately accountable. Additionally, DoD SAPRO emphasized the importance of leadership in

bringing about organizational change and provided advice on how senior leaders can better speak to their organizations about the issues of sexual assault and sexual harassment.

Military Services Improved Response and Victim Treatment

The Military Services and NGB continued efforts to improve overall victim care and trust in the chain of command in FY16:

- Army – The Army piloted the Sexual Harassment/Assault Response and Prevention (SHARP) Program Resource Center (RC) concept at twelve Army posts. The SHARP-RC model enables SHARP assets currently serving on the installation to enhance case coordination and response agency collaboration. A SHARP-RC Sexual Assault Response Team consists of four primary responders, including SHARP VAs, medical providers from the Military Treatment Facility, criminal investigators, SVCs and military prosecutors from the supporting Staff Judge Advocate. SHARP-RCs provide a central location for services to victims, support to the chain of command, and coordination of all SHARP education and training expertise at an installation. SHARP-RCs will remain at installations where the commands deem them effective. Army leadership will continue to assess the feasibility of implementing the SHARP-RC concept throughout the rest of the force.
- Navy – Measures taken by Navy VLCs to improve overall victim care include engaging directly with a victim’s chain of command to assert the client’s rights and interests across a range of issues. These may include Military Protective Orders, expedited transfers, assistance on matters of career impact, and action to address social ostracism, reprisal, and other concerns. VLCs base their interactions with commands on the client’s consent, input, and desire. Legal advice, support, and advocacy provided

by VLCs foster their client's trust, faith, and confidence in the Navy and the military justice process.

- Marine Corps – Marine Corps SAPR hosted two NCO Summits in FY16: one at Marine Corps Base (MCB) Camp Pendleton and one at MCB Camp Lejeune. The Summits addressed five functional areas: myths and misconceptions, barriers to reporting, retaliation for reporting, suicide, and alcohol.
- Air Force – Major Command SAPR program managers conducted site visits in FY16 to assess the clarity of guidance being followed in the field and provide coaching and mentoring to program personnel. Air Force SAPR's focus is on ensuring that all SAPR Program Managers have the appropriate skills to meet the demands of the SAPR mission. Air Force SAPR also regularly monitors the credentials and qualifications of all full-time and volunteer personnel.
- NGB – NGB SARCs and SAPR VAs focus on being approachable, accessible, and active to earn the trust of Guard members who may require their services. SARCs and SAPR VAs are certified through D-SAACP and are knowledgeable about their state's reporting laws. NGB leadership continues to emphasize confidentiality and supporting the privacy of victims so they can feel comfortable making a report.

Captured Survivor Feedback

DoD SAPRO and the Military Service SAPR Offices all hosted survivor meetings

throughout FY16. The offices hold meetings to learn from survivors' experiences about command environment, training, and the reporting and response process. Feedback from these Service members illustrated the emotional toll sexual assault takes on its victims and the long-lasting negative impact it has on their lives and relationships. The human stories reflected in these first-person accounts help the Department identify best practices and areas for improvement in the DoD's ever-evolving response system.

Way Forward on Assuring a Quality Response in FY17

Develop an Evaluation Tool to Assess D-SAACP Initial Training Participants

The Department implemented the D-SAACP certification program subsequent to a requirement in the FY12 NDAA. DoD SAPRO, in conjunction with the Military Services and NGB, continue to explore ways to enhance the program.

Enhance DoD Safe Helpline Services by Launching a Self-Guided Education Tool

In February 2015, the Secretary of Defense directed DoD SAPRO to develop and deploy an anonymous, self-guided education program designed to support military members who have been victims of pre-service sexual assault. DoD SAPRO and the Military Services developed a self-guided education program entitled, "Building Hope and Resiliency: Addressing the Effects of Sexual Assault." The program will be available to Service members in FY17.

Improving Response to Male Service Members Who Report Sexual Assault

The Department's 2012 Annual Report identified that more active duty men likely experience sexual assault each year than active duty women. This conclusion was drawn from point estimates derived from the 2012 *WGRA* survey, indicating that well over half of the 26,000 estimated number of victims that year were men. The 2014 *RMWS* reached a similar conclusion: estimated rates of sexual assault are higher for active duty women than for men – but because the active duty population is approximately 85 percent male – point estimates yield higher numbers of men. Of the 20,300 estimated victims of sexual assault in 2014, 10,600 were men and 9,600 were women. The 2014 *RMWS* also identified important differences between the sexual assault experiences of male and female Service members. In FY16, the Department worked to further understand these differences and apply them to policies and programs throughout the military.

FY16 Assessment of Progress

The Number of Men Experiencing Sexual Assault Decreased Significantly This Year

Sexual assault is a crime that affects both men and women in the military, undermining military readiness and contradicting a healthy culture of dignity and respect. While women are at higher risk for sexual assault, male Service members traditionally account for the majority of the survey-estimated victims of sexual assault because the Department is mostly comprised of men. This year's *WGRA* survey found that the estimated past-year prevalence of sexual assault for men decreased significantly, from 0.9 percent in 2014 to 0.6 percent in 2016. These estimates suggest that the number of men experiencing sexual assault decreased from about 10,600 in FY14 to about 6,300 in FY16. Furthermore, the estimated past-year prevalence of sexual

assault for men decreased so much that for the first time the number of men estimated to have experienced the crime in 2016 (about 6,300)^x is less than the number of women estimated to experience the crime (about 8,600).^{xi}

Decreases in Estimated Prevalence for Men Came from Fewer Sexual Contact Crimes

The 2016 *WGRA* asks respondents about the types of sexual assault they experienced in the past year. Respondents are asked if the type of misconduct they indicated experiencing penetrated their body (oral, anal or vaginal penetration), attempted to penetrate these areas, or involved sexual contact with the buttocks, genitalia, inner thighs or breasts. Men in this year's survey indicated they experienced statistically lower rates of sexual contact – or non-penetrating crimes – than in 2014. Past-year rates of non-penetrating crimes decreased from 0.6 percent in 2014 to 0.4 percent in 2016. There were no statistically significant changes in the rates of penetration and attempted penetration between 2014 and 2016.

Reports from Women Still Outnumber Men, but More Men Reported the Crime in 2016 than Ever Before

A greater proportion of female victims report their assault to military authorities than men. Specifically, about 43 percent of survey-estimated female victims could be accounted for in FY16 reporting data, as compared to about 17 percent of survey-estimated male victims that could be accounted for in FY16 reporting data. This reporting disparity between men and women is also seen in the civilian sector.^{xii} However, both reporting estimates are up from FY14, when about 40 percent of estimated female victims and 10 percent of estimated male victims made a

Fewer men experienced sexual assault in FY16, but more men reported sexual assault than ever before

report to a DoD authority. In addition, FY16 data indicate that women are out-reporting men by a factor of 2.5, as compared to the factor of 4.0 seen in FY14. In

sum, fewer men experienced sexual assault in FY16, but a greater number of men reported sexual assault than ever before.

Nonetheless, male victims are less likely than female victims to tell *anyone* about their sexual assault. Of those Service members who did not report the situation to the military, men (78 percent) were more likely than women (70 percent) to indicate they *never considered reporting and/or do not plan to report*. In addition, men are less likely than women to indicate they considered reporting but decided against it (17 percent of men versus 25 percent of women).

Male Victims Tend to Be a Little Older Than Female Victims

Results from the 2016 WGRA showed a significant interaction between gender and age on experiencing sexual assault, with women who indicated experiencing sexual assault tending to be slightly younger and men tending to be slightly older. Twenty-four percent of women who indicated experiencing sexual assault in FY16 were under the age of 21, compared to only 12 percent of men who indicated experiencing sexual assault. In contrast, 29 percent of men who indicated experiencing sexual assault were above the age of 30, compared to only 15 percent of women who indicated experiencing sexual assault. Age was the only factor that explained some of the differences between men and women who indicated experiencing sexual assault in 2016. The Department found no relationship between male and female victims and the Armed Forces Qualification Test (AFQT) scores, level of education, race/ethnicity, pay grade, or having deployed in the last 12 months.

Certain Demographic Differences Among Men Increase Risk of Sexual Assault

In a comparison among men who did not experience sexual assault and those that alleged a sexual assault, victimized men were: younger, had fewer years of service, had less education, were in lower enlisted pay grades, had higher AFQT scores, and were more likely to have been deployed in the last 12 months. This information may help to identify men who are at higher risk of sexual assault. These results indicate it may be helpful to target general sexual assault prevention efforts toward men who are within their first five years of service, who are younger than 25 years of age, who are enlisted, and who have deployed within the last 12 months as these appear to be the most defining characteristics of men who indicate experiencing sexual assault on the 2016 WGRA.

More Men Characterize Their Sexual Assault as Hazing or Bullying, and Experience More Multiple Incidents than Women

Men are far more likely to characterize the one sexual assault situation that had the largest effect on them, henceforth referred to as the “one situation,” as hazing or bullying than are women. More specifically, 27 percent of men who indicated experiencing sexual assault characterized the one situation as hazing compared to only 9 percent of women, and 39 percent of men who indicated experiencing sexual assault characterized the one situation as bullying compared to 24 percent of women. Male respondents perceived the incident as serving to humiliate or abuse them, as opposed to having some kind of sexual intent. Some male victims who experience such incidents may not consider making a report because they do not perceive the sexual nature of the incident. An experience of past-year sexual assault was also highly correlated with an experience of past-year sexual harassment, with 52 percent of men and 56 percent of women indicating experiencing sexual harassment or stalking

before or after the one situation occurred. Men (35 percent) were also more likely than women (25 percent) to indicate they experienced five or more unwanted sexual events in the past year.

Men and Women Report Sexual Assault for Mostly the Same Reasons

The top three survey-indicated responses from men on why they reported sexual assault were:

- To stop the alleged offender(s) from hurting them again (47 percent),
- To stop the alleged offender(s) from hurting others (45 percent), and
- It was their civic or military duty to report it (41 percent).

When scientifically compared to responses from women, the only differentiation was that men were less likely to indicate they reported because someone they told encouraged them to report (22 percent of men versus 44 percent of women). When asked if they would recommend others report sexual assault based on their experience with reporting, 59 percent of men said they would recommend others report sexual assault (34 percent would recommend others make an Unrestricted Report and 25 percent would recommend a Restricted Report). These results showed no statistically significant differences from the data reported by female Service members.

Men and Women Experience Sexual Assault Differently

The use of alcohol in conjunction with an incident of sexual assault varied between men and women. Results from the 2016 *WGRA* indicated men were less likely (39 percent) than women (59 percent) to indicate they and/or the alleged offender(s) had used alcohol before the one situation.

A greater share of surveyed male victims, when compared to female victims, indicated that their most impactful incident of sexual

assault in the prior year was a non-penetrative sexual assault (59 percent of men versus 43 percent of women), and less likely to indicate the one most serious situation was penetrative sexual assault (35 percent of men versus 48 percent of women). Fewer men (6 percent) than women (8 percent) indicated the one situation involved a non-penetrative sexual assault.

When describing the alleged offender(s) in the one situation, men were less likely to say there was only one person involved (58 percent of men versus 67 percent of women). Men were also more likely than women to indicate their alleged offenders were of multiple genders. Women indicated that 94 percent of their alleged offenders were male. Men indicated that 57 percent of their alleged offender(s) were male, 25 percent were female, and 12 percent of men indicated their alleged offenders were a mix of men and women. Fewer men indicated their alleged offender(s) were all military members (66 percent of men versus 83 percent of women). Men were also more likely than women to indicate the alleged offender(s) were not in the military (16 percent of men versus 8 percent of women). When a military member was identified as the alleged offender(s), 53 percent of men indicated the alleged offender(s) were of a higher rank and 40 percent were the same rank as them. When compared to women, men were more likely to indicate the alleged offender(s) were of a lower military rank than they were (29 percent of men versus 19 percent of women).

When asked about when the one situation occurred, men were almost twice as likely to indicate it occurred while at work during duty hours (45 percent of men versus 27 percent of women). Men were less likely than women to indicate the one situation occurred while out with friends or at a party that was not an official military function (31 percent of men versus 40 percent of women) or while in their or someone else's home or quarters (25 percent of men versus 45 percent of women).

Men Indicated Less Satisfaction with Services and Support from Individuals

It is the Department's goal to provide gender responsive, culturally sensitive support and care to Service members reporting sexual assault. However, survey results show that men were generally more likely than women to be dissatisfied with a majority of the response and/or services they received. About half of male respondents indicated they were dissatisfied with the support they received from their leadership, including unit commanders, senior enlisted advisors, and immediate supervisors. Additionally, about a third of male Service members who experienced sexual assault indicated they were dissatisfied with the response they received from their SARCs, SAPR VAs, and SVC/VLCs. These survey results suggest that improvements could be made in providing support and services to men who report a sexual assault.

The Department will use these data to inform the implementation of the plan it developed in FY16 to improve prevention and response efforts for male Service members who report a sexual assault.

FY16 Actions to Improve Response for Male Service Members

Developed the DoD Men's SAPR Plan

The Department merged analysis conducted in FY15 with other research, focus group results, and expert advice to develop the *DoD Plan to Prevent and Respond to Sexual Assault of Military Men (Men's SAPR Plan)*. The *Men's SAPR Plan* outlines four objectives to address military sexual assault against men:

- **Objective 1:** Develop a unified communications plan tailored to men across DoD
- **Objective 2:** Improve Service member understanding of sexual assault against men

- **Objective 3:** Ensure support services meet the needs of military men who experience sexual assault
- **Objective 4:** Develop metrics to assess prevention and response efforts pertaining to males who experience sexual assault

The *Men's SAPR Plan* instructs the Department to convene a group of research specialists from DoD, the Military Services, and military medical/behavioral care communities in order to identify ways to achieve the objectives outlined in the plan.

For objectives 1 through 3, the Department will draw on formative research and assess existing research and data to develop a better understanding of the experiences and needs of men who experience sexual assault. Additionally, the Department will evaluate Service-specific programmatic efforts and determine how to address associated gaps among current outreach, response, and prevention efforts. The Department will also collaborate with relevant stakeholders to develop and evaluate research-informed practices in support of each objective. Throughout the process, the Department will develop metrics (objective 4) to assess progress annually on objectives 1 through 3. Three years after the completion of objectives 1 through 4, the Department will perform a comprehensive evaluation of its outreach, response, and prevention efforts regarding males who report sexual assault.

To achieve objectives 1 through 4, the *DoD Men's SAPR Plan* directs the Department to develop the following research-informed products/guidelines:

- Gender-inclusive communication plan and materials to encourage male reporting (objective 1)
- SAPR training core competencies and learning objectives to improve Service members' understanding of male victimization and crime prevention (objective 2)

- Core competencies and learning objectives for commander/supervisor training to engage leaders in preventing male victimization and reduce associated stigma (objective 2)
- Gender-responsive treatment guidelines and core competencies/learning objectives for provider training (objective 3)
- Core competencies and learning objectives for first responder training to improve response services for males who report sexual assault (objective 3)
- Report to summarize the research reviewed by the working group (objectives 1-3)
- Metrics to assess progress on objectives 1 through 3 (objective 4)
- Comprehensive evaluation of the Department's outreach, response, and prevention efforts regarding male survivors of sexual assault (three years after the implementation of objectives 1-4)

The *DoD Men's SAPR Plan* articulates the Department's unified commitment to developing a data-driven prevention and response system that is tailored to military men and supported by leaders at all levels.

Conducted DoD Safe HelpRoom Webinar on Support for Men who Experience Sexual Assault

DoD SAPRO sponsored a webinar for approximately 100 SARCs and SAPR VAs in the DoD Safe HelpRoom on how to support men who experienced sexual assault. The information not only enhanced these responders' knowledge about male survivors, but it also showcased the capabilities of the DoD Safe HelpRoom - a Safe Helpline service that allows sexual assault survivors in the military to connect with and support one another in a moderated and secure online group chat environment.

Implemented Methods to Improve Response and Outreach to Male Service Members

The Military Services and NGB also worked to improve their response to male Service members who experience sexual assault:

- Army – The Army SHARP Program Office hosted male survivor panels during SAAPM. These events introduced the idea of the “Silent Survivor,” a man who experienced sexual assault, but for varying reasons did not report or share the experience with others. Additionally, the Army updated its Emergent Leader Immersive Training Environment (ELITE) SHARP on-line training program to address unique aspects of male sexual assault survivors. The ELITE program is an interactive video game aimed at improving the knowledge of young Service members.
- Navy – Navy SAPR incorporates relevant research, survey results, and feedback into SAPRO policy and training to emphasize that both men and women can be victims of sexual assault. SARCs facilitate critical element training for SAPR VAs on specific male barriers to reporting, male physiology, myths and facts, societal influences, and specific resources for male victims of sexual assault to promote SAPR VA proficiency in responding to male victims.
- Marine Corps – In FY16, the HQMC SAPR Research Section began planning and conducting interviews with SARCs and SAPR VAs at five Marine Corps installations, as part of its *Evaluating Best Practices for Interacting with Male Marines Who Experienced a Sexual Assault* study. Data gathering and analysis for the study will be completed in FY17.
- Air Force – A new block of instruction, *Male Victimization*, was added to the 2016 Air Force SARC course. The new course addresses myths surrounding male victims of sexual assault, as well as

issues such as hyper-masculinity, rituals, hazing, and traditions. The course provides specific guidance for SARCAs on advocacy and outreach for male victims.

- NGB – NGB continued to stress the importance of increasing awareness of male victimization, identifying and addressing the unique concerns of the male victim, and improving the environment to encourage more men to feel safe enough to come forward. Many states have made concerted efforts to increase the number of male SAPR VAs they have available. Additionally, New York also increased training efforts for commanders and key leaders on ways to improve support and communication with male National Guard members who report sexual assault.

Way Forward on Improving Response for Male Service Members in FY17

Implement the DoD Plan to Prevent and Respond to Sexual Assault of Military Men

The Department has already started work to implement the *DoD Men's SAPR Plan*. A working group comprised of research and program specialists from the Department, the Military Services, and the military medical/behavioral care communities has been established.

Launch the Male Peer-to-Peer Safe HelpRoom Series

The Department will host a series of male survivor peer-to-peer group-chat sessions to provide a safe, anonymous space for military men who experienced sexual assault. The series will allow men to ask questions, air concerns, and receive peer-to-peer support through the confidential and anonymous DoD Safe Helpline.

Combating Retaliation Associated with Sexual Assault Reporting

A number of military members reporting sexual assault have indicated they perceived abusive behavior by their co-workers, exclusion by their peers, and/or disruption of their military career. Retaliation^{xiii} associated with reporting a crime not only harms the lives and careers of victims, bystanders/witnesses, and first responders, but also undermines military readiness and weakens the culture of dignity and respect.

The 2016 WGRA included the new measure of retaliation originally piloted with uniformed military survivors in the 2015 MIJES and the 2015 *Workplace and Gender Relations of Reserve Component Members*. The retaliation measures used in the 2012 WGRA and the 2014 RMWS imprecisely assessed Service members' experiences by using the terms "professional" and "social" retaliation – terms that are not defined in policy and law. These measures stood in as proxies for the experience of retaliation. Both the 2012 and the 2014 surveys found that about 60 percent of female Service members, who indicated experiencing a sexual assault in the past year and reported to a DoD authority, perceived professional and/or social retaliation. Most of these respondents indicated that "social" retaliation was more common than "professional" retaliation. Data were not reportable for men due to the small numbers of respondents in these categories.

The new measure included in the 2016 WGRA uses language and circumstances in policy and law to gain a better understanding of the broad range of negative experiences perceived by members to be associated with reporting. The measure also helps the Department better understand what portion of such experiences can be addressed with current investigative and/or legal approaches. The 2016 WGRA asked respondents to identify specific negative outcomes they

associated with the reporting of a sexual assault. Follow-up questions then assessed the apparent intent of the alleged retaliator as gleaned by the survey participant. Retaliation affecting Service members' professional opportunities typically constitutes reprisal.^{xiv} Ostracism involves improper exclusion from social acceptance.^{xv} Maltreatment, as well as acts of cruelty or oppression for the purposes of this report, includes actions committed against a reporter of sexual assault by someone that may include physical or psychological force or threat of force.^{xvi}

FY16 Assessment of Progress

A Quarter of Service Members Who Indicated Experiencing a Sexual Assault and Reported It to DoD Met Survey Criteria for Professional Reprisal

As previously indicated, the 2016 WGRA employed the new retaliation measure that relies on the terms and circumstances in policy and law to better differentiate the kinds of retaliation perceived by respondents indicating they experienced and reported a sexual assault. In FY16, 40 percent of active duty Service members (36 percent of women and 50 percent of men) indicated experiencing a negative outcome they perceived to be professional reprisal as a result of reporting a sexual assault. However, only 23 percent (19 percent of women and 36 percent of men) of active duty Service members' circumstances met the survey criteria described in policy and law for professional reprisal.

Over half (52 percent) of DoD women perceiving professional reprisal indicated the person who took these actions was their senior enlisted leader, while 54 percent indicated it was another member in their chain of command, but not their unit

commander, who took the actions, and 37 percent indicated their unit commander took the actions. Respondents could pick one or more of these individuals. The majority of DoD women who experienced sexual assault and perceived reprisal indicated that the behaviors taken by their leadership yielded some level of harm to their career (90 percent). Fewer than half of DoD women who experienced sexual assault indicated they decided to participate and/or move forward with their report of sexual assault, even after indicating they perceived professional reprisal associated with their report (44 percent). Data were not reportable for men due to the small numbers of respondents in these categories.

About 14 Percent of Service Members Who Indicated Experiencing a Sexual Assault and Reported It to DoD Met Survey Criteria for Ostracism

In FY16, 50 percent of active duty Service members (51 percent of women and 47 percent of men) endorsed experiencing a negative outcome they perceived to be ostracism because of reporting their sexual assault. However, only 14 percent (12 percent of women and 17 percent of men) of these members' circumstances met the survey criteria described in policy and law for ostracism. Three-quarters of DoD women indicated the person who ostracized them was a Service member in a higher rank in their chain of command.

About 18 Percent of Service Members Who Indicated Experiencing a Sexual Assault and Reported It to DoD Met Survey Criteria for Maltreatment

In FY16, 38 percent of active duty Service members (38 percent of women and 38 percent of men) endorsed experiencing a negative outcome they perceived to be maltreatment as a result of reporting sexual assault. However, 18 percent (18 percent of women and 19 percent of men) of these members' circumstances met the survey criteria described in policy and law for maltreatment. Again, a little more than three-

quarters (68 percent) of DoD women indicated the person who took these actions was a Service member in a higher rank in their chain of command. Further, 82 percent of DoD women indicated the person they perceived to have maltreated them was in a position of authority or leadership over them.

Social Media Plays a Role in About a Third of Perceived Ostracism and/or Maltreatment Experiences

Members who indicated experiencing behavior in line with perceived ostracism and/or maltreatment were also asked if any of the actions they marked involved social media. The survey question provided examples of social media, such as Facebook, Twitter, Yik Yak, and Snapchat. Twenty-nine percent of these respondents indicated the ostracism and/or maltreatment behaviors they perceived involved some form of social media.

About 32 Percent of Service Members Who Indicated Experiencing a Sexual Assault and Reported It to DoD Met Survey Criteria for Any Kind of Retaliation (Professional Reprisal, Ostracism, and/or Maltreatment)

This section combines all three forms of retaliation previously described into a single statistic. In FY16, 58 percent of active duty Service members (58 percent of women and 60 percent of men) indicated experiencing a negative outcome they perceived as professional reprisal, ostracism, and/or maltreatment after reporting sexual assault. This measure differs from those employed in 2012 and 2014 survey. However, using a non-scientific comparison, the proportion of Service members perceiving a negative outcome as some kind of retaliation in 2016 is roughly the same as measured by surveys in 2012 and 2014.

The 2016 WGRA also asked a series of questions to measure whether members indicated perceiving negative experiences met the legal criteria for an investigation to

occur. Of those Service members who indicated experiencing a negative outcome after reporting a sexual assault, 32 percent met the survey criteria described in policy and law for professional reprisal, ostracism, and/or maltreatment.

The 58 percent of DoD women who met the criteria for inclusion in the rate of perceived professional reprisal, ostracism, and/or maltreatment were subsequently asked about the actions they took. After experiencing perceived professional reprisal, ostracism, and/or maltreatment: Eighty-three percent of DoD women indicated that they discussed the behaviors with their friends, family, coworkers, or a professional. Meanwhile, 58 percent of DoD women indicated they discussed it with a work supervisor or anyone up their chain of command to get guidance on what to do and 64 percent expected some corrective action would be taken. About one-quarter (26 percent) of DoD women indicated filing a complaint of perceived professional reprisal, ostracism, and/or maltreatment. Data were not reportable for men due to the small numbers of respondents in these categories.

Uniformed military survivors who participated in the 2016 *MIJES*^{xvii} had similar perceptions of professional reprisal, ostracism and/or maltreatment associated with their report of sexual assault. Twenty-eight percent of eligible survey respondents indicated experiencing perceived professional reprisal and met the criteria described in policy and law. Of the 28 percent who met the legal criteria for inclusion in the rate of perceived professional reprisal, 66 percent indicated the person who took these actions was another member in their chain of command but not their unit commander, while 56 percent indicated their senior enlisted leader took these actions. Additionally, 50 percent indicated their unit commander took these actions, 40 percent indicated a higher ranking member in their chain of command, 6 percent indicated their deputy commander, and 5 percent indicated they were not sure who took the actions.

Of the 28 percent who indicated perceiving professional reprisal, nearly all eligible survey respondents (95 percent) indicated the behaviors taken by their leadership yielded some harm to their career. After indicating they experienced perceived professional reprisal as a result of reporting sexual assault, 79 percent of respondents indicated they decided to participate and/or move forward with their report of sexual assault.

Findings from uniformed sexual assault survivors in the 2016 *MIJES* show that 17 percent of eligible survey respondents indicated experiencing perceived ostracism as a result of reporting sexual assault and met the legal criteria. Seventy-eight percent of eligible survey respondents who indicated experiencing perceived ostracism said that the person who they perceived as ostracizing them was a Service member in a similar rank as they were. Other respondents indicated it was a Service member in a higher rank within their chain of command (73 percent), a Service member in a higher rank not in their chain of command (65 percent), a Service member in a lower rank than themselves (51 percent), or a DoD civilian (14 percent) who took these actions.

Additionally, 24 percent of eligible 2016 *MIJES* respondents indicated perceiving maltreatment that met the legal criteria described in policy and law. Of these 24 percent, about three-quarters (74 percent) indicated the person who they perceived maltreatment from was a Service member in a higher rank within their chain of command. Other respondents indicated it was a Service member in a similar rank as them (68 percent), a Service member in a higher rank not in their chain of command (49 percent), a Service member in a lower rank than they were (42 percent), a DoD civilian (13 percent), or they were not sure who they were (4 percent) who took these actions. Further, 75 percent of those who indicated experiencing perceived maltreatment also said the person who took the perceived maltreatment actions was in a position of

authority/leadership over them. Of the 24 percent who indicated they experienced perceived maltreatment as a result of reporting sexual assault, 83 percent of eligible survey respondents indicated that they decided to participate and/or move forward with their report of sexual assault.

FY16 Retaliation Reporting Data

The Military Services and NGB provided data on allegations of retaliation received in FY16, associated with reports of sexual assault and/or complaints of sexual harassment. Information submitted by the Military Services and NGB varies depending on Service/NGB approach (e.g., Department of the Navy only submits data on cases with completed investigations, whereas the Army, Air Force, and NGB provide information on completed and ongoing investigations).

In FY16, the Department requested the Military Services provide two types of data:

- **Case Management Group (CMG) Retaliation Allegations:** The Military Services and NGB provided data on all retaliation allegations discussed at CMG meetings in FY16, involving victims, witnesses/bystanders, and first responders associated with reports of sexual assault. These data do not likely represent all retaliation allegations because victims, witnesses/bystanders, and first responders who believe they have experienced retaliation have the option of requesting their experience be discussed at a CMG. This year, 67 individuals requested their allegation of retaliation be discussed at the CMG at their installation. Victims of sexual assault made the vast majority of retaliation allegations (61). In addition, one witness/bystander and five first responders submitted their retaliation allegations to the CMG. Of the 67 retaliation allegations, 35 alleged ostracism and/or cruelty/oppression/maltreatment, 20 alleged reprisal, 2 alleged another criminal offense in

relation to the report of sexual assault, and 10 alleged a combination of reprisal, cruelty/oppression/maltreatment, and other misconduct. Women made the majority of retaliation allegations: 47 women and 20 men had allegations discussed at CMGs.

- **Investigations of Alleged Retaliation:**

The Military Services and NGB provided data on all FY16 allegations of retaliation investigated and/or handled by Service/NGB or DoD Inspectors General (IG), Military Criminal Investigative Organizations (MCIO), Law Enforcement, and Commander-Directed Inquiries. These data pertain to allegations of retaliation associated with Unrestricted Reports of sexual assault or formal/informal complaints of sexual harassment. The Military Services and NGB received 84 retaliation reports against 169 alleged retaliators in FY16 associated with sexual assault or sexual harassment reports. Additionally there were 11 reports, involving 12 alleged retaliators from prior years that had a completed investigation in FY16, for a total of 95 reports. Of the 95 reports, 81 percent involved female reporters and 74 percent were related to an Unrestricted Report of sexual assault, with the remainder related to formal complaints of sexual harassment (22 percent), a situation where the reporter was suspected of making a sexual assault report, i.e., Restricted report or other, (3 percent), or informal complaints of sexual harassment (1 percent). The following entities investigated these reports: DoD or Service IGs (61 percent), MCIOs (35 percent), chain of command (3 percent), chain of command and DoD IG (1 percent).

Each data source offers a different perspective on the retaliation allegations. The CMG data provide information on initial actions taken to refer allegations to the appropriate entity and provide support for the individual making the allegation. The data on

investigations provide greater detail on actions taken to officially assess the allegations, gather evidence, protect the parties involved, and hold offenders appropriately accountable. Additional information on FY16 retaliation allegations can be found in Appendix B.

The Department views retaliation associated with crime reporting as a significant concern and is committed to eliminating retaliatory behavior, improving resources for victims, and providing tools for commanders, supervisors, and peers to prevent and respond to retaliation.

FY16 Retaliation Prevention and Response Actions

Published the *DoD Retaliation Prevention and Response Strategy*

The Secretary of Defense signed the comprehensive strategy in April 2016 to prevent retaliation after a report of sexual assault or complaint of sexual harassment. DoD SAPRO collaborated with key Military Services' and Office of the Secretary of Defense (OSD) representatives to develop the *DoD Retaliation Prevention and Response Strategy (RPRS)*.

The *DoD RPRS* aligns efforts and details policy and procedures related to retaliation against victims who report a sexual assault, complainants of sexual harassment, bystanders or witnesses involved in the incident, and first responders, such as SARCs and SAPR VAs, Equal Opportunity Advisors, and the like who experience retaliation related to the execution of their duties and responsibilities.

The strategy targets five issue areas:

- Standardizing the definitions across the Department of various types of retaliation;
- Implementing a data-driven approach to inform retaliation prevention and

response, including a centralized process to integrate data from retaliation cases;

- Creating a standardized retaliation reporting and resolution process to ensure strong and supportive systems of investigation and accountability;
- Creating a comprehensive system of support for those who report retaliation; and,
- Educating and preparing DoD personnel to prevent retaliation and create a culture intolerant of retaliation.

Established DoD IG Whistleblower Reprisal Directorate

The DoD OIG Whistleblower Reprisal Directorate created the Sexual Assault Protected Communications (SA PC) Team. The SA PC Team is responsible for objectively and thoroughly investigating whistleblower reprisal complaints filed by members of the armed forces, DoD appropriated and non-appropriated fund employees, and DoD contractors and subcontractors. The SA PC Team is also the unit responsible for investigating whistleblower reprisal complaints in which one or more protected communications involve allegations of sexual assault.

Investigators on the SA PC Team work with complainants to determine if a *prima facie*^{xviii} allegation of whistleblower reprisal exists; investigate *prima facie* allegations of whistleblower reprisal; and report investigative findings and conclusions in a Report of Investigation.

Service members who believe they have experienced retaliation are able to report their experiences safely and securely to the DoD IG through the DoD Hotline^{xix} and/or through the DoD Safe Helpline^{xx}. DoD Safe Helpline staff members also undergo training on the FY14 NDAA's definition of retaliation, the DoD IG Whistleblower Protection Act, and the DoD IG Hotline so they can assist and direct accordingly any Service member who calls the hotline.

Messaged Ways to Report Allegations of Retaliation

The Military Services and NGB worked throughout FY16 to communicate the retaliation reporting process to Service members. Service and NGB efforts to communicate the retaliation reporting process to Service members included:

- Army – Messaging related to retaliation prevention and response is integrated into all aspects of the SHARP marketing, communications, and outreach efforts. This includes brochures, posters, infographics, senior leader talking points, and Army News Service articles.
- Navy – Fleet Workshops aimed at countering destructive behaviors cover retaliation as well. Each workshop includes a Fleet-wide roll up of retaliation data from Command Climate Surveys and a review of reporting protocols and procedures.
- Marine Corps – The Marine Corps published a formal message on methods to report retaliation and the resolution process on the Marine Corps homepage and as part of its social media campaign. The Inspector General of the Marine Corps (IGMC), Headquarters Marine Corps (HQMC) Judge Advocate Division, HQMC SAPR, and the Naval Criminal Investigative Service collaborated to produce the message, which defined retaliation and provided guidance on the various avenues available for reporting. The Marine Corps posted the message to its official social media website, where the post reached over 110,000 people and connected interested viewers to the IGMC website.

- Air Force – The Air Force required all uniformed Airmen and civilians supervising military members to receive initial first-line supervisor training on preventing retaliation in FY16. The training focused on enabling supervisors to recognize signs or possible acts of retaliation, take action to address retaliation incidents, and better understand which resources are available to military Airmen experiencing retaliation.
- NGB – Generally, each state distributes, posts, and disseminates sexual assault and retaliation information in a variety of ways. For example, the Kentucky National Guard (KYNG) included information on how to report and respond to allegations of retaliation in its SAPR/SHARP training. Additionally, the KYNG SAPR Office conducted a 90-minute workshop on “Allegations of Retaliation” in a November 2016 statewide conference.

Way Forward on Retaliation Prevention and Response in FY17

Implement the *DoD Retaliation Prevention and Response Strategy*

The next step in combatting retaliation is to operationalize and implement the *DoD RPRS*. The Department further defined actions to address the five issue areas through working groups co-led by OSD and Military Service representatives. These working groups led to the *DoD Retaliation Prevention and Response Implementation Plan* published in January 2017, and thereafter disseminated throughout the Department.

Summary

The actions taken in FY16 reflect DoD's ongoing commitment to preventing sexual assault and ensuring that victims receive comprehensive support services. The *FY 2016 Annual Report on Sexual Assault in the Military* outlined key program efforts – sexual assault prevention, ensuring a quality response, response to male Service members who report sexual assault, and retaliation prevention and response – where the Department took significant action to accomplish its mission of reducing, with the goal to eliminate, sexual assault from the military.

These program efforts are not inclusive of every aspect of the crime of sexual assault, nor does this report detail every action that the Department, Military Services, and NGB are taking to prevent and respond to this crime. Additional program highlights can be found in Appendix A of this report. The Department continues to assess its programs

and policies to ensure that it is effectively addressing the needs of Service members. Feedback from surveys and focus groups of active and reserve Service members is instrumental to this effort. The Department is encouraged by the increase in the number of Service members who chose to report their sexual assault in conjunction with the decrease in estimated sexual assault prevalence. Every step closer to reducing this gap brings the Department closer to achieving its goal of eliminating sexual assault from the military.

While this year's data show promise that the Department's efforts are working the way they were intended, it does not mean that work will cease. The Department plans to continue with its forward momentum by implementing key program elements in FY17.

ⁱ Based on a constructed 95 percent confidence interval ranging from 14,000 to 15,700, an estimated total of 14,900 DoD active duty members indicated experiencing a sexual assault in the past 12 months.

ⁱⁱ See Chapter 2 of the 2016 Workplace and Gender Relations Survey of Active Duty Members for a description of the methodology that developed the estimated past-year prevalence of sexual assault.

ⁱⁱⁱ See Metric 1 in the Metrics Section, which is Appendix C to this report.

^{iv} Unwanted Sexual Contact (USC) is the survey term that describes the crimes in the UCMJ that constitute sexual assault, which range from penetrating crimes, such as rape, to non-penetrating crimes, such as abusive sexual contact. USC involves intentional sexual contact that was against a person's will or occurred when the person did not or could not consent. The term describes completed and attempted oral, anal, and vaginal penetration with any body part or object, and the unwanted touching of genitalia and other sexually related areas of the body. When the RAND Corporation conducted the *RMWS* in 2014 and created a new sexual assault measure, the term USC became obsolete.

^v In 2006, respondents were asked about whether their use of alcohol impaired their judgment or caused them to be intoxicated and unable to consent, whether the alleged offender(s) were intoxicated, and whether the alleged offender(s) used drugs to knock them out. In 2016, the questions were not as specific and asked if the member had been drinking alcohol before the unwanted event, whether the alleged offender bought the member alcohol, if the alleged offender(s) had been drinking before the unwanted

event, and if they think they may have been given a drug without their consent. Results for alcohol and drug use from this year's survey were collapsed into any alcohol and/or drug use.

^{vi} Rothman, E.F., Exner, D., & Baughman, A.L. (2011). "The Prevalence of Sexual Assault against People Who Identify as Gay, Lesbian, or Bisexual in the United States: A Systematic Review." *Trauma, Violence, & Abuse*, 12(2): 55-66.

^{vii} Rennison, C. M. (2002). *Rape and Sexual Assault: Reporting to Police and Medical Attention, 1992-2000*. Retrieved February 28, 2016 from Bureau of Justice Statistics: <http://bjs.ojp.usdoj.gov/content/pub/pdf/rsarp00.pdf>.

^{viii} Adams, Robert. *Empowerment, participation and social work*. New York: Palgrave Macmillan, 2008, p.12.

^{ix} A subset of total reports, this calculation includes only Service members who made a report of sexual assault during Military Service (4,794).

^x 95% confidence interval ranges from 5,500 to 7,000

^{xi} 95% confidence interval ranges from 7,900 to 9,300

^{xii} Rennison, C. M. (2002). *Rape and Sexual Assault: Reporting to Police and Medical Attention, 1992-2000*. Retrieved February 28, 2016 from Bureau of Justice Statistics: <http://bjs.ojp.usdoj.gov/content/pub/pdf/rsarp00.pdf>.

^{xiii} Retaliation for reporting a criminal offense can occur in one of three ways: reprisal (as legally defined in 10 U.S.C. § 1034), ostracism, or maltreatment. In January 2017, DoD issued standardized definitions for retaliation, reprisal, and ostracism. However, the standardized definitions were implemented beyond the time period covered in this report.

^{xiv} Reprisal can involve a range of unjustified personnel actions, such as interfering with promotion, unreasonably downgrading someone's evaluation, or unfairly denying an award. Title 10 U.S.C. § 1034.

^{xv} Examples of ostracism include improper exclusion from social acceptance, activities, or interactions due to reporting or planning to report a crime; victim blaming and bullying. Specific definitions of ostracism differ across the Department; Air Force Instruction 36-2909; Secretary of the Navy Instruction 5370.7D; Army Directive 2014-20. In 2017, DoD issued a standardized definition for ostracism.

^{xvi} The retaliation questions on the 2016 WGRA were not based on the definitions released by the DoD in January 2017 in the DoD RPRS Implementation Plan.

^{xvii} To protect the anonymity of MIJES respondents, results are presented at the Total DoD level only.

^{xviii} Based on first impression and accepted as correct until proven otherwise.

Appendix A: FY16 Line of Effort Highlights

Appendix A: Fiscal Year 2016 Lines of Effort Highlights

This Appendix details additional program and policy advances that the Department completed last year. The Department uses the structure of the *2015 DoD SAPR Strategic Plan* to organize the FY16 highlights by five lines of effort (LOEs). The *Strategic Plan* employs a multidisciplinary approach with initiatives in each LOE. This promotes unity of effort throughout the Department.

Prevention

Enhanced ROTC Outreach Efforts

The Department expanded efforts to promote SAPR training to Reserve Officer Training Corps (ROTC) cadets and midshipmen. The Military Services commission approximately 35 percent of incoming officers through ROTC. The training emphasized the critical role a healthy climate plays in the active force. In FY16, DoD SAPRO visited multiple universities and spoke with ROTC cadets, cadre, veteran students, student government officials, and Title IX Coordinators. The outreach events highlighted DoD's lessons learned over the past ten years, broadened strategic

relationships with academia, and explored ways for ROTC to lead efforts to strengthen campus prevention activities.

Expanded DoD SAPR Connect Outreach Efforts

DoD SAPR Connect is the Department's sexual assault Community of Practice prevention collaboration and information sharing forum. *DoD SAPR Connect* leverages face-to-face meetings, virtual resources, webinars, and a community toolkit to strengthen prevention efforts and support personnel working the SAPR program. More than 2,000 *DoD SAPR Connect* members access the online portal to share information on prevention initiatives to include videos, new research, policy documents, briefings, and campaign plans.

Quarterly Webinars

DoD SAPR Connect quarterly webinars further expand current information-sharing efforts. The Department continued hosting webinars with SAPR personnel and other Service members from around the world. SAPRO designs these virtual meetings to emphasize key components of the Department's prevention strategy. In FY16, SAPRO featured webinars that addressed strategy program elements such as employing effective communications and engaging leadership support. Webinar participants earn Continuing Education Units (CEUs) toward their re-certification as SARCs or SAPR VAs. As of FY16, SAPRO has held 18 webinars involving nearly 2,500 Service members and has awarded more than 2,400 CEUs.

In FY16, the National Guard Bureau (NGB) asked DoD SAPRO to conduct a customized series for its Sexual Assault Response Coordinators (SARC). The

DoD SAPR Strategic Plan LOEs	
LOE	Objectives
LOE 1: Prevention	Deliver consistent and effective prevention methods and programs.
LOE 2: Investigation	Achieve high competence in the investigation of sexual assault.
LOE3: Accountability	Achieve high competence in holding offenders appropriately accountable.
LOE 4: Advocacy/ Victim Assistance	Deliver consistent and effective victim support, response, and reporting options.
LOE 5: Assessment	Effectively standardize, measure, analyze, assess, and report program progress.

sessions focused on providing NGB SARC's an overview of the DoD Prevention Strategy. SAPRO personnel then facilitated discussions on how participants might apply prevention principles in NGB environment.

The Prevention Roundtable

DoD SAPR Connect also features activities outside of the virtual world. The Prevention Roundtable serves as its face-to-face component, acting as a communications forum for representatives from the Military Services, NGB, and the Coast Guard (USCG). In FY16, the Roundtable expanded participation to include representatives from the Military Service Academies and ROTC Cadet Commands.

Attendees share emerging practices and prevention updates from the Military Services, NGB, and USCG and hear presentations from Subject Matter Experts. Quarterly meeting discussions address challenges to prevention program implementation and institutionalization.

Coordinated DoD-wide SAAPM Efforts

DoD SAPRO facilitated the Department-wide Sexual Assault Awareness and Prevention Month (SAAPM) observance in April 2016. DoD SAPRO supported many of the Military Services' events in the Washington D.C. area throughout the month to show support for survivors and promote prevention. The Department encouraged all leadership within DoD to promote the SAAPM 2016 theme: "Eliminate Sexual Assault. Know Your Part. Do Your Part."

In April, the Secretary of Defense hosted the 2016 Exceptional SARC Award ceremony. The Secretary honored six SARC's whose work has been particularly noteworthy, and who showed outstanding service and innovation in carrying out their duties for Service members. At the event, Secretary Ash Carter also had the opportunity to announce the release of the *DoD Retaliation Prevention and Response Strategy*. He described the measures the Department is taking to prevent and respond to retaliation resulting from reporting an incident of sexual assault or sexual harassment. This ceremony capped off SAAPM and recognized the ongoing work being done across the Total Force.

Defense Secretary Ash Carter poses with the SARCs of the Year during a ceremony at the Pentagon on April 28, 2016. The recipients are, from left, Army Master Sgt. Melinda Heikkinen, Coast Guard civilian Simone Hall, Air Force Capt. Elizabeth Belleau, Army Sgt. 1st Class Raquel Mendoza, Marine Corps civilian Jacqueline Maxwell, and Navy civilian Deborah Drucker. DoD photo by Army Sgt. 1st Class Clydell Kinchen. *Source: Defense.gov*

Presented Sexual Assault Prevention Innovation Award

The Department initiated the annual Sexual Assault Prevention Innovation Award in 2014 to recognize Service members and DoD civilians who contributed to or developed an innovative idea, concept, or approach that positively affected prevention efforts. The Military Services, NGB, and USCG each nominate an individual or group for the award each year. The awardees for FY16 helped improve command climate by creating an interactive skit aimed at bystander intervention; designing an interaction model that promoted “consent first” practices; and developed targeted training for the most at-risk populations.

Collaborated with DEOMI on Assessment to Solutions

The Defense Equal Opportunity Management Institute (DEOMI) assists commanders and Equal Opportunity program professionals through Assessment to Solutions, a website housing tools and products to address the mission-impacting issues identified during the climate assessment process. DoD SAPRO collaborated with DEOMI to update the

information on the site to promote improved sexual assault reporting climate, prevention, and knowledge about the SAPR program.

Investigation

Collaborated with DoD IG Reprisal Office

DoD SAPRO cooperated with the DoD IG to support its newly established Whistleblower Reprisal Directorate, which is responsible for investigating sexual assault victims' reports of reprisal. DoD SAPRO provided specialized training to IG Investigators that focused on sexual assault reporting options, best practices for working with sexual assault survivors, and DoD Safe Helpline resources. The training focused on how the DoD Safe Helpline is an additional resource for Service members who believe they have experienced retaliation. Survivors may securely report their experience to either DoD SAPRO or to the DoD Inspector General (IG), using a secure form on the DoD Safe Helpline website (www.safehelpline.org). Users may remain anonymous or provide contact information on the form, which is subsequently shared with the DoD IG Hotline. The Safe Helpline website also has a link that takes users directly to the DoD IG Hotline web form to report an allegation of retaliation.

Accountability

Designed a Program to Receive Incident and Suspect Information from Restricted Reporters

Section 543 of the National Defense Authorization Act (NDAA) for FY 2015 required the Department to develop a plan to allow an individual who files a Restricted Report to disclose confidentially an alleged suspect or incident information. In response to this requirement, the Department developed the “Catch a Serial Offender” (CATCH) Plan in FY16. Once implemented, the CATCH program will allow a victim to participate by anonymously filling out an electronic MCIO “form” with information about the incident without compromising the nature

of the restricted report. Should additional information someday be submitted by another victim about one of the alleged offenders in the system, SAPR personnel will contact the survivor(s) to assess their willingness to change their restricted report to unrestricted and participate in an investigation and the military justice process. The Department of the Navy is acting as the Executive Agent for this program and will develop the information system required to store and retrieve information.

Advocacy/Victim Assistance

Convened the Victim Assistance Leadership Council

The Department established the Victim Assistance Leadership Council in accordance with DoDI 6400.07, *DoD Victim Assistance Standards for Military Services*, in September 2014. The Council advises the Secretary of Defense on policies and practices related to victim assistance across four programs: sexual assault prevention and response, family advocacy, victim-witness assistance, and sexual harassment. The Council also provides a forum for senior leaders within each of the four program areas to exchange information and collaborate on issues affecting victims of crime and harassment. Additionally, the Council works to promote efficiencies, coordinate victim assistance-related policies, and assess the implementation of victim assistance standards.

The FY16 Council's second meeting worked to identify and address policy gaps. The VALC decided to establish a high-level working group to develop metrics regarding Victim Assistance Standards.

Launched the D-SAACP Advanced Advocacy Course

The DoD Sexual Assault Advocate Certification Program (D-SAACP) Advanced Advocacy Course is a unique distance-learning opportunity presented through a

contract with the National Organization for Victims Assistance and modeled after its Victim Assistance Academy. The course is interactive and brings the classroom directly to participants wherever they are located. The course includes specialized sexual assault training for new and experienced SARCs and SAPR VAs within the DoD community to enhance core competencies and improve the quality of assistance provided to military survivors. The 20-hour course focuses on victim advocacy and includes a separate module on Outreach to Men.ⁱ Approved for continuing education unit requirements, the course augments the Military Services' initial victim advocacy training.

DoD SAPRO launched the first course session with over 60 SARCs, SAPR VAs, and SAPR Program Managers. Over 1,000 participants have now attended the course. Trainees include SAPR program personnel from the Services and National Guard.

Enhanced the D-SAACP Advanced Military Sexual Assault Advocate Training On-Line

DoD SAPRO enhanced its advanced victim advocacy online course through a collaborative effort with the Office for Victims of Crime (OVC).ⁱⁱ The course aims to improve the quality of victim support and enhance SARC and SAPR VA job skills. OVC hosts the interactive, scenario-based course on its website. The 20-hour course counts toward D-SAACP continuing education credits.

Learning objectives include: the understanding of post-traumatic reactions; advocating for victims from the outset of a report through case conclusion; providing crisis management support in complex, highly publicized, or particularly sensitive cases; and understanding the ethical implications of the advocacy role. This course augments the Military Services' entry-level SAPR training programs.

Strengthened Military and Civilian Partnerships to Respond to Victims of Sexual Assault

The Department assisted OVC to develop the “Strengthening Military-Civilian Community Partnerships to Respond to Sexual Assault” training program in 2008. SAPRO personnel this year continued to support this collaborative education effort. The program is an interactive, one-day training for civilian community advocates and other responders to better respond to the needs of military sexual assault victims seeking assistance outside of installations. Topics cover the military’s SAPR program, military culture, military victims’ unique needs, on-base resources, the military justice system, and assistance between military and civilian communities.

Provided Subject Matter Expertise to Field Operations

SAPRO subject matter experts provided training and consultation support to a variety of Department operations this year, including:

- Army Special Victims’ Counsel Program
- Air Force Special Victims’ Counsel Program
- DEOMI Leadership Training Awareness Seminar
- Service SARC and SAPR VA Training Courses

Assessment

Enhanced DSAID

The Defense Sexual Assault Incident Database (DSAID) captures sexual assault case information input by the Military Services, National Guard Bureau, and Coast Guard for Restricted and Unrestricted

Reports. DSAID also facilitates SARCs’ victim case management, enables legal officers to input and validate case disposition data, and supports Service SAPR program management. It further provides improved oversight of the management of sexual assault cases and offers the Department the capability to meet reporting requirements, validate data, and standardize information collection.

DSAID enhancements or program accomplishments in FY16 include:

- Using DSAID to generate sexual assault data sets for the *FY16 Annual Report on Sexual Assault in the Military* and the *Annual Report on Sexual Harassment and Violence at the Military Service Academies for Academic Program Year 2015-2016*;
- Conducting two DSAID webinars to answer SARCs and SAPR Program Managers questions and review recent DSAID updates, the DSAID Case Management Group meeting minutes function, and information elements coming from the investigative agency interfaces;
- Upgrading from Oracle to Oracle Enterprise with Advanced Security for increased cybersecurity controls to protect sexual assault data;
- Leading monthly DSAID Change Control Board meetings with Military Service, NGB, and USCG representatives to discuss program updates and change requests;
- Deploying seven total releases enhancing DSAID’s case management, interfaces, reports, security, and user functionality;
- Utilizing the quality assurance tool assists the Department and the Military Services to identify missing data and conduct data validation.

ⁱ Topics include Crisis Response Skills, Communication Skills for Victim Advocates, Other Crimes as They Relate to Sexual Assault, Drug-facilitated Sexual Assault, Trauma and Resilience, Cultural Competency, Vicarious Trauma & Self-Care; Comparison of Military and Civilian Criminal Justice System; LGBTQ Issues in Victim Advocacy; Victims Compensation; Program Management; Outreach to Male Survivors; Ethics and Confidentiality in Victim Services and Prevention Effort: Best Practices.

Appendix B: Statistical Data on Sexual Assault

Background

Purpose

The Department of Defense (DoD) collects data on sexual assault to inform SAPR policy, program development, and oversight actions. Congress requires data about the number of sexual assault reports and the outcome of sexual assault investigations to be reported. The Department provides support to the victims of these crimes, and holds the alleged perpetrators appropriately accountable. Each year, the Sexual Assault Response and Prevention Office (SAPRO) aggregates data on reports of sexual assault, analyzes the results, and presents them in this report.

Scope

DoD uses the term “sexual assault” to refer to a range of crimes, including rape, sexual assault, forcible sodomy, aggravated sexual contact, abusive sexual contact, and attempts to commit these offenses, as defined by the Uniform Code of Military Justice (UCMJ). For the purpose of data analysis in this report, the Department organizes results and analyses by the most serious sexual assault allegation made by a victim or investigated by a Military Criminal Investigative Organization (MCIO).¹ The allegation and/or behaviors indicated do not necessarily reflect the final findings of the investigators or the matter(s) addressed by court-martial charges or other forms of disciplinary action against suspects (referred to by DoD as “subjects of investigation” or “subjects”).

DoD’s sexual assault reporting statistics include data on penetrating and sexual contact crimes by adults against adults, as defined in Articles 120 and 125 of the UCMJ and Article 80, which governs attempts to commit these offenses.

- **Sexual assault between intimate partners.** Information on sexual assaults occurring between spouses or intimate partners is not included in the analyses detailed in this section. The DoD Family Advocacy Program provides intimate partner sexual assault data detailed in Appendix J. While most victims and subjects in the following data are aged 18 or older, DoD statistics occasionally capture information about victims and subjects aged 16 and 17 at the time of the report (including Service members who are approved for early enlistment prior to age 18). Since the age of consent under the UCMJ is 16 years old, military and civilian victims aged 16 and older may sometimes be included in the data that follow, if such matters are not addressed under the Family Advocacy Program.
- **Sexual harassment complaints.** The following analyses do not include sexual harassment complaints. The Office of Diversity Management and Equal Opportunity (ODMEO) provide information about formal and informal sexual harassment complaints in Appendix H.

¹ Criminal Investigative Command (CID) for Army, Naval Criminal Investigative Service (NCIS) for Navy and Marine Corps, Air Force Office of Special Investigations (AFOSI) for Air Force.

Data Included

Unrestricted and Restricted Reports

Pursuant to reporting requirements levied by Congress, DoD sexual assault data capture Restricted and Unrestricted Reports of sexual assault made to DoD during a Fiscal Year (FY) involving a military person as an alleged perpetrator and/or a victim.²

Victims make a Restricted Report to specified individuals (e.g., Sexual Assault Response Coordinators (SARCs), Sexual Assault Prevention and Response (SAPR) Victim Advocates (VA), or healthcare providers), which enables victims to seek care/services and maintain confidentiality. Given the victim's desire for confidentiality, DoD does not investigate Restricted Reports, and the victim is not asked to provide extensive details about the sexual assault. SARCs therefore record limited data about these victims and the alleged offenses in Defense Sexual Assault Incident Database (DSAID). Furthermore, the Department does not request or maintain subject identities for Restricted Reports entered into DSAID. A victim can choose to convert a Restricted Report to an Unrestricted Report at any time.

Unlike a Restricted Report, an Unrestricted Report of sexual assault by one victim against one or more subjects is referred for investigation to a MCIO. DoD collects data on Unrestricted Reports from the cases entered into DSAID by SARCs. Additionally, MCIO information systems interface with DSAID in order to incorporate subject and investigative case information into records.

Notably, the number of sexual assaults reported to the Department in a given year is *not* necessarily indicative of the number of sexual assaults that may have occurred that year. This difference exists because not all sexual assault victims report the crime. DoD estimates sexual assault occurrence – or prevalence – via survey responses to the *Workplace and Gender Relations Survey of the Active Duty*. The estimated prevalence versus reporting “gap” is described in the Prevention Section in the main body of this report.

Case Dispositions

Once the investigation of an Unrestricted Report is complete, Congress requires the Military Services to provide the outcome or “case disposition” of the allegations against each subject named in an investigation. When a person is the subject of multiple investigations, he/she will also be associated with more than one case disposition in DSAID. DoD holds Service member subjects who have committed sexual assault appropriately accountable based on the evidence available.

Upon completion of a criminal investigation, the MCIO conducting the investigation provides a report documenting evidentiary findings to the subject's commander for military justice action. The servicing staff judge advocate (SJA) also reviews the MCIO report and recommends appropriate legal or other action. For investigations of rape, sexual assault, forcible sodomy, and attempts to commit these crimes, a senior military officer who is at least a special court-martial convening authority (SPCMCA) and in the grade of O-6 (Colonel or Navy Captain) or higher retains initial disposition authority over the matters alleged.

² Use of the term “victim” or “subject” does not convey any presumption about the guilt or innocence of the alleged offenders, nor does the term “incident” substantiate an occurrence of a sexual assault.

The SPCMCA determines which initial disposition action is appropriate, to include whether further action is warranted and, if so, whether the matter should be addressed by court-martial, nonjudicial punishment, administrative discharge, or other adverse administrative action. Commanders do not make disposition decisions alone. The SPCMCA bases his/her initial disposition decision upon a review of the matters transmitted in the investigative report, any independent review, and consultation with military attorneys. Subordinate unit commanders may also provide their own recommendations regarding initial disposition to the convening authority.

Each FY, disciplinary action against a particular subject may not be possible due to legal issues or evidentiary problems with a case. For instance, a commander may be precluded from taking disciplinary action against a subject when the investigation fails to show sufficient evidence of an offense to prosecute or when the victim declines to participate in the justice process.

Legal authority for the Department to exercise military justice jurisdiction is limited to Service members who are subject to the UCMJ. Civilians are not subject to the UCMJ for the purpose of court-martial jurisdiction, except in rare circumstances, such as in deployed environments when accompanying the Armed Forces. In FY16, there were no such civilians tried by a court-martial for allegedly perpetrating sexual assault.

Additionally, local civilian authorities in the U.S. and its overseas host nations, hold primary responsibility for prosecuting U.S. civilians and foreign nationals alleged to have perpetrated sexual assault against Service members.³ A civilian authority, such as a state, county, or municipality, may also exercise their authority to prosecute Service members when they are alleged to have committed an offense within the civilian authority's jurisdiction. This may occur when a civilian accuses a Service member of a sexual assault, or when a state holds primary jurisdiction over the location where a Service member was alleged to have committed sexual assault. In some cases, the civilian authority and the Department may agree to let the military exercise its legal authority over its members. Prosecutions by civilian authorities against Service members are determined on a case-by-case and jurisdiction-by-jurisdiction basis. Prosecutions of Service members by a foreign nation are often governed by the Status of Forces Agreement between that country and the United States.

Time Period Covered

This Annual Report includes data on sexual assaults reported from October 1, 2015 to September 30, 2016 as well as information that describes the status of sexual assault reports, investigations, and case dispositions as of September 30, 2016.

Sexual assault investigations can extend across FYs, because investigations may span several months from start to completion. As a result, investigations opened toward the end of the FY typically carry over into the next FY. Disciplinary actions, such as court-martial and discharge proceedings, also take time; therefore, reporting of these outcomes can extend across FYs. When the outcome has yet to be determined, case dispositions are marked as pending completion at the end of the FY. DoD tracks pending dispositions and requires the Military Services to report them in subsequent years' reports.

³ A host nation's ability to prosecute a Service member is subject to the Status of Forces Agreement (SOFA) between the U.S. and a particular foreign government. SOFAs vary from country to country.

Under DoD's SAPR policy, there is no time limit as to when a sexual assault victim can report a sexual assault. Consequently, DoD receives reports about incidents that occurred during the current year, incidents that occurred in previous years, and incidents that occurred prior to service. When a Service member reports a sexual assault that occurred prior to their enlistment or commissioning, DoD provides care and services to the victim, but may not be able to hold the alleged offender appropriately accountable if he or she is not subject to military law. In these cases, Department authorities often assist the victim in contacting the appropriate civilian or foreign law enforcement agency.

Data Collection

As of FY14, DoD uses DSAID to collect and report information for DoD and the Services. For each report of sexual assault, SARCs must use DSAID to enter information about the victim and the incident. DSAID interfaces with MCIO systems, which contribute additional information about subjects and incident-specific information. MCIOs' databases are the system of record for all Unrestricted Reports they investigate. Service-appointed legal officers validate and enter case disposition information into DSAID. Since DSAID is a real-time data-gathering tool:

- **Not all data points are immediately available for this report.** Data provided in reports represent the state of DSAID data at the time of the final pull. Data may be incomplete at the time of the DSAID data pull, despite best efforts by DoD and the Services to report data completely. Therefore, some demographic or case-related information presented below is categorized as *relevant data not available*.
- **Data may change over time and may differ from what DoD reported previously.** Updates, changes, and corrections occur as a normal, continuous process of DSAID management. SAPRO works with Service SAPR program managers to validate entries, identify errors, and make corrections throughout the year. In addition, the investigative process may also uncover new information. For example, an investigation may clear some subjects of wrongdoing or implicate others. Data presented here reflect this process.

Overview of Reports of Sexual Assault in FY16

In FY16, the Military Services received 6,172 reports of sexual assault involving Service members as either victims or subjects (Figure 1), a 1.5 percent increase from reports made in FY15. The majority of reports were for incidents that occurred during military Service, however 556 reports were for incidents that occurred before the victim entered military Service. Of the 6,172 sexual assault reports, 5,350 were made by Service members:

- DoD initially received 1,995 Restricted Reports involving Service members as either victims or subjects.
- Of these, 414 (21 percent) Restricted Reports converted to Unrestricted Reports in FY16.⁴
- At the end of FY16, 1,581 reports remained Restricted, which is about a 5.5 percent increase from the number remaining Restricted in FY15. Of the 1,581 reports that remained

Of the 6,172 victims, how many were Service members?
5,350 Service member victims.

Who were the other victims?
778 victims were U.S. civilians, foreign nationals, and others who were not on Active Duty status with the U.S. Armed Forces. Relevant data were not available for 44 victims.

⁴ As noted earlier, a victim can convert his/her Restricted Report to an Unrestricted Report at any time. Subsequently, these conversions count as Unrestricted Reports.

Restricted, 356 (23 percent), involved Service member victims who made Restricted Reports for incidents that occurred before the victim entered Military Service.

- DoD received 4,591 Unrestricted Reports involving Service members as victims or subjects.⁵ Figure 2 displays the number of Unrestricted and Restricted Reports from FY07 to FY16.
- Of the 4,591 Unrestricted Reports, 200 (4 percent) were made by Service member victims for incidents that occurred before the victim entered Military Service.

Figure 1: Reports of Sexual Assault Made to DoD, FY07 – FY16

In order to compare sexual assault reports across Services, DoD calculates a victim-reporting rate.⁶ A reporting rate allows for the comparison of reports across groups of different sizes. Reporting rates also allow for year after year comparisons, even when the total number of people in a group has changed. In FY16, for every 1,000 Service members, 4.1 Service members made a Restricted or Unrestricted Report of sexual assault, a slight increase from FY15. Table 1 compares the reporting rate across the Services and across FYs.

⁵ The Department pulls and analyzes data from DSAID six weeks after the end of the FY to allow sufficient time for data validation. During this six-week period, 21 additional Restricted Reports converted to Unrestricted. These 21 reports are included with the 414 reports that converted from Restricted to Unrestricted that DoD counts with FY16 numbers.

⁶ DoD calculates victim-reporting rates using the number of Service member victims in Unrestricted and Restricted Reports and Active Duty Military Service end-strength for each year on record with the Office of People Analytics (OPA).

Table 1: Reporting Rate per Thousand, FY07 – FY16

Service	FY07	FY08	FY09	FY10	FY11	FY12	FY13	FY14	FY15	FY16
Overall DoD	1.6	1.7	1.9	1.8	1.9	2.1	3.3	3.9	4.0	4.1
Army	2.4	2.5	2.6	2.4	2.5	2.3	3.5	4.2	4.2	4.4
Navy	1.0	1.2	1.6	1.6	1.6	2.1	3.2	3.6	3.8	4.1
Marine Corps	0.9	0.8	1.3	1.1	1.3	1.7	3.8	4.1	4.1	4.1
Air Force	1.4	1.5	1.4	1.6	1.6	2.0	2.9	3.7	3.7	3.7

Research shows that reporting sexual assault increases the likelihood that victims engage in medical treatment and other forms of assistance.⁷ DoD's SAPR policy encourages victims to report sexual assault, works to improve response capabilities for victims, and encourages victims to participate in the military justice process. Figure 2 shows a slight increase in Service member victims who made an Unrestricted or Restricted Report of sexual assault for incidents that occurred prior to and during military service since FY09. Based on survey-estimated prevalence rates of sexual assault and other factors, DoD attributes this increase to a greater number of victims coming forward to report sexual assault, and not due to an overall increase in crime. This aligns with the results of the *2016 Workplace and Gender Relations Survey (WGRA)*, which indicated that past-year prevalence of sexual assault significantly decreased for both women and men, compared to FY14 estimates.

Figure 2: Service Member Victims in DoD Sexual Assault Reports for Incidents that Occurred During and Prior to Military Service, FY09 – FY16

⁷ DOJ (2002). Rape and Sexual Assault: Reporting to Police and Medical Attention, 1992–2000. Washington, DC: Rennison, Callie Marie.

Figure 3 demonstrates the difference between the estimated number of Service members who indicated they experienced sexual assault, based on *WGRA* survey estimates, and the number of Service members who reported a sexual assault incident occurring during military service. DoD administers its sexual assault prevalence survey biennially, thus prevalence estimates are available for CY06, FY10, FY12, FY14, and FY16. In addition, FY14 and FY16 measures of sexual assault were designed to align more closely with the legal language from the UCMJ, and therefore, are not directly comparable to the unwanted sexual contact measure used in years prior. Nonetheless, analyses conducted by the RAND Corporation show that the sexual assault measure and the prior unwanted sexual contact measure create statistically similar estimates.

Notes:

1. This graph depicts the estimated number of Service members who experienced sexual assault in the past-year (based on prevalence surveys) versus the number of Service member victims in actual reports of sexual assault made to DoD.
2. In FY16, the 4,794 Service member victims in Unrestricted and Restricted Reports of sexual assault occurring during Military Service accounted for approximately 32 percent of the estimated number of Service members who may have experienced sexual assault (~14,900, with a 95 percent confidence interval ranging from 14,000 to 15,700) that year.
3. The “unwanted sexual contact” measure refers to the survey administered by OPA in CY06, FY10, and FY12. The “sexual assault” measure used in FY14 and FY16 was designed to align more closely with legal language from UCMJ. While the measures use different methods to estimate the past-year occurrence of penetrating and contact sexual crime, they have been shown to generate statistically comparable estimates.

Figure 3: Estimated Number of Service Members Experiencing Sexual Assault Based on Past-Year Prevalence Rates versus Number of Service Member Victims in Reports of Sexual Assault for Incidents Occurring During Military Service, CY04 – FY16

In FY16, the “gap” between prevalence and reporting narrowed, meaning fewer sexual assaults occurred, and a greater number of victims chose to make a report. There are still hurdles in victim reporting behaviors; notably, the gap between prevalence and reporting is greater for male victims than female victims. Female Service members account for the majority of the survey-estimated victims of sexual assault (about 8,600 women and 6,300 men). Specifically, about 43 percent (3,709) of survey-estimated female victims, but only about 17 percent (1,085) of survey-estimated male victims made a report of sexual assault in FY16 for an incident occurring during military service. Nonetheless, this year the Department received the largest number of reports from men in the 12 years it has been collecting data on sexual assault.

DoD does not expect 100 percent of sexual assault victims to file a report. However, DoD expects that the difference between the number of survey-estimated victims experiencing sexual assault and the number reporting the incident can be reduced over time in two ways:

- Research-based sexual assault prevention initiatives should reduce past-year prevalence rates of sexual assault, as estimated by prevalence surveys like the *WGRA*.
- Initiatives that encourage victim reporting and confidence in the military justice system should increase the number of Service members who choose to submit an Unrestricted or Restricted Report.

Although reports to DoD authorities are unlikely to account for all sexual assaults estimated to occur in a given year, DoD’s intent is to narrow the gap between prevalence and reporting. These dual metrics are top line indicators of progress in reducing the occurrence of sexual assault, reaching victims, and increasing opportunities for offender accountability, as appropriate.

Unrestricted Reports of Sexual Assault

SARCs and MCIOs collect data regarding Unrestricted Reports and report it to DoD. In FY16, there were 4,591 Unrestricted Reports of sexual assault involving Service members as either the subject or victim of a sexual assault.⁸ For a detailed breakdown of victim demographics in completed investigations, see page 31. Each year, the majority of sexual assault reports received by MCIOs involve the victimization of Service members by other Service members. In FY16, 2,278 Unrestricted Reports involved allegations of sexual assault perpetrated by a Service member against a Service member. Figure 4 illustrates how Service members were involved in Unrestricted Reports of sexual assault between FY07 to FY16.

⁸ The Department pulls and analyzes data from DSAID six weeks after the end of the FY to allow sufficient time for data validation. During this six-week period, 21 additional Restricted Reports converted to Unrestricted. These 21 reports are included with the 414 reports that converted from Restricted to Unrestricted that DoD counts with FY16 numbers.

Notes:

1. The chart excludes 610 reports from FY16, 564 from FY15, and 636 from FY14 due to missing data on subject or victim type.
2. Some percentages do not sum to 100 percent due to rounding.

Figure 4: Unrestricted Reports of Sexual Assault by Service Member Involvement, FY07 – FY16

Crimes Alleged in Unrestricted Reports

The Department uses the term “sexual assault” to refer to the range of crimes in military law that constitute penetrating and contact sexual offenses between adults. Since 2004, three versions of Article 120 have existed in the UCMJ, which defines most of those crimes.

Of the total Unrestricted Reports made to DoD in FY16, the majority of offenses alleged fall into three categories: rape, aggravated sexual assault/sexual assault, and abusive sexual contact. MCIOs categorize Unrestricted Reports by the most serious offense *alleged* in the report, which may not ultimately be the same offense for which evidence supports a misconduct charge, if any. Figure 5 shows the breakdown of Unrestricted Reports of sexual assault by offense originally alleged. Table 2 presents the offense originally alleged, broken down by the military status of the victim.

Notes:

1. 461 cases have been excluded from this chart due to missing data on the offense originally alleged.
2. Bold text designates penetrating crimes (rape, aggravated sexual assault/sexual assault, and forcible sodomy).
3. Percentages do not sum to 100 percent due to rounding.

Figure 5: Offenses Originally Alleged in Unrestricted Reports of Sexual Assault, FY16

Table 2: Unrestricted Reports of Sexual Assault by Offense Alleged and Military Status, FY16

Most Serious Offense Alleged in Report	Total Unrestricted Reports	Number of Reports Involving Service Members as Victims	Number of Reports Involving Non-Service Members as Victims	Relevant Data Not Available
Rape	801	607	186	8
Aggravated Sexual Assault/Sexual Assault	1,253	976	271	6
Aggravated Sexual Contact	100	89	10	1
Abusive Sexual Contact	1,858	1,599	235	24
Wrongful Sexual Contact	9	9	0	0
Indecent Assault	21	19	2	0
Forcible Sodomy	10	10	0	0
Attempts to Commit Offenses	78	65	13	0
Offense Data Not Available	461	438	22	1
Total Unrestricted Reports in FY16	4,591	3,812	739	40

Investigations of Unrestricted Reports

This section closely follows the flow chart shown in Figure 6. In FY16, MCIOs initiated 3,994 sexual assault investigations. DoD policy requires all Unrestricted Reports be referred for investigation by an MCIO.

The length of an investigation may vary, from a few months to over a year, depending on a number of factors, including:

- Offense(s) alleged
- Location and availability of the victim, subject, and witnesses
- Amount and kind of physical evidence gathered during the investigation
- Length of time required for crime laboratory analysis of evidence

The average length of a sexual assault investigation in FY16 was 4.3 months. Consequently, sexual assault investigations initiated at the end of the FY, and the time to reach case disposition, can span multiple reporting periods.

Of the 4,044 sexual assault investigations MCIOs completed during FY16, 2,583 of those sexual assault investigations were opened in FY16, and 1,461 investigations were opened in years prior to FY16. Of the 4,044 investigations completed in FY16, 174 cases did not meet the elements of proof for sexual assault or were investigated for some misconduct other than sexual assault (Figure 6, Point G) and 23 cases did not fall within MCIOs' legal authority to investigate (the report was for an incident prior to Service or the matter was outside MCIO jurisdiction; Figure 6, Points H). In total, there was reportable information for 4,359 subjects. In future reports, DoD will document the outcomes of 1,698 ongoing sexual assault investigations that MCIOs opened in FY16 or prior to FY16, but did not complete by September 30, 2016 (Figure 6).

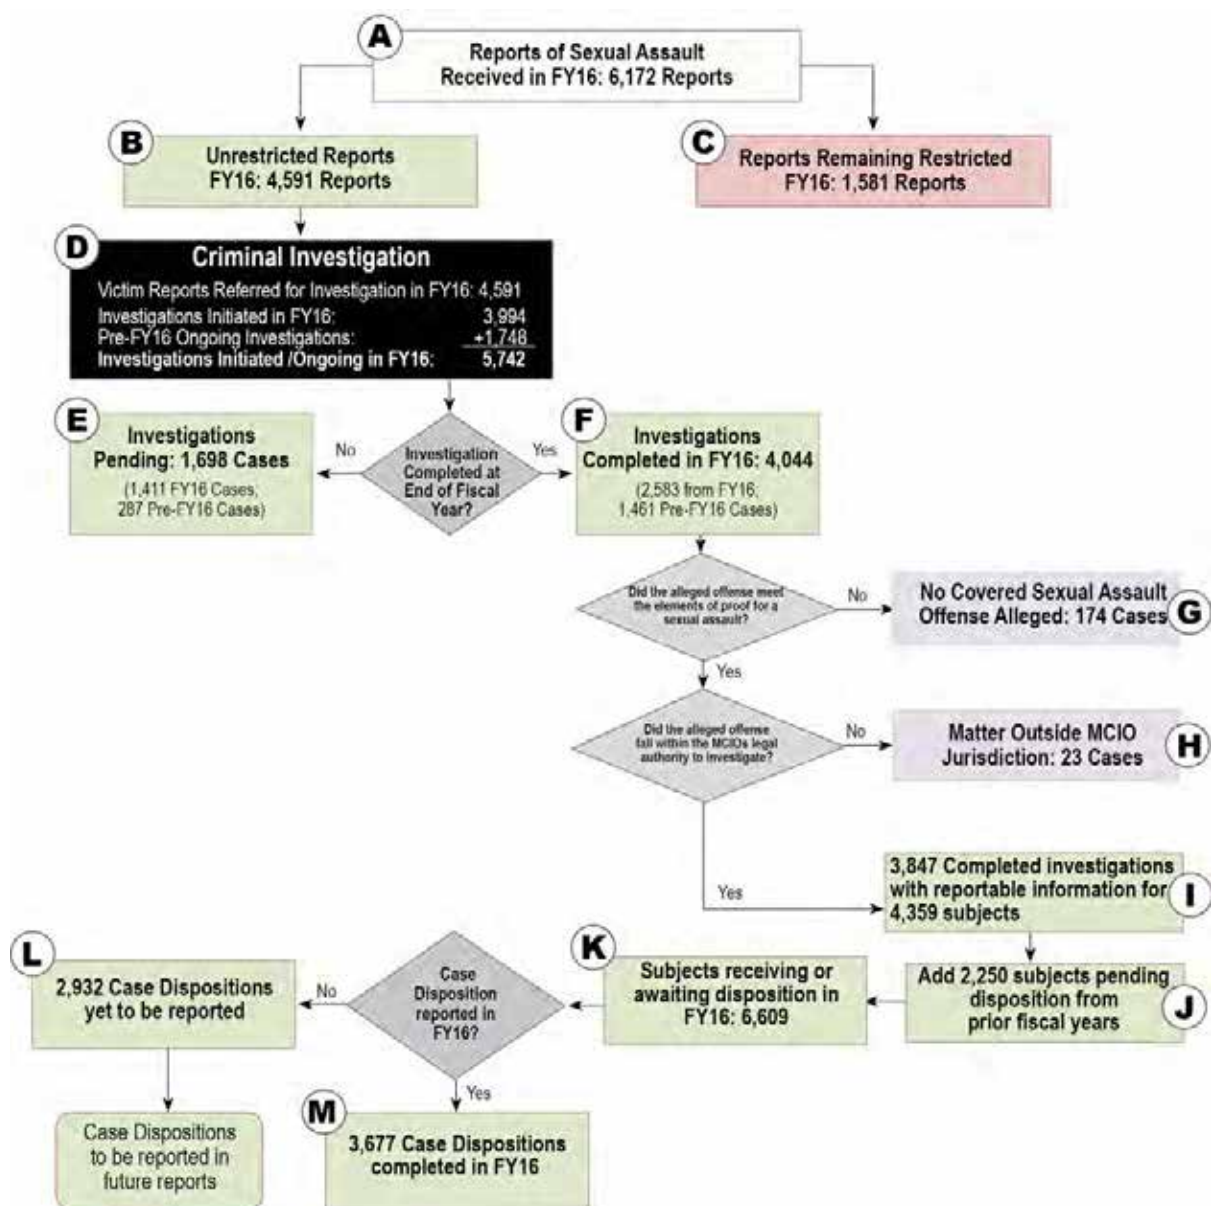

Figure 6: Reports of Sexual Assault, Completed Investigations, and Case Dispositions, FY16

Notes:

1. For incidents that occur on or after June 28, 2012, the term “sexual assault” refers to the crimes of rape, sexual assault, aggravated sexual contact, abusive sexual contact, forcible sodomy, and attempts to commit these offenses.
2. The number of investigations initiated in FY16 is lower than the number of victim reports referred for investigation because: there can be multiple victims in a single investigation, some investigations referred in FY16 did not begin until FY17, and some allegations could not be investigated by DoD or civilian law enforcement.
3. The Department pulls and analyzes data from DSAID six weeks after the end of the FY to allow sufficient time for data validation. During this six-week period, 21 additional Restricted Reports converted to Unrestricted. These 21 reports are included with the 414 reports that converted from Restricted to Unrestricted that DoD counts with FY16 numbers.

Sexual Assault Case Dispositions

The goals of a criminal investigation are to identify the victim, the alleged perpetrator, and crimes committed. DoD seeks to hold Service members alleged to have committed sexual assault appropriately accountable based on the available evidence.

Congress requires DoD to report on the case dispositions (outcomes) of sexual assault allegations in Unrestricted Reports made against Service members (DoDI 6495.02). When a person is the subject of multiple investigations, he/she will also be associated with more than one case disposition in DSAID. Since the Department must report outcomes for each investigation, subjects who have multiple investigations will have a disposition associated with each of those investigations. The Services may address multiple investigations of a subject with one action (e.g., one court-martial for multiple investigations) or may address those investigations with separate actions (e.g., a court-martial for one allegation and then a nonjudicial punishment for another unrelated allegation). This year, 48 subjects received multiple dispositions. These 48 subjects received a total 104 dispositions, which account for 2 percent of all dispositions reported in FY16. The following data describe the case dispositions of each investigation reported to the Department in FY16.

Can DoD take action against everyone it investigates?

No. In FY16, DoD could not take action in 785 cases, because they were outside DoD's legal authority or a civilian/foreign authority exercised jurisdiction over a Service member subject.

At the end of FY16, there were 3,677 case dispositions with information to report. Of the subjects accounted for in these case dispositions, 26 had a prior investigation for sexual assault. The 3,677 case dispositions from DoD investigations in FY16 included Service members, U.S. civilians, foreign nationals, and subjects that could not be identified (Figure 7). DoD's sexual assault data represent a 12-month snapshot in time in order to comply with Congressional reporting requirements. As a result, 2,932 case dispositions were not yet determined at the end of FY16. DoD will report these in forthcoming years' reports (Figure 6, Point L).

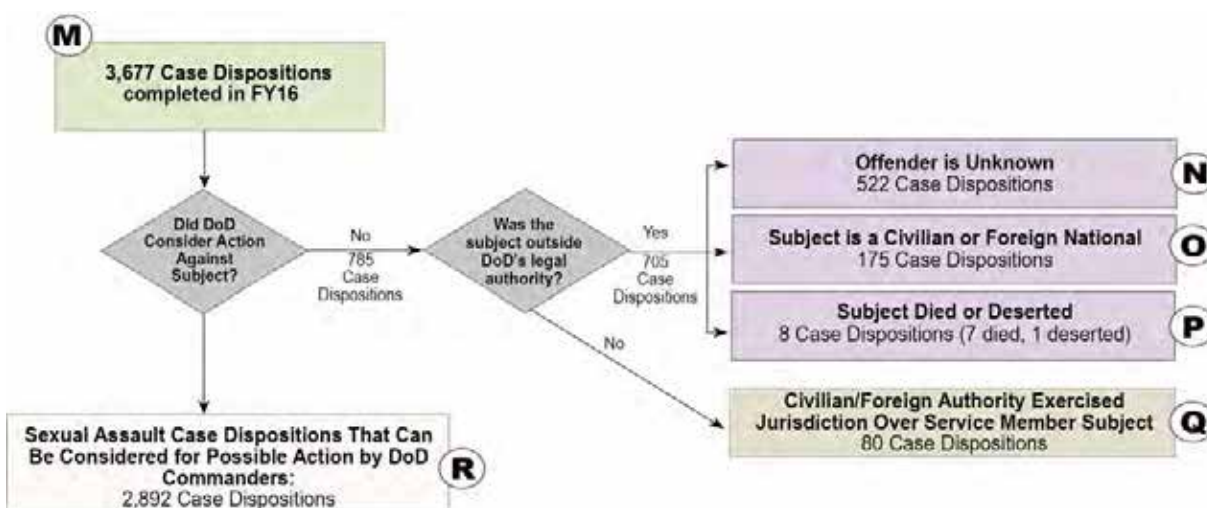

Figure 7: Cases outside DoD Legal Authority, FY16

For the vast majority of cases in the military justice system, commanders are limited to taking action against Service members who are subject to the UCMJ. Each year, DoD lacks jurisdiction over several hundred subjects in its sexual assault reports/investigations. In FY16, DoD could not consider taking action in 785 cases because:

- 705 cases were outside of DoD's legal authority (Figure 7, Points N, O, and P). Specifically, MCIOs could not identify a subject despite a criminal investigation, a subject was a civilian or foreign national not under the military's jurisdiction, or a subject had died or deserted before DoD could take disciplinary action.
- 80 cases involved Service members prosecuted by a civilian/foreign authority (Figure 7, Point Q). While a Service member is always under the legal authority of DoD, sometimes a civilian authority or foreign government will exercise its legal authority over a Service member who is suspected of committing a crime within its jurisdiction.

Figure 8 shows that from FY09 to FY16, between 12 percent and 21 percent of cases investigated by DoD for sexual assault were found to be either outside the DoD's legal authority or another authority asserted its jurisdiction. Over the past two fiscal years, SAPRO and the Services conducted a comprehensive review of legal data in DSAID. As part of this process, the Services' legal officers closed pending cases that involved unknown subjects. This partially accounts for the increase in unknown subjects seen in FY15 and FY16.

Notes:

1. In FY16, 785 (21 percent) of the 3,677 case dispositions were outside DoD legal authority or involved Service member subjects who were prosecuted by a civilian or foreign authority.
2. Percentages do not sum to total due to rounding.

Figure 8: Cases Investigated for Sexual Assault by DoD with Subjects Who Were outside Its Legal Authority or Service Members Prosecuted by a Civilian/Foreign Authority, FY09 – FY16

Military Subjects Considered for Disciplinary Action

In FY16, 2,892 cases investigated for sexual assault involved Service members whom DoD could consider for possible action. Table 3 and Figure 9 present dispositions of cases with military subjects under DoD legal authority. Of the 2,892 cases, 217 involved alleged assaults against multiple victims.

Table 3: Case Dispositions, FY16

Case Disposition Category	Case Dispositions Reported in FY16
Sexual Assault Investigations Considered for Possible Command Action	2,892
Evidence Supported Commander Action	1,865
<u>Sexual Assault Charge Substantiated</u>	1,331
<i>Court-Martial Charge Preferred (Initiated)</i>	791
<i>Nonjudicial Punishments (Article 15, UCMJ)</i>	272
<i>Administrative Discharges</i>	113
<i>Other Adverse Administrative Actions</i>	155
<u>Other Misconduct Charge Substantiated</u>	534
<i>Court-Martial Charge Preferred (Initiated)</i>	67
<i>Nonjudicial Punishments (Article 15, UCMJ)</i>	284
<i>Administrative Discharges</i>	89
<i>Other Adverse Administrative Actions</i>	94
Unfounded by Command/Legal Review	72
Command Action Precluded	955
<i>Victim Died before Completion of Justice Action</i>	0
<i>Victim Declined to Participate in Justice Action</i>	252
<i>Insufficient Evidence of Any Offense to Prosecute</i>	670
<i>Statute of Limitations Expired</i>	33

Figure 9: Dispositions of Cases under DoD Legal Authority, FY16

Command Action Precluded or Declined

Legal factors occasionally prevent DoD from taking disciplinary action against subjects. For example, commanders could not take disciplinary action in 955 cases due to insufficient evidence of an offense to prosecute, the victim declining to participate in the military justice process, or the statute of limitations expiring. See Figure 9, Point V.

Two potential situations can lead MCIOs to conclude that the allegations of a crime should be unfounded, meaning the allegation is categorized as false or baseless: (1) when evidence discovered demonstrates that the accused person did not commit the offense, and (2) when evidence refutes the occurrence of a crime. After examining the evidence in each case with a military attorney, commanders declined to take action in 72 cases, because available evidence indicated the allegations against these subjects were false or baseless (unfounded; Figure 9, Point W).⁹

Figure 10 illustrates the percentage of cases in which command action was precluded (e.g., insufficient evidence, victim declined to participate), command action was declined (unfounded), or command action was taken (e.g., court-martial preferred, nonjudicial punishment). Over the past two FYs, SAPRO and the Services conducted a comprehensive review of legal data in DSAID and standardized the way in which they categorized and reported cases. As part of this process, the Services' legal officers closed a greater number of cases where command action was precluded. This partially accounts for the increase in cases with command action precluded in FY15 and FY16.

Note: Percentages listed for some years do not sum to 100 percent due to rounding.

Figure 10: Percentage of Cases with Misconduct Substantiated, Command Action Precluded, and Command Action Declined, FY09 – FY16

⁹ In prior FYs, DoD presented data on allegations investigated by the MCIOs that were unfounded by legal review. Last year, the Department developed new categories to reflect the nature and outcomes of these allegations more accurately (Figure 6, Points G and H account for these allegations).

Evidence Supported Command Action

In 1,865 cases, commanders had sufficient evidence and the legal authority to support some form of disciplinary action for an alleged sexual assault offense or other misconduct (Figure 9, Point S). When a subject in an investigation receives more than one disposition, DoD reports only the most serious disciplinary action. The possible actions, listed in descending order of severity are preferral of court-martial charges, nonjudicial punishment, administrative discharge, and other adverse administrative action.

The following outlines the command actions taken in the 1,331 cases for which it was determined a sexual assault offense warranted discipline:

- 59 percent (791) of cases were associated with court-martial charges preferred (initiated).
- 20 percent (272) of cases entered into proceedings for nonjudicial punishment under Article 15 of the UCMJ.
- 20 percent (268) of cases received a discharge or another adverse administrative action.¹⁰

In 534 cases, evidence supported command action for other misconduct discovered during the sexual assault investigation (e.g., making a false official statement, adultery, underage drinking, or other crimes under the UCMJ), but not a sexual assault charge. Command actions for these cases follow below:

- 13 percent (67 cases) of cases were associated with court-martial charges preferred.
- 53 percent (284 cases) of cases entered into proceedings for nonjudicial punishment.
- 34 percent (183 cases) of cases received some form of adverse administrative action or discharge.

Military Justice

The following information describes what happens once a military subject's commander finds that there is sufficient evidence to take disciplinary action (Figure 11). Each action taken is based on the evidence identified during a thorough investigation. In addition, since June 2012, initial disposition decisions for the most serious sexual assault crimes have been withheld to the O-6 level (Colonel or Navy Captain). This allows more senior, experienced officers to review and decide what initial action should be taken in these cases.

¹⁰ Percentages do not sum to 100 percent due to rounding.

Notes:

1. Percentages are of cases found to warrant disciplinary action for a sexual assault offense only. This figure does not include other misconduct (false official statement, adultery, etc.)
2. Percentages listed for some years do not sum to 100 percent due to rounding.

Figure 11: Breakdown of Disciplinary Actions Taken for Sexual Assault Offenses, FY07 – FY16

Court-Martial for a Sexual Assault Offense

As noted previously, 791 cases involved court-martial charges preferred. Figure 12 illustrates what happened to these cases after their commanders preferred court-martial charges. Of the 791 cases with a referral of court-martial charges for at least one sexual assault charge in FY16, the Services completed 619 court-martial outcomes by the end of the FY.

389 cases proceeded to trial, 67 percent of which resulted in a conviction of at least one charge at court-martial. That conviction could have been for a sexual assault offense or for any other misconduct charged. Most convicted Service members received at least four kinds of punishment: confinement, reduction in rank, fines or forfeitures, and a discharge (enlisted) or dismissal (officers) from service. DoD policy directs that the Military Services process Service members convicted of a sexual assault who do not receive a punitive discharge at court-martial for an administrative discharge. This year, the Services processed 34 convicted subjects that did not receive a punitive discharge or dismissal for administrative separation from Military Service.

Court-martial charges in 97 cases were dismissed. However, commanders used evidence gathered during the sexual assault investigations to take nonjudicial punishment for other misconduct in 27 of the 97 cases. The punishment may have been for any kind of misconduct for which there was evidence. The subjects who received nonjudicial punishment after a court-martial charges were dismissed for other misconduct were adjudged five categories of punishment: reductions in rank, forfeitures of pay, restriction, extra duty, and admonition/reprimand.

133 cases resulted in a resignation or discharge in lieu of court-martial. In FY16, 119 of 127 cases for enlisted members who had a discharge in lieu of court-martial (DILO) resulted in separation Under Other Than Honorable Conditions (UOTHC), the most serious administrative characterization of discharge possible (8 cases resulted in a General discharge). The UOTHC discharge characterization is recorded on a Service member is DD Form 214, Record of Military Service, and significantly limits separation and post-service benefits from DoD and the Department of Veterans Affairs.

DoD grants request for resignation or discharges in lieu of court-martial in certain circumstances, occurring only after court-martial charges are preferred against the accused. For such an action to occur, the accused must initiate the process. Requests for a resignation or a discharge in lieu of court-martial must include:

- A statement of understanding of the offense(s) charged and the consequences of administrative separation;
- An acknowledgement that any separation could possibly have a negative characterization;
- An acknowledgement that the accused is guilty of an offense for which a punitive discharge is authorized or a summary of the evidence supporting the guilt of the accused.

These statements are not admissible in court-martial should the request ultimately be disapproved. Discharges of enlisted personnel in lieu of court-martial are usually approved at the SPCMA level. The Secretary of the Military Department approves resignations of officers in lieu of court-martial.

Figure 12 presents the outcomes of cases for which court-martial charges were preferred. Figure 13 presents the same information, but displays the outcomes by the type of crime charged (i.e., penetrating versus sexual contact).

What percentage of cases associated with a charge and trial for sexual assault offenses received a conviction in FY16 and what punishment did they receive?

67% of cases that went to trial for a sexual assault offense resulted in a conviction of at least one charge at court-martial. The majority of cases with a conviction resulted in the following punishments: confinement, a fine or forfeiture of pay, reduction in rank, and a punitive discharge or dismissal.

Sex Offender Registration
124 Subjects convicted of a qualifying sex offense were required to register as a sex offender.

*Note: DoD requires convicted subjects that were not adjudged a punitive discharge or dismissal to be processed for separation. Service reports indicate that 34 convicted Subjects were processed for administrative discharge subsequent to court-martial conviction in FY16.

Figure 12: Dispositions of Cases with Sexual Assault Court-Martial Charges Preferred, FY16

Notes:

1. Percentages for some categories do not sum to 100 percent due to rounding. Punishments do not sum to 100 percent, because subjects can receive multiple punishments.
2. The Services reported 791 court-martial charge preferrals with charges for a sexual assault offense.
3. Of the 791 court-martial charges preferred, 172 cases were still pending court action at the end of FY16.
4. Of the 619 completed case dispositions, 389 proceeded to trial, 133 involved a discharge or resignation in lieu of court-martial, and 97 had court-martial charges dismissed.
5. In cases in which a discharge in lieu of court-martial is requested and approved, the characterization of the discharge is UOTHC, unless a higher characterization is justified.
6. Of the 97 cases with dismissed charges, commanders imposed nonjudicial punishment in 27 cases. An additional case had a nonjudicial punishment initiated and subsequently dismissed. Most of these 27 cases received three kinds of punishment: a reduction in rank, a forfeiture of pay, and restriction.
7. Of the 389 cases that proceeded to trial, 261 resulted in a conviction of at least one charge. Conviction by court-martial may result in a combination of punishments. Consequently, convicted Service members could be adjudged one or more of the punishments listed. In most cases, they received at least four kinds of punishment: confinement, a reduction in rank, a fine or forfeiture of pay, and a punitive discharge (i.e., bad conduct discharge, dishonorable discharge, or dismissal). DoDI 6495.02 requires mandatory administrative separation processing for all Service members convicted of a sexual assault offense when the sentence does not include a punitive discharge. For penetrative sexual assaults and attempts to commit such offenses committed after June 24, 2014 with certain limited exceptions, the approved sentence must include a punitive discharge.

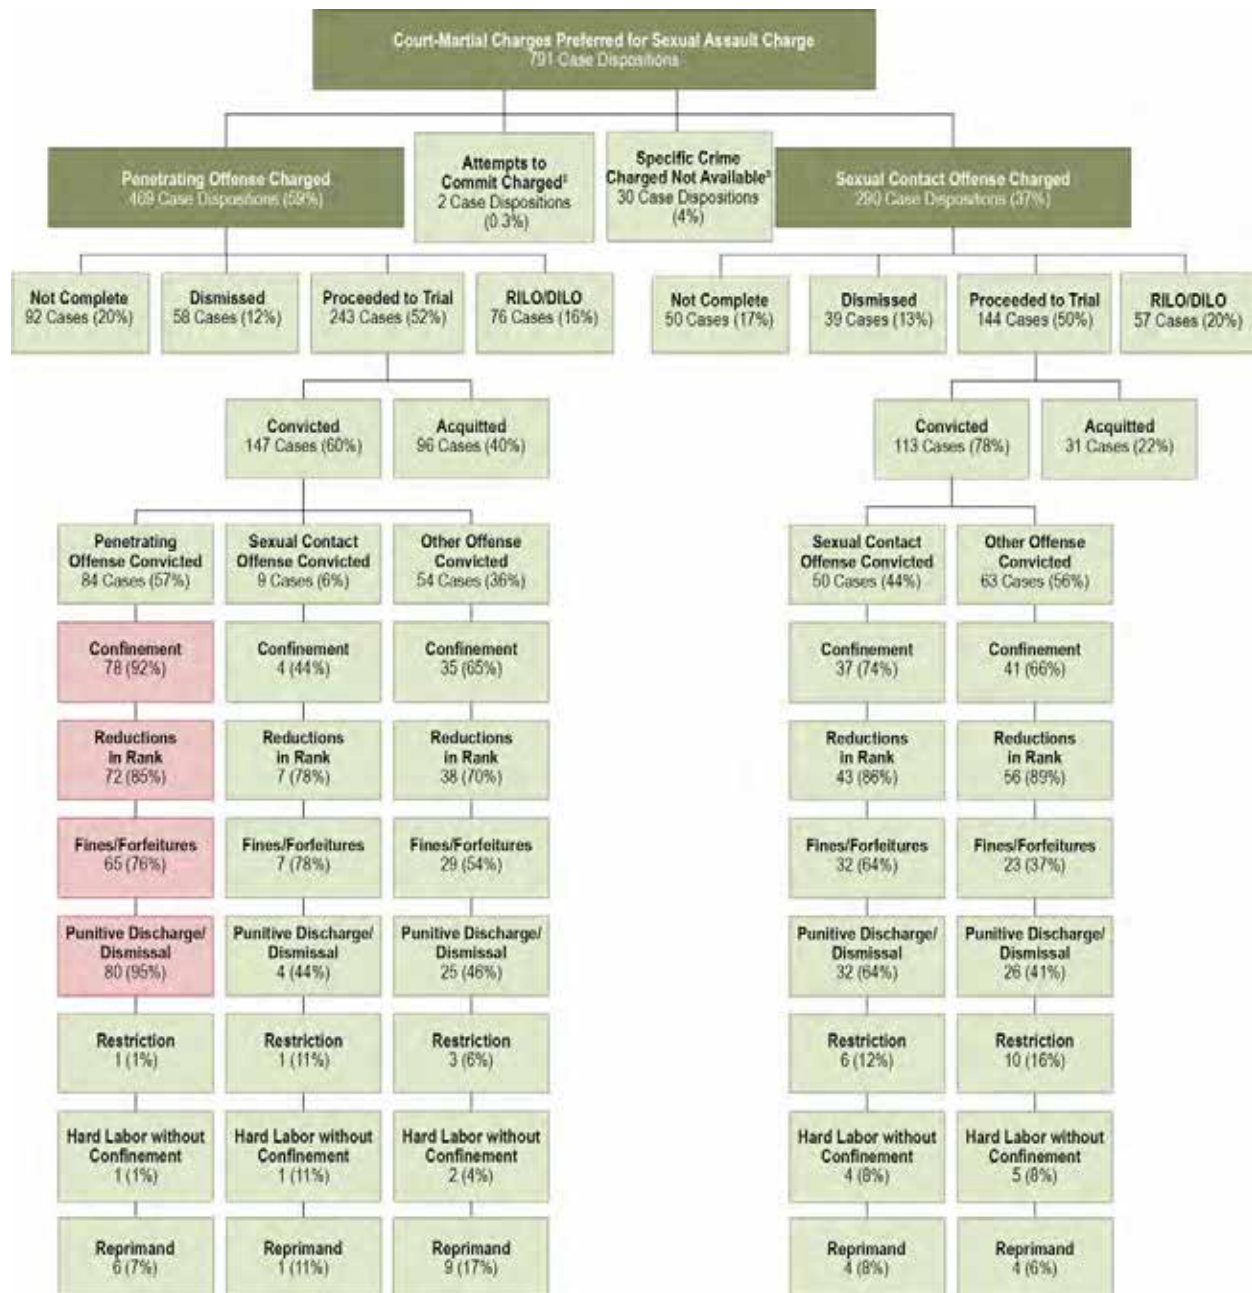

Figure 13: Dispositions of Cases with Sexual Assault Court-Martial Charges Preferred by Crime Charged, FY16

Notes:

1. Percentages for some categories do not sum to 100 percent due to rounding. Punishments do not sum to 100 percent, since subjects can receive multiple punishments.
2. The outcomes for the attempts to commit cases were: one case was dismissed and one case led to a conviction.
3. Court-martial charges were preferred for 30 cases, but data for the specific sexual assault crime charged was unavailable at the time of the final data pull.

Nonjudicial Punishment

Do military commanders use nonjudicial punishment as their primary means of discipline for sexual assault crimes?

No. Only 20% of cases that had disciplinary action for a sexual assault crime received nonjudicial punishment in FY16 as the most serious disciplinary action. Most cases (59%) had court-martial charges preferred as the most serious disciplinary action.

Commanders administer nonjudicial punishments in accordance with Article 15 of the UCMJ, which empowers commanding officers to impose penalties on Service members when there is sufficient evidence of a minor offense under the UCMJ. Nonjudicial punishment allows commanders to address some types of sexual assault and other misconduct by Service members that may not warrant prosecution in a military or civilian court. Some of the corrective actions within a commander's purview to administer as nonjudicial punishments include demotions, forfeitures, and restrictions on liberty. Nonjudicial punishment may support a rationale for administratively discharging military subjects with a less than honorable discharge. The Service member may demand trial by court-martial instead of accepting nonjudicial punishment by the commander, unless the subject is attached to or embarked on a vessel.

Of the 1,331 cases dispositions that were associated with disciplinary actions on a sexual assault offense, 272 cases were also associated with nonjudicial punishments. Figure 14 displays the outcomes of nonjudicial punishment actions taken against subjects on a sexual assault charge in

FY16. In FY16, 83 percent of the 239 cases with completed nonjudicial punishment proceedings were associated with guilty verdicts under the authority of Article 15 in the UCMJ. Nearly all of the administered nonjudicial punishments were for non-penetrating sexual contact offenses. The majority of cases with a nonjudicial punishment received the following punishments: reduction in rank, a forfeiture of pay, and/or extra duty. Available Military Service data indicated that for 80 cases the nonjudicial punishment served as grounds for a subsequent administrative discharge. Characterizations of these discharges were as follows:

Honorable	3 Cases
General	44 Cases
Under Other Than Honorable Conditions	23 Cases
Uncharacterized	10 Cases
Total	80 Cases

Figure 14: Dispositions of Cases Receiving Nonjudicial Punishment, FY16

Note: Punishments do not sum to 100 percent because cases can have multiple punishments.

Administrative Discharges and Adverse Administrative Actions

A legal review of evidence sometimes indicates that the court-martial process or nonjudicial punishments are not appropriate means to address allegations of misconduct against the accused. However, commanders have other means at their disposal to hold alleged offenders appropriately accountable. Commanders may use an administrative discharge to address an individual's misconduct, lack of discipline, or poor suitability for continued service. There are three characterizations of administrative discharges: Honorable, General, and UOTHC. General and UOTHC discharges may limit those discharged from receiving full entitlements and benefits from both the DoD and the Department of Veterans Affairs. In FY16, 113 cases in sexual assault investigations were associated with an administrative discharge. Characterizations of the discharges are outlined below.

Honorable	2 Cases
General	35 Cases
Under Other Than Honorable Conditions	37 Cases
Uncharacterized	8 Cases
Pending	31 Cases
Total	113 Cases

In FY16, commanders took adverse administrative actions in 155 cases that were investigated for a sexual assault offense. Commanders typically use adverse administrative actions when available evidence does not support a more severe disciplinary action. Adverse administrative actions can have a serious impact on one's military career, have no equivalent form of punishment in the civilian sector, and may consist of Letters of Reprimand, Letters of Admonishment, Letters of Counseling, or discharge. These actions may also include but are not limited to denial of re-enlistment, cancellation of a promotion, and cancellation of new or special

duty orders. Cadets and midshipmen are subject to court-martial and an administrative disciplinary system at the Military Service Academies. These systems address misconduct that can ultimately be grounds for disenrollment from the Academy and, when appropriate, a requirement to reimburse the government for the cost of education.

Probable Cause Only for a Non-Sexual Assault Offense

The sexual assault investigations conducted by MCIOs sometimes do not find sufficient evidence to support disciplinary action against the subject on a sexual assault charge, but may uncover other forms of chargeable misconduct. In FY16, commanders took action in 534 cases that MCIOs originally investigated for sexual assault allegations, but for which evidence only supported action on non-sexual assault misconduct, such as making a false official statement, adultery, assault, or other crimes (Figure 15).

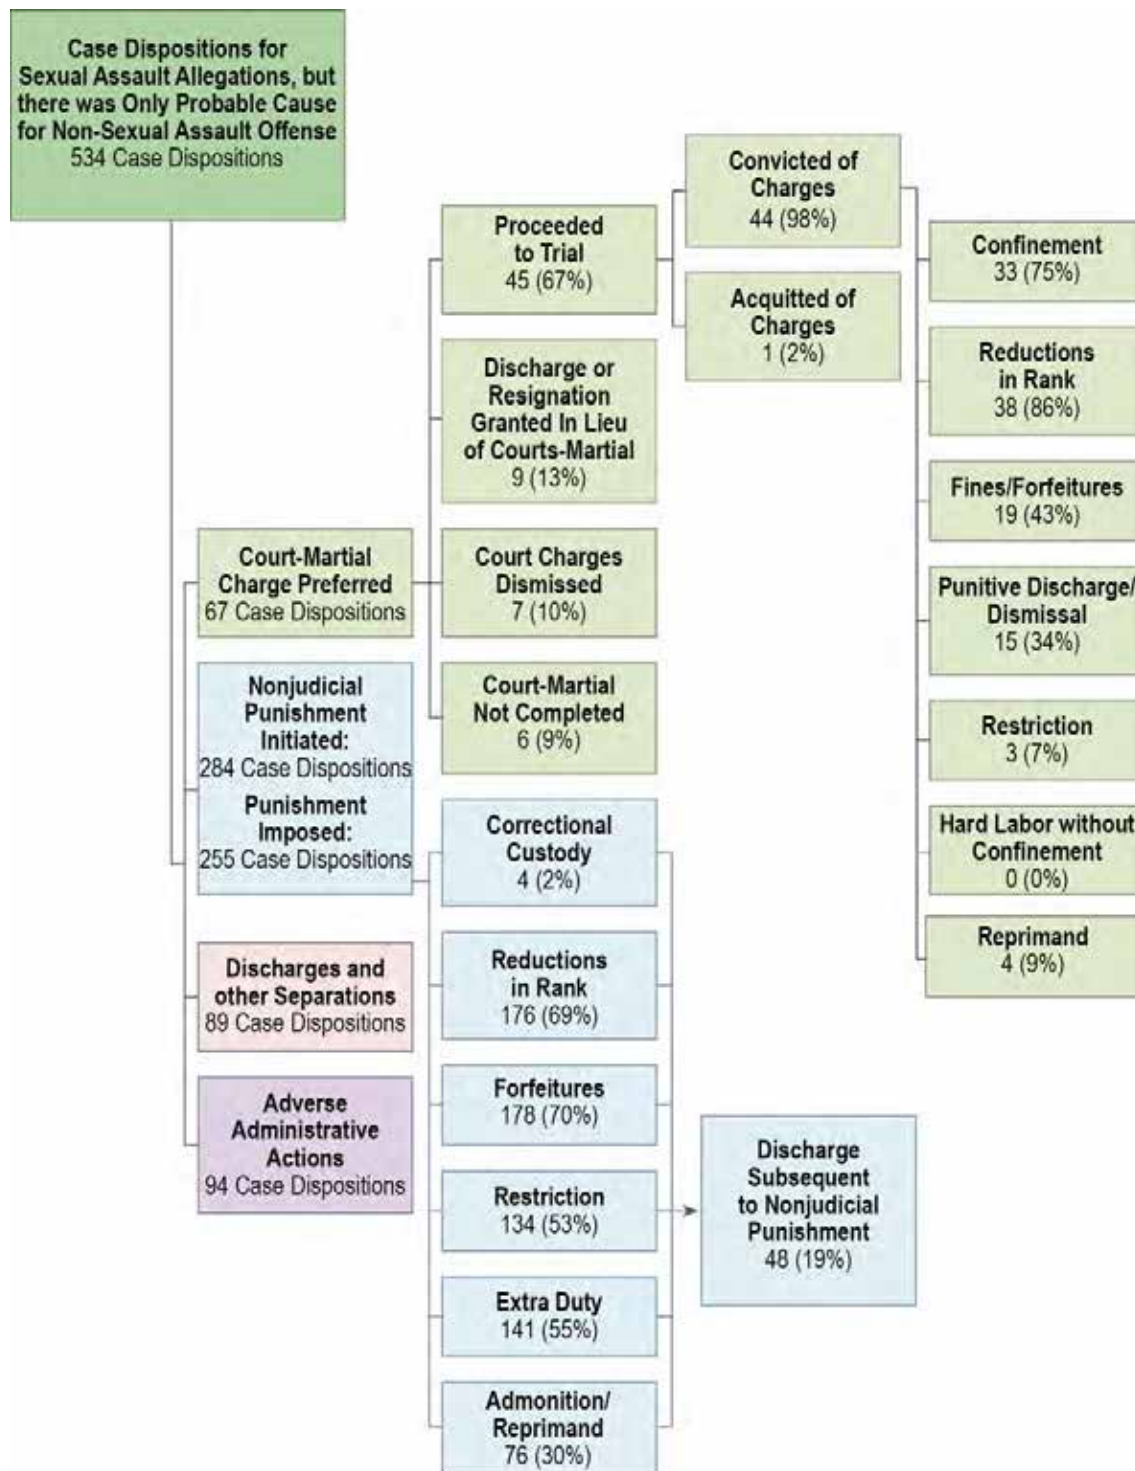

Figure 15: Cases for which There was Only Probable Cause for Non-Sexual Assault Offenses, FY16

Notes:

1. Some percentages do not sum to 100 percent due to rounding. Punishments do not sum to 100 percent, because cases can have multiple punishments.
2. The Military Services reported that investigations of 534 cases only revealed evidence of misconduct not considered a sexual assault offense under the UCMJ.

3. Of the 534 cases, 67 cases had court-martial charges preferred, 284 cases were entered into nonjudicial punishment proceedings, 89 cases involved a discharge or separation, and 94 cases involved an adverse administrative action.
4. Of the 67 cases associated with court-martial charges preferred, court martials proceeded for 45 cases and convictions were associated with 44 cases.
5. Of the 284 cases considered for nonjudicial punishment, 15 cases were still pending completion and in 255 cases, commanders took appropriate action.

Demographics of Victims and Subjects in Completed Investigations

The Department draws demographic information from the 4,044 investigations of sexual assault completed in FY16. These investigations involved 4,409 victims and 4,384 subjects or individuals alleged to be perpetrators in an investigation.¹¹ Table 4 displays the gender of victims and subjects in completed investigations of Unrestricted Reports in FY16. The majority of victims in completed investigations are female (81 percent) and the majority of subjects are male (78 percent).

Table 4: Gender of Victims and Subjects in Completed Investigations of Unrestricted Reports, FY16

Gender	Victims		Subjects	
Male	824	19%	3,413	78%
Female	3,558	81%	172	4%
Gender Unknown/Data Not Available	27	1%	799	18%
Total	4,409	100%	4,384	100%

Table 5 depicts victim and subject ages (at the time of incident) for completed investigations of Unrestricted Reports. The majority of victims and subjects are between the ages of 16 and 34. Most victims in completed investigations are of junior enlisted grades and most subjects are of junior or senior enlisted grades. As shown in Table 6, 28 foreign national subjects, from investigations completed in FY16, allegedly committed sexual assault against Service members.

Table 5: Age of Victims and Subjects in Completed Investigations of Unrestricted Reports, FY16

Age at Time of Incident	Victims		Subjects	
0-15	45	1%	170	4%
16-19	1,028	23%	303	7%
20-24	1,858	42%	1,391	32%
25-34	842	19%	1,146	26%
35-49	193	4%	455	10%
50 and older	38	1%	123	3%
Age Unknown/Data Not Available	405	9%	796	18%
Total	4,409	100%	4,384	100%

¹¹ There were only 4,359 subjects with reportable information (i.e., offense met the elements of proof for sexual assault and fell within MCIOs legal authority). However, 25 additional individuals alleged to be perpetrators in an investigation are included in these demographic data.

Table 6: Grade/Status of Victims and Subjects in Completed Investigations of Unrestricted Reports, FY16

Grade or Status at Time of Report	Victims		Subjects	
E1-E4	2,780	63%	1,792	41%
E5-E9	555	13%	1,137	26%
WO1-WO5	8	<1%	21	<1%
O1-O3	121	3%	132	3%
O4-O10	39	1%	62	1%
Cadet/Midshipman/Prep School Student	48	1%	31	1%
U.S. Civilian	777	18%	149	3%
Foreign National/Foreign Military	47	1%	28	1%
Grade or Status Unknown/Data Not Available	34	1%	1,034	24%
Total	4,409	100%	4,386	100%

Notes:

1. Category percentages may not sum to 100 percent due to rounding to the nearest whole point.
2. The category "U.S. Civilian" includes DoD contractors, DoD civilians, and other U.S. government civilians.

Restricted Reports of Sexual Assault

Since Restricted Reports are confidential, protected communications, as defined in Department policy, SAPR personnel collect limited data about the victim and the sexual assault allegation. As with Unrestricted Reports, victims can make Restricted Reports for incidents that occurred in prior reporting periods and prior to Military Service.

In FY16, there were 1,995 initial Restricted Reports of sexual assault. Of the 1,995 reports, 414 (21 percent) converted to Unrestricted Reports.¹² At the close of FY16, 1,581 reports remained Restricted (Figure 16).¹³

This year, 356 Service members made a Restricted Report for an incident that occurred prior to entering Military Service, representing approximately 23 percent of the 1,581 remaining Restricted Reports of sexual assault. Of these 356 Service members:

- 234 indicated that the incident occurred prior to age 18
- 106 indicated that the incident occurred after age 18
- 16 declined to specify

Prior to FY14, the percentage of victims who converted their Restricted Reports to Unrestricted Reports remained relatively stable with an average of 15 percent. In FY14, the conversion rate

How many Restricted Reports convert to Unrestricted Reports each FY?

In FY16 21% of victims converted to an Unrestricted Report from a Restricted Report, which is consistent with the 21% that converted in FY15 and the 20% that converted in FY14.

¹² The Department pulls and analyzes data from DSAID six weeks after the end of the FY to allow sufficient time for data validation. During this six-week period, 21 additional Restricted Reports converted to Unrestricted. These 21 reports are included with the 414 reports that converted from Restricted to Unrestricted that DoD counts with FY16 numbers.

¹³ The 414 Restricted reports that converted to Unrestricted Reports are included in the total 4,591 Unrestricted Reports cited in the above section.

increased to 20 percent and it has stayed at 21 percent from FY15 to FY16. Figure 16 shows the Restricted Reports and conversion rates for the past FYs.

Notes:

1. The parentheses include the percentage of cases that converted during that time from a Restricted Report to an Unrestricted Report.
2. The Department pulls and analyzes data from DSAID six weeks after the end of the FY to allow sufficient time for data validation. During this six-week period, 21 additional Restricted Reports converted to Unrestricted. These 21 reports are included with the 414 reports that converted from Restricted to Unrestricted that DoD counts with FY16 numbers.

Figure 16: Restricted Reports Received and Converted, FY07 – FY16

Demographics of Victims in Restricted Reports

The following tables show that victims who filed a Restricted Report were primarily female, under the age of 25, and of a junior enlisted grade (i.e., E1-E4).

Table 7: Gender of Victims in Restricted Reports, FY16

Victim Gender	Count	Share
Male	312	20%
Female	1,266	80%
Data Not Available	3	<1%
Total	1,581	100%

Table 8: Age of Victims in Restricted Reports, FY16

Victim Age at Time of Incident	Count	Share
0-15	182	12%
16-19	359	23%
20-24	616	39%

Total	1,581	100%

Note: Categories may not sum to 100 percent due to rounding to the nearest whole point.

Service Referral Information

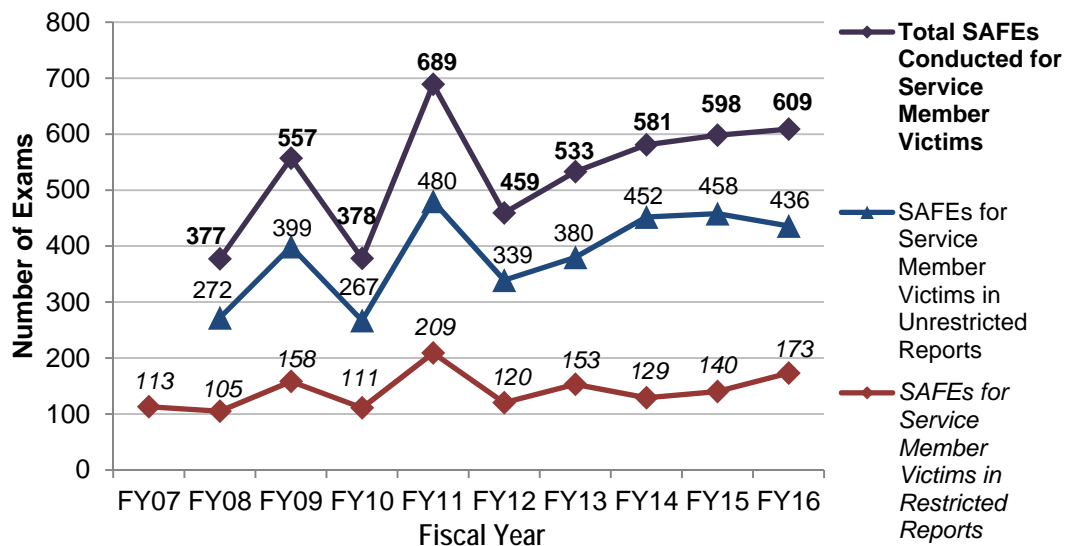

SARCs and SAPR VAs are responsible for ensuring victims have access to medical treatment, counseling, legal advice, and other support services. SARCs and SAPR VAs can refer victims to both military and civilian resources for these services. A referral for services can happen at any time while the victim is receiving assistance from a SARC or SAPR VA and may happen several times throughout the military justice process. This year, SARCs and SAPR VAs made an average of 2.8 service referrals per Service member victim submitting an Unrestricted Report. For Service member victims making Restricted Reports, SARCs and SAPR VAs made an average of 3.0 service referrals per Service member victim. Figure 17 shows the average number of referrals per Service member victim in sexual assault reports from FY07 to FY16.

Note: Referrals in Unrestricted Reports are not listed for FY07 because DoD did not direct the Services to collect these data until FY08.

Figure 17: Average Number of Service Referrals per Service Member Victim of Sexual Assault, FY07 – FY16

The Military Services reported that there were 609 Sexual Assault Forensic Examinations (SAFEs) conducted for Service member victims during FY16. Figure 18 depicts the reported number of SAFEs conducted for military victims of sexual assault from FY07 to FY16. The decision to undergo a SAFE belongs to the victim.

Note: SAFEs for Unrestricted Reports are not listed for FY07, because DoD did not direct the Services to collect these data until FY08.

Figure 18: SAFEs Reported by the Military Services involving Service Member Victims, FY07 – FY16

Expedited Transfers

Since FY12, DoD has allowed victims who submitted an Unrestricted Report of sexual assault to request an expedited transfer from their assigned units (Table 10). This may take the form of a move to another duty location on the same installation, or it may involve relocating to a new

installation entirely. Victims can request a transfer from their unit commander, who has 72 hours to act on the request. Should a unit commander decline the request, victims may appeal the decision to the first General Officer/Flag Officer (GO/FO) in their commander's chain of command. The GO/FO then has 72 hours to review the request and provide a response to the victim. Table 10 shows the number of expedited transfers and denials since FY12. Expedited transfers requested and approved have been steadily increasing since FY12.

Table 10: Expedited Transfers and Denials, FY12 – FY16

Transfer Type	FY12	FY13	FY14	FY15	FY16
Number of victims requesting a change in Unit/Duty Assignment (Cross-Installation Transfers)	57	99	44	71	62
Number Denied	2	3	0	2	3
Number of victims requesting a change in Installation (Permanent Change of Station)	161	480	615	663	684
Number Denied	0	11	15	12	18
Total Approved	216	565	644	720	725

Reports of Sexual Assault in Combat Areas of Interest

Arduous conditions in combat areas of interest (CAI) make sexual assault response and data collection very difficult. However, SARCs, SAPR VAs, and other SAPR personnel are assigned to all of these areas. SAPR personnel are diligent in providing requested services and treatment to victims. The data reported below are included in the total number of Unrestricted and Restricted Reports described in previous sections. Figure 19 illustrates the history of Unrestricted and Restricted Reporting in CAIs since FY08. There were 128 reports of sexual assault in CAIs in FY16, a slight increase from FY15; however overall reports in CAIs are still down from FY13. This result is most likely a reflection of the reduced number of Service members deployed to these countries starting in FY14.

Figure 19: Reports of Sexual Assault in Combat Areas of Interest, FY08 – FY16

Figure 20 presents Unrestricted Reports in CAIs by region. There were 76 Unrestricted Reports in CAIs in FY16.

Note: In FY16, there were 22 Unrestricted Reports in Kuwait, 10 Unrestricted Reports in Afghanistan, 5 Unrestricted Reports in Iraq, and 39 Unrestricted Reports in the remaining CAIs.

Figure 20: Unrestricted Reports in Combat Areas of Interest, FY08 – FY16

There were 52 Reports remaining Restricted in CAIs, a decrease from the 56 Reports remaining Restricted in FY15. Thirteen Restricted Reports converted to an Unrestricted Report during the FY. Figure 21 shows Restricted Reports by CAI since FY08. Table 11 lists the number of Unrestricted and Restricted Reports for each CAI.

Note: In FY16, there were 6 Restricted Reports in Kuwait, 15 Restricted Reports in Iraq, 15 Restricted Reports in Afghanistan, and 16 Restricted Reports in the remaining CAIs.

Figure 21: Restricted Reports in Combat Areas of Interest, FY08 – FY16

Table 11: Unrestricted and Restricted Reports by Combat Area of Interest, FY16

Combat Area of Interest	Unrestricted Reports FY16	Restricted Reports FY16
Afghanistan	10	15
Bahrain	8	7
Djibouti	2	1
Egypt	1	0
Iraq	5	15
Jordan	3	1
Kuwait	22	6
Oman	1	0
Qatar	17	6
Saudi Arabia	1	1
United Arab Emirates	6	0
Total	76	52

Demographics of Victims and Subjects in Unrestricted Reports in CAIs

The Department draws demographic information about the Unrestricted Reports made in CAIs from the 69 investigations closed during FY16. These 69 investigations involved 74 victims and 76 subjects.

Victims in Completed Investigations

The demographics of victims in CAIs who submitted Unrestricted Reports mirror the demographics of victims in all Unrestricted Reports made to DoD, in that they are mostly female (76 percent) and of a junior enlisted grade (57 percent). However, victims in CAIs who submitted Unrestricted Reports tended to be slightly older than victims submitting Unrestricted Reports in general; 34 percent of victims in CAIs were 25 and over compared to 24 percent of victims in all Unrestricted Reports.

Subjects in Completed Investigations

The demographics of subjects in Unrestricted Reports submitted in CAIs are similar to the demographics of subjects in all Unrestricted Reports submitted to DoD, in that the majority are male (78 percent), under the age of 35 (67 percent), and in an enlisted grade (89 percent).

Demographics of Victims and Subjects in Restricted Reports in CAIs

The 52 victims with reports remaining Restricted in CAIs mirror the demographics of victims in all Restricted Reports made to DoD, in that they were mostly female (87 percent). However, victims making Restricted Reports in CAIs tended to be older; 62 percent of victims in CAIs were 25 and over compared to 24 percent of victims in all Restricted Reports. Additionally, victims in CAIs tended to be of higher rank; 30 percent of victims in CAIs were E1 to E4 compared to 71 percent of victims making Restricted Reports in general.

FY16 Retaliation Allegations

The Military Services and National Guard Bureau (NGB) provided data on allegations of retaliation received in FY16, associated with reports of sexual assault and/or complaints of sexual harassment. Information submitted by the Military Services and NGB varies depending

on Service/NGB approach (e.g., Department of the Navy only submits data on cases with completed investigations, whereas the Army, Air Force, and NGB provide information on completed and ongoing investigations).

In FY16, the Department requested the military Services provide two types of data:

1. **Case Management Group (CMG) Retaliation Allegations:** The Military Services and NGB provided data on all retaliation allegations discussed at CMG meetings in FY16, involving victims, witnesses/bystanders, and first responders associated with reports of sexual assault. This data does not likely represent all retaliation allegations because victims, witnesses/bystanders, and first responders who believe they have experienced retaliation have the option of requesting their experience be discussed at a CMG.
2. **Investigations of Alleged Retaliation:** The Military Services and NGB provided data on all FY16 allegations of retaliation investigated and/or handled by Service/NGB or DoD Inspectors General (IG), MCIOs, Law Enforcement, and Commander-Directed Inquiries. This data pertains to allegations of retaliation associated with Unrestricted Reports of sexual assault or formal/informal complaints of sexual harassment.

Each data source offers a different perspective on the retaliation allegations. The CMG data provide information on initial actions taken to refer allegations to the appropriate agency and provide support for the individual making the allegation. The data on investigations provide detail on actions taken to officially assess the allegations, gather evidence, protect the parties involved, and hold offenders appropriately accountable.

CMG Retaliation Data

DoDI 6495.02 “Sexual Assault Prevention and Response Program Procedures” requires the Military Services and NGB to review new and ongoing sexual assault cases each month within their installation CMGs. In FY14, the Secretary of Defense directed that the CMGs also discuss such allegations and ensure the appropriate entities are engaged in the responses for particular cases, at the request of the Service member who made a sexual assault report and perceived retaliation associated with doing so. This process facilitates the provision of services to those who experience retaliation, while allowing the CMG better oversight of situations where retaliation may be occurring. This year, 67 individuals requested their allegation of retaliation be discussed at the CMG. Victims of sexual assault made the vast majority of retaliation allegations (61). In addition, one witness/bystander and five first responders had their retaliation allegations discussed at the CMG.

Of the 67 retaliation allegations, 35 alleged ostracism and/or cruelty/oppression/maltreatment, 20 alleged reprisal, 2 alleged another criminal offense in relation to the report of sexual assault, and 10 alleged a combination of reprisal, cruelty/oppression/maltreatment, and other misconduct. Women made the majority of retaliation reports. Furthermore, most individuals alleging retaliation indicated that they experienced it from multiple individuals of both genders (13 allegations) and multiple men (13 allegations). Most often, the alleged retaliator(s) was not the alleged perpetrator of sexual assault (53 allegations).

The table below displays all the actions taken as discussed at the CMG. Nearly two-thirds (61 percent) of all allegations received multiple actions. Common actions included referring the information to command (26 percent), referring the information to IG (16 percent), referring the information to the MCIO (9 percent), transferring the retaliation reporter at his/her request (9 percent), informal/verbal counseling of alleged retaliator(s) (8 percent). Six allegations could not

be acted upon because the victim did not want action (1), the retaliator was unknown (1), the allegation did not meet the elements of retaliation (2), and the action was pending (2).

Table 12: CMG Action Taken to Address Retaliation

Action Taken to Address Retaliation	Count of Actions	Share
Information referred to IG	24	16%
Information referred to Command	39	26%
Information referred to MCIO	14	9%
Information referred to MEO	2	1%
Transfer of retaliation reporter at his/her request	13	9%
Alleged retaliator(s) moved (transfer, relocation, reassignment, deployment)	5	3%
Military protective order issued or civilian protective order obtained by reporter	8	5%
Safety plan updated for retaliation reporter	8	5%
Negative treatment of retaliation reporter put to a stop through command intervention	4	3%
Informal/verbal counseling of alleged retaliator(s)	12	8%
Briefings/trainings for alleged retaliator(s) and/or unit/installation	8	5%
New policies implemented by command in unit/installation	1	1%
Alleged retaliator(s) later held appropriately accountable following a referral of the allegation to the appropriate authority by the CMG	11	7%
Other action taken	3	2%
Total actions taken in 61 cases	152	100%

Notes: CMGs meet monthly throughout the Department of Defense to review progress on sexual assault cases in the military justice system. Starting in FY14, the Secretary of Defense directed the CMGs to discuss allegations of retaliation at the victim's request. CMGs have no ability to investigate allegations of retaliation themselves, but instead must refer all allegations to appropriate authorities. Such referrals are captured in the first four rows of this table. However, the leadership involved in the CMGs has the ability to direct a number of safety and administrative actions to protect those alleging retaliation. These actions are in the remaining rows of this table. The number of actions taken is greater than the total number of retaliation allegations because military leaders took multiple steps to address retaliation allegations brought to their attention through the CMGs.

Data on Investigations of Alleged Retaliation

Persons seeking to report an allegation of retaliation have a variety of avenues to do so, depending on the type of misconduct being alleged. Reprisal allegations must be reported to DoD and Service IGs. Ostracism and maltreatment allegations associated with sexual assault allegations may be investigated by an MCIO or another DoD law enforcement agency, or may be referred to unit commanders for investigation and resolution – all depending upon the circumstances and matters being alleged.

Reports of Retaliation

The Military Services and NGB received 84 retaliation reports against 169 alleged retaliators in FY16 associated with sexual assault or sexual harassment reports. Additionally there were 11 reports, involving 12 alleged retaliators, from prior years that had a completed investigation in FY16, for a total of 95 reports discussed in this section. Of the 95 reports, 81 percent involved female reporters and 74 percent were related to an Unrestricted Report of sexual assault, with the remainder related to formal complaints of sexual harassment (22 percent), a situation where the reporter was suspected of making a sexual assault report, i.e. Restricted report or other, (3 percent), or informal complaints of sexual harassment (1 percent). The majority of reporters of retaliation were victims of sexual assault or complainants of sexual harassment (86 percent); the remaining reporters were witnesses/bystanders (9 percent), first responders (1 percent), or other (3 percent).¹⁴ The following entities investigated these reports: DoD or Service IGs (61 percent), MCIOs (35 percent), Chain of Command (3 percent), Chain of Command and DoD IG (1 percent). Nearly all (98 percent) of reporters received notification of the outcome of the investigation once completed.

Characteristics and Outcomes of Alleged Retaliators

The analysis that follows focuses on the characteristics and outcomes of the 169 alleged retaliators in reports of retaliation in FY16 and an additional 12 alleged retaliators in prior year reports with completed investigations in FY16, for a total of 181 alleged retaliators. The results that follow will largely reflect reprisal allegation outcomes, since the majority of the information originates from DoD and Service IGs, which are exclusively tasked with investigating reprisal allegations for DoD. The alleged retaliators in this collection of data were investigated for the following categories: reprisal (65 percent), reprisal and other misconduct - i.e., ostracism, cruelty or maltreatment, or other crimes (3 percent), restriction¹⁵ (1 percent), ostracism and/or cruelty/ maltreatment (6 percent), other criminal offenses (25 percent). The majority of alleged retaliators were men (80 percent) and only 10 percent were the alleged perpetrator of the associated sexual assault or sexual harassment. Most frequently, alleged retaliators were in the chain of command of the reporter (77 percent), followed by an individual associated with the alleged perpetrator of sexual assault/sexual harassment (9 percent), peers, co-workers, friends, or family members of the reporter (7 percent), unknown/investigation pending (4 percent), or a superior not in their chain of command of the reporter (3 percent).

Figure 22 presents a review of the status of retaliation investigations and outcomes for the alleged retaliators in those investigations. The Military Services and NGB opened investigations against nearly all the alleged retaliators. At the time of data collection, the majority of alleged retaliators still had an investigation pending or had their case taken over by DoD IG. Results of these investigations will be reported in future FYs.

There were 49 alleged retaliators with completed investigations from FY16 reports and 12 alleged retaliators from prior year reports that had an investigation completed this FY, for a total of 61 alleged retaliators in completed investigations. Investigators substantiated or founded

¹⁴ Percentages do not sum to 100 percent due to rounding.

¹⁵ One case in this category also includes an allegation of ostracism

charges against 17 of the 61 alleged retaliators in completed investigations.¹⁶ Actions against these alleged retaliators included court-martial preferrals (3), nonjudicial punishment (2), administrative discharge and adverse administrative action (1), and counseling (1). Action was not possible against 7 alleged retaliators (insufficient evidence, accused unidentified, or unspecified reason/action). Finally, 3 alleged retaliators had action pending.

¹⁶ Army CID does not report whether an investigation is founded or unfounded but does report the trial counsel's/prosecutor's opinion as to whether there is probable cause to believe that a crime was committed. For the purposes of summarizing data across the Services, 16 Army CID cases were categorized according to the outcome for the alleged retaliator (e.g., cases with courts-martial preferred were categorized under founded).

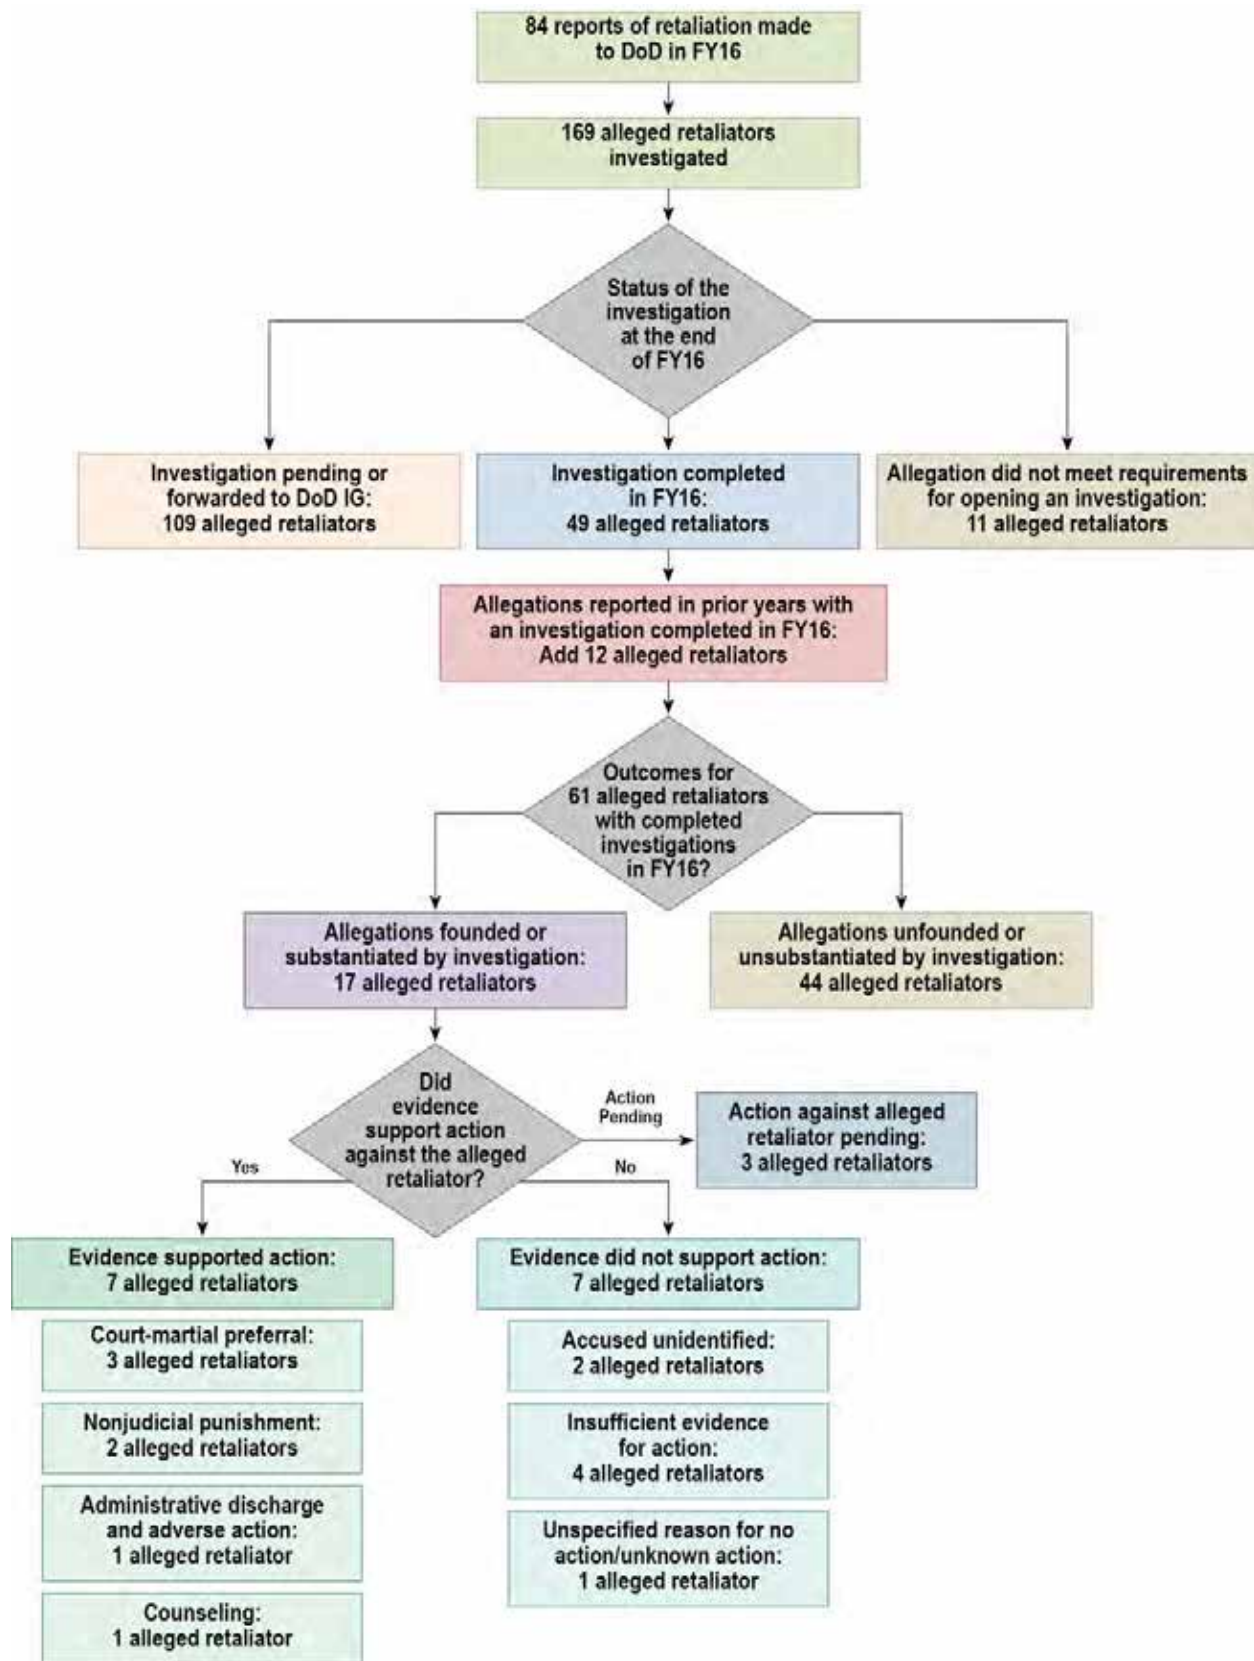

Figure 22: Reports of Retaliation Made to DoD in FY16

FY14 Data: Revisited

In every Annual Report, SAPRO presents data for the FY in which a victim reported a sexual assault; however, by the end of the FY, investigations and/or disposition decisions for the cases associated with these reports are often still pending. DSAID allows DoD to continue tracking these pending cases through to completion. This year, SAPRO and the Services worked to validate prior years' data to present a thorough picture of FY14—from the report of a sexual assault through investigation and disposition conclusion.

As explained on p. 7, DSAID is a real-time data-gathering tool. Since SAPRO pulled data for this section in January 2017, numbers presented here will differ from data published in FY14's Annual Report. For example, victims who made a Restricted Report in FY14 may have converted to an Unrestricted Report in subsequent FYs. DSAID counts these converted cases as Unrestricted Reports; thus, the number of Unrestricted and Restricted reports in a given FY will change as victims convert their reports.

Although the majority of FY14 reports have completed investigations and disposition decisions, some cases remain pending as of the date of the data pull for these analyses. Restricted Reports that converted to Unrestricted after FY14 will have investigations that opened more recently and may remain pending. Furthermore, investigations originally opened and closed in FY14 may be re-opened as new evidence becomes available.

As of January 2017, DoD received 6,258 reports of sexual assault dated in FY14 (Figure 23), which comprised of 4,801 Unrestricted Reports and 1,457 Restricted Reports.¹⁷ Of the 4,801 Unrestricted Reports that were referred for investigation, 4,552 investigations were opened (Figure 23, Point D).¹⁸ At the time of the data pull, MCIOs had completed 4,475 (98 percent) of investigations opened for cases reported in FY14 (Figure 23, Point F). These 4,475 completed investigations resulted in 4,180 case dispositions to report.¹⁹

¹⁷ The transition to DSAID in FY14 led to a slight lag between the date of a sexual assault report and the date of DSAID entry. This lag accounts for an increased number of Unrestricted and Restricted reports in the current analysis.

¹⁸ Some reports may not have had an investigation opened due to the case not rising to the level of an MCIO investigation, being outside UCMJ jurisdiction, or the incident occurring prior to a military service. Some investigations will include multiple victims as well.

¹⁹ Since these data were pulled in the first quarter of FY17, a small number of cases (32) have disposition decisions dated in FY17 and will thus be reported in the FY17 Annual Report.

Figure 23: Reports of Sexual Assault, Completed Investigations, and Case Dispositions, FY14

The 4,180 cases from DoD investigations for which dispositions were reported included Service members, U.S. civilians, foreign nationals, and subjects that could not be identified (Figure 24). Of these, DoD could not consider taking action in 1,297 cases because:

- 435 cases were associated with allegations unfounded by legal review (Figure 24, Point K).²⁰
- 758 cases were outside of DoD's legal authority (Figure 24, Points L, M, and N). Specifically, MCIOs could not identify a subject despite a criminal investigation, a subject was a civilian or foreign national not under the military's jurisdiction, or a subject had died or deserted before DoD could take disciplinary action.
- 104 cases included Service members being prosecuted by a civilian/foreign authority (Figure 24, Point O). While a Service member is always under the legal authority of DoD, sometimes a civilian authority or foreign government will exercise its legal authority over a Service member who is suspected of committing a crime within its jurisdiction.

²⁰ Prior to FY15, DoD presented data on allegations investigated by the MCIOs that were unfounded by legal review. In FY15 and FY16, DoD developed new categories to reflect the nature and outcomes of these allegations more accurately (see points G and H in Figure 6).

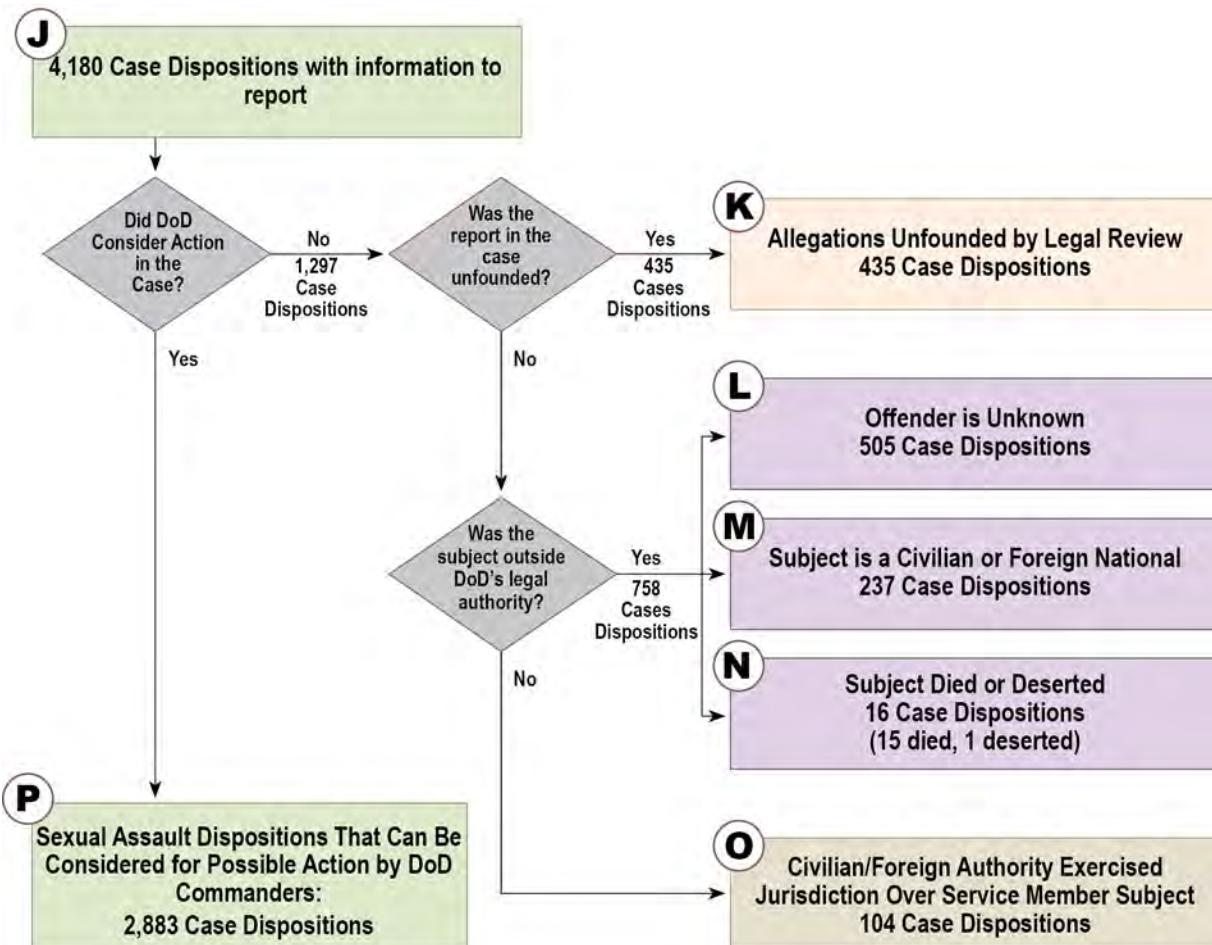

Figure 24: Cases outside DoD Legal Authority, FY14

As explained on p. 20, legal factors occasionally prevent DoD from taking disciplinary action against subjects. Commanders could not take disciplinary action in 807 (28 percent) cases due to insufficient evidence of an offense to prosecute, the victim declining to participate in the military justice process, the statute of limitations expiring, or the victim dying before completion of justice action (Figure 25, Point T). After examining the evidence in each case with a military attorney, commanders declined to take action in 68 cases, because available evidence indicated the allegations in these cases were false or baseless (Figure 25, Point U).

For 2,008 cases (70 percent), commanders had sufficient evidence and the legal authority to support some form of disciplinary action for an alleged sexual assault offense or other misconduct (Figure 25, Point Q). When a subject receives more than one disposition in a single case, DoD reports only the most serious disciplinary action. The possible actions, listed in descending order of severity are preferral of court-martial charges, nonjudicial punishment, administrative discharge, and other adverse administrative action.

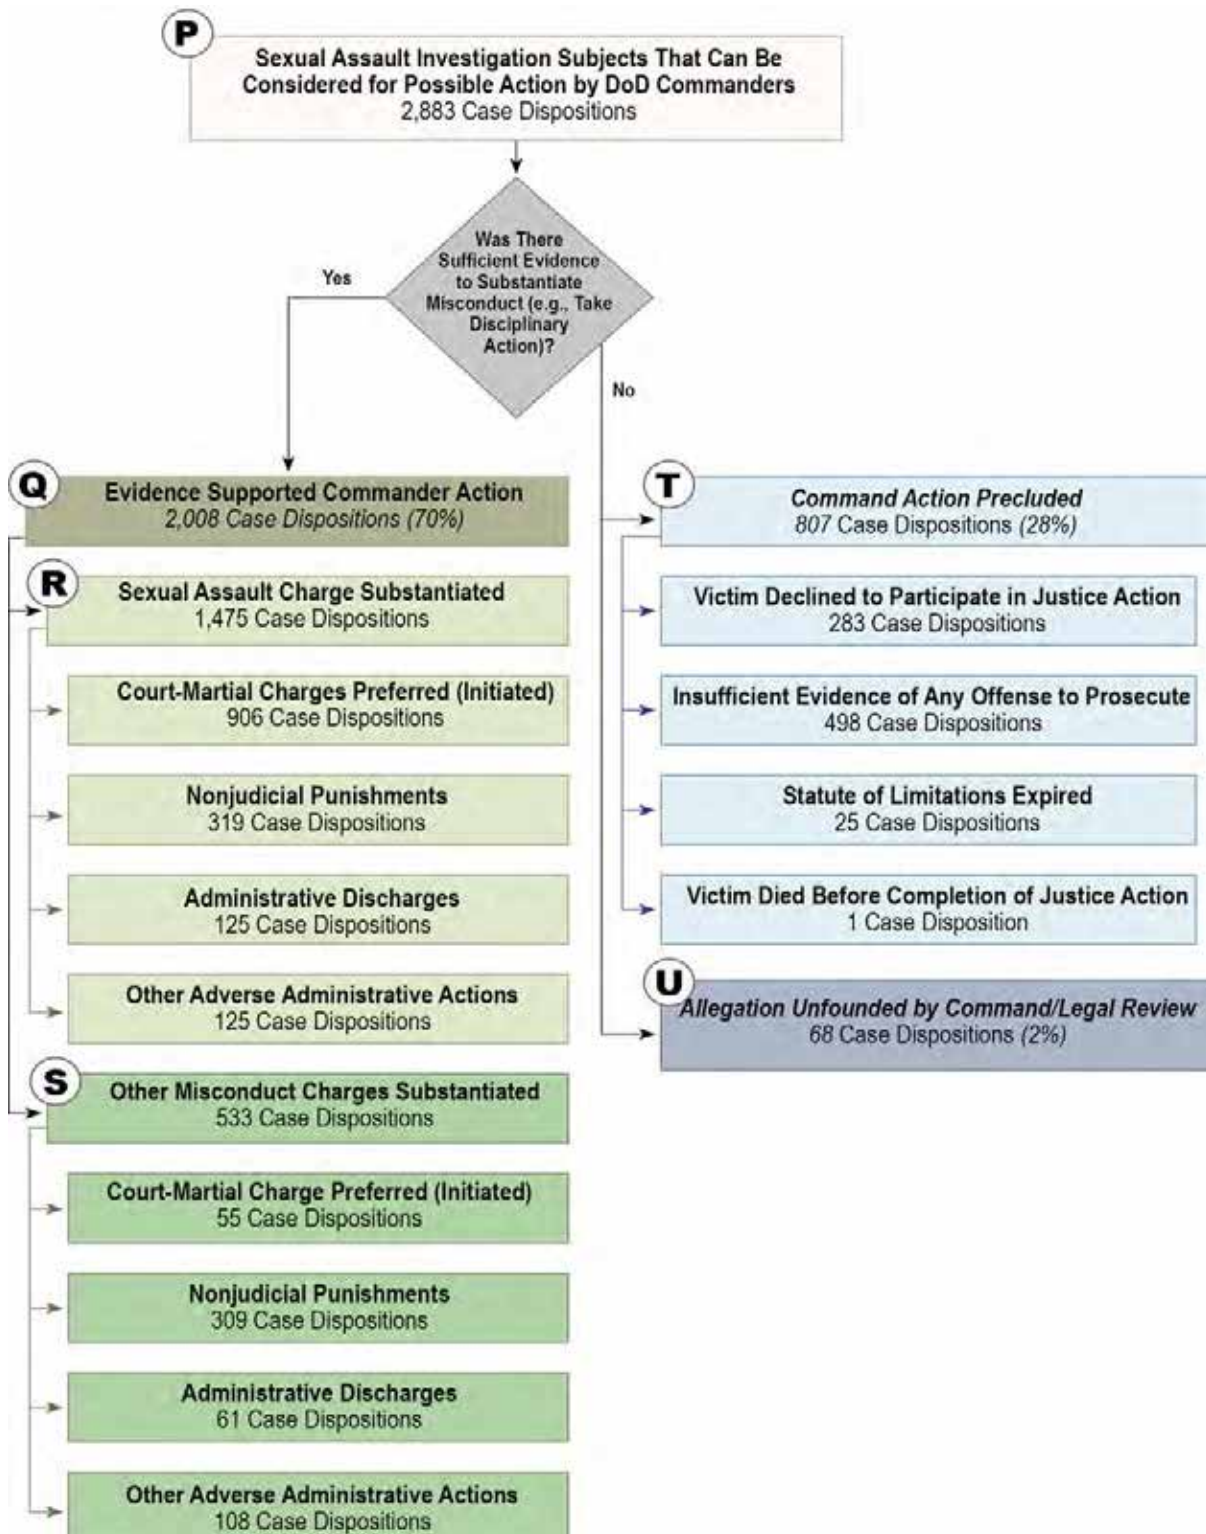

The following outlines the command actions taken for the 1,475 cases for which it was determined a sexual assault offense warranted discipline:

- 61 percent (906) of cases were associated with court-martial charges preferred (initiated).
- 22 percent (319) were associated with proceedings for nonjudicial punishment under Article 15 of the UCMJ.
- 17 percent (250) were associated with a discharge or another adverse administrative action.²¹

For 533 cases, evidence supported command action for other misconduct discovered during the sexual assault investigation (e.g., making a false official statement, adultery, underage drinking, or other crimes under the UCMJ), but not a sexual assault charge. Command actions for these cases follow below:

- 10 percent (55) of cases were associated with court-martial charges preferred.
- 58 percent (309) were associated with proceedings for nonjudicial punishment.
- 32 percent (169) were associated with some form of adverse administrative action or discharge.

²¹ Percentages do not sum to 100 percent due to rounding.

Note: Some figures may not sum to 100 percent due to rounding.

Figure 25: Dispositions of Cases under DoD Legal Authority, FY14

As noted previously, 906 cases were associated with court-martial charges preferred. The dispositions and the sentences imposed by courts-martial are for those subjects with at least one sexual assault charge adjudicated at any time for a report made in FY14.

Figure 26 shows that 592 cases proceeded to trial, 74 percent of which were associated with a conviction of at least one charge at court-martial. The Services processed 47 convicted subjects that did not receive a punitive discharge or dismissal for administrative separation from Military Service.

Court-martial charges in 150 cases were dismissed. However, commanders used evidence gathered during the sexual assault investigations to take nonjudicial punishment for other misconduct in 31 cases. The punishment may have been for any kind of misconduct for which there was evidence.

A total of 150 cases resulted in a resignation or discharge instead of court-martial. Of those cases, 111 of 137 enlisted members who received a discharge in lieu of court-martial (DILLO), the enlisted member was separated Under Other Than Honorable Conditions (UOTHHC), the lowest characterization of discharge possible administratively.

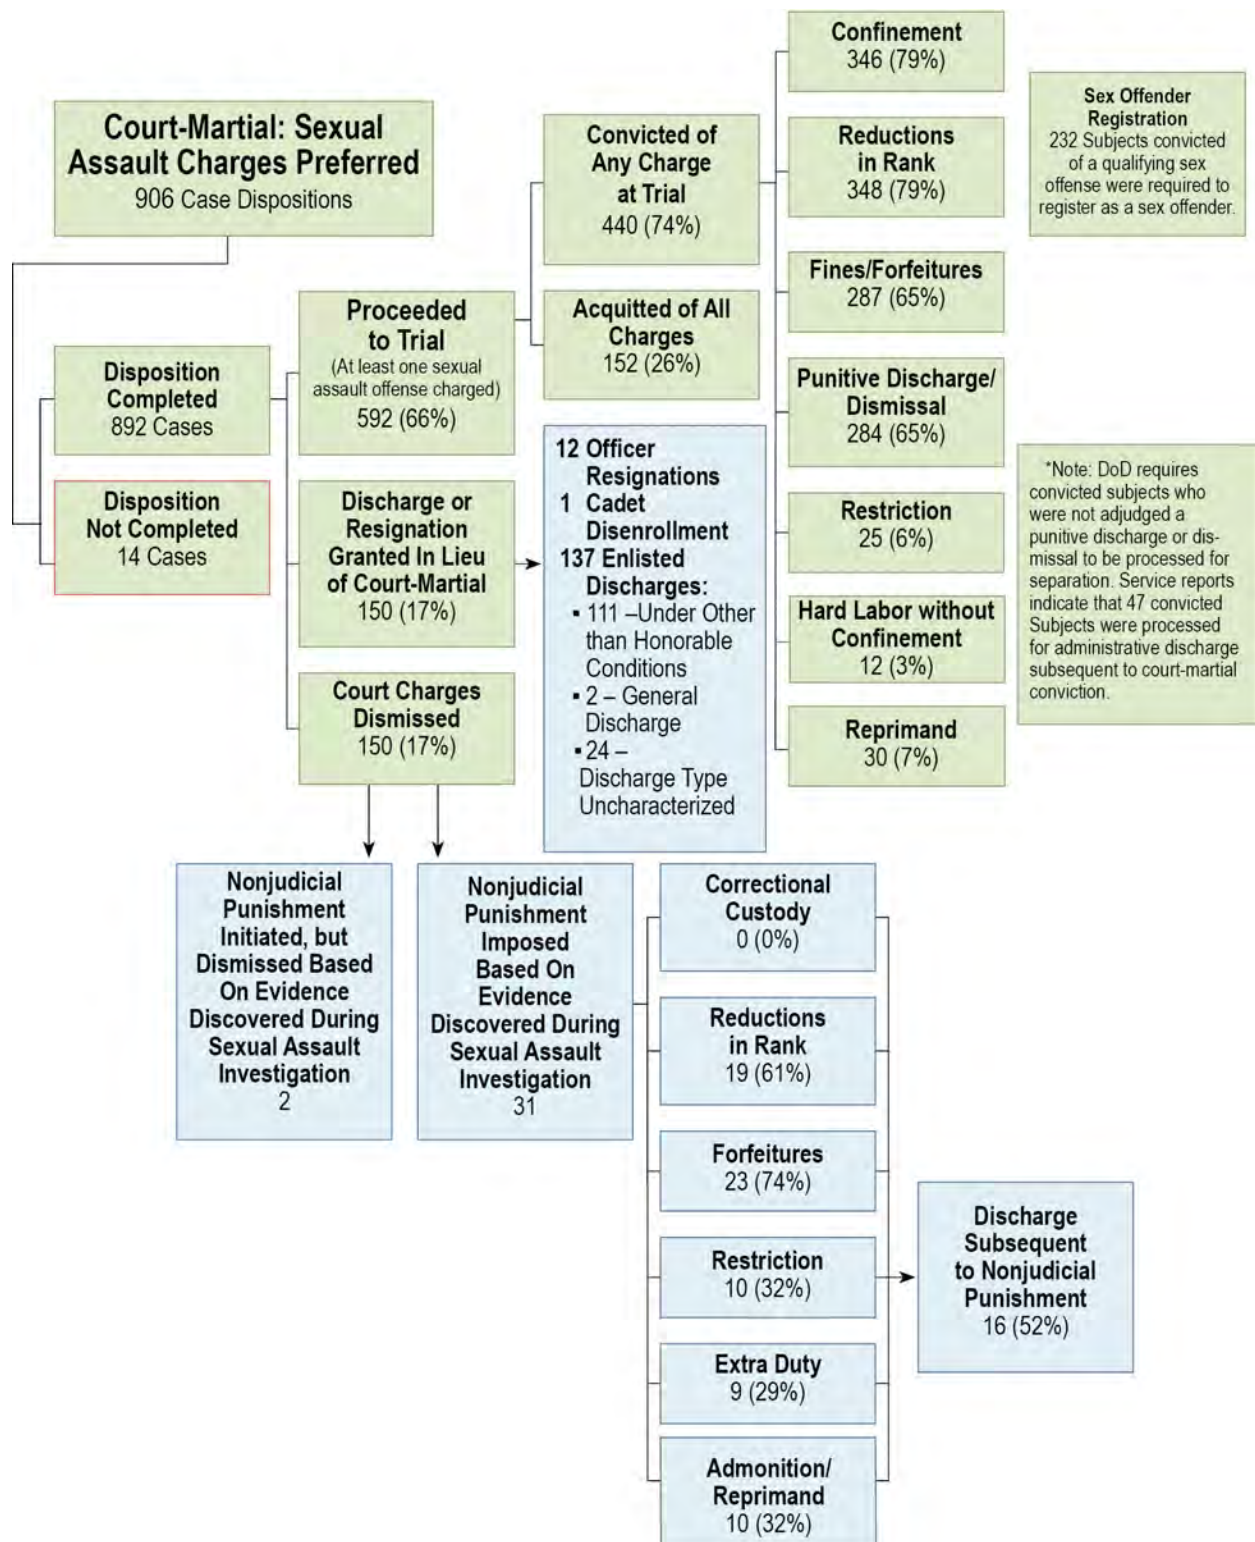

Figure 26: Court-Martial Preferred for Sexual Assault, FY14

Notes:

1. Percentages for some categories do not sum to 100 percent due to rounding. Punishments do not sum to 100 percent, because cases can have multiple punishments.
2. The Services reported that 906 cases of sexual assault investigations were associated with court-martial charges preferrals for a sexual assault offense.
3. Of the 906 cases associated with court-martial preferrals, 592 cases resulted in trial proceedings, 150 cases resulted in a discharge or resignation in lieu of court-martial, and 150 cases resulted in court-martial charges being dismissed.
4. In cases in which a discharge in lieu of court-martial is requested and approved, the characterization of the discharge is UOTHC, unless a higher characterization is justified.
5. Of the 150 cases with dismissed charges, commanders imposed nonjudicial punishment in 31 cases. An additional 2 cases had a nonjudicial punishment initiated and subsequently dismissed. Most of these 31 cases included two kinds of punishment: a reduction in rank and a forfeiture of pay.
6. Of the 592 cases that resulted in court-martial trial proceedings, 440 are associated with convictions on at least one charge. Conviction by court-martial may result in a combination of punishments. Consequently, convicted Service members could be adjudged one or more of the punishments listed. In most cases, they received at least four kinds of punishment: confinement, a reduction in rank, a fine or forfeiture of pay, and a punitive discharge (i.e., bad conduct discharge, dishonorable discharge, or dismissal).

Appendix C: Metrics and Non-Metrics on Sexual Assault

In collaboration with the White House, the Department of Defense (DoD) developed the following metrics and “non-metrics” in 2014 to help illustrate and assess DoD progress in sexual assault prevention and response (SAPR). As part of the development process, DoD canvassed sexual assault programs throughout the nation to identify potential points of analysis.

Unfortunately, DoD could not find widely accepted, population-based metrics to serve as a reference. Therefore, DoD developed the following twelve metrics and five “non-metrics” in a collaborative process involving DoD SAPR program experts and researchers. For the purposes of this document, the term “metric” describes a quantifiable part of a system’s function. Inherent in performance metrics is the concept that there may be a positive or negative valence associated with such measurements. In addition, adjustments in inputs to a process may allow an entity to influence a metric in a desired direction. For example, DoD aspires to encourage greater reporting of sexual assault by putting policies and resources in place to this end. Therefore, increases in the number of sexual assault reports may indicate that DoD’s efforts may be working.

DoD coined the term “non-metric” to describe outputs of the military justice system that should not be “influenced,” or be considered as having a positive or negative valence in that doing so may be inappropriate or unlawful under military law.

Figures A through V illustrate points of analysis for metrics and non-metrics.

Metrics

Metric 1: Past-Year Prevalence of Unwanted Sexual Contact

DoD uses the *Workplace and Gender Relations Survey of Active Duty Members (WGRA)*¹ to assess the estimated prevalence, or occurrence, of sexual assault in the active duty over a year’s time. The Office of People Analytics (OPA) conducts the WGRA in accordance with the quadrennial cycle of human relations surveys outlined in Section 481 of Title 10, USC. In the National Defense Authorization Act (NDAA) for Fiscal Year (FY) 2012, Congress directed DoD to survey active duty members every two FYs. Past-year estimated prevalence rates are available for Calendar Year (CY) 2006, FY10, FY12, FY14, and FY16. The Department will estimate prevalence rates again in FY18.

As with all surveys, OPA classifies Service members as having experienced sexual assault based on respondents’ memories of the event as expressed in their survey responses. A full review of all evidence may reveal that some respondents whom OPA classifies as not having experienced sexual assault actually did have one of these experiences. Similarly, some whom OPA classifies as having experienced a crime or violation may have experienced an event that

¹ In FY14, the RAND Corporation designed a prevalence measure more closely aligned with legal language in the UCMJ. Consequently, “sexual assault” replaced “unwanted sexual contact” as the survey measure that estimates prevalence.

would not meet the minimum DoD criteria. OPA's rigorous survey development sought to minimize such errors, but these errors cannot be eliminated in a self-report survey.

Metric 1 (Figure A) illustrates the past-year rates of unwanted sexual contact (USC) among active duty women and men for CY06, FY10, and FY12. In FY14, DoD hired the RAND Corporation (RAND) to align the survey measure more closely with the crime of sexual assault as stipulated in the Uniform Code of Military Justice (UCMJ). Therefore, prevalence of sexual assault as estimated in FY14 and FY16 are not directly comparable to prior FYs.

In FY16, the WGRA estimates that 4.3 percent of active duty women and 0.6 percent of active duty men experienced an incident of sexual assault in the 12 months prior to being surveyed.² Compared to FY14, the FY16 sexual assault rate is statistically lower for both women (from 4.9 percent in FY14 to 4.3 percent in FY16) and men (from 0.9 percent in FY14 to 0.6 percent in FY16).

Description: Past-year prevalence of USC and sexual assault as estimated by survey data.

Sources: *Gender Relations Survey of Active Duty Members* (2006); *WGRA*, 2010, 2012, 2016; *RAND Military Workplace Study (RMWS)*, 2014).

Implication: Estimates the occurrence of USC or sexual assault of active duty members in the 12 months prior to the survey administration.

Figure A - Metric 1: Estimated Past-year Prevalence of Unwanted Sexual Contact and Sexual Assault, CY06 and FY10 – FY16

² OPA used scientific weighting to estimate prevalence rates that were representative of the entire active duty population. OPA provides confidence intervals for all statistics that are interpreted as population estimates. The estimated 4.3 percent prevalence rate among women has a confidence interval of 4.1 percent to 4.6 percent, meaning that we can infer with 95 percent confidence that the prevalence of sexual assault among active duty women is between 4.1 percent and 4.6 percent. The estimated 0.6 percent prevalence rate among men has a confidence interval of 0.5 percent to 0.7 percent, meaning that we can infer with 95 percent confidence that the prevalence of sexual assault among active duty men is between 0.5 percent and 0.7 percent.

Metric 2: Estimated Prevalence versus Reporting

Underreporting occurs when crime reports to law enforcement fall far below statistical estimates of how often a crime may actually occur. Nationally, sexual assault is one of the most underreported crimes, with estimates indicating that between 65 and 84 percent of rapes and sexual assaults are not reported to police.³ Underreporting also occurs in DoD, which interferes with providing victims needed care and holding alleged offenders appropriately accountable. In order to understand the extent to which sexual assault goes unreported, metric 2 compares the estimated number of Service members who may have experienced sexual assault, as measured by survey data, with the number of Service member victims in sexual assault reports for incidents occurring during Military Service.

Description: Estimates the percentage of Service member incidents captured in reports of sexual assault (Restricted and Unrestricted Reports).

Sources: Service reports of sexual assault (FY04-FY13) and DSAID, FY14-current; *Gender Relations Survey of Active Duty Members* (2006); *WGRA*, 2010, 2012, 2016; *RMWS*, 2014.

Implication: Capturing a greater proportion of sexual assault incidents in reports to DoD improves visibility over the extent of the problem. It is the Department's goal to decrease the estimated prevalence of sexual assault through prevention, while encouraging a greater number of victims to make a Restricted or Unrestricted Report. Increased reporting allows a greater number of victims to obtain needed assistance, and gives the Department an opportunity to hold alleged offenders appropriately accountable.

Note: Error bars represent the 95 percent confidence interval for each estimate.

Figure B - Metric 2: Sexual Assault Reports versus Estimated Prevalence, CY04 – CY06 and FY07 – FY16

³ National Research Council. (2014). *Estimating the Incidence of Rape and Sexual Assault*. Panel on Measuring Rape and Sexual Assault in Bureau of Justice Statistics Household Surveys, C. Kruttschnitt, W.D. Kalsbeek, and C.C. House, editors. Committee on National Statistics, Division of Behavioral and Social Sciences and Education. Washington, DC: The National Academies Press.

Each year, DoD receives reports of sexual assault from military and civilian victims. DoD responds to all reports of sexual assault; however, a focus on Service member victim reports of sexual assault for an incident occurring during Military Service allows for comparison to prevalence estimates. Figure B illustrates the difference between reports and the estimated number of military victims. Although reports to DoD authorities are unlikely to capture all sexual assaults estimated to occur in a given year, DoD's goal is to encourage greater Service member reporting of sexual assault.

As Figure B shows, the 4,794 Service members who reported sexual assault in FY16 for an incident that occurred during military Service accounted for approximately 32 percent of the estimated number of Service members who may have experienced sexual assault that year (~14,900). In FY14, 4,744 Service members made reports to DoD authorities, accounting for about 23 percent of the FY14 sexual assault prevalence estimate (~20,300). The survey estimates show that fewer sexual assaults occurred in FY16 than in FY14, while a greater number of victims chose to report the crime in FY16 than in any previous year. In addition, sexual assault reporting in FY16 exceeds reports received in FY15.

In FY16, women comprised the majority of the survey-estimated sexual assault victims (~8,600 women versus ~6,300 men). A greater proportion of female victims also reported their assault. Specifically, 43 percent (3,709) of survey-estimated female victims and only 17 percent (1,085) of male victims made a report of sexual assault for an incident occurring during Military Service.

The Department anticipates that initiatives to increase reporting combined with prevention efforts that reduce the overall occurrence of sexual assault will further the progress illustrated in this metric. In effect, over time DoD expects that:

- Initiatives to build victims' confidence in the system should increase the number of Service members who choose to make an Unrestricted or Restricted Report.
- The effects of prevention initiatives implemented across DoD should reduce past-year prevalence rates of sexual assault, as estimated by the *WGRA*.

Metric 3: Bystander Intervention Experience in the Past-Year

A total of 684,980 active duty respondents completed questions related to Sexual Assault Prevention and Response (SAPR) issues on the Defense Equal Opportunity Management Institute's (DEOMI) *Organizational Climate Survey (DEOCS)* from October 2015 to September 2016 (Table A).

Table A - Sample Sizes for *DEOCS* Respondents, FY16

Sample size (N)	684,980
Men	582,807
Women	102,173
Junior Enlisted (E1-E3)	126,550
Junior NCO (E4-E6)	367,856
Remaining Ranks (E7-E9, W1-W5, O1 & Above)	190,574

The *DEOCS* included two items to assess respondents' bystander intervention experiences in the past 12 months. The first item asked whether participants *observed* a situation they believed could have led to a sexual assault within the past 12 months. If respondents answered "yes" to

this question, the survey prompted them to answer a second question identifying the response that most closely resembled their actions:

In the past 12 months, I observed a situation that I believe was, or could have led to, a sexual assault:

- Yes
- No

Response to this situation (select the response that most closely resembles your actions):

- *I stepped in and separated the people involved in the situation*
- *I asked the person who appeared to be at risk if they needed help*
- *I confronted the person who appeared to be causing the situation*
- *I created a distraction to cause one or more of the people to disengage from the situation*
- *I asked others to step in as a group and diffuse the situation*
- *I told someone in a position of authority about the situation*
- *I considered intervening in the situation, but I could not safely take any action*
- *I decided not to take action*

Of the respondents who completed the DEOCS in FY16, 3 percent indicated they had observed a situation they believed was, or could have led to, a sexual assault (i.e., a high-risk situation). However, of those who observed a high-risk situation, the vast majority took some action to intervene (Figure C).

Metric 3a and 3b: Bystander Intervention

	% Observed High-risk Situation	If Observed, % Intervened
Fiscal Year 2016	3%	88%
Description: Service member responses to: “In the past 12 months, I observed a situation that I believed was, or could have led to, a sexual assault” and, if they observed a high-risk situation, what action they took.		
Source: DEOCS		
Implication: Indicator of frequency of observed high-risk situations and Service member actions to prevent sexual assault. However, DEOCS results draw from a convenience sample and may not represent the entire force.		
Summary Points: Although most Service members did not witness a high-risk situation, the majority of those who did witness such situations took action to intervene.		
Note: DEOCS is voluntary and administered annually by units or within 120 days of a change in command.		

Figure C - Metric 3a and 3b: Bystander Intervention, 2016

In order to understand response differences between demographic groups, DEOMI conducted subsequent comparisons as follows:

- Male respondents compared to female respondents
- Junior enlisted (E1 to E3) and junior non-commissioned officer (E4 to E6) respondents compared to senior enlisted (E7 to E9), warrant officer (W1 to W5), and officer (O1 and above) respondents

Compared to men, women were more likely to observe a high-risk situation and more likely to intervene. Officers and senior enlisted Service members were less likely to observe a high-risk situation, but more likely to intervene when compared to junior enlisted members and junior non-commissioned officers. Overall, responses remained about the same from FY14 to FY16 (Figure D and Figure E).⁴

Figure D - Metric 3a: Bystander Intervention – Observed a High-risk Situation by Gender and Rank, 2014 – 2016

⁴ DEOMI modified *DEOCS* questions a few months after FY14 had begun; the data in 2014 include January through September, while data for 2015 and 2016 include the entire FY (metrics 3, 4, 9, and 11).

Figure E - Metric 3b: Bystander Intervention – Action Taken Among Respondents Who Observed a High-risk Situation by Gender and Rank, 2014 – 2016

DEOMI conducted additional analyses to assess the relationship between bystander intervention and other items on the *DEOCS*. These analyses suggest that respondents had a higher likelihood of observing a high-risk situation if they perceived their home or work environment as unsafe, compared to those who perceived their home or work environment to be safe. For example, nearly 18 percent of individuals who said they felt “unsafe” at work also reported observing a situation that was, or could have led to, a sexual assault in the past 12 months. In contrast, only 3 percent of individuals who reported feeling “safe” from sexual assault at work also indicated they observed a high-risk situation.

Additionally, respondents with higher perceptions of chain of command support for bystander intervention were more likely to indicate that they took action after observing a high-risk situation, compared to respondents with lower perceptions of chain of command support for bystander intervention. Approximately 93 percent of respondents who indicated their chain of command encourages bystander intervention to a “great extent” also indicated they took action after observing a high-risk situation. In contrast, only 74 percent of respondents who indicated that their commander does not encourage bystander intervention also indicated they took action following the observation of a high-risk situation.

Metric 4: Command Climate Index – Addressing Continuum of Harm

Respondents who completed the *DEOCS* answered three questions about their perceptions of the extent to which their leadership promotes a climate based on mutual respect and trust. These items, listed below, use a four-point scale ranging from “Not at All” to “Great Extent.” A high score indicates a more favorable climate.

To what extent does your chain of command:

- *Promote a unit climate based on “respect and trust”*
- *Refrain from sexist comments and behaviors*
- *Actively discourage sexist comments and behaviors*

DEOMI combined the responses to these three items into an index. The data displayed compare the average responses from each of the demographic groups in 2014, FY15, and FY16. Overall, *DEOCS* respondents indicated a favorable command climate for every year data are available. Perceptions of command climate are slightly less favorable among women than among men (Figure F). Perceptions of command climate are less favorable among junior enlisted members and junior non-commissioned officers, compared to senior enlisted Service members and officers.

	Men	Women	Jr. Enlisted/Jr. NCO	All Remaining Ranks
Fiscal Year 2016	3.4	3.3	3.3	3.6

Description: Mean Service member perceptions of the extent to which their command: (1) Promotes a climate based on “mutual respect and trust,” (2) Refrains from sexist comments and behaviors, and (3) Actively discourages sexist comments and behaviors. Higher scores indicate perceptions that are more favorable.

Source: DEOCS

Implication: Service member rating of command climate in this area addresses the continuum of harm. However, DEOCS results draw from a convenience sample and may not be representative of the entire force.

Summary Points: Overall, Service members perceived a favorable command climate. Men perceived a slightly more favorable climate compared to women. Junior enlisted Service members and junior NCOs reported a less favorable command climate compared to all other ranks.

Notes: The DEOCS is a voluntary survey administered to military units annually or within 120 days of change in unit command. Rankings are categorized as follows: junior enlisted includes E1-E3, junior NCO includes E4-E6, and all remaining ranks include E7-E9, W1-W5, and O1 and above.

Figure F - Metric 4: Command Climate Index – Addressing Continuum of Harm by Gender and Rank, 2014 – 2016

Metric 5: Investigation Length

As illustrated in Figure G, it took an average of 131 days (4.3 months) to complete a sexual assault investigation in FY16, nearly the same as the 127-day average investigation length in FY15. DoD began tracking investigation length in FY13; therefore, data from prior FYs are not available. It is important to note that the length of an investigation does not necessarily reflect an investigation's quality. The time it takes to conduct an investigation depends on a variety of factors, including the complexity of the allegation, the number and location of potential witnesses involved, and the laboratory analysis required for the evidence. Thus, the factors that affect investigation length vary on a case-by-case basis. Knowledge of the average length of a sexual assault investigation helps to inform victims about the investigative process and allows DoD to assess its resources and investigative capabilities moving forward.

Investigation Information	FY15	FY16
Number of Completed Investigations	4,319	4,083
Average Investigation Length (Days)	127	131
Median* Investigation Length (Days)	94	100

Description: Baseline average and median investigation lengths of sexual assault investigations for each MCIO. Length measured from date of victim report to date that all investigative activity is completed.

Source: MCIOs (CID, NCIS, and AFOSI).

Implication: Provides a means to address expectations about investigation length. Investigation length is not a measure of a thorough and professional investigation and may vary greatly depending on the complexity of the allegation and evidence. Shorter investigations are not necessarily better investigations.

Summary Points: On average, a criminal investigation in DoD takes 4.3 months.

*The median is a "midpoint" for a set of numbers; it is the value for which half are above and half are below. Unlike an average, the median is less influenced by outliers in a set of numbers.

Figure G - Metric 5: Investigation Length, FY13 – FY16

Metric 6: All Full-time Certified Sexual Assault Response Coordinator and SAPR Victim Advocate Personnel Currently Able to Provide Victim Support

As illustrated below, there are 1,113 full-time civilian and Service member Sexual Assault Response Coordinators (SARCs), SAPR Victim Advocates (VAs), and Uniformed SAPR Victim Advocates (UVAs) working to provide victim support. In addition to full-time SARCs and SAPR VAs/UVAs, the Services also employ collateral duty Service member SARCs and UVAs to provide support to victims on a part-time basis.

	Civilian Full-time		Uniformed Personnel Full-time	
	SARCs	SAPR VAs	SARCs	SAPR VAs
FY16	371	447	246	49

Description: Number of full-time civilian SARCs and SAPR VAs, number of full-time uniformed SARCs and SAPR VAs.

Source: Service Manning Data.

Implication: Indicator of full-time professional capability both on-base and deployed.

Summary Point: There are 1,113 full-time SARCs and SAPR VAs. In addition, the Services have many collateral duty and volunteer SARCs and SAPR VAs available to assist victims. In total, 24,072 individuals across the Services are D-SAACP certified.

Figure H - Metric 6: Full-time Certified SARC and SAPR VA Personnel Currently Able to Provide Victim Support, FY14 – FY16

Metric 7: Victim Experience – Satisfaction with Services Provided by Sexual Assault Response Coordinators, SAPR Victim Advocates, and Special Victims' Counsel/Victims' Legal Counsel during the Military Justice Process

In 2016, OPA conducted the *Military Investigation and Justice Experience Survey (MIJES)* to assess the investigative/legal experiences of victims who made Unrestricted Reports. Overall, the majority of respondents to the *MIJES* indicated that they were satisfied with their Special Victims' Counsel/Victims' Legal Counsel (SVC/VLC), SARC, and SAPR VA/UVA during the military justice process (73 percent to 78 percent indicated that they were satisfied). The *MIJES* recruited a small sample of respondents and results of the study may not be representative of the entire population of military victims who participated in the military justice system.

Metric 7: Victim Experience - Satisfaction with SVC/VLCs, SARCs, and VAs/UVAs during the Military Justice Process

Description: Victim opinion of the quality/value of support provided by the SVC/VLC, SARC, and SAPR VA/UVA, if they interacted with these individuals during the military justice process.

Source: 2016 *MIJES*

Summary Points: The vast majority of victims who took the survey and interacted with SVCs/VLCs, SARCs, and/or SAPR VAs/UVAs during the military justice process were satisfied with the support provided.

Note: Only respondents who indicated interacting with a SARC, SAPR VA/UVA, and/or SVC/VLC during the military justice process answered this question: 83 percent of respondents indicated interacting with a SARC, 73 percent of respondents interacted with a SAPR VA/UVA, and 68 percent of respondents indicated interacting with a SVC/VLC. Among respondents who indicated interacting with a SAPR VA/UVA, 52% used an UVA and 53% used a VA. Of those, 79% were satisfied with their VA and 75% were satisfied with their UVA. Due to the small number of respondents contributing toward many of these estimates, we caution against comparing across groups.

*Indicates that percentages do not sum to 100 percent due to rounding.

Figure I - Metric 7: Victim Experience – Satisfaction with Services Provided by SVCs/VLCs, SARCs, and SAPR VAs/UVAs, 2016

Metric 8: Percentage of Cases with Victims Declining to Participate in the Military Justice Process

The Services reported that DoD commanders, in conjunction with their legal advisors, reviewed and made case disposition decisions for 2,892 cases in FY16. However, the evidence did not support taking disciplinary action against everyone accused of a sexual assault crime. For example, disciplinary action may be precluded when victims decline to participate in the military justice process. In FY16, 9 percent of cases command considered for action did not receive disciplinary action because the victims declined to participate in the justice process. As illustrated in Figure J, the percentage of cases with victims declining to participate has remained steady since FY13. Although the majority of victims participate in the justice process, DoD continues to pursue avenues for greater and sustained victim involvement in the justice system. DoD anticipates that recent initiatives, such as the addition of SVCs/VLCs and the Counsel/Advocacy Program will encourage greater victim participation and engagement with the military justice process.

Description: The percentage of cases with subjects that DoD cannot hold appropriately accountable because the victim declined to participate in the military justice process.

Source: F09 to FY13 = Service reporting; FY14 to current = DSAID

Implication: Provides indication if the Department's changes in the military justice process are having an impact on victim involvement.

Figure J - Metric 8: Cases with Victims Declining to Participate in the Military Justice Process, FY09 – FY16

Metric 9: Perceptions of Retaliation

The Department aims to foster a climate of confidence in which victims feel supported enough to report sexual assault without any concern of retaliation or negative repercussions. In an attempt to gather information about perceptions of retaliation as they relate to sexual assault reporting, DoD compiled data from three sources.

Given the challenges associated with interpreting these data, DoD sampled a number of domains to get as full a picture of this phenomenon as possible. Notably, these sources provide data on victims' perceptions of retaliation that do not necessarily align with actionable offenses that meet the elements of proof required for a charge of retaliation under the UCMJ.

- 2016 DEOMI *Organizational Climate Survey (DEOCS)*
- 2016 *Workplace Gender Relations Survey (WGRA)*
- 2016 *Military Investigation and Justice Experience Survey (MIJES)*

A. 2016 DEOMI Organizational Climate Survey (DEOCS)

The *DEOCS* includes six items that assess the extent to which Service members believe their command or units would retaliate against victims who reported a sexual assault. The items used a four-point scale ranging from "Not at all likely" to "Very likely." DEOMI coded the responses to the items listed below such that a high score indicates a more favorable climate and combined the items into a four-point index:

If someone were to report a sexual assault to your current chain of command, how likely is it that:

- *Unit members would label the person making the report a troublemaker*
- *Unit members would support the person making the report*
- *The alleged offender(s) or their associates would retaliate against the person making the report*
- *The chain of command would take steps to protect the safety of the person making the report*
- *The chain of command would support the person making the report*
- *The chain of command would take corrective action to address factors that may have led to the sexual assault*

Overall, Service members who completed the *DEOCS* perceived the potential for retaliation from their command and unit members to be unlikely (i.e., they perceived a favorable climate). However, men perceived a slightly more favorable climate with a lower likelihood of retaliation (3.5 out of 4.0) compared to women (3.4 out of 4.0; Figure K). Moreover, senior enlisted Service members and officers perceived a more favorable climate and perceived that retaliation was less likely to occur (3.7 out of 4.0) compared to junior enlisted Service members and junior non-commissioned officers (3.4 out of 4.0). Although thousands of DoD personnel complete the *DEOCS* each month, the respondents may not represent the force as a whole.⁵

⁵ As previously stated, DEOMI has not yet fully analyzed the data to determine scientific reliability and validity, representativeness, and sensitivity to changes in the military population.

Metric 9a: Perceptions of Victim Retaliation - Command Climate Perspective by Gender

Metric 9a: Perceptions of Victim Retaliation - Command Climate Perspective by Rank

	Men	Women	Jr. Enlisted/Jr. NCO	All Remaining Ranks
Fiscal Year 2016	3.5	3.4	3.4	3.7

Description: Mean command climate indicators that victims may be retaliated against for reporting. Higher scores indicate a more favorable command climate.

Source: DEOCS

Implication: Indicates Service member perceptions of whether individuals who report a sexual assault would experience some kind of retaliation for doing so. However, DEOCS results draw from a convenience sample and may not be representative of the entire force.

Summary Points: Command climate indicators suggested that, overall, surveyed Service members did not believe that retaliation is likely to occur. Compared to men, women reported that retaliation was slightly more likely to occur. Compared to all other ranks, junior enlisted Service members and junior NCOs reported that retaliation was more likely to occur.

Notes: The DEOCS is a voluntary survey administered to military units annually or within 120 days of change in unit command. Rankings are categorized as follows: junior enlisted includes E1-E3, junior NCO includes E4-E6, and all remaining ranks include E7-E9, W1-W5, and O1 and above.

Figure K - Metric 9a: Service Members' Perceptions of Victim Retaliation – Command Climate Perspective, 2014 – 2016

B. 2016 Workplace Gender Relations Survey (WGRA)

The *WGRA* asked respondents to indicate whether they experienced specific negative behaviors following their report of a sexual assault. Subsequent questions then assessed the context of those experiences to categorize which respondents experienced behavior that aligned with prohibited behaviors described in policy and law. Retaliatory behavior by the chain of command that affects Service members' professional opportunities is prohibited. Likewise, retaliatory behavior by anyone that involves exclusion from social acceptance is also prohibited. Finally, service members may not commit acts of cruelty, and maltreatment against an individual because he or she reported a crime or was going to report a crime.⁶

Of active duty members who indicated experiencing sexual assault in the year preceding the *WGRA* and who reported the matter to a DoD authority, 58 percent indicated experiencing at least one behavior in line with potential professional reprisal, ostracism, and/or maltreatment. However, once the context of those negative experiences was assessed, about a third (32 percent) met the legal criteria for professional reprisal, ostracism, and/or maltreatment. With regard to professional reprisal, 23 percent of respondents endorsed experiences and contextual factors that indicated the matter might be an actionable offense, while the comparable figure for ostracism and/or maltreatment was 21 percent (Figure L). Victim responses to these survey items do not constitute a report of retaliation, nor do they constitute a finding under the law that the victim experienced some form of retaliation. Rather, these responses allow the Department to gain a better understanding of the broad range of negative experiences associated with reporting a sexual assault.

⁶ In January 2017, DoD issued standardized definitions for retaliation, reprisal, and ostracism. However, the development of these definitions fell outside of the scope of the FY for this report.

Perceived Professional Reprisal – WGRA

Perceived Ostracism and/or Maltreatment – WGRA

Perceived Professional Reprisal, Ostracism, and/or Maltreatment – WGRA

Note: Percentages may not add to 100 percent due to rounding.

Figure L – Metric 9b: Perceived Professional Reprisal, Ostracism, and/or Maltreatment – Victim Perspective (WGRA), 2016

Table B displays these results by gender. Of women who indicated experiencing sexual assault in the year preceding the WGRA and who reported the matter to a DoD authority, 58 percent perceived an experience of professional reprisal, ostracism, and/or maltreatment. The comparable estimate for men is 60 percent. After assessing the context of those self-reported negative experiences, 28 percent of women and 42 percent of men may have experienced professional reprisal, ostracism, and/or maltreatment; understanding that the behavior would have to be investigated before a conclusion in whether legal criteria were met can be made.

Table B - Metric 9b: Perceived Professional Reprisal, Ostracism, and/or Maltreatment by Gender (WGRA), 2016

	Women			Men		
	Perceived professional reprisal	Perceived ostracism and/or maltreatment	Perceived one or more of these behaviors	Perceived professional reprisal	Perceived ostracism and/or maltreatment	Perceived one or more of these behaviors
Did not experience	64%	46%	41%	50%	46%	40%
Experienced, did not meet circumstances military law prohibits	17%	33%	30%	14%	32%	18%
Experienced, did meet circumstances military law prohibits	19%	21%	28%	36%	22%	42%

C. 2016 Military Investigation and Justice Experience Survey (MIJES)

In FY16, the *MIJES* survey assessed the experiences of victims who made Unrestricted Reports using the same measure of retaliation that the *WGRA* deployed. However, the *MIJES* recruited a small sample of respondents, of which 225 were eligible responders. Since the 2016 *MIJES* was not weighted, the results of the study are not generalizable to those Service members whose adjudication was closed in DSAID.

Overall, 69 percent of respondents indicated at least one negative experience associated with their report of sexual assault and provided information about the context surrounding those negative experiences. Once the context of those negative experiences was assessed, only 38 percent of the respondents' experiences were consistent circumstances prohibited by military law.

With regard to perceptions of reprisal, 28 percent of respondents indicated experiences and contextual factors that indicated the matter might be an actionable offense. With regard to perceptions of ostracism and/or maltreatment, 27 percent of respondents endorsed experiences and contextual factors that indicated the matter might be an actionable offense. To reiterate, only a complaint by a member followed by an investigation and a finding of fact can determine if a crime was committed. These survey items do not constitute a complaint (Figure M).

Note: Percentages may not add to 100 percent due to rounding.

Figure M – Metric 9c: Perceived Reprisal and Ostracism/Maltreatment – Victim Perspective (*MIJES*), 2016

Metric 10: Victim Experience – Victim Kept Regularly Informed of the Military Justice Process

The 2016 *MIJES* asked respondents to indicate whether response personnel and leadership informed them about the status or progress of their case. Of those who interacted with SVCs/VLCs during the military justice process, 83 percent agreed that their SVC/VLC kept them informed of their case progress. However, of those who interacted with a Senior Enlisted Advisor, Immediate Supervisor, or Unit Commander during the military justice process, about 41 to 48 percent agreed that these leaders kept them informed about the progress of their case (Figure N).

Metric 10: Victim Experience - Victim Kept Informed About Case Status or Progress

Description: Survey respondents, who made an Unrestricted Report, indicated the extent to which they were regularly informed about the progress of their case from their SVC/VLC, Unit Commander, Senior Enlisted Advisor, and Immediate Supervisor, if they interacted with these individuals during the military justice process.

Source: 2016 MIJES

Summary Points: Results suggest that the vast majority of victims were kept updated on their case by their SVC/VLC. However, fewer than half of victims were kept informed by their leadership.

Note: Only respondents who indicated interacting with a SVC/VLC, Unit Commander, Senior Enlisted Advisor and/or Immediate Supervisor answered this question. 69 percent of respondents indicated interacting with a SVC/VLC, 65 percent with their Unit Commander, 58 percent with their Senior Enlisted Advisor, and 58 percent with their Immediate Supervisor. Due to the small number of respondents contributing toward many of these estimates, we caution against comparing across groups

Figure N - Metric 10: Victim Kept Regularly Informed of the Military Justice Process, 2016

Metric 11: Perceptions of Leadership Support for SAPR

The DEOCS included two questions on leadership support for SAPR. The items listed below used a four-point scale ranging from "Not at All" to "Great Extent." DEOMI coded responses to the following items such that a higher score indicates higher perceived support.

To what extent does your chain of command:

- *Encourage victims to report sexual assault?*
- *Create an environment where victims feel comfortable reporting sexual assault?*

DEOMI combined the responses to these items into an index and averaged across all military respondents to the DEOCS. Overall, Service members who completed the DEOCS reported that their command supported sexual assault reporting by victims. While an overall encouraging trend was observed in DEOCS results, there are differences in perceptions of command support for SAPR by gender and rank. Consistent with the pattern of results for previous DEOCS metrics, men (3.6 out of 4.0) perceived greater command support for victim reporting compared

to women (3.5 out of 4.0; Figure O). Additionally, senior enlisted Service members and officers perceived greater command support for SAPR (3.7 out of 4.0) compared to junior enlisted members and junior non-commissioned officers (3.5 out of 4.0).

	Men	Women	Jr. Enlisted/Jr. NCO	All Remaining Ranks
Fiscal Year 2016	3.6	3.5	3.5	3.7

Description: Mean Service member perceptions of command and leadership support for the SAPR program, victim reporting, and victim support. Higher scores indicate perceptions that are more favorable.

Source: DEOMI *Organizational Climate Survey (DEOCS)*.

Implication: Service member rating of command climate in this area. However, *DEOCS* results draw from a convenience sample and may not be representative of the entire force.

Summary Points: Overall, Service members perceived their command and leadership to be supportive of SAPR. Women perceived slightly lower levels of leadership support for SAPR compared to men. Junior enlisted Service members and junior NCOs perceived lower levels of leadership support for SAPR compared to all other ranks.

Notes: The *DEOCS* is a voluntary survey administered to military units annually or within 120 days of change in unit command. Rankings are categorized as follows: junior enlisted includes E1-E3, junior NCO includes E4-E6, and all remaining ranks include E7-E9, W1-W5, and O1 and above.

Figure O - Metric 11: Service Members' Perceptions of Leadership Support for SAPR, 2014 – 2016

Metric 12: Reports of Sexual Assault over Time

It is imperative to track reports of sexual assault for several reasons. The number of sexual assault reports received each year indicates:

- Number of victims who were sufficiently confident in the response system to make a report
- Number of victims who gained access to DoD support and services
- Number of victims who may be willing to participate in the military justice system to hold alleged offenders appropriately accountable

Reports of Sexual Assault	Total	=	Unrestricted	+	Restricted	% of Reports Restricted
FY16	6,172	=	4,591	+	1,581	25.6%
FY15	6,083	=	4,584	+	1,499	24.6%

Description: Year-to-year trend of Restricted and Unrestricted Reports received by the Department. Both Restricted and Unrestricted Reports represent one victim per report.

Source: FY07 to FY13 = Service Reporting, FY14 to current = DSAID

Implication: A change in reports of sexual assault may reflect a change in victim confidence in DoD response systems. The continuing growth of Restricted Reporting may be a sign that victims view this option as a valuable and trustworthy means to access support while maintaining confidentiality.

Summary: DoD Reports of sexual assault increased by 1.5 percent from FY15 to FY16.

Figure P - Metric 12: Reports of Sexual Assault over Time, FY07 – FY16

In FY16, the Military Services received 6,172 reports of alleged sexual assault involving Service members as either victims or subjects (Figure P). While DoD received these reports in FY16, a portion of reported incidents occurred in prior FYs and/or prior to Military Service. Of the 6,172 reports in FY16, 556 (9 percent) were made by Service members for incidents that occurred

prior to their entering Military Service.⁷ The Military Services received 4,591 Unrestricted Reports involving Service members as victims or subjects this year.⁸ The Military Services initially received 1,995 Restricted Reports involving Service members as either victims or subjects. Of the 1,995 initial Restricted Reports, 414 (21 percent) reports later converted to Unrestricted Reports. These converted Restricted Reports are now counted with the Unrestricted Reports. There were 1,581 Reports remaining Restricted in FY16.

Non-Metrics

Non-Metric 1: Command Action – Case Dispositions

The following describes outcomes for completed investigations with case disposition results reported in FY16. Congress requires DoD to report on the case dispositions (outcomes) of sexual assault allegations in Unrestricted Reports made against Service members (DoDI 6495.02). When a person is the subject of multiple investigations, he/she will also be associated with more than one case disposition in DSAID (see Appendix B for further detail).

In FY16, 2,892 cases investigated for sexual assault were primarily under the legal authority of DoD. However, as with the civilian justice system, evidentiary issues may have prevented DoD from taking disciplinary action in some cases. In addition, commanders declined to take action in some cases after a legal review of the matter indicated that the allegations against the accused were unfounded, meaning they were determined to be false or baseless. Command action was not possible in 36 percent of the cases considered for action by military commanders (Figure Q) in FY16. For the remaining 64 percent of cases considered for command action, commanders had sufficient evidence and legal authority to support some form of disciplinary action for a sexual assault offense or other misconduct. Figure Q displays command action taken from FY09 to FY16 and Figure R displays command action in FY16 for penetrating versus sexual contact crimes alleged/investigated.

Over the past two fiscal years, SAPRO and the Services conducted a comprehensive review of legal data in DSAID and standardized the way in which they categorized and reported cases. As part of this process, the Services' legal officers closed cases dating back to FY14 and reported a greater number of cases where command action was precluded. This determination could have been made any time between FY14 and FY16, and they are reported here as they were deemed closed in FY16. This partially accounts for the increase in cases with command action precluded seen in FY15 and FY16.

⁷ Prior to FY14, an Unrestricted Report of sexual assault may have included one or more victims and one or more subjects. DoD relied upon the MCIOs to provide the number of Unrestricted Reports each year, and the subsequent number of victims and subjects associated with those reports. In FY14, DoD moved to DSAID as the primary source of reporting statistics with each Unrestricted Report corresponding to a single victim.

⁸ The Department pulls and analyzes data from DSAID six weeks after the end of the FY to allow sufficient time for data validation. During this six-week period, 21 additional Restricted Reports converted to Unrestricted. These 21 reports are included with the 414 reports that converted from Restricted to Unrestricted that DoD counts with FY16 numbers.

Non-Metric 1a: Command Action for Alleged Military Offenders under DoD Legal Authority

Case Dispositions	FY16	(% of N)
C-M Charge Preferral for Sexual Assault Offense	791	27%
NJP for Sexual Assault Offense	272	9%
Admin D/C & Actions for Sexual Assault Offense	268	9%
Action for Non-Sexual Assault Offense	534	18%
Command Action Not Possible	1,027	36%

Description: Year-to-year trends summarizing the actions commanders have taken in cases under the jurisdiction of military law.

Source: FY09 to FY13 = Service Reports and Offices of the Judge Advocates General (OTJAGs); FY14 to Current = DSAID

Implication: When DoD has sufficient evidence and jurisdiction over the alleged offender, commanders are using the court-martial process as the primary means for discipline in sexual assault allegations. This non-metric pertains to holding alleged offenders appropriately accountable.

Notes: Command action is not possible when there is insufficient evidence of a crime to prosecute, the victim declines to participate in the justice process, the statute of limitations expires, the victim dies before action can be taken, or when the allegations against the offender are unfounded. Percentages may not sum to 100 percent due to rounding.

Figure Q - Non-Metric 1a: Command Action for Cases under DoD Legal Authority, FY09 – FY16

Non-Metric 1b: FY16 Completed* Command Actions for Penetrating and Sexual Contact Crimes Investigated

Note: This figure only includes command actions in which the action was completed in FY16. Command actions pending completion (e.g., court-martial preferred but pending trial) are not included in this graph. Additionally, there were 31 completed command actions that could not be classified as penetrating or sexual contact crimes, because the crime investigated was attempted sexual assault or unknown.

Figure R - Non-Metric 1b: Completed Command Actions by Crime Investigated, FY16

Non-Metric 2: Court-Martial Outcomes

Figure S illustrates case outcomes in the court-martial process, displayed by type of crime charged—penetrating (rape and sexual assault) versus other sexual contact crimes. Not all cases associated with court-martial preferral proceed to trial. In certain circumstances, DoD may approve a resignation or discharge in lieu of court-martial (RILO/DILO). Furthermore, Article 32 (pre-trial) hearings can result in a recommendation to dismiss all or some of the charges. Commanders may use evidence gathered during sexual assault investigations and evidence heard at an Article 32 hearing to impose a nonjudicial punishment (NJP) for other misconduct against subjects whose charges were dismissed. As depicted in Figure S, the majority of cases associated with court-martial preferral, for both penetrating and sexual contact crime charges, proceeded to trial.⁹

Sexual Assault Offenses	FY16 Penetrating Crimes		FY16 Sexual Contact Crimes	
C-M Actions Completed in FY16	377		240	
Cases Dismissed	58	15%	39	16%
RILO/DILO Cases	76	20%	57	24%
<i>Proceeded To Trial</i>	243	64%	144	60%
Acquitted	96	40%	31	22%
<i>Convicted (any charge)</i>	147	60%	113	78%

Description: Year-to-year trend in outcomes (i.e., Proceeded to Trial; Discharge In Lieu of Court-Martial; Dismissed) of court-martial proceedings involving sexual assault charges.

Source: DSAID

Implication: Pertains to holding alleged offenders appropriately accountable.

Notes: This figure only includes courts-martial in which the action was completed in FY16. Cases associated with courts-martial preferral but pending trial are not included in this graph. Additionally, DoD could not classify 2 cases as penetrating or sexual contact crimes, because the crime charged was attempted sexual assault. Percentages may not sum to 100 percent due to rounding.

Figure S - Non-Metric 2: Completed Sexual Assault Court-Martial Outcomes by Crime Charged, FY16

⁹ Subjects charged with sexual assault crimes at court-martial can also be charged with other misconduct in addition to sexual assault offenses.

Non-Metric 3: Time Interval from Report of Sexual Assault to Court Outcome

As illustrated in Figure T, the average (mean) and median length of time from the date a victim reported a sexual assault to the date that court-martial proceedings concluded was 290 days (9.5 months) and 275 days (9.0 months), respectively. A variety of factors, such as the complexity of the allegation, the need for laboratory analysis of the evidence, the quantity and type of legal proceedings, and the availability of counsel and judges may affect the interval of time between a report of sexual assault and the conclusion of a court-martial. That notwithstanding, knowledge of the average amount of time between a report and the end of a court-martial is useful because it improves the transparency of the military justice process and helps to inform victims about what to expect.

Description: Length of time from the date a victim signs a DD 2910 to the date that a sentence is imposed or the accused is acquitted.

Source: Start = DSAID DD Form 2910 date, End = DSAID/ Offices of the Judge Advocates General (OTJAG) Report of Trial.

Implication: Provides transparency into justice process and sets expectations on justice process length.

Note: The median is a “midpoint” for a set of numbers; it is the value for which half are above and half are below. Unlike an average, the median is less influenced by outliers in a set of numbers.

Figure T - Non-Metric 3: Time Interval from Report to Court Outcome, FY14 – FY16

Non-Metric 4: Time Interval from Report of Sexual Assault to Nonjudicial Punishment Outcome

In FY16, the average and median length of time from the date a victim signs a DD 2910 to the date that the NJP process is concluded (e.g. punishment imposed or NJP not rendered) was 135 days (4.4 months) and 111 days (3.6 months), respectively (Figure U). Similar to non-metric 3, a variety of factors influence the interval of time between a report of sexual assault and the conclusion of a NJP. However, knowledge of the average amount of time between a report and the end of NJP proceedings improves the transparency of the NJP process and helps to set appropriate expectations.

Description: Length of time from the date a victim signs a DD 2910 to the date that nonjudicial punishment (NJP) process is concluded (e.g. punishment awarded or NJP not rendered).

Source: Start = DSAID DD Form 2910 date, End = DSAID/ Offices of the Judge Advocates General (OTJAG) NJP Form or Command Action Form.

Implication: Provides transparency into justice process and sets expectations on justice process length.

Note: The median is a “midpoint” for a set of numbers; it is the value for which half are above and half are below. Unlike an average, the median is less influenced by outliers in a set of numbers.

Figure U - Non-Metric 4: Time Interval from Report to Nonjudicial Punishment Outcome, FY14 – FY16

Non-Metric 5: Time Interval from Report of Investigation to Judge Advocate Recommendation

As illustrated in Figure V, the average and median length of time from the date a report of investigation was provided to command until the date a judge advocate made a disposition recommendation to the commander of the accused was 30 days and 0 days, respectively. A zero value indicates that the legal recommendation was made before the closure of the investigation. As for non-metrics 3 and 4, there is no expected or set time for this to occur.

Description: Length of time from the date an report of investigation (ROI) is handed out to the date the Judge Advocate provides a prosecution/non-prosecution recommendation. A zero value indicates that the legal recommendation was made before the closure of the investigation.

Source: Service military justice data.

Implication: Shows responsiveness of legal support to command and may be an indicator of legal officer resourcing.

Note: The median is a “midpoint” for a set of numbers; it is the value for which half are above and half are below. Unlike an average, the median is less influenced by outliers in a set of numbers.

Figure V - Non-Metric 5: Time Interval from Report of Investigation to Judge Advocate Recommendation, FY14 – FY16

E. SUMMARY OF UNRESTRICTED REPORTS WITH INVESTIGATIONS		FY16 Totals
E1. Subjects in Unrestricted Reports Made to DoD with Investigation Initiated During FY16.		
Note: This data is drawn from DSAID based on Service affiliation of the SARC who currently manages the Victim case associated with the investigation and Subject below.		
# Investigations Initiated during FY16		3994
# Investigations Completed as of FY16 End (group by MCIO #)		2583
# Investigations Pending Completion as of FY16 End (group by MCIO #)		1411
# Subjects in investigations Initiated During FY16		4425
# Service Member Subjects investigated by CID		1433
# Service Member Subjects investigated by NCIS		971
# Service Member Subjects investigated by AFOSI		521
# Non-Service Member Subjects in Service Investigations		
Note: Non-Service Member Subjects are drawn from all CID, NCIS and AFOSI investigations involving a Victim Supported by DoD.		144
# Unidentified Subjects in Service Investigations		
Note: Unidentified Subjects are drawn from all CID, NCIS and AFOSI investigations involving a Victim Supported by DoD.		936
# Service Member Subjects investigated by Civilian or Foreign Law Enforcement		
Note: Service Member Subjects are drawn from Civilian or Foreign Law Enforcement investigations involving a Victim Supported by DoD.		18
# Non-Service Member Subjects in Civilian or Foreign Law Enforcement Investigations involving a Victim Supported by DoD		38
# Unidentified Subjects in Civilian or Foreign Law Enforcement Investigations involving a Victim Supported by DoD		28
# Subject or Investigation Relevant Data Not Available		336
E2. Service Investigations Completed during FY16		
Note: The following data is drawn from DSAID and describes criminal investigations completed during the FY16. These investigations may have been initiated during the FY16 or any prior FY.		
# Total Investigations completed by Services during FY16 (Group by MCIO Case Number)		3990
# Of these investigations with more than one Victim		233
# Of these investigations with more than one Subject		289
# Of these investigations with more than one Victim and more than one Subject		17
# Subjects in investigations completed during FY16 involving a Victim Supported by DoD		4429
# Service Member Subjects investigated by CID		1594
# Service Member Subjects investigated by NCIS		1052
# Service Member Subjects investigated by AFOSI		521
# Non-Service Member Subjects in completed Service Investigations involving a Victim Supported by DoD		151
# Unidentified Subjects in completed Service Investigations involving a Victim Supported by DoD		925
# Subject Relevant Data Not Available		186
# Victims in investigations completed during FY16, Supported by DoD		4347
# Service Member Victims in CID investigations		1568
# Service Member Victims in NCIS investigations		1364
# Service Member Victims in AFOSI investigations		567
# Non-Service Member Victims in completed Service Investigations, Supported by DoD		814
# Victim Relevant Data Not Available		34

E3. Subjects and Victims in Investigations Completed by US Civilian and Foreign Agencies during FY15. Note: This data is entered by a Service SARC for cases supported by that Service.	
# Total Investigations completed by US Civilian and Foreign Law Enforcement during FY16 (Group by MCIO Case Number)	54
# Of these investigations with more than one Victim	4
# Of these investigations with more than one Subject	4
# Of these investigations with more than one Victim and more than one Subject	4
# Subjects in investigations completed during FY16 involving a Victim Supported by DoD	62
# Service Member Subjects investigated by Civilian and Foreign Law Enforcement	12
# Non-Service Member Subjects in Civilian and Foreign Law Enforcement Investigations involving a Victim Supported by DoD	26
# Unidentified Subjects in Civilian and Foreign Law Enforcement Investigations involving a Victim Supported by DoD	20
# Subject Relevant Data Not Available	4
# Victims in investigations completed during FY16, Supported by DoD	62
# Service Member Victims in Civilian and Foreign Law Enforcement investigations	52
# Non-Service Member Victims in Civilian and Foreign Law Enforcement Investigations in a case Supported by DoD	10
# Victim Relevant Data Not Available	0
E4. Subjects and Victims in Investigations Completed by Military Police/Security Forces/Master At Arms/Marine Corps CID (MPs) during FY16 (all organizations regardless of name are abbreviated below as "MPs")	
Note: This data is entered by a Service SARC for cases supported by that Service. Note: As of 1 Jan 2013, all sexual assault investigations are referred to MCIO for investigation. This section captures remaining Subjects from investigations opened in prior years by Military Police/Security Forces/Master At Arms/Marine Corps CID.	
# Total Investigations completed by MPs during FY16 (Group by MCIO Case Number)	0
# Of these investigations with more than one Victim	0
# Of these investigations with more than one Subject	0
# Of these investigations with more than one Victim and more than one Subject	0
# Subjects in MP investigations completed during FY16 involving a Victim Supported by DoD	0
# Service Member Subjects investigated by MPs	0
# Non-Service Member Subjects in MPs involving a Victim Supported by DoD	0
# Unidentified Subjects in MPs involving a Victim Supported by DoD	0
# Subject Relevant Data Not Available	0
# Victims in MP investigations completed during FY16, Supported by DoD	0
# Service Member Victims in MP investigations	0
# Non-Service Member Victims in MP Investigations, Supported by DoD	0
# Victim Relevant Data Not Available	0

# Subjects receiving Uncharacterized administrative discharge	1
# Convicted Subjects with a conviction under a UCMJ Article that requires Sex Offender Registration	133
J. NONJUDICIAL PUNISHMENTS IMPOSED (Sexual Assault Charge) . This section reports the outcomes of nonjudicial punishments for sexual assault crimes completed during FY16	FY16 Totals
# Total Subjects with Nonjudicial Punishment (Article 15) for a Sexual Assault Charge in FY16	272
# Subjects whose nonjudicial punishment action was not completed by the end of FY16	33
# Subjects whose nonjudicial punishment action was completed by the end of FY16	239
# Subjects whose nonjudicial punishment was dismissed	40
# Subjects administered nonjudicial punishment	199
# Subjects with unknown punishment	0
# Subjects with no punishment	2
# Subjects with pending punishment	0
# Subjects with Punishment	197
# Subjects receiving correctional custody	2
# Subjects receiving reductions in rank	143
# Subjects receiving fines or forfeitures	149
# Subjects receiving restriction or some limitation on freedom	95
# Subjects receiving extra duty	120
# Subjects receiving hard labor	0
# Subjects receiving a reprimand	79
# Subjects processed for an administrative discharge or separation subsequent to nonjudicial punishment on a sexual assault charge	80
# Subjects who received NJP followed by UOTHC administrative discharge	23
# Subjects who received NJP followed by General administrative discharge	44
# Subjects who received NJP followed by Honorable administrative discharge	3
# Subjects who received NJP followed by Uncharacterized administrative discharge	10
K. OTHER ACTIONS TAKEN . This section reports other disciplinary action taken for Subjects who were investigated for sexual assault. It combines outcomes for Subjects in these categories listed in Sections D and E above.	FY16 Totals
# Subjects whose administrative discharge or other separation action was not completed by the end of FY16	31
# Subjects receiving an administrative discharge or other separation for a sexual assault offense	82
# Subjects receiving UOTHC administrative discharge	37
# Subjects receiving General administrative discharge	35
# Subjects receiving Honorable administrative discharge	2
# Subjects receiving Uncharacterized administrative discharge	8
# Subjects whose other adverse administrative action was not completed by the end of FY16	31
# Subjects receiving other adverse administrative action for a sexual assault offense	124

L. COURTS-MARTIAL ADJUDICATIONS AND OUTCOMES (Non-sexual assault offense). This section reports the outcomes of Courts-Martials for Subjects who were investigated for sexual assault, but upon review of the evidence there was only probable cause for a non-sexual assault offense. It combines outcomes for Subjects in this category listed in Sections D and E above.	FY16 Totals
# Total Subjects with Courts-Martial Charge Preferred for a non-sexual assault offense in FY16	67
# Subjects whose Courts-Martial action was NOT completed by the end of FY16	6
# Subjects whose Courts-Martial was completed by the end of FY16	61
# Subjects whose Courts-Martial was dismissed	7
# Subjects in Charges dismissed subsequent to recommendation by Art. 32 hearing officer	0
# Subjects in Charges dismissed subsequent to recommendation by Art. 32 hearing officer followed by Art. 15 punishment	0
# Subjects in Charges dismissed subsequent to recommendation by Art. 32 hearing officer followed by Art. 15 acquittal	0
# Subjects in Charges dismissed for any other reason prior to Courts-Martial	3
# Subjects in Charges dismissed for any other reason prior to Courts-Martial followed by Art. 15 punishment	4
# Subjects in Charges dismissed for any other reason prior to Courts-Martial followed by Art. 15 acquittal	0
# Subjects who resigned or were discharged in lieu of Courts-Martial for a non-sexual assault offense	9
# Officer Subjects who were officers that where allowed to resign in lieu of Courts-Martial	0
# Enlisted Subjects who were discharged in lieu of Courts-Martial	9
# Subjects with Courts-Martial charges proceeding to trial on a non-sexual assault offense	45
# Subjects Acquitted of Charges	1
# Subjects Convicted of Any Non-Sexual Assault Charge at Trial	44
# Subjects with unknown punishment	0
# Subjects with no punishment	1
# Subjects with pending punishment	0
# Subjects with Punishment	43
# Subjects receiving confinement	33
# Subjects receiving reductions in rank	38
# Subjects receiving fines or forfeitures	19
# Subjects receiving a punitive discharge (Dishonorable, Bad Conduct, or Dismissal)	15
# Subjects receiving restriction or some limitation on freedom	3
# Subjects receiving extra duty	0
# Subjects receiving hard labor	0
# Subjects processed for an administrative discharge or separation subsequent to conviction at trial	12
# Subjects receiving UOTHC administrative discharge	7
# Subjects receiving General administrative discharge	5
# Subjects receiving Honorable administrative discharge	0
# Subjects receiving Uncharacterized administrative discharge	0
M. NONJUDICIAL PUNISHMENTS IMPOSED (Non-Sexual Assault Charge). This section reports the outcomes of nonjudicial punishments for Subjects who were investigated for sexual assault, but upon review of the evidence there was only probable cause for a non-sexual assault offense. It combines outcomes for Subjects in this category listed in Sections D and E above.	FY16 Totals
# Total Subjects with Nonjudicial Punishment (Article 15) for a non-sexual assault offense in FY16	284
# Subjects whose nonjudicial punishment action was not completed by the end of FY16	15
# Subjects whose nonjudicial punishment action was completed by the end of FY16	269
# Subjects whose nonjudicial punishment was dismissed	14
# Subjects administered nonjudicial punishment for a non-sexual assault offense	255
# Subjects with unknown punishment	1
# Subjects with no punishment	0
# Subjects with pending punishment	0
# Subjects with Punishment	254
# Subjects receiving correctional custody	4
# Subjects receiving reductions in rank	176
# Subjects receiving fines or forfeitures	180
# Subjects receiving restriction or some limitation on freedom	134
# Subjects receiving extra duty	141
# Subjects receiving hard labor	1
# Subjects receiving a reprimand	76
# Subjects receiving an administrative discharge subsequent to nonjudicial punishment on a non-sexual assault charge	48
# Subjects who received NJP followed by UOTHC administrative discharge	9
# Subjects who received NJP followed by General administrative discharge	33
# Subjects who received NJP followed by Honorable administrative discharge	4
# Subjects who received NJP followed by Uncharacterized administrative discharge	2
N. OTHER ACTIONS TAKEN (Non-sexual assault offense). This section reports other disciplinary action taken for Subjects who were investigated for sexual assault, but upon review of the evidence there was only probable cause for a non-sexual assault offense. It combines outcomes for Subjects in these categories listed in Sections D and E above.	FY16 Totals
# Subjects whose administrative discharge or other separation action was not completed by the end of FY16	9
# Subjects receiving an administrative discharge or other separation for a non-sexual assault offense	80
# Subjects receiving UOTHC administrative discharge	19
# Subjects receiving General administrative discharge	45
# Subjects receiving Honorable administrative discharge	4
# Subjects receiving Uncharacterized administrative discharge	12
# Subjects whose other adverse administrative action was not completed by the end of FY16	5
# Subjects receiving other adverse administrative action for a non-sexual assault offense	89

Restricted Reports

DoD FY16 RESTRICTED REPORTS OF SEXUAL ASSAULT	
A. FY16 RESTRICTED REPORTS OF SEXUAL ASSAULT	FY16 Totals
# TOTAL Victims initially making Restricted Reports	1995
# Service Member Victims making Restricted Reports	1920
# Non-Service Member Victims making Restricted Report involving a Service Member Subject	50
# Relevant Data Not Available	25
# Total Victims who reported and converted from Restricted Report to Unrestricted Report in the FY16*	414
# Service Member Victims who converted from Restricted Report to Unrestricted Report in FY16	382
# Non-Service Member Victims who converted from Restricted Report to Unrestricted Report in FY16	11
# Relevant Data Not Available	21
# Total Victim reports remaining Restricted	1581
# Service Member Victim reports remaining Restricted	1538
# Non-Service Member Victim reports remaining Restricted	39
# Relevant Data Not Available	4
# Remaining Restricted Reports involving Service Members in the following categories	1581
# Service Member on Service Member	720
# Non-Service Member on Service Member	407
# Service Member on Non-Service Member (entitled to a RR by DoD Policy)	39
# Unidentified Subject on Service Member	345
# Relevant Data Not Available	70
B. INCIDENT DETAILS	FY16 Totals
# Reported sexual assaults occurring	1581
# On military installation	484
# Off military installation	763
# Unidentified location	206
# Relevant Data Not Available	128
Length of time between sexual assault and Restricted Report	1581
# Reports made within 3 days of sexual assault	335
# Reports made within 4 to 10 days after sexual assault	120
# Reports made within 11 to 30 days after sexual assault	113
# Reports made within 31 to 365 days after sexual assault	217
# Reports made longer than 365 days after sexual assault	367
# Relevant Data Not Available	429
Time of sexual assault incident	1581
# Midnight to 6 am	414
# 6 am to 6 pm	178
# 6 pm to midnight	553

C. RESTRICTED REPORTING - VICTIM SERVICE AFFILIATION	FY16 Totals
# Service Member Victims	1538
# Army Victims	485
# Navy Victims	355
# Marines Victims	303
# Air Force Victims	392
# Coast Guard Victims	1
# Relevant Data Not Available	2

Restricted Reports (continued)

D. DEMOGRAPHICS FOR FY16 RESTRICTED REPORTS OF SEXUAL ASSAULT		FY16 Totals
Gender of Victims		1581
# Male		312
# Female		1266
# Relevant Data Not Available		3
Age of Victims at the Time of Incident		1581
# 0-15		182
# 16-19		359
# 20-24		616
# 25-34		307
# 35-49		68
# 50-64		4
# 65 and older		0
# Relevant Data Not Available		45
Grade of Service Member Victims		1538
# E1-E4		1094
# E5-E9		292
# WO1-WO5		3
# O1-O3		80
# O4-O10		35
# Cadet/Midshipman		32
# Academy Prep School Student		2
# Relevant Data Not Available		0
Status of Service Member Victims		1538
# Active Duty		1398
# Reserve (Activated)		76
# National Guard (Activated - Title 10)		30
# Cadet/Midshipman/Prep School Student		32
# Academy Prep School Student		2
# Relevant Data Not Available		0
Victim Type		1581
# Service Member		1538
# DoD Civilian		
# DoD Contractor		
# Other US Government Civilian		
# Non-Service Member		39
# Foreign National		
# Foreign Military		
# Relevant Data Not Available		4
E. RESTRICTED REPORTING FOR A SEXUAL ASSAULT THAT OCCURRED PRIOR TO JOINING SERVICE		FY16 Totals
# Service Member Victims making a Restricted Report for Incidents Occurring Prior to Military Service		356
# Service Member Making A Restricted Report for an Incident that Occurred Prior to Age 18		234
# Service Member Making a Restricted Report for an Incident that Occurred After Age 18		106
# Service Member Choosing Not to Specify		16
# Relevant Data Not Available		0
F. RESTRICTED REPORTS CONVERSION DATA (DSAID USE ONLY)		FY16 Totals
Mean # of Days Taken to Change to Unrestricted		25.46
Standard Deviation of the Mean For Days Taken to Change to Unrestricted		41.63
Mode # of Days Taken to Change to Unrestricted		1
G. TOTAL VICTIMS WHO REPORTED IN PRIOR YEARS AND CONVERTED FROM RESTRICTED REPORT TO UNRESTRICTED REPORT IN THE FY16		FY16 Totals
Total Victims who reported in prior years and converted from Restricted Report to Unrestricted Report in the FY16		92
# Service Member Victims who converted from Restricted Report to Unrestricted Report in FY16		92
# Non-Service Member Victims who converted from Restricted Report to Unrestricted Report in FY16		0
# Relevant Data Not Available		0
* The Restricted Reports are reports that converted to Unrestricted Reports are counted in the total number of Unrestricted Reports listed in Worksheet 1a, Section A.		

DoD FY16 SUPPORT SERVICES FOR VICTIMS OF SEXUAL ASSAULT			
NOTE: Totals of referrals and military protective orders are for all activities during the reporting period, regardless of when the sexual assault report was made.			
A. SUPPORT SERVICE REFERRALS TO SERVICE MEMBERS VICTIMS FROM UNRESTRICTED REPORTS:		FY16 Totals	
# Support service referrals for Victims in the following categories			
# MILITARY Resources (Referred by DoD)		9957	
# Medical		1033	
# Mental Health		1819	
# Legal		1956	
# Chaplain/Spiritual Support		1137	
# Rape Crisis Center			
# Victim Advocate/Uniformed Victim Advocate		2812	
# DoD Safe Helpline		676	
# Other		524	
# CIVILIAN Resources (Referred by DoD)		556	
# Medical		54	
# Mental Health		138	
# Legal		11	
# Chaplain/Spiritual Support		7	
# Rape Crisis Center		135	
# Victim Advocate		125	
# DoD Safe Helpline			
# Other		86	
# Cases where SAFEs were conducted		436	
# Cases where SAFE kits or other needed supplies were not available at time of Victim's exam		4	
# Military Victims making an Unrestricted Report for an incident that occurred prior to military service		200	
B. FY16 MILITARY PROTECTIVE ORDERS (MPO) * AND EXPEDITED TRANSFERS - UNRESTRICTED REPORTS		FY16 TOTALS	
# Military Protective Orders issued during FY16		789	
# Reported MPO Violations in FY16		16	
# Reported MPO Violations by Subjects		15	
# Reported MPO Violations by Victims of sexual assault		1	
# Reported MPO Violations by Both		0	
*In accordance with DoD Policy, Military Protective Orders are only issued in Unrestricted Reports. A Restricted Report cannot be made when there is a safety risk for the Victim.		Use the following categories or add a new category	FY16 TOTALS
# Unit/Duty expedited transfer requests by Service Member Victims of sexual assault		62	Total Number Denied
# Unit/Duty expedited transfer requests by Service Member Victims Denied		3	Reasons for Disapproval (Total)
# Installation expedited transfer requests by Service Member Victims of sexual assault		684	Moved Alleged Offender Instead
# Installation expedited transfer requests by Service Member Victims Denied		16	Pre-existing Transfer Order Used Instead
C. SUPPORT SERVICE REFERRALS FOR MILITARY VICTIMS IN RESTRICTED REPORTS		FY16 TOTALS	The Expedited Transfer Request was initially denied by the victim's squadron commander because the victim wanted to remain at her current location, but be placed into a different Squadron. Wing Commander made a final decision to have the airman placed in a different organization and squadron (with her approval)
# Support service referrals for Victims in the following categories			
# MILITARY Resources (Referred by DoD)		4339	The alleged sexual assault was unfounded
# Medical		498	Pending administrative separation
# Mental Health		943	Active Reservist transferred to Individual Ready Reserve
# Legal		569	PCA approved in lieu of PCS
# Chaplain/Spiritual Support		631	Modified existing orders
# Rape Crisis Center			CO determined adequate safety and support measures in place
# Victim Advocate/Uniformed Victim Advocate		1125	Command took other action to improve victim's safety
# DoD Safe Helpline		347	Insufficient information for the command to make a determination on the case to support the ET request would be in the SM's best interest
# Other		226	Pending separation from Navy
# CIVILIAN Resources (Referred by DoD)		286	Latency of report and concern for timing with recent misconduct
# Medical		37	Not a credible report
# Mental Health		66	
# Legal		3	
# Chaplain/Spiritual Support		6	
# Rape Crisis Center		99	
# Victim Advocate		45	
# DoD Safe Helpline			
# Other		30	
# Cases where SAFEs were conducted		173	
# Cases where SAFE kits or other needed supplies were not available at time of Victim's exam		0	

CIVILIAN DATA

Unrestricted Reports in Combat Areas of Interest (continued)

E. SUMMARY OF UNRESTRICTED REPORTS WITH INVESTIGATIONS IN COMBAT AREAS OF INTEREST	FY16 Totals
E1. Subjects in Unrestricted Reports Made to DoD with Investigation Initiated During FY16. Note: This data is drawn from DSAID based on Service affiliation of the SARC who currently manages the Victim case associated with the investigation and Subject below.	
# Investigations Initiated during FY16	66
# Investigations Completed as of FY16 End (group by MCIO #)	45
# Investigations Pending Completion as of FY16 End (group by MCIO #)	21
# Subjects in investigations Initiated During FY16	71
# Service Member Subjects investigated by CID	25
# Service Member Subjects investigated by NCIS	8
# Service Member Subjects investigated by AFOSI	9
# Non-Service Member Subjects in Service Investigations Note: Non-Service Member Subjects are drawn from all CID, NCIS and AFOSI investigations involving a Victim Supported by DoD.	2
# Unidentified Subjects in Service Investigations Note: Unidentified Subjects are drawn from all CID, NCIS and AFOSI investigations involving a Victim Supported by DoD.	19
# Service Member Subjects investigated by Civilian or Foreign Law Enforcement Note: Service Member Subjects are drawn from Civilian or Foreign Law Enforcement investigations involving a Victim Supported by DoD.	0
# Non-Service Member Subjects in Civilian or Foreign Law Enforcement Investigations involving a Victim Supported by DoD	0
# Unidentified Subjects in Civilian or Foreign Law Enforcement Investigations involving a Victim Supported by DoD	0
# Subject or Investigation Relevant Data Not Available	8
E2. Service Investigations Completed during FY16 in Combat Areas of Interest Note: The following data is drawn from DSAID and describes criminal investigations completed during the FY16. These investigations may have been initiated during the FY16 or any prior FY.	
# Total Investigations completed by Services during FY16 (Group by MCIO Case Number)	69
# Of these investigations with more than one Victim	4
# Of these investigations with more than one Subject	5
# Of these investigations with more than one Victim and more than one Subject	0
# Subjects in investigations completed during FY16 involving a Victim Supported by DoD	76
# Service Member Subjects investigated by CID	30
# Service Member Subjects investigated by NCIS	15
# Service Member Subjects investigated by AFOSI	8
# Non-Service Member Subjects in completed Service Investigations involving a Victim Supported by DoD	3
# Unidentified Subjects in completed Service Investigations involving a Victim Supported by DoD	18
# Subject Relevant Data Not Available	2
# Victims in investigations completed during FY16, Supported by DoD	74
# Service Member Victims in CID investigations	39
# Service Member Victims in NCIS investigations	23
# Service Member Victims in AFOSI investigations	9
# Non-Service Member Victims in completed Service Investigations, Supported by DoD	3
# Victim Relevant Data Not Available	0

Unrestricted Reports in Combat Areas of Interest (continued)

E3. Subjects and Victims in Investigations Completed by US Civilian and Foreign Agencies during FY16. Note: This data is entered by a Service SARC for cases supported by that Service.	
# Total Investigations completed by US Civilian and Foreign Law Enforcement during FY16 (Group by MCIO Case Number)	0
# Of these investigations with more than one Victim	0
# Of these investigations with more than one Subject	0
# Of these investigations with more than one Victim and more than one Subject	0
# Subjects in investigations completed during FY16 involving a Victim Supported by DoD	0
# Service Member Subjects investigated by Civilian and Foreign Law Enforcement	0
# Non-Service Member Subjects in Civilian and Foreign Law Enforcement Investigations involving a Victim Supported by DoD	0
# Unidentified Subjects in Civilian and Foreign Law Enforcement Investigations involving a Victim Supported by DoD	0
# Subject Relevant Data Not Available	0
# Victims in investigations completed during FY16, Supported by DoD	0
# Service Member Victims in Civilian and Foreign Law Enforcement investigations	0
# Non-Service Member Victims in Civilian and Foreign Law Enforcement Investigations in a case Supported by DoD	0
# Victim Relevant Data Not Available	0
E4. Subjects and Victims in Investigations Completed by Military Police/Security Forces/Master At Arms/Marine Corps CID (MPs) during FY16 (all organizations regardless of name are abbreviated below as "MPs") Note: This data is entered by a Service SARC for cases supported by that Service. Note: As of 1 Jan 2013, all sexual assault investigations are referred to MCIO for investigation. This section captures remaining Subjects from investigations opened in prior years by Military Police/Security Forces/Master At Arms/Marine Corps CID.	
# Total Investigations completed by MPs during FY16 (Group by MCIO Case Number)	0
# Of these investigations with more than one Victim	0
# Of these investigations with more than one Subject	0
# Of these investigations with more than one Victim and more than one Subject	0
# Subjects in MP investigations completed during FY16 involving a Victim Supported by DoD	0
# Service Member Subjects investigated by MPs	0
# Non-Service Member Subjects in MPs involving a Victim Supported by DoD	0
# Unidentified Subjects in MPs involving a Victim Supported by DoD	0
# Subject Relevant Data Not Available	0
# Victims in MP investigations completed during FY16, Supported by DoD	0
# Service Member Victims in MP investigations	0
# Non-Service Member Victims in MP Investigations, Supported by DoD	0
# Victim Relevant Data Not Available	0

Service	Alleged Incident Number	Nature of the Radiation Allegation(s) Associated with a Report of Sexual Assault or Complaint of Sexual Harassment	Nature of Allegations Investigated for the Report of Radiation	Type of Sexual Assault Report or Sexual Harassment Complaint	Type of Radiation Report (as Victim of Alleged Radiation)	Gender of Radiation Reporter	Gender of Alleged Perpetrator	Relationship between Alleged Perpetrator and Radiation Reporter	Relationship between Alleged Perpetrator and Alleged Perpetrator or Sexual Assault or Sexual Harassment	Individual/Organization to Which the Report of Radiation Was Made	Program Responsible for Investigating Radiation Allegations	Findings of the Radiation Investigation	Results of the Investigation Provided to Radiation Reporter	Reason Why Results of the Investigation Not Provided to the Radiation Reporter	Outcome for Alleged Perpetrator as Determined by Subsequent/Provided Investigations - Specified in Action Labels	Outcome for Alleged Perpetrator as Determined by Subsequent/Provided Investigations - Specified in Action Labels	Outcome for Alleged Perpetrator as Determined by Subsequent/Provided Investigations - Specified in Action Labels
Air Force	1	Victim and Radiation was co-workers at the Base Pharmacy. Victim claimed she told the alleged radiation three things: (1) that Victim was sexually assaulted while deployed and (2) Victim acted as a witness in a different sexual assault investigation (the alleged offender for both of these assaults is unknown). A CID was contacted to determine if victim was involved in any investigation. The alleged offender was not involved because there was nothing to indicate Radiation knew that Victim (1) sexually assaulted while deployed as a witness in a different sexual assault. No action was taken as a result of the CID.	(4) Coercion or Intimidation	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(2) Female	(2) Female	(4) Alleged perpetrator is a peer, co-worker, friend, or family member of the radiation reporter	(7) Alleged perpetrator is unknown/investigation ongoing	(6) MEO Administrative Representative	(3) Chain of Command	(4) Allegations unsubstantiated (administrative investigation)	(1) Yes, results provided to the reporter		N/A	(3) Ineffective evidence of any offense to prosecute	
Air Force	2a	The basis for radiation complaint is that reporter had previously assisted a female E-4 unit to make a formal complaint of sexual harassment against an E-4 in unit. The complaint that E-4 made was thoroughly investigated and substantiated by CID. With regard to reporter's claim, it was founded in fact. First, a female E-4 in their squadron was told not to talk to the reporter. (The E-4 was told not to talk to the reporter because of a perceived professional relationship with reporter). Second, the reporter was not permitted to be part of a discussion about an Airman in the unit who had failed a PT test (reporter was not the Airman's supervisor). Third, the squadron commander removed him from responsibilities related to the base air show and transferred him from a meeting related to same (the duties were reassigned to the CID for the CID's benefit). Finally, reporter perceived the squadron commander was ignoring him in the unit. Reporter had all four items met in radiation for assessing the E-4 in light of the sexual harassment complaint. Reporter made a formal complaint to IG against his flight DNDIC, his flight CID and the squadron commander. The group commander appointed a CID at direction of IG. All allegations of radiation and coercion were substantiated.	(2) Radiation, (2) Detraction	(3) Formal Complaint of Sexual Harassment	(2) First Responders for Victims of Alleged Sexual Assault or Complaints of Alleged Sexual Harassment	(1) Male	(1) Male	(1) Alleged perpetrator is a superior in the chain of command of the reporter	(2) Alleged perpetrator is a superior to the alleged perpetrator (in or outside of the chain of command)	(1) Services/NG IG	(3) Chain of Command	(4) Allegations unsubstantiated (administrative investigation)	(1) Yes, results provided to the reporter		N/A	(6) Command declined action/unfounded by Command	
Air Force	2b	The basis for radiation complaint is that reporter had previously assisted a female E-4 unit to make a formal complaint of sexual harassment against an E-4 in unit. The complaint that E-4 made was thoroughly investigated and substantiated by CID. With regard to reporter's claim, it was founded in fact. First, a female E-4 in their squadron was told not to talk to the reporter. (The E-4 was told not to talk to the reporter because of a perceived professional relationship with reporter). Second, the reporter was not permitted to be part of a discussion about an Airman in the unit who had failed a PT test (reporter was not the Airman's supervisor). Third, the squadron commander removed him from responsibilities related to the base air show and transferred him from a meeting related to same (the duties were reassigned to the CID for the CID's benefit). Finally, reporter perceived the squadron commander was ignoring him in the unit. Reporter had all four items met in radiation for assessing the E-4 in light of the sexual harassment complaint. Reporter made a formal complaint to IG against his flight DNDIC, his flight CID and the squadron commander. The group commander appointed a CID at direction of IG. All allegations of radiation and coercion were substantiated.	(3) Detraction	(3) Formal Complaint of Sexual Harassment	(2) First Responders for Victims of Alleged Sexual Assault or Complaints of Alleged Sexual Harassment	(1) Male	(2) Female	(1) Alleged perpetrator is a superior in the chain of command of the reporter	(2) Alleged perpetrator is a superior to the alleged perpetrator (in or outside of the chain of command)	(1) Services/NG IG	(3) Chain of Command	(4) Allegations unsubstantiated (administrative investigation)	(1) Yes, results provided to the reporter		N/A	(6) Command declined action/unfounded by Command	
Air Force	2c	The basis for radiation complaint is that reporter had previously assisted a female E-4 unit to make a formal complaint of sexual harassment against an E-4 in unit. The complaint that E-4 made was thoroughly investigated and substantiated by CID. With regard to reporter's claim, it was founded in fact. First, a female E-4 in their squadron was told not to talk to the reporter. (The E-4 was told not to talk to the reporter because of a perceived professional relationship with reporter). Second, the reporter was not permitted to be part of a discussion about an Airman in the unit who had failed a PT test (reporter was not the Airman's supervisor). Third, the squadron commander removed him from responsibilities related to the base air show and transferred him from a meeting related to same (the duties were reassigned to the CID for the CID's benefit). Finally, reporter perceived the squadron commander was ignoring him in the unit. Reporter had all four items met in radiation for assessing the E-4 in light of the sexual harassment complaint. Reporter made a formal complaint to IG against his flight DNDIC, his flight CID and the squadron commander. The group commander appointed a CID at direction of IG. All allegations of radiation and coercion were substantiated.	(3) Detraction	(3) Formal Complaint of Sexual Harassment	(2) First Responders for Victims of Alleged Sexual Assault or Complaints of Alleged Sexual Harassment	(1) Male	(2) Female	(1) Alleged perpetrator is a superior in the chain of command of the reporter	(2) Alleged perpetrator is a superior to the alleged perpetrator (in or outside of the chain of command)	(1) Services/NG IG	(3) Chain of Command	(4) Allegations unsubstantiated (administrative investigation)	(1) Yes, results provided to the reporter		N/A	(6) Command declined action/unfounded by Command	
Air Force	2d	A traditional gathering alleged that while attending the squadron's annual ball meeting, she was sexually assaulted by the unit's First Sergeant. The victim told a friend, another Airman in the unit, about the assault and that Airman reported to a senior member within the unit. An investigation was conducted and resulted in the First Sergeant being removed from his command and reassigned to another position within the wing. The victim received a Letter of Reprimand (LOR) from her base for having her husband stay with her in a double occupancy sleeping room, drinking and driving, being late to report to duty on time, being with her duty, having an Airman in her double occupancy sleeping room, being with her duty, having an Airman in her sleeping room, and keeping her chain of command and reporting to the squadron commander about the incident. The victim alleged the punishment was due to her having alleged a sexual assault. An independent investigation by the service inspector general determined that the personnel action was not done properly. The CID IG approved the service CID finding.	(1) Reputal	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(2) Female	(1) Male	(1) Alleged perpetrator is a superior in the chain of command of the reporter	(2) Alleged perpetrator is a superior to the alleged perpetrator (in or outside of the chain of command)	(1) Services/NG IG	(3) Chain of Command	(4) Allegations unsubstantiated (administrative investigation)	(1) Yes, results provided to the reporter		N/A	(6) Command declined action/unfounded by Command	
Army	4	Victim reported the alleged sexual assault offender was talking for after she had sexual assault complaint by following her last getting on the same vehicle and she was not in the vehicle. She was not in the vehicle and the flight was considered. Supporting that counsel opened the elements of proof for talking was not done properly. The CID IG approved the service CID finding.	(5) Other Matters	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(2) Female	(1) Male	(4) Alleged perpetrator is a peer, co-worker, friend, or family member of the radiation reporter	(1) Alleged perpetrator is also the alleged perpetrator or sexual assault/harassment	(6) SVC/CVC	(4) MCHO	DDOD 5505.18 has no guidance on founded or unfounded. However, DDOD 5505.02 prohibits the MCOs from "falsely identifying or documenting investigation conclusions (e.g., founded or unfounded)." As a result, CID does not report founded or unfounded, but does report the final counsel/prosecutor's opinion as to whether there is probable cause to believe that a crime was committed by the suspect.	(1) Yes, results provided to the reporter		(8) No action taken (PLEASE SPECIFY IN COLUMN X - "Outcome for Alleged Perpetrator - Reason Why No Action Taken")	(6) Command declined action/unfounded by Command	
Army	5	Personnel unknown were "told" on a sexual assault victim's duty, and placed a video note in the door with the writing "look it up" down." Investigation did not identify the perpetrator(s).	(5) Other Matters	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(2) Female	(2) Female	(4) Alleged perpetrator is a peer, co-worker, friend, or family member of the radiation reporter	(7) Alleged perpetrator is unknown/investigation ongoing	(7) Other (e.g., chaplain, healthcare provider, etc.)	(4) MCHO	DDOD 5505.18 has no guidance on founded or unfounded. However, DDOD 5505.02 prohibits the MCOs from "falsely identifying or documenting investigation conclusions (e.g., founded or unfounded)." As a result, CID does not report founded or unfounded, but does report the final counsel/prosecutor's opinion as to whether there is probable cause to believe that a crime was committed by the suspect.	(1) Yes, results provided to the reporter		(8) No action taken (PLEASE SPECIFY IN COLUMN X - "Outcome for Alleged Perpetrator - Reason Why No Action Taken")	(4) Unknown perpetrator	
Army	6	Victim reported that a close friend of the alleged sexual assault offender harassed her and tried to get her to drop charges. Supporting that counsel opened the elements of proof for Obstruction of Justice were not met.	(5) Other Matters	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(2) Female	(2) Female	(4) Alleged perpetrator is a peer, co-worker, friend, or family member of the radiation reporter	(4) Alleged perpetrator is a superior to the alleged perpetrator	(4) MCHO	(4) MCHO	DDOD 5505.18 has no guidance on founded or unfounded. However, DDOD 5505.02 prohibits the MCOs from "falsely identifying or documenting investigation conclusions (e.g., founded or unfounded)." As a result, CID does not report founded or unfounded, but does report the final counsel/prosecutor's opinion as to whether there is probable cause to believe that a crime was committed by the suspect.	(1) Yes, results provided to the reporter		(8) No action taken (PLEASE SPECIFY IN COLUMN X - "Outcome for Alleged Perpetrator - Reason Why No Action Taken")	(6) Command declined action/unfounded by Command	
Army	7	Victim claimed that persons in her unit became aware that she had reported being sexually assaulted and unknown personnel retaliated against her and talked about her. Investigation revealed all at location, the victim openly discussed being a sexual assault victim with other Soldiers, and that all were in the command. However, the victim did not report her and address her issues. Supporting that counsel opened the elements of proof for communicating a threat, or any other crime, were not met.	(5) Other Matters	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(2) Female	(2) Female	(1) Alleged perpetrator is a superior in the chain of command of the reporter	(2) Alleged perpetrator is a superior to the alleged perpetrator (in or outside of the chain of command)	(3) Chain of Command	(4) MCHO	DDOD 5505.18 has no guidance on founded or unfounded. However, DDOD 5505.02 prohibits the MCOs from "falsely identifying or documenting investigation conclusions (e.g., founded or unfounded)." As a result, CID does not report founded or unfounded, but does report the final counsel/prosecutor's opinion as to whether there is probable cause to believe that a crime was committed by the suspect.	(1) Yes, results provided to the reporter		(8) No action taken (PLEASE SPECIFY IN COLUMN X - "Outcome for Alleged Perpetrator - Reason Why No Action Taken")	(6) Command declined action/unfounded by Command	
Army	8	Victim claimed that she reported an assault to her Captain. Commander initiated an IG investigation and forced her to attend a warning session. Investigation revealed that the victim was not in the warning session and was not in the unit. Supporting that counsel opened the elements of proof for obstruction of justice, or any other crime, were not met.	(5) Other Matters	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(2) Female	(1) Male	(1) Alleged perpetrator is a superior in the chain of command of the reporter	(2) Alleged perpetrator is a superior to the alleged perpetrator (in or outside of the chain of command)	(4) MCHO	(4) MCHO	DDOD 5505.18 has no guidance on founded or unfounded. However, DDOD 5505.02 prohibits the MCOs from "falsely identifying or documenting investigation conclusions (e.g., founded or unfounded)." As a result, CID does not report founded or unfounded, but does report the final counsel/prosecutor's opinion as to whether there is probable cause to believe that a crime was committed by the suspect.	(1) Yes, results provided to the reporter		(8) No action taken (PLEASE SPECIFY IN COLUMN X - "Outcome for Alleged Perpetrator - Reason Why No Action Taken")	(6) Command declined action/unfounded by Command	
Army	9	Victim reported that a friend of the alleged sexual assault offender threatened her with harm and did not allow her to complete. Subject was treated in a summary court martial and found not guilty.	(5) Other Matters	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(2) Female	(1) Male	(4) Alleged perpetrator is a peer, co-worker, friend, or family member of the radiation reporter	(4) Alleged perpetrator is a peer, co-worker, friend, or family member of the radiation reporter	(3) Chain of Command	(4) MCHO	DDOD 5505.18 has no guidance on founded or unfounded. However, DDOD 5505.02 prohibits the MCOs from "falsely identifying or documenting investigation conclusions (e.g., founded or unfounded)." As a result, CID does not report founded or unfounded, but does report the final counsel/prosecutor's opinion as to whether there is probable cause to believe that a crime was committed by the suspect.	(1) Yes, results provided to the reporter		(1) Courts-martial charge preferred against alleged perpetrator		
Army	10	Victim reported the alleged sexual assault offender, who was her husband, initiated a protest order by calling and text messaging her, and that he also attempted to break into her residence. Court martial charges were preferred against the offender, but he was given a discharge in lieu of court martial (Chapter 16).	(5) Other Matters	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(2) Female	(1) Male	(4) Alleged perpetrator is a peer, co-worker, friend, or family member of the radiation reporter	(1) Alleged perpetrator is also the alleged perpetrator or sexual assault/harassment	(4) MCHO	(4) MCHO	DDOD 5505.18 has no guidance on founded or unfounded. However, DDOD 5505.02 prohibits the MCOs from "falsely identifying or documenting investigation conclusions (e.g., founded or unfounded)." As a result, CID does not report founded or unfounded, but does report the final counsel/prosecutor's opinion as to whether there is probable cause to believe that a crime was committed by the suspect.	(1) Yes, results provided to the reporter		(1) Courts-martial charge preferred against alleged perpetrator		
Army	11	Victim reported that the alleged sexual assault offender drove past her in his vehicle, turned around and drove past her again, which caused her to feel scared and intimidated. Supporting that counsel opened the elements of proof for communicating a threat, or any other crime, were not met.	(5) Other Matters	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(2) Female	(1) Male	(4) Alleged perpetrator is a peer, co-worker, friend, or family member of the radiation reporter	(2) Alleged perpetrator is also the alleged perpetrator or sexual assault/harassment	(6) SVC/CVC	(4) MCHO	DDOD 5505.18 has no guidance on founded or unfounded. However, DDOD 5505.02 prohibits the MCOs from "falsely identifying or documenting investigation conclusions (e.g., founded or unfounded)." As a result, CID does not report founded or unfounded, but does report the final counsel/prosecutor's opinion as to whether there is probable cause to believe that a crime was committed by the suspect.	(1) Yes, results provided to the reporter		(8) No action taken (PLEASE SPECIFY IN COLUMN X - "Outcome for Alleged Perpetrator - Reason Why No Action Taken")	(6) Command declined action/unfounded by Command	
Army	12	Victim was apprehended by the MP for alleged drunk driving. Afterwards, the victim alleged the MP repeatedly sexually abused her and other soldiers were apprehended. Subsequently, the victim reported that the local MP SGM directed the MP to MP investigation. The victim reported that the SGM denied her charges her credibility. The SGM denied the allegation. Investigation found no evidence to substantiate the allegation. Supporting that counsel opened the elements of proof for obstruction of justice were not met.	(5) Other Matters	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(2) Female	(1) Male	(2) Alleged perpetrator is a superior NCI in the chain of command of the reporter	(2) Alleged perpetrator is a superior to the alleged perpetrator (in or outside of the chain of command)	(7) SARC	(4) MCHO	DDOD 5505.18 has no guidance on founded or unfounded. However, DDOD 5505.02 prohibits the MCOs from "falsely identifying or documenting investigation conclusions (e.g., founded or unfounded)." As a result, CID does not report founded or unfounded, but does report the final counsel/prosecutor's opinion as to whether there is probable cause to believe that a crime was committed by the suspect.	(1) Yes, results provided to the reporter		(8) No action taken (PLEASE SPECIFY IN COLUMN X - "Outcome for Alleged Perpetrator - Reason Why No Action Taken")	(6) Command declined action/unfounded by Command	
Army	13	Victim reported that the alleged sexual assault offender assaulted her in the parking lot for reporting the sexual assault. Investigation was a peer investigation with local law enforcement. Action taken against the offender is pending.	(5) Other Matters	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(2) Female	(1) Male	(1) Alleged perpetrator is a superior in the chain of command of the reporter	(2) Alleged perpetrator is a superior to the alleged perpetrator (in or outside of the chain of command)	(4) MCHO	(4) MCHO	DDOD 5505.18 has no guidance on founded or unfounded. However, DDOD 5505.02 prohibits the MCOs from "falsely identifying or documenting investigation conclusions (e.g., founded or unfounded)." As a result, CID does not report founded or unfounded, but does report the final counsel/prosecutor's opinion as to whether there is probable cause to believe that a crime was committed by the suspect.	(1) Yes, results provided to the reporter		(7) Action pending		
Army	14	Victim, who was a law witness in a sexual assault investigation, was threatened and threatened to be killed by a Soldier who was the alleged sexual assault offender, at an off-post gas station. When the clerk and another Soldier tried to intervene and call local police, the Soldier threatened to kill them both. Local police arrived and arrested the Soldier. Action taken is pending.	(5) Other Matters	(1) Unrestricted Report of Sexual Assault	(2) Witness/Observer of Alleged Sexual Assault or Observer Sexual Harassment	(2) Female	(1) Male	(4) Alleged perpetrator is a peer, co-worker, friend, or family member of the radiation reporter	(4) Alleged perpetrator is a peer, co-worker, friend, or family member of the radiation reporter	(5) Service Law Enforcement	(4) MCHO	DDOD 5505.18 has no guidance on founded or unfounded. However, DDOD 5505.02 prohibits the MCOs from "falsely identifying or documenting investigation conclusions (e.g., founded or unfounded)." As a result, CID does not report founded or unfounded, but does report the final counsel/prosecutor's opinion as to whether there is probable cause to believe that a crime was committed by the suspect.	(1) Yes, results provided to the reporter		(7) Action pending

Marine Corps	32b	Victim made an unrestricted report. Victim's superior was notified of victim engaged in sex with an unknown male and solicited to have the victim report allegation of sexual assault. An investigation was conducted and the retaliator, who was the victim's commander, received advice counseling and was processed for administrative separation. The subject of the sexual assault case had no action taken against him regarding the retaliation case although evidence reviewed in the investigation showed he sent the victim to the retaliator.	(5) Other Matters	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(2) Female	(1) Male	(2) Alleged retaliator is associated with perpetrator of sexual assault or sexual harassment – e.g., the perpetrator's superior, peer, co-worker, friend, or family member	(1) Alleged retaliator is a peer, co-worker, friend, or family member of the alleged perpetrator	(4) MCO	(4) MCO	(6) Allegations unfounded (internal investigations only, per DoD SIDS 18)	(1) Yes, results provided to the reporter		(8) No action taken (PLEASE SPECIFY IN COLUMN X - "Outcome for Alleged Retaliator - Reason Why No Action Taken")	Retaliator received NPT for sexual harassment associated with the sexual assault case
Marine Corps	32c	Victim made an unrestricted report. Subject told victim he had no problems coming after victim if the victim was used as a result of the sexual assault investigation. Victim was transferred to a new assignment. The sexual assault case is pending adjudication.	(5) Other Matters	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(1) Male	(1) Male	(2) Alleged retaliator is associated with perpetrator of sexual assault or sexual harassment – e.g., the perpetrator's superior, peer, co-worker, friend, or family member	(1) Alleged retaliator is a peer, co-worker, friend, or family member of the alleged perpetrator	(4) MCO	(4) MCO	(5) Allegations unfounded (internal investigations only, per DoD SIDS 18)	(1) Yes, results provided to the reporter		(8) No action taken (PLEASE SPECIFY IN COLUMN X - "Outcome for Alleged Retaliator - Reason Why No Action Taken")	(1) Insufficient evidence of any offense to prosecute
Marine Corps	33a	Victim made an unrestricted report. Afterwards, other members of the command would kick the door of his barracks room during the early morning hours. No action was taken by command regarding the harassment. No direct threat was made to victim. Victim was transferred to a new assignment.	(5) Other Matters	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(1) Male	(1) Male	(2) Alleged retaliator is associated with perpetrator of sexual assault or sexual harassment – e.g., the perpetrator's superior, peer, co-worker, friend, or family member	(4) Alleged retaliator is a peer, co-worker, friend, or family member of the alleged perpetrator	(4) MCO	(4) MCO	(5) Allegations unfounded (internal investigations only, per DoD SIDS 18)	(1) Yes, results provided to the reporter		(8) No action taken (PLEASE SPECIFY IN COLUMN X - "Outcome for Alleged Retaliator - Reason Why No Action Taken")	(1) Insufficient evidence of any offense to prosecute
Marine Corps	33b	Victim made an unrestricted report. Afterwards, victim was told by retaliator he had people willing to "take up" the victim. Victim was transferred to a new command. No action was taken by command against the retaliator.	(5) Other Matters	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(1) Male	(1) Male	(2) Alleged retaliator is associated with perpetrator of sexual assault or sexual harassment – e.g., the perpetrator's superior, peer, co-worker, friend, or family member	(4) Alleged retaliator is a peer, co-worker, friend, or family member of the alleged perpetrator	(4) MCO	(4) MCO	(5) Allegations unfounded (internal investigations only, per DoD SIDS 18)	(1) Yes, results provided to the reporter		(8) No action taken (PLEASE SPECIFY IN COLUMN X - "Outcome for Alleged Retaliator - Reason Why No Action Taken")	(1) Insufficient evidence of any offense to prosecute
Marine Corps	33c	Victim made an unrestricted report. Afterwards, victim's door was kicked open by retaliator and victim was told he was a "piece of shit". Victim was transferred to a new command. No action was taken by command against the retaliator.	(5) Other Matters	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(1) Male	(1) Male	(2) Alleged retaliator is associated with perpetrator of sexual assault or sexual harassment – e.g., the perpetrator's superior, peer, co-worker, friend, or family member	(4) Alleged retaliator is a peer, co-worker, friend, or family member of the alleged perpetrator	(4) MCO	(4) MCO	(5) Allegations unfounded (internal investigations only, per DoD SIDS 18)	(1) Yes, results provided to the reporter		(8) No action taken (PLEASE SPECIFY IN COLUMN X - "Outcome for Alleged Retaliator - Reason Why No Action Taken")	(1) Insufficient evidence of any offense to prosecute
Navy	34	Victim made an unrestricted report. Afterwards the victim found her hair on her car was shaved. No offender was identified and the victim conducted a regularly scheduled PCS.	(5) Other Matters	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(2) Female	(2) Female	(1) Alleged retaliator is unknown/investigation ongoing	(1) Alleged perpetrator is unknown/investigation ongoing	(2) Service Law Enforcement, (4) MCO	(4) MCO	(6) Allegations unfounded (internal investigations only, per DoD SIDS 18)	(1) Yes, results provided to the reporter		(8) No action taken (PLEASE SPECIFY IN COLUMN X - "Outcome for Alleged Retaliator - Reason Why No Action Taken")	(4) Unknown retaliator
Navy	35a	Victim made an unrestricted report. The victim believed the subject's threats were following her. No verbal communication of threat was made to the victim and the nature of the threats showed they did not know the victim. As no direct threats were made in the victim, the investigation was closed as unfounded. Navy	35b	Victim made an unrestricted report. The victim believed the subject's threats were following her. No verbal communication of threat was made to the victim and the nature of the threats showed they did not know the victim. As no direct threats were made in the victim, the investigation was closed as unfounded.	(5) Other Matters	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(2) Female	(1) Male	(2) Alleged retaliator is associated with perpetrator of sexual assault or sexual harassment – e.g., the perpetrator's superior, peer, co-worker, friend, or family member	(4) Alleged retaliator is a peer, co-worker, friend, or family member of the alleged perpetrator	(2) Service Law Enforcement, (4) MCO	(4) MCO	(6) Allegations unfounded (internal investigations only, per DoD SIDS 18)	(1) Yes, results provided to the reporter		(8) No action taken (PLEASE SPECIFY IN COLUMN X - "Outcome for Alleged Retaliator - Reason Why No Action Taken")	(1) Insufficient evidence of any offense to prosecute
Navy	35c	Victim made an unrestricted report. The victim believed the subject's threats were following her. No verbal communication of threat was made to the victim and the nature of the threats showed they did not know the victim. As no direct threats were made in the victim, the investigation was closed as unfounded.	(5) Other Matters	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(2) Female	(1) Male	(2) Alleged retaliator is associated with perpetrator of sexual assault or sexual harassment – e.g., the perpetrator's superior, peer, co-worker, friend, or family member	(4) Alleged retaliator is a peer, co-worker, friend, or family member of the alleged perpetrator	(2) Service Law Enforcement, (4) MCO	(4) MCO	(6) Allegations unfounded (internal investigations only, per DoD SIDS 18)	(1) Yes, results provided to the reporter		(8) No action taken (PLEASE SPECIFY IN COLUMN X - "Outcome for Alleged Retaliator - Reason Why No Action Taken")	(1) Insufficient evidence of any offense to prosecute
Army	36	Victim reported the girlfriend of the alleged sexual assault offender showed her during an absence about the victim making a sexual assault complaint. During a field grade Article 15 hearing, the girlfriend was found not guilty due to insufficient evidence.	(5) Other Matters	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(2) Female	(2) Female	(1) Alleged retaliator is a superior in the chain of command of the reporter	(2) Alleged retaliator is a superior in the chain of command of the alleged perpetrator (in a status of the chain of command)	(4) MCO	(4) MCO	(6) Allegations unsubstantiated (administrative investigations)	(1) Yes, results provided to the reporter		(8) No action taken (PLEASE SPECIFY IN COLUMN X - "Outcome for Alleged Retaliator - Reason Why No Action Taken")	(2) No action taken (PLEASE SPECIFY IN COLUMN X - "Outcome for Alleged Retaliator - Reason Why No Action Taken")
Army	37	Victim made an unrestricted report of sexual assault. After the incident was reported to law enforcement, the victim received a threatening post on her Facebook account from an unknown individual.	(5) Other Matters	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(2) Female	(2) Female	(1) Alleged retaliator is unknown/investigation ongoing	(1) Alleged perpetrator is unknown/investigation ongoing	(4) MCO	(4) MCO	(6) Allegations unsubstantiated (administrative investigations)	(1) Yes, results provided to the reporter		(8) No action taken (PLEASE SPECIFY IN COLUMN X - "Outcome for Alleged Retaliator - Reason Why No Action Taken")	(4) Unknown retaliator
Army	38	Victim made an unrestricted report of sexual assault. After the victim told the wife of the SOT subject that he SOT had sexually assaulted her, the wife attacked the victim. Subsequently, the victim notified her statement and the wife immediately sought for a verbal altercation. Supporting her counsel stated that the elements of proof for sexual assault were not met.	(5) Other Matters	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(2) Female	(2) Female	(4) Alleged retaliator is a peer, co-worker, friend, or family member of the retaliator	(4) Alleged retaliator is a peer, co-worker, friend, or family member of the alleged perpetrator	(4) MCO	(4) MCO	(6) Allegations unsubstantiated (administrative investigations)	(1) Yes, results provided to the reporter		(8) No action taken (PLEASE SPECIFY IN COLUMN X - "Outcome for Alleged Retaliator - Reason Why No Action Taken")	(8) Command declined action/unfounded by Command
Army	39	Victim made an unrestricted report of sexual assault. The SOT subject's social media presence was contacted and the victim in the SOT subject contacted the victim to re-engage in a relationship with him, but he subsequently broke her during a verbal altercation. The subject was found guilty in a general court martial for both the sexual assault and the destruction of justice.	(5) Other Matters	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(2) Female	(1) Male	(1) Alleged retaliator is a superior NPT in the chain of command of the reporter	(1) Alleged retaliator is also the alleged perpetrator of sexual assault/sexual harassment	(4) MCO	(4) MCO	(6) Allegations unsubstantiated (administrative investigations)	(1) Yes, results provided to the reporter		(8) No action taken (PLEASE SPECIFY IN COLUMN X - "Outcome for Alleged Retaliator - Reason Why No Action Taken")	(1) Civilian criminal charged pending against alleged retaliator
Army	40	Victim made an unrestricted report of sexual assault. After the victim told the wife of the SOT subject that he SOT had sexually assaulted her, the wife attacked the victim. Subsequently, the victim notified her statement and the wife immediately sought for a verbal altercation. Supporting her counsel stated that the elements of proof for sexual assault were not met.	(5) Other Matters	(1) Unrestricted Report of Sexual Assault	(1) Victim of Alleged Sexual Assault or Complaint of Alleged Sexual Harassment	(2) Female	(1) Male	(1) Alleged retaliator is a superior NPT in the chain of command of the reporter	(1) Alleged retaliator is also the alleged perpetrator of sexual assault/sexual harassment	(5) Service Law Enforcement	(4) MCO	(6) Allegations unsubstantiated (administrative investigations)	(1) Yes, results provided to the reporter		(8) No action taken (PLEASE SPECIFY IN COLUMN X - "Outcome for Alleged Retaliator - Reason Why No Action Taken")	(1) Action pending

Appendix E: Implementation Status of NDAA for FY16 Pertaining to SAPR

Appendix E: Implementation Status of Sections of NDAA for FY16 Pertaining to SAPR

The Department continues to make progress implementing the sections of law of National Defense Authorization Acts (NDAA) for Fiscal Years (FY) 2014-2016. Most of the legislative changes from the FY14 and FY15 NDAA's have been implemented with the following exceptions:

FY14 NDAA:

- Section 1701: Extension of crime victim's rights to victims of offenses under the Uniform Code of Military Justice. This section has been partially implemented by two Executive Orders, and the Department of Defense Form 2701.
- Section 1731: Independent reviews and assessments of Uniform Code of Military Justice and judicial proceedings of sexual assault cases. The Response Systems Panel has completed their work and submitted their final report in June 2014. The work of the Judicial Systems Panel is on-going.
- Section 1735: Review of the Office of Diversity Management and Equal Opportunity role in sexual harassment cases. This section requires a report and the report remains under review.

FY15 NDAA:

- Section 542: Analysis and assessment of the dispositions of most serious offenses identified in Unrestricted Reports on sexual assault in Annual Report on Sexual Assault in the Armed Forces. This section required each Service and/or component to submit a report. This section remains in progress.
- Section 545: Additional duties for Judicial Systems Panel. This section is in progress.

- Section 546: Defense Advisory Committee in Investigation, Prosecution, and defense of Sexual Assault in the Armed Forces. This Defense Advisory Committee was established in February 2016, and held its first meeting in January 2017. A second meeting is scheduled for April 2017.

NDAA for FY16

The FY16 NDAA contained 15 sections of law addressing sexual assault, with a focus on military justice. While some have been fully implemented, the Department continues to make steady progress on a number of key sections:

- Section 531: Enforcement of certain crime victim rights by the Court of Criminal Appeals. The rulemaking responsibility was delegated to the Judge Advocates General; exercise of that rulemaking function is in-progress.
- Section 534: Timely notification to victims of sex-related offenses of the availability of assistance from the Special Victims' Counsel. This section has been partially implemented and some regulations are pending.
- Section 541: Retention of case notes in investigations of sex-related offenses involving members of the Army, Navy, Air Force, and Marine Corps.

Appendix F: Status of Secretary of Defense Initiatives

Appendix F: Status of Secretary of Defense Initiatives

The Secretary of Defense directed a total of 54 initiatives since Fiscal Year (FY) 2012 to fundamentally reformed how the military prevents, responds to, and adjudicates sexual assault. Many of the Secretary of Defense initiatives have been codified in National Defense Authorization Acts and are tasks in the *Department of Defense Sexual Assault Prevention and Response (SAPR) Strategic Plan*. This section provides an update on the status of the three pending Secretary of Defense Initiatives entering into FY16. The Department worked diligently to comply with these remaining initiatives. All initiatives were completed within the FY.

Initiative	Summary	Completion Status
Ensure Victim's Rights	The DoD General Counsel, in coordination with the Joint Service Committee on Military Justice, will develop a method to incorporate the rights afforded to victims through the Crime Victims' Rights Act (18 United States Code 3771) into military justice practice, to the extent appropriate.	● Complete
Improve Response for Male Victims	The Secretaries of the Military Departments, in conjunction with the Chiefs of the Military Services and National Guard Bureau (NGB), will report implementation plans and methods to improve reporting and enhance efforts to encourage male victims to seek assistance. The Military Departments are to solicit male victim input in the development of these methods.	● Complete
Enhance First Line Supervisor Skills and Knowledge	The Chiefs of the Military Services and the NGB will create a curriculum development plan to augment all supervisor training to address the role of the supervisor in unit SAPR programs. This training will apply to all junior officers, junior enlisted supervisors, and civilian employees that supervise military members. Curriculum will emphasize the importance of engaging with subordinates on SAPR, recognizing the signs of possible acts of retaliation, and provide the opportunity to practice leadership skills to promote a healthy command climate.	● Complete

Appendix G: Safe Helpline Data

Appendix G: Safe Helpline Usage and User Satisfaction Data

The Department of Defense (DoD) Safe Helpline supports the Department's Sexual Assault Prevention and Response programs by providing crisis intervention, support, information and referrals to resources for members of the DoD community who have experienced sexual assault. The service is confidential, anonymous, secure, and available 24/7. The availability of an anonymous hotline ensures that all victims have a place to safely disclose their assault, express concerns, and obtain information and support.

Safe Helpline staff provide personalized assistance and referrals to military, veteran, and civilian service providers. Safe Helpline is many times the first place that victims report what happened. Often victims who are reluctant to report will instead call Safe Helpline to receive assistance. As such, Safe Helpline is a key source of support for victims who might not otherwise reach out for help through military channels, and has the potential to serve as point-of-entry that will lead a greater percentage of victims to report their assault. This summary provides an overview of the FY16 evaluation findings.

Website Usage and Outreach

The Safe Helpline website (safehelpline.org) saw a 67 percent increase (specifically, 54 percent for online sessions and 76 percent for phone sessions) from FY15 to FY16. In FY16, 16,913 users (10,579 phone users and 6,334 online users) contacted the Safe Helpline (Figure 1).

This increase may be attributed to increased outreach efforts. Specifically, the Safe Helpline team continued to support individual bases and installations, with 50 events—a 14 percent increase from events held in FY15—and increased online

advertising. The increased outreach brought more awareness to Safe Helpline as an important, unique resource that helps victims as well as their family and friends. These marketing efforts also contributed to a significant increase in unique website users, to 633,796, during FY16.

Safe Helpline Phone and Online Sessions

The findings, based on anonymous data, provide important information about the needs of victims, for whom anonymity and privacy are prominent concerns. Over half of victims (52 percent) disclosed that they had not yet reported to a military authority, and one-fifth of victims had not disclosed their assault to anyone prior to contacting Safe Helpline. Men were more likely to make a first-time disclosure on the SHL compared to women, with one out of four men not having disclosed to *anyone* prior to contacting Safe Helpline. The FY16 findings demonstrate how Safe Helpline serves as an important bridge to victim assistance, reporting, and recovery.

User Characteristics

Users were primarily victims contacting Safe Helpline to discuss issues related to sexual assault. Of the 2,331 sessions in which an event was discussed and user-victim relationship was disclosed, 75 percent of users identified as victims.

In addition to victims, users included friends, family members and intimate partners of the victim. Allied professionals and SARCs seeking information about services also used Safe Helpline. Some users called on behalf of victims to learn how they could provide support and to help prevent re-victimization.

Figure 1: Safe Helpline Online and Telephone User Sessions Increased 67 percent

While women are the most frequent users of Safe Helpline, the available gender data indicated that roughly one-third of phone users (33 percent) are men.

Reporting Concerns

Users frequently contact Safe Helpline to discuss reporting-related concerns and connect to resources that might ultimately lead to an official report. The helpline fulfills victims' needs to disclose in a safe context, receive validation, and air their concerns safely and securely. As such, Safe Helpline can help to build confidence in the reporting process for victims who are reluctant to use military resources.

To provide a focused examination of reporting-related concerns, analyses were based on a sample of 1,186 users who identified as victims of adult sexual assault. Within this sample, the majority of cases involved both a military-affiliated victim and military-affiliated alleged perpetrator at the time of the event. The session assessment captures information about reporting-related concerns (barriers to reporting, motivations for reporting, and negative experiences in reporting). Key findings are as follows:

- Roughly half (53 percent) stated that they had not filed a report. Only 15 percent had already filed a report to a military

authority, while the remaining 32 percent of the sample did not disclose reporting status.

- Of the 125 victims who discussed motivations for reporting, the motivations most frequently mentioned included: to stop the offender from hurting others (37 percent), to punish the alleged offender (36 percent), to stop alleged offender from hurting the victim again (31 percent), and to seek mental health assistance (26 percent).

Concerns of Men Who Disclose Victimization

Safe Helpline plays a key role in the Department's efforts to enhance treatment and resources for male survivors. Safe Helpline staff receives specialized training in working with male survivors, which covers topics including social expectations, expectations of masculinity, and effects specific to male survivors, and a number of scenarios and exercises to engage the staff member during the training.

Because Safe Helpline estimates that one-third of phone users are men, Safe Helpline data is positioned to inform our understanding of concerns unique to male victims. In civilian samples, men take longer to disclose childhood sexual abuse because

of stigma¹, and recent work underscores the role of stigma as a particularly important barrier to reporting for men in the military.² Indeed, the data suggest that men who visit Safe Helpline have particularly elevated concerns about stigma. FY16 data expanded our understanding of men who visit Safe Helpline in several areas:

- Men were more likely than women to disclose their assault for the first time. Specifically, 27 percent of male victims (vs. 16 percent of female victims) had not disclosed to anyone prior to contacting Safe Helpline.
- Although multiple alleged perpetrator rape was relatively rare overall, men were more likely than women to discuss this form of sexual assault (10 percent vs. 5 percent respectively).
- Men were more likely to discuss “obtaining mental health assistance” as a motivation for reporting. Specifically, of the victims who discussed motivations for reporting (31 men, 71 women), 48 percent of men noted obtaining mental health assistance versus 18 percent of women.
- Men are more likely to discuss self-conscious emotions such as shame or embarrassment relative to women (41 percent versus 32 percent respectively).

These findings demonstrate that Safe Helpline is an important part of SAPRO's efforts to address the needs of men who are survivors of sexual assault.

Safe HelpRoom

Safe HelpRoom is an anonymous, moderated online group chat service that allows individuals who have experienced

¹ Easton, S. D. (2013). Disclosures of child sexual abuse among adult male survivors. *Clinical Social Work Journal*, 41(4), 344-355.

² O'Brien, C., Keith, J., & Shoemaker, L. (2015). Don't tell: Military culture and male rape. *Psychological Services*, 12(4), 357.

sexual assault in the military to connect with, and support, one another. In February of 2015, Safe HelpRoom services were expanded to allow 24/7 access. While overall visits to the Safe HelpRoom increased after this modification, very few sessions involved two or more users as the service was intended. While increased outreach efforts are needed to increase participation among military survivors, the Safe HelpRoom technology shows promise as a platform to facilitate communication among users including allied professionals in the field of sexual assault.

Referrals to Military Resources

Users accepted referrals to military resources in one-third (32 percent) of all sessions. One in five users (20 percent) accepted a referral to a SARC, indicating confidence in on-base/installation resources. Safe Helpline staff completed warm handoffs to on-base resources in 3 percent of phone sessions, and the majority of such sessions were transferred to SARCs. In fewer than 1 percent of sessions, a warm handoff was attempted but not successful.

For victims in particular, military resource referrals were accepted in 22 percent of sessions. Notably, one out of five victims (20 percent) stated that they had already accessed or attempted to access military services prior to contacting Safe Helpline. Many victims are interested in civilian resources as an alternative.

User Feedback

User satisfaction ratings remained high throughout FY16 even with the increase in user volume. Average ratings were above a 4.0 on a scale of 1-5 on all domains (ease of use, satisfaction with staffer knowledge, likelihood to recommend Safe Helpline, and intent to use resources provided). FY16 user satisfaction ratings were provided for 302 phone and 484 online sessions. Notably, Safe Helpline observed a 236 percent increase in the number of phone users

providing feedback, with average ratings ranging from 4.47 (ease of use) to 4.68 (likelihood to recommend the SHL). Average online user ratings ranged from 4.31 (ease of use) to 4.59 (likelihood to use the resources

provided). Most users indicated that they intended to use services recommended by Safe Helpline, and follow up support is now available for victims who desire additional help in connecting to resources.

Appendix H: Sexual Harassment Data

Appendix H: Sexual Harassment Data

The Department of Defense (DoD) remains firmly committed to eliminating sexual harassment in the Armed Forces. Sexual harassment violates the responsibility of DoD military and civilian personnel to treat each other with dignity and respect. Sexual harassment jeopardizes combat readiness and mission accomplishment, weakens trust within the ranks, and erodes unit cohesion.

Oversight Responsibilities

The Office of Diversity Management and Equal Opportunity (ODMEO) has broad responsibility for the DoD Military Equal Opportunity program, which includes policy development and oversight, standardization of training and education, data collection, and analysis of military sexual harassment data.

Definition of Sexual Harassment

Section 548 of the National Defense Authorization Act for Fiscal Year (FY) 2017 changed the sexual harassment definition by removing sexual harassment as constituting a form of sex discrimination and changing “work environment” to “environment.” Thus, Title 10, United States Code, section 1561 now defines “sexual harassment” as a form of harassment that involves unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature when:

- Submission to such conduct is made either explicitly or implicitly a term or condition of a person's job, pay, or career, or
- Submission to or rejection of such conduct by a person is used as a basis for career or employment decisions affecting that person, or
- Such conduct has the purpose or effect of unreasonably interfering with an individual's work performance or creates

an intimidating, hostile, or offensive environment.

This definition emphasizes that conduct, to be actionable as “abusive work environment” harassment, need not result in concrete psychological harm to the victim, but rather need only be so severe or pervasive that a reasonable person would perceive, and the victim does perceive, the work environment as hostile or offensive.

Any person in a supervisory or command position who uses or condones any form of sexual behavior to control, influence, or affect the career, pay, or job of a Service member or DoD civilian employee is engaging in sexual harassment. Similarly, any Service member or DoD civilian employee who makes deliberate or repeated unwelcome verbal comments, non-verbal or physical contact of a sexual nature, is also engaging in sexual harassment.

Overall Complaint Totals

In FY16, the Military Services and the National Guard Bureau (NGB) received and processed 601 sexual harassment complaints. Complaints are substantiated or unsubstantiated based on the results of an investigation or inquiry. At the close of FY16, 530 reports were resolved through an appropriate investigation and 71 reports remained open and pending resolution.

Substantiated sexual harassment complaints are complaints containing at least one founded allegation of sexual harassment as documented in a report of investigation or inquiry. Substantiated complaints comprised 62 percent (326) of the 530 complaints resolved in FY16.

Unsubstantiated sexual harassment complaints are complaints without any founded allegations of sexual harassment as

documented in a report of investigation or inquiry. Thirty-eight percent (204) of the 530 alleged complaints resolved in FY16 were unsubstantiated.

Pending sexual harassment complaints are complaints that are still awaiting a case resolution decision. Twelve percent (71) of the 601 total complaints filed in FY16 were pending resolution at the end of the FY. See Table 1 for case disposition by Service.

Top Line Results

The Military Services and the NGB continue to employ Service-specific information management systems to collect, store, and analyze sexual harassment complaint information; this information is submitted annually to the DoD for compilation and analysis.

Complainant Characteristics

There were 365 complainants associated with the 326 substantiated cases. Complainants were predominantly female (294 of 365; 81 percent). Males made up nineteen percent (68 of 365) of complainants. Three complaints (one percent) were filed anonymously.

Enlisted members comprised 92 percent of complainants (334 of 365). Officers represent four percent of complainants (16 of 365). The pay grade category was unknown for four percent of complainants (15 of 365).

Service members in pay grades E1-E4 account for 72 percent of all complainants (263 of 365). The largest single grouping of complainants by gender and pay grade was females in pay grades E1-E4 (214 of 365; 59 percent). Additionally, enlisted males in the pay grades of E1-E4 account for 13 percent (49 of 365) of complainants.

Officer complainants were all female, predominately in the grade of O1-O3 (12 of 16; 75 percent). See Table 2 for complainant characteristics.

Offender Characteristics

There were 415 alleged offenders reported for 326 substantiated complaints. These individuals were predominantly male (396 of 415; 95 percent). Alleged female offenders made up five percent (19 of 415) of all alleged offenders.

Enlisted members comprised 85 percent of alleged offenders (353 of 415). Forty-two percent of all identified offenders were in the pay grade of E5-E6 (174 of 415). The largest single grouping of alleged offenders by gender and pay grade was males in pay grade E5-E6 (170 of 174; 98 percent).

Officers represent seven percent of alleged offenders (29 of 415) in which 66 percent were male in the pay grade of O1-O3 (19 of 29). One female officer alleged offender in the pay grade of O4-O6 was reported. Eight percent (33 of 415) of all alleged offenders were either civilian personnel or the employment type was unknown. See Table 3 for alleged offender characteristics.

Repeat alleged offenders, defined to have more than one complaint substantiated for sexual harassment, represent 11 percent of all alleged offenders (47 of 415).

Duty Status and Nature of Substantiated Incidents

Eighty-eight percent of substantiated incidents occurred on duty (287 of 326). Because substantiated complaints may involve multiple allegations of sexually harassing behavior, 475 types of allegations were reported. The most frequently reported allegations involved crude and/or offensive behavior (269 of 475; 57 percent). All other reported allegations were characterized as unwanted sexual attention (187 of 475; 39 percent) and sexual coercion (19 of 475; 4 percent).

Timeliness of Reporting and Investigation

DoD policy requires that, to the extent practicable, commanders will forward sexual harassment complaint information or allegations to a general court-martial convening authority (GCMCA) within 72 hours of receipt. Ninety-nine percent of all complaints (576 of 578) were forwarded to the GCMCA; 89 percent of these (514 of 578) were appropriately forwarded within 72 hours.

Accountability

Of the 415 alleged offenders, 52 alleged offenders were pending disciplinary actions at

the close of FY16. The remaining 363 alleged offenders received 369 corrective actions; offenders may receive more than one type of corrective action. For example, an alleged offender may receive a letter of reprimand, administrative actions, and non-judicial punishment. Out of 369 total corrective actions, 62 percent (228 of 369) were non-judicial punishments, 36 percent (134 of 369) were adverse or administrative actions (e.g., chapter discharge or letters of reprimand) and two percent (7 of 369) were punitive and included four courts-martial and three discharges in lieu of courts-martial.

Way Forward

Oversight Framework Enhancements

Recognizing the need for greater leadership commitment and accountability to promote, support, and enforce sexual harassment prevention and response policies and programs, the Department is updating its policy and oversight framework, to include problematic behaviors associated with social media and/or online misconduct. Enhancements include: clear definitions, standardized reporting procedures, and clear guidance for addressing incidents in joint environments, to incorporate best practices in prevention and training programs. Particular emphasis will be placed on enhancing prevention and response training and education, and standardizing data collection and tracking.

Training and Education

The Department continues to examine the efficacy of current sexual harassment prevention training and is engaged in collaborative efforts with the Services to emphasize sexual harassment prevention training during accessions and Professional Military Education, particularly for mid-tier enlisted Service members. Further, the Department will continue to investigate research opportunities to evaluate training currently being offered across the enterprise. This examination is expected to reveal how the training is received by the trainees, how it influences individual behaviors going forward, and the policy adjustments that are needed. The Department is developing a robust sexual harassment prevention strategy that will be informed by research, to address this problematic behavior; the strategy will also address social media and online misconduct.

Appendix I: Special Analysis on Social Media

Appendix I: Special Analysis on Social Media

Introduction

The 2016 *WGRA* included a series of metrics assessing behaviors in line with a sexually hostile work environment. The sexually hostile workplace construct includes two survey items related to social media misuse. These items asked members about experiences where someone from work either 1) took or shared sexually suggestive pictures or videos of them when they did not want them to or 2) displayed, showed, or sent sexually explicit materials like pictures or videos that made them uncomfortable, angry, or upset.

To help the Department get a general understanding of the degree in which sexual harassment occurs through social media, the first part of this analysis examines members who indicated experiencing either of these behaviors in the past 12 months (July 2015 through July 2016). The second part of the analysis compares awareness of social media misuse in the military, willingness to act to prevent sexual harassment, as well as their perceptions of sexual harassment in the military between those who indicated experiencing these behaviors and those who did not. The analysis also examines significant differences within Services on perceptions. While this analysis does not cover the complete population (e.g., members who are not aware of their pictures/videos being shared without their consent), understanding these differences may help the Department target support efforts to those who indicated having been sexually harassed via social media.

Summary of Findings

In 2016, 1.3% of DoD women and 0.3% of DoD men indicated that someone from work either took or shared sexually suggestive pictures or videos of them without their consent. Additionally, 4.0% of DoD women and 1.4% of DoD men indicated that someone from work displayed, showed, or sent explicit materials to them that made them uncomfortable, angry or upset. Further analysis of this population indicate those affected by the misuse were more likely to believe there was not a formal policy regarding proper use of social media in their office. However, when there is a social media policy in place, regardless of experiencing behaviors in-line with social media misuse, two-thirds or more of members generally comply with the policy.

Members who experienced these behaviors were more likely to indicate they were aware of social media misuse that targeted certain individuals and organizations in the military. Women who experienced someone from work either taking or sharing sexually suggestive pictures or videos of them without their consent were more likely to notify a military peer or someone in their chain of command, while there were no differences among men suggesting that women are more likely to come forward. Men who experienced someone sending them explicit materials were also less likely to notify anyone in their chain of command or other high-ranking person or group suggesting they wanted to keep this behavior to themselves rather than risk getting in trouble.

This analysis also shows that experiencing either of the behaviors negatively impacts a member's perception of sexual harassment as compared to two years ago.¹ Lastly, results show that members who experienced either of the behaviors are less willing to act to prevent sexual harassment from happening to others. The following sections of this appendix provide more details on these findings.

Sexually Hostile Workplace Behaviors Related to Social Media Use

In this first section, results on the percentage of DoD active duty members who indicated experiencing behaviors regarding someone from work either *taking or sharing sexually suggestive pictures or videos of them* and *someone from work displaying or sending sexually explicit materials* are discussed. It should be noted that these results do not summarize the entire situation in the DoD but provides a general picture. For example, some members may not have been aware of their pictures/videos being shared with others and therefore would not be included in this analysis.

Experience of Someone From Work Taking or Sharing Sexually Suggestive Pictures or Videos of You

One of the sexually hostile work environment behaviors asked if members experienced **someone from work either taking or sharing sexually suggestive pictures or videos of them when they did not want them to** and it made them uncomfortable, angry, or upset. In 2016, 1.3% of DoD women and 0.3% of DoD men indicated they **experienced this behavior** (Figure 1). Marine Corps (2.3%) and Navy women (1.6%) were *more likely* than women in the other Services to indicate experiencing **someone from work either taking or sharing sexually suggestive pictures or videos of them**, while women in the Air Force (0.5%) were *less likely*. For men, Air Force men (0.2%) were *less likely* than men in the other Services to indicate **experiencing this behavior**.

Figure 1: Experienced Someone From Work Taking or Sharing Sexually Suggestive Pictures or Videos

¹ On the survey, members were asked to indicate their perception of sexual harassment in the military as being better or worse than compared to the two years prior.

Experience of Someone From Work Displaying, Showing, or Sending Sexually Explicit Materials Like Pictures or Videos

Another behavior asked if members experienced **someone from work displaying, showing, or sending sexually explicit materials like pictures or videos** that made them uncomfortable, angry, or upset. In 2016, 4.0% of DoD women and 1.4% of DoD men indicated they **experienced this behavior** (Figure 2). Marine Corps (6.0%), Navy (5.0%), and Army women (4.5%) were *more likely* than women in the other Services to indicate experiencing **someone from work displaying, showing, or sending sexually explicit materials**, while women in the Air Force (2.1%) were *less likely*. For men, Army (1.7%) and Navy men (1.6%) were *more likely* than men in the other Services to indicate **experiencing this behavior**, while Air Force men (0.7%) were *less likely*.

Figure 2: Experienced Someone From Work Displaying, Showing, or Sending Sexually Explicit Pictures or Videos

Social Media Use in the Military

On the 2016 WGRA, members were asked questions regarding social media use in their workplace. Questions included whether their workplace has a formal policy on use of social media sites and their perception of whether military members comply with such policy. They were also asked whether they were aware of a Service member misusing social media to ridicule, abuse, stalk, or harm other members, leadership, their Service, or the DoD. If they were aware of misuse of social media, they were also asked to indicate whom they notified about the misuse.

This section takes a closer look at these social media perceptions by those who did and did not experience the behaviors where someone from work took or shared sexually suggestive pictures or videos of the member and experiences where someone from work displayed or sent sexually explicit materials (as discussed in the last section). Differences within Services by gender will also be discussed when such differences exist.

Formal Policy on Social Media Use in the Workplace

Shown in Figure 3 are percentages of DoD members who indicated their workplace has a formal policy on use of social media by members who experienced or did not experience having pictures/videos of them taken or shared. In 2016, DoD women who indicated pictures/videos of them were taken/shared were *less likely* to indicate their **workplace has a formal policy on use of social media** (42%), while women who did not experience the behavior were *more likely* (55%). For DoD men, those who indicated pictures/videos of them were taken/shared were *less likely* to indicate their **workplace has a formal policy on use of social media** (43%), while men who did not experience the behavior were *more likely* (66%).

Women in the Navy who did not experience having pictures/videos of them being taken/shared (60%) were *more likely* to indicate their **workplace has a formal policy on use of social media**, while Navy women who did experience this behavior (39%) were *less likely*. Army (65%) and Air Force (61%) men who did not experience having pictures/videos of them being taken/shared were *more likely* to indicate their **workplace has a formal policy on use of social media**, while Army (36%) and Air Force (36%) men who did experience this behavior were *less likely*. There were no differences between Services for DoD women and DoD men.

Margins of error range from ±1 to ±17

Figure 3: Workplace Has Formal Policy on Use of Social Media Sites by Experienced/Did Not Experience Having Pictures/Videos of Them Taken/Shared

Of those who indicated their workplace has a formal policy on use of social media sites, members were asked about their perception of whether their work group complies with the policy. For DoD women, there was no impact of experiencing someone taking/sharing pictures/videos of them on their perceptions of **compliance with policy on social media** (Figure 4). However, Air Force women (88%) who experienced someone taking/sharing pictures/videos of them were more likely than women in the other Services to indicate **members generally comply with policy on social media use**. For DoD men, members who did not experience someone taking/sharing pictures/videos of them (84%) were *more likely* to indicate **members generally comply with policy on social media use**, while those who experienced

someone taking/sharing pictures/videos of them (72%) were *less likely*. There were no significant differences between Services for men.

Figure 4: Members Generally Comply With Policy on Social Media Use by Experienced/Did Not Experience Having Pictures/Videos of Them Taken/Shared

Shown in Figure 5 are percentages of DoD members who indicated their workplace has a formal policy on use of social media by those who experienced/did not experience being shown/sent sexually explicit materials. In 2016, DoD women who indicated they were shown/sent sexually explicit materials were *less likely* to indicate their **workplace has a formal policy on use of social media** (40%), while women who did not experience the behavior were *more likely* (56%). For DoD men, those who indicated they were shown/sent sexually explicit materials were *less likely* to indicate their **workplace has a formal policy on use of social media** (45%), while men who did not experience the behavior were *more likely* (66%).

Women and men across all Services (except Marine Corps women) who did not experience having pictures/videos of them being taken/shared were *more likely* to indicate their **workplace has a formal policy on use of social media**, while those who experienced this behavior were *less likely*. For DoD women, when comparing those who indicated they were shown/sent sexually explicit materials, Air Force women (33%) who experienced this behavior were *less likely* than women in the other Services to indicate their **workplace has a formal policy on use of social media**. There were no significant differences between Services for men.

Margins of error range from ±1 to ±11

Figure 5: Workplace Has Formal Policy on Use of Social Media Sites by Experienced/Did Not Experience Being Shown/Sent Sexually Explicit Materials

Of those who indicated their workplace has a formal policy on use of social media sites, members were asked their perception of whether their work group complies with the policy. For DoD women, members who did not experience being shown/sent sexually explicit materials (79%) were *more likely* to indicate **members generally comply with policy on social media use**, while those who experienced being shown/sent sexually explicit materials (66%) were *less likely* (Figure 6). For DoD men, members who did not experience someone being shown/sent sexually explicit materials (84%) were *more likely* to indicate **members generally comply with policy on social media use**, while those who experienced being shown/sent sexually explicit materials (70%) were *less likely*.

Margins of error range from ±1 to ±14

Figure 6: Members Generally Comply With Policy on Social Media Use by Experienced/Did Not Experience Being Shown/Sent Sexually Explicit Materials

In summary, regardless of experiencing any unwanted gender-related behaviors, between 40% and 66% of DoD women and men indicated their workplace had a formal policy on social media use. In an age where social media is widely used on both work and personal devices, more workplaces should have formal policies in place for members to abide by when using social media.

DoD women and men who experience unwanted gender-related behaviors associated with social media misuse were less likely to indicate their workplace has a formal policy on the use of social media sites. These results could lead to two conclusions:

1. Those affected by misuse of social media were more likely to believe there is not a formal policy regarding proper use of social media in their office, and/or
2. Members may think their workplace has a policy on social media use, but once personally affected by social media misuse, realize there is not a formal policy in place.

Another interesting finding showed that when there is a social media policy in place, members indicated everyone generally complies with the policy even if they indicated they had experienced behaviors qualifying as social media misuse. This finding may point to this issue not being as widespread as thought.

Awareness of Social Media Misuse in the Military

Members were asked to indicate their level of awareness of Service members misusing social media to ridicule, abuse, stalk, or harm another military member, their chain of command, their Service, or the DoD as a whole. This section takes a closer look at awareness of social media misuse by those who did and did not experience the two sexually hostile workplace behaviors where someone from work took or shared sexually suggestive pictures or videos of the member and someone from work displayed or sent sexually explicit materials.

DoD women and DoD men who experienced someone from work either taking or sharing sexually suggestive pictures or videos of them were *more likely* than those who did not experience this behavior to indicate they **were aware of a Service member misusing social media to ridicule, abuse, stalk, or harm all groups listed** (Figure 7). Specifically, women (35%) and men (37%) who indicated pictures/videos of them were taken/shared were *more likely* to indicate they were aware of a Service member misusing social media to target **another military member**, while women (11%) and men (9%) who did not experience the behavior were *less likely*. Women (19%) and men (25%) who experienced the behavior were *more likely* to indicate they were aware of a Service member misusing social media to target **their chain of command**, while women and men (both 6%) who did not experience the behavior were *less likely*. Women (23%) and men (33%) who experienced someone taking/sharing pictures/videos of them were *more likely* to indicate they were aware of a Service member misusing social media to target **their Service**, while women and men (both 9%) who did not experience the behavior were *less likely*. Finally, women (20%) and men (36%) who experienced the behavior were *more likely* to indicate they were aware of a Service member misusing social media to target **the DoD as a whole**, while women and men (both 8%) who did not experience the behavior were *less likely*.

Figure 7: Awareness of Social Media Misuse by Experienced/Did Not Experience Having Pictures/Videos of Them Taken/Shared

As shown in Table 1, in general, DoD women who indicated having pictures/videos of them taken or shared had an impact on their awareness of social media misuse by Service members **across all targets**. For example, Army (31%), Navy (35%), and Air Force (31%) women who indicated having pictures/videos of them taken/shared were *more likely* to indicate awareness of a Service member misusing social media targeting **another Service member**, while Army (12%), Navy (13%), and Air Force (8%) women who did not indicate experiencing the behavior were *less likely*.

Women in the Marine Corps who indicated having pictures/videos of them taken/shared were *more likely* than women in the other Services to indicate awareness of a Service member misusing social media to target: **their chain of command** (37%), **their Service** (44%), and **the DoD as a whole** (38%). Army women who experienced the behavior (12%) were *less likely*

than women in the other Services to indicate awareness of a Service member misusing social media to target **their Service**.

For DoD men who indicated having pictures/videos of them taken or shared, experiencing the behavior had an impact on Army and Air Force men's' awareness of social media misuse by Service members **across all targets**. For example, Army (45%) and Air Force (40%) men who indicated having pictures/videos of them taken/shared were *more likely* to indicate awareness of a Service member misusing social media targeting **another Service member**, while Army (9%) and Air Force (6%) men who did not indicate experiencing the behavior were *less likely*.

Army men who indicated having pictures/videos of them taken/shared were *more likely* than men in the other Services to indicate awareness of a Service member misusing social media to target **their chain of command** (35%).

DoD women and DoD men who experienced someone from work displaying, showing, or sending sexually explicit materials like pictures or videos were *more likely* than those who did not experience this behavior to indicate they **were aware of a Service member misusing social media to ridicule, abuse, stalk, or harm all groups listed** (Figure 8). Specifically, women (33%) and men (28%) who indicated being shown/sent sexually explicit materials were *more likely* to indicate they were aware of a Service member misusing social media to target **another military member**, while women (11%) and men (8%) who did not experience the behavior were *less likely*. Women (17%) and men (18%) who experienced the behavior were *more likely* to indicate they were aware of a Service member misusing social media to target **their chain of command**, while women and men (both 6%) who did not experience the

behavior were *less likely*. Women (21%) and men (22%) who indicated being shown/sent sexually explicit materials were *more likely* to indicate they were aware of a Service member misusing social media to target **their Service**, while women and men (both 9%) who did not experience the behavior were *less likely*. Finally, women (17%) and men (22%) who experienced the behavior were *more likely* to indicate they were aware of a Service member misusing social media to target **the DoD as a whole**, while women and men (both 8%) who did not experience the behavior were *less likely*.

Margins of error range from ± 1 to ± 5

Figure 8: Awareness of Social Media Misuse by Experienced/Did Not Experience Being Shown/Sent Sexually Explicit Materials

As shown in Table 2, in general, DoD women who indicated being shown/sent sexually explicit materials had an impact on their awareness of social media misuse by Service members **across all targets**. For example, Army (36%), Navy (31%), Marine Corps (39%), and Air Force (28%) women who indicated having pictures/videos of them taken/shared were *more likely* to indicate awareness of a Service member misusing social media targeting **another Service member**, whereas Army (11%), Navy (12%), Marine Corps (18%), and Air Force (7%) women who did not indicate experiencing the behavior were *less likely*.

DoD men who indicated being shown/sent sexually explicit materials had an impact on their awareness of social media misuse by Service members **across all targets**. For example, Army (27%), Navy (27%), Marine Corps (31%), and Air Force (29%) men who indicated being shown/sent sexually explicit materials were *more likely* to indicate awareness of a Service member misusing social media targeting **another Service member**, whereas Army (9%), Navy (9%), Marine Corps (10%), and Air Force (6%) men who did not indicate experiencing the behavior were *less likely*.

There were no significant differences with Services on awareness of social media misuse.

<i>Margins of error</i>		±1–7	±1–8	±1–11	±1–8

DoD members who indicated they were aware of a Service member misusing social media sites were asked if they notified anyone of such misuse. Of the DoD members who indicated experiencing someone from work taking/sharing sexually suggestive pictures/videos of them, and were aware of social media misuse by a Service member, 70% of DoD women and 51% of DoD men indicated they notified **a military peer** of the misuse (Figure 9). Over half (55%) of women and 45% of men who experienced someone from work taking/sharing pictures/videos of them and knew of a Service member misusing social media indicated they notified **a member of their chain of command** of the misuse. Forty-two percent of women and 37% of men indicated they told **another leader outside of their chain of command** about social media misuse, while 23% of women and 28% of men indicated they notified **their Service's Inspector General office**, and 37% of women and 40% of men notified **some other person or office**.

DoD women who experienced having pictures/videos of them taken/shared were *more likely* to indicate they notified **a military peer** (70%) or **a member of their chain of command** (55%) of social media misuse. Conversely, women who did not experience the behavior were *less likely* to notify **a military peer** (56%) or **a member of their chain of command** (38%) of social media misuse. There were no significant differences between men who experienced or did not experience having pictures/videos of them taken/shared on who they notified regarding social media misuse.

Figure 9: Notified Individual(s) of Social Media Misuse by Experienced/Did Not Experience Having Pictures/Videos of Them Taken/Shared

Overall, Service-level data from those who indicated experiencing someone from work taking/sharing sexually suggestive pictures or videos of them on who they notified regarding social media misuse were largely not reportable, with the exception of Army women and men (Table 3). Army women who experienced pictures/videos of them being taken/shared were *more likely* to notify **a military peer** (85%) or **a member of their chain of command** (78%) about a Service member misusing social media. Conversely, Army women who did not experience the unwanted behavior were *less likely* (57% for notifying **a military peer** and 40% for notifying **a member in their chain of command**). Army women who experienced pictures/videos of them being taken/shared were also more likely than women in the other Services to indicate they notified **a military peer** or **a member of their chain of command**. There were no significant differences for men who experienced or did not experience having pictures/videos of them taken/shared on who they notified regarding social media misuse.

<i>Margins of error</i>		±2–17	±3	±3	±2–3

Of the DoD members who indicated experiencing someone from work displaying, showing, or sending them sexually explicit materials, and were aware of social media misuse by a Service member, 60% of DoD women and 50% of DoD men indicated they notified **a military peer** of the misuse (Figure 10). More than a third (39%) of women and men (35%) who experienced someone from work showing/sending them sexually explicit materials and knew of a Service member misusing social media indicated they notified **a member of their chain of command** of the misuse. More than one-quarter (27%) of women and men (26%) indicated they told **another leader outside of their chain of command** about social media misuse, while 13% of women and 17% of men indicated they notified **their Service's Inspector General office**, and 31% of women and 30% of men notified **some other person or office**.

DoD men who experienced someone from work showing/sending them sexually explicit materials were *less likely* to indicate they notified all individuals except for a military peer, whereas men who did not experience the behavior were *more likely*. Specifically, men who experienced being shown/sent sexually explicit materials were *less likely* to notify **a member of their chain of command** (35%) or **another leader outside of their chain of command** (26%) of social media misuse. Conversely, men who did not experience the behavior were *more likely* (45% for **a member of their chain of command** and 35% for **another leader outside of their chain of command**). Men who experienced being shown/sent sexually explicit materials were *less likely* to notify **their Service's Inspector General office** (17%) or **some other person or office** (30%) of social media misuse, whereas men who did not experience the behavior were

more likely (27% for **their Service's Inspector General office** and 37% for **some other person or office**). There were no significant differences between women who experienced or did not experience having someone from work showing/sending them sexually explicit materials on who they notified regarding social media misuse.

Margins of error range from ± 2 to ± 8

Figure 10: Notified Individual(s) of Social Media Misuse by Experienced/Did Not Experience Being Shown/Sent Sexually Explicit Materials

Navy (15%) and Air Force (16%) men who experienced being shown/sent sexually explicit materials were *less likely* to indicate they notified **another leader outside of their chain of command** of social media misuse, while Navy (31%) and Air Force (30%) men who did not experience the behavior were *more likely*. Men in the Army (19%), Navy (12%), and Air Force (7%) who experienced being shown/sent sexually explicit materials were *less likely* to indicate they notified **their Service's Inspector General office**, whereas men in the Army (29%), Navy (23%), and Air Force (25%) who did not experience the behavior were *more likely*. Men in the Army (28%) who experienced being shown/sent sexually explicit materials were *less likely* to indicate they notified **some other person or office** of social media misuse, while men in the Army (38%) who did not experience this behavior were *more likely*.

Comparing responses within the Services, Navy men who experienced someone from work showing/sharing sexually explicit materials (15%) were *less likely* than men in the other Services to indicate they notified **another leader outside of their chain of command** of social media misuse. Air Force men who experienced someone from work showing/sharing sexually explicit materials (7%) were *less likely* than men in the other Services to indicate they notified **their Service's Inspector General office** of social media misuse. There were no significant differences for women who experienced or did not experience having someone from work show/send them sexually explicit materials on who they notified regarding social media misuse.

<i>Margins of error</i>		±2–11	±3–14	±3	±2–14

In summary, members who have fallen victim to misuse of social media sites were more likely to indicate they were aware of a Service member misusing social media sites to target a certain person or groups of people. Women who experienced someone from work taking or sharing sexually suggestive pictures or videos of them when they did not want them to were more likely than those who didn't experience the behavior to notify a military peer or someone in their chain of command, while there were no differences for men who did and did not experience the behavior. This suggests women were more likely to come forward if they experience this behavior, but there is room for improvement to increase notification of social media misuse up the chain.

However, for those who experienced someone from work showing or sharing sexually explicit materials, men were less likely to notify anyone in their chain of command or other higher-ranking person or group (e.g., Inspector General). This could suggest men shown these materials were more apt to keep the behavior to themselves in fear of getting in trouble themselves.

Impact of Falling Victim to Social Media Misuse on Perceptions of and Willingness to Act to Prevent Sexual Harassment in the Military

Research on sexual harassment has found support for the relationship between organizational climate and culture and unwanted gender-related behaviors (e.g., sexual harassment and sexual assault). Studies of sexual harassment and perceptions of culture and climate (i.e., leadership tolerance for harassing behaviors) have found positive relationships between culture and climate and frequency of sexual harassment (Fitzgerald, Drasgow, & Magley, 1999; Newell, Rosenfeld, & Culbertson, 1995; Williams, Fitzgerald, & Drasgow, 1999). Research in the civilian sector has also found organizational factors in civilian workplaces that increase the likelihood for unwanted gender-related behaviors to occur. These factors include a climate tolerant of sexual harassment, permissive leadership attitudes toward sexual harassment, imbalanced gender ratios, high power differentials between men and women, and the presence of other types of discrimination (based on gender or based on other characteristics such as race/ethnicity; Bell, Quick and Cychota, 2002; Fitzgerald, Swan, & Fischer, 1995; Harned, Ormerod, Palmieri, Collinsworth, & Reed, 2002).

Based on this research, the next section examines the effect experiencing unwanted gender-related behaviors involving social media misuse has on members' perceptions of sexual harassment in the military and their willingness to act to prevent such behaviors. Similar to the earlier sections, results are analyzed by whether or not members indicated experiencing someone from work either 1) taking or sharing sexually suggestive pictures or videos of them when they did not want them to or 2) displaying, sharing, or sending sexually explicit materials.

Perceptions of Sexual Harassment in the Military

This section examines members who indicated experiencing someone from work taking or sharing sexually suggestive pictures or videos of them compared to those who did not experience this behavior to see if they varied in their perceptions of sexual harassment as a problem in the military compared to two years ago. On the survey, all active duty members were asked "In your opinion, has sexual harassment in the military become more or less of a problem over the last 2 years?"

As shown in Figure 11, DoD women (31%) who indicated experiencing someone from work taking or sharing sexually suggestive pictures or videos of them were *more likely* to indicate sexual harassment is **more of a problem today** than compared to two years ago. Conversely, women (25%) who did not indicate experiencing this behavior were *more likely* to indicate sexual harassment is **less of a problem today**, while women who did experience this behavior (10%) were *less likely*. There were similar patterns among women in all of the Services. Overall, women in all Services who indicated experiencing someone from work taking or sharing sexually suggestive pictures or videos of them were *more likely* to perceive sexual harassment in the military as **more of a problem today**. Women in the Services who indicated experiencing the behavior were *less likely* to perceive sexual harassment as **less of a problem today**, whereas women in each of the Services who did not indicate experiencing the behavior were *more likely*. These results suggest experiencing behaviors in line with unwanted gender-related behavior influences a member's perception of how large of a problem sexual harassment is in the military.

Figure 11: Perceptions of Sexual Harassment in the Military by Experienced/Did Not Experience Having Pictures/Videos of Them Taken/Shared for DoD Women

As shown in Figure 12, results for DoD men are similar to those of DoD women. DoD men (30%) who indicated experiencing someone from work taking or sharing sexually suggestive pictures or videos of them were *more likely* to indicate sexual harassment is **more of a problem today** than compared to two years ago. Conversely, men (40%) who did not indicate experiencing this behavior were *more likely* to indicate sexual harassment is **less of a problem today**, while men who indicated experiencing this behavior (21%) were *less likely*. There were similar patterns among men in the Army and Air Force. Results for Navy and Marine Corps men who indicated experiencing someone from work taking or sharing pictures or videos of them were not reportable, and therefore comparisons cannot be made.

Figure 12: Perceptions of Sexual Harassment in the Military by Experienced/Did Not Experience Having Pictures/Videos of Them Taken/Shared for DoD Men

There were similar patterns when analyzing those who did or did not experience someone from work displaying, sharing, or sending sexually explicit materials to the member. One-quarter (25%) of women who indicated experiencing someone from work sharing/sending sexually explicit materials were *more likely* to indicate sexual harassment is **more of a problem today** compared to two years ago (Figure 13). Conversely, women who did not indicate experiencing this behavior (26%) were *more likely* to indicate sexual harassment is **less of a problem today**, while women who indicated experiencing the behavior (13%) were *less likely*. There were similar patterns among women in all of the Services. For Service differences, Marine Corps women who indicated experiencing someone from work sharing/sending sexually explicit materials to them (7%) were *less likely* than women in the other Services to indicate sexual harassment is **less of a problem today** compared to two years ago.

Figure 13: Perceptions of Sexual Harassment in the Military by Experienced/Did Not Experience Being Shown/Sent Sexually Explicit Materials for DoD Women

Continuing the same pattern of responses, men who indicated experiencing someone from work sharing/sending sexually explicit materials (22%) were *more likely* to indicate sexual harassment is **more of a problem today** compared to two years ago (Figure 14). Conversely, men who did not indicate experiencing this behavior (40%) were *more likely* to indicate sexual harassment is **less of a problem today**, while men who did indicated experiencing the behavior (23%) were *less likely*. The same pattern of responses exists among men in each Service.

For Service differences, Army men who indicated experiencing someone from work sharing/sending sexually explicit materials to them (28%) were *more likely* than men in the other Services to indicate sexual harassment **more of a problem today** compared to two years ago.

Figure 84: Perceptions of Sexual Harassment in the Military by Experienced/Did Not Experience Being Shown/Sent Sexually Explicit Materials for DoD Men

To summarize, for both women and men, survey results suggest when members indicate experiencing behaviors in line with sexual harassment influences a member's perception of whether sexual harassment is better or worse than two years prior.

Culture: Willingness to Act to Prevent Unwanted Gender-Related Behaviors

On the 2016 WGRA, members were asked to what extent they would be willing to act to prevent unwanted gender-related behaviors (Q204). This section looks at whether experiencing unwanted gender-related behaviors involving social media misuse has an impact on whether or not a member is willing to act to prevent unwanted gender-related behaviors compared to those who did not experience such behaviors. Results are shown for those who did or did not experience either 1) taking or sharing sexually suggestive pictures or videos of them when they did not want them to or 2) displaying, sharing, or sending sexually explicit materials.

Overall, DoD women who indicated experiencing someone from work taking or sharing sexually suggestive pictures or videos of them were *less likely* to indicate they were **willing to act to prevent unwanted gender-related behaviors** to a *large extent*, while women who did not indicate experiencing the behavior were *more likely* (Figure 15). Specifically, women who indicated experiencing someone from work taking/sharing pictures/videos of them (69%) were *less likely* to indicate they would **point out to someone when they think they “crossed the line” with gender-related comments or jokes** to a *large extent*, while women who did not indicate experiencing this behavior (77%) were *more likely*. Similarly, women who indicated experiencing someone from work taking/sharing pictures/videos of them (66%) were *less likely* to indicate they would **encourage others to point out to someone when they think he or she “crossed the line” with gender-related comments or jokes** to a *large extent*, while women who did not indicate experiencing this behavior (78%) were *more likely*. Lastly, women who indicated experiencing the behavior (53%) were *less likely* to indicate they were willing to **seek help from chain of command to confront members who continue to engage in sexual**

harassment to a large extent, while women who did not indicate experiencing the behavior (75%) were *more likely*. In addition, women who indicated experiencing this behavior (15%) were *more likely* to indicate they would *not at all seek help from chain of command to confront members who continue to engage in sexual harassment*, while women who did not indicate experiencing the behavior (4%) were *less likely*.

Figure 15: Willingness to Act to Prevent Unwanted Gender-Related Behaviors by Experienced/Did Not Experience Having Pictures/Videos of Them Taken/Shared for DoD Women

When looking at results for women by Service, the only prevention response to show significant differences among those who indicated experiencing or did not indicate experiencing someone from work taking/sharing pictures/videos of them was to **seek help from chain of command to confront members who continue to engage in sexual harassment** (Table 5). Women in the Army (56%), Navy (49%), and Air Force (56%) who indicated experiencing having their pictures/videos taken/shared were *less likely* to indicate they would **seek help from chain of command to confront members who continue to engage in sexual harassment to a large extent**. Conversely, women in the Army (76%), Navy (73%), and Air Force (78%) who did not indicate experiencing this behavior were *more likely* to indicate they would **seek help from chain of command to confront members who continue to engage in sexual harassment to a large extent**. Women in the Army who indicated experiencing this behavior (15%) were also *more likely* to indicate they would *not at all seek help from chain of command to confront members who continue to engage in sexual harassment*.

There were no significant differences between Services for women who did and did not experience having their pictures/videos taken/shared on their willingness to act to prevent unwanted gender-related behaviors.

Table 5: Willingness to Act to Prevent Unwanted Gender-Related Behaviors by Experienced/Did Not Experience Having Pictures/Videos of Them Taken/Shared for DoD Women, by Service

	Did not experience	5	5	5	3
<i>Margins of error</i>		±2–11	±3–14	±3	±2–14

Similar to DoD women responses, DoD men who indicated experiencing someone from work taking or sharing sexually suggestive pictures or videos of them were *less likely* to indicate they would be **willing to act to prevent unwanted gender-related behaviors** to a *large extent*, while men who did not indicate experiencing the behavior were *more likely* (Figure 16). Specifically, men who indicated experiencing someone from work taking/sharing pictures/videos of them (54%) were *less likely* to indicate they would **point out to someone when they think they “crossed the line” with gender-related comments or jokes** to a *large extent*, while men who did not indicate experiencing this behavior (81%) were *more likely*. Similarly, men who indicated experiencing someone from work taking/sharing pictures/videos of them (54%) were *less likely* to indicate they would **encourage others to point out to someone when they think he or she “crossed the line” with gender-related comments or jokes** to a *large extent*, while men who did not indicate experiencing this behavior (80%) were *more likely*. Lastly, men who

indicated experiencing the behavior (50%) were *less likely* to indicate they would be willing to **seek help from chain of command to confront members who continue to engage in sexual harassment** to a *large extent*, while men who did not indicate experiencing the behavior (82%) were *more likely*.

In addition, men who indicated experiencing someone from work taking or sharing sexually suggestive pictures or videos of them were *more likely* to indicate they would be *not at all* **willing to act to prevent unwanted gender-related behaviors**, while men who did not indicate experiencing the behavior were *less likely*. Specifically, men who indicated experiencing this behavior were *more likely* to indicate they would *not at all* **point out to someone when they think they “crossed the line” with gender-related comments or jokes** (17%) or *not at all* **encourage others** to do the same (16%), compared to only 3% for men who did not indicate experiencing the behavior. Lastly, men who indicated experiencing this behavior (24%) were *more likely* to indicate they would *not at all* **seek help from chain of command to confront members who continue to engage in sexual harassment**, compared to only 3% for men who did not indicate experiencing the behavior.

Figure 16: Willingness to Act to Prevent Unwanted Gender-Related Behaviors by Experienced/Did Not Experience Having Pictures/Videos of Them Taken/Shared for DoD Men

Results for men by Service are largely not reportable on their willingness to act to prevent unwanted gender-related behaviors, with few exceptions for Army and Air Force men (Table 6). Across all three of the prevention behaviors, Army men who indicated experiencing someone from work taking/sharing their pictures/videos were *less likely* to indicate they were **willing to act to prevent unwanted gender-related behaviors** to a *large extent*, while those who did not indicate experiencing the behavior were *more likely*. Similarly, Army men who indicated experiencing the behavior were more likely to be *not at all* **willing to act to prevent unwanted gender-related behaviors**. Air Force men who indicated experiencing their pictures/videos being taken/shared were more likely to be *not at all* willing to **point out to someone when they think they “crossed the line” with gender-related comments or jokes** (11%) and would *not at all* **seek help from chain of command to confront members who continue to engage in sexual harassment** (20%).

Table 6: Willingness to Act to Prevent Unwanted Gender-Related Behaviors by Experienced/Did Not Experience Having Pictures/Videos of Them Taken/Shared for DoD Men, by Service

Lastly, this section looks at the same prevention behaviors by indicated experiencing or not experiencing the unwanted behavior of someone from work displaying, sharing, or sending sexually explicit materials.

Overall, DoD women who indicated experiencing someone from work showing/sending them sexually explicit materials were *less likely* to indicate they were **willing to act to prevent unwanted gender-related behaviors** to a *large extent*, while women who did not indicate experiencing the behavior were *more likely* (Figure 17). Specifically, women who indicated experiencing someone from work showing/sending them sexually explicit materials (60%) were *less likely* to indicate they would **point out to someone when they think they “crossed the line” with gender-related comments or jokes** to a *large extent*, while women who did not indicate experiencing this behavior (78%) were *more likely*. Similarly, women who indicated

experiencing someone from work showing/sending them sexually explicit materials (63%) were *less likely* to indicate they would **encourage others to point out to someone when they think he or she “crossed the line” with gender-related comments or jokes** to a *large extent*, while women who did not indicate experiencing this behavior (78%) were *more likely*. Lastly, women who indicated experiencing the behavior (51%) were *less likely* to indicate they would be willing to **seek help from chain of command to confront members who continue to engage in sexual harassment** to a *large extent*, while women who did not indicate experiencing the behavior (76%) were *more likely*.

In addition, women who indicated experiencing someone from work showing/sending them sexually explicit materials were *more likely* to indicate they would be *not at all willing to act to prevent unwanted gender-related behaviors*, while women who did not indicate experiencing the behavior were *less likely*. Specifically, women who indicated experiencing this behavior were *more likely* to indicate they would *not at all point out to someone when they think they “crossed the line” with gender-related comments or jokes* or *not at all encourage others* to do the same (both 4%), compared to only 2% for women who did not indicate experiencing the behavior. Lastly, women who indicated experiencing this behavior (14%) were *more likely* to indicate they would *not at all seek help from chain of command to confront members who continue to engage in sexual harassment*, compared to only 4% for women who did not indicate experiencing the behavior.

Figure 17: Willingness to Act to Prevent Unwanted Gender-Related Behaviors by Experienced/Did Not Experience Being Shown/Sent Sexually Explicit Materials for DoD Women

When looking at women by Service, the same pattern of responses were found for Army, Navy, and Air Force women for all three actions: those who indicated experiencing being shown/sent sexually explicit materials were *less likely* to be **willing to act to prevent unwanted gender-related behaviors** to a *large extent* (Table 7). Marine Corps women showed the same pattern of response, but only for being willing to **seek help from the chain of command in confronting others who continue to engage in sexual harassment**. Women in the Army (13%), Navy (17%), and Air Force (15%) who indicated experiencing the unwanted behavior

were *more likely* to indicate they would *not at all* **seek help from chain of command to confront members who continue to engage in sexual harassment**.

Comparing results between the Services, Navy women who indicated experiencing someone from work showing/sending them sexually explicit materials were *less likely* than women in the other Services to indicate they would be willing to **point out to someone when they think they “crossed the line” with gender-related comments or jokes or encourage others** to do the same to a *large extent*.

Table 7: Willingness to Act to Prevent Unwanted Gender-Related Behaviors by Experienced/Did Not Experience Being Shown/Sent Sexually Explicit Materials for DoD Women, by Service

	Did not experience	4	4	5	3
Margins of error		±1–5	±1–8	±1–8	±1–8

Like the results for DoD women, the same pattern of responses were found among DoD men. DoD men who indicated experiencing someone from work showing/sending them sexually explicit materials were *less likely* to indicate they were **willing to act to prevent unwanted**

gender-related behaviors to a *large extent*, while men who did not indicate experiencing the behavior were *more likely* (Figure 18). Specifically, men who indicated experiencing someone from work showing/sending them sexually explicit materials (59%) were *less likely* to indicate they would **point out to someone when they think they “crossed the line” with gender-related comments or jokes** to a *large extent*, while men who did not indicate experiencing this behavior (81%) were *more likely*. Similarly, men who indicated experiencing someone from work showing/sending them sexually explicit materials (59%) were *less likely* to indicate they would **encourage others to point out to someone when they think he or she “crossed the line” with gender-related comments or jokes** to a *large extent*, while men who did not indicate experiencing this behavior (80%) were *more likely*. Lastly, men who indicated experiencing the behavior (53%) were *less likely* to indicate they would be willing to **seek help from chain of command to confront members who continue to engage in sexual harassment** to a *large extent*, while men who did not indicate experiencing the behavior (82%) were *more likely*.

In addition, men who indicated experiencing someone from work showing/sending them sexually explicit materials were *more likely* to indicate they would be *not at all willing to act to prevent unwanted gender-related behaviors*, while men who did not indicate experiencing the behavior were *less likely*. Specifically, men who indicated experiencing this behavior were *more likely* to indicate they would *not at all point out to someone when they think they “crossed the line” with gender-related comments or jokes* (7%) or *not at all encourage others* to do the same (9%), compared to only 3% of men who did not indicate experiencing the behavior. Lastly, men who indicated experiencing this behavior (14%) were *more likely* to indicate they would *not at all seek help from chain of command to confront members who continue to engage in sexual harassment*, compared to only 3% of men who did not indicate experiencing the behavior.

Figure 18: Willingness to Act to Prevent Unwanted Gender-Related Behaviors by Experienced/Did Not Experience Being Shown/Sent Sexually Explicit Materials for DoD Men

When looking at men by Service, the same pattern of responses were found for men in all Services across all three actions: those who experience being shown/sent sexually explicit

materials were *less likely* to be **willing to act to prevent unwanted gender-related behaviors to a large extent** (Table 8). Men in all Services who indicated experiencing the unwanted behavior were also *more likely* to indicate they would *not at all* **seek help from chain of command to confront members who continue to engage in sexual harassment**. Air Force men who indicated they experienced the unwanted behavior (8%) were also *more likely* to indicate they would *not at all* be willing to **encourage others to point out to someone when they think he or she “crossed the line” with gender-related comments or jokes**.

Comparing results between the Services, Army men who indicated experiencing someone from work showing/sending them sexually explicit materials were *more likely* than men in the other Services to indicate they would be willing to **encourage others point out to someone when they think he or she “crossed the line” with gender-related comments or jokes to a large extent**.

Table 8: Willingness to Act to Prevent Unwanted Gender-Related Behaviors by Experienced/Did Not Experience Being Shown/Sent Sexually Explicit Materials for DoD Men, by Service

Margins of error		±1–5	±1–10	±1–9	±1–7

These results suggest DoD women and men who indicated experiencing unwanted gender-related behaviors are less willing to act to prevent these behaviors from happening to others. This is consistent with the notion of having “untapped goodwill,” where members say they would be willing to act until they experience an unwanted gender-related behavior, then their perceptions change based on their personal experiences. Additionally, a larger difference in willingness to seek help from the chain of command to confront others who continue to engage in these behaviors exists between those who experience or do not experience unwanted gender-related behaviors themselves. This could be due to a fear of being labeled as a troublemaker or a fear of falling victim to such behaviors again. Future research could provide insights into why someone who has experienced these behaviors would be less willing to act to prevent behaviors happening to others.

Appendix J: Domestic Abuse Related Sexual Assault

Appendix J: Domestic Abuse Related Sexual Assault

Within the Department of Defense, the Family Advocacy Program (FAP) is the congressionally mandated program responsible for clinical assessment, supportive services, and treatment in response to domestic abuse and child abuse and neglect in military families. Sexual assault occurring within the context of a marriage or intimate partner relationship (sexual abuse) is a subset of domestic abuse.

Oversight Responsibilities

Under the authority, direction, and control of the Under Secretary of Defense for Personnel and Readiness, the DoD FAP has broad responsibility for promoting public awareness and prevention of domestic abuse and child abuse and neglect, providing victims of domestic abuse with the option for making a restricted report, and coordinating comprehensive intervention, assessment, and support to victims.

Definition of Domestic Abuse

Department of Defense Instruction 6400.06 (Domestic Abuse Involving DoD Military and Certain Affiliated Personnel) defines “domestic abuse” as domestic violence or a pattern of behavior resulting in emotional/psychological abuse, economic control, and/or interference with personal liberty that is directed toward a person who is:

- A current or former spouse;
- A person with whom the abuser shares a child in common; or
- A current or former intimate partner with whom the abuser shares or has shared a common domicile.

Sexual assault occurring within the context of the above definition of domestic abuse is referred to FAP for comprehensive

safety planning, victim advocacy and support, and treatment when appropriate.

Data

Comprehensive data and analysis of all domestic abuse will be included in the Annual Report of Child Abuse and Neglect and Domestic Abuse scheduled for release on April 30, 2017, as required by Section 574 of the National Defense Authorization Act for Fiscal Year 2017.

Data Collection

FAP incident data are tracked by the Military Services and reported to the Department through the FAP Central Registry maintained by Defense Manpower and Data Center. The Family Advocacy Program Central Registry contains information pertaining to incidents that met criteria for abuse. In this context, “met criteria” means that the incident met the threshold set forth by a standardized algorithm that indicates the need for more rigorous treatment, intervention, support, safety planning, and protection.

Victim Characteristics

Central Registry data indicate that in FY16 there were 284 unique victims of sexual abuse who received Family Advocacy Program services. Victims were 96.1% female (273 of 284), and 3.9% male (11 of 284). Of the 284 victims, 171 (60.2%) were family members, 105 (37%) were military Service members, 6 (2%) were non-beneficiaries, 1 (0.4%) was a DoD civilian, and 1 (0.4%) was a non-DoD civilian beneficiary (retired Service member or government contractor).

Offender Characteristics

Of the 282 alleged offenders, 271 (96.1%) were male and 11 (3.9%) were female. Military service members represent 78% (220 of 282) of alleged offenders, family members represent 18.8% (53 of 282), non-beneficiaries represent 2.5% (7 of 282), and 0.7% (2 of 282) were non-DoD civilian beneficiaries (retired Service members or government contractors).

Of the 220 alleged offenders who were military Service members, 216 (98.2%) were Active Duty, 2 (0.9%) were Reserve, and the status of 2 (0.9%) is unknown. Of the military Service members, 205 (93.2%) were enlisted members, 12 (5.5%) were officers, 1 (0.4%) was a warrant officer, and the status of 2 (0.9%) is unknown.

Accountability

The mission and scope of FAP is to provide comprehensive clinical assessment and support services to individuals and families impacted by domestic abuse and child abuse and neglect. The primary focus is to assess the risk and safety of victims, and to provide treatment and rehabilitation for the victim or alleged offender when appropriate. By responsibility set forth in Department of Defense Manual 6400.01, Volume 1, Enclosure 3 (Family Advocacy Program Standards), FAP reports all unrestricted

reports of domestic abuse to law enforcement within 24 hours. As part of the coordinated community response model employed by DoD, law enforcement (military or civilian depending on jurisdiction) and military criminal investigative personnel have the responsibility for investigating reports of domestic abuse. Investigation, command action, and legal adjudication are addressed by other organizations outside of FAP.

FAP social workers, prevention specialists, victim advocates, and nurses provide critical clinical and support services to families impacted by these often complex incidents, and are bound ethically to promote the well-being of clients and support their self-determination foremost. Responsibility for holding alleged offenders criminally accountable and tracking associated outcomes falls entirely to law enforcement and the legal system.

Way Forward

Synchronized Data Reporting

The reporting cycle for FAP data has been changed to match the SAPR reporting cycle. FAP is working closely with SAPRO, and a FAP Appendix will continue to be included in the Annual Report on Sexual Assault in the Military Services.

Enclosure 1: Department of the Army

SECRETARY OF THE ARMY
WASHINGTON

INFO MEMO

04-17-17 P05:36 OUT

FOR: SECRETARY OF DEFENSE

FROM: Robert M. Speer, Acting Secretary of the Army

SUBJECT: Fiscal Year 2016 Sexual Assault Report

- The Army's Sexual Assault Report for fiscal year (FY) 2016 is attached. The report is prepared in accordance with the Under Secretary of Defense for Personnel and Readiness memorandum dated September 29, 2016, subject: Data Call for the Fiscal Year 2016 Department of Defense (DoD) Annual Report on Sexual Assault in the Military. The report highlights attributes of the Army's Sexual Harassment/Assault Response and Prevention Program.
- The Army continues its commitment to creating a climate where Soldiers live the Army values, thereby reducing incidents of sexual harassment and assault. In FY16, the Army continued to see a high rate of reports, 4.4 reported cases of sexual assault per 1,000 Soldiers, an increase from 4.2 per 1,000 Soldiers in FY15. This continued high rate of reports is believed to be indicative of victims feeling safe to come forward due to the positive command climates established by commanders throughout the Army.
- The Army's actions and future plans for a comprehensive sexual harassment and sexual assault prevention strategy focus on (1) leaders maintaining a positive command climate where Soldiers do not tolerate behavior that, left unchecked, may lead to sexual assault, and (2) developing research-based strategy to address risk factors such as sexual harassment, alcohol induced behaviors, and male-involved sexual assaults.
- This report contains the following spreadsheets in the prescribed DoD format: Spreadsheet 1: Army sexual assault unrestricted report data; Spreadsheet 2: Army sexual assault restricted report data; Spreadsheet 3: Support services for victims of sexual assault; Spreadsheet 4: Combat Areas of Interest (CAI) unrestricted report data; Spreadsheet 5: CAI restricted report data; Spreadsheet 6: Support services for victims of sexual assault in CAI; and Spreadsheet 7: Service Member sexual assault synopses report.

Executive Summary

The U.S. Army remains fully committed to reducing and eventually eliminating sexual assault and sexual harassment from its ranks through a comprehensive Sexual Harassment/Assault Response and Prevention (SHARP) program. The Army's goal is a culture of dignity and respect that results in positive command climates in which the behaviors and attitudes that lead to sexual offenses are rare and victims feel safe in reporting and free from intimidation and retaliation.

Army Values demand Soldiers respect and trust each other. The overwhelming majority of Soldiers serve honorably and capably, meeting the standards embodied in the Army Values. However, the actions of a few are unacceptable, jeopardize unit readiness, and erode the trust and confidence the American people have in our Army. Soldiers who commit the crime of sexual assault, or fail to intervene and stop an assault, violate the Nation's trust and the trust of their fellow Soldiers.

The Army's efforts to ensure it retains the trust and confidence of the Nation are embedded in a SHARP program that combines initiatives to prevent and respond to incidents of sexual assault, sexual harassment, and retaliation. SHARP operationalizes these efforts throughout the Army using a strategy known as "I. A.M. Strong" which stands for *Intervene, Act, and Motivate*. This report details initiatives of the Army's SHARP program, while also demonstrating the progress the Army has made in preventing and responding to the crime of sexual assault.

Since its inception in 2009, the Army's SHARP program focused its efforts on five specific priorities or Lines of Effort (LOEs):

LOE 1 - Prevention of sexual assault.

LOE 2 - Competent and sensitive investigations of sexual assault.

LOE 3 - Accountability for the alleged perpetrators of sexual assault.

LOE 4 - Assistance to, and advocacy for, victims of sexual assault.

LOE 5 - Effective assessment of the SHARP program.

These five LOEs are aligned with the Department of Defense (DoD) Sexual Assault Prevention and Response Strategic Plan and are formally expressed in the Army's strategy through the draft Fiscal Year (FY) 17-21 SHARP Campaign Plan.

In addressing LOE 1 (Prevention), the Army has continually revised its training and engagement strategies that deal with preventing sexual assault. SHARP training is required for all Soldiers and Army Civilians and is fully integrated into Future Soldier Training for new recruits, Initial Entry Training (IET) for new Soldiers, and at each level of Professional Military Education (PME) for officers and non-commissioned officers (NCOs). The Army regularly revises PME courses and specialty training (i.e., company commander/first sergeant, recruiter, advanced individual training (AIT) platoon sergeant, and training for first responders) in order to update and improve their corresponding SHARP knowledge. In addition, the Army requires annual unit-level SHARP training, which consists of interactive presentations designed to educate Soldiers and Army

Civilians about the importance of active bystander intervention. To further operationalize the Army's sexual assault prevention efforts under LOE 1 in FY16, the Chief of Staff, Army directed the issuance of an execution order (EXORD) requiring each Army command to identify their current environment for sexual harassment, sexual assault, and retaliation and develop mitigation action plans.

"It is through personal conduct and proactive leadership that we seek to improve on a culture of trust that motivates and guides the conduct of Soldiers."

**Chief of Staff, Army
General Mark A. Milley**

The Army addresses LOE 2 (Investigation) by sustaining the momentum gained through improved processes and thoroughness of sexual assault investigations. The U.S. Army Criminal Investigation Command (CID) has joined with prosecutors, victim witness liaisons (VWLs), sexual assault response coordinators (SARCs), victim advocates (VAs) and other sexual assault responders to form special victim capability teams at more than 70 Army installations. These teams train in the unique aspects of investigating and prosecuting sexual assault cases, including the need to ensure that victims are referred to the appropriate agencies for comprehensive care. The U.S. Army Military Police School (USAMPS), recognized as a "Best Practice" in sexual assault investigative training, continues to increase the number of certified agents. Specifically, CID has approximately 600 military and civilian criminal investigators worldwide who investigate sexual assault allegations on a full-time or part-time basis. In addition, Congress recognized the Forensic Experiential Trauma Interview (FETI), developed by USAMPS, as an innovative investigative technique.

In FY16, efforts in LOE 3 (Accountability) focused on three priorities - the Special Victim Prosecutor (SVP) program, the Special Victims' Counsel (SVC) program, and transformational Judge Advocate (JA) training initiatives. The SVP program provides specialized military justice practitioners who focus solely on special victim cases and oversee the disposition and prosecution of every sexual assault case. Since the inception of the SVP program in 2009, the Army has seen an increase of more than 100 percent in the proportion of sexual assault cases that result in prosecutions and convictions. At the same time, the Army also observed a substantial decrease in the proportion of founded cases in which command action is not possible (because the victim did not participate, there was insufficient admissible evidence, or the statute of limitations expired). In FY16, the Army expanded the SVP program by assigning 23 special victim prosecutor NCO paralegals (SVPNs) and 23 special victim witness liaisons (SVWLs) to each SVP team. These SVWLs are Army Civilians who bring best practices and continuity to the prosecution teams, and fill an existing gap in services to non-DoD affiliated victims. The SVC program, which provides attorneys to represent victims throughout the investigative and judicial process, continues to grow and garner accolades from victims and commanders. In FY16, the SVC program trained more than 500 legal personnel in support of the SVC mission, took on representation of Army Civilian victims, and developed the DoD model certification course. Finally, the Army launched a series of initiatives to improve existing training for all JAs, which included outreach to civilian prosecution offices to observe and study best practices in special victim training.

The Army remains dedicated to victim care and response through LOE 4 (Advocacy). Army SARCs and VAs continue to receive comprehensive training through a 2-week

SHARP Foundation Course (conducted locally for collateral duty personnel) or a 7-week SARC/VA Career Course (for full-time personnel) through the Army SHARP Academy at Fort Leavenworth, Kansas. The Army SHARP program office also conducts a Program Improvement Forum (PIF) as a venue to ensure Program Managers (PMs), SARCs, and VAs have current information on providing victim care. The Army also ensures that victims of sexual assault receive quality medical care. Since 2012, the U.S. Army Medical Command (MEDCOM) trained more than 100 sexual assault medical forensic examiners (SAMFEs) annually. The Army SAMFE training educates healthcare providers to conduct sexual assault forensic examinations (SAFEs) through an 80-hour training program, which exceeds the Department of Justice (DoJ) National Protocol for Sexual Assault Medical Forensic Examinations Adult/Adolescents. MEDCOM also provides at least one SAMFE at every Military Treatment Facility (MTF) with an emergency room.

The objective of LOE 5 (Assessment) is to measure, analyze, and assess the effectiveness of the Army's efforts throughout all LOEs. The Army collects information from multiple sources to determine the effect of its activities and initiatives on mitigating and combatting sexual assault throughout the force. For FY16, the Army placed special emphasis on assessing leader accountability and engagement through the development of the SHARP Campaign Plan and EXORD 204-16 (Sexual Harassment and Assault Readiness Effort). The Army works with governmental and non-governmental research, evaluation and audit entities such as the Government Accountability Office (GAO) and the Army Audit Agency (AAA) to assist in exploring areas of emphasis within the realm of sexual assault response and prevention. Additionally, the Army SHARP program office has deployed assessment tools within the Army Strategic Management System (SMS) to help commanders use SHARP data as they develop mitigation action plans.

The Army is seeing encouraging signs of progress. One indicator of this progress is the recent sustained high rate of reporting. Specifically, during the period from FY14 through FY16, the Army experienced the highest rates of reported sexual assault cases since it began tracking such data in 2004. The Army is confident this increase in the number of reports of sexual assault is not the result of an increase in the number of sexual assault incidents, but rather the continued emphasis placed on sexual assault prevention and response by Army leaders appears to have resulted in increased victim confidence in their chain of command. Data from the most recent FY16 Army climate survey seem to support this as more than 91 percent of Soldiers surveyed indicated they favorably view their units' reporting climate and chain of command support for victims. In spite of this progress, sexual assault remains an under-reported crime and the Army continues to work on improving reporting climates.

Indicators of progress are a credit to committed Army leadership and the sustained resourcing of the SHARP program. The Army's actions in FY16 demonstrate a continued commitment to strong and compassionate responses to sexual assault. While each case is troubling, the Army fully investigates every alleged misconduct, follows every lead, provides support to victims and takes available and appropriate action to hold individuals

accountable. Nevertheless, the Army recognizes there is more work to do, especially in efforts to improve processes to prevent sexual assaults.

*“Not in My Squad”
is about junior
leaders taking
action to create a
better Army”*

**Sergeant Major
of the Army,
Daniel A. Dailey**

The foundation of the Army’s prevention efforts is its leaders, who are ultimately responsible for climate and culture. The Army provides leaders with resources and training to empower Soldiers to intervene and take appropriate action when they see something wrong. Accepting this level of responsibility by junior leaders and Soldiers is the intent of “Not in My Squad,” a grass-roots approach to creating a climate of dignity, respect and cohesion. “Not in My Squad” is one of many efforts guided by the Army’s strategy to achieve cultural change and thereby reduce, with the goal to eliminate, sexual assault and sexual harassment.

The authorizing policy for the Army’s SHARP program is Chapter 8 of Army Regulation (AR) 600-20 (Army Command Policy). The Assistant Secretary of the Army for Manpower and Reserve Affairs (ASA(M&RA)) supervises the Army’s SHARP program, while the Deputy Chief of Staff, G-1 (through the Army SHARP program office) is responsible for program implementation and assessment. In FY16, the SHARP program office created a dedicated policy and oversight branch that completed a comprehensive review and submitted significant revisions to AR 600-20, scheduled for publication in 2017. As the overarching policy for the SHARP program is contained in AR 600-20, a regulation for many programs, the Policy and Oversight branch is currently drafting a standalone SHARP regulation, scheduled for publication later in FY17.

As the SHARP program is a command responsibility, commanders are required to establish a command climate that prevents the crime of sexual assault, takes all allegations of sexual assault seriously, ensures impartial and fair investigations occur, treats victims with dignity and respect, and takes appropriate action against alleged offenders. Significant elements of the current Army program include:

- Senior Commanders at installations and in deployed locations have overall responsibility for SHARP program implementation and execution. As a critical element of their program execution, these leaders conduct required monthly Sexual Assault Review Boards (SARBs). The SARB provides executive oversight, procedural guidance, and feedback concerning local program implementation and case management.
- Command SHARP program managers (PMs) assist commanders in executing their SHARP program and integrating sexual assault response efforts (legal, law enforcement, chaplain, and medical) above the brigade level.
- SARCs and VAs are available 24 hours a day/7 days a week (24/7) to interact directly with victims of sexual assault and other response agencies to provide support and advocacy services in garrison and deployed environments. These SARCs and VAs also support commanders in implementing the SHARP program, conduct unit training, and assist with command climate surveys to monitor and implement prevention efforts.

- Most Active Component brigade-level units and Army Reserve command-level units have one full-time SARC and one full-time VA.
- Each battalion-sized unit has one collateral duty SARC and one collateral duty VA.

During FY16, Army organizations obligated approximately \$76.3 million (M) in direct support of the SHARP program, including:

- Approximately \$31.5M for civilian personnel pay for 541 SHARP personnel (159 SARCs, 265 VAs, 46 trainers, 50 command/installation PMs and 21 Army SHARP program office staff).
- \$12.5M by the Army SHARP program office for contracts supporting sexual assault/harassment data management, outreach, the Emergent Leader Immersive Training Environment (ELITE), SMS, video production, Victim Assistance Response Kits (VARs), and training.
- \$10.7M by CID for investigations of sexual assault allegations, to include costs for laboratory examiners, criminal investigators, forensic equipment, supplies, and training.
- \$1.5M by MEDCOM for salaries of full-time healthcare providers who support sexual assault patients and for training of personnel performing SAMFE duties.
- \$5.7M by the Office of The Judge Advocate General (OTJAG) for training of trial and defense counsel and other legal professionals, and for travel for SVP teams to provide expertise and proper disposition of sexual assault investigations.
- \$14.4M by the Army SHARP Academy for personnel costs, student travel, contracts, printing, and supplies.

This report complies with content and format requirements in the Under Secretary of Defense for Personnel and Readiness (USD(P&R)) memorandum, dated September 29, 2016, subject: Data Call for the Fiscal Year 2016 Department of Defense Annual Report on Sexual Assault in the Military). Per the memorandum, this report contains:

- Details of Army actions within the five LOEs contained in the DoD Sexual Assault Prevention Strategy (Prevention, Investigation, Accountability, Advocacy/Victim Assistance, and Assessment). Highlights of the Army's FY16 actions include:
 - Rewriting the Army SHARP Campaign Plan, designed to provide a framework for synchronizing and advancing efforts across the five strategic LOEs during FY17-21.
 - Publishing an EXORD to help Army commands focus efforts to enhance readiness by reducing incidents of sexual harassment, sexual assault, and retaliation.

- Developing the ELITE-SHARP Prevention Outreach Simulation Trainer (POST) to provide realistic prevention training.
 - Fielding new operating software at the U.S. Army Criminal Investigation Laboratory (USACIL) to streamline the processing of evidence.
 - Formally adding SVPNs and SVWLs to existing SVP teams.
 - Increasing the number of SVCs in the Active Component from 75 to 107 (45 full-time and 62 part-time).
 - Holding the second SHARP Program Improvement Forum (PIF) for Command SHARP program managers and SARCs to address issues from the field.
 - Establishing a sexual assault medical director (SAMD) at Army MTFs to ensure timely, accessible, and competent care to sexual assault patients.
 - Increasing emphasis and awareness regarding male experiences of sexual assault.
 - Completing a SHARP program inspection plan checklist, which provides common inspection and evaluation standards for Army units.
- Data and analysis of the 1,996 unrestricted reports and the 501 restricted reports of sexual assault reported during FY16.
 - A profile and brief synopsis of each sexual assault case in which there was disposition decision in FY16.

1. LOE 1—Prevention—The objective of prevention is to “deliver consistent and effective prevention methods and programs.” Based on the 2014-2016 DoD Sexual Assault Prevention Strategy, implementation of prevention efforts across DoD should be spread across a collection of 10 program elements. To aid in assessing DoD-wide progress in operationalizing the Prevention Strategy, please provide responses connected back to these program elements.

1.1. Summarize your efforts to achieve the Prevention Endstate: “cultural imperatives of mutual respect and trust, professional values, and team commitment are reinforced to create an environment where sexual assault is not tolerated, condoned, or ignored.” Where appropriate, be specific in the types of measures your program uses, the number of Service members impacted and the approved way ahead for achieving the prevention endstate.

Prevention of sexual assault is a leadership issue, supported by training, education, and accountability. The Army requires leaders to establish a positive climate that supports Soldier safety, emphasizes Army Values, and encourages candor and trust throughout their organizations. The Army trains Soldiers to trust in their leaders to take appropriate action when they bring concerns forward. Successful prevention of sexual harassment and sexual assault requires that all Soldiers and leaders understand expected standards of conduct, hold each other accountable for violations of those standards, and work together to build a unit climate of dignity, respect, and sensitivity to others. Significant leadership initiatives to support sexual assault prevention in FY16 include:

- EXORD 204-16 (Sexual Harassment and Assault Readiness Effort). This EXORD requires Army commands to enhance readiness by reducing sexual harassment, sexual assault, and retaliation incidents, which are internal threats that erode good order and discipline, unit cohesion, and trust. In the development of the EXORD, the Chief of Staff, Army directed commands to focus on three key tasks: leader engagement, monitoring the barracks and areas of responsibility, and responsible use of alcohol. The EXORD references the initiatives of the “I. A.M. Strong” and “Not in My Squad” campaigns as relevant enablers for fostering a climate that exemplifies dignity and respect. Both initiatives promote healthy peer-to-peer relationships and focus on prevention at battalion and company-level organizations. The EXORD also required commands to develop prevention mitigation action plans to counter vulnerabilities identified in their organizations and provide metrics to evaluate the effectiveness of these plans.
- “Not in My Squad” seminars. These seminars, executed by commands in FY16, focus on the well-being, safety, and dignity of all Soldiers. “Not in My Squad,” an initiative of the Sergeant Major of the Army, supports strengthening junior leaders’ ability to improve unit climate and readiness by empowering NCOs to take responsibility to fix problems that stem from within their own ranks. The “Not in My Squad” initiative included a series of workshops designed to inspire and motivate squad leaders to accept the responsibility and authority to find and implement solutions to problems within their squad (or squad-sized unit). The Center for the Army Profession and Ethic (CAPE) developed an online resource in support of “Not in My Squad.” This resource helps junior NCOs assess the state of mutual trust and cohesion within their squad, section, or team. Based on their assessments,

users are directed to resources that reinforce success, make adjustments to strengthen areas of weakness, and consider alternatives to remediate areas of concern.

1.2. Communications and Engagement: Update your progress in aligning prevention communications and training based on the type of message, messenger, and delivery methodology to specific demographic audiences across your Military Service (e.g., basic training, first-term, mid-level, and senior leader).

During the past year, the Army finalized development of a new marketing campaign for the SHARP program. The core messaging of the campaign centers on the Army Values, empowerment of leaders, and the responsibility of each member of the Army Team to foster a healthy command climate based on dignity and respect. The Army envisions a culture where sexual offenses are rare, but when they do occur people feel free to report and intervene as appropriate without fear of retaliation. The SHARP marketing campaign, which reaches approximately 1.4 million Soldiers, Army Civilians, and Family members, consists of printed, digital, and multimedia products for distribution throughout the Army. Based on the “Not in My Squad” campaign, the materials are called “Not in Our Army.” This campaign is also integrated into major SHARP events (SHARP PIF, Sexual Assault Awareness and Prevention Month (SAAPM), and Army Profession Forum).

The Army ensures the SHARP marketing campaign materials target specific demographics: those most affected by sexual violence; those who are in the best positions to positively influence troops at the grassroots level; and those who are entrusted to maintain healthy command climates and execute the SHARP program. The Army specifically tailored each marketing product and message to these audiences and tested them with sample demographics to ensure the messages resonate appropriately.

During FY16, the Army SHARP Academy collaborated with U.S. Army Training and Doctrine Command (TRADOC), Initial Military Training (IMT), U.S. Army Sergeants Major Academy, TRADOC Centers of Excellence (CoEs), Army Management Staff College, and specialty and functional course managers in promoting and validating SHARP PME training. The SHARP Academy has revised and updated SHARP training for IMT, and is revising all SHARP-related PME training for first-term, mid-level, and senior leaders. The focus of this effort is on reducing the amount of redundant or repetitive training, while ensuring tiered training for the appropriate training audience (by rank and position).

Soldiers in IMT receive 15-30 minutes of SHARP introductory training, CID briefs, and an introduction to the SHARP hotline/WeCare App during the first day of in-processing. Soldiers also receive 3 hours of SHARP training while attending basic combat training (BCT) and receive quarterly training during AIT. Examples of IMT SHARP training include:

- Sex Signals. Sex Signals is part of all BCT training and a key component of the Army’s “I. A.M. Strong” Campaign to prevent sexual assault. A team of trained actors takes the audience through several semi-improvisational dating scenes and sexual encounters. The actors then engage students who have mislabeled coercion as consent so they can address changing behaviors and encouraging bystander intervention.

- CID Informational SHARP Briefs. In FY16, the Department of the Army Inspector General (DAIG) released a report, which cited CID-facilitated SHARP training as a best practice. Soldiers in IMT expressed that the training was beneficial and effective. As a result, TRADOC, in coordination with CID, developed a CID information SHARP briefing for inclusion in SHARP training at reception battalions to educate new Soldiers on Article 120 (Abusive Sexual Contact) of the Uniform Code of Military Justice (UCMJ).

The U.S. Army Cadet Command (USACC) leadership ensure cadres brief all cadets on Army sexual assault policies within 14 days of their entrance into the Reserve Officer Training Corps (ROTC) program and continue to reinforce this policy throughout their enrollment. USACC also requires all cadets to complete online SHARP training as a commissioning requirement and includes SHARP training in the classroom curriculum.

The United States Military Academy (USMA) exposes cadets to SHARP-themed discussions throughout the academic year that are tailored to the unique experience within their class but also include key issues that are ongoing within the Corps of Cadets. Throughout the year, each cadet class has training focused on SHARP themes that are nested within the overarching cadet character development program. USMA targets training around key periods of vulnerability, such as holiday breaks, class weekends, and major milestone events throughout cadets' 47-months at West Point.

In accordance with AR 350-1 (Army Training and Leader Development) and AR 600-20 (Army Command Policy), commanders must conduct and report their unit's SHARP training. SHARP annual unit refresher training (URT) is a command inspection item which is required annually, pre/post deployment, and during in-processing.

1.3. Communications and Engagement: Update your efforts to share and foster practices across all prevention stakeholders (suicide prevention, sexual assault prevention, alcohol reduction, etc.). Detail any effort to incorporate shared messaging (e.g., bystander intervention efforts supporting suicide and sexual assault prevention).

Ask Care Escort–Suicide Intervention (ACE-SI) training is a product of the Army Resiliency Directorate (ARD). ACE-SI provides in-depth instructions to enhance company-level leaders' and first-line supervisors' ability to recognize and effectively intervene with personnel suffering from emotional distress. ACE-SI builds upon skills learned during annual ACE suicide prevention training, in addition to other professional military education activities.

Applied Suicide Intervention Skills Training (ASIST) is a 2-day interactive session based on principles of adult learning and teaches participants to carry out life-saving interventions for people at risk of suicide. This ARD sponsored training targets "gatekeepers" who, in the performance of their assigned duties and responsibilities, provide specific counseling to Soldiers and Army Civilians in need. Gatekeepers deliver this training in order to share procedures and best practices.

The SHARP program coordinated with ARD to provide and share communications products, messages, tactics that enabled the cross-promotion of SHARP, and other programs and initiatives such as bystander intervention, suicide prevention, and responsible use of alcohol. Specifically, SHARP provided messaging for use in

infographics for ARD's Prevention Campaign. SHARP created special messaging for incorporation in a social media program to highlight issues such as suicide prevention and responsible alcohol use along with SHARP messaging. The objective was to highlight the correlation between those particular issues and the effects of sexual assault and sexual harassment. For example, civilian (non-DoD) surveys show a correlation between sexual assault and suicidal ideation. DoD and non-DoD surveys show a correlation between alcohol use and sexual assault by either alleged perpetrators, victims, or both.

Additionally, the SHARP program increased awareness of topics such as bystander intervention and drug-facilitated sexual assault (DFSA) through its Outreach Webinar series. During FY16, invited guest speakers from non-DoD organizations led discussions on these issues during the webinars. Army SHARP professionals, SARCs/VAs from the sister Services, and advocacy experts from non-DoD organizations attended the sessions. Army EXORD 204-16 also requires leaders to encourage responsible use of alcohol and educate their Soldiers on how irresponsible use of alcohol increases occurrences of sexual harassment, sexual assault, and retaliation.

SHARP personnel in Army commands continue to collaborate with other stakeholders to share and improve practices. Noteworthy collaborative efforts during FY16 include:

- One installation in U.S. Army Forces Command (FORSCOM) conducted a Health and Wellness Solarium consisting of suicide prevention teams, family advocacy, and SHARP professionals. Each agency discussed issues, trends, and training, and shared practices that support prevention. In the Army, a solarium is a collaborative forum during which participants develop topics, issues, and solution sets.
- TRADOC SHARP personnel participated in Army Ready and Resilient Campaign planning and TRADOC campaign planning. SHARP objectives and initiatives are tasks and subtasks to objectives within these plans.
- Units in U.S. Army Pacific (USARPAC) collaborate with the Family Advocacy Program (FAP) to provide information prior to each SARB, at SHARP training events, and during Domestic Violence Prevention Month and Child Abuse Prevention Month. FAP and other stakeholders are engaged to participate in quarterly update briefs. These partners also provide training at SHARP summits and SARC/VA foundation courses.
- During SAAPM (April 2016), SHARP professionals throughout U.S. Army Europe (USAREUR) collaborated with other prevention stakeholders (e.g., legal/SVC, medical, behavioral health, chaplain, military police, CID, alcohol substance abuse program (ASAP), FAP/domestic violence, suicide prevention, etc.) to conduct training and education events involving military personnel, Army Civilians, and Family members.
- MEDCOM conducted a SHARP summit that included a collaboration with the sexual assault response team (SART) of the National Sexual Violence Resource Center (NSVRC). SHARP personnel gained insight on the national SART toolkit, its usefulness, and local application as well as the option to share advocate challenges in a military setting.

- The U.S. Army Intelligence and Security Command (INSCOM) unit ministry team (UMT) and SHARP program collaborated to present training that focused on both sexual assault awareness and suicide prevention by hosting a speaker who was both a victim of sexual assault and had attempted suicide.
- Installation Management Command (IMCOM) garrisons use subject matter experts to conduct training sessions for SHARP personnel. Alcohol and substance abuse training incorporates bystander intervention while risk reduction training emphasizes risk and protective factors and train staff to monitor behaviors to prevent more serious outcomes such as suicide and sexual assaults.

1.4. Peer-to-Peer Mentorship and Support: Describe efforts to support peer-to-peer programs for junior service members that promote healthy relationships focused at the battalion/squadron/or Military Service equivalent levels. Provide, where appropriate, metrics used to assess efforts and intended outcomes of the efforts.

Army EXORD 204-16 requires commanders to support peer-to-peer programs by using initiatives such as “Not in My Squad” and ensure sponsorship for Soldiers arriving at their first unit of assignment or permanent change of station (PCS). AR 600-8-8 (The Total Army Sponsorship Program) contains sponsorship requirements and responsibilities, including guidance on the assignment of same-gender sponsors for first-term Soldiers.

Command level efforts to support peer-to-peer programs include:

- One FORSCOM installation supported a grassroots movement called the “Guardians.” The Guardians is a junior leader volunteer community outreach program whose mission is to eliminate sexual harassment and sexual assault through a collective effort involving senior leader mentoring, peer-to-peer accountability, and bystander intervention. The program models positive behaviors and empowers junior leaders to act safely. Three Guardians received the Commanding General (CG) Volunteer Award as recognition for their efforts.
- Another FORSCOM unit developed an initiative known as the “SHARP Tiger Team” which seeks to build and maintain a positive culture and command climate through soliciting candid Soldier feedback in a focus group setting. Chaired by the CG, the group convenes twice monthly and refreshes participants quarterly to gain direct feedback about organizational climate.
- USARPAC units conduct mentorship programs for junior Soldiers to promote healthy relationships and discuss what is “right” instead of what is “wrong.”
- U.S. Army Central (ARCENT) developed a 40-hour Junior SARC program for junior leaders, which teaches the processes of preventing sexual harassment and sexual assault and the significance of bystander intervention. During FY16, this program helped generate higher reporting numbers and greater intervention efforts.
- USMA continues to use the cadets against sexual harassment and assault (CASHA) committee to encourage cultural change. CASHA is a cadet-led, cadet-designed organization that seeks to influence and inspire individuals to take an active role in creating a positive culture. The endstate is a culture where sexual harassment and sexual assault are not tolerated and where victims are comfortable reporting.

- INSCOM established junior Soldier SHARP councils as a way of monitoring climate within the command, specifically the barracks areas. Members of the council range from E1 to E4 and meet monthly with the brigade SARC and VA. The Soldiers also help with promotion and education events by participating in skits, working informational booths, and providing assistance during SAAPM events.

1.5. Leadership Involvement: Update improvements to local Military Service SAPR programs (on both prevention and response) based on the feedback to local commanders from command climate assessments.

Command climate and other surveys are key components in measuring progress in LOE 1 (Prevention). Results of the FY16 Defense Equal Opportunity Management Institute (DEOMI) Organizational Climate Survey (DEOCS) indicate continuing chain of command support for victims. Overall DEOCS results show “moderately favorable” to “highly favorable” sentiment towards commanders and leaders from the perspective of Soldiers. Given these positive responses, leadership involvement in responding to sexual assault appears strong.

In accordance with Army Directive 2013-29 (Army Command Climate Assessments), Army commanders must complete a baseline command climate assessment using the DEOCS. Commanders at all levels receive the DEOCS results from DEOMI, analyze those results, and conduct additional research or focus groups to validate or refine the findings. Commanders must address issues identified in the surveys and conduct required follow up surveys.

The Army trains all SARCs on their requirement to conduct one-on-one SHARP training for all new commanders within 30 days of taking command. The Army implemented the ELITE-SHARP Command Team Trainer (CTT) in FY16 to help facilitate this requirement. In support of operational command teams, the SHARP Academy developed several training tools in collaboration with the Army Research Laboratory and the University of Southern California-Institute for Creative Technologies. These tools leveraged the ELITE platform’s simulation trainer that employs state-of-the-art “virtual human” technologies such as high quality graphics, gestures, facial expressions, and behavior models to produce student engagement and training believability. ELITE-SHARP CTT consists of animated demonstration vignettes, practice scenarios, scored after action reviews (AAR), and learning assessments. This training helps Army command teams at the company, battalion, and brigade level practice their roles and responsibilities when it comes to addressing sexual harassment and sexual assault issues. 680 personnel received the training in FY16.

Feedback from Army commands regarding leadership involvement include:

- TRADOC command climate survey results are positive in areas related to leadership response to allegations of sexual harassment/assault. Overall, more than 90 percent of the command climate participants stated that leadership takes allegations of sexual harassment and sexual assault seriously.
- FORSCOM subordinate commands developed SHARP mitigation action plans to reduce SHARP vulnerabilities through leader engagement and good order and discipline. Senior commanders briefed their respective SHARP mitigation action

plans to the FORSCOM CG during the Command Ready and Resilient Council (CR2C) video teleconference (VTC) on 29 September 2016.

- The U.S. Army Materiel Command (AMC) made changes to mandatory face-to-face training by tailoring content for the Army Civilian workforce to include local resources on and off the installation. AMC also conducted local training events such as Got-Your-Back, SAAPM Breakfast, Poetry Slam, and a SHARP Expo.
- USAREUR reported an upward trend across its units with an average of 3.77 (on a 4.0 scale) of DEOCS respondents who perceive their chain of command would respond appropriately to reports of sexual assault and prevent retaliation against individuals who make a protected communication.
- IMCOM's command climate assessment feedback indicated a need to increase awareness and advocacy efforts for IMCOM Army Civilians. As a result, IMCOM changed their training methods to incorporate civilian-based scenarios, intervention, and victim care.

1.6. Deterrence: Update your progress in developing and/or enhancing sexual assault deterrence measures and/or messaging and outline how they are provided to Service members at the installation (or Service equivalent) level (e.g., Crime Reduction Program, Military Criminal Investigation Organization (MCIO) Outreach Initiatives, etc.). Provide summary of Service member feedback or metrics to demonstrate progress.

Army EXORD 204-16 addresses Army deterrence measures. The SHARP Readiness EXORD consists of four phases that direct commanders to focus on three specific areas in the deterrence of sexual assault, sexual harassment, and retaliation. These areas consist of leader engagement, responsible use of alcohol, and unit areas of responsibilities. Commanders analyze and assess their vulnerabilities in these areas (Phase I); develop measures and execute a plan that will deter sexual assault, sexual harassment, and retaliation (Phase II); share lessons learned with their peers (Phase III); and reassess and make necessary changes to the deterrence measures in their plans (Phase IV).

Army deterrence measures also highlight the critical role of individuals in preventing sexual assault and sexual harassment. "I. A.M. Strong" and "Not in My Squad" messaging reinforce that everyone plays a role in cultivating a positive command climate where Soldiers and leaders do not tolerate sexual assault, sexual harassment, and the conditions that lead to such behaviors. The new SHARP marketing campaign tailors messaging to demographics based on age and rank, with messaging for junior Soldiers focused on reiterating the Army Values and Soldier's Creed.

The Army uses SHARP URT, IMT, PME, and operational training to educate Soldiers on the consequences of committing a sexual assault. The Army also publishes courts-martial results monthly at <https://www.foia.army.mil/ReadingRoom/Detail.aspx?id=95>, a publicly available website. The Army Times also publishes courts-martial results monthly.

Army command efforts to enhance deterrence include:

- Some FORSCOM units use CID agents during unit level SHARP training and as panel members for the SHARP Foundation Course. Other panel members consist of FAP personnel, SVCs, VWLs, and sexual assault care coordinators (SACCs).

Students learn what is unique to each responder, challenges and trends, and ultimately how to make a better working relationship.

- TRADOC experiences great turnover every 10 weeks as basic trainees enter the Army. These new Soldiers come from various backgrounds and have varied viewpoints with regard to values and what constitutes appropriate behavior. As a result, acculturation is an ongoing effort to help teach Soldiers the limits of appropriate behavior. The CID briefing to trainees designed to educate new Soldiers on Article 120, UCMJ is an example of an effective education and deterrence effort.
- USARPAC provides statistics and addresses issues unique to each area of responsibility (AOR) during newcomer briefings and at SHARP training events. Other examples of deterrence and messaging include: leader presence in the barracks and community areas, lighting in barracks and common use areas, cameras where appropriate, posting of SHARP contact information, and 24/7 helpline info in common areas.
- Army CID continues to produce crime prevention surveys and provide briefings at newcomer orientation courses at Army installations in order to ensure that Soldiers and unit leadership teams receive up-to-date information on sexual assault incidents and trends.
- IMCOM posts its command SHARP policy in garrison buildings throughout the installation. Awareness posters, flyers, and trifold are available in common areas and workspaces in thoroughfares. All Soldiers newly assigned to the installation receive a SHARP in-processing brief on the senior commander's policy as well as a prevention briefing.

1.7. Community Involvement: Describe your efforts to engage with military community leaders and organizations (e.g., Family Advocacy Programs, ROTC Programs, Chaplains, Healthcare providers, and Single Soldier Programs) to develop collaborative internal Military Service programs. Describe how you addressed challenges.

During the past year, the Army SHARP program teamed with FAP and ARD on the ARD summer prevention campaign by sharing messaging and tactics to further understanding of intimate partner and spouse abuse. The Army SHARP program also coordinated with FAP, TRADOC, MEDCOM, and other stakeholders for input to the Army SHARP Campaign Plan, input for a stand-alone SHARP regulation, and revisions to AR 600-20 (Army Command Policy). The Army SHARP program also instituted a quarterly SHARP G-1 teleconference with all Army commands (ACOMs), Army service component commands (ASCCs), and direct reporting units (DRUs). This venue provides an opportunity for the SHARP Program Director to reach out to leaders across the Army who provide oversight of their SHARP programs and SHARP professionals.

During FY16, the Army also initiated a biweekly meeting with researchers from each of the other Service's sexual assault prevention and response (SAPR) programs to discuss current research efforts, upcoming research initiatives, and to identify potential areas for collaboration. Additionally, the Army participates in partnership and policy meetings with the other Services, to include the Coast Guard and the National Guard. Through this

monthly collaboration, the Services are able to bring Service-specific messaging to the group and develop plans and messages to disseminate throughout DoD.

Community involvement efforts within Army commands include:

- A major installation in FORSCOM incorporates SHARP into its Quarterly Senior Community Health Promotion Councils in which the major subordinate commanders provide an assessment of their overall Ready and Resilient (R2) programs to the senior commander.
- In AMC, FAP members, chaplains, primary care coordinators, CID, employment assistance program directors, and other as-needed military organizations are active members of SARBs and SAAPM activities.
- The USARPAC CG hosts a bi-monthly SHARP review and oversight committee (ROC), which include SMEs and/or SHARP stakeholder partners as appropriate.
- The CID SHARP office facilitates training to address bystander education designed for male and female college students and family members. The program aims to engage participants as potential witnesses to violence, rather than as potential perpetrators or victims. Topics include speaking out against rape myths and sexist language, supporting victims, and intervening in potentially violent situations.

1.8. Community Involvement: Describe your efforts to engage with non-DoD civilian community leaders and organizations both locally and nationally (e.g., Safer Bars Alliance and Association of Women for Action and Research) to develop collaborative community relationships and programs. Describe how you addressed challenges.

During the past year, the Army significantly increased its engagement and participation in DoD and non-DoD conferences. The Army SHARP program office supported more than 35 engagements, including events such as the New York State Coalition Against Sexual Assault, the Florida Coalition Against Sexual Violence, and the National Association of Student Professional Administrators. Additionally, the Army supported engagements at the End Violence Against Women Conference and the National Sexual Assault Conference.

The Army has also engaged other Services, leading academic subject matter experts from various universities (University of Connecticut, University of Michigan, San Diego State University, and Queens University), other Government organizations (Veterans Affairs), and non-profit agencies that share similar missions to SHARP (Men Can Stop Rape, 1in6.org). Engagements on topics of critical importance (preventing sexual harassment and sexual assault; sexual violence against men at work) took place at multiple forums, including SAAPM events, the National Sexual Assault Conference, the Society for Industrial/Organizational Psychology Conference, and the Service Women's Action Network.

Additionally, the Army SHARP program office reached out to various civilian community leaders to begin the conversation of partnership and the way ahead. Such partnership programs include a national professional athletic organization, the Centers for Disease Control (CDC), "Day One" prevention and training, "No More" campaign, and

various rape crisis centers around the country. These partnerships will further the Army's mission to prevent sexual assault.

Community involvement efforts within Army commands include:

- USACC engages 275 host colleges and universities to prevent sexual assault. To date, 252 host institutions have signed partnership agreements with USACC. As a result, cadets actively participate in education and awareness training on campuses, to include serving as sexual assault prevention advocates, peer mentors, influencers, and bystander intervention trainers.
- AMC has multiple memorandums of agreement (MOAs) in place with outside agencies to fill any gaps in victim services. Many locations include the local civilian organization for victim assistance to participate in monthly SARBs due to their active role in providing forensic services to victims.
- In USARPAC, relationships continue to grow with the Joyful Heart Foundation and Kapiolani Medical Center for Women and Children in Hawaii. The Alaska SHARP program office works in coordination with the Anchorage Police Department, Standing Together Against Rape, Abused Women Aid in Crisis, and the Anchorage Mental Health Office.
- Army (IMCOM) installations (garrisons) collaborate with local domestic violence centers, rape crisis centers, local police departments, and county prosecutors' offices. These efforts include social media campaigns, training, and donation drives during SAAPM. Collaboration also occurs with local hospitals to augment the administration of forensic examinations.

1.9. Incentives to Promote Prevention: Other than the DoD Exceptional SARC and Prevention Innovation Awards, describe your efforts to promote and encourage installation leadership recognition of Service member driven prevention efforts.

The Army has a repository on the Army Knowledge Online (AKO) collaborative website that allows each SARC, VA, and SHARP PM to post and retrieve best practices for prevention. This site allows users to see what their colleagues are doing and share what is working in their own organizations. Additionally, the Army SHARP program features a column in the monthly *SHARP Focus Newsletter* that allows commands to recognize outstanding SHARP PMs, SARCs, and VAs.

Efforts by Army commands to promote and encourage recognition include:

- Several FORSCOM installations have innovative forms of recognition, including:
 - Fort Hood captures “Best News Stories” from each brigade in order to identify individuals who demonstrated bystander intervention or influenced SHARP in their unit. The CG recognizes these Soldiers at the SARB.
 - Fort Bliss has “Speak Up, Speak Out” awards presented by the CG to Soldiers who intervened in a SHARP related incident. This recognition helps reinforce Soldiers' commitment to the SHARP Program.
 - At Fort Polk, the SHARP Guardian's partnership with the Better Opportunities for Single Soldiers (BOSS) program provides first choice options for shows, seating, or other incentives to attend events. Guardians continue to provide peer-to-peer mentoring and bystander intervention.

- During FY16, USAREUR implemented a recognition program for VAs. The award recognizes VAs whose efforts in the prevention of sexual assault and in support of victims have been exceptional.
- USARPAC recognizes their SARC of the year at the USARPAC Army Ball and presents them with an Army Commendation Medal signed by the USARPAC CG. Seven SHARP personnel received Army Achievement Medals for their efforts during the 2016 USARPAC SHARP summit.
- The Joint Base San Antonio (JBSA) SHARP office established the Shelley Botello Compassionate Servant Award in honor of the late Shelly Botello who was a member of the San Antonio SART for 15 years and worked in partnership with the military community training SARCs and VAs.

1.10. Harm Reduction: Describe the metrics being used to assess the effectiveness of Military Service-specific efforts aimed to reduce the impact of high-risk behaviors and personal vulnerabilities.

Army commands rely upon tools at different echelons to assess high-risk behaviors. The primary methods for measuring the likelihood of such behaviors at the small unit level are the Unit Risk Inventory (URI) and the DEOCS. The URI, a component of the Army's Risk Reduction program, is a commander's tool to prevent, reduce, and manage high-risk Soldier behaviors and promote a prevention-focused approach, thus increasing Soldier and unit readiness. The tool itself is a questionnaire that asks respondents about their knowledge and experiences along 14 risk factors: deaths, accidents, injuries, sexually transmitted diseases, suicide gestures and attempts, unexcused absences, drug and alcohol offenses, traffic violations, crimes against persons, crimes against property, spouse abuse, child abuse, and finance difficulties. Commanders may use this information to develop plans to prepare or respond to these factors as necessary and use the tool to compare their unit's result throughout their implementation. Soldiers use the Global Assessment Tool (GAT) to increase awareness regarding high-risk behaviors.

Army policies regarding the use and abuse of alcohol are found in AR 600-85 (The Army Substance Abuse Program) and AR 215-1 (Military Morale, Welfare, and Recreation Programs and Non-appropriated Fund Instrumentalities). Additionally, some installations and commands have adopted more stringent local policies regarding alcohol. For example, some units limit the amount of alcohol Soldiers may have in the barracks. Deployed units ban alcohol consumption in many areas. In a few deployed areas, alcohol is available in limited quantities and only in supervised locations, not in living quarters.

The Army SHARP program office has partnered on a research project with the DoD Sexual Assault Prevention and Response Office (SAPRO) and the Air Force SAPR office. The project is titled "Reducing Alcohol's Impact on Sexual Assault and Other Harmful Behaviors." During FY16, the Institute for Defense Analyses (IDA) continued to research Soldiers' drinking habits to describe the current drinking culture within the Army with a view toward developing alcohol-related interventions to reduce incidents of harmful behaviors, including sexual assault. This study's objective is to help military leaders better understand the current drinking climate so that appropriate interventions may be developed. For selected installations, IDA will document Soldiers' current alcohol consumption patterns, purchase behaviors, and the cultural aspects of alcohol consumption. Data from voluntary and anonymous interviews will help determine what

alcohol policy interventions might address problematic drinking behaviors. Based on this information, IDA will design a controlled trial of alcohol interventions.

Other efforts by Army commands to reduce the impact of high-risk behaviors include:

- In FY16, TRADOC identified some seasonal increases in sexual assaults in the training base (following holiday block leave and during summer months). Further examination showed a higher rate per thousand during these periods. At the end of FY16, TRADOC examined the correlation between leader-to-led ratios, drill sergeant rank waivers, and sexual assault reports in the training base. These metrics will allow TRADOC to look at initiatives to address high-risk periods (holiday block leave and summer training surge).
- USAREUR brigade SHARP personnel developed partnerships with local garrison ASAP staff to collaborate on various training events and promote awareness and prevention throughout the year.
- Installations in USARPAC have a monthly “Health of the Force” meeting, which includes discussions of moderate and high-risk Soldiers in the presence of company and higher echelon command teams. The chaplain, behavioral health specialist, and unit physician’s assistant participate in this meeting.
- CID works with the Office of the Provost Marshal General (OPMG) to produce an annual Army Crime Report that analyzes crimes and provides metrics regarding crime rates, frequency of alleged crimes, offender and victim demographics, and crime locations and times. The crime report assists commanders in reducing high-risk behavior that can lead to crime.
- IMCOM uses the URI as an assessment and prevention tool to identify high-risk behaviors. Provost Marshals identify areas of risk during operational environment assessments and provide recommendations for mitigation to commanders. SHARP personnel work together to identify sexual assault cases involving substance abuse and other relevant crimes against persons.

1.11. Education and Training: Describe efforts to address sexual assault prevention in your organization by educating Service members on healthy relationships. Describe any training, particularly training that focuses on changing skills, attitudes, and behaviors, to encourage Service members to take part in healthy relationships. Describe any increases in complexity or depth of training on healthy relationships over the course of a Service member’s career.

The Army has several focused training efforts to address sexual assault prevention and promoting healthy relationships. For example, the Army SHARP Academy developed training focused on changing skills, attitudes, and behaviors that starts with junior ROTC cadets and progresses in complexity to the senior leader level. This instructor-facilitated training for ROTC cadets focuses specifically on changing behaviors and developing healthy relationships. The ROTC distance learning training provides training on topics such as consent, cultural sexism, healthy relationships, unhealthy relationships, bystander intervention, and verbal defense techniques. Once in the Army, every junior enlisted Soldier and junior officer receives SHARP training to include “Sex Signals.” The Army conducted more than 500 “Sex Signals” training events in the past year. This actor-facilitated interactive training uses humor and audience participation to discuss multiple

scenarios in order to educate Soldiers on sexual harassment and sexual assault topics, to include responding to victims. The most recent training effort is a bystander intervention training support package and facilitation guide for small unit leaders and SHARP trainers.

The Army also provides multiple training opportunities that address male sexual assault and how hazing incidents are often sexual assaults. During the Basic Officer Leader Course (BOLC), BCT, or One Station Unit Training (OSUT), new Soldiers and new leaders receive instructor-led SHARP training that addresses multiple sexual assault topics, to include male-on-male incidents. The Army also has several video vignettes that address hazing and male-on-male incidents.

SHARP training is currently standardized across all precommissioning sources (BOLC-A) within TRADOC. The Center for IMT (CIMT) and the CoE proponents for doctrine review all SHARP training products and lesson plans to ensure learning outcomes relate to the officer career continuum.

USACC leadership ensure ROTC cadres brief all cadets on Army sexual assault policies within 14 days of their entrance into the ROTC program, and continue to reinforce this policy throughout their enrollment. USACC also requires all cadets to complete online SHARP training as a commissioning requirement and includes SHARP training in the classroom curriculum. University and college leaders are embracing opportunities to increase Army ROTC participation in sexual assault prevention planning and strategy development. On numerous campuses, ROTC leaders serve on universities' Title IX and SAPR committees. Additionally, ROTC cadets have actively participated in education and awareness training on campuses to include serving as sexual assault prevention advocates, peer mentors and influencers, and bystander intervention trainers.

USMA includes components of SHARP training in each of its summer military training details and incorporates specific lessons in several of academic classes. This "Academic SHARP Thread" includes classes throughout the 47-month USMA academic curriculum.

SHARP training for new lieutenants in BOLC-B focuses on interpreting the Army SHARP program's prevention strategy and applying sexual harassment response techniques to prevent potential sexual assaults. SHARP training in BOLC-B incorporates "Sex Signals" and "Sex Rules" training and with scenarios where new officers apply leader decision-making in response to different sexual harassment and sexual assault situations.

Training in the Captains' Career Course focuses on company commanders' roles and responsibilities and their ability to foster a climate of prevention. Officer Candidate School training focuses on new leader responsibilities that support the Army's SHARP program, including a description of the sexual harassment and sexual assault prevention strategy. All warrant officer career courses also contain revised SHARP training.

The Army includes SHARP training in the Drill Sergeant School, the Intermediate Level Education (ILE) course, and the remaining NCO PME curriculum:

- Basic Leader Course for Junior NCOs.
- Advanced Leader Course for Staff Sergeants.
- Senior Leader Course for Sergeants First Class.
- Sergeants Major Academy.

In accordance with DoD Instruction (DoDI) 6495.02, all Army battalion/brigade command selectees and Command Sergeant Major (CSM) selectees receive SHARP instruction from the School of Command Preparation (SCP) during the Pre-Command/Command Sergeants Major Course (PCC/CSMC). The PCC/CSMC includes:

- Course topics on leader identity, building trust, ethical decision making, developing a positive environment, Army profession, promote and safeguard (SHARP), developing leaders, and developing vision and leading change.
- Presentations by Army senior leadership and small group seminars facilitated by SCP focusing on personal and leaders' identity, responsibilities, and impacts on organizations and safeguarding their personnel.
- The DAIG addresses SHARP investigations and accountability and the Provost Marshal General (PMG) addresses sexual assault and other sex crimes.

As previously noted, ELITE-SHARP CTT is used to train command teams (company commanders/first sergeants, battalion/brigade commanders, and CSMs) on their roles and responsibilities when addressing issues involving sexual harassment and sexual assault cases. It not only serves as a "how to respond" tool, but by exposing command teams to the training, it also educates them about the seriousness of the issue and motivates them to develop mitigation action plans.

The Army's annual SHARP URT consists of online and face-to-face training where Soldiers learn the key components of the Army SHARP program and the rights of a victim and alleged offender. During this training, vignettes and scenarios highlight peer responses to victims and alleged offenders. The Army updated the annual SHARP URT in FY16 to add information about retaliation and online misconduct.

Additional efforts by Army commands in FY16 include:

- Several commands used subject matter experts from non-DoD affiliated programs that focus on topics such as consent, bystander intervention, respect, and supporting survivors.
- Other commands use contracted venues such as "Got Your Back," the "Blame Game," and "Sex Signals" for education and training on healthy relationships.
- Soldiers from the INSCOM Junior Soldier SHARP Council developed three real-life scenario skits to address alcohol use, sexting, and male sexual assault. Within the skits were demonstrations of bystander intervention techniques to prevent the escalation of the situation to sexual assault.
- During the 2016 SAAPM, U.S. Army Cyber Command (ARCYBER) collaborated with partner organizations to host the "Voices of Men," a one-man play designed to bring attention to sexual assault behaviors and encourage healthy relationships.
- USMA hosted a SHARP Summit, with the theme "Unlocking the Mystery of Human Relationships." The objective was to create an educational program addressing some challenging realities of young adult experiences—hook-up culture, healthy sexuality, pornography, masculinity, media, and rape myths.

1.12. Program Metrics: Describe the metrics used to assess your Military Service Sexual Assault Prevention program. Where appropriate, align the metrics with the 2014-2016 DoD Prevention Strategy elements.

There are four primary prevention metrics cited in the 2014-2016 DoD Prevention Strategy. The first two, related to the prevalence and reporting of sexual assault, are discussed in detail in section 9 (Analytic Discussion) of this report. The other two are associated with bystander intervention and command climate, and are primarily measured using the DEOCS.

One metric, which measures command climate in addressing the “continuum of harm”, has a range of 1 to 5, and combines the results from specific questions in the DEOCS to yield a composite score. The Army’s composite score for FY16 (unchanged from FY15) was 3.3 for junior enlisted and NCOs. Continuum of harm is also assessed in the Workplace and Gender Relations Survey of Active Duty Members (WGRA), which asks respondents who experienced sexual assault whether or not they experienced sexual harassment prior to the assault. The Army attempts to mirror this metric using sexual assault and sexual harassment reports to determine if preventing sexual harassment contributes to the prevention of sexual assault.

The Army has incorporated bystander intervention training as a key component of its prevention program in alignment with the DoD sexual assault prevention strategy. Since the DEOCS is the most widely used and readily available method for measuring the effects of this training, the Army can determine how bystander intervention contributes to sexual assault prevention by comparing scores over time. In the DEOCS conducted during FY16, 87 percent of Soldiers who said they observed a high-risk situation also said they intervened, identical to FY15.

1.13. Prevention Allocation of Time: As a result of ongoing SAPR related surveys, describe your approved initiatives to assist SAPR professionals improve prevention training.

In support of SHARP professionals, the Army hosted its 2nd Annual SHARP PIF on September 28-29, 2016. The PIF covered a wide range of topics to include SHARP policy, SHARP training, male experiences of sexual harassment and assault, and climates of dignity and respect. The Secretary of the Army opened the event by challenging the audience to focus on prevention. He also noted concerns about fatigue related to the SHARP training model and a need to look into more innovative approaches. The SHARP program office provided the audience of SARCs, VAs, and PMs with an overview of the newly developed ELITE-SHARP POST. This training tool provides modules focused on SARC/VA prevention and outreach responsibilities and uses the ELITE platform to deliver the training, which includes upfront instruction, scenarios, and practical exercises. The Army plans to field ELITE-SHARP POST Armywide in 2017.

In an effort to improve the quality of training, the Army SHARP Academy recently implemented a 3-hour learning support activity covering training facilitation techniques within the SARC/VA Career Course. The bystander intervention training taught at the SHARP Academy also assists SHARP professionals with prevention training at organizational and installation levels.

The Army SHARP Academy also uses a questionnaire to evaluate their three resident courses. The questionnaire consists questions focusing on: learning effectiveness, delivery method, time allotted for the training, course content, group activities, logical sequence of lessons, and if the training will help students do their job. Students use the Likert scale for rating each area. The SHARP Academy uses this valuable feedback to revise the curriculum in an effort to improve learning.

During FY16, several Army commands continued to host “Not In My Squad” seminars utilizing CAPE personnel to help develop squad leaders’ ability to build trust with and among Soldiers, promote a “zero tolerance” culture for sexual misconduct, and empower Soldiers to intervene when they see inappropriate behavior.

The Army continues to collaborate with several nationally recognized experts in order to help develop and validate the components of the “I. A.M. Strong” Campaign and facilitate greater outreach skill sets among the Army’s SHARP professionals. These noteworthy experts include:

- Dr. Gail Stern and Christian Murphy are the co-founders of Catharsis Productions. Their program, “Sex Signals,” incorporates humor and audience participation to foster greater understanding about the nature and impact of interpersonal violence.
- Dr. James Hopper, independent consultant and part-time instructor in Psychology, Cambridge Health Alliance, Harvard Medical School. Dr. Hopper's work has focused on the psychological and biological effects of sexual assault and other traumatic experiences.
- Dr. Allen Berkowitz, editor and founder of The Report on Social Norms, served as a subject matter expert and advisor on curriculum development for Army SHARP training.

1.14. Future Efforts: Describe your future plans for delivering consistent and effective prevention methods and programs, including how these efforts will help your Military Service strategies, enable resourcing, and make progress in your overall SAPR program.

Although the Army continued sustainment of the “I. A.M. Strong” Campaign in FY16, going forward the campaign will be embedded in a new SHARP Campaign Plan with a renewed focus on mission readiness. The SHARP Campaign Plan will drive Army efforts from the beginning of FY17 to the end of FY21 and will nest under DoD’s prevention strategy. It includes a comprehensive assessment plan to evaluate structure, resources, and ways of enhancing prevention and response efforts.

In accordance with EXORD 204-16, the Army Reserve, Army National Guard, FORSCOM, TRADOC, and AMC briefed senior Army leaders on their best practices and mitigation plans at the Army Profession Forum in December 2016. This newly established annual event for 2, 3 and 4-star Army commanders serves as the Secretary of the Army’s and Chief of Staff, Army’s vehicle for Armywide promulgation of best practices and lessons learned. From December 2016 to September 2017, all ACOMs, ASCCs, and DRUs must assess and revise their mitigation action plans in conjunction with the Army SHARP program office so they can publish requirements for assessing the performance of their SHARP programs and resources. The assessment results will inform senior leaders’ decisions for facilitating

the reduction of sexual assault throughout the Army. Key areas to be included in the mitigation actions plans are:

- How junior enlisted Soldiers and junior officers are integrated into their first unit of assignment.
- Operation of on-post after-hours activities.
- Personnel vulnerabilities during mobilization, deployment, and redeployment.
- Soldier vulnerabilities during PCS and expiration term of service (ETS).

Initiatives beginning in FY17:

- Sound Off is a town-hall style session to demonstrate that the SHARP program is a senior leader priority and to engage the total force (Soldiers, Civilians, and Family members) in the dialogue on prevention of sexual violence. The first Sound-Off session occurred during the Army Profession Forum on December 8, 2016.
- Mind's Eye II Prevention Program emphasizes prevention across all levels (e.g., individual, peer, unit, Army, and society) with a focus on leader development, unit cohesion, and bystander intervention efforts that reinforce Army Values. The program will enable leaders across all levels to practice the skills needed to recognize emerging challenges and promote climates of dignity and respect. Mind's Eye II consists of evidence-based prevention principles identified by the Centers for Disease Control for reducing sexual violence in the civilian population. Participants will engage in reflective exercises geared towards behavioral change.
- Digital Sexual Assault Survivor (DSAS) is a collaboration between the Army SHARP Academy, the Army Research Laboratory, and the University of Southern California. This project leverages "New Dimensions in Testimony" research, which provides a capability to interact with Holocaust survivors. DSAS will provide the ability to interact with a male sexual assault survivor to increase awareness and reduce stigma for male reporting.
- Installation Environmental Scan leverages the FY14 RAND Military Workplace Study to provide information to develop a SHARP "profile" for 15-20 Army installations. A dedicated team will conduct the scan to identify risk and protective factors, gaps, and best prevention practices, and assess community influence on the rates of sexual assault. The Army will use this information to help leaders at the installation develop prevention initiatives to address their unique circumstances.
- Male Survivor Tribute and Portrait Tour is a multiple installation tour to increase engagement in addressing male experiences of sexual assault. The tour consists of portraits that capture the stories of resilience of Soldiers who have experienced sexual assault. The portraits emphasize sexual assault as a community problem while reinforcing Army Values of Personal Courage and Selfless Service. The tour also includes Soldier perspectives in debunking myths related to the sexual assault of men, reducing stigma, and providing role models.

The Army developed several videos during FY16 which are being finalized and to be used in support of annual, institutional, and operational training:

- What Would You Do? A series of four videos, with two military and two civilian scenarios which put the student into a potential sexual harassment or sexual

assault situation. The scenarios do not play out to a conclusion or an ending. The video series is intended to be used during SHARP annual training and to stimulate student discussion facilitated by SHARP instructors and facilitators.

- “Hazing” and Sexual Assault. A short video that places the viewer at a NCO promotion initiation that goes very wrong. The video can be used in any Army SHARP training and the central ideas teach that hazing is wrong and explains the main concept that hazing can also become a crime of sexual assault.

Future plans from the Army SHARP Academy include:

- Incorporating the ELITE-SHARP POST into its training curriculum.
- Adding a SHARP PM course to the SHARP Academy curriculum. This course will cover roles and responsibilities for assisting the commander with running a SHARP program.

2. LOE 2—Investigation—The objective of investigation is to “achieve high competence in the investigation of sexual assault.”

2.1. Summarize your efforts to achieve the Investigation Endstate: “investigative resources yield timely and accurate results.”

The Army is committed to achieving high competence in every sexual assault investigation. In FY16, CID issued seven operational memorandums to field investigative units highlighting important investigative issues requiring increased attention in order to ensure a more thorough and complete investigative outcome. CID also issued nine policy changes and updated its Sexual Assault Investigation Handbook, thus providing special agents with a comprehensive pamphlet that highlights and reminds agents of critical issues regarding sexual assault investigations such as crime scene processing, victim and suspect interviews and points to remember when investigating alcohol-facilitated incidents.

CID agents collaborate early in the investigative phase with the trial counsel or prosecutor to ensure early and ongoing collaboration throughout the investigative process. CID policy directs supervisors to conduct a case review every 10 working days on open investigations to ensure timeliness, thoroughness, and quality investigations. Additionally, investigations are subject to further supervisory reviews during field office visits by senior management and quality assistance visits by senior special agents. All completed sexual assault investigations receive a secondary review for thoroughness and quality at a headquarters one level above the field office that approved the final report. The USAMPS Special Victim Capability Course (SVCC) training, attended by investigators and prosecutors, emphasizes the need for early and frequent coordination between investigators and prosecutors to ensure evidence meets the elements of proof for a crime.

CID's Inspector General (IG) has made the timely and thorough investigation of sexual assaults a matter of special interest during inspections and case reviews at field investigative units. Supervisors at all levels of command review all sexual assault investigations to ensure they are accurate and thorough. Further, the DoD Inspector General (DoDIG) conducted periodic reviews of sexual assault investigations to ensure they were completed to standard. Their latest review found that only one of 133 CID investigations had a significant deficiency that may have affected the outcome of the case. CID incorporated all deficiencies, shortcomings, or better business practices identified by any of the inspections into the annual refresher training of investigators to improve the conduct of investigations and reinforce the importance of sexual assault investigations.

The CID has established 30 civilian Sexual Assault Investigator (SAI) positions at 23 large Army installations worldwide. These highly trained, qualified, and experienced SAIs lead sexual assault investigative teams by teaching and mentoring less experienced agents, thus leading to more thorough investigations.

The CID has supported its investigators with cutting-edge investigative tools and resources. These new resources include state-of-the-art alternate light source equipment to enhance the ability to detect the presence of forensic evidence at crime scenes, new video cameras, advanced crime scene sketching software in support of crime scene processing, and new cyber tools to conduct field processing of digital evidence to include cell phones to identify additional investigative leads.

Enhanced training and emphasis on timely and thorough investigations resulted in the overall improvement of sexual assault investigations. The DoDIG has continually found that the number of CID investigations with significant deficiencies are less than 1 percent of all the investigations it reviews. CID will continue to advocate for additional investigative resources to address the increased number of reported sexual assaults.

2.2. Provide an update on the expansion efforts for the Special Victim Investigation and Prosecution Capability for MCIOs, to include how congressional plus-up funding was spent to directly support this program.

CID did not receive any congressional plus-up funding to support the expansion of the special victim investigation and prosecution (SVIP) capability. Notwithstanding the lack of funding, CID has implemented special victim capability at all of its locations around the world. CID has established a set of baseline standards that special agents must meet before being selected for advanced training in sexual assault investigations. After completion of the advanced sexual assault training through the Special Victim Unit Investigation Course (SVUIC), CID certifies its agents as meeting the special victim capability requirements and awards an additional skill identifier (ASI) to their military occupational specialty (MOS). This ASI helps track the number of agents trained in this specialty and assists in the assignment process to ensure that at least one special victim capability agent, if not more, is at each CID office throughout the world, to include deployed environments.

At present, approximately 600 CID field agents have received the advanced training in sexual assault investigations. CID agents at all field locations have joined with SVPs, victim witness liaison officers, SARCs, and VAs to form a special victim capability at 63 Army installations worldwide. At some locations, SHARP Resource Centers (SHARP-RC) facilitate team integration, thus making it easier for victims to report and obtain support at these “one-stop” sites. At large installations, special sexual assault investigative teams facilitate timely and thorough investigations.

While special victim capability offenses include allegations of domestic violence (to include sexual assault) and cases of child abuse, those two categories of offenses are not represented in this report, in accordance with guidance from DoD SAPRO.

In FY16, the U.S. Army Trial Counsel Assistance Program (TCAP) focused on expanding its contribution to the SVIP by formally adding the SVPN and SVWL to existing SVP teams. The JAG Corps now has 23 SVPN paralegals assigned to each of the 23 SVPs as legal support. The SVPNs are hand-selected for their prior experience in military justice. In addition to hiring a GS-13 SVWL PM with more than 20 years of providing victim support, 23 GS-11 SVWLs are now assigned to each SVP team with the primary missions of informing victims about the military justice process and coordinating the military and civilian support services available to victims. The SVPNs and SVWLs all receive at least 40 hours of training in military justice working with victims and other areas focusing on support to special victims.

SVWL provide services to all victims, regardless of status, and therefore fill a critical gap in services for non-DoD affiliated civilian victims, who are not statutorily entitled to representation SVC. Candidates for the SVWL positions are evaluated based on their educational background in social work fields and their experience working directly with

victims. As the only civilian member of the SVIP team, the SVWL brings experience with best practices from the civilian sector, continuity, and the ability to establish lasting and comprehensive relationships with military and civilian assistance agencies and civilian law enforcement and prosecution offices.

2.3. Describe your progress in enhancing training focusing on special techniques for victim interviewing by investigators of sexual violence. Include efforts to establish common criteria, core competencies, and measures of effectiveness, and to leverage training resources and expertise.

The USAMPS established the “DoD Best Practice” for sexual assault investigation training. The Army was the first Service to specifically train its investigators in advanced sexual assault investigative practices. The first course, conducted in September 2009, has been updated and improved every year since. The training is an intense 2-week course that establishes common criteria and core competencies in trauma, memory recall, alcohol facilitated sexual assault, same sex sexual assaults, marital sexual assaults, child and domestic violence, false report myths, false recantations, and enhanced interview techniques, as well as working to overcome any possible investigator biases. The USAMPS SVCC teaches investigators from all Services and the Coast Guard, as well as prosecutors from those same departments and the National Guard. The SVCC training includes:

- Understanding and respecting a victim’s immediate needs and priorities.
- Ensuring a victim’s criminal complaints will be taken seriously and fully investigated.
- Establishing transparency and trust with the victim.
- Explaining the investigative process to the victim.
- Employing trauma awareness interview techniques that can assist the victim’s recollection of events.

The common training of both prosecutors and investigators helps the integration and common operating picture needed for successful Special Victim Capability teams. Outside experts such as Dr. David Lisak and Dr. James Hopper (nationally renowned psychiatrists focused on sexual assaults), Dr. Barbara Craig (a child abuse expert), and Dr. Kim Lonsway (a victim advocate expert from Ending Violence Against Women International) provide hours of instruction at the SVCC.

The development of FETI has proven to be a ground-breaking technique to retrieve information from victim interviews that was previously overlooked or unobtainable. The SVCC has been accredited with the Federal Law Enforcement Training Accreditation standards and procedures since 2013.

The effectiveness of SVCC training is difficult to measure. However, indicators of effectiveness include the number of judicial and non-judicial actions taken against offenders, the low number of sexual assault investigations found to be deficient during DoDIG inspections, and the low number of complaints received from victims about investigator misconduct or shortcomings. Currently, these indicators strongly suggest that the SVCC is effective in improving the investigative response to sexual assault allegations.

2.4. Provide an update on your participation in the Defense Enterprise Working Group of Military Criminal Investigation Organizations and Defense Criminal Investigative Service to assess and validate joint investigative technology, best practices, and resource efficiencies benched against external law enforcement agencies.

On May 21, 2014, the Defense Criminal Investigative Organization Enterprise-Wide Working Group (DEW Group) initiated a series of programs to develop functional groups as a subset of the DEW Group to identify, adopt, and resource efficiencies for all the DEW Group members (MCIOs and others). Those functional groups make periodic reports to the DEW Group, providing actionable and logical courses of action for approval by the DEW Group. The functional groups currently formed include forensic investigative equipment (FIE), information technology (IT), and forensic science technician (FST).

The FIE and IT groups developed a DoD forensic material exchange (DFME) concept program that will enhance the transfer of evidence between the MCIOs and USACIL, where it merges with the laboratory's electronic tracking of evidence. The program will allow investigators to track the processing of evidence in the laboratory so that they can keep prosecutors, commanders, and victims updated on the status of investigations. Development and implementation of the DFME program continued in FY16. The DFME is scheduled to achieve initial operating capability in June 2017.

The FIE and IT groups also adapted an evidence collection management and crime scene program from the FBI. This software program enhances crime scene processing and collection of evidence, and provides a standardized report of all the results from the processing of a crime scene by trained investigators.

The FIE group has already consolidated the procurement of a common digital fingerprint scanning system and is developing a common automated crime scene processing system. Both of those efforts are supported by the IT group. The FST group finalized a common training program at the Federal Law Enforcement Training Center, which results in the graduates being certified by a civilian national accreditation organization. The DEW Group continues to find areas of common ground for increased effectiveness and efficiencies for all criminal investigations, to include sexual assault.

Further, the three MCIOs have signed a memorandum of understanding that outlines the procedures at Joint bases on incidents that may cross Services. Generally, the lead MCIO is determined by the Service affiliation of the suspect or the Service affiliation of the victim if the suspect is unknown or a civilian.

2.5. Describe your progress in assessing and coordinating with the United States Army Criminal Investigation Laboratory and Armed Forces Institute of Pathology to improve investigative support and facilitate evidence processing (i.e., turnaround time for processing of Sexual Assault Forensic Examination (SAFE) kits).

The USACIL is a subordinate element of CID, and as such, is integral to all improvements of investigative and forensic processes enacted by CID. It also serves as the forensic laboratory for all the MCIOs, and is key to Air Force and Navy forensic processes. The deoxyribonucleic acid (DNA) branch of USACIL occupies a 26,000 square foot expansion of the existing laboratory. The facility growth is directly attributable

to increasing the DNA analyst staff from 9 to 41 authorizations to support sexual assault casework for all the military Services.

USACIL has an aggressive laboratory modernization program that significantly enhanced the ability to test smaller samples of forensic material, while at the same time reducing processing times. USACIL purchases the most advanced technology and employs robotics in almost every aspect of testing. Some examples are the direct analysis in real time for trace evidence and robotics implementation in all phases of DNA processing (extraction, quantification, and amplification).

USACIL was instrumental in the design of the current DoD Sexual Assault Evidence Collection Kit (SAECK). The enhancements enable long-term storage at room temperature, facilitate consistent collections, and are not gender specific, thus eliminating the need to buy two separate kits. To improve the overall efficacy of collection, USACIL provides routine quality control feedback to the MCIOs and Services on their SAECK kits submitted to the laboratory.

During FY16, USACIL had a median turn-around time of 88 days for sexual assault cases with DNA evidence. This turn-around time is above the CID goal of 60 consecutive days; right at the DoDI 6495.02 goal of 60 working days; and higher than the FY15 turn-around time of 42 days. During FY16, the USACIL underwent an accreditation inspection (conducted every 5 years) which ensures forensic examinations in all disciplines meet rigid international standards. Additionally, new operating software was fielded throughout the laboratory to streamline the flow of evidence, while maintaining chain of custody and documenting forensic examination results in a central database. Each of these efforts significantly slowed the processing of evidence as both efforts took several months to prepare for and undergo. Specific to DNA processing, updated DNA analysis software was also installed that required proficiency training for competency that took 3 weeks to conduct. The DNA examiners also attended National Institute of Justice workshops that took 20 examiners off the bench for 5 days each. The USACIL DNA section also had a 13 percent decrease in available qualified examiners for several non-training related reasons:

- One U.S. Air Force funded position was cut.
- The equivalent of 1 examiner was lost to parental leave (4 of 23 examiners combined for 1 year of parental leave).
- The equivalent of 1.4 examiners for the time (374) required to testify in court related to their professional handling of sexual assault forensic evidence.

Currently, the turn-around-times are showing signs of improvement. Additionally, the CID is also attempting to improve the USACIL manpower situation and submitted an emerging issue in the current FY20-24 Total Army Analysis (TAA) process. The most recent TAA resource review prioritized the USACIL requirement for 34 additional personnel as number 7 of 57 emerging growth issues.

The USACIL's research development program is responsible for managing and directing research and evaluation efforts, identifying needs and gaps in forensic science, and recommending future investments. Current research projects include advanced mixture resolution, open source software development for assessment of DNA profiles, rapid DNA analysis prototype evaluations, body fluid identification method development, next generation sequencing, and sexual assault kit variability studies. USACIL

demonstrated that a dedicated research development program can improve quality and efficiency in sexual assault forensic examinations and DNA capabilities by:

- Increasing the amount of male DNA extracted from sexual assault swabs.
- Enhancing the quality of DNA profiles obtained from “touch” samples (items of evidence that a suspect simply touched and do not require bodily fluids).
- Decreasing the time required to generate a DNA profile from reference swabs.
- Improving the significance of DNA mixture interpretation commonly encountered in a sexual assault to aid in prosecution.

MEDCOM collaborates with the Defense Forensic Science Center (DFSC) to ensure uniform recommendations and updates are made throughout all the Army MTF-SAMFE programs to improve documentation and collection of SAFE kits. The advances in science surrounding SAFE collection require updates especially relating to DNA technology and processing and testing of the SAFE kit. USACIL communicates directly with MEDCOM to achieve proper dissemination of the information within the Army. In addition, USACIL provides instruction at the Army Medical Department (AMEDD) Center and School SAMFEs to ensure successful collection of forensic evidence.

2.6. Describe your efforts to increase collaboration and improve interoperability with civilian law enforcement to include sharing information on Civilian and Military Protective Orders and assure receipt of civilian case dispositions.

The CID routinely conducts joint investigations with civilian law enforcement agencies when felony crimes occur in their jurisdictions and involve Soldiers as suspects and sometimes victims. The investigators work closely together, often partnering to complete various investigative tasks (interviews, crime scene processing, hospital treatment, executing warrants, etc.). While working together, each agency shares its best practices and techniques. CID often adopts civilian best practices and innovative techniques.

At many locations throughout the world, CID agents accompany military victims to civilian hospitals for treatment and administration of a SAFE kit. The interaction between agents, sexual assault nurse examiners (SANEs), local officials, and non-governmental organizations during these visits assists in increasing collaboration with civilian agencies. Additionally, many CID offices are members of local law enforcement working groups or associations that represent local, State, and Federal law enforcement officers and prosecutors. These groups routinely meet on a monthly basis, and the frequent contact and interaction between members and CID agents increases the efficiency and effectiveness of collaboration.

The majority of CID's 450 Army Reserve agents are members of local, State, and Federal law enforcement organizations. These agents allow CID the ability to leverage their talents and civilian law enforcement processes, thus improving CID investigative practices and enabling greater interoperability by tapping their interagency relationships.

The OPMG, through the International Association of Chiefs of Police, hosted and attended several law enforcement meetings and executive sessions addressing sexual violence. Additionally, USAMPS instructors who teach the SVCC taught local law enforcement and prosecutors across the United States, thus fostering increased awareness and recognition of the Army as a leader in the fight against sexual assaults.

2.7. Describe your efforts in providing training and guidance for all first responders to a report of a sexual assault that ensures the preservation of evidence and witness testimony. Also, describe the training and guidance specifically provided to law enforcement on victim trauma and the requirement that only the MCIO shall conduct the formal victim interview. Describe any additional training and guidance provided for locations where the arrival of the MCIO will be delayed (e.g., due to mission requirements or a submarine cannot surface for a week). Address how this training and guidance assists law enforcement and commanders in responding appropriately to reports of sexual assaults in these locations.

The USAMPS teaches all military police (MP) first responders how to respond to a sexual assault allegation. The training includes protecting the scene for subsequent evidence collection by CID, identification and retention of possible witnesses, and procedures to ensure the safety and well-being of the victim (to include emergency medical treatment if needed) and minimal interviewing of the victim to reduce the number of times a victim has to describe the assault. The 2-week SVCC training the agents receive emphasizes victim trauma in almost every individual block of instruction, spends hours on how trauma affects memory and recall, and teaches the FETI as the approved technique to interview trauma victims. Additionally, the civilian SAs, as highly experienced and trained sexual assault investigators, spend time on every sexual assault case mentoring case agents in the appropriate methods to interview trauma victims and investigate such cases.

The CID has located its agents worldwide so that the agents are capable of responding to reports of sexual assault in relatively short periods of time. At some locations (Qatar and the Horn of Africa, for instance), local working agreements have been established with the Air Force Office of Special Investigations (OSI) and the Naval Criminal Investigative Service (NCIS) so that the other MCIO initially responds to do the preliminary investigative efforts until CID can arrive. Army members in the Sinai, Task Force Sinai, and CID entered into an MOA in which a qualified MP Investigator (MPI) is trained at the SVCC before being deployed. Upon receipt of a sexual assault allegation, that MPI does the initial response for the preliminary investigative efforts, while maintaining constant communication and direction from a CID agent in Kuwait until CID agents can arrive on the scene.

The Criminal Law Division of OTJAG works in close coordination with the policy and operations divisions of CID to adopt policy for all first responders, including law enforcement and JAs, which best preserves evidence and witness testimony. OTJAG and CID participate in a weekly meeting with the Army SHARP program office to raise and discuss any developing concerns. In FY16, the planned implementation of integrated training sessions and synchronization of training curriculum for both investigators and prosecutors ensures that SVIP teams have expertise in both the practical and legal aspects of investigating and prosecuting sexual assault allegations and the necessary understanding of how these crimes affect victims and witnesses.

Additionally, Army regulations (AR 600-20 and AR 195-2) require commanders to immediately report sexual assault allegations to CID for investigation so that fully trained expert investigators are the only ones to undertake a sexual assault investigation.

2.8. Describe your future plans for the achievement of high competence in the investigation of reports of sexual assault by MCIOs.

The CID will achieve high competence in the investigation of sexual assaults by sustaining the progress previously achieved in investigative thoroughness and timeliness. The USAMPS continues to refine the SVCC training by incorporating new and proven methods to ensure the course remains on the cutting edge of technological advances and evolving investigative practices. This continued improvement of an existing and successful training course uses advances in psychological and behavioral sciences by working closely with the civilian experts in those fields to constantly update what is taught during the SVCC. CID will continue to send its agents to the SVCC with a goal of training all field agents. As of FY16, about 575 military and civilian agents received the SVCC training.

Agents can improve their investigative skills even further by attending other advanced training in crime scene processing, child abuse, and domestic violence. Personnel attending these advanced courses receive another ASI that highlights their expertise in all areas within the Special Victim Capability system. Additionally, senior sexual assault investigation team chiefs attended the annual Ending Violence Against Women International (EVAWI) meeting in FY16, and then took that training back to their home stations and trained the agents in their local offices. That same practice of ensuring the senior sexual assault investigative team chiefs maintain the highest level of training will continue in FY17 when they will attend the Conference on Crimes Against Women meeting in Dallas, TX. Attending such meetings is just another way that increases the collaboration efforts of CID with civilian subject matter experts.

The CID pamphlet on sexual assault investigation is updated annually and immediately distributed throughout CID in order to codify emerging best practices. CID will continue to argue for a revision of the Army's restrictive requirements on pre-text telephone calls and communications (a common best practice by civilian law enforcement in sexual assault investigations) that hampers collection of the best evidence.

Additionally, CID is currently staffing a concept plan with the Department of the Army to increase the number civilian SAs from 30 to 45. The additional 15 SAs will be stationed at mid-sized Army installations to handle the increased number of sexual assaults, child abuse, and domestic violence cases, as well as provide much needed local expertise and training to the military agents investigating these complex and difficult crimes.

3. LOE 3—Accountability—The objective of accountability is to “achieve high competence in holding offenders appropriately accountable.”

3.1. Summarize your efforts to achieve the Accountability Endstate: “perpetrators are held appropriately accountable.”

The Army’s efforts to hold alleged offenders accountable show clear and significant progress. Since the inception of its unique SVP program in 2009, the Army has seen a 68 percent increase in the number of sexual assault courts-martial, while maintaining conviction rates between 60 and 70 percent. During the same period, the number of criminal convictions and punitive discharges for all sexual assault and serious family violence offenses more than doubled. Prosecution rates in the Army reflect a healthy judicial system, in which commanders demonstrate a commitment to good order and discipline by pursuing cases that serve the interests of victims and our communities.

The Army continues to enforce policies that identify Soldiers who do not adhere to Army Values and undermine readiness with sexual misconduct. These policies elevate the decision to retain any Soldier convicted of a sex offense to the Secretarial level and memorialize judicial, non-judicial, or adverse administrative actions taken against a Soldier for a qualifying sex offense in the Soldier’s personnel records.

The Army takes every allegation of sexual assault very seriously and only experienced and specially trained agents investigate these allegations. The goal is to produce a timely and thorough investigative product that a commander can use to initiate appropriate action against an alleged offender. An investigation is not considered closed until the commander completes and returns a DA Form 4833 (Commander’s Report of Disciplinary or Administrative Action) to the investigating CID office. The result of the action taken is entered into Army Law Enforcement Reporting and Tracking System (ALERTS) database.

In an effort to provide further transparency for leaders and support appropriate accountability efforts, in FY16 the Army proceeded with implementation of the commander’s risk reduction dashboard. The dashboard is a digital tool, which provides commanders a comprehensive picture of a Soldier’s disciplinary history and high-risk behaviors and risk factors.

3.2. Provide an update on SAPR training provided to those who are affiliated with the Special Victim Investigation and Prosecution Capability program (paralegals, trial counsel, special victims’ counsel/victims’ legal counsel, and victim-witness assistance personnel) for responding to allegations of sexual assault.

In FY16, the JAG Corps continued to improve training for those affiliated with the SVIP program. Mandatory courses for all practicing Army JAs includes the officer basic course (OBC) for all incoming JAs, and the graduate course for JAs newly promoted to the rank of Major (O4). In these courses, a JA with experience prosecuting sexual assault cases trains future chiefs of justice (CoJ), trial counsel (TC), SVC, and SVP on sexual assault prevention and response. Prior to practicing as a TC or CoJ, additional intermediate courses (Intermediate Trial Advocacy Course, New Prosecutor’s Course, and Military Justice Manager’s Course) are required within months of assuming the position. Personnel for all SVIP positions are selected from qualified JAs who have earned military

justice skill identifiers based on their attendance at specialized training courses and experience in prior military justice positions.

SVCs are only able to be assigned victim clients after certification at the SVC certification course. All of these courses offer updates in the area of victim rights and sexual assault response and prevention.

Paralegals receive sexual assault response and prevention instruction during a combined training offered by the Paralegal Non-Commissioned Officer Academy at The Judge Advocate General's Legal Center and School (TJAGLCS). VWL receive instruction during a weeklong VWL course at TJAGLCS and the SVWL receive additional instruction on processing sexual assault cases.

3.3. Describe your efforts to ensure that the personnel records of Service members convicted by court-martial, adjudged non-judicial punishment, or other punitive administrative action for a sex-related offense are updated to reflect punitive action taken, as appropriate.

The Army has put in place a system that ensures personnel records of Soldiers convicted by court-martial, adjudged non-judicial punishment, or other punitive administrative action for a sex-related offense are updated to reflect punitive actions. Army Directive 2014-29 (Inclusion and Command Review of Information on Sex-Related Offenses in the Army Military Human Resource Record) requires commanders to ensure that the permanent record be annotated for Soldiers who receive a court-martial conviction, non-judicial punishment, or punitive administrative action for a sex-related offense.

The U.S. Army Human Resources Command (HRC) issued military personnel (MILPER) message 15-052 (Revision of Inclusion and Command Review of Information on Sex-Related Offenses in the Army Military Human Resource Record). This MILPER message identifies requirements to place a notation of any court-martial conviction, non-judicial punishment, or punitive administrative action for a sex-related offense in the performance-disciplinary folder of the Army Military Human Resource Record (AMHRR). Commanders must coordinate this requirement with their local staff judge advocate (SJA), who ensures the offense meets the criteria for a sex-related offense in accordance with Army Directive 2014-29, and that the Soldier was given notice and opportunity to respond to punitive administrative actions. SJA offices forward validated offenses by memorandum to HRC via encrypted email.

All Army activities (ALARACT) message ALARACT 058-2016 (Guidance for Processing Assignment Consideration Codes for Documented Sex-Related Offenses and Convicted Sex Offenses) states that commanders will ensure that a Soldier's permanent record is documented for those who receive a court-martial conviction, non-judicial punishment, or punitive administration action (to include separation in lieu of court martial) for a sex-related offense. Further, lieutenant colonel (LTC/O5) commanders, or higher, will review the history of any Soldier permanently assigned to their unit to determine if they have a history of sex-related offenses to ensure they are aware of the history of sex-related offenses of Soldiers within their formation. Upon discovery that a Soldier within their command received a sex offense conviction that did not result in a punitive discharge or dismissal, commanders will initiate an administrative separation action, regardless of when the conviction for a sex offense occurred.

Battalion and brigade level commanders attending the Senior Officer Legal Orientation (SOLO) Course at TJAGLCS receive a specific block of instruction which includes the requirement to ensure personnel records include any punitive action taken for a sex-related offense. Every general officer attends the General Officer Legal Orientation (GOLO), a one-on-one desk side briefing covering victims' rights and convening authority responsibilities/duties regarding the requirement to include punitive actions in a Soldier's personnel file. Company commanders receive onsite training from a trial counsel serving the jurisdiction on victims' rights, reporting, and processing sexual assault cases. Finally, TC are trained on the requirement to place punitive actions into the Soldier's personnel file during OBC and Intermediate Trial Advocacy training.

Additionally, Army Directive 2013-21 (Initiating Separation Proceedings and Prohibiting Overseas Assignment for Soldiers Convicted of Sex Offenses) requires that any Soldier convicted of a qualifying sex offense at a General or Special Court-Martial or in a civilian or foreign court is processed for separation. Any recommendation to retain a Soldier convicted of a qualifying offense must be approved by the Secretary of the Army. HRC, in conjunction with the Criminal Law Division of OTJAG, oversees compliance with the directives.

3.4. Describe your efforts to ensure SARC, SAPR VA, MCIO, and commander knowledge of recent victim rights and military justice updates in FY16.

In FY16, the Criminal Law Department, TJAGLCS, and TCAP built upon a continuing relationship with the Army SHARP Academy through the provision of military justice training to SARCs and VAs 10-12 times per year. Each daylong training is personally delivered by a JA with valuable and substantial experience prosecuting cases involving sexual assault. The training includes updates to victim's rights, the rules for courts-martial, military rules of evidence, Article 120, retaliation, commanders' responsibilities to the victim, and military justice procedures. Recent efforts to improve the curriculum include the development of confidentiality and ethics instruction, and a renewed focus on the SARC and VA's relationships to the victim, SVC, and command.

Battalion and brigade level commanders attend the SOLO Course at TJAGLCS. In FY16, SOLO was offered 7 times, during which a Criminal Law department faculty member taught commanders a specific block of instruction on sexual assault response and prevention. Every general officer attending GOLO receives instruction covering victims' rights, convening authority responsibilities/duties, military justice updates, retaliation issues, and prevention strategies. Company commanders receive onsite training from a TC serving the jurisdiction on victims' rights, reporting, and processing sexual assault cases.

JAs also advise first responders locally at every Army installation about the victim advocate-victim privilege set forth in Military Rule of Evidence (MRE) 514. The SVCC training at the USAMPS teaches MRE 514 to all investigators. Additionally, annual training for CID agents covers MRE 514. Further, this privilege is noted twice on the Department of Defense (DD) Form 2910 that a victim signs.

Army CID publishes a policy memorandum to disseminate new policies or procedures having to do with recent victim rights and military justice updates. CID also publishes an operational memorandum to clarify or emphasize an issue or topic having to do with

recent victim rights or military justice. Those policy and operational memoranda then become a focus during CID IG inspections, and part of the second level review processes that CID uses in all sexual assault investigations.

3.5. NGB, provide an update to your efforts to ensure that all Unrestricted Reports of sexual assault (both Title 10 and 32 status) are referred to the appropriate MCIO, civilian law enforcement, or to the NGB Office of Complex Administrative Investigation.

N/A. NGB only.

3.6. Describe your current policies and procedures to ensure alleged offenders are provided due process rights and protections afforded by the Constitution and the Uniform Code of Military Justice.

In accordance with the UCMJ, all Soldiers suspected of committing a crime are advised of their right against self-incrimination and their right to obtain legal representation before being interviewed by a CID agent utilizing a DA Form 3881 (Rights Warning Procedure/Waiver Certificate). Likewise, searches and seizures of a suspect's possessions, residence, or person are only conducted after either consent from the individual is obtained or a search warrant is issued by a military magistrate.

Since 1980, the U.S. Army Trial Defense Service (USATDS) has provided military defense counsel to Army personnel whenever required by law or regulation and authorized by The Judge Advocate General (TJAG). USATDS also manages programs, policies, and training that enhance the effective and efficient use of defense counsel resources, including the professional qualifications of all personnel providing defense services. More particularly, USATDS ensures that over 150 active-duty defense counsel are available when and where needed by stationing them in 8 regions and in over 40 field offices worldwide. USATDS provides world-class defense counsel training through the Defense Counsel Assistance Program (DCAP) which provides a series of training events at key points in a defense counsel's tour of duty. The Office of the Chief, USATDS manages all aspects of the Army defense function to include planning, resourcing, personnel administration, and professional responsibility supervision. In essence, USATDS ensures that alleged offenders are provided due process rights and protections afforded by the Constitution and the UCMJ.

3.7. Provide an update on the Special Victims' Advocacy Program that affords legal consultation and representation for Service members, eligible adult dependents, and DoD civilian employees who report being a victim of sexual assault, to include how congressional plus-up funding was spent to directly support this program. Describe how your Military Service is implementing the Special Victims' Advocacy Program for DoD civilian employees. Provide an update on how you are informing officers, noncommissioned officers (NCOs), and junior Service members of the availability of Special Victims' Counsels (SVCs)/Victims' Legal Counsels (VLCs). Include your Military Service's metrics for measuring the success of the program.

The Army continues to build upon the success of the SVC program. In FY16, the Army filled all 45 authorizations for full-time SVCs with JAs with criminal law experience who possessed the right temperament for this important role. In addition, SJAs provided

additional part-time SVC to expand the number of SVC to 107 (45 full-time and 62 part-time). These SVC served 2,979 clients, 1,508 of which were new clients during FY16 and the remaining were carry-over cases.

Also during FY16, the SVC program used plus-up funding from Congress to maximize and leverage current trial advocacy training by sending SVC to various functional training opportunities such as the Intermediate Trial Advocacy Course, the Sexual Assault Trial Advocacy Course, and the Air Force SVC Certification Course. The SVC program held three courses at TJAGLCS to include two certification courses and a Child Victim's Advocacy Course. The SVC Certification Course at TJAGLCS developed a specific block of instruction for all SVC on the representation of DoD Civilian employees. The course also includes the discussion on strategies for SVC to enforce existing regulations dictating that SARCs, SAPR VAs, military investigators, healthcare providers, trial counsel, and VWLs inform victims of sexual assault of their right to an SVC prior to questioning. The course also discussed strategies to combat retaliation. The SVC program also used the funding to host three operational training events that included supervisors of SVC, legal administrators, and paralegals, both civilian and military. In FY16, the Army trained 500 personnel in support of the SVC mission.

The SVC program used plus-up funding to maximize face-to-face interaction between SVC and clients by ensuring SVC were properly funded to travel to their client's destination as necessary to provide the full spectrum of legal assistance and military justice matters. Additionally, funding provided every SVC with a cell phone to maximize communication with their clients when face-to-face meetings were not feasible.

Informing the Army population about SVC services was a top priority of the SVC program during FY16. Through coordination with the Army SHARP program, SVCs provide unit level training regarding the services they provide. Additionally, SVCs are not only encouraged to attend the installation SARB, they are cited by commanders as a valuable resources during these forums. Survey data also indicates that Soldiers who report a sexual assault rate their SVC as a very valuable resource. In order to increase awareness of the program, encourage reporting, and build confidence in the military justice system, the Army produced a video for unit level training that introduces Soldiers to both the SVC and the SVP program. The video featuring real investigators, prosecutors, SVCs, and witness assistance personnel will be ready for release in 2017.

Training in SVC services is taught at the GOLO and SOLO classes held at TJAGLCS, USAMPS, and the SHARP Academy. In addition to training events, SVCs in the field disseminate information about the program through local news articles. Last year, DoD SAPRO produced an infomercial for Armed Forces Network about SVC services.

The Army evaluates the SVC program as part of its legal assistance program, to include utilization of client comment cards at the legal offices. Victim feedback is also captured in the memoranda for record that SVC file with the SVC PM office at the conclusion of courts-martial, and then "lessons learned" are shared with TJAGLCS to incorporate into future JAGC training. Victims also provide feedback by participating in panel discussions at the twice-annual SVC Certification Courses, annual SVC training, speaking opportunities at outside agencies, and congressional engagements.

The SVC PM, deputy PM, and chief of the legal assistance policy division conduct regular staff assistance visits to field installations Armywide to meet with stakeholders, including SHARP personnel. The SVC PM conducts quarterly video teleconference discussions with SVC to disseminate information and receive feedback. The SVC program utilizes the MilSuite collaborative website to disseminate information and facilitate collaboration among SVCs in the field. TJAG and the four other JAG general officers personally conduct site visits to SJA offices and evaluate the program as part of TJAG's Article 6, UCMJ responsibilities. In addition, TJAG personally hosted a retaliation roundtable discussion with SVCs in conjunction with a congressional engagement to hear about issues firsthand.

The SVC program receives evaluations of the SVC Certification Course from student evaluations of the course. The Army receives feedback from sister Service SVC program leadership as well.

The SVC program also receives indirect feedback on the success of the counsel by way of the follow-on assignments. SVCs generally received their requested assignment and report that they believe the position is career enhancing. In addition, promotion rates of those who have served as SVCs mirror those of the board as a whole.

3.8. Describe your future plans for the achievement of high competence in holding offenders appropriately accountable.

The Army continues to recruit and retain the highest quality attorneys to serve as JAs. Army selection boards range from 8 to 24 percent acceptance rates over the past decade, with applicant average Law Scholastic Aptitude Test scores in the 75th-80th percentiles and law school grade-point averages of 3.5. A substantial number of applicants have prior criminal justice or litigation experience. The Army centrally manages military justice assignments for JAs through careful screening with key positions personally selected by TJAG. Military justice skill identifiers create a pool of potentially qualified military justice practitioners for JAGC personnel specialists to use to assign JAs to military justice assignments at all levels of practice.

The Army maintains a specialized capability in sexual assault and complex sexual assault litigation. The SVP program, the centerpiece of the Army's SVIP, are hand-selected from the most talented and experienced JAs to head teams of investigators, paralegals, and victim assistance personnel to oversee the investigation and prosecution of sexual assault and domestic violence cases. Civilian highly qualified experts for the prosecution work alongside the SVP teams providing individual case assistance and training. Finally, TCAP has a hand-selected group of resident experts in complex litigation capable of "surging" forward to work with JA practitioners who are integrated and embedded into commands. Civilian highly qualified experts also work for DCAP and provided day-to-day support to defense counsels in the field.

Institutional training occurs at the Army's TJAGLCS, the only American Bar Association certified military service school that includes basic and advanced graduate course and specialized courses for trial advocacy and military justice management at all levels. The TCAP/DCAP programs provide specialized functional training and on a wide array of

courses annually. Training developments at the institutional, functional, and individual levels provide synchronized, integrated military justice training across a JA's career.

In FY16, the Army, through a newly hired civilian Chief of Advocacy assigned to the Criminal Law Division of OTJAG, developed an ambitious set of initiatives to improve training for all JAs to achieve the highest competence in litigation of all offenses, including sexual assault allegations. The civilian Chief of Advocacy brings decades of civilian experience in prosecution, defense, and advocacy instruction with ties to existing civilian governmental and non-profit training organizations.

- The first initiative improves existing resources available to all JAs for use in local training. The updated Army advocacy trainer is a digitized resource, with embedded links to secondary material, used with video trial vignettes to teach modern evidentiary foundations and trial techniques.
- A second initiative involves outreach to civilian district attorney's offices and other training organizations to observe and study best practices in special victim training and to receive outside, independent candid assessments of Army JA training from established experts in attorney advocacy training. To date, outreach efforts include prosecutors' offices in Cook County, IL (Chicago), Maricopa County, AZ (Phoenix), Dallas County, TX (Dallas), the National Advocacy Center, the National District Attorney's Association, and the American Prosecutors Association.
- A third initiative seeks to determine best practices and model memorandums of understanding between installation SJA and local civilian prosecution offices to address cases of dual military and civilian jurisdiction.
- A final initiative involves forging a relationship with renowned advocacy organizations such as the National Advocacy Center and the National District Attorneys Association in order to share best practices to ensure military justice training in sexual assault is the most current, sophisticated, and professional.

4. LOE 4—Advocacy/Victim Assistance—The objective of advocacy/victim assistance is to “deliver consistent and effective victim support, response, and reporting options.”

4.1. Summarize your efforts to achieve the Advocacy/Victim Assistance Endstate: “high quality services and support to instill confidence and trust, strengthen resilience, and inspire victims to report.” Include how competency, ethical, and foundational standards established in DoDI 6400.07, enclosure 2, are met.

It is the Army’s goal to eliminate sexual assault; however, when incidents do occur, the Army treats victims with dignity, respect, and professionalism. As noted in the discussions of LOE 2 (Investigation) and LOE 3 (Accountability), the Army’s cadre of SAIs, SVPs, and SVCs help ensure that sexual assault victims receive the highest quality of professional and compassionate services during the military justice process. Likewise, other responders such as SARCs, VAs, and healthcare personnel play essential roles providing the care and advocacy that victims of sexual assault deserve. To ensure a consistent advocacy capability, the SHARP Academy now manages the training of SARCs and VAs at the brigade and higher levels. The SHARP Academy also trains command SHARP trainers.

Twelve designated installations are utilizing the SHARP-RC model, based on the SART best practice, which enables SHARP assets currently serving on the installation to enhance case coordination and collaboration. A SHARP-RC SART consists of four primary responders, including SHARP VAs, medical providers from the MTF, criminal investigators from the supporting CID, SVCs, and military prosecutors from the supporting SJA. SHARP-RCs provide a central location of services for victims, support to the chain of command, and coordination of all SHARP education and training expertise at an installation. The Army supports maintaining SHARP-RCs at installations where the commands deem them effective.

In order to ensure that the SHARP PMs, SARCs, and VAs have the most up-to-date information, the Army SHARP program office conducts many outreach engagements throughout the year. This ensures that SHARP professionals are able to provide high quality services to sexual assault victims. These engagements include:

- The 2nd Annual SHARP PIF, held September 28-29, 2016. Command SHARP PMs, SARCs, and VAs attended the forum which included a briefing from the Secretary of the Army, a male survivor experience session, CID, OTJAG, and the Office of the Surgeon General (OTSG) sessions and best practices.
- Monthly webinars, which provide relevant training to Army SHARP professionals.
- Bi-annual newsletters to share information and best practices.
- Monthly SHARP PM meetings to share relevant program updates with commands.
- Command-level SHARP events attended by Army SHARP program office personnel in order to provide timely program information, answer questions and identify areas of improvement.

Additional efforts include:

- The Army released a 23-minute training video titled “SARC/VA Victim Response” that focuses on the role of VAs. The video is currently being used at the Army SHARP Academy in the SARC/VA Career Course and locally in the 2-week SHARP Foundation Course. Students experience a day in the life of a VA via a sexual assault scenario in which a VA responds to a sexual assault of an Army Soldier. The objective of the video is to teach new SARCs and VAs about their role and best practices in the SHARP program, as well as to give them a glimpse into what is required to do their job. The scenario story is fictitious but features actual Army SARCs and VAs who share their experiences.
- MEDCOM published a supplement to MEDCOM Regulation 40-36, which directs the establishment of the MTF Sexual Assault Medical Management Office (SAMMO), led by a SAMD who is responsible for ensuring timely, accessible, and competent care to patients with a complaint of sexual assault. The SAMMO unites the SAMD with the SACC, sexual assault clinical provider (SACP), sexual assault behavioral health (SABH) provider, and SAMFE. Additionally, it outlines all of the training requirements, competency, and certification process for any SAMFE who conduct SAFEs in MTFs. Currently, there are over 300 healthcare providers trained as SAMFEs, SACCs, SABH providers, and SACPs across 34 MTFs.
- Army installation SHARP offices continue to maintain and establish MOAs with local agency and community organizations to assist in providing services to sexual assault victims when the installation cannot provide such services. Local law enforcement offices provide services to civilian victims when an incident occurs outside of the installation’s jurisdiction. Local law enforcement offices also collaborate with the Army CID when cases occur off post and the alleged offender is a Soldier.

With regard to responsibilities established in Enclosure 2 of DoDI 6400.07 (Standards for Victim Assistance in the Military Community), the Army’s SARC and VA Certification Courses include:

- Effective Communication. Topics addressed in the training include active listening, non-verbal and verbal communication, maintaining and establishing boundaries of communication, ethical responsibilities, and conflicts of interest.
- Response to Victimization. A detailed discussion on the dynamics of ‘Victimology’ and victim blaming theories identifies myths that facilitate victim blaming and re-victimization, describes male victimization, and explains healing and recovery for victims of sexual assault.
- Crisis Support. Addresses the importance of privileged communications, privacy rules, and limitations on disclosure of information to other parties in crisis or dangerous situations. The training emphasizes that all personally identifiable information (PII) is collected, maintained, disseminated, and used in accordance with DoD policies.
- Ethical Standards. The importance of abiding by standards for appropriate and ethical conduct when performing duties as a SARC or VA goes hand in hand with

providing high quality services. The training identifies ways of documenting and administering services to ensure quality and responsiveness to victims' needs.

- Access to Resources and Services. Students receive detailed information on the availability of resources and services appropriate to their needs.
- Interaction with the Military Justice System and Medical Personnel. The training stresses that SARCs and VAs are not legal or medical professionals and that it is their job to get a victim/survivor to those professionals for assistance with medical and legal advice or services.

4.2. Describe your current oversight processes over SAPR, to included reviewing credentials, qualifications, continuing education, inappropriate behavior, and revocation of certification, if appropriate.

The Army continues to ensure those entrusted to provide advocacy to sexual assault victims are the best qualified and the best trained. In FY16, the Department of Defense Sexual Assault Advocate Certification Program (D-SAACP) certified 2,358 Army personnel and recertified 1,676. Currently, 8,666 Army personnel are D-SAACP certified.

Based on an internal assessment of its processes, the Army continues to enforce stringent screening criteria and background checks for personnel serving as SARCs, VAs, and SHARP PMs. The requirement mandated by the Secretary of the Army in FY14 is still in place for suitability checks for these "positions of trust" to ensure that only the best-qualified and most suitable individuals serve in these important positions. These processes and procedures help commanders actively select the best personnel. To codify all of these policy improvements, the Army published EXORD 193-14 (Screening of SHARP Program Personnel and Others in Identified Positions of Significant Trust) directing an enduring process for screening sensitive positions, including SARCs/VAs.

The Army screening process consists of local and national criminal background checks, including the National Sex Offender Registry and public websites. These checks consist of mandatory disqualification criteria for perpetrators of serious crimes. The checks also consist of screening for minor offenses that can be waived after general officer (GO) consideration and approval. In either event, Soldiers who are precluded from serving in a position of significant trust due to misconduct have that stipulation recorded in their permanent personnel file via a GO-signed memorandum. This memorandum prevents the Soldier from being considered for another position of significant trust.

If there is an allegation made against a SARC or VA, the command must immediately notify a SARC or VA in writing that a complaint has been received, an inquiry has been initiated, and their authority to perform SARC/VA duties are suspended or revoked pending the outcome of an investigation. The SARC/VA is also notified of all rights to appeal. The memorandum must be signed by a GO or a member of the senior executive service (SES) and sent to the Army SHARP program office to be forwarded to the certification authority until final determination of the investigation. Pending the investigation outcome, the commander will determine, in consultation with the SJA, whether there is preponderance of evidence to support the complaint. If it is determined that a preponderance of evidence exists, the commander will suspend or revoke the D-SAACP Certification. A follow-up memorandum is sent to the Army SHARP program

office, signed by a GO or SES to confirm the final disposition to revoke or retain certification. The SHARP program office forwards the final memorandum to the D-SAACP certification authority for final disposition.

In support of the credentialing process, MEDCOM continues to conduct behavioral health interviews (BHIs) for individuals assigned to SARC/VA positions. The BHI process includes a patient health questionnaire, post-traumatic stress disorder (PTSD) assessment, and the alcohol use disorders identification test.

During FY16, the Army continued to offer the 24-Hour SARC/VA Recertification Course (online) for those individuals who need continuing education credits to meet the 2-year recertification requirements as outlined by the D-SAACP. Commands may also send a copy of training they develop or conduct to the Army SHARP program office for continuing education unit (CEU) approval. The CEUs assist with meeting the 32-hour D-SAACP recertification requirements.

4.3. Describe your current progress to ensure SAPR personnel meet D-SAACP screening requirements prior to attending your Military Service's SAPR certification training.

The Army follows the D-SAACP procedures, which certifies SARCs and VAs through the National Organization for Victim Assistance (NOVA). Army SARCs/VAs who complete the SHARP 80-hour Foundation Course, or the 7-week Career Course, submit a DD Form 2950 (Department of Defense Sexual Assault Advocate Certification Program Application Packet) to the DoD D-SAACP office for processing. In accordance with Army EXORD 193-14, unit commanders must ensure their SARCs and VAs pass a background check by HRC prior to attending training. Additionally, the Army SHARP Academy confirms each student has a cleared local screening prior to attending a course and will not issue a training certificate until confirming full background screening is complete.

The Army SHARP program office monitors the status of Army D-SAACP applicants for approval and disapproval. This information is sent to SHARP PMs at each Army command in order to track the credentialed status of all SARCs and VAs. Additionally, the Army SHARP program office facilitates revocation of credentials, when applicable.

In accordance with a memorandum signed by the Secretary of the Army on May 28, 2013, the authority to appoint SARCs is reserved to the first GO or SES in the chain of command. The authority to appoint VAs is reserved to the brigade commander (colonel/O6).

4.4. Describe your Military Service's efforts to encourage SARCs and SAPR VAs to renew their certification at a higher level in order to increase the quality of victim assistance providers.

DoD SAPRO and Army SHARP program office offer many training opportunities for SARCs and VAs to obtain their CEUs and keep them current. These opportunities are on-line, through webinars, and in a classroom setting.

Army commands monitor certification and recertification requirements for their SARCs and VAs. Some keep track of the number of hours SARCs and VAs provide sexual assault victim advocacy services and use this information to determine if the individual is

eligible to apply for a higher level of certification. If so, an application is completed and submitted to NOVA for approval.

4.5. Describe how you addressed any challenges that SARCs and SAPR VAs have in obtaining continuing education training, to included training on emerging issues and victim-focused trauma-informed care.

The Army SHARP program office mitigates challenges with SARC/VA continuing education through the SHARP outreach webinar program. This program hosts subject matter experts who address emerging issues such as male sexual assault, retaliation, and re-victimization. Offered on a monthly basis, these webinars provide 1.5 CEUs per session. SHARP outreach webinar efforts included engagements with:

- OneVoice, which presented on their outreach initiative “The Bar Program” which shows local establishments how alcohol is used in sexual assaults and what measures can be used to prevent DFSA.
- FORCE! which discussed their monument quilt outreach initiatives.
- Dr. Alan Berkowitz who discussed the role of leadership in sexual assault prevention programs.
- Dr. Heather McCauley, University of Michigan, who discussed providing support and services to lesbian, gay, bisexual, and transgender (LGBT) victims of sexual assault.
- Dr. Elspeth Cameron Ritchie, Department of Veterans Affairs, who discussed trauma and sexual assault.

When funding is available, Army units prioritize sending SARCs and VAs to conferences that provide CEUs for certification. Commands with deployed units often conduct video teleconferences that offer greater flexibility and opportunities for personnel to train despite the challenges of deployment. Other command initiatives include:

- INSCOM maintains a list of online resources where VAs can gain CEUs for completion of online courses.
- ARCENT uses webinars, online training, healthcare professionals, and legal personnel as assets to provide training to SHARP personnel. ARCENT personnel rely heavily on online training for CEUs while deployed.
- IMCOM has community partnerships that provide opportunities for shared training with universities, local rape crisis centers, shelters, and health departments.

4.6. Describe your continued efforts to ensure that the 24/7 DoD Safe Helpline has accurate contact information for on-base SAPR resources (i.e., chaplains, SARCs, military police, and medical personnel).

The Army Audit Agency (AAA) continues to perform periodic audits on the Army’s portion of the DoD Safe Helpline. For FY16, AAA completed its seventh audit of the sexual assault related phone numbers. During this audit, the Army had successful call rate of 94 percent for calls made to SARCs, an increase from a 75 percent successful call rate for calls made to SARCs during the previous audit performed in FY15.

The Army also performs its own validation of DoD Safe Helpline phone numbers for SARCs and VAs. Since 2014, the Army has completed daily calls from the Army Operations Center (AOC) to validate all installation 24/7 phone numbers at least twice a year. Each command also performed monthly calls on 20 percent of the SARCs within their organizations and reported these results to the Army SHARP program office. The average successful call rate for these checks was 91 percent for SARCs and VAs.

In addition to the AOC quality control calls, the Army SHARP program office, AAA, and DoD SAPRO conduct compliance checks semi-annually. From October 2015 through September 2016, the quality control accuracy rate for SARCs averaged 96 percent and 73 percent for other responders (legal, medical, chaplain, and law enforcement).

4.7. Describe your efforts to make Service members aware of SAPR resources, such as the DoD Safe Helpline.

The Army places great emphasis on advertising the DoD Safe Helpline and the Army SHARP Sexual Harassment hotline in all of its marketing materials, including printed materials, videos, radio spots, and websites. The information is distributed to approximately 1.4 million Soldiers, Army Civilians, and Family members.

Efforts by Army commands to publicize resources include:

- FORSCOM units maximize use of social media such as installation websites, SHARP websites, Facebook, and Twitter to ensure the widest dissemination of information. Installation newcomer briefings also inform newly arriving Soldiers. Units also use the “We Care” smart-phone application (app) which allows access to responder contact information and support services available on the installation.
- AMC publicizes the DoD Safe Helpline and the local installation 24/7 SHARP hotline on every installation website. AMC incorporates SHARP messages into town halls, email messages, speaking engagements, newsletters, and social media posts throughout the year.
- USARPAC SHARP personnel discuss resources, including the DoD Safe Helpline, in all SHARP training. 24/7 helpline information is on websites, brochures, and posters across the command and is an inspection item during the USARPAC organization inspection program (OIP).
- USAREUR developed a SHARP website located at www.eur.army.mil/SHARP to publicize the USAREUR 24/7 sexual assault helpline numbers and provide USAREUR Soldiers, leaders, Army Civilians, and Family members with pertinent information and resources.
- MEDCOM has posters and banners throughout the command with the DoD Safe Helpline number. High traffic areas have pocket cards that contain the number.
- U.S. Army South (ARSOUTH) uses posters, handouts, and flyers throughout unit areas to make all Soldiers aware of the resources. All remote units also have their 24-hour and DoD Safe Helpline telephone numbers posted on their homepages.

- ARCENT advertises the Safe Helpline on posters in high traffic areas, on SHARP marketing handouts, and on SHARP personnel signature blocks. Helpline information is also included at Newcomer's briefings and during in/out processing.
- Several INSCOM units distribute wallet-sized resource cards. The cards have the SARCs duty phone numbers, Installation SHARP Hotline number, and the DoD Safe Helpline number.
- IMCOM garrisons have extensive public access internet sites that help share information on SHARP resources. Garrisons manage large social media campaigns to augment command messaging. Locally produced materials supplement centrally provided flyers, trifold, and posters.

4.8. Describe your efforts to ensure the requirement for both male and female victim input into the development of your Military Service SAPR policy.

The Army SHARP program office facilitates recurring survivor panels which include participation by SHARP professionals and sexual assault survivors. The panels include both male and female Soldiers who provide valuable input on ways to improve the SHARP program. For example, the impetus for the Army SHARP Academy, the DoD's first full-time schoolhouse for SARCs and VAs, resulted from one of these panels.

When the Army SHARP program office conducts presentations with question and answer sessions at ACOM, ASCC, and DRU summits around the world, the staff has an opportunity to meet with victims and SARCs and VAs who have worked with victims. These informal conversations help shape revisions to policy or identify the need for additional policy clarification in order to provide the best services to sexual assault victims.

4.9. Describe your efforts to improve response to male victims, to include implementing and monitoring methods to improve reporting of male sexual assault allegations.

The Army places special emphasis on increasing awareness about male experiences as a means to improve response to male victims. Army organizations and leaders have increasingly acknowledged the existence of male sexual assault survivors and encouraged them to share their experiences. In FY16, the Army SHARP program office hosted male survivor panels during SAAPM and the 2016 Army SHARP PIF. These events introduced the idea of the "Silent Survivor" – males who experience sexual assault, but for varying reasons, do not report or share their experiences with others.

The Army also updated the SHARP URT (slides and videos) to provide scenarios and vignettes depicting male-on-male sexual harassment and sexual assault situations. New scenarios in a modification to ELITE-SHARP CTT and ELITE-SHARP POST also address male sexual assault survivors. Additionally, the Army produced a video about a male survivor and is developing a male survivor hologram (Digital Sexual Assault Survivor), which will respond to questions asked by individuals.

Efforts by Army commands include:

- In FORSCOM, male victim webinars have assisted SARCs and VAs in providing support to male victims. A male survivor (Service member) frequently speaks

during the 80-hour SHARP Foundation Course and other training events to expose Soldiers to the realities of male sexual assault.

- During the “Victimology” portion of SHARP training in TRADOC, classes discuss the difference between male and female reporting and how to increase male reporting. The recent increase in the use of males on survivor panels, discussions during conferences, and webinars on the topic may assist with increased reporting.
- Several USARPAC units hosted male victim-centered summits and a male survivor will be speaking at an upcoming SHARP summit and training
- Training for CID agents during the SVCC includes male sexual assault, factors inhibiting the reporting of such assaults, victim behaviors after such assaults, and improved methods to interview potential male victims to encourage them to report and seek help. Additionally, annual refresher training for all agents includes improved investigative techniques to interview male victims.
- INSCOM units conducted several training sessions that focused on care for male victims of sexual assault. Training addressed the prevalence of male victims and mitigating the stigma associated with reporting.

4.10. Provide your policy for facilitating requests from victims who report a sexual assault for accommodations during mandatory SAPR training (e.g., an alternate training setting to prevent re-victimization).

Commanders may exempt an individual from SHARP training in the event they have been a victim of sexual assault or exposure to this training may cause them emotional trauma. They may also take part in one-on-one training. Due to feedback received from SHARP professionals and victims, revisions of AR 600-20 will provide additional guidance.

SHARP trainers are taught it is not the intent of SHARP training to re-victimize anyone or initiate an unwanted emotional response. Trainers and facilitators for the mandatory training notify everyone well in advance of the day of training, informing attendees that the nature of the content may be upsetting. This announcement is also made prior to the start of the training. If discussing complicated legal issues, trainers may invite trial counsel to assist with the training.

Attendees may choose not to participate in the discussion and may also step out of the classroom during the viewing of the videos if they are uncomfortable with the content and language. Trainers must be sensitive not to single out attendees choosing not to view the videos. Breaks occur before and after the videos to allow attendees to excuse themselves if they so desire and to return after the video.

It is strongly encouraged, but not required, to have a SHARP professional (SARCs, VAs, and SHARP trainers) facilitate the training and to have another certified SHARP professional present for attendees who may need to excuse themselves during training, so as not to interrupt the other participants. If a SHARP professional is not available, facilitators must provide contact information for their local SHARP office.

Additionally, Army commands make the following accommodations:

- All FORSCOM training begins with a disclaimer that announces that the material and language could be upsetting and sexual in nature. There is always a VA

standing by if needed. At victims' request, there can be accommodations for separate training.

- In TRADOC, if Soldiers or Army Civilians are not comfortable attending training, they may be excused. Trainers and facilitators will not ask the attendees to indicate if they were victims of sexual harassment or sexual assault.
- USARPAC SARCs make disclaimers at the beginning of each training session and provide VAs who are ready to talk with anyone who needs to leave during training.
- IMCOM policy at all garrisons is to provide special training or one-on-one training to anyone who requests it. Individuals are not required to disclose their reason for requesting the one-on-one training.
- ARSOUTH makes alternate arrangements for victims who feel they need a different setting to prevent re-victimization. During the training, clinicians, SARCs, VAs, and chaplains are available if needed.
- All Soldiers in the Network Enterprise Technology Command (NETCOM) are notified before a training event that they have the option of alternative SHARP training events, which may include one-on-one type training.

4.11. Describe your progress to improve victim care services and conduct Case Management Groups at Joint Bases, in Joint Environments, and for the Reserve Components. For the Reserve Components, describe Military Service's actions to promote timely access to SARCs by members of the National Guard and Reserves. Describe how you addressed any recurring challenges (if any) your Military Service may have had in this area.

The Army continues to work with DoD SAPRO in providing input to the Joint Common Operating List of Standards (COLS). The Army reviewed and provided edits to metrics submitted by DoD SAPRO for revision of the COLS assessment plan.

Actions by Army commands to address Joint and Reserve Component challenges:

- FORSCOM units at Joint Base Lewis-McChord (JBLM) regularly meet with the Air Force SARC to discuss resources and training opportunities.
- There are numerous National Guard and Army Reserve units on TRADOC installations. SHARP professionals often coordinate with them to transfer sexual assault cases in DSAID. Installations invite Reserve Component organizations to participate in training events, SHARP summits, and Foundation Course training.
- USARPAC routinely provides SHARP services to Reserve Component Soldiers across the command as well as Air Force personnel at Joint Base Elmendorf-Richardson (JBER) in Alaska.
- USAREUR established a MOA between United States European Command (EUCOM) and United States Africa Command (AFRICOM) to ensure effective implementation of the SAPR and SHARP. The MOA outlines USAREUR's responsibilities for the administrative and logistical support.
- U.S. Army Africa (USARAF) provides support, oversight, training, and response to deployed units throughout Africa. USARAF has standing MOAs with the Joint Base in Djibouti and coordinates with the Navy and Air Force SARCs in Africa.

- IMCOM provides services to National Guard and Army Reserve Soldiers when they conduct weekend training missions or drills. IMCOM SARCs and VAs make initial contact with units to exchange information regarding training location and personnel on the installation. In instances where a case is initially supported by the garrison, IMCOM will hand off the case to the parent unit at the appropriate time.
- SAMFE training at the AMEDD Center and School accepts SAMFE candidates from the Army, Air Force, Navy, Coast Guard, Army Reserve, and National Guard.

4.12. Describe your current progress to inform officers, NCOs, and junior Service members about your Military Service's expedited transfer request policy.

Army Directive 2011-19 (Expedited Transfer or Reassignment Procedures for Victims of Sexual Assault) requires SARCs to inform Soldiers, who file an unrestricted report, of the option to request an expedited transfer from their assigned command or installation or to a different location within their assigned command or installation. In accordance with the Army directive, commanders must start with a presumption in favor of granting a victim's request for transfer and take reasonable steps to prevent a transfer or reassignment from negatively affecting a victim's career. Commanders must also inform victims of reasonably foreseen impacts to their careers and potential impact of the transfer on the investigation and prosecution of the case. Only a GO may disapprove a request for a local transfer and only the CG, HRC may disapprove a transfer from an installation. In January 2016, HRC published a MILPER message providing additional information on expedited transfer procedures.

The Army continues to provide education regarding expedited transfer procedures to SARCs and VAs as part of its SHARP Foundation Course and SARC/VA Career Course.

As outlined in SHARP training support packages, instructors must explain the right to request an expedited transfer during SHARP Annual URT. Additionally, victims of sexual assault receive an explanation of expedited transfer rights as part of DD Form 2910.

The SHARP program office and HRC jointly established oversight procedures to resolve any Soldier transfer processing issues quickly. Additionally, when considering the best courses of action for separating the victim and the subject, commanders may decide to transfer the subject.

Locally, SHARP training and newcomer orientations cover the expedited transfer process. The monthly SARB reviews unrestricted reports and victim care, including the status of military protective orders (MPO) and expedited transfer requests. SVCs also assist victims with obtaining expedited transfers.

4.13. In consultation with your SARCs, list the number of victims who reported a sexual assault, if any, whose medical care was hindered due to lack of SAFE kits, timely access to appropriate laboratory testing resources, mental health counseling, or other resources. Describe the measure(s) your Military Service took to remedy the situation.

There are no reports of any victims whose care was hindered due to a lack of SAFE kits or timely access to medical or laboratory resources.

4.14. Provide information on how you addressed problems or challenges, if any, with assigning SAPR personnel to handle unrestricted or anonymous reports of

sexual assaults made by prisoners in a Military confinement facility. Additionally, describe your use of the DoD Safe Helpline as an anonymous reporting resource for prisoners.

CID responded to, and investigated, all unrestricted reports of sexual assault that involved prisoners in an Army confinement facility. CID has a MOA with the Army Corrections Command to ensure that all aspects of the Prison Rape Elimination Act (PREA) are addressed during a criminal investigation.

Army confinement facilities have policy and procedures regarding PREA anonymous reporting hotlines, which are in the DoD Safe Helpline responder database.

There have been no problems or challenges in assigning SAPR (SHARP) personnel to handle reports of sexual assault made by prisoners. Issues that may arise will be resolved at the installation level, or presented to DoD SAPRO for guidance.

4.15. Describe your leadership-approved future plans to deliver consistent and effective victim support, response, and reporting options.

During FY16, the Army SHARP program office drafted the FY17-21 SHARP Campaign Plan. A key component of this plan is the evaluation and transformation of the response structure, including an examination of the required knowledge, skills, and abilities needed for SHARP professionals to be effective. The goal of this restructuring effort is to optimize the number of SARCs and VAs to better match the size, composition, and operational tempo that characterize various Army units.

Future plans also include the Army SHARP program office monitoring Army commands' compliance with EXORD 204-16 (Sexual Harassment and Assault Readiness Effort) to develop mitigation action plans to deliver consistent and effective victim support, response, and reporting options. The mitigation action plans includes leader engagement and sponsorship for Soldiers arriving at their first unit or PCS assignment.

5. LOE—Assessment—The objective of assessment is to “effectively standardize, measure, analyze, assess, and report program progress.”

5.1. Summarize your efforts to achieve the Assessment Endstate: “responsive, meaningful, and accurate systems of measurement and evaluation into every aspect of the SAPR program.”

The Army’s approach to evaluating the SHARP program aligns with the main areas of interest prescribed by DoD. The Army SHARP program office continually works with DoD SAPRO to monitor and improve the use and reliability of the Defense Sexual Assault Incident Database (DSAID). The Army also uses the findings from periodic surveys performed by the Defense Manpower Data Center (DMDC) and DEOMI to develop ideas for further explore and evaluation within the Army SHARP program.

Regular monitoring and auditing of the DoD Safe Helpline continues to be a vital part of overseeing the effectiveness of Army responders. The Army has placed renewed emphasis on reconciling first responder contact information. As a result, leaders have increased awareness about how maintaining contact information enable the response capabilities for SHARP programs at their installations and within their commands.

In collaboration with the Army’s Office of Business Transformation, the Army has developed and improved SHARP-SMS, a data visualization tool that allows commanders to see and share performance metrics at various echelons and levels of responsibility.

The Army SHARP program office also oversees internal quality control of reports and case management data to ensure the integrity and fidelity of the systems that support the evaluation of the program. The rigor associated with quality control process keeps organizations engaged and actively participating in the assessment effort of the program.

5.2. Provide an update on oversight improvement activities that assess SAPR program effectiveness. Include frequency, methods/metrics used, findings, and corrective actions taken (e.g., program management reviews and Inspector General compliance inspections).

The Army completed its development of an OIP plan and checklist in FY16. The checklist provides common inspection and evaluation standards for ACOMs, ASCCs, and DRUs to implement in support of the Armywide equities in the SHARP program. The checklist outlines the Army policy requirements as listed in DoD instructions and Army regulations. The Army SHARP program office coordinated with the DAIG to ensure it meets Army regulatory requirements and issued implementation guidance to commands.

The DAIG conducted an inspection of the SHARP program in IMT, beginning in FY15 and concluding in FY16. The DAIG recommended that the Army conduct a review of staffing requirements to appoint military collateral duty SARCs at the battalion level in IMT units. Specifically, the DAIG recommended that rank requirements be associated with unit authorizations and the roles and responsibilities of a military collateral duty SARC. The Army intends to conduct a holistic review of staffing requirements at all levels in FY17.

Examples of actions taken by Army commands include:

- TRADOC uses several oversight forums to include the Commander’s Health Promotion Council (CHPC), the unit status report (USR), and the TRADOC Executive Safety Council. The USR provides the results of focused analysis to

senior leaders on a monthly basis. Results include victim profiles, offender profiles, sexual assault trends, and statistics on various SHARP initiatives.

- SHARP leaders in AMC continuously conduct staff assistance visits (SAVs) and team with the IG to assess the SHARP program throughout AMC. Corrective action plans are created in response to the findings and then taskers are assigned to ensure subordinate commands meet the criteria of the tasking.
- The USARPAC CG hosts a periodic review and oversight committee consisting of all senior commanders in USARPAC.
- The NETCOM PM conducted SAVs for each immediate subordinate unit. By visiting each theater signal command and separate brigade at least once per year allowed for hands-on oversight. The PM also met with command teams at each level in order to stress the importance of SHARP professionals, and relay the CG's guidance and expectations.
- IMCOM conducts SAV and OIP under the command inspection architecture. Inspections occur whenever a new garrison commander takes command. The IMCOM SHARP PM compares the results of the checklist to the command's monthly case reports to identify trends and develop enterprise-wide strategies to address negative trends and findings.

5.3. Provide an update on your efforts to ensure integrity of data (i.e., accuracy, completeness, etc.) collected in the Defense Sexual Assault Incident Database (DSAID).

Sexual assault case data quality and integrity are a priority for the Army. The Army SHARP program office creates Armywide command level and quality control reports for all ACOMs, ASCCs, and DRUs on a monthly basis. Each report contains data elements (350+ data fields per case, minus PII) entered into DSAID by Army SARCs and legal officers, or populated from an interface with ALERTS. The reporting capability is further enhanced by the integration of imported data from DSAID case level reports, data from DSAID cross-service reports, and data from the Army's Sexual Assault Data Management System (SADMS) database.

The integration of Army sexual assault data sources supports weekly data analysis of CID/ALERTS-DSAID data transactions, monthly command level reports, monthly quality control reports, CID case reconciliation, and missing or duplicate cases within DSAID. The established quality control processes provide a summary of identified data gaps and errors for analysis and action by ACOM, ASCC, and DRU DSAID users and SHARP PMs.

The Army uses data from DSAID and ALERTS to provide feedback to command SHARP PMs and installation Lead SARCs on the quality of data entered into DSAID. The command report is run monthly to provide commands with all their DSAID data. This report includes cases input by SARCs from the command, or victims and offenders in units belonging to the command, or cases input by SARCs on installations whose senior commander is from the command. Quality control (QC) reports are also run monthly and include errors for both sexual assault case in DSAID and sexual harassment cases in the Integrated Case Reporting System (ICRS). These QC reports are sent to the installation Lead SARCs and command SHARP PMs. DSAID QC reports include separate sections for CID cases that are in and/or missing from DSAID, duplicate cases, case errors, and

errors with the CID-DSAID interface. These reports align with DoD SAPR Metric #2 (Prevalence + Reporting) by increasing the accuracy of the reporting to allow DoD to more accurately measure the percentage of Service member incidents captured in reports of sexual assault (restricted and unrestricted reports) and thus provide a better estimate of the proportion of crimes being reported.

5.4. Provide an update on your efforts to develop and implement a survey, or leverage existing military training surveys that will provide comprehensive and detailed information to decision makers about sexual assault and other sexual misconduct allegations that occur during initial military training, including basic and subsequent career-specific military training.

Following incidents of sexual misconduct at Army training centers in 1996, the Army tasked the U.S. Army Research Institute for the Behavioral and Social Sciences (ARI) to assess the Army human relations climate in IMT. To meet this goal, the Army conducted IMT surveys approximately every 3 years beginning in 2000. ARI conducted the most recent IMT survey from April through June 2015, at 12 Army training centers and received paper surveys from 6,034 Soldiers. Since convenience sampling was used to identify participants, the IMT survey findings represent only the attitudes and opinions of the respondents and should not be generalized to all IMT Soldiers. Evaluation of the survey data is ongoing; however, the draft report provides useful information on IMT respondents' perceptions and experiences with sexual harassment and sexual assault.

Army schools throughout TRADOC also have systems in place to collect feedback from trainees and students:

- TRADOC conducts sensing sessions during the three phases of BCT and provides drop boxes for anonymous feedback to leadership.
- IMT end of course critiques allow trainees to provide anonymous input to help improve the course. The critique addresses sexual assault.
- Feedback from trainees during focus groups and surveys indicate "Sex Signals" is the best SHARP training received during IET. Trainees report increased awareness and understanding the problem after receiving "Sex Signals" training.

USMA employs a series of surveys specifically designed to assess the culture of respect, inclusivity, and individual character development. These surveys include:

- First Class Survey. Administered to the First Class (Seniors) in April 2016. The first section of this survey is on character development.
- Cadet Character Development Survey. Administered in July 2016 to all new cadets. This survey will be administered three other times to the same cadets during the next 4 years. The results of this survey will help show how the cadets have developed character over time.
- Corps Squad Culture Survey. Administered to members of athletic teams in November 2015 to assess how well team culture aligns with Army Values.
- Directorate of Cadet Activities Club Survey. Administered to members of extracurricular clubs in November 2015. This survey assesses how well the club culture aligns with Army Values.

- Organizational Culture Surveys. These surveys were administered to all employees in the Office of the Dean and the athletic department in April 2016.

5.5. Describe your progress in assessing SARC/SAPR VA training effectiveness. Include actions taken to implement training enhancements.

The Army SHARP Academy sends surveys to recent graduates (30-90 days after graduation) of the SARC/VA Career Course and SHARP Trainer Course, to assess how well the training prepared them for their roles. The feedback from these surveys will then be included in the Academy's quarterly post instructional conferences to review and implement changes as required.

Using ELITE-SHARP CTT, the Army developed knowledge assessments for responding to various type of scenarios related to sexual harassment and sexual assault incidents. Individuals participated in the test prior to using the training tool and after completion of the training in order to compare their levels of knowledge in each learning competency. The Army SHARP program office uses the comparisons of the pre-training and post-training assessments to show how ELITE-SHARP CTT can improve sexual harassment and sexual assault response. Preliminary results show that company commanders and first sergeants who completed ELITE-SHARP CTT training improved their knowledge of company-level roles and responsibilities for handling SHARP incidents by more than 15 percentage points from pre-test to post-test. Also noteworthy is a report from a command SHARP PM who stated "the training assisted two command teams over the past 2 weeks in properly handling potential victims based on this training."

Army commands also assess training effectiveness. For example:

- In FY16, the two full-time USAREUR SHARP trainers trained 290 SARCs and VAs and other SHARP personnel. Training effectiveness was measured via the student feedback evaluations received after each training. The evaluations were forwarded to the SHARP Academy for review.
- In AMC, SHARP PMs conduct SAVs to assess training capabilities.
- ARCENT delivers SHARP training using many different venues, such as skits, life experiences, and peer-to-peer training.
- IMCOM's garrison commanders attend SHARP training events to assess the quality and effectiveness of the training. AARs and surveys at select locations and venues also provide direct feedback for improving delivery of training and services.

5.6. Describe your efforts to assess compliance of commanding officers in conducting organizational climate assessments for purposes of preventing and responding to allegations of sexual assault.

The Army SHARP program office works with DEOMI to monitor and review the DEOCS. Results for FY16 indicate continuing chain of command support for victims. Of those who participated in the DEOCS for FY16, more than 91 percent show *moderately favorable* to *highly favorable* sentiment towards commanders and leaders when it comes to chain of command support for reporting. On average, more than 83 percent have a favorable opinion of the overall command climate, which is nearly a 3 percent increase from FY15.

Although there is no empirical evidence to support this relationship, the increase in perceptions about trust and respect coincide with the introduction of “Not in My Squad” workshops by the CAPE. In FY15, CAPE developed an online questionnaire in support of “Not in My Squad.” Since then, CAPE created “Not in My Squad” workshops led by facilitators that help small-unit leaders address areas of concern identified in the analysis of these questionnaire results. These workshops help leaders explore the nature of issues regarding the state of mutual trust and cohesion within their squad, section, or team. They also help leaders to consider ways to reinforce success, make adjustments to strengthen areas of weakness, and explore alternative means of improving how teams can work together to become more cohesive.

Efforts to assess compliance by Army commands include:

- The TRADOC CG directed a comprehensive inspection and command climate assessment program across the command. The TRADOC OIP requires command climate surveys for company and higher units. The TRADOC Equal Opportunity (EO) office ensures command climate assessments are complete and conducts focus groups that include questions to assess SHARP-related issues. Leaders must then develop plans to improve the climate issues.
- In USAREUR, SARCs collaborate with EO advisors (EOAs) to develop SHARP questions for inclusion in the climate assessments. Brigade SARCs, in conjunction with the EOAs, analyze survey results and provide subordinate commanders with recommendations for their unit action plans.
- SHARP personnel in USARPAC work with their EO counterparts to review climate survey results. SHARP personnel also provide input for recommendations to commanders after receiving the DEOCS results from DEOMI.
- IMCOM garrison commanders conduct a climate assessment within the first 90 days of command. These assessments are reviewed during SAVs and OIPs to ensure action plans address any SHARP findings.
- MEDCOM EOAs conduct SAVs and inspections at all levels of the command to validate compliance.
- INSCOM SHARP personnel work with their EOAs to ensure that command climate assessments are conducted and that questions relating to SHARP are included in the assessment.

5.7. Describe your policy and management control procedures for ensuring that Service members who reported a sexual assault and are separated for non-disability mental conditions are properly counseled, in writing. Additionally, describe how your Military Service ensures that the separations are processed and recorded in accordance with DoDI 1332.14, Enlisted Administrative Separations (4 Dec 14).

The Army has completed final revisions to enlisted separations policy that are pending publication. In addition to separations for non-disability mental conditions, Army policy requires commanders to review all administrative separations involving known victims of sexual assault. This includes any separating Soldiers who indicate they have filed an

unrestricted report of sexual assault within 24 months of initiation of separation and whether they believe the separation is a direct or indirect result of the sexual assault or the filing of the unrestricted report. In these cases, the Soldier's commander must consider:

- Whether the separation appears to be in retaliation for the filing of an unrestricted report of sexual assault and, if so, consult with the servicing SJA.
- Whether the separation involves a medical condition that is related to the sexual assault, to include PTSD, and, if so, to consult with appropriate medical personnel.
- Whether the separation is in the best interest of the Army, Soldier, or both.
- The status of the case against the alleged offender and the effect of the Soldier's (victim's) separation on the disposition or prosecution of the case.

Each commander in the chain of command must include a statement on their endorsement certifying their review. The separation authority for cases involving Soldiers who filed an unrestricted report of sexual assault within 24 months of initiation of the separation action or 1 year of the final disposition of their sexual assault case, whichever is longer, is withheld to the General Courts-Martial Convening Authority (GCMCA) or higher authority.

Specific to non-disability mental condition separations, Army policy establishes that separation processing may not be initiated until the Soldier has been formally counseled concerning the deficiencies and has been afforded ample opportunity to overcome those deficiencies as reflected in appropriate counseling or personnel records. The Soldier will also be counseled that the condition does not qualify as a disability. Revisions to AR 635-200 (Active Duty Enlisted Administrative Separations) also include an enlisted separation checklist for behavioral health-related separations that must be included as part of a Soldier's separation packet. In accordance with requirements in DoDI 1332.14, this checklist contains elements that must be recorded by medical personnel as well as elements that the command must validate including that the member has been counseled regarding the intent to initiate administrative separation, and the member has been advised that the condition does not qualify as a disability.

As a result of the February 2015 GAO report, "Better Tracking and Oversight Needed of Service Member Separations for Non-Disability Mental Conditions," the Army began conducting (in FY16) quarterly reviews of all "Behavioral Health Condition, Not a Disability" separations to ensure compliance with DoD policy requirements. In addition, in August 2016, DoD reinstated compliance reporting similar to reviews conducted from FY08 to FY12. The military departments are to provide a report on compliance with DoD separation guidance contained in DoDI 1332.14 during FY16 and FY17.

Finally, DoD has formally chartered the Separations Standardization Work Group (SSWG) with representation from each Service. The group was chartered to develop a method to track separations for non-disability mental conditions, conduct an evaluation of separation program designator codes, reevaluate information contained on DD Form 214 (Certificate of Release or Discharge from Active Duty), and ensure compliance with policy. The work of the SSWG will ultimately inform the way ahead on these topics.

5.8. Describe actions taken to integrate recent survey (e.g., MIJES, WGRR, and QSAPR) and focus group results into your Military Service SAPR policies and training programs.

The Army SHARP program office has decided to leverage tools and findings from the 2014 RAND Military Workplace Study to develop an evaluation process that will be known as the Installation Environmental Scan. This assessment provides an updated SHARP “profile” for 15 to 20 Army installations. The purpose is to identify individual and community factors, program gaps, and prevention best-practices that influence the rates of sexual harassment and sexual assault. The Army will use this information to help installation commanders and leaders develop targeted prevention initiatives to address their unique challenges. Additionally, data from the 2014 RAND Military Workplace Study highlighted differences in the nature of men’s and women’s experiences of sexual harassment and sexual assault. Specifically, men who were sexually assaulted were:

- Much more likely than women to have experienced sexual harassment.
- More likely to be victimized during duty hours.
- More likely to experience aspects of hazing as part of their sexual assault.
- More likely to have incidents where multiple offenders were involved.

Gender differences in sexual harassment and sexual assault experiences will be tracked again with the FY16 Workplace and Gender Relations Survey of Active Duty Members (WGRA) data and will continue to be used to inform and appropriately tailor training and communication efforts.

The Army also leveraged survey findings from its own 2015 Human Relations Operational Troop Survey (HR OTS) conducted by ARI. During the HR OTS, self-reported data were collected from 8,911 operational troops (4,961 males and 3,950 females; E1-E9, WO1-CW5, and O1-O6) regarding their attitudes and opinions of sexual harassment and sexual assault-related training and unit climate in the active Army. Some of the key findings from the HR OTS that informed SHARP training efforts include:

- As a result of SHARP URT, more than 90 percent of Soldiers agreed that they:
 - Can use the actions and steps taught to stop sexual harassment or assault.
 - Believe it is important to intervene when witnessing sexual assault.
 - Are motivated to intervene when witnessing sexual harassment or the warning signs of a potential sexual assault.
- More than 80 percent agreed that SHARP URT increased their knowledge about how to help someone who is experiencing sexual assault and how to identify a situation where someone may be sexually assaulted.
- Among the biggest influences on all Soldiers’ decisions to intervene are:
 - It’s the right thing to do.
 - They can prevent someone from being harmed.
 - It’s important for Soldiers to support other Soldiers.

- For male Soldiers one of the main reasons in deciding NOT to intervene is that it is unclear whether the victim needs their help.
- For female Soldiers, fear that intervention might put them in physical danger was among the main reasons NOT to intervene.

5.9. Describe your leadership approved future plans, if any, for effectively standardizing, measuring, analyzing, assessing, and reporting program progress.

The Army SHARP program office will provide new guidance and standards of measurement through the implementation of the SHARP Campaign Plan and revised metrics for the EXORD 204-16.

- The Assessment LOE of the SHARP Campaign Plan describes the structuring assessments using a four-step process: (1) the articulation of requirements that the Army must evaluate, (2) the development of data collection plans for analyzing each requirement, (3) the methods and tools used for analyzing the data, and (4) reporting the findings. Using this process provides more fidelity and continuity within the Assessment LOE with the intent of aiding leaders in understanding the nature of the SHARP environment and informing decisions that leaders will make to affect it.
- For FY17, EXORD 204-16 will include refined measures of performance (MOPs) and measures of effectiveness (MOEs). The MOPs and MOEs will be used to compare ongoing efforts of command mitigation action plans to the level of reporting and qualitative evaluations of sexual assault within the commands.

Also in FY17, ARI will distribute a web-based survey to active duty Soldiers in the ranks of private to colonel. The survey will focus on topics such as dignity, respect, inclusion, personal readiness, sexual assault, and sexual harassment.

The DAIG plans to conduct an Armywide general inspection of the SHARP program in 2017 in addition to implementing a sampling of SHARP activities in all inspections in order to provide Army leadership with ongoing situational awareness.

Future plans reported by Army commands include:

- During monthly SARBs in FORSCOM, units will include updates pertaining to their risk mitigation plans, best practices seen within their units, upcoming key training highlights, and SHARP personnel status. These efforts are in conjunction with case review requirements and allow the commands to inform their leadership on what intervention and prevention measures they are instituting at their levels.
- TRADOC is working with the Army SHARP program office to make SHARP-SMS a useful tool with metrics to allow organizations to compare subordinate commands with other similar organizations. In the area of sexual assault, increases or decreases in numbers are deceiving (increases may indicate a willingness to report based on the command climate or an increase in sexual assaults).

6. Overarching Tenet: Communication and Policy

6.1. Describe your efforts to post and widely disseminate information on male victim sexual assault prevention and response.

The Army continues its efforts to increase awareness of male victims of sexual assault. In addition to featuring subject matter experts such as 1in6.org, Dr. Jim Hopper from Harvard University, and Russell Strand from USAMPS, the SHARP Outreach Webinar Program featured a male victim as a webinar presenter. The presenter provided the attendees with first-hand information on the impact of sexual violence and how it affected his relationships with his family and co-workers.

In addition, the Army SHARP program office developed special marketing and awareness materials on the topic and is in the process of developing a webpage geared toward males, including victims of sexual assault. The Army also had a subject matter expert on male victimization to analyze the content on the SHARP public website and make recommendations on changes to ensure messaging aligns with appropriate verbiage that resonate well with male victims. The Army further increased awareness of the issue of male victimization through survivor panels during SAAPM and the SHARP PIF.

The Army continues to research the topic of male victimization with the intent of increasing understanding, enhancing prevention, and tailoring responses. One such effort is a collaboration between the Army SHARP program office and TRADOC to develop a male hologram to facilitate appropriate responses to male victims of sexual assault.

“Sex Signals” training has been part of the Army’s IET training since 2010. Since 2015, the training has incorporated male sexual assault scenarios into its curriculum for those attending BCT, BOLC-A (for ROTC and USMA Cadets), BOLC-B (for new lieutenants), and the Drill Sergeant School.

Other efforts at installations and commands across the Army include:

- Providing educational materials (posters, pamphlets) and using social media.
- Conducting panels, which include male survivors of sexual assault.
- Publishing articles on male victim sexual assault and hosting guest speakers to articulate prevention, post-event care, and changing cultures.
- Training during in-processing with information on support to male victims.
- Leader engagement on this topic at organizational events.

6.2. Describe your efforts to post and widely disseminate information on ways to report allegations of retaliation.

IGs across the Army participate in many command information sessions (Soldier reception briefings, company command/first sergeant courses, town halls, etc.) to ensure that Soldiers, Army Civilians, and Family members are aware of the avenues available (including the IG) to address their complaints. In addition, SHARP inspection reports from 2014 and 2015 were published by the Army Publishing Directorate to make them available Armywide.

Messaging related to retaliation prevention and response is integrated into all aspects of the SHARP marketing, communications, and outreach efforts. This includes brochures,

posters, infographics, senior leader talking points, and Army News Service articles. SHARP communications and outreach videos also include retaliation messaging as a standalone topic and as talking points in other topic-specific videos.

Efforts reported by Army commands and installations include:

- Many commands in TRADOC post and disseminate information on ways to report allegations of retaliation, which include bulletin boards in high traffic areas, on websites, during newcomers' briefings, and during SHARP training.
- The USAREUR IG addresses the topics at all community in-processing briefs, and in more detail to commanders and leaders at the USAREUR PCC, company commander/first sergeant course, and Warrior Leader Course.
- INSCOM Soldiers are counseled by their commanders and given reprisal plans to prevent retaliation. They are also advised of resources that are available to them should they become a victim of retaliation or reprisal.
- Garrison commanders provide information on ways to report allegations of retaliation during unit briefs, training days, and in conjunction with unit sensing sessions. IMCOM also provides this information during newcomer's briefings, in theater previews before showing movies, and during BOSS group meetings.

6.3. Provide an update on your development and implementation of new certification standards for sexual assault medical forensic examiners.

Army SAMFE training instructs healthcare providers (physician, physician assistant, nurse practitioner, and registered nurse) on how to conduct SAFE exams through two phases of instruction. Phase 1 consists of a 2-week training course—1 week of didactic and 1 week of clinical skills practicums (which includes male and female live standardized patients). SAMFE candidates have 6 months to complete Phase 2 at their home station. This includes supervision by a trained and competent SAMFE, arranged at an MTF or civilian hospital, to meet the requirements and competency verification required by MEDCOM 40-36 Supplement 1 and the DoJ National Protocol for Sexual Assault Medical Forensic Examiners. The AMEDD Center and School coordinated six SAMFE Phase 1 courses during FY16, training 109 SAMFEs from the Army, Air Force, and Navy.

The Army, Navy, and Air Force Surgeon Generals signed an MOA in April 2015 committing their Services to an inter-Service collaboration for SAMFE training. This allows for one unified DoD standard for compassionate and competent SAFE exams. The inter-Service SAMFE Course will begin FY17.

6.4. Describe your ongoing efforts to review, revise, update, and issue policy pertaining to:

- **Safety Assessments for SAPR Program**
- **High-Risk Response Teams**

Were any multi-disciplinary High-Risk Response Team established?

- **If so, how many and what was the duration?**
- **If the High-Risk Response Team was dissolved, explain why?**

The Army SHARP program office drafted a comprehensive rewrite of the SHARP portion of AR 600-20 in FY16. Safety assessments and high-risk response teams (HRRT) are included in this pending revision to be published during FY17.

Two Army installations reported establishing HRRTs in FY16:

- One installation used an HRRT three times. The average HRRT time was 5 weeks. The command dissolved the HRRTs after the risks were mitigated.
- Another installation established one HRRT, dissolving after 30 days when the victim elected a discharge from the Army.

6.5. Provide an update on your methods for effectively factoring accountability metrics into commanders' and subordinate leaders' performance assessments.

If a "NO" or "DOES NOT MEET STANDARD" appears in the character field of the DA Form 67-10 series Officer Evaluation Report (OER) or DA Form 2166-9 Non-Commissioned Officer Evaluation Report (NCOER), it is marked with an appended code of "R" for OER and "D" for NCOER (example DA67-10-XX-R or DA2166-9-XX-D) and placed in the Soldier's record. A copy of the report is forwarded through the Promotions branch for verification of Headquarters, Department of the Army (HQDA) level flagging action. Next, a copy is forwarded to Officer Personnel Management Directorate or Enlisted Personnel Management Directorate of HRC for show cause determination.

6.6. Provide an update on efforts to improve overall victim care and increase trust in the chain of command: include initiatives or updates undertaken to reduce allegations of retaliation as a means of increasing reporting and the way in which your Military Service is tracking and accounting for these efforts.

Army Directive 2014-20 (Prohibition of Retaliation Against Soldiers for Reporting a Criminal Offense) emphasizes that no Soldier may retaliate against a victim, an alleged victim, or another member of the Armed Forces based on that individual's report of a criminal offense, to include sexual assault.

As of FY16, the Army assigned SVWLs to each SVP team with the primary mission of informing victims about the military justice process and coordinating the military and civilian support services available to victims.

During DAIG SHARP inspections, inspectors train unit leadership on the SHARP Program requirements, victim rights, support resources, sexual assault and sexual harassment reporting resources, retaliation and reprisal reporting resources, and any current trends. Because of this training, which includes discussions of "what gets leaders in trouble," the DAIG cites receiving fewer allegations of misconduct. The DAIG also updated its system of record to track all allegations of reprisal, retaliation, or other types of mistreatment related to a report of sexual assault or harassment.

Supporting efforts by Army commands include:

- Continued use of SHARP-RCs at designated installations.
- Increased command presence at FORSCOM pre-command courses for commanders/first sergeants and SHARP Foundation Courses for SARCs and VAs.
- Monthly SARBs, monthly teleconferences with SHARP professionals, and senior leader governance forums that include SHARP, allows TRADOC to identify victim care concerns and ensure they are addressed appropriately. To increase transparency and confidence in the chain of command, many units publish "SHARP Justice Reports." The intent is to increase the confidence in the reporting process.

- USARPAC recently formed a consolidated SHARP office (CSO) whose location provides privacy and has already encouraged victims to come forward and report. The CSO houses a variety of SHARP PMs, SARCs, and VAs from various commands including tenant units.
- USAREUR developed a Teal Hash note to publicize the General Courts-Martial (GCM) results, which include convictions for Article 120 offenses. USAREUR posts Teal Hash notes to the USAREUR SHARP website, <http://www.eur.army.mil/SHARP/>.
- INSCOM commanders and first sergeants actively participate in unit SHARP training. During the section of the training that covers commander's responsibilities, they address the company on their role in handling sexual assault cases. They also discuss their plan to address and prevent retaliation.
- At USMA, focus group findings indicated that victim blaming was a key factor in the hesitancy to report incidents of sexual violence. To address this issue, CASHA focused on this topic to raise awareness of the reasons victim blaming occurs and the impact it has on the individual who reported the incident of sexual assault.
- CID has established a special offense code for retaliation to be used in its investigations so that the number and type of retaliation investigations can be easily retrieved and reported from its database.

6.7. Provide an update on your policy for Case Management Group (CMG) Chairs to regularly assess and refer retaliation allegations, made in conjunction with a sexual assault report, for appropriate investigation. Additionally, describe your policy for keeping these retaliation allegations on the CMG agenda for status updates until the victim's allegation is appropriately addressed.

Army Directive 2015-16 (Command Engagement to Prevent Retaliation) identifies the SARB as the Army's SAPR case management group. During every SARB meeting, the chairperson will ask SARB members if the victim, witnesses, bystanders (who intervened), SARCs, VAs, first responders, or other parties to the incident have experienced any retaliation or reprisal. If any incidents of retaliation are reported, the LTC/O5 or higher commander of the victim of retaliation or reprisal will develop a plan to immediately address the issue and forward the plan to the SARB chairperson.

Each retaliation or reprisal incident remains on the SARB agenda for status updates until the victim's case is closed or until the retaliation or reprisal has been appropriately addressed. Senior commanders receive monthly updates on retaliation cases, during SARBS, and ensure that responsible organizations/agencies are appropriately addressing allegations.

Additionally, whenever CID initiates a sexual assault investigation, it also conducts subsequent investigations relating to suspected threats against the sexual assault victim including minor physical assaults and damage to property.

7. Secretary of Defense Initiatives

7.1. Enhance First Line Supervisor Skills and Knowledge: Provide an update on your first line supervisor training that advances a climate of dignity and respect and supports the prevention of potential retaliation associated with reporting. First line supervisors are junior officers, enlisted supervisors, and civilian employees who supervise military members. Address the frequency of the training; policy updates in support of the training; and, how the curriculum emphasizes the importance of engaging subordinates on sexual assault prevention and response; instructs them on recognizing the signs of possible acts of retaliation; and, provides an opportunity to practice leadership skills to promote a healthy command climate.

To further advance a climate of dignity and respect, and prevent the potential for retaliation associated with reporting, the Army is augmenting training to address the role of supervisors. This training applies to all junior officers, junior enlisted supervisors, and Army Civilian employees who supervise Soldiers. The curriculum emphasizes the importance of engaging with subordinates on sexual assault prevention and response, recognizing the signs of possible acts of retaliation, and providing the opportunity to practice leadership skills to promote a healthy command climate.

To augment efforts aimed at reducing social retaliation associated with reporting a sexual assault, the Secretary of Defense directed the Secretaries of the Military Departments to provide commanders with additional special interest training from the JAG Corps. This training focuses on social media misconduct and the authorities that commanders have under the UCMJ to address retaliation. The Army is integrating the training into GOLO, SOLO, PCC, and company commander/first sergeant courses.

First-line supervisors participate in the following training to advance a climate of dignity and respect and support the prevention of potential retaliation associated with reporting:

- **PME Training.** PME training addresses all levels of the Army's educational system (IET, NCO, warrant officer, officer, and civilian). TRADOC, through the SHARP Academy, develops all SHARP-related PME training for first-term, mid-level, and senior leaders. This training provides information on the importance of engaging subordinates on sexual assault prevention and response, instructs them on recognizing the signs of possible acts of retaliation, and emphasizes promoting a healthy command climate. Junior officers receive their initial training during BOLC with follow-on training at the captain career course and the company commander/first sergeant course. These courses include the following:
 - Leaders must detect and deter any acts or threats of reprisal.
 - Victims should never fear intimidation or retaliation when making a report.
 - No Soldier may retaliate against a victim or an alleged victim based on that individual's report of a criminal offense.
 - Recognizing retaliatory actions, including:
 - Taking or threatening adverse or unfavorable personnel action.
 - Withholding or threatening to withhold a favorable personnel action.
 - Ostracism -- excluding from social acceptance or friendship.
 - Acts of cruelty, oppression, or maltreatment.

- During PCC, future battalion and brigade commanders and CSMs learn how to develop a plan to protect a victim, witnesses, and the alleged offender from acts of reprisal or retaliation. The PCC curriculum includes:
 - The definition of reprisal and the Army's policy prohibiting reprisal.
 - Roles and responsibilities of the leadership in the prevention of reprisal and protection of all parties involved.
 - Procedures to report acts and/or threats of reprisal.
 - Consequences of reprisal and possible sanctions against violators.
 - Whistleblower protection afforded victims, witnesses and the subject.
- Supervisors of Army Civilians must complete a 40-hour supervisor development course every 3 years. This course covers sexual harassment and other areas that can damage an organizations climate. All Army Civilians and their military supervisors also receive anti-harassment and no fear training on the rights of employees regarding antidiscrimination laws and whistleblower protection laws.
- Army EO training enhances Soldiers' ability to work as a team, show respect for others, and reinforces good discipline, Army Values, and readiness. Soldiers must receive training semi-annually. This training promotes a healthy command climate.
- All Soldiers and Army Civilians must attend SHARP Annual URT. This training shows importance of engaging subordinates on sexual assault prevention and response, instructs them on recognizing signs of possible acts of retaliation, and provides scenarios on leadership skills that promote a healthy command climate.
- The Army encourages commanders and leaders to use the ELITE simulation trainers that employ state-of-the-art "virtual human" technologies.

Army commands also augment required training. For example:

- Many units in FORSCOM incorporate ELITE-SHARP CTT into first sergeant and commander's courses as a requirement. In addition, ELITE-SHARP CTT is being introduced in the monthly senior leader brief to newly assigned personnel.
- USAREUR provides SHARP training to leaders attending the PCC and company commander and first sergeant course. Leader training includes a review of reporting options, commander's responsibilities, expedited transfers, and available resources.
- ARCENT has implemented a quarterly SHARP leader training that covers an array of topics. This training provides knowledge necessary to better facilitate the mitigation of potential sexual harassment and sexual assault cases.
- ARCYBER hosted training on effective communication to provide leaders at all levels with various techniques to communicate effectively with victims of sexual assault as well as highlight the most important concepts of the SHARP program.
- INSCOM brigades are developing bi-annual training which incorporates the "Not in My Squad" principle of building cohesive teams through mutual trust.
- IMCOM conducts supervisor training using small group discussions. In addition to ELITE-SHARP CTT, senior leaders receive the same training as their subordinates.

8. NDAA Requirements - Provide your Military Service's update on the following FY15/FY16 NDAA requirements. If the provision has been implemented, indicate "Completed," and provide the implementation date. If the provision has not been implemented, indicate "In Progress" and provide an update (150 words or less), including the projected completion date.

8.1. Review by the Military Service Secretary (at the chief prosecutor's request) of a Convening Authority's decision to not refer charges of certain sex-related offenses for trial by court-martial.

“(c) REVIEW OF CERTAIN CASES NOT REFERRED TO COURT-MARTIAL.—

“(1) CASES NOT REFERRED FOLLOWING STAFF JUDGE ADVOCATE RECOMMENDATION FOR REFERRAL FOR TRIAL.—In any case where”; and (2) by adding at the end the following new paragraph:

“(2) CASES NOT REFERRED BY CONVENING AUTHORITY UPON REQUEST FOR REVIEW BY CHIEF PROSECUTOR.—

“(A) IN GENERAL.—In any case where a convening authority decides not to refer a charge of a sex-related offense to trial by court-martial, the Secretary of the military department concerned shall review the decision as a superior authority authorized to exercise general court martial convening authority if the chief prosecutor of the Armed Force concerned, in response to a request by the detailed counsel for the Government, requests review of the decision by the Secretary.

“(B) CHIEF PROSECUTOR DEFINED.—In this paragraph, the term ‘chief prosecutor’ means the chief prosecutor or equivalent position of an Armed Force, or, if an Armed Force does not have a chief prosecutor or equivalent position, such other trial counsel as shall be designated by the Judge Advocate General of that Armed Force, or in the case of the Marine Corps, the Staff Judge Advocate to the Commandant of the Marine Corps.”

Completed. Implemented June 27, 2014 by Army Directive 2014-19 (Review of Decisions Not to Refer Charges of Certain Sex-Related Offenses for Trial by Courts-Martial). The requirement is now included in AR 27-10 (Military Justice).

8.2. Inclusion of disposition results in future annual reports.

(a) SUBMITTAL TO SECRETARY OF DEFENSE OF INFORMATION ON EACH ARMED FORCE.—Subsection (b) of section 1631 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (10 U.S.C. 1561 note) is amended by adding at the end the following new paragraph:

“(11) An analysis of the disposition of the most serious offenses occurring during sexual assaults committed by members of the Armed Force during the year covered by the report, as identified in unrestricted reports of sexual assault by any members of the Armed Forces, including the numbers of reports identifying offenses that were disposed of by each of the following:

“(A) Conviction by court-martial, including a separate statement of the most serious charge preferred and the most serious charge for which convicted.

“(B) Acquittal of all charges at court-martial.

“(C) Non-judicial punishment under section 815 of title 10, U.S. Code.
“(D) Administrative action, including by each type of administrative action imposed.
“(E) Dismissal of all charges, including by reason for dismissal and by stage of proceedings in which dismissal occurred.”

Completed. The Army began submitting this information with the FY12 Annual Report on Sexual Assault, dated March 6, 2013.

8.3. Confidential review of the terms or characterization of discharge for Armed Services members who report being victims of sexual assault.

(a) CONFIDENTIAL REVIEW PROCESS THROUGH BOARDS FOR CORRECTION OF MILITARY RECORDS.—The Secretaries of the military departments shall each establish a confidential process, utilizing boards for the correction of military records of the military department concerned, by which an individual who was the victim of a sex-related offense during service in the Armed Forces may challenge the terms or characterization of the discharge or separation of the individual from the Armed Forces on the grounds that the terms or characterization were adversely affected by the individual being the victim of such an offense.

(b) CONSIDERATION OF INDIVIDUAL EXPERIENCES IN CONNECTION WITH OFFENSES.—In deciding whether to modify the terms or characterization of the discharge or separation from the Armed Forces of an individual described in subsection (a), the Secretary of the military department concerned shall instruct boards for the correction of military records—

(1) to give due consideration to the psychological and physical aspects of the individual’s experience in connection with the sex-related offense; and

(2) to determine what bearing such experience may have had on the circumstances surrounding the individual’s discharge or separation from the Armed Forces.

(c) PRESERVATION OF CONFIDENTIALITY.—Documents considered and decisions rendered pursuant to the process required by subsection (a) shall not be made available to the public, except with the consent of the individual concerned.

(d) SEX-RELATED OFFENSE DEFINED.—In this section, the term “sex-related offense” means any of the following:

(1) Rape or sexual assault under subsection (a) or (b) of section 920 of title 10, United States Code (article 120 of the Uniform Code of Military Justice).

(2) Forcible sodomy under section 925 of such title (article 125 of the UCMJ).

(3) An attempt to commit an offense specified in paragraph (1) or (2) as punishable under section 880 of such title (article 80 of the UCMJ).

Completed. On August 6, 2015, the Secretary signed Army Directive 2015-29 (Confidential Reviews of Characterization of Terms of Discharge of Members of the Army Who Are Victims of Sexual Offenses), implementing section 547 of the FY15 National Defense Authorization Act (NDAA).

8.4. Applicability of sexual assault prevention and response and related military justice enhancements to military service academies.

(a) MILITARY SERVICE ACADEMIES.—The Secretary of the military department concerned shall ensure that the provisions of title XVII of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113–66; 127 Stat. 950), including amendments made by that title, and the provisions of subtitle D, including amendments made by such subtitle, apply to the United States Military Academy, the Naval Academy, and the Air Force Academy, as applicable.

Completed. The provisions became applicable to USMA on the effective date of the statute, December 26, 2013

8.5. Sexual assault prevention and response training for administrators and instructors of Senior Reserve Officers' Training Corps.

The Secretary of a military department shall ensure that the commander of each unit of the Senior Reserve Officers' Training Corps and all Professors of Military Science, senior military instructors, and civilian employees detailed, assigned, or employed as administrators and instructors of the Senior Reserve Officers' Training Corps receive regular sexual assault prevention and response training.

Completed. TRADOC began providing the required SHARP training during its USACC University Senior Leader Course in December 2015.

9. Analytic Discussion

9.1. Provide an analytic discussion of your Military Service's Statistical Report of reported sexual assault cases from the DSAID. Required elements included on this template are information on Unrestricted Reports; Restricted Reports; Service referrals for victims alleging sexual assault; and case synopses of completed investigations.

This section shall include such information as:

- Notable changes in the data over time and insight or suspected reasons for noted changes, or lack of change, in data
- The application of insights from data analyses for programmatic planning, oversight, and/or research
- Prevalence vs. reporting (percentage of Service member incidents captured in reports of sexual assault (Restricted and Unrestricted Reports) (Metric #2)
- Total number of Sexual Assault Reports (Restricted and Unrestricted) over time (since FY08) (Metric #12)
- Military Protective Orders issued as a result of an Unrestricted Report (e.g., number issued, number violated)
- Approved expedited transfers and reasons why transfers were not approved
- Number of sexual assault investigations completed by the MCIO in the FY and corresponding mean and median investigation length. Case open date can be in any year, but the close date must be by the end of the FY (Metric # 5)
- The number of subjects with victims who declined to participate in the military justice process (Metric #8)
- Command action for military subjects under DoD legal authority (to be captured using the most serious crime investigated, comparing penetration to contact crimes) (Non-Metric #1)
- Sexual assault court-martial outcomes (to be captured using the most serious crime charged, comparing penetration to contact crimes) (Non- Metric #2)
- Summary of referral data – Unrestricted and Restricted Reports - either referrals received from other sources or referrals made to other sources (e.g., medical/mental health, command, criminal investigation/security services, legal, civilian or VA authorities, etc.)
- Any other data relating to sexual assault case data

Sexual Assault Historical Reporting Data (Metric #12)

As displayed in figure 2-1, there were 1,996 unrestricted reports and 501 restricted reports of sexual assault in the Army during FY16. The total number of reports (restricted and unrestricted) decreased less than 1 percent from FY15. However, the number of Service members (SMs) making an unrestricted or restricted report increased 1 percent from FY15. Combined with a 3 percent decrease in the population of the Army from FY15 to FY16, the number of SMs making a report of sexual assault in FY16 equates to 4.4 reports per 1,000 active duty Soldiers, compared to 4.2 per 1,000 in FY14 and FY15.

The Army believes the increase in the rate of reports of sexual assault by Service member victims (from 2.3 in FY12 to 4.4 in FY16) does not equate to an increase in actual

assaults. Rather, the unprecedented priority placed on sexual assault prevention and response by Army leaders since FY12 has seemingly encouraged victims who previously were reluctant to come forward and report.

Reports of Sexual Assaults (Rate/1,000)	FY 2007	FY 2008	FY 2009	FY 2010	FY 2011	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016
Unrestricted Reports ¹	1,342	1,476	1,658	1,482	1,520	1,398	2,017	2,199	2,046	1,996
Restricted Reports	271	256	283	299	301	174	318	407	470	501
Total Reports ¹	1,613	1,732	1,941	1,781	1,821	1,572	2,335	2,606	2,516	2,497
Total SM Victims ²	1,248	1,337	1,397	1,316	1,378	1,248	1,766	2,072	1,922	1,962
SM Report Rate/1000 ³	2.4	2.5	2.6	2.4	2.5	2.3	3.5	4.2	4.2	4.4

Figure 2-1: Reported Sexual Assaults in the Army & Rate/1000 (Metric #12)

1: As of FY14, one victim equals one report, per DoD guidance. (FY07-FY13 adjusted to one victim per report).

2: Includes only SM victims in restricted and unrestricted reports for incidents occurring while in the military.

3: Includes SMs reporting incidents occurring prior to military service.

NOTE: Designated Army SARCs enter sexual assault case data into DSAID based on information received directly from victims, information provided by a VA and/or information from CID investigators. Subject and case disposition data populates DSAID from a system interface with ALERTS, and manual data entry by SARCs and HQDA OTJAG through the DSAID Legal Officer module.

Prevalence of Sexual Assault vs. Reporting (Metric #2)

The Army continues to strive to achieve its goal of a culture of dignity and respect that results in positive command climates in which sexual offenses are rare and victims feel safe in reporting, free from intimidation and retaliation. Although trends in the Army show an increase in rates of reporting, sexual assault remains a very under-reported crime in the Army and throughout the United States. According to the 2015 *Criminal Victimization* report published by the Department of Justice Bureau of Justice Statistics, less than a third of rape and sexual assault victims in the United States reported their incident to police.

Because sexual assault is so under-reported, prevalence of sexual assault in the Army is an estimate of the number of Soldiers who identify, through survey questions, that they were victims of sexual assault during the previous year, while in the Army. The Army (and DoD) determines prevalence of sexual assault based on responses to the Workplace and Gender Relations Survey of Active Duty Members (WGRA), administered every 2 years by the Defense Manpower Data Center (DMDC). DMDC conducted the most recent WGRA from July to October 2016. DMDC invited more than 282,000 Soldiers (228,527 men and 54,057 women) from private to colonel to take the survey. Although the results of the 2016 WGRA are not currently available, trends of prevalence versus reporting have shown positive trends over time.

Figure 2-2 depicts estimated prevalence data for FY10 and FY12 based on the percent of male and female Soldiers who said they experienced “unwanted sexual contact” in their responses to WGRA surveys. Figure 2-2 also depicts data derived from the 2014 RAND Military Workplace Study, which replicated the WGRA Surveys but also collected more

detailed information, had more respondents and higher response rates. This FY14 data, combined with the increase in reports per 1,000 Soldiers, significantly narrowed the gap between prevalence and reporting. As a result, 28 percent of Soldiers who responded that they experienced "unwanted sexual contact" in the FY14 survey actually reported the incident. This was a significant increase from the Army rate of 14 percent in FY12 and greater than the DoD average of 23 percent in FY14. Since closing the gap between the prevalence and number of reports of sexual assault incidents is a stated goal of the Army, the FY14 data was very encouraging. (Note: FY16 Prevalence vs. Reporting data is pending the results of the 2016 WGRA).

Prevalence vs. Reporting (Metric #2)	FY10	FY12	FY14	FY16
Percent of <i>female</i> Soldiers who said they experienced "unwanted sexual contact" based on responses to WGRA Surveys and the 2014 Military Workplace Study	6.0%	7.1%	4.7%	TBD
Percent of <i>male</i> Soldiers who said they experienced "unwanted sexual contact" based on responses to WGRA Surveys and the 2014 Military Workplace Study	1.0%	0.8%	1.0%	TBD
<i>Estimated</i> number of Soldiers who were sexual assault victims based on responses to WGRA Surveys and the 2014 Military Workplace Study	8,600	8,800	7,300	TBD
Soldier Victims who <i>Reported</i> Sexual Assaults	1,316	1,248	2,072	1,962
Soldier victims reporting a sexual assault vs. responses to WGRA Surveys and the 2014 Military Workplace Study (<i>Reported/Estimated</i>)	15%	14%	28%	TBD

Figure 2-2: Prevalence vs. Reporting (Metric #2)

Unrestricted Reports (Victim Information)

Some demographic trends in Army unrestricted reports have remained consistent over the past few years. For example, 80 percent of Army victims in FY16 completed investigations were E1-E4 compared to 79 percent in FY15, 80 percent in FY14, and 83 percent in FY13. Also in FY16, 70 percent of victims in completed investigations were 24 years old or younger, compared to 69 percent in FY15 and 68 percent in FY14.

One noticeable change the past few years is the percentage of Service member victims in all unrestricted reports who were male. This percentage increased to 26 percent in FY14, compared to 18 percent in FY13 and 17 percent in FY12. In FY16, 25 percent of Service member victims making an unrestricted report of sexual assault were male, comparable to the 24 percent in FY15. This seems to indicate the Army's efforts to reduce the stigma of male victim reporting may be having a positive effect.

Figure 2-3 shows the breakout of victims (Service member and non-Service member) and each type of sexual assault offense for Army unrestricted reports in FY16. Excluding attempts and cases where the offense code was not available, DSAID data shows the proportion of assaults that were the more serious penetrative offenses (specifically rape, aggravated sexual assault/sexual assault, and forcible sodomy) was 45 percent in FY16

compared to 44 percent in FY15, 43 percent in FY14, and 55 percent in both FY12 and FY13. This proportion was 66 percent in FY11. This trend may suggest penetrative offenses are less prevalent. In fact, only 36 percent of Army respondents to the 2014 Military Workplace Study who experienced sexual assault indicated the assault was a penetrative offense. Recent reporting trends may also suggest that Soldiers are increasingly recognizing the non-penetrative (“unwanted touching”) offenses as criminal behavior that can and should be addressed.

Offense Type (Unrestricted Reports) ¹	Service Member Victim	Non-Service Member Victim	Total Victims	Percent of Total
Rape	218	91	309	16%
Forcible Sodomy	1	0	1	<1%
(Aggravated) Sexual Assault	402	136	538	27%
Aggravated Sexual Contact	18	1	19	1%
Abusive Sexual Contact	834	154	988	50%
Wrongful Sexual Contact	4	0	4	<1%
Indecent Assault	12	2	14	<1%
Attempts	2	0	2	<1%
Offense Code Not Available	100	0	100	5%
Total	1,591	384	1,975	100%

1: Does not include restricted reports from previous years that converted to unrestricted in FY15.

Figure 2-3: Victim Status by Offense Type (FY16 Unrestricted Reports)

During FY16, 44 Soldiers made an unrestricted report for an incident occurring prior to joining the Army, compared to 47 in FY15. However, the number of Soldiers making such reports has risen recently, from 16 in FY12, 22 in FY13, and 38 in FY14.

HRC processed 225 PCS expedited transfer requests in FY16. Only one was denied as the allegation was determined to be unfounded. The CG, HRC made the final decision in the denial. (FY15=267 requests/1 denied). Additionally, Army commands reported 29 Soldiers requested expedited unit transfers (to remain on their current installation). One request was denied because the victim was pending separation from the Army. (FY15=21 requests /0 denied).

Commanders issued 329 MPOs in FY16 (FY15=332). Eight were reported to have been violated by subjects (FY15=3). Overall, 64 percent of unrestricted reports in FY16 occurred on a military installation, compared to 63 percent in FY15.

The percent of victims who declined to participate in the military justice process (Metric #8), precluding any command action for subjects where evidence supported command action, steadily decreased from 7 percent in FY12 to 6 percent in FY13 to 4 percent in both FY14 and FY15. During FY16, 5 percent of victims declined to participate.

Service members receiving victim services for unrestricted reports continue to use military facilities more often than civilian facilities. In FY16, 97 percent of victim services

were performed at military facilities, compared to 95 percent and 96 percent in FY14 and FY15, respectively.

There were 164 SAFE exams conducted for unrestricted reports (154 in FY15).

Unrestricted Reports (Subject Information)

FY16 data regarding alleged offenders (subjects) continue to show trends similar to previous years. Identified alleged offenders were 95 percent male in FY16 compared to 96 percent in FY15 and 95 percent in FY14. The percentage of alleged offenders who were E1-E4 was 55 percent in FY16, similar to the 54 percent in FY15, which was only slightly more than 52 percent in FY14.

One noticeable change in FY16 was the percentage of subjects who were 24 years old or younger. While this age group has always been the largest category among all subjects, during FY16, 50 percent of known alleged offenders were 24 years old or younger compared to 44 percent in FY15 and 42 percent in FY14.

Figure 2-4 shows the breakout of subjects (alleged offenders) and each type of sexual assault investigation completed during FY16. Excluding attempts and cases where the offense code was not available, the proportion of FY16 cases with Service member subjects was 76 percent, down from 81 percent in FY15 (FY14=80 percent; FY13=81 percent; FY12=84 percent). However, 21 percent of offenders in FY16 could not be identified, up from 16 percent in FY15 and 15 percent in FY14.

Offender Status by Assault Type (Unrestricted Reports)	Service Member Offenders	Non-Service Member Offenders	Unidentified Offenders	Total	Percent of Total
Rape	267	14	123	404	19%
Forcible Sodomy	5	0	5	10	<1%
(Aggravated) Sexual Assault	458	13	160	631	30%
Aggravated Sexual Contact	12	2	3	17	1%
Abusive Sexual Contact	827	33	143	1,003	48%
Wrongful Sexual Contact	10	0	2	12	<1%
Indecent Assault	4	0	4	8	<1%
Attempts	2	0	2	4	<1%
Offense Code Not Available	5	2	1	8	<1%
Total	1,590	64	443	2,097	100%

Figure 2-4: Offender Status by Assault Type (FY16 Unrestricted Cases)

Unrestricted Reports (Investigation Information)

The previous discussion of the unrestricted reports represent sexual assaults reported during FY16 in which either the victim or alleged offender was a Service member, neither was a juvenile, and the subject and victim are not each other's spouse, former spouse, or intimate partner. While other jurisdictions may dispose of reports of sexual assault before opening an investigation, the Army formally investigates every allegation as a sexual assault. Although this practice may ostensibly contribute to a higher number of cases,

and a higher number of allegations in which there was insufficient evidence to legally prove the elements of a sexual assault, it demonstrates the Army's commitment to thoroughly and transparently investigate all unrestricted reports of sexual assault.

The average completion time (Metric #5) for the 1,863 sexual assault investigations completed by CID in FY16 was 145 days (median=110 days), compared to 127 days (median=104) in FY15 and 129 days (median 106) in FY14. Each case is unique and the amount of time to complete an investigation is dependent on several factors, including type of complaint, delays in reporting, amount of physical evidence, and cooperation of witnesses. The greater number of cases reported to CID in FY15 and FY16 also affected the timeliness of completing investigations. As a result, 706 of the 1,775 investigations initiated during FY16 were pending completion at the end of the fiscal year.

Unrestricted Reports (Disposition Information)

In the Army, a commander is not limited to a single disposition choice and may employ more than one disciplinary tool, including judicial, non-judicial, and administrative, to fully address an allegation. The disposition of any offense depends on the unique facts and circumstances of the allegation. Commanders, upon the advice of Judge Advocates, must use independent judgment to determine the appropriate level of disposition.

The authority to dispose of a "penetrative" offense (an allegation of rape, sexual assault, or forcible sodomy) is withheld to the Special Court-Martial Convening Authority (SPCMCA) at the COL/O6 level, with a servicing legal advisor. The authority to dispose of a "non-penetrative" offense (an allegation of aggravated sexual contact or abusive sexual contact) is withheld to a LTC/O5 who also receives advice from a legal advisor.

Although the format of this report requires the Army to place each allegation into a single disposition category, the following explanations reflect that several disposition categories may be appropriate for a single allegation.

Using the data produced by DSAID, there were 1,448 allegations of sexual assault, ranging from rape to indecent assault ready for disposition (Non-Metric #1 and Non-Metric #2) decisions in FY16. (This includes allegations from cases opened in previous years completed in FY16). Of these 1,448 allegations:

- 433 allegations were disposed of through the referral of court-martial charges.
- 75 allegations were disposed of through an involuntary, adverse administrative discharge of the subject.
- 176 allegations were disposed of through non-judicial punishment, including 56 which also resulted in an administrative discharge. Each of these 176 offenses involved a non-penetrative sexual assault offense, the vast majority an unwanted touch over the clothing. No penetrative offense (rape, aggravated sexual assault, sexual assault, or forcible sodomy) was disposed of with non-judicial punishment.
- 98 allegations were disposed of through other adverse administrative actions. Each one of these offenses involved a non-penetrative sexual assault, the vast majority an unwanted touch over the clothing. No penetrative offense was disposed of with an adverse administrative action.

- 242 allegations provided probable cause only for a non-sexual assault offense. In each of these allegations, there was insufficient evidence to prosecute the founded sexual assault offense. Subsequently, commanders took punitive action for a non-sexual assault offense, such as adultery, fraternization, or indecent acts. In 28 of these cases, court-martial charges were preferred. In 56 of these cases, the subject was administratively discharged for the non-sexual assault offense. In 129 of these cases, the subject was given non-judicial punishment and in 29 cases the subject was given other adverse administrative actions.
- 71 allegations were complicated by the refusal of the victim to cooperate in a military justice action (Metric #8). Without the cooperation of the victim in these cases, the Army was unable to take any punitive actions against the subject.
- 27 allegations involved an expired statute of limitations.
- 324 allegations had insufficient evidence of any offense. Although allegations made against the offender met the lower standard for titling in a criminal investigation, there was insufficient evidence to proceed with a military justice action.
- 2 allegations were unfounded by command/legal review

Disposition data trends (illustrated in figure 2-5) continue to reflect a healthy judicial system, in which commanders employ the wide spectrum of disciplinary tools available to address misconduct from an unwanted touch over the clothing to a forcible rape.

In addition to the 1,448 allegations, there were 309 allegations that could not be disposed of by the Army:

- 179 allegations involved an unknown subject.

- 6 allegations involved a subject who was deceased or had deserted.
- 67 allegations were disposed of by a civilian or foreign authority because the accused was not subject to the jurisdiction of the military.
- 57 allegations were disposed of by a civilian or foreign authority although the accused was subject to Army jurisdiction. In these cases, all of which occurred outside the limits of a military installation, the civilian authority served as the primary investigative agency and determined the allegation merited charges.

The average length of time from the date victims signed their DD Form 2910 (Victim Reporting Preference Statement) to the date a court-martial sentence (Non-Metric #3) was imposed during FY16, or the accused was acquitted, was 198 days (median=179), down significantly from FY15 (average=241; median=238). The average length of time from the date victims signed their DD Form 2910 to the date an NJP concluded (Non-Metric #4) was 77 days (median=52), also much less than FY15 (average=107; median=102).

Finally, Army dispositions include cases in which the military justice process addressed allegations of sexual assault involving Soldiers, when a civilian or foreign justice process did not fully address the alleged misconduct. These actions illustrate Army commanders' interests in accountability for Soldier offenders given the challenges civilian jurisdictions face when prosecuting alcohol-facilitated sexual assaults.

Restricted Reports

During FY16, the Army also recorded 620 restricted reports, of which 119 later converted to unrestricted, leaving 501 reports that remained restricted (FY15=586-116; FY14=509-102).

Victims filing restricted reports in FY16 were 24 years old or younger at a comparable percentage to victims filing unrestricted reports. Specifically, 70 percent of restricted report victims were 24 years old or younger in FY16 (compared to 66 percent in FY14 and FY15), identical to FY16 unrestricted reports (FY15=69 percent; FY14=68 percent).

There were also some notable contrasts between restricted and unrestricted reports:

- Only 50 percent of restricted reports were for alleged assaults that reportedly occurred on a military installation (FY15=44 percent; FY14=47 percent), compared to 64 percent for unrestricted reports (FY15=63 percent; FY14=65 percent).
- During FY16, 32 percent of restricted reports (for which data was available) were reported more than a year after the incident (FY15=27 percent; FY14=29 percent), compared to only 16 percent of unrestricted reports (FY15=17 percent; FY14=17 percent) made by Service member victims.
- Victims who reported a sexual assault in FY16 that occurred prior to their military service were much more likely to do so with a restricted report. Of the 132 reported in FY16 (FY15=148; FY14=81), 88 were restricted reports (FY15=101; FY14=43).

During FY16, 95 percent of Service members receiving victim services related to restricted reports of sexual assault did so in military facilities compared to 93 percent in

FY15 and 97 percent in FY14. These services included 58 SAFE exams for FY16 restricted reports compared to 40 in FY15 and 38 in FY14.

Most (82 percent) services provided to non-Service member victims in FY16 were performed using military resources, compared to 85 percent in FY15 and 84 percent in FY14. These services included 36 SAFE exams for non-military victims (12 restricted and 24 unrestricted reports) compared to 31 in FY15 and 33 in FY14.

9.2. Complete the following table with your numbers as of the end of the FY. Use the job/duty descriptions provided and the following inclusion criteria:

- **Include all Reserve and Active Duty military personnel. Army and Air Force do not need to include National Guard personnel as they will be included in the NGB's response.**
- **Include civilian and contractor personnel**
- **Only include filled positions**
- **Indicate the number of full-time and part-time personnel**
- **Provide the exact number of current personnel, whenever possible. If the number is an estimate, please indicate how the estimate was reached and any other relevant information.**

Job/Duty Title	Description of Job/Duty	Full-Time	Part-Time
Program Managers	Capability in developing policy, or program management and execution; and completion of 40+ hours of Military Service-specific National Advocate Credentialing Program and approved SARC training.	50	14
Dedicated Headquarters-Level Professionals	Include policy, advocacy, and prevention professionals who support the headquarters-level SAPR program offices at each Military Service/NGB (not including program managers, who are counted in their own category).	26	0
Uniformed SARCs	Serve as the single point of contact at an installation or within a geographic area to oversee sexual assault awareness, prevention, and response training; coordinate medical treatment, including emergency care, for victims of sexual assault; and track the services provided to victims from the initial report through final disposition and resolution. Certified under the nationally-accredited D-SAACP.	192	326
Civilian SARCs	See above.	112	33

Uniformed SAPR-VAs	Provide non-clinical crisis intervention, referral, and ongoing non-clinical support to adult sexual assault victims; offer information on available options/resources to victims; coordinate liaison assistance with other organizations and agencies on victim care matters; and report directly to the SARC. Certified under the nationally-accredited D-SAACP.	155	1434
Civilian SAPR-VAs	See above.	158	84
Sexual Assault-Specific Legal	Legal personnel who specialize in sexual assault cases including prosecutors, Victim Witness Assistance Program personnel, paralegals, legal experts, and SVCs/VLCs.	588	62
Sexual Assault – Specific Investigators	MCIO investigators who specialize in sexual assault cases.	30	600
Sexual Assault Medical Forensic Examiners	Medical providers that have completed the DoD course at Fort Sam Houston, or equivalent.	4	129

Total Victims who reported in prior years and converted from Restricted Report to Unrestricted Report in the FY16	21
# Service Member Victims who converted from Restricted Report to Unrestricted Report in FY16	21
# Non-Service Member Victims who converted from Restricted Report to Unrestricted Report in FY16	0
# Relevant Data Not Available	0
* The Restricted Reports are reports that converted to Unrestricted Reports are counted in the total number of Unrestricted Reports listed in Worksheet 1a, Section A.	

3 - VICTIM SERVICES

ARMY FY16 SUPPORT SERVICES FOR VICTIMS OF SEXUAL ASSAULT			
NOTE: Totals of referrals and military protective orders are for all activities during the reporting period, regardless of when the sexual assault report was made.			
A. SUPPORT SERVICE REFERRALS TO SERVICE MEMBERS VICTIMS FROM UNRESTRICTED REPORTS:		FY16 Totals	
# Support service referrals for Victims in the following categories			
# MILITARY Resources (Referred by DoD)		1835	
# Medical		182	
# Mental Health		365	
# Legal		368	
# Chaplain/Spiritual Support		109	
# Rape Crisis Center			
# Victim Advocate/Uniformed Victim Advocate		693	
# DoD Safe Helpline		45	
# Other		73	
# CIVILIAN Resources (Referred by DoD)		60	
# Medical		8	
# Mental Health		19	
# Legal		1	
# Chaplain/Spiritual Support		1	
# Rape Crisis Center		14	
# Victim Advocate		8	
# DoD Safe Helpline			
# Other		9	
# Cases where SAFEs were conducted		164	
# Cases where SAFE kits or other needed supplies were not available at time of Victim's exam		0	
# Military Victims making an Unrestricted Report for an incident that occurred prior to military service		44	
B. FY16 MILITARY PROTECTIVE ORDERS (MPO)* AND EXPEDITED TRANSFERS - UNRESTRICTED REPORTS		FY16 TOTALS	
# Military Protective Orders issued during FY16		329	
# Reported MPO Violations in FY16		8	
# Reported MPO Violations by Subjects		8	
# Reported MPO Violations by Victims of sexual assault		0	
# Reported MPO Violations by Both		0	
*In accordance with DoD Policy, Military Protective Orders are only issued in Unrestricted Reports. A Restricted Report cannot be made when there is a safety risk for the Victim.		Use the following categories or add a new category	FY16 TOTALS
# Unit/Duty expedited transfer requests by Service Member Victims of sexual assault	29	Total Number Denied	2
# Unit/Duty expedited transfer requests by Service Member Victims Denied	1	Reasons for Disapproval (Total)	2
# Installation expedited transfer requests by Service Member Victims of sexual assault	225	Moved Alleged Offender Instead	0
# Installation expedited transfer requests by Service Member Victims Denied	1	Pre-existing Transfer Order Used Instead	0
C. SUPPORT SERVICE REFERRALS FOR MILITARY VICTIMS IN RESTRICTED REPORTS		FY16 TOTALS	
# Support service referrals for Victims in the following categories			
# MILITARY Resources (Referred by DoD)		647	
# Medical		76	
# Mental Health		222	
# Legal		57	
# Chaplain/Spiritual Support		49	
# Rape Crisis Center			
# Victim Advocate/Uniformed Victim Advocate		209	
# DoD Safe Helpline		13	
# Other		21	
# CIVILIAN Resources (Referred by DoD)		31	
# Medical		1	
# Mental Health		8	
# Legal		1	
# Chaplain/Spiritual Support		0	
# Rape Crisis Center		12	
# Victim Advocate		5	
# DoD Safe Helpline			
# Other		4	
# Cases where SAFEs were conducted		58	
# Cases where SAFE kits or other needed supplies were not available at time of Victim's exam		0	
		Victim Pending Separation	1
		The alleged sexual assault was unfounded	1

4 - UNRESTRICTED REPORTS (CAI)

E. SUMMARY OF UNRESTRICTED REPORTS WITH INVESTIGATIONS IN COMBAT AREAS OF INTEREST		FY16 Totals
E1. Subjects in Unrestricted Reports Made to Your Service with Investigation Initiated During FY16 in Combat Areas of Interest		
Note: This data is drawn from DSAID based on Service affiliation of the SARC who currently manages the Victim case associated with the investigation and Subject below.		
# Investigations Initiated during FY16		33
# Investigations Completed as of FY16 End (group by MCIO #)		25
# Investigations Pending Completion as of FY16 End (group by MCIO #)		8
# Subjects in investigations Initiated During FY16		38
# Service Member Subjects investigated by CID		23
# Your Service Member Subjects investigated by CID		23
# Other Service Member Subjects investigated by CID		0
# Service Member Subjects investigated by NCIS		0
# Your Service Member Subjects investigated by NCIS		0
# Other Service Member Subjects investigated by NCIS		0
# Service Member Subjects investigated by AFOSI		0
# Your Service Member Subjects investigated by AFOSI		0
# Other Service Member Subjects investigated by AFOSI		0
# Non-Service Member Subjects in Service Investigations		2
Note: Non-Service Member Subjects are drawn from all CID, NCIS and AFOSI investigations involving a Victim supported by your Service.		
# Unidentified Subjects in Service Investigations		12
Note: Unidentified Subjects are drawn from all CID, NCIS and AFOSI investigations involving a Victim supported by your Service.		
# Service Member Subjects investigated by Civilian or Foreign Law Enforcement		0
Note: Service Member Subjects are drawn from Civilian or Foreign Law Enforcement investigations involving a Victim supported by your Service.		
# Your Service Member Subjects investigated by Civilian or Foreign Law Enforcement		0
# Other Service Member Subjects investigated by Civilian or Foreign Law Enforcement		0
# Non-Service Member Subjects in Civilian or Foreign Law Enforcement Investigations involving a Victim supported by your Service		0
# Unidentified Subjects in Civilian or Foreign Law Enforcement Investigations involving a Victim supported by your Service		0
# Subject or Investigation Relevant Data Not Available		1
E2. Service Investigations Completed during FY16 in Combat Areas of Interest		
Note: The following data is drawn from DSAID and describes criminal investigations completed during the FY16. These investigations may have been initiated during the FY16 or any prior FY.		FY16 Totals
# Total Investigations completed by Services during FY16 (Group by MCIO Case Number)		37
# Of these investigations with more than one Victim		2
# Of these investigations with more than one Subject		5
# Of these investigations with more than one Victim and more than one Subject		0
# Subjects in investigations completed during FY16 involving a Victim supported by your Service		44
# Service Member Subjects investigated by CID		29
# Your Service Member Subjects investigated by CID		29
# Other Service Member Subjects investigated by CID		0
# Service Member Subjects investigated by NCIS		0
# Your Service Member Subjects investigated by NCIS		0
# Other Service Member Subjects investigated by NCIS		0
# Service Member Subjects investigated by AFOSI		0
# Your Service Member Subjects investigated by AFOSI		0
# Other Service Member Subjects investigated by AFOSI		0
# Non-Service Member Subjects in completed Service Investigations involving a Victim supported by your Service		2
# Unidentified Subjects in completed Service Investigations involving a Victim supported by your Service		13
# Subject Relevant Data Not Available		0
# Victims in investigations completed during FY16, supported by your Service		40
# Service Member Victims in CID investigations		38
# Your Service Member Victims in CID investigations		38
# Other Service Member Victims in CID investigations		0
# Service Member Victims in NCIS investigations		0
# Your Service Member Victims in NCIS investigations		0
# Other Service Member Victims in NCIS investigations		0
# Service Member Victims in AFOSI investigations		0
# Your Service Member Victims in AFOSI investigations		0
# Other Service Member Victims in AFOSI investigations		0
# Non-Service Member Victims in completed Service Investigations, supported by your Service		2
# Victim Relevant Data Not Available		0

4 - UNRESTRICTED REPORTS (CAI)

E3. Subjects and Victims in Investigations Completed by US Civilian and Foreign Agencies during FY16 in Combat Areas of Interest Note: This data is entered by your Service SARC for cases supported by your Service.		FY16 Totals
# Total Investigations completed by US Civilian and Foreign Law Enforcement during FY16 (Group by MCIO Case Number)		0
# Of these investigations with more than one Victim		0
# Of these investigations with more than one Subject		0
# Of these investigations with more than one Victim and more than one Subject		0
# Subjects in investigations completed during FY16 involving a Victim supported by your Service		0
# Service Member Subjects investigated by Civilian and Foreign Law Enforcement		0
# Your Service Member Subjects investigated by Civilian and Foreign Law Enforcement		0
# Other Service Member Subjects investigated by Civilian and Foreign Law Enforcement		0
# Non-Service Member Subjects in Civilian and Foreign Law Enforcement Investigations involving a Victim supported by your Service		0
# Unidentified Subjects in Civilian and Foreign Law Enforcement Investigations involving a Victim supported by your Service		0
# Subject Relevant Data Not Available		0
# Victims in investigations completed during FY16, supported by your Service		0
# Service Member Victims in Civilian and Foreign Law Enforcement investigations		0
# Your Service Member Victims in Civilian and Foreign Law Enforcement investigations		0
# Other Service Member Victims in Civilian and Foreign Law Enforcement investigations		0
# Non-Service Member Victims in Civilian and Foreign Law Enforcement Investigations in a case supported by your Service		0
# Victim Relevant Data Not Available		0
E4. Subjects and Victims in Investigations Completed by Military Police/Security Forces/Master At Arms/Marine Corps CID (MPs) during FY16 (all organizations regardless of name are abbreviated below as "MPs") in Combat Areas of Interest Note: This data is entered by your Service SARC for cases supported by your Service. Note: As of 1 Jan 2013, all sexual assault investigations are referred to MCIO for investigation. This section captures remaining Subjects from investigations opened in prior years by Military Police/Security Forces/Master At Arms/Marine Corps CID.		FY16 Totals
# Total Investigations completed by MPs during FY16 (Group by MCIO Case Number)		0
# Of these investigations with more than one Victim		0
# Of these investigations with more than one Subject		0
# Of these investigations with more than one Victim and more than one Subject		0
# Subjects in MP investigations completed during FY16 involving a Victim supported by your Service		0
# Service Member Subjects investigated by MPs		0
# Your Service Member Subjects investigated by MPs		0
# Other Service Member Subjects investigated by MPs		0
# Non-Service Member Subjects in MPs involving a Victim supported by your Service		0
# Unidentified Subjects in MPs involving a Victim supported by your Service		0
# Subject Relevant Data Not Available		0
# Victims in MP investigations completed during FY16, supported by your Service		0
# Service Member Victims in MP investigations		0
# Your Service Member Victims in MP investigations		0
# Other Service Member Victims in MP investigations		0
# Non-Service Member Victims in MP Investigations, supported by your Service		0
# Victim Relevant Data Not Available		0

Appendix A: Glossary of Acronyms

AAA - Army Audit Agency
AAR - After Action Review
ACE-SI - Ask Care Escort-Suicide Intervention
ACOM - Army Command
ACS - Army Community Service
AFRICOM - U.S. Africa Command
AIT - Advanced Individual Training
AKO - Army Knowledge Online
ALARACT - All Army Activities (message)
ALERTS - Army Law Enforcement Reporting and Tracking System
AMC - U.S. Army Materiel Command
AMEDD - Army Medical Department
AMHRR - Army Military Human Resource Record
APFT - Army Physical Fitness Test
AOC - Army Operations Center
AOR - Area of Responsibility
AR - Army Regulation
ARBA - Army Review Boards Agency
ARCENT - U.S. Army Central
ARCYBER - U.S. Army Cyber Command
ARD - Army Resiliency Directorate
ARI - U.S. Army Research Institute for the Behavioral and Social Sciences
ARSOUTH - U.S. Army South
ASA M&RA - Assistant Secretary of the Army for Manpower and Reserve Affairs
ASAP - Army Substance Abuse Program
ASCC - Army Service Component Command
ASI - Additional Skill Identifier
ASIST - Applied Suicide Intervention Skills Training
BCD - Bad Conduct Discharge
BCT - Basic Combat Training
BHI - Behavioral Health Interview

BOI - Board of Inquiry
BOLC - Basic Officer Leader Course
BOLC-A - Basic Officer Leader Course - Accession (ROTC)
BOLC-B - Basic Officer Leader Course - Branch
BOSS - Better Opportunities for Single Soldiers
CAI - Combat Areas of Interest
CAPE - Center for the Army Profession and Ethic
CASH/A - Cadets Against Sexual Harassment/Assault
CEU - Continuing Education Units
CG - Commanding General
CHPC - Community Health Promotion Council
CID - U.S. Army Criminal Investigation Command
CIMT - Center for Initial Military Training
CoE - Center of Excellence
CoJ - Chiefs of Justice
COL - Colonel (O6)
COLS - Common Operating List of Standards
CONUS - Continental United States
CQ - Charge of Quarters
CR2C - Command Ready and Resilient Council
CSM - Command Sergeant Major
CSMC - Command Sergeants Major Course
CSO - Consolidated SHARP Office
DA - Department of the Army
DAC - Department of the Army Civilian
DAIG - Department of the Army Inspector General
DCAP - Defense Counsel Assistance Program
DCG - Deputy Commanding General

Enclosure 2: Department of the Navy

THE SECRETARY OF THE NAVY
WASHINGTON DC 20350-1000

March 20, 2017

MEMORANDUM FOR UNDER SECRETARY OF DEFENSE
(PERSONNEL AND READINESS)

SUBJECT: Fiscal Year 2016 Department of Defense Annual Report on Sexual Assault
in the Military

As requested by Under Secretary of Defense for Personnel and Readiness (Acting) memorandum of September 29, 2016, the attached is provided as input from the Department of the Navy (DON) covering Fiscal Year (FY) 2016 for your Annual Report to Congress on Sexual Assault in the Military, as mandated by the National Defense Authorization Act for FY 2011, Section 1631 and Public Laws 111-84, 112-239 and 113-291.

The DON is deeply committed to achieving a culture of gender respect – where sexual assault is never tolerated and ultimately eliminated; where *all* victims receive effective support and protection; and where offenders are held appropriately accountable. I, the Chief of Naval Operations, and the Commandant of the Marine Corps work collaboratively towards these high-priority goals. On my behalf, the Department of the Navy Sexual Assault Prevention and Response Office (DON-SAPRO) maintains visibility and oversight of SAPR activities throughout the Navy and Marine Corps, and conducts a number of Department-level initiatives. I have included in our inputs a separate executive summary of these uniquely Departmental efforts, which complement and expand upon the innovative and forward leaning Service-level programs of the Navy and Marine Corps.

Should you require additional information, my point of contact for this action is Ms. Jill Loftus, Director, DON-SAPRO who may be reached by telephone at (703) 697-2180 or by email at jill.loftus@navy.mil.

A handwritten signature in black ink, appearing to read "S. Stackley", is located above the typed name.

Sean Stackley
Acting

As stated

FY16 Annual Report on Sexual Assault in the Military Executive Summary: Department of the Navy

The Department of the Navy (DON) is committed to a culture of gender respect, where sexual assault is never tolerated and ultimately eliminated, where all survivors receive coordinated support and protection, and where alleged offenders are held appropriately accountable. There is no precedent for the scale of what we seek to achieve, and we accept the challenge of breaking new ground in doing so.

The Secretary of the Navy, the Chief of Naval Operations, and the Commandant of the Marine Corps work collaboratively and with shared priority to combat sexual assault throughout the Department. Each conducts separate but overlapping Sexual Assault Prevention and Response (SAPR) activities whose overall impact exceeds the sum of its individual parts. Each also works in partnership with the Department of Defense (DoD) and others to combat sexual assault.

The Department of the Navy Sexual Assault Prevention and Response Office (DON-SAPRO) is a Secretariat entity that operates under the immediate supervision of the Secretary of the Navy. On behalf of the Secretary, DON-SAPRO maintains visibility and oversight of Sexual Assault Prevention and Response (SAPR) activities throughout the Navy and Marine Corps, conducts a number of Department-level initiatives, and develops Departmental SAPR policy guidance.

During FY16, the Director and her staff visited over 50 Navy and Marine Corps locations world-wide. Agendas at each site typically included private meetings with military senior leaders; presentations by local commanders; individual interviews with diverse stakeholders including senior enlisted leaders, Sexual Assault Response Coordinators, Victim Legal Counsels, criminal investigators, command legal officers, medical personnel, and chaplains; and also focus group conversations with Sailors and Marines. Consistent themes from focus groups are that Sailors and Marines feel confident in their command's support and more comfortable about reporting a sexual assault.

In addition, DON-SAPRO staff participated in two men's trauma groups with about 20 individual victims. They separately met with professional staff at the Naval Consolidated Brig in Miramar, CA, and they held discussions with academic experts at the Johns Hopkins School of Public Health; the University of Windsor, Canada; and the Centers for Disease Control in Atlanta, GA. Shared insights underscored the broad range of challenges confronting sexual assault survivors, the prolonged psychological trauma that many suffer, and the complex nature of what many perceive as retaliation.

Many site visits coincided with live-acted, large-audience "Pure Praxis" training programs sponsored by DON-SAPRO. These sessions use professional civilian actors/trainers and audience participation to explore individual responsibilities and behaviors with regard to preventing retaliation and ostracism against individuals after they report a sexual assault. Feedback at all levels was extremely positive. Since November 2015, over 80,000 Sailors and Marines have attended 260 Pure Praxis programs at 90 locations world-wide.

Training tools developed during FY16:

- During FY16, DON-SAPRO released ten new professional-quality SAPR documentary videos and accompanying discussion guides to complete a 20-module library of video training resources. Each module provides 30 minutes of training. They are available online for local downloading and training use within DON. Various topics include consent and survivor stories (including a male victim interview).
- During FY16, DON-SAPRO staff worked to translate material on healthy relationships, the definition of consent, male and female sexual assault, preventing and confronting ostracism, and bystander intervention into a “graphic novel” format suitable for the youngest Sailors and Marines – those known to be our highest-risk demographic for sexual assault. Extensive input was provided directly by young Sailors and Marines in numerous focus groups, and professional graphic art support was provided by the Defense Media Activity (Navy). The resulting 370-page “graphic novel” is now being evaluated by the Services for publication and use in diverse training environments.
- Work was also underway in FY16 toward the development of abbreviated SAPR guidance for military immediate supervisors of enlisted personnel. Our goal is to summarize their leadership responsibilities and priorities, as junior members of the chain of command, in SAPR situations they are likely to encounter.

Other training tools previously developed by DON-SAPRO remain in active use. Each combines professional-quality video segments and facilitated group discussion.

- “Not On My Watch,” is a two-hour SAPR training program tailored for Navy recruits in training, combining video segments with facilitated discussion. It is currently in use for all Navy recruits.
- “Counting On Us,” is a two-hour program tailored for use at the Navy’s Senior Enlisted Academy, which all Navy Senior Chiefs (E-8) are now required to attend.
- “Make a Difference, Be the Solution,” is tailored for pre-commissioned officers, including midshipmen at the Naval Academy and at civilian college Reserve Officers’ Training Corps (ROTC) programs, along with candidates in training at Officer Candidate School (OCS).
- “Empowered to Act,” is tailored for prospective Commanding Officers and is in use at the Naval Leadership and Ethics Center.
- “One Team, One Fight” is a one-hour SAPR training program tailored for civilians. It was deployed DON-wide in 2013 and remains in use for new hires. An updated version is now being developed for use in 2017.

Special initiatives during FY16:

- During FY16, DON-SAPRO distributed 19,000 copies of its updated “SAPR Commander’s Guide” for Navy and Marine Corps Commanding Officers. This conveniently-sized, glossy-format booklet summarizes Departmental priorities, background data, and suggestions for managing local sexual assault cases. The original 2012 version was 22 pages long, and over 40,000 copies were distributed to command leadership across the Navy and Marine Corps. The updated current edition is expanded to 50 pages, with new sections written respectively by judge advocates, criminal investigators, chaplains, medical personnel, and the reserve component.
- In partnership with Commander Naval Installations Command and the Chief of Chaplains, DON-SAPRO resourced and developed the curriculum for confidential, voluntary “CREDO” offsite retreats intended to promote healing and resiliency among survivors of prior sexual assault. During FY16, initial pilot retreats were successfully conducted at Norfolk, VA; Camp Pendleton, CA; and Jacksonville, FL. Feedback from each was extremely positive. Additional “Phase II” pilot programs are already planned for FY17, with broader implementation anticipated in FY18. Our site visit stakeholder conversations underscore the profound vulnerability of prior victims to repeated assault, and thus the potential prevention value of focused and supportive efforts to break that cycle.
- DON-SAPRO continued its partnership with Navy leadership and the Naval Education and Training Command to continuously assess sexual assault in military training environments. Voluntary sexual assault surveys of all graduating students (both genders) began at several sites in 2013 and were expanded during FY14 to all 19 Navy “A” School (initial post-recruit military vocational training) locations – including those at the Naval Submarine School in Groton, CT, where almost all students are male. Surveys at each site utilize a DON-SAPRO survey process that is voluntary, anonymous, web-based, and continuous. The results continue to validate our impression of a low incidence of sexual assault and a positive command climate in these settings.
- During FY16, DON-SAPRO met with several mass-media organizations to promote broad culture change through more positive female role models, particularly those with ties to traditional military roles. One direct result was the groundbreaking lead female character of LT Nora Salter in latest “Call of Duty” video game, released in November 2016. Two other strong characters were also modeled after females. Discussion is also underway with the National Football League (NFL) about (a) how the DON executes training on sexual assault and domestic violence, and (b) how NFL athletes influence the behaviors of young Sailor and Marines, and of those we hope to recruit.

Sexual Assault Prevention Projects During FY16:

The Department of the Navy has accumulated over five years of experience in sexual assault prevention among Sailors in post-recruit vocational training at Training Support Command (TSC) Great Lakes, Illinois. We continue to assess outcomes since multiple

simultaneous initiatives were begun in February 2011 through a partnership of DON-SAPRO, senior Navy leaders, and local stakeholders. The most obvious change has been a sustained 59% decrease in the frequency of reports of penetrating sexual assaults (see Figure 1 below). In contrast, reports of non-penetrating offenses decreased similarly for about two years, but then progressively increased to levels now above their prior baseline – despite no recent change in their estimated true frequency from ongoing sexual assault surveys of departing TSC students. Taken together, these findings suggest two superimposed and positive effects – both (a) a rapid and sustained impact from prevention initiatives on the frequency of all forms of sexual assault, and (b) a more recent increase in the reporting of non-penetrating assaults as a result of extensive SAPR training about the spectrum of acts that constitute sexual assault in the first place.

Figure 1. Reports of Penetrating Sexual Assault (Including Restricted Reports) at Training Support Command, Great Lakes, by Month of Reported Occurrence

Our experience at TSC Great Lakes suggests that sexual assault prevention in a high-risk population of young people is possible but not easy. Key factors appear to include the need for multiple simultaneous specific efforts, and the engagement of leadership throughout the chain of command. Navy senior leaders have already begun applying these insights elsewhere.

As follow-on activities, this year, DON-SAPRO began preliminary work on two additional prevention demonstration projects in other settings. The first involves collaboration with 5th Fleet, regional leaders and local commanders at Naval Support Activity Bahrain, an overseas operational shore installation. The second involves collaboration with Fleet leaders and the local command staff aboard USS GEORGE WASHINGTON, a nuclear powered aircraft carrier.

FY16 Annual Report on Sexual Assault in the Military Executive Summary: Navy

Sexual assault is a significant threat to the United States Navy, adversely impacting readiness, morale, and retention. Navy takes this threat seriously and is fully committed to sexual assault prevention, victim support, and appropriate offender accountability with due process of law. Navy's Sexual Assault Prevention and Response (SAPR) Program reflects the absolute commitment that sexual assault and sexual harassment are not tolerated, condoned, or ignored. Navy remains committed to cultivating an environment of respect and mutual dignity for all, where victims are supported and feel safe to report crimes. Navy SAPR efforts are focused on the concept of a continuum of harm which includes a range of destructive actions and behaviors, including an emphasis on the prevention of hazing, sexual harassment, and alcohol abuse. Navy understands the criticality of creating a Fleet-wide culture intolerant of destructive actions and behaviors that lead to more serious or criminal behaviors.

Authorizing Regulations

- Secretary of the Navy Instruction (SECNAVINST) 1752.4B, "Sexual Assault Prevention and Response," 8AUG13; directs SAPR program establishment within Department of the Navy (DON)
- SECNAVINST 5430.108, "DON Sexual Assault Prevention and Response Office," 10JUN10; outlines mission and functions of the DON SAPR Office
- Chief of Naval Operations Instruction (OPNAVINST) 1752.1C, "Sexual Assault Prevention and Response Program," 13AUG15; issues Navy policies and standards
- Commander, Naval Installations Command Instruction (CNICINST) 1752.2A, "Monthly SAPR Validation Procedures," 15MAR13 implements changes in CNIC Enterprise SAPR procedures
- CNICINST 1752.3, "SAPR Installation Drill Procedures", 29SEP13; establishes standardized protocols for SAPR drills
- CNICINST1752.4, "Sexual Assault Case Management Group (CMG) Procedures," 8JAN15; provides standardized protocols for conducting Sexual Assault CMG meetings
- CNIC NOTICE 5420, Establishment of the Installation Commanding Officer as Permanent Chair in Sexual Case Management Group, 4 April 2016. Directs Installation Commanding Officers (CO) to serve as the permanent Chair for monthly Installation Sexual Assault Case Management Group (SACMG) meetings.
- Bureau of Medicine and Surgery Instruction (BUMEDINST) 6310.11A, "Sexual Assault Prevention and Response Medical-Forensic Program", provides guidance for timely, readily accessible quality care, and medical-forensic evaluation of the sexual assault victim
- Navy Leadership Messages:
 - All Navy (ALNAV) 021/16, "2016 Sexual Assault Awareness and Prevention Month (SAAPM)," 1 Apr 16
 - NAVADMIN 280/15, "Chart The Course (CTC)," 9 Dec 15
 - NAVADMIN 046/16, "Maternity and convalescent leave policy update," 25 Feb 16
 - NAVADMIN 166/16, "FY-17 General Military Training Schedule," 26 Jul 16
 - NAVADMIN 181/16, "2016 Workplace Gender Relations Survey of Active Duty

Military," 17 Aug 16

- NAVADMIN 203/16, "Guidance for transgender military service, message 1," 12 Sep 16

Organizational Structure

Navy SAPR Program leadership includes:

- Deputy Chief of Naval Operations (DCNO) for Manpower, Personnel, Training and Education (MPTE) serves as the Executive Agent, overseeing policy, program and initiatives.
- Office of Chief of Naval Operations (21st Century Sailor Office), as the CNO's SAPR Officer (SAPRO), directs the implementation of Navy-wide SAPR efforts to include promulgating policy for SAPR.
- Stakeholder Organizations:
 - Bureau of Medicine and Surgery (BUMED) provides oversight and policy to Navy Medicine personnel and medical care and support to victims.
 - Chaplains provide support and spiritual counseling.
 - Office of the Judge Advocate General (OJAG) provides legal instruction and guidance; judge advocates serve as judges, legal advisors, and trial, defense, and Victims' Legal Counsel (VLC).
 - Naval Criminal Investigative Service (NCIS) investigates all reports of sexual assault.
 - Naval Education and Training Command (NETC) develops and delivers education and training strategies.
 - Navy Chief of Information (CHINFO) develops and implements Navy's Communication Plan.
 - U.S. Fleet Forces (USFF); Commander, U.S. Naval Forces Europe-Africa (CNE-CNA); and U.S. Pacific Fleet (PACFLT) execute policy and support at the Fleet level.
 - Office of the Master Chief Petty Officer of the Navy (MCPON) provides enlisted and Fleet perspectives.

Other SAPR Personnel Involved

Navy's SAPR program afloat is consistent with and complementary to SAPR programs available ashore. Commanders, supervisors, and managers at all levels are responsible for the effective implementation of the SAPR program and policy. For purposes of this report, Commanders, Commanding Officers (CO), and Officers in Charge (OIC) will be referred to as Commanders.

- Victims are supported by trained and certified Unit SAPR Victim Advocates (UVAs) (a collateral duty), full-time SAPR VAs, and Installation Sexual Assault Response Coordinators (SARC) ashore. In Fiscal Year (FY) 16, ongoing assessment of SARC

and SAPR VA allocation resulted in further expansion to 103 SARCs from 94 SARCs. The number of full-time SAPR VAs remained steady (69 full-time SAPR VAs).

- Certified collateral duty UVAs and Deployed Resiliency Counselors (DRCs) (on aircraft carriers and large amphibious ships) deploy with commands and support victims afloat to enhance and complement the support available ashore.
- As licensed civilian counselors, DRCs work cooperatively with military and civilian medical, social service, law enforcement, chaplains, and legal personnel on behalf of sexual assault victims to provide them with critical support services during deployments. DRCs provide clinical, educational, and support services across a spectrum of care. In FY16, as a result of the success of the DRC program, the number of billets was increased to 40.
- VLCs work with victims through the investigation and military justice processes, advocate for the victim's rights and interests, and help victims obtain access to support resources.
- SAPR Officers are subject matter experts (SMEs) and advisors to higher echelon Commanders, providing guidance to increase responsibility, awareness, and authority over all aspects of their SAPR Program. There are over 35 SAPR Officers assigned across Navy to Fleet, Type, and System Commanders as well as all ten Navy geographic regions, ensuring that Flag-level leadership can easily take advantage of their expertise to ensure the SAPR Program is effectively and consistently executed Fleet-wide.

Summary of Progress Made and Principal Challenges

Navy continues to aggressively pursue prevention efforts, command climate improvements and expanded response capability with the ultimate goal of eliminating sexual assaults. Navy SAPR efforts and training are focused on the concept of a continuum of harm which includes a range of destructive actions and behaviors, and a renewed emphasis on the prevention of hazing, sexual harassment, and alcohol abuse. Navy remains committed to cultivating an environment of respect and mutual dignity, intolerant of sexual assault and sexual harassment, where victims are supported and feel safe to report crimes. Navy understands the criticality of creating a Fleet-wide culture intolerant of sexual assault, harassment and retaliation.

There is progress as a result of Navy's efforts. The number of sexual assault reports increased in 2016 from 2015. This increase was anticipated based on continuing efforts to educate Sailors on what constitutes a sexual assault especially for the 35k to 40k new Sailors who join the Navy every year, this includes raising awareness of sexual assault reporting avenues and support for those who report sexual assault.

Metrics from the Defense Equal Opportunity Management Institute Organizational (DEOMI) Climate Survey (DEOCS) indicate Sailors view their commands' climates

positively in regards to intolerance of sexist behaviors, and support for the SAPR program. Navy will continue to pursue and expand prevention efforts, setting the conditions for a command climate that does not condone, tolerate, or ignore sexual assault, while further expanding and maturing response capability.

While results show trust in command leadership, challenges still remain. Navy recognizes the need to provide more focus on male victim reporting and will continue to work to remove barriers to reporting and improve male-specific support. Navy will also focus on better understanding and eliminating retaliation, reprisal, ostracism, and/or maltreatment towards victims, care providers, first responders, and those who intervene in sexual assault.

Navy will continue to refine our ability to analyze data and adjust programs at all levels in order to implement policies and procedures to improve SAPR effectiveness. Two key initiatives for FY17 include:

- The Bahrain Prevention Project is an initiative driven by local commanders, with the support of DON SAPRO and OPNAV N17 to reduce destructive personnel incidents, including sexual assault, through targeted prevention methodologies. The project, projected to be implemented in FY17, will also focus on improving reporting and will measure new data to compare/correlate with the base line data. Best practices, lessons learned, and a model for implementation will be exported to other installations.
- Navy SAPR has also contracted the Center for Naval Analysis to examine the relationship between sexual assaults that occur within a command and all other destructive behaviors. This holistic approach of the study is aimed at identifying underlying conditions that exist which allow sexual assaults to occur.

1. Line of Effort (LOE) 1—Prevention—The objective of prevention is to “deliver consistent and effective prevention methods and programs.” Based on the 2014-2016 DoD Sexual Assault Prevention Strategy, implementation of prevention efforts across DoD should be spread across a collection of 10 program elements. To aid in assessing DoD-wide progress in operationalizing the Prevention Strategy, please provide responses connected back to these program elements.

1.1 Summarize your efforts to achieve the Prevention Endstate: “cultural imperatives of mutual respect and trust, professional values, and team commitment are reinforced to create an environment where sexual assault is not tolerated, condoned, or ignored.” Where appropriate, be specific in the types of measures your program uses, the number of Service members impacted and the approved way ahead for achieving the prevention endstate. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 2)

Sexual assault is a crime that harms Sailors, damages unit cohesion and trust, and stands contrary to Navy Core Values. Navy endeavors to create an environment in which Sailors do not tolerate, condone, or ignore sexual assault or other inappropriate behaviors. Understanding the realities of sexual assault and the conditions under which it occurs is a

requirement to advance prevention strategies. Navy aims to reinforce cultural imperatives of mutual respect, trust, and dignity. Navy's prevention strategy is designed to foster a culture and environment in accordance with Navy Core Values of honor, courage, and commitment.

Navy's prevention-based practices focus on institutional, command, peer, and individual actions and accountability. The overarching imperative throughout the chain of command is to establish organizational behavior expectations that are clearly communicated and consistently maintained. Navy's prevention efforts highlight key elements that support stopping sexual assaults before they occur:

- Cultural change. Navy's strategy for attaining cultural and behavioral changes is aimed at education and prevention strategies that will reduce incidents of sexual assault and increase trust among members at all levels in the Navy organization and its leaders. By taking conscious steps to understand, identify, and reduce environmental risks and high-risk behaviors, commanders can demonstrate that there is no tolerance for behaviors along the continuum of harm.
- Deliberate and engaged leaders. Leaders at all levels are personally engaged in preventing sexual assault before it occurs and holding those who commit such acts appropriately accountable.
- Education and awareness. Navy's SAPR program provides a broad spectrum of training to identify and address risks, support healthy boundaries and relationships, and challenge myths regarding sexual assault.
- Presence and intervention. Intervention training is focused on all Sailors and requires anyone who may see, hear, or otherwise recognize signs of an inappropriate or unsafe situation, to be leaders and to act. Intervention training provided Sailors with the knowledge and skills to intervene safely when necessary by challenging mental/social models and assumptions, while building a culture of respect, accountability, and professionalism.
- Partnerships across SAPR organizations. Navy continues to collaborate with SAPR stakeholders to share information to inform and drive policy, training, and resourcing.

Navy prevention initiatives continue to be implemented across the force:

- "Chart the Course" (CTC) training was introduced to Navy and emphasized positive professional behavior and decision-making. Scenario-based videos and facilitator-led discussions helped Sailors determine how to make the right decisions, understand consequences and behave professionally when facing difficult situations. Facilitated discussions among peer groups covered a spectrum of behaviors and emphasized the importance of leaders at every level to "step up, and step in."

- DON SAPRO hosted PurePraxis training events. PurePraxis is an interactive training done through theater-style performances. The training focuses on providing Sailors with the skills necessary to react and cope with difficult life situations. The FY16 training allowed audiences to practice positive, creative, and safe solutions to retaliatory acts (reprisal, ostracism, and maltreatment) against victims who made a report of sexual assault. The training also addressed the prevention of destructive behaviors, how to apply intervention strategies, and reinforced empathy, dignity, and respect to victims.
- To increase transparency and serve as a deterrent to other potential offenders, Navy continued to publish courts-martial results, including appellate briefs, online, for the public and in monthly press releases. The VLC Program, Office of the Judge Advocate General's (OJAG's) Criminal Law Division, and the Navy-Marine Corps Court of Criminal Appeals (NMCCA) coordinated to ensure that document release was compliance with Freedom of Information Act (FOIA), Privacy Act, and NMCCA Rules of Practice and Procedure.
- Commander, Naval Installations Command (CNIC) Headquarters (HQ) SAPR supported efforts during Sexual Assault Awareness and Prevention Month (SAAPM) by providing the SARCs with an updated SAAPM Toolkit, which included additional event and marketing ideas, best practices, and an updated poster design featuring the 2016 DoD SAAPM theme, "Eliminate Sexual Assault: Know your part. Do your part."
- Commander Naval Forces Europe/Africa (CNE/CNA) established a bi-weekly meeting of the Region Commander (REGCOM) and the Commanding Officers of each installation to discuss trends in destructive behaviors and the way ahead in prevention of sexual assaults. The REGCOM utilized a scoring system to ensure that each installation was complying with bi-annual SAPR Installation drills and exercises (see sections 4.1 and 5.1), results of which highlighted program strengths and weaknesses. The outcome provided areas on which to focus corrective actions to ensure prevention efforts are synchronized and working effectively.
- United States Fleet Forces Command (USFFC), in an effort to set the appropriate conditions to drive lasting culture change in the micro-climates where Sailors live and operate, identified the junior leaders who lead the micro-climates as the center of gravity for their campaign. Their multi-faceted program requires each command to engage on destructive behaviors in a stand-down event four times per year. Commands were provided turnkey programs for the first three stand-downs to ensure common messaging:
 - Interactive video and scenario based training (such as CTC) using certified trainers who administer this training to each command.
 - Fleet-provided workshop designed to counter destructive behaviors in each Fleet concentration area, one or two times per year. Each workshop is

- designed to share best practices, bring in unique perspectives, and provide unfiltered messaging from senior leadership to the deckplates.
- DON SAPRO hosted PurePraxis training events which are completed in each Fleet Concentration area. Nearly 50% of USFFC Sailors attended a PurePraxis training event this past year.
 - Lastly, each command is expected to host their own stand-down tailored to their demographics and their unique operating environment. 98% of Fleet Commands report accomplishment of more than one event this past year, some hosting unique events monthly. These tailored and innovative events are shared monthly via First Flag Reports to the first Admiral in the chain of command.
- Commands also integrated efforts to counter destructive behaviors by incorporating initiatives such as: Afloat Cultural Workshops designed to understand barriers to reporting, and periodic micro-climate assessments conducted during Division in the Spotlight and Zone Inspection programs. Each command is also integrating training to counter destructive behaviors into command indoctrination training, petty officer indoctrination training, Chief Petty Officer 365 training, and officer training.
 - Commander, United States Pacific Fleet (CPF) initiated a “Change the Culture” approach to overcoming sexual assault and other destructive behaviors (sexual assault, domestic violence, drug and alcohol abuse, and suicidal behaviors). The campaign, conducted through the four to six Resilient Workforce Summits conducted each year at PACFLT Fleet concentration areas (San Diego, Japan, Pacific Northwest, and Hawaii), emphasizes positive behaviors, and harm reduction through intrusive and detailed training to command triads, Officers and Chiefs, SAPR VAs, SAPR Points of Contact (POCs), SARCs and Ombudsmen. This two-day training demonstrates “signature behaviors” that focus on the Sailors who are “doing it right,” as well as a panel discussion by experts in each destructive behavior. CPF’s SAPR Officer and Office of the Chief of Naval Operations (OPNAV) Director of Sexual Harassment conduct specialized training focusing on the continuum of harm and ways to exit the continuum and operate in a culture of mutual respect and dignity. Additional command-level efforts include:
 - USS JOHN C. STENNIS used a multi-faceted training approach to improving responsible decision making skills, leveraging a wide variety of tools such as, open Mast, small group training, safety stand down, civilian presenters from Kitsap County Sexual Assault Center, and talking openly about sexual assault through deck plate leadership.
 - Commander, Naval Expeditionary Forces, Pacific (NECCPAC) discusses intervention, personal behavior, and accountability, the de-glamorization of alcohol and retaliation during staff meetings and All Hands Calls prior to every long weekend and holiday stand-down. NECCPAC has a strong relationship with the Regional SARCs, VLC, and SAPR VAs providing continuous education on the SAPR program and victim care/support to all members. During the month of April, for SAAPM, NECCPAC hosted a

morning round table titled “A Cup of Prevention” with the Regional SARC (RSARC)/SARC, VLC, and CPF Deputy Chaplain to answer questions about sexual assaults and discuss their roles as they pertain to sexual assault.

- Commander, Naval Forces Japan (CNFJ) prevention efforts include a continuous, All Hands-focused media and awareness campaign through various outlets, including the Armed Forces Network radio and television spots, installation web pages, posters, Facebook, Base Commander’s Channel, Plans of the Week, Area Orientation Briefs/Intercultural Relations, and base marquee announcements.
- The Commander Navy Reserve Forces (CNRF) SAPR Officer provided tailored SAPR training for Reserve Component Commanders (RCC) and prospective Navy Operational Support Centers (NOSC) Commanding Officers. In addition, CNRF communicated SAPR awareness via “TNR” (The Navy Reservist) magazine, mailed to each Selected Reserve and all Reserve commands quarterly. The TNR magazine was utilized for strategic messaging, including breaking the cycle of destructive behavior and communicating the requirement to create and maintain a culture where sexual assault is not tolerated.

1.2 Communications and Engagement: Update your progress in aligning prevention communications and training based on the type of message, messenger, and delivery methodology to specific demographic audiences across your Military Service (e.g., basic training, first-term, mid-level, and senior leader). (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Communications), p. 11)

Navy continues to make advances in aligning prevention-oriented communications, and awareness based on the specific demographic audiences across the Fleet.

- Senior Fleet leadership meets quarterly to review sexual assault data, ensure alignment of messaging, and to develop strategies to best engage on the waterfront as leadership considers the challenge of engaging a globally distributed force with 40% deployed at any given time.
- OJAG’s Criminal Law Division continues to provide trainings and materials tailored to specific demographics. For example, the Criminal Law Division co-sponsors an annual Sexual Assault Policy for Staff Judge Advocates course. This multi-disciplinary course provides military justice and sexual assault policy updates for Staff Judge Advocates, as well as overviews of other SAPR-related roles and organizations, such as NCIS, SARCs, and VLC. The course trains Staff Judge Advocates on appropriate responses to allegations of sexual assault within a command at all stages of the case, and ultimately focuses on increasing collaboration within the military justice system to better support response to sexual assault allegations. OJAG’s Criminal Law Division also participated in a cross-functional training symposium on victims’ rights that included VLC, Disability Evaluation Attorneys, Legal Assistance Attorneys, trial counsel, and Staff Judge

Advocates. The Criminal Law Division provides tailored training to various providers within the SAPR program, such as a course geared towards senior Staff Judge Advocates, and a course for SARCs.

- The 2016 Chaplain Corps Professional Development Training Conference trained all chaplains on the role of chaplaincy in cultivating ethical leaders, analyzing advisement to the command on moral and ethical issues, and identifying best practices and models for the development of ethical leaders. Included in the training were aspects of the Religious Ministry Teams' work with sexual assault victims and perpetrators.
- CNIC HQ SAPR provided an expanded social media section of the 2016 SAAPM Toolkit, which included best practices on creating public service announcements, guidance for effectively managing social media, and sample social media content, including content with a primary prevention focus. For SAAPM, in coordination with CNIC Public Affairs Office, CNIC also conceptualized and released a CNIC HQ leadership video message highlighting the critical role everyone plays in preventing sexual assault before it occurs, including the strong leadership by Installation Commanding Officers and SARCs. Navy Regions have identified the following promising practices:
 - Commander, Navy Region Europe, Africa, Southwest Asia (CNREURAFSWA) – Naval Support Activity (NSA) Bahrain has various prevention programs, including U.S. Naval Forces Central Command (NAVCENT) provided safety information to every ship prior to a port visit and to all transient personnel. Additionally, the SAPR POC briefs all temporary duty, transient and visiting personnel on safety issues and disseminates Bahrain Safe Cards.
 - Commander, Navy Region Korea (CNRK) - Conducts "Meet and Greet" with visiting ships, all-hands meetings, safety briefings and stand-down briefs. On Tuesdays' Command Quarters, training is led by senior enlisted leaders emphasizing behavior issues throughout the chain of command. Feedback and best practices from these events are tracked and monitored by SAPRO and RSARC and incorporated into subsequent trainings.
 - Commander Navy Region Northwest (CNRNW) - Participates in the quarterly Navy Drug and Alcohol Advisory Council forum that provides safety information and updates to Drug and Alcohol Program Advisor (DAPA) personnel assigned to each command, and includes Chaplain Religious Enrichment Development Operation (CREDO), NCIS, JAG, Morale Welfare and Recreation (MWR), and civilian law enforcement. SAPR metrics are briefed at the meeting to educate participants on the affect alcohol has on incidents and reporting.
- USFFC training focuses on four cohort groups: command leadership teams; front line supervisors; junior Sailors; and destructive behavior program managers. Training materials fielded to the Fleet have been tailored specifically for these

groups.

- Command leadership teams ensure their command climates and the micro-climates within their commands are aligned to Navy Core Values. Within these groups best practices are shared, discussions on strategies to integrate messaging on all destructive behaviors are conducted, and problem solving opportunities that are presented during normal deployment cycles can be creatively used to deepen an understanding on destructive behaviors on the deck plates.
 - Front line supervisor workshops stress the role that immediate supervisors have to ensure their micro-climate is the key to preventing sexual assault in an environment where Sailors respect both themselves and others.
 - Junior Sailors are addressed with creative education/entertainment events that approach destructive behaviors from unique and modern perspectives using a variety of keynote and motivational speakers.
 - Guidance and policy updates are provided to destructive behavior program managers as well as a sharing of strategies to ensure full integration of programs within a command, including how to overcome difficult situations.
- CPF SAPR training included a more concentrated focus on intervention strategies in a variety of scenarios. SAPR Standardized Core Training (SCT) training received positive feedback for clearer presentation of reporting options and services available for each. The definition and importance of consent was another major focus and discussion point across the region, both in command-level training and as part of the PACFLT Resilient Workforce Summit.
 - Standard practice at commands before weekends and holidays, and during Command Indoctrination, is for Leading Petty Officers (LPOs), Chief Petty Officers (CPOs), and/or Division Officers to talk to Sailors about sexual assault and appropriate behaviors while on liberty.
 - Junior Sailors continue to receive interactive training and coping skills by attending PurePraxis performances.
 - In many commands, the SAPR team conducts training during duty section muster to discuss reporting procedures and resources available in the local area.
 - NECCPAC SAPRO requires each Echelon IV SAPR POC to submit a monthly SAPR tracker that is reviewed by the cognizant Staff Judge Advocate. This tracker provides a Situation Report (SITREP) roll-up and snap-shot of the case disposition that is used for trend analysis across the CPF Force. SAPRO maintains a quarterly and fiscal year trend analysis that is discussed by the Commander at Echelon IV Video Tele-Conferences (VTC) and the annual Commander's conference. Staff Duty Officers (SDO) review SAPR program and reporting procedures during their quarterly training.
 - USS THEODORE ROOSEVELT's Commanding Officer emphasizes deck plate leadership on sexual assault prevention and encourages Sailors to

“keep what they’ve earned” and to respect and protect shipmates. The Commanding Officer also addresses all hands regarding the way alcohol can change a normally trustworthy person’s life and career as well as the impact their actions can have on other shipmates and /or innocent bystanders. All Sailors are encouraged to call their Chain of Command if they are in need of assistance.

- In addition to communicating SAPR campaign plan fundamentals at the Regional Component Commanders Conference, the CNRF SAPR Officer presented a comparison of the results of the 2014 RAND Military Workplace Study to the 2015 Workforce and Gender Relations Survey for Reserve Duty Military Personnel and included a session featuring DON SAPRO videos. At the NOSC Commanding Officer course, the Force SAPR Officer taught techniques to develop a command climate that embraces mutual respect and dignity, enforces rejection of gender bias, and addresses challenges in reporting confidence and mechanisms to overcome these challenges.
- BUMED ensures medical forensic training is disseminated to Sexual Assault Medical Forensic Examiners (SAMFE). Training contains case study reviews, non-identifiable photographs of victims, medico-legal documentation, and interview techniques.

1.3 Communications and Engagement: Update your efforts to share and foster practices across all prevention stakeholders (suicide prevention, sexual assault prevention, alcohol reduction, etc.). Detail any effort to incorporate shared messaging (e.g., bystander intervention efforts supporting suicide and sexual assault prevention). (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 4, #5, p. 7)

In June 2013, the 21st Century Sailor Office was established to ensure that every Sailor’s total fitness needs – including physical, mental, social, and spiritual – are met so they can better navigate the challenges faced during their military service. Working on improving a Sailor’s resilience ensures their combat readiness and effectiveness. OPNAV N17 (Navy Flag Officer, Director of 21st Century Sailor Office/Navy SAPRO) oversees an organization that establishes policy and provides oversight for Navy’s drug and alcohol prevention program, family advocacy program, suicide prevention, operational stress control, sexual harassment prevention, equal opportunity, hazing and bullying prevention as well as sexual assault prevention. This organizational construct allows for coordination and collaboration among major stakeholders across all prevention-related issues, strategies, and initiatives, and is critical in bringing program challenges to the forefront as well as providing multi-dimensional resolution for the Total Force. Additional stakeholder initiatives include:

- In April 2016, CNIC HQ SAPR hosted a webinar for SARCs and SAPR VAs led by the Indiana Coalition Against Domestic Violence (ICADV), to present ICADV’s new resource, the Prevention Toybox. The Prevention Toybox introduces key

prevention and collaboration concepts employing multiple learning methods to explore topics such as planning effective prevention initiatives, identifying opportunities for collaboration by exploring shared risk and protective factors, and evaluating prevention programs. CNIC encouraged webinar participants to utilize the Prevention Toybox in order to engage both military and civilian partners in prevention work.

- Utilizing a CNIC-developed curriculum, SARCs provide ongoing training to Unaccompanied Housing Residential Advisors (RAs). Engaging RAs in understanding the dynamics of sexual assault and their role in both prevention and response better ensures that they can more effectively identify and intervene in destructive behaviors in Unaccompanied Housing, as well as support victims when sexual assault does occur.
- Naval Air Station (NAS) Whidbey Island created a new initiative in which SAPR VAs conduct command walk-throughs. The SAPR VA arranges to meet with the Unit SAPR POC just prior to the walk-through, effectively making the event unannounced, and enabling the SAPR team to inspect spaces for program advertising, engage Sailors at the deck plate level, and interact with command leadership. This has resulted in a more cohesive working relationship between individual Sailors, tenant commands, and the SAPR team. It also provided a relaxed atmosphere to discuss topics such as alcohol's relation to sexual assault, sexual harassment vs. sexual assault, sexual assault reporting options, and services offered through Fleet and Family Support Center (FFSC) (SAPR, clinical support, transition information, etc.).
- NAS Corpus Christi has a Joint Service SAPR Team that works closely with the Army's Employee Assistance Program and Alcohol Prevention Specialization to provide joint trainings for not only SAPR but also alcohol and drug abuse prevention. Additionally, the SARC works with the Command Managed Equal Opportunity (CMEO) Officer to show the continuum of harm from sexual harassment to sexual assault. SAPR VAs have been trained in "Safe TALK" to enhance sailor intervention with destructive behaviors.
- USFFC encourages commands to discuss destructive behaviors regularly using daily morning quarters, command all hands calls, and other standing opportunities that are integrated into the life cycle of a command. Each command has a regular assessment cycle that involves reviewing micro-climates (divisions and work centers) individually, in addition to periodic command climate surveys. Commands are encouraged to conduct an Afloat Cultural Workshop in addition to normal command climate surveys. These workshops analyze micro-climates and barriers to reporting that are identical to the Navy's destructive behavior programs. Commands are required to conduct two safety stand downs in conjunction with winter holidays and summer holidays – these events provide a perfect venue to address destructive behaviors.

- Commander Strike Fighter Wing Pacific (CSFWP) holds monthly safety meetings with civilian and military staff to discuss Civilian Employee Assistance Program opportunities and the military counterparts that provide additional support in reference to the civilian program. It also details military managed programs that civilian employees may be qualified to use, to include SAPR, CMEQ, and DAPA. Commands maintain open communication with NAS Lemoore SARCs and SAPR VAs on program updates, products, refresher training, recertification training for SAPR POCs.
- In 2016, CNRF organized a permanent Resiliency Team, chaired by the Force Chief of Staff and composed of subject matter experts from all areas of destructive behavior prevention as well as religious services and medical representatives. The team is directed to identify parallels and common challenges throughout all destructive behaviors and to develop and implement mechanisms to counter these challenges at the Force level.

1.4 Peer-to-Peer Mentorship and Support: Describe efforts to support peer-to-peer programs for junior service members that promote healthy relationships focused at the battalion/squadron/or Military Service equivalent levels. Provide, where appropriate, metrics used to assess efforts and intended outcomes of the efforts. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Peer-to-Peer Mentorship), p. 10)

Many Navy regions, installations, and commands report peer-to-peer sponsorship and mentoring programs that mentor junior Sailors in professional development, mission readiness, and positive communication that enhances teamwork among peers, and promoting events that exclude alcohol. They work to influence junior personnel to seek healthier alternatives in socializing and taking advantage of MWR opportunities.

- The Navy's focus this year has been on showing "what right looks like" in an effort to drive lasting and meaningful culture change on the deck plates. Rather than providing additional resources to demonstrate what a destructive situation looks like, training tools are maturing to show Sailors proper and professional behaviors to emulate. Navy-wide training CTC focused on shaping a climate based on Navy Core Values and Navy Ethos. Each command conducted training in small groups of 30 or less, hosted by a certified peer/near-peer facilitator. Those groups were organized by rank to encourage active participation as well as break down standing micro-climates within a command.
- At Commander Navy Region Southwest (CNRSW), schoolhouse student mentor programs permit mentors to serve as role models and share their knowledge and experience, help mentees improve communication and leadership skills, assist junior students in navigating training challenges, aid others in setting healthy boundaries that lead to the development of positive relationships, the importance of valuing diversity, and how to achieve professional success. In a joint Service school environment, the Navy, Army, and Air Force school councils host quarterly SAPR

events to increase awareness and encourage consistent intervention.

- Navy Support Facility (NSF) Deveselu, Romania has established a “buddy system” when on liberty off base. This system helps ensure that Sailors get home safely and unharmed. The environment off installation, though not hostile to American Service members, can present problems with local nationals, especially when involving off-base drinking establishments. The use of the “buddy system” provides peer-to-peer mentorship and assistance that helps to promote healthy relationships.
- CNE/CNA supports installation directed policies and procedures that focus on addressing and preventing high-risk behaviors and situations targeted by offenders. Throughout the entire area of responsibility, command leadership has researched and implemented ways to deglamorize and decrease the use of alcohol on off hours, weekends, liberty, and in holiday time frames. These include increasing on-base non-alcohol activities for single sailors, establishing off-limit areas in foreign ports, re-instating the “liberty buddy” policy, and informing the chain of command on the “targeting” of certain demographics of individuals in order to raise awareness.
- Feedback from Sailors Navy-wide has been overwhelmingly positive in the wake of CTC training. There have been many anecdotal reports of positive prevention efforts that unfolded in some commands after the training was conducted. Additionally, some units reported an increase in unrestricted reporting of assaults and sexual harassment complaints in the wake of this training.
- Carrier Air Wing 9 requires all Sailors who check in to select a primary and secondary mentor within the first 90 days of reporting in to the command. The mentor is recommended to be in a different rating/department from the protégé, and both protégé and mentor are required to complete and submit mentorship agreement forms to the program coordinator. Mentors provide sponsorship, familiarize the newly reported member with the chain of command, applicable POCs, and command policies and programs. Mentors focus on the following topics: Intervention; Sexual Assault Prevention; Domestic Violence; Re-victimization; Harassment, Awareness and Empathy; Sexism; and Diversity.
- In 2016, CNRF organized a permanent Resiliency Team, chaired by the Force Chief of Staff and composed of subject matter experts from all areas of destructive behavior prevention as well as religious services and medical representatives. The team is directed to identify parallels and common challenges throughout all destructive behaviors and to develop and implement mechanisms to counter these challenges at the Force level.
- RTC delivers SAPR training, which delineates appropriate/healthy relationships, to both staff and recruits both at multiple times throughout the year or during recruit training time. The goal of these events is to identify existing issues on a peer-to-peer level and deter future potential incidents throughout all phases of recruit

training.

- At Navy Reserve Officer Training Corps (NROTC) units, instructors are involved with their host universities' prevention and peer-awareness campus groups. Units utilize peer-to-peer training to allow other trained university students attendance in their NROTC lab periods to brief on issues of alcohol use, sexual harassment and assault, prevention, and healthy relationships in college. Additionally, "Above Board" training being developed for midshipmen shows realistic scenarios of a college student in NROTC and how she and her peers discuss diverse issues and act toward preventing and/or reporting them.

1.5 Leadership Involvement: Update improvements to local Military Service SAPR programs (on both prevention and response) based on the feedback to local commanders from command climate assessments. (DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 5, para 9f)

Leadership involvement at all levels is the key to a successful sexual assault prevention strategy. This includes establishing a climate of safety and trust where individuals feel comfortable reporting incidents of sexual assaults. Results from the DEOCS have consistently shown that members are aware of sexual assault programs, including where they can find additional resources. The surveys show that while Sailors might not want to come forward to report an incident of sexual assault due to internal factors (e.g., embarrassment or shame), they are confident that they would obtain the support they needed and that the command would pursue action, when necessary. Other command surveys indicated that junior Sailors are not clear on reporting and the differences in reporting. Additionally, senior Sailors appear to be unclear on the role of the SAPR POCs. As a result annual SCT, command communications, and SARC and SAPROs have emphasized the types of reports victims can make and who can take them. Additionally a forthcoming revision to OPNAVINST 1752.1C in 2017 will clarify the role and responsibilities of the command SAPR POC.

- To assist in evaluating the success of prevention efforts at the command level, OPNAVINST 1752.1C allowed SARCs to be involved in command climate assessments. The SARCs' involvement promotes the commands ability to continually focus on sustaining a positive, healthy command climate and enforcing Navy standards. Commands are generally assessed to have positive reporting climates, but can improve members' understanding of who to contact within the command depending on specific type of report elected. Commands are actively engaged in ways to protect the privacy of members involved in sexual assault cases, thereby minimizing the risk of retaliation.
- At Commander Joint Region Marianas (CJRM), the DEOCS survey revealed several weak areas of SAPR knowledge, specifically amongst the civilian employees. There was a noticeable percentage of civilians who did not understand the reporting procedures and the methods of care available to them. Due to this discovery, subsequent training events have been specifically shaped to include

these topics to improve awareness.

- At CNRNW, the SAPR team reviews the DEOCS survey and tailors a 60-90 minute training based on a SAPR-focused and command-developed agenda, to address the needs of the command. The training is conversation-based, centering around real case studies that address a sexual assault case from incident to adjudication.
- It was recognized through command climate assessment feedback that there was a deficiency in SARC understanding of care options for Reservists. CNRF SAPRO, CNIC, and CNRF collaborated on developing, implementing and conducting training with SARCs to create Reserve SMEs for consultation on all reserve matters.
- USFFC command climate data indicates high confidence in command leadership by junior Sailors. Sailors feel safe in their command and believe that their senior leadership will support them should something happen in the destructive behavior category. Leaders are engaged on the deckplates regarding destructive behaviors across the Fleet. Most commanding officers are personally engaged at check-in and check-out points for Sailors reporting to and leaving their command. They are personally engaged in regular periodic training, personally kicking off most training opportunities like CTC, SCT, and Command Safety Stand downs. Each functional Type Commander hosts annual and semi-annual commanders' conferences to bring command leadership teams together to ensure alignment of efforts on the deckplates. Fleet workshops provide another opportunity for messaging and leadership involvement in each Fleet concentration area. These collective efforts provide for a layering of effects to prevent destructive behaviors.
- Submarine Forces Pacific (SUBPAC) Force Command Climate Specialist monitors and engages with subordinate commands to ensure DEOCS surveys are conducted every fiscal year. Subordinate commands conduct an immediate superior in command (ISIC) debrief, and provide an executive summary of the findings and plans of action. The executive summaries are examined to assess a command's climate in regards to sexual assaults and other continuum of harm risks. SUBPAC has increased oversight in ensuring climate surveys are conducted within a timely manner and foster an active partnership with the Submarine Cultural Workshop Program which focuses on communications, integrity, and trust throughout the command as a means to identify at risk behaviors that may have become cultural norms.

1.6 Deterrence: Update your progress in developing and/or enhancing sexual assault deterrence measures and/or messaging and outline how they are provided to Service members at the installation (or Service equivalent) level (i.e., Crime Reduction Program, MCIO Outreach Initiatives, etc.). Provide summary of Service member feedback or metrics to demonstrate progress. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Deterrence), p. 11)

Navy continued to highlight the importance of preventing sexual assault and worked to deliver the message of respect, trust, professionalism, teamwork and a culture free of sexual assault. CTC training reinforced concepts first taught in "A" school, further emphasizing "what right looks like" as well as the need for intervention in and prevention of destructive behavior by using facilitated discussions to engage all Sailors in educational, face-to-face conversations about many topics to include alcohol, drugs, fraternization, hazing, sexual harassment, and sexual assault. Sexual assault deterrence measures were also addressed in CTC, recurring student training, and annual SAPR SCT requirements.

The OJAG Criminal Law Division worked with OPNAV N172 on the annual SAPR SCT released in April 2016. Additionally, organizations essential to the accountability line of effort (such as NCIS and Legal) are present at Area Orientation Briefs to describe the outcome of various crimes including sexual assaults.

In addition to completing all required prevention training/initiatives, commands are delivering training led by a variety of presenters to include NCIS, local SARCs, and VLC. Although the primary method of developing and enhancing sexual assault deterrence measures is training, a variety of deterrence measures are in place across the Navy. Key among these programs is:

- Roving barracks patrols, established with the goal to increase the visible presence of leadership to deter behavior that may lead to sexual assault or other misconduct. Roving patrols are led by experienced officers (O-3 or above) or chief petty officers (E-7 to E-9 personnel) and augmented with E-6 personnel. CNIC is gathering feedback from roving patrol participants, RAs, and housing staff to evaluate the effectiveness and impact of these patrols. This information will be utilized to further refine deterrence measures across the Navy enterprise.
- The Navy's sexual assault trial results from 2013 through September 2016 have been posted on the Navy Judge Advocate General's website. Additionally, results of non-judicial punishment hearings and courts-martial, local and Navy-wide, are frequently published in command Plans of the Week/Plans of the Day. The Navy Judge Advocate General's Public Affairs Office also distributes a press release detailing courts-martial results on a monthly basis.
- USFFC SAPROs are currently dedicated to unpacking the micro-climates within a larger command climate. Examples of micro-climates are workcenters, divisions, departments, watch teams, duty sections, detachments, squads, and platoons. The micro-climates are the locations where precursor behaviors can be observed and stopped that could lead to sexual assaults. Some examples of precursor behaviors are bullying, hazing, initiation rituals, gender discrimination, sexual harassment, alcohol abuse, sexual jokes, and sexual innuendo. By disrupting these behaviors and creating micro-climates where Sailors respect themselves and each other, more serious destructive behaviors can be prevented. Work on ensuring positive micro-climates can also deter social ostracism by peer groups when a Sailor

reports destructive behaviors as well as potentially deter reprisals from immediate supervisors when they receive a report of or learn of destructive behavior reports. Finally, the publication of disciplinary action resultant from the prosecution of cases provides a secondary deterrent effect that reinforces the positive micro-climate we are seeking to establish in every command.

- Commander, Navy Surface Forces Pacific (CNSP) Chief of Staff sends out monthly Type Commander (TYCOM) updates, which highlight punishments awarded, and CNSP Public Affairs Office sends out daily e-mails with links to the latest CHINFO Clips.
- Shore patrols, which provide a visible deterrent, are present outside the continental United States (OCONUS) throughout frequented local area bars, restaurants, hotels, and internet cafes that are popular among Sailors, dependents, civilians, and local nationals.
- Commanders utilize social media, public service announcements (PSAs), and monthly newsletters at the unit level to educate personnel on the impact of sexual assault and prevention strategies. Training focuses on ensuring that Sailors are observant and ask questions or appropriately intervene in questionable or out of the ordinary situations.
- Navy Reserve Forces Command encourages Reserve Commands at all levels to establish and maintain constant communication with Military Criminal Investigative Organizations and local law enforcement agencies to receive common practices and emerging trends in their geographic area. For example, NCIS became aware of “sextortion” schemes targeting service members. CNRF was able to provide information on the schemes, along with preventative trainings and other tools to subordinate commands to bolster deterrence.
- Navy Service Training Command (NSTC) has instituted several deterrence and security measures at both Officer Training Command (OTC) and Recruit Training Command (RTC) that incorporate the use of technology, training, and community awareness to increase safety and prevention. Staff personnel serve as roving watch-standers, employed during the day and night, to ensure security is maintained across all facilities. Students are taught not to be behind closed doors with anyone other than their roommate at any time. Staff members are trained on how to assess a student’s actions, personality, and demeanor to determine if there is a potential risk, or if an incident has potentially occurred. All NJP results are published in the RTC Plan of the Week. Additionally, RTC continues to utilize a robust training developed specifically for RTC by DON SAPRO. This training is provided to all service members at RTC and is continuously reinforced by leadership.

1.7 Community Involvement: Describe your efforts to engage with military community leaders and organizations (e.g., Family Advocacy Programs, ROTC

Programs, Chaplains, Healthcare providers, and Single Soldier Programs) to develop collaborative internal Military Service programs. Describe how you addressed challenges. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Community Involvement), p. 11 / SecDef Memo (1 May 14), *Develop Collaborative Forum for Sexual Assault Methods*, p. 2)

The success of Navy's SAPR program is due in large part to the close and collaborative partnerships developed and maintained by a wide variety of military organizations and stakeholders. Regularly scheduled, as well as ad hoc, meetings of cross-functional teams (CFT), roundtables and multi-disciplinary working groups, routinely address the prevention of and response to destructive behaviors including retaliation, bullying and hazing, and fraternization.

- The OJAG Criminal Law Division routinely coordinates with other military organizations in developing and providing training and policy in a variety of programs. OJAG has strong working relationships with many military organizations including the Family Advocacy Program, CNIC, NCIS, 21st Century Sailor Office, DON SAPRO, and Office of the Secretary of Defense's (OSD's) SAPR Office (SAPRO).
- OJAG's Criminal Law Division participates in the Navy SAPR Cross-Functional Team, which is comprised of SAPR stakeholders representing all LOEs. The Cross-Functional Team discusses prevention initiatives, response and support, training, and policy legislation. The SAPR Cross-Functional Team meets monthly to provide updates, synchronize actions, discuss best practices and concerns in the SAPR field, and ensure standardization of messaging.
- CNIC HQ SAPR continued to work closely with CNRF and NSTC to provide seamless SAPR support for NOSC's and NROTC units. CNIC worked with CNRF to identify Navy regional SAPR POCs to develop subject matter expertise in implementation of the Navy Reserve SAPR Program as well as for answering SAPR-related questions and providing guidance at the regional and installation level.
- Naval Region Hawaii (CNRH) SAPR staff collaborate regularly with VLC, Military Treatment Facility (MTF) personnel, NCIS, security, Chaplain, Mental Health, Military and FFSC clinical staff, legal, and command leadership to provide coordinated victim response/support and ensure effective program and delivery of services. Collaboration with NCIS and other law enforcement ensures each member of the Special Victim Investigation and Prosecution (SVIP) Team are notified of all unrestricted reports of sexual assault and coordinate/support cross-training, whenever applicable, for team personnel.
- Commander Navy Region Mid-Atlantic (CNRMA) was selected as a pilot installation for the "Hope and Healing Retreat for Sexual Assault Survivors" program. This effort was initially proposed through a partnership between DON SAPRO and

Office of the Chief of Navy Chaplains. FFSC clinical and SAPR Programs collaborated with CREDO to develop the curriculum and follow-up group sessions topics. The program consists of a three-day CREDO retreat consisting of educational classes and skill building activities. The retreat is then followed by an eight-week psychoeducational group facilitated by an FFSC clinical provider. Identified program outcomes include increased self-awareness, strengthening of friendship and intimacy, improved conflict management, and problem solving skills.

- CPF SAPRO has also galvanized the combined efforts of the military service SARCs and SAPROs to form a cohesive SAPR joint unit in Hawaii, which eventually formalized into the Pacific Command (PACOM) SAPR Council. The group meets once a month to discuss SAPR issues and best practices. The other military services are also invited to attend the quarterly CPF Flag SAPR Executive Steering Committee (ESC).
- Strategic Communications Wing One (CSCW-1) is stationed on Tinker Air Force Base and as such, coordinates closely with the U.S. Air Force base SARC. Through this collaboration, lines of communication with civilian hospitals and organizations, such as the Young Women's Christian Association (YWCA), have improved dramatically. Victim advocate training and on the job training (OJT) is offered and accepted through the YWCA for UVAs.
- Commander Naval Forces Korea (CNFK) participates in a collaborative working relationship consisting of NCIS, U. S. Army Criminal Investigation Command (USACID), and local PMOs with CNFK's Security Officer. CNFK actively participates with U.S. Forces Korea in monthly Sexual Assault Task Force (SATF) meetings to ensure joint efforts are working to the benefit of the Sailors and other Service members. Current efforts focus on prevention awareness through identifying and addressing high-risk behaviors, "hot spots," and misconduct in Korea.
- CNSP worked in partnership with Naval Region Southwest (NRSW), Commander Naval Air Force Pacific (CNAF), and other commands in the Metro San Diego area through cross-functional teams and monthly drumbeat meetings to stay abreast of current trends, policies, initiatives, and best practices. SAPR representatives are proactive in disseminating this information to the widest audience possible. The local Coalition of Sailors Against Destructive Decisions (CSADD) organization has been an outstanding advocate to the SAPR program, increasing Sailor buy-in to prevention at the deck-plate level through focused events, providing social alternatives, and simply being an example among the Sailors on a day-to-day basis.
- Due to the size and geographic location of many Reserve commands, intra-service and inter-service coordination is necessary in order to satisfy service mandated requirements. Through this coordination, Navy Reserve Commands are able to establish commonalities and seek mechanisms for unity of effort in combatting

sexual assault, especially in situations where Reserve Commands are located on other-than-Naval installations.

- NSTC Headquarters collaborated with OSD SAPRO to create a ROTC trifold for resources and procedures for midshipmen and cadets across all military service ROTCs. NSTC is working with DON SAPRO, NETC, OPNAV N17, and CNIC to develop and implement “Above Board,” a new and interactive SAPR training for midshipmen.

1.8 Community Involvement: Describe your efforts to engage with non-DoD civilian community leaders and organizations both locally and nationally (e.g., Safer Bars Alliance and Association of Women for Action and Research (AWARE)) to develop collaborative community relationships and programs. Describe how you addressed challenges. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5, (Community Involvement), p. 11 / SecDef Memo (1 May 14), *Develop Collaborative Forum for Sexual Assault Prevention Methods*, p. 2)

Navy SAPR (OPNAV N172) met with Fairfax County Public Schools Office of Intervention and Prevention Services to gain an understanding of how they address destructive behaviors in school-age groups. Topics and programs reviewed included suicide, bullying, harassment, and intimate partner violence. Also discussed were possible opportunities for partnerships between Navy and Fairfax County Public Schools to exchange best practices and support to local Navy and military families.

OPNAV N172, along with DoD and Service SAPR representatives, met with Centers for Disease Control and Prevention sexual violence subject matter experts to review and discuss new evidence based research and strategies in development to prevent sexual violence. The visit helped identify ways to better align SAPR strategies and policies in the future, and how to possibly develop a broader Navy Violence (or sexual violence) Prevention Strategy to addresses both SAPR and domestic violence.

Navy VLC routinely communicate with and engage local civilian victim-support providers to leverage their experience and guidance in working victim issues. This includes attendance at civilian subject-matter expert training events such as with the American Bar Association and the National Crime Victims Law Institute, as well as local state bar training events. Additionally, Navy VLC routinely communicate with local civilian prosecutors and law enforcement to assist military victims participating in local or state investigations or prosecution of sexual assault offenses.

Navy-wide, UVAs often volunteer at rape crisis centers or affiliated organizations to provide victim advocacy expertise and share best practices. SARC and SAPR VAs also visit local hospitals and rape crisis centers to educate administrators, managers, and care providers on reporting options used by Department of Defense personnel and how to tailor their care to preserve the integrity of this reporting. Local community involvement was also further nurtured and bolstered by inviting civilian leaders to individual commands to discuss common themes, unity of effort, and specific services offered.

In order to provide an optimal training experience for Navy SARCs, CNIC HQ SAPR worked with the National Organization for Victim Assistance (NOVA), the credentialing body for the Defense Sexual Assault Advocate Credentialing Program (D-SAACP) to coordinate SARC participation in the 42nd NOVA Training Event, followed by a Navy Day training focused on policy and Navy program updates and best practices. CNIC also engaged with the Indiana Coalition Against Domestic Violence (ICADV) to present a prevention-focused webinar to SARCs and SAPR VAs. In addition to these efforts, CNIC continues to collaborate with other Services to share research, best practices, and current prevention-focused efforts. Regional community collaboration efforts include:

- NSA Naples partnered up with “Fear2Freedom,” a non-profit organization based out of Norfolk, VA that provides boxes full of supplies and resources for victims of sexual assault that have gone through a SAFE exam. The boxes were packed by volunteers at the “Take Back the Night” event and were provided to the hospital.
- At Naval Region Southeast (CNRSE) the Joint Service SAPR Team and Domestic Abuse Victim Advocate participated in the local Coastal Community Bend Coalition and the Crime Victims Coalition to enhance military/civilian relationships. These organizations work together throughout the year to facilitate training for each other, plan joint events for April’s Sexual Assault Awareness Prevention Month, September’s Suicide Prevention Month, and October’s Domestic Violence Awareness Month. The joint military/civilian efforts at information tables reached over 250 military and more than 1000 civilians and students.

Each Fleet concentration area has a unique challenge and situation to face when it comes to Sailors finishing their work and heading out on liberty. Each command engages in their own Fleet Concentration area, layering positive liberty programs with active programs offered in the community. Gulfport in particular was able to partner with the small number of bars in the local community to reinforce Navy messaging and standards of conduct through a shared training program. The other Fleet concentration areas actively engage in the local community seeking to educate the community on the Navy’s prevention efforts, generating local partners in Ride-Share and Safe-Ride programs, as an example.

CPF SAPRO networks and partners with Hawaii’s Department of Health Sexual Assault Prevention Office, Hawaii National Guard, University of Hawaii, Guam Coalition Against Sexual Assault, California Coalition Against Sexual Assault, Pau (End) Violence, Office of the Attorney General Sexual Violence Office, the “Joyful Heart” Foundation (founded by actress Mariska Hargitay), the Hawaii Sexual Assault Response Team (SART), “Boys to Men” Coaches Association, the Hawaii CASA (Coalition Against Sexual Assault) and the Department of Homeland Security. Organizational members meet on a monthly basis to discuss SAPR issues and best practices.

- As a result of these close working relationships, CPF was invited to provide a military contingent to take part in the annual Department of Health’s Rape Prevention and Education (RPE) Annual Sexual Violence Prevention (SVP)

Training Meeting where over 150 sexual assault professionals (social workers, legal professionals, lawmakers, and law enforcement) from the islands of Oahu, Hawaii, Kauai, and Maui take part in a strategic planning effort to combat sexual assault in all types of communities (military, educational (elementary through high school), collegiate, and civic).

- In Metro San Diego (Naval Base Coronado [NBC], Naval Base San Diego [NBSD] & Naval Base Point Loma [NBPL]), SARCs attend monthly SART community collaborative meetings to discuss ongoing prevention efforts, victim response services, military/community referrals, law enforcement engagement, medical availability, and changing the “rape culture” attitude within society. SARCs provide community outreach trainings to YMCA, local rape crisis center and LGBT center, and participated in community-wide prevention events (e.g., resource tables throughout the year).
- Fleet Readiness Center Northwest invites community leaders such as Impaired Driving Impact Panel of Island County (IDIPIC), Oak Harbor Police Department, Coalition Against Domestic & Sexual Assault (CADA) to provide presentations to all hands to further instill the awareness of the domino effect that destructive decision making has on the community as a whole.

Navy Medicine SAMFEs have been invited to speak at National conferences such as International Association of Forensic Nurses (IAFN), Emergency Nurses Association (ENA) and local Rape Crisis programs to share their unique perspective of caring for military sexual assault patients.

1.9 Incentives to Promote Prevention: Other than the DoD Exceptional SARC and Prevention Innovation Awards, describe your efforts to promote and encourage installation leadership recognition of Service member driven prevention efforts. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Incentives to Promote Prevention), p. 12)

In addition to reviewing, selecting and submitting award winning packages for the DoD Exceptional SARC and SAPR Innovation Award, many regions and commands promote and recognize Sailors for their prevention and SAPR program support efforts. To support command leadership, the SAAPM Toolkit highlights opportunities for SARCs and commands to recognize the efforts of SAPR stakeholders, for both victim support and prevention efforts, not just during April (SAAPM), but throughout the year. The Toolkit includes examples of certificates of appreciation, command citations, and letters of appreciation. Many regions also reported hosting appreciation luncheons where SAPR VAs and UVAs were recognized by installation leadership. Additional recognition events include:

- In CNRMA, several commands present their UVAs with command coins for standing duty on the installation watch bill. Others give a Bravo Zulu (well done) at command all hands, and some provide 24-hour liberty grants for exceptional UVA

service. Seasoned UVAs are invited to speak during the 40-hour VA training to provide them an opportunity to share their experiences with standing the installation watch or taking a call for the first time.

- SARCs encourage command leadership within Navy Region Southwest (CNRWS) to nominate UVAs from their units to compete for installation SAPR VA of the Year recognition. SAPR VA Appreciation ceremonies are hosted to recognize all SAPR VAs and UVAs assigned to the installation and throughout tenant commands.
- NAS Sigonella, in CNREURAFSWA, has instituted an Annual Outstanding UVA Award and Quarterdeck awareness contests.
- For USFFC commands, as part of the First Flag Report process, best practices and innovations are shared by Commanding Officers with their First Flag. Those First Flag reports are collected monthly for Fleet Forces Command and are provided to the Commander for review. Each quarter, the Fleet hosts a SAPR Task Force Executive Steering Committee meeting where the innovations and best practices are shared with all senior leaders, as presented by the individual commands.
- The Installation SARC for Fleet Readiness Center Northwest presents UVAs with certificates for their active participation and support throughout the year at the annual UVA Appreciation luncheon. Advocates are recognized for hours volunteered to stand duty, participation at events throughout the year, and active involvement in command roles.

1.10 Harm Reduction: Describe the metrics being used to assess the effectiveness of Military Service-specific efforts aimed to reduce the impact of high-risk behaviors and personal vulnerabilities. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Harm Reduction), p. 12)

Navy has instituted policies and programs to help reduce and mitigate destructive decisions that can lead to high risk behaviors and vulnerabilities to sexual assault. Using a variety of data sources including Situational and Operational Reports, Defense Sexual Assault Incident Database (DSAID), DEOCS surveys, and other reporting protocols, commands gather, review, and analyze information on their organizational behaviors. These assessments allow commands at all levels to identify trends and root causes and implement, as necessary, mitigative efforts.

Fleet Forces Command SAPROs analyzed latent cases of sexual assault (those reported more than 30 days after incident) as a subset of all incidents; compared unrestricted reports of sexual assault as compared to incident composition and demographics for restricted reports of sexual assaults and survey data on non-reports; analyzed sexual assaults that had more than a two rank split between the victim and alleged offender; analyzed unrestricted report cases that were open more than 180 days to determine the nature of cases that take longer to process and the outcomes for those cases; continued to analyze the differences between contact and penetration assaults; and analyzed the

differences and similarities between male victim and female victim sexual assaults. The Fleet team also analyzed the trends for all destructive behaviors (alcohol abuse; domestic violence; sexual harassment; drug abuse; suicide and suicidal behaviors). These analytic efforts continue to reinforce the complementary nature of effort in each destructive behavior category.

In Navy Region Japan (NRJ), when an Alcohol-Related Incident (ARI) is reported, commands implement immediate remedial training and the individual is placed on liberty risk according to the installation liberty risk matrix/policy. Metrics are briefed at the quarterly flag level ESC, and spikes in location-specific harmful behaviors prompt remediation efforts. Additionally at Navy Joint Region Marianas (NJRM), the SARC provides monthly quad charts with sexual assault statistics by report type, location of incident, and method of contact. This information provides raw data that supports a more focused concentration of effort on service specific impacts concerning sexual assault within this area of responsibility.

The COMSUBPAC Personnel Incident Report is distributed to SUBPAC Staff Directorates and subordinate commanders via the N1 Monthly Report. The report provides a force assessment of alcohol-related incidents. Commanders are educated on the frequency of alcohol-related incidents within the force to understand the linkage between substance abuse and other personnel incidents. Resources are provided to assist in the deglamorization of alcohol, such as the Navy Alcohol and Drug Abuse Prevention (NADAP) E-Gram. The goal is to mitigate the role of alcohol as a contributing factor to sexual assault and other personnel incidents through increasing understanding of the problem of substance abuse. Since focusing efforts in 2009, there has been significant decrease in alcohol-related incidences, and SUBPAC will continue to advance the change in the culture regarding alcohol use. Further, the report tracks trends on sexual assaults reported over a four-year period with detailed assessment provided to PACFLT via the quarterly roll up.

During monthly Cross-Functional Team SAPR briefings and CPF Executive Steering Committee meetings, the NECCPAC SAPRO reviews data of subordinate commands for trend analysis and provides feedback to command leadership on their efforts. Another level of NECC leadership collects and analyzes data from destructive behaviors across the entire Expeditionary Combat force worldwide. The combined data, trend analysis, and recommendations to reduce such behaviors are provided to fleet commanders and lower echelon commands.

1.11 Education and Training: Describe efforts to address sexual assault prevention in your organization by educating Service members on healthy relationships. Describe any training, particularly training that focuses on changing skills, attitudes, and behaviors, to encourage Service members to take part in healthy relationships. Describe any increases in complexity or depth of training on healthy relationships over the course of a Service member's career." (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Education and Training), p. 12)

RTC continues to provide new recruits with eleven hours of SAPR-related training prior to transferring to their service school ("A" School). "Life Skills" training, which includes intervention training and skills development, is provided to all new accessions at their "A" School. This training is centered on a series of scenarios involving actual and potential sexual assault circumstances and underscores the fact that sexual and domestic violence are pervasive societal, as well as Navy, problems that cut across social distinctions. A key objective is to facilitate an open and honest discussion about issues, such as sexual assault, that many young Sailors have rarely discussed.

NROTC midshipmen receive tailored SAPR training each year: freshmen receive SAPR Fleet training during their orientation at the beginning of the academic year; sophomores receive SAPR SCT training; juniors receive SAPR Leadership training; and seniors receive the new pre-commissioning video created by DON SAPRO during their final academic year. "Above Board" training (currently under development) will illustrate SAPR issues in the college environment as well as on summer cruise. All midshipmen will receive this training.

Prior to assuming command and senior leadership positions within Navy, Commanding Officers (COs), Executive Officers (XOs), and Senior Enlisted Leaders (SELs)/Chiefs of the Boat, attend mandatory leadership courses at the Navy Leadership and Ethics Center (NLEC). The courses cover a wide range of leadership-centric issues and provide future Navy command leaders with the information and skills necessary to undertake their new and demanding responsibilities. NLEC's SAPR curriculum was developed by OSD SAPRO and the Services to reflect common core competencies, learning objectives, and leadership behaviors. Short videos and facilitated discussions tailored to the command leadership perspective highlight command climate, continuum of harm, and intervention.

Navy Flag Officer and Senior Executive Training (NFLEX) provides annual training to all new flag officers and Senior Executive Service (SES) personnel on the entire Twenty-First Century Sailor Office portfolio. Specifically, leadership's role in prevention and response to destructive behaviors, and on the importance of establishing and maintaining a positive command climate based on dignity and respect for all.

The Navy's CTC training reinforced with Fleet provided workshops to counter destructive behaviors and the DON SAPRO provided PurePraxis training provide complementary effects on modeling positive behaviors and healthy relationships. The Fleet workshops include key note speakers targeted at Command Leadership Teams and destructive behavior program managers to help "train the trainer" with best practices and strategies for engaging their audiences. These same key note speakers then engage with front line supervisors (E5-O4) on strategies of how to create positive micro-climates within a larger command that ensure Sailors treat both themselves and each other with respect. All hands training in the workshops targets positive behaviors for all Sailors.

CNIC HQ SAPR updated the 40-hour New SAPR (VA) training, including a more dynamic module focusing on prevention. This module includes information about the levels of

prevention, socio-ecological model, and various prevention strategies, including active intervention, healthy relationships, healthy sexuality, engaging men in sexual assault prevention, and peer-to-peer mentorship.

CNRMA incorporated victims' stories from DON SAPRO videos during trainings in an effort to personalize the message on promoting healthy relationships. Additionally, collaboration with Life Skills educators from FFSC to provide training on this topic as well as parenting, anger management and couple's workshops have proven effective. They encourage commands to include DAPA, CMEQ, and Suicide Prevention topics with their SAPR trainings in that they can be intrinsically linked. Newer training topics include male victimology, hazing, and sextortion (provided by NCIS).

For many ships, SAPR is incorporated into port visit briefs and quarterly training. Specifically, USS THEODORE ROOSEVELT's CO, XO, CMC, and Commander Air Wing (CAG) recorded a video laying out their expectations for how to treat shipmates and behave in the workplace. Additionally, "Real Talk" was created to provide an open forum for junior Sailors to have discussions, setting the tone for work place behavior, taking care of each other, safe sex, and drinking responsible.

SUBPAC introduced a course emphasizing resiliency for Sailors assigned to submarines. The course is intended to coincide with the Sailor's 90-day mark onboard his/her first submarine. SUBPAC has found that resiliency training conducted after the first few months of reporting is critical to a smooth transition and integration into a new command. The two-day course focuses on operational stress, resiliency, and fostering healthy relationships. SUBPAC also utilizes Submarine Cultural Workshops (SCW) as an internal assessment tool that focuses on integrity, communication, and trust within the command to identify culturally accepted practices that affect mission readiness. The workshops are required three to six months after a change of command for all submarine commands. Command Leadership Teams are provided specific, detailed, and tangible recommendations in order to effectively take action to improve command climate and to take preventative actions in areas of concerns to include destructive behaviors within the continuum of harm.

1.12 Program Metrics: Describe the metrics used to assess your Military Service Sexual Assault Prevention program. Where appropriate, align the metrics with the 2014-2016 DoD Prevention Strategy elements. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 6 (Prevention Metrics, Assessment, and Research), p. 13)

The Navy uses numerous metrics to assess and evaluate the effectiveness of its SAPR program. With regard to prevention efforts, sexual assault prevalence and reporting are the primary indicators of program success. Sexual assault prevalence, as measured by the Defense Manpower Data Center's biennial Workplace and Gender Relations Survey for Active Duty Members (WGRA) and Defense Manpower Data Center's biennial Workplace and Gender Relations Survey for Reserve Members (WGRR), continues to be the best estimate of sexual assault incidents. The results of the 2016 WGRA are expected

to be released in the spring of 2017. The Navy also places emphasis on the number of Unrestricted and Restricted Reports it receives in a fiscal year. When these metrics are plotted together, the Navy gains a better understanding of the number of incidents that are captured in reports.

The Twenty-First Century Sailor Office, which oversees Navy SAPR, is focusing on a holistic approach to measuring prevention of all destructive behaviors. To this end, the Twenty-First Century Sailor Office reviews the results of the DEOCS. DEOCS anonymously assesses perceptions of organizational effectiveness, equal opportunity, equal employment opportunity, fair treatment, and SAPR. These results provide valuable insight into the environments in which sexual assaults occur and do not occur.

Local commands may also assess their individual SAPR program to determine effectiveness of efforts and to refine prevention and response capabilities. CNSP utilizes the CNSP SAPRO to conduct command assessments as per the Command Readiness Assessment Visits (CRAV), the results of which are given to the command and briefed to the ISIC. Commands are also encouraged to complete the SAPR Command Assessment Tool, to self-assess semi-annually.

1.13 Prevention Allocation of Time: As a result of ongoing SAPR related surveys, describe your approved initiatives to assist SAPR professionals improve prevention training. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 6 (Prevention Metrics, Assessment, and Research), p. 13)

CNIC HQ SAPR provides training to SARCs, who train UVAs. SARCs were provided with creative tools for exploring prevention themes via a webinar presentation by the Indiana Coalition Against Domestic Violence, introducing the "Prevention Toybox." Additionally, all SARCs, SAPR VAs, and UVAs are encouraged to attend DoD-sponsored prevention webinars.

CNRK encourages command SAPR personnel to leverage the FY16 SAPR SCT and CTC training to continue discussions with Sailors on prevention, intervention, supporting victims, and retaliation prevention. Providing an experienced UVA or POC to lead the training improves the accuracy and credibility of discussion answers. Conducting small group discussions with Sailors of similar ranks encouraged open dialog, made the training more personal, and allowed for individual reflection.

For installations with training commands and high student populations, such as CNRSE, training is provided to high risk populations (first tour, age 18-24, both genders) on safe dating, healthy boundaries, risks of dating on the internet, alcohol use, predatory behavior, bystander intervention, consent, reporting, resources available for past trauma, and life skills.

NSA Naples prevention programming and strategies have been the cornerstone of their training this year. During area orientation a video and short discussion on the importance of intervention and the responsible use of alcohol are part of the SAPR brief. Additionally

19-25 year-old Sailors attend “Real Napoli,” a mandatory training focused on preventing and responding to destructive behaviors such as sexual assault, sexual harassment, and alcohol abuse.

1.14 Future Efforts: Describe your future plans for delivering consistent and effective prevention methods and programs, including how these efforts will help your Military Service strategies, enable resourcing, and make progress in your overall SAPR program.

Navy continues to explore and monitor promising prevention practices in the field via ongoing communication with leadership, SARCs, SAPROs, and periodic site visits. Navy organizations will continue to provide the latest information pertaining to the SAPR program through training, as well as incorporation of command and installation events to continue raising awareness of what are the correct behaviors Sailors should emulate and how to avoid destructive behaviors.

For all hands, prevention training begins immediately when a Sailor joins the Navy and continues throughout their career. Training is not only provided on an annual basis, but when reporting to new commands, and when being promoted. Commands will continue to adhere to SAPR training requirements for command indoctrination and annually, as required by DoDI 6495.02, and follow the Commander's Checklist for Prevention and Response to Allegations of Sexual Assault in OPNAVINST 1752.1C. While the SAPR VA and DRC will continue conducting indoctrination training to educate Sailors on the Navy standards, leaders at all levels will set the example, reinforce positive behaviors, and uphold Navy core values.

In FY17 Navy will introduce “Full Speed Ahead,” a continuation of the highly successful Bystander Intervention to the Fleet (FY14) and CTC (FY16) Fleet-wide training. Full Speed Ahead provides innovative, interactive, and scenario-based prevention training that focuses on positive behaviors Navy wants Sailors to emulate, as well as skills to identify risk factors and employ intervention strategies for behaviors throughout the continuum of harm. Training will also promote Navy’s Core Attributes of integrity, accountability, initiative and toughness as well as healthy behaviors as the foundation to a resilient and professional force.

Another initiative in FY17 is a Smartphone Application (APP) pilot by USFFC. The Smartphone APP, LiveSafe, is being offered as a Beta test to 45,000 Sailors in the Hampton Roads Fleet Concentration Area and overseas in Rota Spain for up to 4,000 Sailors to explore overseas functionality. The APP study will be conducted between November 2016 and May 2017, exploring the ability for a Smartphone APP to positively contribute to a culture of prevention in the Fleet. The APP delivers five functions to Sailors’ smartphones free of charge. Those functions include:

- A resource page that explores all destructive behaviors, to include Fleet myths and misperceptions about those behaviors and Navy policy. It also includes links to standing resources like Chaplain hot lines, suicide hotlines, the DoD SAPR hotline,

SARCs, legal representatives, Navy web sites with more information, and Military One-Source.

- A Google Map with locations for all of those resources, to include working hours and links to individual web-sites.
- WalkSafe functionality where the Sailor will be able to temporarily enable GPS tracking to a third party of their selection, to help them get to safety or to move from one location to another with active texting, voice, or silent movement depending on circumstance.
- Crowd sourcing of tips about safety, security, and destructive behaviors at our installations.
- An alert function where the APP can be used to notify Sailors of safety issues, provide policy updates, etc.

LiveSafe and the Fleet will be conducting focus groups as well as providing metric-based feedback on efficacy of further fielding of LiveSafe to the entire Navy after the pilot. Navy will continue to emphasize that reduction of sexual assaults and other unacceptable behaviors is a leadership issue that needs to be addressed at all levels. SAPR training has been incorporated into the command's regular training program. It is important to provide the right amount and type of training to avoid Sailors "tuning out" the message. This is a continuous assessment made at all levels of the command. Additionally, there are efforts to transition from the standard brief and PowerPoint to integrate skits and interactive discussions.

Monthly CFT meetings will continue to serve as a central forum to facilitate consistency of programming, verify accuracy of resource postings, and to encourage partnerships with collateral programs such as CSADD, NADAP, etc. TYCOM SAPR Officers, SARCs, and SAPR VAs will continue to use the most current research in the field to improve training methods and sustain relevancy. Commands will continue to cultivate a strong culture of trust by enforcing policy and procedures for SAPR case handling, implementing current training, encouraging third party intervention, deglamorizing alcohol use, not tolerating victim retaliation, and holding perpetrators appropriately accountable.

Forthcoming command/community efforts include:

- The 2017 Chaplain Corps Professional Development Training Conference will discuss the role of chaplaincy in the face of violence. This training will identify the dynamics of targeted violence and interpersonal violence. With regards to sexual assault, the training conference will focus on identifying needs, developing safety plans, and working with VAs.
- NJS will continue to work with the Fleet to define and implement updates to SAPR training in order to meet evolving Fleet SAPR Training requirements.

- CNIC HQ SAPR will update and expand the widely-used SAAPM Toolkit, planning support tools, and marketing materials based on feedback gathered from the field after April 2016. CNIC will also continue to keep a finger on the pulse of promising prevention practices in the field via ongoing communication with Regional and installation SARCs as well as through periodic site visits, with the goal of identifying promising and best practices that can be implemented enterprise-wide.
- Navy participated in Phase 1 of the Installation Prevention Project (IPP), an OSD SAPRO led multi-year project focused on prevention strategies. Southeast Region naval bases in King's Bay, Georgia, Jacksonville, Florida, and Mayport, Florida participated in the Installation Prevention Project in late July 2016. The first phase provided a retroactive view of prevention efforts and assessment of any current risk factors. Phase 2 is expected to commence in FY17 and will focus on comparing historical and contemporary prevention activities to prevalence rates for influence factors. Prevention activities will be recommended for continuation or termination based on this data.
- USFF's focus on providing quality Fleet workshops in all FCAs continues. Workshop agendas will address prevention efforts with clear expectations set for leadership, personal behavior for front line supervisors, and the inculcation of Navy core values for all hands. The overall themes will focus on respect for self and others while linking the interactive nature of the sexual assault with alcohol-related incidents, domestic violence, and suicide prevention.
- CNRF is developing a Force-wide SAPR drill, results of which will allow an assessment of program compliance at all echelons. CNRF will migrate to the SITREP data tool which will enable comprehensive trend analysis that will inform program effectiveness and offer insight into future service level program direction.
- BUMED will streamline SAPR and SAFE efforts under one office for overall efficiency and metrics reporting. This alignment will allow BUMED SAPR to develop and maintain standards of medical treatment for sexual assault victims, manage the Navy Medicine SAFE program and all resources, and track sexual assault reports and training at the enterprise level. To support this effort, a data base is being developed that will provide updates to the Navy Surgeon General, Regional Commanders, and Military Treatment Facility COs of SAFE capabilities and a break down by facility, region and enterprise of SAPR reports. Additionally, new inter-service SAMFE training standardizing DoD Medical Forensic care will be implemented for all Navy Sexual Assault Nurse Examiners (SANE) and other certified SAFE providers.

2. LOE 2—Investigation—The objective of investigation is to “achieve high competence in the investigation of sexual assault.”

2.1 Summarize your efforts to achieve the Investigation Endstate: “investigative resources yield timely and accurate results.” (DoD Sexual Assault Prevention and

Response Strategic Plan (26 Jan 15), p. 3)

If a sexual assault incident involving a Sailor occurs, Navy responds with a thorough investigation, action to support the victims, and fair and transparent processes to hold offenders appropriately accountable. The DoD requires that Military Criminal Investigative Organizations (MCIO) investigate all reports of sexual assault, to include contact offenses. Therefore, all Unrestricted Reports of sexual assault within Navy are referred to NCIS (or another Service MCIO in certain locations), regardless of severity, with the goal of yielding timely and thorough investigations. Commands are specifically directed not to conduct internal investigations for reports of sexual assault and must immediately notify NCIS upon receipt of a report.

In FY16, NCIS refined the implementation of the DoD SVIP initiative to provide timely, unbiased investigations while ensuring all services are provided to the victims throughout the process. Through the use of a surge strategy with Special Agents and investigators dedicated specifically to the investigation of sexual assault allegations and ongoing collaboration with relevant SVIP partners, NCIS continued to experience a reduction in the time it takes to work a sexual assault investigation while maintaining a high standard of investigative excellence.

NCIS continued to implement the Master-at-Arms (MA) Reservist Investigator Program with four MAs serving in NCIS offices during FY16.

NCIS also continued development of the active duty MA Investigator program. The goal of the program is to create a cadre of 24 MAs who are trained and credentialed as NCIS agents. Currently, nine MAs have completed the training and are serving in NCIS field offices on three year orders. These MA Investigators will serve in a pilot program where they will deploy aboard aircraft carriers to perform felony level investigations to include allegations of sexual assault.

NCIS Headquarters (NCIS HQ) conducted a review of all the open reports for investigations of sex-related offenses. In addition, a minimum of 10% of all active cases in these categories receive a comprehensive program review on a monthly basis. These efforts have allowed potential issues with cases to be identified and resolved at the earliest possible opportunity.

The first line supervisor on each investigation conducts a case review at a minimum of every 30 days during the pendency of the investigation. The second line supervisor is responsible for reviewing all cases at least once every six months. These reviews are submitted and maintained at NCIS HQ. The NCIS Inspector General conducts case inspections every three years.

NCIS investigative timelines are calculated from initial notification until the date all logical investigative leads have been completed and the case has been presented to command for administrative/judicial action. Prior to FY12, investigative timelines were as long as 300 days in some locations. The average timeline for investigations in FY16 was 129 days for

Navy cases. Although this is slightly higher than the FY15 average of 122 days, it must be taken in to account that the number of NCIS sexual assault investigations increased by 8% from FY15 to FY16.

2.2 Provide an update on the expansion efforts for the Special Victim Investigation and Prosecution Capability for MCIOs, to include how Congressional plus-up funding was spent to directly support this program. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 2, #1, p. 6 / DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 2, para 6ac)

Since the expansion of Article 120 of the Uniform Code of Military Justice (UCMJ), the number of reported sexual assaults investigated by NCIS has increased significantly. Sexual assault statistics for FY16 showed a 77% increase in sexual assault investigations compared to data collected in June 2012.

In order to expand the usage of the SVIP capability in the field, NCIS HQ mandated all investigative open reports document that the proper SVIP notifications have been made and list by name the SVIP members who are involved with the investigation. Training on the SVIP requirements has been added to the NCIS Advanced Adult Sexual Assault Investigator Training Program (AASAITP), Advanced Family Sexual Violence Training Program (AFSVTP), and the First Line Supervisor Training Program.

Congressional plus-up funding received through DON SAPRO was used to conduct interrogation training for 74 Family and Sexual Violence (F&SV) agents in FY16.

2.3 Describe your progress in enhancing training focusing on special techniques for victim interviewing by investigators of sexual violence. Include efforts to establish common criteria, core competencies, and measures of effectiveness, and to leverage training resources and expertise. (DoDD 5505.19, Establishment of Special Victim Investigation and Prosecution Capability within MCIOs (4 Sep 15), para 3g / DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 2, #3, p. 6)

In FY16, NCIS reevaluated the curriculum for both the AASAITP course and the AFSVTP course. The AASAITP course focuses on providing the necessary training elements mandated by DoDI 5505.18, "Investigation of Adult Sexual Assault in the Department of Defense," and DoDI 5505.19 "Establishment of SVIP Capability Within the Military Criminal Investigative Organizations." The course includes training in the cognitive interview method for use when working with victims of sexual trauma. The cognitive interview method has been used by NCIS since 2014 based on its validity and effectiveness, demonstrated through years of rigorous, peer-reviewed scientific research studies. The NCIS goal is to provide advanced training to all personnel who could potentially respond to, investigate, and/or supervise the investigation of SVIP offenses. NCIS currently employs 1,050 Special Agents and Investigators, 164 of whom are dedicated solely to the investigation of SVIP crimes. Since August 2012, 140 of the 164

dedicated personnel and 449 of the non-dedicated personnel have attended the AASAITP or equivalent advanced training. NCIS continued to work to satisfy these training requirements by conducting nine AASAITP courses in FY16.

NCIS also initiated a Mobile Training Team (MTT) during FY16 to provide refresher training to field agents who completed their advanced training requirements several years ago. The MTT focused on victim interviewing techniques, victim response to trauma, and updates on current sexual assault investigative policy. Additionally, NCIS funded interview training through John E. Reid & Associates to enhance the interviewing skills of agents who respond to allegations of sexual assault.

2.4 Provide an update on your participation in the Defense Enterprise Working Group of Military Criminal Investigation Organizations and Defense Criminal Investigative Service to assess and validate joint investigative technology, best practices, and resource efficiencies benched against external law enforcement agencies. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 2, #4, p. 6)

In partnership with the other MCIOs, the US Army Criminal Investigation Division (USACID) and US Air Force Office of Special Investigations (AFOSI), and the Department of Defense Inspector General (DoDIG), NCIS participated in multiple working groups during FY16 focused on updating several key instructions. They included DoDI 5505.18 (Investigation of Adult Sexual Assaults), DoDI 5505.03 (Initiation of Investigations by Defense Criminal Investigative Organizations), and DoDI 5505.14 (Deoxyribonucleic Acid (DNA) Collection Requirements for Criminal Investigations, Law Enforcement, Corrections, and Commanders). These instructions have a direct impact on investigative policy and provide an avenue for implementing best practices across the MCIOs.

NCIS also participates in a joint effort with USACID and AFOSI to develop software for crime scene evidence processing. The software, Evidence Collection Management X (ECMX), was developed from the Federal Bureau of Investigation's (FBI) crime scene management system and modified to comply with DoD procedures. ECMX allows major crime scene team members to complete functions via internet-enabled devices and links all processes, (e.g. photography, sketches, and evidence collection) into one comprehensive report.

Also in collaboration with USACID and AFOSI, NCIS developed the Crime Scene Investigators Training Program (CSITP) at Federal Law Enforcement Training Centers (FLETC). The course aims to enhance the crime scene processing skills of Special Agents while providing instruction in the latest methods and technologies to more effectively collect evidence in anticipation of certification requirements in FY20.

2.5 Describe your progress in assessing and coordinating with the United States Army Criminal Investigation Laboratory and Armed Forces Institute of Pathology to improve investigative support and facilitate evidence processing (i.e., turnaround time for processing of SAFE kits). (Joint Chiefs of Staff Strategic Direction to the

Joint Force on SAPR (7 May 12), p. 11)

NCIS established a Forensic Consultant (FC) position in June 2014 at the Defense Forensic Science Laboratory (DFSL), formerly known as the US Army Criminal Investigation Laboratory (USACIL). The FC is assigned to the Forensic Analysis Division and prioritizes case submissions on behalf of NCIS. The FC works with the DFSL staff to conduct a comprehensive assessment upon receipt of evidence. The FC also inventories and inspects the evidence and then builds an examination strategy to ensure the most appropriate testing is conducted.

BUMED collaborated with DFSL to provide quality assurance feedback on Navy and Marine Corps Sexual Assault Forensic Examination (SAFE) kits processed by their facilities. Unlike the civilian sector, DFSL does not limit forensic samples submitted. Further, DFSL is bound by the UCMJ to complete forensic evidence analysis in compliance with Article 10 of the Uniform Code of Military Justice, and related case law, which requires that the accused be brought to trial within 120 days after arraignment or imposition of restriction, arrest or confinement. Their staff does a monumental job in completing evidence examinations within an average of 87 days. For comparison, civilian facilities can take 150–160 days to process evidence. All Navy and Marine Corps SAFE kits submitted by Navy SAFE providers to DFSL undergo quality assurance review.

2.6 Describe your efforts to increase collaboration and improve interoperability with civilian law enforcement to include sharing information on Civilian and Military Protective Orders and assure receipt of civilian case dispositions. (DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 4, para 3g)

NCIS field offices have the responsibility to maintain collaborative relationships with law enforcement agencies within their area of responsibility. When investigations of sexual assault fall within the primary jurisdiction of a local law enforcement agency, NCIS may initiate a joint investigation or assist the agency with investigative leads as deemed appropriate. During the course of the investigation, NCIS remains engaged with local law enforcement counterparts and reports the progress of the investigation to the command(s). This enables continued visibility and awareness in the event that civilian authorities defer prosecution to the military or civilian prosecutors decline the case and NCIS decides to pursue additional investigative leads.

Through agreement with the Federal Bureau of Investigation (FBI), NCIS enters all Military Protective Orders (MPO) issued during an NCIS investigation into the National Crime Information Center (NCIC) database. This allows local law enforcement agencies access to the MPO information during potential contact with the subject of an investigation. Additionally, it provides a point of contact when a violation is discovered that would have otherwise gone undetected.

Upon the initiation of each criminal investigation, NCIS queries the NCIC database along with other databases to obtain background information on the subject of the investigation.

Civilian protective orders are included in these queries and are enforceable by NCIS and the involved command. Any violations of civilian protective orders found during an NCIS investigation are reported to the local law enforcement agency and to the command for action.

SARCs continue to collaborate predominantly with civilian law enforcement by liaising through local NCIS office or base security. Regions also report SARCs collaborate through a variety of community outreach events as well as the SARCs' and SAPR VAs' active participation in community SARTs. These efforts provide opportunities to work with civilian law enforcement to increase awareness and education on the Navy SAPR Program and procedures. Lastly, SARCs' and SAPR VAs' cultivation of strong working relationships with local NCIS offices plays a critical role in ensuring a smooth receipt and transition of civilian case disposition.

Regional promising practices include the following:

- CNRMA - SAPR VA teams ensure working relationships are built between the SAPR Program, the local Police Departments, and VWAP personnel during active investigations and long after final case dispositions.
- CNRH – Joint Base Pearl Harbor-Hickam NCIS employs a former Hawaii Police Department (HPD) officer to serve as the liaison between NCIS and HPD to facilitate collaboration and communication.
- CNRJ - Continued interaction and education of the Japanese Police is necessary to achieve a cross-cultural understanding of the role of VAs during the investigative process, and the DoD victim-centric approach to investigating.

2.7 Describe your efforts in providing training and guidance for all first responders to a report of a sexual assault that ensures the preservation of evidence and witness testimony. Also, describe the training and guidance specifically provided to law enforcement on victim trauma and the requirement that only the MCIO shall conduct the formal victim interview. Describe any additional training and guidance provided for locations where the arrival of the MCIO will be delayed (e.g., due to mission requirements or a submarine cannot surface for a week). Address how this training and guidance assists law enforcement and commanders in responding appropriately to reports of sexual assaults in these locations. (DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 10, para 7e)

All training for investigative first responders to sexual assault allegations is provided via the AASAITP course. The course seeks to standardize the response for all sexual assault investigations. Agents and investigators attending the training receive a four-hour block of instruction that covers the latest investigative techniques for processing a crime scene and preserving evidence. The instruction includes a practical lab where participants apply the techniques learned in the lesson. The course includes an eight-hour block of instruction

focused on the impact of trauma on memory and victim responses to traumatic incidents to include counterintuitive behavior. Additionally, the course includes multiple days of instruction on the cognitive interview technique that is applicable to both the victim and witness interview process. The cognitive interview lesson is reinforced using instructor evaluated mock interviews.

During the AASAITP course, instruction provided is on the most current sexual assault investigation policy and procedures. This block of instruction includes coverage of the requirement that not only must NCIS conduct the formal victim interview, but also the NCIS agent conducting the interview must have completed the advanced training in understanding victim trauma. Participants are instructed that NCIS must initiate an investigation into all allegations of sexual assault that occur within their jurisdiction regardless of the severity of the incident.

Unique circumstances that preclude the timely arrival of NCIS agents to an allegation of sexual assault are addressed at the local level. In these situations, the assigned Special Agent instructs the command on the proper steps to ensure the preservation of evidence and to address any safety concerns on behalf of the victim while reinforcing the need for command to allow NCIS to conduct the formal victim interview.

Trial Counsel Assistance Program (TCAP) personnel provide training at the NCIS Advanced Adult Sexual Assault Investigations Training Program (AASAIPT), a course focused on improving multi-disciplinary coordination of sexual assault investigation. In FY16, TCAP provided training at AASAIPT 8 times. TCAP personnel also train NCIS agents as part of the Advanced Family and Sexual Assault Violence course, which was completed 3 times in FY16.

OJAG's Criminal Law Division does not provide training to MCIOs, but does provide legal review of select first responder training materials. Of note, the Criminal Law Division completed an in-depth review of UVA training, correcting numerous legal and policy errors made by the contracted drafting agency. The training included guidance on discussing events with victims prior to an MCIO interview. The Criminal Law Division also promulgates guidance to Staff Judge Advocates on first response to sexual assault incidents, including a reminder not to conduct investigations or interviews unless given approval to do so by the MCIO. Criminal Law Division personnel provide substantive presentations at in-person SARC and SAPR VA training to explain updates to sexual assault law and policy, including relevant military justice updates found in the National Defense Authorization Act (NDAA), evidence preservation, appropriate immediate actions to take when faced with a report of sexual assault, and SARC and SAPR VA prohibitions against conducting investigations and providing legal advice.

In FY16, SARCs and SAPR VAs provided annual training to first responders focusing on the process and procedures when a sexual assault is reported. Additionally, per CNICINST 1752.3, installations implement SAPR drill scenarios twice a year, to provide hands-on training and guidance to first responders. Installations also host tabletop SAPR response drills to ensure understanding of the policies, resources, and procedures in

place in the event of a sexual assault incident. Lastly, command watch standers received training and a detailed checklist of resources and procedures to assist sexual assault victims. The training highlights victim sensitivity and trauma-informed practices to assist and guide them through appropriate sexual assault response. Commanders are encouraged to have pre-deployment briefs with IDC on board ships to determine appropriate reporting chains and various operational scenarios that might impact sexual assault reports underway.

2.8 Describe your future plans for the achievement of high competence in the investigation of reports of sexual assault by MCIOs.

In addition to continuing the compliance oversight provided by NCIS HQ, during FY17, the NCIS FSV program plans to automate the open report review process to allow supervisors in the field to access their cases in real time to identify any deficiencies. These reviews are designed to address the critical elements of a sexual assault investigation that must be completed in the crucial initial stages after receiving an allegation. By allowing field supervisors to correct deficiencies in a timely manner, the overall investigative process for the case is improved.

NCIS will continue to pursue the goal of having all agents and investigators, regardless of discipline, trained in the AASAITP course to ensure there are always trained personnel available to respond to all allegations of sexual assault. Experienced agents in SVIP billets selected in FY17 will receive advanced training to recognized forums such as the End Violence Against Women Conference, the Crimes Against Children Conference, and the Association of Threat Assessment Professionals Conference. These venues not only provide excellent training opportunities, but also the chance to network with outside law enforcement professionals and exchange ideas on best practices.

NCIS will also continue the training program to create a cadre of credentialed, active duty MAs serving in NCIS billets. In FY17, four additional MA candidates have been identified to attend the training and serve in NCIS billets on three-year orders. This program has the additional benefit of providing trained, experienced MAs who will return to the Fleet upon completion of their tour with NCIS.

Navy VLC regularly present substantive training at the FLETCs in multiple locations. FLETCs are tasked with training agents within NCIS and have included VLC presenters since the program's inception in 2013. VLC Program leadership participates in policy level meetings with NCIS, OJAG's Criminal Law Division, and the Marine Corps Victims Legal Counsel Office to address systemic issues between the organizations. In addition, VLC in all locations provide regular training on the VLC Program as well as victim rights to command triads, local installation commanders, Staff Judge Advocates (SJAs) who advise commanders, SARCs, SAPR VAs and Forensic Medical Examiners (FMEs), all of whom may be considered first responders for sexual offenses. NCIS works together with prosecutors, and VLC, when applicable, to enhance victim participation and build confidence in the investigation and in the military justice process. By engaging all parties, as appropriate, throughout the entire process, victims receive constant communication

with less confusion about hand-offs of investigations from MCIO agent to prosecutors.

3. LOE 3—Accountability—The objective of accountability is to “achieve high competence in holding offenders appropriately accountable.”

3.1 Summarize your efforts to achieve the Accountability Endstate: “perpetrators are held appropriately accountable.” (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

Navy’s Regional Legal Service Offices (RLSO) have an experienced cadre of litigation specialists and military justice expert judge advocates serving in litigation-intensive billets or supporting trial counsel through the Trial Counsel Assistance Program. This includes the nine regional Senior Trial Counsel (STC) who prosecute the most complex cases while supervising, mentoring, and training junior trial counsel. More experienced Military Justice Litigation Qualified (MJLQ) O-5s have been placed as directors of litigation (STC) in the three largest prosecution offices.

TCAP provides the most up to the date training to Navy Trial Counsel, ensuring that prosecutors are fully capable of providing all relevant information to the finder of fact to achieve a just result in each case. Perpetrators, once convicted, are sentenced in accordance with the Uniform Code of Military Justice, and the results of the court-martial are published to increase transparency and to serve as a deterrent to potential offenders.

Navy VLC advise victims of reporting options and assist in making reports as directed by their clients. Navy VLC have no control or oversight over command and convening authority case processing or disposition. However, VLC assist victims in exercising their rights to provide input at various junctures of a case, including: expressing a preference for the case to go forward under military or civilian jurisdiction; providing substantive input on whether pre-trial confinement of the accused should continue; providing direct input to the convening authority about whether a case should go forward to court-martial; providing an opinion on specific terms of a pre-trial agreement; and the option to respond to clemency requests submitted by an accused.

3.2 Provide an update on SAPR training provided to those who are affiliated with the Special Victim Investigation and Prosecution Capability program (paralegals, trial counsel, special victims’ counsel / victims’ legal counsel, and victim-witness assistance personnel) for responding to allegations of sexual assault. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 3, #1, p. 6)

VLC Training: Navy VLC participate in training evolutions, which prepare and update individuals affiliated with the Special Victim Investigation and Prosecution Capability program in effective support of sexual offense victims. All VLC are certified to represent clients at courts-martial per Article 27(b) of the Uniform Code of Military Justice (UCMJ) and must attend VLC specialized certification training given by the Air Force, Army or Navy, focusing on victims’ rights, support, recovery, and victim advocacy. Navy VLC also participate in specialized “child victim” training courses executed by military and civilian experts, to include child victim training provided by the National Crime Victims Law

Institute and “Child Capacity” training presented by the American Bar Association’s Center for Children and Law. Navy VLC participate in routine program-wide training addressing victim-support issues relevant to successful delivery of services. This web-based training is conducted via the Defense Connect Online (DCO) system and has included topics ranging from DNA collection and the Physical Evaluation Board System, to key changes in victim rights and entitlements established by each year’s NDAA and resulting adjustments to the Rules for Courts-Martial.

The Navy VLC Program also operates a comprehensive SharePoint site for internal communications, discussion boards, mentoring, development, and promulgation of “best practices,” and storage of victim-support resources.

In April 2016, the Navy VLC Program conducted its first-ever training symposium, bringing almost all VLC and support staff from around the globe to a three-day training that included presentations by outside experts, both civilian and military, as well as the sharing of internally-developed expertise in all practice areas.

During FY16, 15 incoming VLC attended the required Special Victims’ Counsel Certification Course provided by either the Army or Air Force prior to reporting for VLC duties, 10 VLC attended specialized child victim training, four VLC attended the National Crime Victim Law Institute (NCVLI), and the Navy VLC Program Chief of Staff attended and presented at the End Violence Against Women International (EVAWI) conference.

TCAP Training: SAPR training, including courses on dealing with victims of sexual assault, are part of the TCAP core training mission. This year, TCAP focused on coordinating training with the Marine Corps to provide greater opportunities and coordination of expert instruction. The coordination led to more opportunities for counsel to receive baseline, intermediate, and advanced training in the dynamics of special victim crimes as well as trial advocacy. TCAP, in concert with the Naval Justice School, sponsored the Prosecuting Special Victims Crimes course. Navy, Marine and Air Force prosecutors attended. In FY16, paralegals attended the course for the first time and had focused training sessions. Finally, TCAP promoted and funded, using valuable SAPRO funding, prosecutor attendance at non-DoD special victim crimes training. Trainings included the National District Attorney’s Association’s training on sexual assault and child abuse. Other non-DoD training included: San Diego Sexual Assault Response Team; the Conference of Crimes Against Women; and End Violence Against Women International’s (EVAWI) Annual Conference. Finally, TCAP supplemented its special victim crime webinar portfolio with a number of non-DoD organizations’ webinars focusing on special victims crimes. These webinars allowed Navy prosecutors and paralegals to attend educational programs online presented by national experts at little to no cost.

NJS Training: In FY16, either provided or co-sponsored the following courses, designed to maintain and enhance the expertise of judge advocates in litigating special victim’s cases:

- **Basic Lawyer Course (BLC):** This ten-week course, offered three times annually,

provides accession training for all judge advocates in the U.S. Navy (USN), U.S. Marine Corps (USMC), and U.S. Coast Guard (USCG). The course includes extensive training in military justice and court-martial advocacy, as well as training in legal assistance, administrative law, standards of conduct, and operational law. The course includes instruction on SAPR, Sexual Assault Initial Disposition Authority, and VLC. Teaching methods include lecture, seminar, and practical exercises. Each class member participates as counsel in a fully contested mock sexual assault trial. Upon graduation, judge advocates are certified per Article 27(b), UCMJ.

- Senior Officer Course (SOC) in Military Justice and Civil Law: This three-day course is designed for COs, XOs, and OICs and is open to other officers in grades O-4 and above with NJS approval. The SOC trains officers in the execution of the legal responsibilities of command by utilizing scenario-based instruction in military justice, including sexual assault case disposition and SAPR, as well as administrative law and civil law. In FY16, NJS provided SOC sessions in Newport, RI; San Diego, CA; Norfolk, VA; Camp Lejeune, NC; Parris Island, SC; Quantico, VA; Pensacola, FL; Okinawa, Japan; and Rota, Spain. Per NAVADMIN 302/12, this course is mandatory for O-6s enroute to command.
- Prosecuting Special Victim's Cases (P-SVC): NJS offers specialized instruction focused on special victim's litigation. P-SVC is a week-long intermediate trial advocacy course focusing on substantive aspects of prosecuting domestic violence, sexual assault, child sexual abuse, and child abuse. Taught in conjunction with TCAP, it includes small-group practical exercises to hone skills, such as conducting direct and cross examinations of victims, expert witnesses, and the accused.
- Basic and Advanced SJA Courses: These week-long SJA courses incorporate military justice training relevant to SJAs including search and seizure, investigations, charging, preferral, convening courts, referral, SAPR, the VWAP, sexual assault-initial disposition authorities (SA-IDAs), and post-trial processing. This course provides SJAs with the basic tools and necessary information for appropriately responding to sexual assault allegations in accordance with DoD/DON SAPR policies and special victim investigation best practices.
- Sexual Assault Policy for the SJA: This two-day course, co-sponsored by the Criminal Law Division, is highly encouraged for SJAs currently providing advice to General Court-Martial Convening Authorities (GCMCAs), SA-IDAs, those serving as RLSO Command Services Department Heads, and SJAs for TYCOMs or other commands that frequently convene courts-martial. The course provides instruction on and encourages discussion of current legal issues involving sexual assault policy and dispositions facing SJAs advising GCMCAs and SA-IDAs. Among the key topics reviewed are the FY16 NDAA, the status of its implementation, the requirements recent policies and legislation place on SJAs and Commanders, and the corollary impact on the military justice process.

- Special Victims' Capability Course (SVCC): This is a multi-disciplinary course for Legalman, USN paralegals, USMC Legal Specialists, SAPR VAs, Domestic Violence VAs, and SARCs who comprise Navy's Special Victim Capability, as well as Navy first tour judge advocates assigned to RLSOs. The course covers a full spectrum of issues to improve and enhance victim care, victim support, and prosecution support. It provides for a more comprehensive and standardized response to allegations of child abuse, serious domestic violence, and sexual assault offenses. The focus of the training is to gain a better understanding of the dynamics of these crimes, working with victims, and collaboration of effort within the military justice system.

3.3 Describe your efforts to ensure that the personnel records of Service members convicted by court-martial, adjudged non-judicial punishment, or other punitive administrative action for a sex-related offense are updated to reflect punitive action taken, as appropriate. (DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 10, para 2d(5)(g))

After every conviction, the Trial Counsel provides the Convening Authority and the member's command with a copy of the Report of Results of Trial. Notations in the individual service records are made, in accordance with the applicable instructions, by the member's command. NJS and OJAG Criminal Law division SAPR training, as described in question 3.2, includes this requirement.

3.4 Describe your efforts to ensure SARC, SAPR VA, MCIO, and commander knowledge of recent victim rights and military justice updates in FY16. (DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 10, para 7a)

Navy VLC work closely with Navy SARC and SAPR VA providers in their regions on all aspects of victim support, to include regular training and understanding of the nature and scope of Military Rules of Evidence 514 pertaining to the Victim Advocate - Victim privilege, as well as military justice and practice updates, as they occur. (Response to Q. 2.7 addresses training that VLC routinely conduct with SARCs, VAs, and NCIS, which includes relevant updates to the law and practice relating to victims' rights.) At the Senior Officer Course (SOC), prospective commanders are provided a four-hour scenario-based block of instruction on military justice, sexual harassment, and SAPR. During these sessions, participants discuss, among other things, responsibilities of the commanding officer with respect to victim rights, SA-IDA, VWAP, reporting requirements, and the court-martial process. Regular course reviews are conducted to ensure the curriculum and materials incorporate all updates, and reflect the current law and DoD/DON policy as to SAPR, victim rights, and the military justice system.

At the Sexual Assault for the SJA course, judge advocates are taught about their obligation to ensure their commanders are compliant with all legal requirements in sexual assault cases. The August 2016 course was attended by judge advocates from paygrades

O-2 through O-6. The Criminal Law Division creates products for commanders and Staff Judge Advocates on various topics, such as a short guide to Military Rule of Evidence 514, and a checklist for Staff Judge Advocates on sexual assault response that incorporates all requirements and references. These references are posted on the Criminal Law Division's online SharePoint site and updated as necessary.

3.5 NGB, provide an update to your efforts to ensure that all Unrestricted Reports of sexual assault (both Title 10 and 32 status) are referred to the appropriate Military Criminal Investigative Organization (MCIO), civilian law enforcement, or to the National Guard Bureau Office of Complex Administrative Investigation (NGB-JA/OCI). (Chief National Guard Bureau Notice 0400 (16 Apr 14), para 1b)

N/A

3.6 Describe your current policies and procedures to ensure alleged offenders are provided due process rights and protections afforded by the Constitution and the UCMJ. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 3, #6, p. 6)

Every year the defense community offers all defense counsel (DC) a standard training rotation focusing on defending sexual assault cases. There are four sections in this rotation: Defense Counsel Orientation (DCO), Defending Sexual Assault Cases (DSAC), Defense Counsel Assistance Program (DCAP) Mobile Training Teams (MTTs) and Trial Advocacy Programs.

- DCO is a required weeklong training for new defense counsel at the Defense Service Office (DSO). During this training, counsel receives a primer and introduction on defending sexual assault cases (Sexual Assault Cases 101) as well as various other topics related to client representation.
- DSAC is a weeklong intermediate to advance level course hosted by the Marine Corps Defense Counsel Assistance Program in San Diego for Marine, Navy, and Coast Guard Defense Counsel. The course is taught by civilian and military practitioners and experts in the field to teach substantive classes relevant to sexual assault cases. Moreover, the instructors also conduct some trial advocacy training specific to sexual assault cases.
- DCAP Mobile Training Teams. Every six months, the DCAP MTT (composed of 2 trainers) visits each DSO headquarters and major detachment to provide weeklong training geared towards defending sexual assault cases. At the MTTs, DCAP teaches substantive issues, conducts advocacy training, and does an extensive review and assessment of ongoing sexual assault cases.
- Trial Advocacy Program(s). As a supplement to the above programs, defense counsel are encouraged to attend one of the various trial advocacy courses either offered by NJS or through outside organizations like the Bronx Public Defender or

the National Criminal Defense College.

In addition to the above, the DSOs have implemented the use of standard documents and counsel checklist to use for case preparation. DCAP established a defense community SharePoint page where all defense counsel can access up to date information as well as post questions to the field. Counsel can also use SharePoint to obtain (1) a defending sexual assault trial kit, which includes relevant documents and pleadings on sexual assault cases and (2) the Defense Counsel Deskbook, which includes standard checklists, proof charts and other items to assist in preparation. The DSO requires that all DC must establish and routinely access their SharePoint account to ensure that they receive relevant and up to date information. Additionally, it is a DSO priority to detail MJLQ or similarly qualified counsel to all Senior Defense Counsel or OIC positions.

OJAG's Criminal Law Division, working as the Judge Advocate General's representative on the Joint Service Committee on Military Justice (JSC), has diligently protected the accused's due process rights in revisions to the Rules for Courts-Martial and Uniform Code of Military Justice. The Criminal Law Division also ensures that all SAPR trainings, including general military training and responder-specific training (e.g., SARC, SAPR VA training) adequately and accurately explains the rights of the accused, and provides guidance on ensuring that those rights are respected.

3.7 Provide an update on the Special Victims' Advocacy Program that affords legal consultation and representation for Service members, eligible adult dependents, and DoD civilian employees who report being a victim of sexual assault, to include how Congressional plus-up funding was spent to directly support this program. Describe how your Military Service is implementing the Special Victims' Advocacy Program for Department of Defense civilian employees. Provide an update on how you are informing Officers, NCOs, and junior Service members of the availability of SVCs/VLCs. Include your Military Service's metrics for measuring the success of the program. (SecDef Memo (14 Aug 13), *Improving Victim Legal Support*, p. 1 / DODI 6495.02, *Sexual Assault Prevention and Response (SAPR) Program Procedures* (7 Jul 15), Encl 2, para 6ac / NDAA FY16, Sec 532 / NDAA FY13, Sec 573)

Per direction of the Secretary of Defense and Vice Chief of Naval Operations, the Navy VLC Program was established in August 2013 to provide independent legal counsel to eligible sexual offense victims. The Navy VLC Program is staffed by one active duty O-6 Chief of Staff, one civilian Deputy Chief of Staff, 32 judge advocates, and 10 administrative staff who provide victim support at 24 naval installations around the globe. Establishment of the Navy VLC Program satisfies the "Special Victims' Counsel" mandate of §1716 of the 2014 NDAA. Navy VLC assist victims in understanding and exercising their reporting options, work with victims through the investigative and military justice processes, advocate for the victim's rights and interests, and help clients obtain access to other support services. VLC complement the care and support services received through other resources, such as the SAPR Program, the Family Advocacy Program (FAP), VWAP, and services offered by VAs, Chaplains, and healthcare providers.

The Navy VLC Program did not receive “Congressional plus-up” funding. However, the program did receive SAPR plus-up funding through the Department of the Navy and the Department of Defense. This funding was used toward a FY16 smartphone upgrade for VLC (to improve communications with clients), the first-ever VLC training symposium, and the retention of a local Bahraini attorney to represent victims in cases falling under local jurisdiction (victims have recognized rights in Bahraini court, but VLC are not recognized as victim representatives in Bahraini court, nor do they speak the language).

During FY16, Navy VLC assisted 780 newly reporting victims of sexual offenses, and continued to support 740 pre-existing clients. VLC advocated for client interests at 892 military justice and administrative proceedings (including pre-trial conferences, pre-trial motions hearings, Article 32 hearings, Special Courts-Martials, General Courts-Martials, administrative separation boards, and Initial Review Officer (IRO) hearings).

VLC duties include providing education briefs about the program to the Fleet, base and local community stakeholders within their area of responsibility. During FY16, VLC provided 540 outreach briefs to more than 28,000 Sailors, dependents, and other command personnel.

Pursuant to the FY16 NDAA, DoD civilian employees are now eligible for Navy VLC services. In order to better understand the legal intricacies applicable to Federal civilian employees, the Navy VLC Program funded a senior VLC to attend the Army’s Federal Civilian Employment course. Training from the Army course will be leveraged and provided to all Navy VLC.

The Navy VLC Program measures success in a variety of ways: at the Navy level, at the program level and at the victim level. On the Navy level, the Navy VLC Program is rigorously inspected on a routine basis by the OJAG Inspector General (IG), to include review of a VLC Self-Assessment Guide completed by each VLC office at the time of inspection, personal interviews with each VLC and support staff member, interviews with VLC Program leadership, and interviews of local SAPR stakeholders such as SARCs, VAs, and RLSO personnel. At the program level, the Navy VLC Program leadership collects a weekly report from each VLC accounting for new clients, appearances at proceedings, travel, results of specific cases, motions and other relevant data. These reports are consolidated and provided to Commander, Naval Legal Service Command (CNLSC) on a weekly basis.

It is through this weekly review of reports from each VLC that leadership is able to monitor trends in legal issues, policy conflicts, or practice trends, as well as the professional health and welfare of each VLC. In addition, CNLSC meets with the Navy VLC Program Chief of Staff by phone on a weekly basis. At the victim level, the Navy VLC Program conducts an online, anonymous and voluntary survey that all VLC clients are invited to complete at the close of their cases. Victim responses to the survey are incredibly positive. For example, 100% of clients responding to the survey indicated that they believe their VLC represented their personal interests and maintained their privacy. In addition, 100% of survey respondents indicated they would recommend VLC to others who have been victims of

sexual offenses. Remarkably, the survey comments reflect a satisfaction with VLC representation even when a victim's case did not end as he or she anticipated or desired.

Navy SARCs and SAPR VAs regularly collaborate with VLCs across the enterprise to ensure services are available to all victims Navy-wide. They ensure victims are aware of VLC services and discuss the role of the program along with benefits afforded under the program. SARCs also incorporate the VLC into all trainings offered by the SAPR Program, to include the 40 hour initial advocate training, unit SAPR POC training, SAPR VA refresher trainings, command briefs, SAPR-Civilian (SAPR-C) trainings, and annual SAPR SCT. When available, a VLC will attend and provide in-depth education for the audience. Additionally, VLC information, including a description of services as well as contact information, is often posted in main and common areas throughout installations and Base Housing Facilities.

3.8 Describe your future plans for the achievement of high competence in holding offenders appropriately accountable.

TCAP continues to support the implementation of the Adult Sexual Assault Program (ASAP) team in all fleet concentration areas. The early collaboration entails a multidisciplinary review of active cases at the Senior Trial Counsel and Supervisory Special Agent level and allows NCIS, the RLSO, and the SARC to troubleshoot sexual assault investigations, prosecutions, and victim care issues as they arise. Furthermore, this multidisciplinary model promotes early cooperation amongst stakeholders to improve quality of outcomes.

TCAP supports specialized military and civilian sexual assault training courses as described earlier. FY16 annual training efforts include: the coordination and development of Targeted Mobile Training Teams; site visits with flexible training sections on special victims crimes and process inspection; live online training, interactive web-based training conducted by subject matter experts; archived online training, web-based recordings of previous trainings that can be accessed as needed as part of local training plans; regionally-developed training plans; and Senior Trial Counsel-coordinated weekly or bi-weekly training, coordinated with TCAP and shared online.

NJS will continue to:

- Train commanders and senior leadership on SAPR at the SOC.
- Train lawyers from new accessions to senior USN, USMC, and USCG judge advocates on the technical legal requirements of SAPR law and policy.
- Train prosecutors and defense counsel on effective strategies for prosecuting and defending sexual assault cases.
- Train USN paralegals, USMC Legal Specialists, USCG Legal Technicians, trial counsel, special victims' counsel / VLC, and victim-witness assistance personnel on

a variety of SAPR issues.

Navy will continue to:

- Ensure NCIS investigates all allegations of sexual assault, to include both penetration and contact offenses.
- Monitor the timeliness of investigations within Navy as a measure of effectiveness in combating sexual assaults in the military.
- Use Judge Advocates as Preliminary Hearing Officers for Article 32 preliminary hearings in order to enhance competence in the preliminary hearings of sexual assaults.
- Coordinate with VLC to ensure victims are aware of their rights and benefits through ongoing training.

4. LOE 4—Advocacy/Victim Assistance—The objective of advocacy/victim assistance is to “deliver consistent and effective victim support, response, and reporting options.”

4.1 Summarize your efforts to achieve the Advocacy/Victim Assistance Endstate: “high quality services and support to instill confidence and trust, strengthen resilience, and inspire victims to report.” Include how competency, ethical, and foundational standards established in DoDI 6400.07, enclosure 2, are met.

(DODI 6400.07, Standards for Victim Assistance Services in the Military Community (25 Nov 13) / DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

- All SARCs and SAPR VAs are required to complete D-SAACP requirements prior to providing victim advocacy and assistance services. The requirements include screening for the position, which consists of an interview and verification of background check, leadership recommendation, and completion of initial training. As part of the D-SAACP certification process, all SARCs and SAPR VAs must agree to adhere to the Code of Ethics for victim engagement and advocacy and all training requirements. DSAID provides alerts to CNIC SAPR HQ and SARCS when they, or one of the SAPR VAs under their cognizance, are due to expire on their qualifications.
- SARCs and SAPR VAs are required to renew their D-SAACP certification every two years. A total of 32 Continuing Education Units (CEUs), including two hours of ethics, is required for recertification. The ongoing continuing education training emphasizes compassionate and trauma informed care for victims of sexual violence, and consists of webinars and face-to face trainings.
- SARCs monitor continuing education and credentials for both SAPR VAs and UVAs to ensure compliance.

- Navy SAPR Drills are conducted in June and December of each year and help ensure that the highest standard of service delivery is provided to victims. The drills help formalize installation testing procedures, response, and capabilities, as well as identify and correct any gaps in victim services.
- SARCs provide one-on-one supervision and consultation with UVAs when assigned to a case. There is meeting within the first 24 hours of a new case, and as frequently as needed thereafter with no more than a month between meetings.
- Monthly installation SACMGs continue to be an effective avenue in addressing any gaps in victim care and response to ensure that consistent, high quality, and effective support is provided to victims.
- The Navy SAPR Resource Guide provides easy access for SARCs and SAPR VAs to critical program information that helps enhance knowledge and effectiveness in one's role as a member of the SAPR team.
- Both Chaplains and Religious Program Specialists (RPs) are trained in SAPR policies and procedures and are important sources for directing victims to additional appropriate resources. Chaplains offer the additional service of offering a safe place for victims to share information in confidence.

4.2 Describe your current oversight processes over SAPR, to included reviewing credentials, qualifications, continuing education, inappropriate behavior, and revocation of certification, if appropriate. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 4, #1 &15, p. 7)

- CNIC HQ SAPR utilizes the D-SAACP process as the established method for reviewing credentials, qualifications, and continuing education for victim-sensitive personnel positions (SARCs and SAPR VAs). The D-SAACP process ensures that all SARCs and SAPR VAs meet both ethical and professional standards through verification of completion of training requirements, background checks, and recommendation letters from commanders/supervisors and SARCs. Any prospective SARCs or SAPR VAs who do not meet these standards are not permitted to work with sexual assault victims.
- In an effort to standardize continuing education, CNIC HQ SAPR continues to review and approve all SARC-generated SAPR refresher training provided to SAPR VAs. Monthly D-SAACP pre-approved refresher trainings are also provided to SARCs and SAPR VAs via both webinar and in-person annual SARC training. Additionally, CNIC HQ SAPR provides two-hour Ethics training for SARCs and SAPR VAs to address how to handle inappropriate behavior and ethics violations.
- For D-SAACP revocation, CNIC HQ SAPR requires installations to follow the written request procedures identified in D-SAACP (DoDD 6495.03), which is sent to the National Organization for Victim Assistance (NOVA) and the OSD SAPRO.

- Reports of sexual assault, inappropriate behavior, or criminal activity involving SAPR personnel triggers a Commander's Critical Information Requirement (CCIR) which is routed through CNIC SAPR HQ, Navy SAPR, VCNO, and SecDef. SARCs and SAPR VAs who are under investigation or found to have engaged in inappropriate behavior, committed a punitive offense, or violated the code of conduct/ethics will have their certification suspended and/or revoked and access to DSAID is immediately rescinded. Alleged or suspected criminal activity is reported to NCIS, the Commander, and the Human Resources Office (HRO) when civilian personnel are involved. The accused SARC or SAPR VA is notified of the allegation and that their ability to perform their SAPR duties has been suspended until the outcome of the pending investigation.

4.3 Describe your current progress to ensure SAPR personnel meet D-SAACP screening requirements prior to attending your Military Service's SAPR certification training. (DODI 6495.03, Defense Sexual Assault Advocate Certification Program (D-SAACP)(10 Sep 15), Encl 3)

- Navy requires all UVAs to undergo a rigorous screening prior to attendance in the 40-hour training that includes the completion of the background screening and an interview prior to selection for training. SARCs are responsible for facilitating this prescreening.
- Before a SARC or SAPR VA can begin executing their duties, they must complete the initial 40-hour training for SARCs and SAPR VAs. Training certifications and completed D-SAACP packets must be emailed and approved by NOVA and CNIC HQ SAPR. D-SAACP recertification requirements must be met in order to maintain uninterrupted access to DSAID for SARCs, as well as maintain a caseload for SAPR VAs.
- Commanders submit the potential Victim Advocate's application to NOVA only if the member is in good standing with the command, is deemed suitable for a sensitive position, and has no legal, mental, or behavioral issues that would obstruct the performance of duties as a SAPR VA.

4.4 Describe your Military Service's efforts to encourage SARCs and SAPR VAs to renew their certification at a higher level in order to increase the quality of victim assistance providers. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

- CNIC HQ SAPR continues to provide a variety of training opportunities in order for SARCs and SAPR VAs to gain more knowledge and experience in working with victims of sexual assault, further enhancing their skills and allowing them to be eligible to renew their certification at a higher level in order to increase the quality of victim assistance providers.
- Multiple efforts are used to ensure that SARCs and SAPR VAs are aware of training opportunities, to include email dissemination through RSARCs and bi-monthly

newsletters.

- However, despite these efforts, Navy SAPR VAs can be limited in their ability to advance their certification. The Navy SAPR Program has approximately five times the number of UVAs as the number of sexual assaults reported. Many may never provide response throughout their career, and are not able to obtain advanced certification. D-SAACP recertification requests have shown the SARCs and installation SAPR VAs have a higher likelihood of advancing their certification than UVAs.
- D-SAACP activity in 2016:
 - Packages approved: 3,774 (567 or 15% of them were renewals)
 - Only 3 or 0.5% of renewals are at a higher Level IV certification (2 civilian and 1 active duty SARC)
 - Only 1 or 0.1% of renewals is at a higher Level III certification (1 civilian SARC)
 - Only 9 or 1.5% of renewals are at a Level II certification (4 civilian SARCs, 4 civilian SAPR VAs, 1 UVA)
 - The remaining 554 or 97.7% of renewals are at a Level I certification (3 active duty SARCs, 533 UVAs, 6 civilian SARCs, 12 civilian SAPR VAs)
 - D-SAACP UVA certifications that expired in 2016: 2,680; 217 or 8.0% are officers; 2,463 or 91.9% are enlisted (expirations are a result of Sailors separating, not wanting to continue serving as a UVA, or not being needed by the unit)

4.5 Describe how you addressed any challenges that SARCs and SAPR VAs have in obtaining continuing education training, to included training on emerging issues and victim-focused trauma-informed care. (DODI 6495.03, Defense Sexual Assault Advocate Certification Program (D-SAACP)(10 Sep 15), Encl 3, para 3)

- UVAs continue to experience challenges in attending many of the continuing education trainings due to primary military responsibilities and/or inability to access online training in remote or deployed locations. Additionally, OCONUS locations have limited local training opportunities and travel to the continental United States (CONUS) training opportunities requires significant funding and planning.
- Despite these challenges, UVAs may retain their certification by completing continuing education requirements via video-teleconferences and online training. However, pre-recorded webinars do not allow for the level of interaction necessary to maintain proficiency.
 - D-SAACP active duty certifications renewed in 2016: 537 (533 or 99.2% are UVAs)
- To mitigate these challenges, SARCs offer SAPR VAs multiple opportunities to receive both in-person and on-line training about victim-focused trauma-informed care. This can include shorter duration of courses and varying training locations.

4.6 Describe your continued efforts to ensure that the 24/7 DoD Safe Helpline has

accurate contact information for on-base SAPR resources (i.e., Chaplains, SARCs, Military Police, and Medical Personnel). (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 4, #2, p. 7)

CNIC HQ SAPR ensures that the DoD Safe Helpline has accurate contact information for on-base SAPR resources (Chaplains, VLC, Military Police, and medical resources, in addition to SARCs and SAPR VAs) in a numerous ways. One of the most effective ways is by working closely with RSARCs throughout the Navy enterprise on an ongoing basis.

- SARCs are required to notify CNIC HQ SAPR immediately, via their RSARC, of any changes to phone numbers included in the Navy SAPR Program 3-tiered response.
- In addition, CNIC HQ SAPR developed a SAPR Personnel Update form that captures pertinent information (name, gender, position title, effective date, installation; DSN, office, and duty cell phone numbers; employment status and type, etc.) regarding SAPR personnel. CNIC HQ SAPR requires that RSARCs complete and submit this form immediately any time there is a change in SAPR personnel within their regions.
- On a quarterly basis, CNIC HQ SAPR distributes the most current 3-tiered response spreadsheet to the RSARCs to review and provide updates as necessary.
- CNIC HQ SAPR conducts monthly random spot checks to 10% of Navy installations (approximately 8 installations) to ensure that the phone numbers are accurate, appropriate voice recordings are in place, and that the phones are in working condition. These monthly spot checks also test the response time to ensure that calls are returned within the required 60-minute timeframe.
- Regional Operation Centers (ROCs), complete a SAPR validation report that includes 100% monthly validation calls to confirm the accuracy of the 24/7 response numbers and to ensure response is taking place within the required time frames.
- CNIC HQ SAPR also receives the results of the CNIC Battle Watch Captain (BWC) monthly random spot checks.
- Lastly, as a part of the DoD Safe Helpline semi-annual audit, CNIC HQ reconciles the audit by following up on all unconfirmed or non-working SAPR 24/7 response, SARC, and first responder (Chaplains, SARCs, Military Police, legal, and medical personnel) numbers to ensure accuracy. Any changes identified as a result of the reconciliation process are updated in the Safe Helpline database immediately.

4.7 Describe your efforts to make Service members aware of SAPR resources, such as the DoD Safe Helpline. (DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 2, para 6af(1) / Encl 3, para 1k & 1m)

For all Navy mobile applications developed by Program Management, Warfare (PMW)-240, the “Emergency Contacts” section includes the Sexual Assault Crisis Support phone number. Additionally, the recently published “LifeSkills” reach back app, which supports the LifeSkills curriculum provided during Navy initial technical training (i.e., A-school), provides a section on Sexual Assault resources, hotlines (including DoD), and intervention techniques.

- CNIC HQ SAPR has developed various marketing materials in order to publicize SAPR resources available.
- During SAAPM, CNIC HQ SAPR and the marketing team develop posters and table tents, distributing to installations across the Navy to use.
- Flyers, posters, and pamphlets are used across the Navy in high traffic areas such as workspaces, restrooms, Quarterdecks, Fleet and Family Support Centers, Chaplains’ offices, galleys, and bowling alleys.
- In multi or joint service environments, SARCs coordinate with and encourage other service SARCs to equally publicize SAPR Program information, offering assistance if required.
- Commands widely publish contact information for the DoD Safe Helpline and local resources on command website, the Plan of the Day, Plan of the Week, Ombudsman newsletters and other command publications.
- VLC provide information regarding victims’ rights and program services through base, armed forces and civilian newspaper and magazine articles, on-base radio and television programs, as well as through briefings to first responders such as medical personnel, VAs, SARCs, and law enforcement.
- OJAG’s Criminal Law Division and NJS ensure that SAPR resources are included in all training as appropriate, as described in questions falling under LOE 1.

4.8 Describe your efforts to ensure the requirement for both male and female victim input into the development of your Military Service SAPR policy. (SecDef Memo (1 May 14), *Improve Reporting for Male Victims*, p. 2) / GAO Report 15-284, *Actions Needed to Address Sexual Assaults of Male Service Members* (March 2015), p. 20)

Navy uses the results of the WGRA, WGRR, and Military Investigation and Justice Experience Survey (MIJES) surveys as well as information from focus groups comprised of victims of sexual assault to help shape and develop SAPR policy and initiatives. Victim feedback from these instruments also allows Navy to target outreach and risk reduction activities, and to determine which policies are helpful and effective. Additionally the results often identify issues and gaps within Navy SAPR policy that need to be improved upon or developed.

- Navy SAPR incorporates relevant research, survey results, and feedback into SAPR policy to ensure gender inclusivity.
- CNIC HQ SAPR works with the Regions to identify a voluntary victim to travel to the DoD Survivor Summit to represent Navy sexual assault victims. The victim speaks directly to the Director, ensuring victim input in the development of SAPR policy and programs.
- During FY16, SARCs disseminated the DoD Survivor Experience Survey (SES) to victims until its suspension, facilitating opportunities for both male and female victims' input to be included in the development of department wide SAPR policy.
- Additionally, Regions report soliciting both male and female victim input into the development of Service SAPR policy in their area of responsibility.
- Installations have increased training and educational materials on male victims and increased leadership engagement at SAPR working groups, focus groups and other meetings.

4.9 Describe your efforts to improve response to male victims, to include implementing and monitoring methods to improve reporting of male sexual assault allegations. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 4, #14, p. 7)

- Navy SAPR HQ collaborates with service counterparts and DoD on a male SAPR working group to establish improved response to male victims of sexual assault.
- The Navy VLC program represents both male and female victim clients, offering equal access to all representation and advocacy services.
- In addition, VLC regularly give briefs in large training environments including those where the student populations tend to be heavily male. The most recent of such briefs were in August 2016 at the United States Naval Academy (4,320 Midshipmen briefed) and at the Naval Submarine School (1,500 enlisted Sailors briefed).
- CNIC HQ SAPR includes information about male victims in trainings and marketing materials to raise awareness of male sexual assault and the Navy's efforts to prevent and respond to it. This aids the knowledge and skills of the SARCs and SAPR VAs thereby ensuring gender-responsive, culturally competent, and recovery-oriented response to male victims.
- Both male and female Sailors are recruited to participate in the SAPR program as UVAs to ensure gender inclusivity.
- SARCs facilitate critical element training for SAPR VAs on specific male barriers to

reporting, male physiology, myths and facts, societal influences, and specific resources for male victims of sexual assault to ensure victim advocate proficiency in responding to male victims.

- Program staff directs their prevention efforts to all victims of sexual assault, using gender-neutral language, gender-neutral examples, and emphasizing that males and females can both be victims.
- Training provided to medical providers emphasizes that males can be victims of sexual assault and that the SAPR response is gender-specific.

4.10 Provide your policy for facilitating requests from victims, who report a sexual assault, for accommodations during mandatory SAPR training (e.g., an alternate training setting to prevent re-victimization). (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 4, #16, p. 7)

- For FY16 CTC all hands training, the Facilitation Guide contains the following statement to ensure victims who report Sexual Assault are aware of and provided accommodations, if needed, during this mandatory training: *“Treat the discussion carefully as there may be victims in the audience. Allow those who have an adverse reaction to the video to leave the room if necessary; when possible, have a SARC, SAPR VA or UVA, or Chaplain available for participants to talk with, or have a list of Command resources available.”*
- For SAPR General Military Training, the Facilitation Guide contains the following direction: *“Note: Due to the sensitive nature of this topic, an alternative form of SAPR Awareness training should be made available PRIOR to the training taking place for those who may be uncomfortable discussing this subject in a group setting. This statement should be published in the command’s Plan of the Day/Plan of the Month or training plan.”*
- CNIC HQ SAPR ensures SARCs are providing SAPR services that are recovery oriented. Although the Regions do not identify this as a challenge, the SARC or SAPR VA can provide the required training individually.
- SAPR training begins with communication about the sensitive nature of the topic and the ability to opt out or leave the room during the training is stressed. Some commands report communicating the ability to opt-out ahead of the training to minimize impact to victims.
- SARCs, SAPR VAs, Chaplains, and/or counselors are onsite for anyone triggered by the SAPR training.
- NSA Bahrain SARC holds SAPR SCT trainings quarterly for victims and witnesses of sexual assault, sexual harassment, and domestic violence. They make victim confidentiality the highest priority, even in unrestricted cases, by limiting the number of

personnel with access to information and making available private meeting spaces during off-duty hours.

4.11 Describe your progress to improve victim care services and conduct Case Management Groups at Joint Bases, in Joint Environments, and for the Reserve Components. For the Reserve Components, describe Military Service's actions to promote timely access to Sexual Assault Response Coordinators by members of the National Guard and Reserves. Describe how you addressed any recurring challenges (if any) your Military Service may have had in this area. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 4, #11, p. 7)

- CNIC HQ SAPR's goal is to promote improved victim care services within joint environments, joint bases, as well as for Reservists. SARCs continued to integrate other Service UVAs onto the installation watch bill and into refresher training, discuss joint program measures as a part of the CO Toolkit briefing. SARCs also incorporate joint environment issues and Reserve Component requirements into their SAPR trainings to better educate other Services tenant commands and Reserve members.
- As previously discussed, CNIC HQ SAPR collaboration with CNRF and NSTC facilitated the ability to provide seamless SAPR support for NOSCs and NROTC units. The identification of SAPR POCs (a SARC or SAPR VA for NROTC units) within the Regions serves the purpose of answering SAPR-related questions and providing guidance at the regional and installation levels.
- SARCs also participate in the coordination of Memorandums of Understanding/Agreement (MOUs/MOAs) between Services to ensure continuity of care for all victims.
- SARCs and SAPR VAs also connect other Services' tenant commands and Reserve members with local crisis and counseling information depending on the location of the assault.
- Each reserve command is responsible for the 3-tier phone response for their respective local VAs and SARC. Further, members can go directly to the DoD Helpline website to locate the closest sexual assault advocacy resources in their immediate location.
- The Navy Reserve works directly with DoD helpline and CNIC to ensure accuracy of phone numbers provided on DoD helpline website.
- Lastly, SARCs work collaboratively with other Service SARCs to streamline victim response and support procedures within their joint bases.

4.12 Describe your current progress to inform Officers, NCOs, and junior Service members about your Military Service's expedited transfer request policy. (DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7

Jul 15), para 4o)

The process to ensure that Officers, Non-Commissioned Officers (NCOs) and junior Service members are informed of the expedited transfer policy is as follows:

- SCT includes information regarding expedited transfers and eligibility in unrestricted reports.
- Training to SAPR POCs, VAs, and the command triad includes information on the expedited transfer policies.
- SAPR Officers are provided training on all SAPR policies to include expedited transfers, and are expected to ensure their respective leadership is aware of and in compliance with policy.
- SARCs and SAPR VAs inform victims of the policy and eligibility requirements, when a report of sexual assault is made so the victim can make an informed decision.

4.13 In consultation with your SARCs, list the number of victims who reported a sexual assault, if any, whose medical care was hindered due to lack of Sexual Assault Forensic Examination (SAFE) kits, timely access to appropriate laboratory testing resources, mental health counseling, or other resources. Describe the measure(s) your Military Service took to remedy the situation. (NDAA FY06, Sec 596 / DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

- There were no reported instances where medical care was hindered due to lack of SAFE kits; timely access to appropriate laboratory testing resources; mental health counseling; or other resources.
- All MTFs with SAFE capabilities are fully stocked with a sufficient number of kits. Inventory data is provided to BUMED monthly and documented on the Navy Medicine SAPR Dashboard, with no noted issues during FY16.

4.14 Provide information on how you addressed problems or challenges, if any, with assigning SAPR personnel to handle unrestricted or anonymous reports of sexual assaults made by prisoners in a Military Confinement Facility. Additionally, describe your use of the DoD Safe Helpline as an anonymous reporting resource for prisoners. (Prison Rape Elimination Act (4 Sep 03) / Presidential Memorandum, Implementing the Prison Rape Elimination Act (17 May 12))

There were no reported problems or challenges. Regions have reported engaging with local military confinement facility POCs and Prison Rape Elimination Act (PREA) Coordinators to discuss PREA and provide them with DoD Safe Helpline phone numbers and access information for inmates.

4.15 Describe your leadership-approved future plans to deliver consistent and

effective victim support, response, and reporting options.

- It is imperative that all personnel involved in the NSTC NROTC SAPR program (the Command Triad, SAPR POCs, SAPR VAs, UVAs, NROTC SAPR Instructors, etc.) are up-to-date with training, policy changes, and updates to instructions. This is specifically of concern and challenging among NROTC units, where there is not always clear DoD guidance (apart from NSTC instruction) on Midshipmen victims of sexual assault. Each NROTC sexual assault case often comes with new and unique complexities. It's also imperative to reassess needs based on how applicable each training session is for its audience. Innovative projects such as the modernization of training and additional initiatives such as the crisis text line are goals for future funding to ensure continued effectiveness for support, response and reporting.
- The Chaplain Corps, in collaboration with DON SAPRO, provided three pilot retreats for victims of sexual violence through CREDO programs. These retreats allow victims to reestablish confidence and restore wholeness in relationships. Future retreats are anticipated.
- The JAG Corps will continually assess demand for VLC services to ensure the Navy has the appropriate number of VLC in the right locations to be responsive to victims' needs.
- During FY16, the Navy VLC Program added three billets in areas of "Fleet concentration" requiring additional VLC representation (one each in San Diego, CA; Norfolk, VA; and Yokosuka, Japan). In FY17, the Navy VLC is adding another billet in Sigonella, Italy.
- Traditionally, effective communications with clients has been a challenge. However, during FY16 all VLC in CONUS and Hawaii received a smartphone upgrade to improve communications with clients including e-mail, texting, and FaceTime capabilities not previously available. In FY17, all VLC OCONUS will receive a similar upgrade.
- CNIC HQ SAPR is planning a revision of the initial SARC training. The goal for this next training revision will allow opportunities for active learning while also providing a strong foundation for key SARC responsibilities of data and case management, SAPR VA supervision, and SAPR Program management/assessments. Additionally the training will allow SARCs to more effectively provide training and guidance to COs, triads, UVAs, and unit personnel to ensure a cohesive understanding of primary prevention, including evidence-based primary prevention strategies. The SARC Training will provide information on primary prevention, including the spectrum of prevention, healthy sexuality/relationships, engaging men in prevention, and active intervention techniques. Additionally, SARCs take a central planning role for Sexual Assault Awareness and Prevention Month (SAAPM). Many SAAPM events and activities aim to engage participants in learning more about primary prevention and the role they play in prevention.

CNIC HQ SAPR will also continue to evaluate SAPR workload across the enterprise to ensure adequate allocations of SARCs and SAPR VAs as newer initiatives are implemented. CNIC HQ SAPR will work with Regions to ensure SARCs and SAPR VAs receive gender-inclusive training that enhances their skills and increases their victim advocacy knowledge to ensure a superior level of excellence for all victims within the Navy.

5. LOE—Assessment—The objective of assessment is to “effectively standardize, measure, analyze, assess, and report program progress.”

5.1 Summarize your efforts to achieve the Assessment Endstate: “responsive, meaningful, and accurate systems of measurement and evaluation into every aspect of the SAPR program.” (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

Navy recognizes that feedback mechanisms are essential to measuring and evaluating the SAPR program as well as determining the effectiveness of programmatic efforts. Collaboration with OSD SAPRO, the other Services, and engaged stakeholders allowed for the standardization of DoD-wide SAPR survey efforts such as the WGRA, the MIJES and Quick Compass of SAPR-Related Responders (QSAPR). Navy gathers data from these surveys and associated focus groups, along with sexual assault reports and other available data, to evaluate the SAPR program, inform strategy and policies, and tailor effective initiatives.

During FY16, Regions sustained engagement in proactive methods to incorporate meaningful and accurate systems of measurement and evaluation into every aspect of the SAPR Program. Regions/Installations continue to use the monthly Sexual Assault Case Management Groups (SACMG) as a key means of evaluating the SAPR Program. The SACMG provides an avenue to assess the quality of care and support being provided to sexual assault victims and provides a method to review the effectiveness of various resources being provided within each case. FFSCs also continue to administer quarterly and annual surveys that are provided to FFSC clients to complete anonymously in order to provide feedback on the SAPR services received. Lastly, FFSC Certification Reviews and CNIC IG directed reviews were routinely conducted at installations in an effort to gauge the effective delivery of SAPR services and compliance with policy at all Navy installations.

SARCs review SAPR portions of the DEOCS and evaluate areas with service member’s reports of perceptions of the SAPR climate within their organization, perceptions of safety, perceptions of chain of command support, insights into knowledge and use of intervention techniques along with restricted and unrestricted reporting knowledge. SARCs also use the OPNAV 1752/3 Command Assessment Tool to assess the consistency and effectiveness of the SAPR Program within their assigned AOR.

RSARCs conduct annual assessments of installation SAPR Programs to evaluate effectiveness of assigned SARCs and SAPR VAs, including review of administrative duties, on-going prevention training, support systems and services, DSAID procedures,

SACMG processes, command coordination, and other agency collaborations. Of note, CNREURAFSWA implemented an installation scorecard to assess training, SARC and SAPR VA accessibility, monthly required SACMG meetings, and incident tracking data. The region also used victim service surveys and/or verbal feedback to SARCs and other providers to gain insight into the challenges of reporting a sexual assault. Findings were used to provide training to appropriate stakeholders to improve responsive care and outreach.

NSTC commands continue to update and assess training processes, prevention measures, and intervention throughout the command and assess victim support. Analyzing post-training course critiques to understand not only the training effectiveness but also the command climate for both staff and students is an additional assessment technique. For calendar year (CY)16, RTC has seen an increase in SAPR reporting, predominantly for sexual assaults occurring prior to service, which provides a positive indicator of the effectiveness of training and awareness programs targeted at recruits and staff.

USFFC actively engaged in the development and implementation of the SITREP Data Tool which now provides Fleet Commanders the ability to query, view, and analyze standardized data and automated reports for sexual assault and other destructive behaviors. Additionally, a dashboard was developed and other recurring reports were automated to improve accuracy and display timeliness with trends and to better target prevention efforts.

Using the SITREP Data Tool and DSAID data, USFFC more accurately assess each Line of Effort of the SAPR program:

- Prevention is the main focus and the data continues to reinforce the Fleet's effort to focus on front line supervisors and the micro-climates they lead as the campaign center of gravity. Specifically tracked, measured, and evaluated are differences between:
 - male victim and female victim sexual assault,
 - contact sexual assault and penetration sexual assault,
 - peer to peer sexual assault and senior-subordinate sexual assault,
 - assaults that may take place in and around the workplace as compared to those taking place away from the workplace,
 - incidents that include alcohol and those that do not, and
 - assaults reported within 30 days of an assault, assaults reported more than 30 days after the assault, and assaults reported without date.

All of these inter-related data measures are critical to understanding best application of prevention programs.

- Assessing investigative processing is unique in that each case must be processed on its own merits, and there must be a balance between taking care of victims as well as maintaining due process for alleged offenders. The metrics associated with case processing centers on an understanding of capacity and potential choke

points in the system due lack of capacity. This year the choke point is outside of Navy control – the caseload for specific civilian attorneys hired by alleged offenders is impacting court dockets.

- For accountability, the Fleet focuses on ensuring that command leadership is both accountable for the performance of their commands, is aligned with Navy messaging, and is processing reported cases properly. The measure of performance for this LOE is drawn from Fleet Command Climate surveys and Sailor confidence in command leadership teams. This has steadily improved over the past two years, with this year's confidence rating at 94%.
- Victim advocacy performance is measured using Command Climate Surveys, MIJES, and the bi-annual Workplace Gender and Relations Survey. Sailors remain confident that they will receive the best care should they choose to report their assault, and consistently test high for knowledge of the services for both restricted and unrestricted reports of sexual assault.

PACFLT commands reported progress towards measuring and evaluating numerous aspects of the SAPR program. The PACFLT SAPRO maintained databases of sexual assault SITREPs, first Flag Officer Reports, and adjudication results. They analyzed the combined data on a monthly and quarterly basis to determine trends and adherence to DoD, DON, and OPNAV SAPR policies. Units self-assess in accordance with guidance from Naval Inspector General (NAVINSGEN) and OPNAVINST 1752.1C and the checklists provided therein. Local SARCs also use these checklists to assess commands at their installations.

Navy VLC Program maintains metrics via an internal weekly report. In addition to routine and personal management of individual VLC, this weekly data assists program leadership in evaluating caseload levels as well as specific counsel performance. Additionally, victims are invited to fill out a Victim Satisfaction Survey at the close of VLC representation. Participation is voluntary and responses are confidential. Victims are specifically asked for suggestions to improve the VLC Program. VLCs also encourage victims to participate in the broader DoD MIJES. Finally, in FY16, nine Navy VLC Program offices in three regions were assessed by the OJAG IG as part of the regular required inspection with no noted deficiencies in VLC performance of duties, representation of clients, or program operations.

Trial counsels manage metrics that permits caseload evaluation at the regional and individual counsel level. The Criminal Law Division provides legal review of DoD surveys prior to promulgation to the Fleet, such as the Workplace Gender Relations Survey, and the MIJES, which are used to evaluate the effectiveness of the SAPR program. The Criminal Law Division also is heavily involved in the use and maintenance of DSAID.

Navy continues to assess the effectiveness of prevention and response methodologies through collected data, metrics analysis, surveys, focus groups, and other feedback mechanisms. As Navy knowledge of circumstances surrounding these incidents

increases, the ability to target prevention efforts and provide best response improves.

5.2 Provide an update on oversight improvement activities that assess SAPR program effectiveness. Include frequency, methods/metrics used, findings, and corrective actions taken (e.g., program management reviews and Inspector General compliance inspections). (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

Oversight of Navy's SAPR program effectiveness involves the entire chain of command from the CNO to individual command leadership. Oversight activities include the following:

Senior Navy leadership plays a critical role by providing oversight, guidance, and review of SAPR programs. The SAPR Director meets one-on-one with the CNO to discuss program updates and initiatives and Navy four-star Fleet Commanders, led by the CNO, meet quarterly via video teleconference to discuss SAPR issues and program updates. The Navy SAPR CFT meets monthly with stakeholders to discuss progress and share best practices. SAPR is an ongoing agenda item at the USFFC Task Force and PACFLT Executive Steering Committee meetings. Navy senior leadership have regular, face-to-face engagements with the fleet during on-site visits where senior leaders hear directly from Sailors and share information about Navy SAPR initiatives. Echelon 2 and 3 Commands, as well as Regional SAPR Officers, provide a means to disseminate information and best practices to the regional and local levels.

The Secretary of the Navy requires NAVINSGEN to inspect, investigate, assess, or inquire into important matters, including SAPR-related programs on all command inspections and area visits. These inspections offer additional oversight to assess compliance and quality of programs, and ensure the quality of SAPR efforts executed across the fleet. The Navy SAPR Office provides subject matter support to NAVINSGEN as requested.

The inspection program relies on performance metrics obtained through existing case management systems, surveys, and qualitative assessments from OJAG, leadership, SMEs, client commands, military judges, and command members. Periodic command inspections and area visits include an assessment of command SAPR program management with findings and required corrective actions provided to the commander. Items reviewed/verified during this process include:

- Access to the most up-to-date instructions, NAVADMINs, and training information.
- Training completion certificates and appointment letters for the SAPR PMs, SAPR POCs, and UVAs.
- Commander receipt of the Command Toolkit Brief from the SARC within the appropriate timeframe of assuming command.
- Command SAPR training information.

- Dissemination of SAPR information (Safe Helpline, first responder contact information, available resources, etc.) throughout the command.
- SAPR information incorporated into Command Indoctrination training.
- Watchstander/Duty Officers training and response protocols for sexual assault reporting.
- Command actions to establish an environment free of sexual assaults and sexual harassment.
- Support and integration implemented across commands programs (Command Indoctrination, NADAP, EO, and FAP).
- Command emphasis on prevention of sexual assault and sexual harassment.
- Identification of best/promising practices.

Navy also assesses the success of its SAPR program through periodic surveys of Sailors. Survey results are compared to actual Restricted and Unrestricted Reports of sexual assault to assess Service member confidence in the system and willingness to report. The following surveys were used in FY16:

- WGRA – Estimates of sexual assault prevalence in the Navy are based on the percentage of surveyed Sailors who had at least one experience of unwanted sexual contact (which includes contact, attempted penetration, and penetration offenses) in the previous 12 months, and represent both male and female victims of various offense types.
- MIJES – The MIJES is an anonymous, voluntary, ongoing survey designed to assess the service use and satisfaction of sexual assault victims who completed the investigation and military justice processes. Active duty military members who made a formal report of sexual assault (restricted or unrestricted) and who have a completed investigation since October 2014 are eligible to participate in the survey. This information will play a vital role in assessing Navy's progress, and help shape future policies and programs.
- "A" School Exit Surveys – Survey data from this voluntary and anonymous survey indicates that Sailors in "A" School training environments have a low incidence rate of sexual assault compared to other Navy environments. Results directly reflect the efforts made in training environments and the engagement of local Commanders. This survey underscores Navy's commitment to seeking insights and assessing progress in combatting sexual assault. NETC and DON SAPRO continue to develop and expand their collaborative efforts to conduct sexual assault surveys of all Navy "A" School graduates.

- DEOCS – Navy DEOCS 4.0 includes SAPR climate questions containing seven measures: (1) perceptions of safety, (2) chain of command support, (3) publicity of SAPR information, (4) unit reporting climate, (5) perceived barriers to reporting sexual assault, (6) unit prevention climate with bystander intervention, and (7) restricted reporting knowledge.

These surveys provide leadership and the SAPR program with direct feedback from deckplate Sailors. Local commanders can assess their command climate in comparison with Navy and DoD averages, and take appropriate action as necessary to address specific areas of concern. Examples include local training on proper reporting channels, intolerance of retaliation, and effective intervention methods.

In addition, Navy conducts the following assessments at the Fleet and Regional levels:

- The Naval Legal Service Command (NLSC) Inspector General includes SAPR in biennial self-assessments and on-site inspections. The inspection program relies on performance metrics obtained through case management systems, surveys, and qualitative assessments from OJAG, NLSC leadership, and command members. For example, inspectors meet with VLC, local commanders and other Program stakeholders (e.g., SARCs and VAs) to assess legal compliance with the requirements of the SAPR program. Inspectors also meet with legal assistance attorneys, prosecutors, and defense counsel, to ensure that all NLSC components are compliant with existing law and regulation. TCAP inspects the Navy's prosecution offices during the course of their annual TCAP Mobile Training Teams, as well as during the NLSC IG's inspections.
- The Chief of Navy Reserve's Inspector General's Command Assessment Team assesses subordinate commands for SAPR program compliance. These assessments are not only used as a means to assess program compliance, but to provide training and education to SAPR POCs and UVAs throughout all echelons of command. Monthly phone audits are also conducted to ensure program compliance.
- CNIC HQ SAPR continuously reviews the SAPR Program through the RSARCs, to include: monthly auditing of DSAID data entry, monthly monitoring of 24/7 on-call installation response, and Regional monthly verification of 24/7 Navy SAPR response numbers for DoD Safe Helpline. Corrective actions in DSAID are addressed through taskers and SARCs are provided 1-2 weeks to address any errors in the system. Any findings with the 24/7 response system that require corrective action are addressed immediately and results are typically provided within four hours.
- CNIC HQ SAPR implemented bi-annual installation SAPR Drills to allow for a systematic review of the SAPR Program response and the knowledge of SARCs, SAPR VAs, first responders, and commands. Installations identify a mock scenario based on local trends or challenges and test the response system. It is followed by

an after action review to determine strengths, challenges, and areas for improvement. Findings and best practices are shared during CNIC SAPR HQ's monthly regional SAPR collaboration working groups with RSARCs and SAPROs.

- USFFC SAPR assessment is accomplished on three cycles: monthly; quarterly; and annually. This allows the Fleet to isolate patterns in destructive behavior data that help focus prevention efforts and identify when certain areas of the Fleet lag others in their prevention efforts. Examples of this assessment include, but are not limited to, operational afloat units as compared to afloat units in overhaul facilities, aviation squadrons that are shore based and deploy in detachment format ashore overseas and aboard ship as compared to aviation units that deploy as a composite squadron to afloat units, expeditionary teams that deploy from their CONUS parent command to overseas location and aboard deploying ships, attack submarines as compared to submarines with blue-gold rotational crews, and the fielding of new fleet units which will have rotational crews. The expeditionary environment of the Fleet make an understanding of Fleet units from a model based on Type Commander more relevant than an installation or geographic model.
- At RTC and OTC, program effectiveness is assessed at the end of a course for students, and during the command climate assessment for staff members. Staff members are also provided periodic updates to SAPR initiatives by Plan of the Week entries, additional SAPR display materials, and training by SAPR POC, VAs and FFSC personnel. On a semi-annual basis, Officer Development (OD) and NSTC collect reports from NROTC units answering questions and providing feedback on each unit's personnel who hold SAPR roles, the university's involvement in prevention programs, best practices, and feedback on training. Periodic SAPR webinars given by the NSTC SAPR POC give COs, XO's, NROTC instructors and RSARCs the opportunity to bring up questions and discuss feedback to improve their programs.
- Regions participated in USFFC Task Force and CPF Executive Steering Committees (ESCs), reviewing reports on the number of restricted/unrestricted reports, basic incident demographics, and installation SAPR initiatives. Regions also report continuing efforts to monitor 24/7 on-call response rates, timely and accurate DSAID entry, and monitoring of all sexual assaults at installations in an effort to draw trends from demographics. Assessment best practices from regions include:
 - Commander Navy Region Naval District Washington (CNRNDW) - SARCs routinely assess UVA level of understanding of victim-centered services during trainings and weekly turn-over of watchbill responsibility. Based on this ongoing assessment, SARCs implemented comprehensive role-play during turnover to ensure the highest level of effectiveness in providing direct services to victims. The RSARC also provides mock IG inspections of the SAPR Program compliance yearly.
 - CNRNW - In May 2015, SAPR offices (SARC, SAPR VA, and VLC)

relocated to increase visibility and access to care. In FY16, the number of initial reports and client walk-ins significantly increased, while accessibility to UVAs has increased as well.

5.3 Provide an update on your efforts to ensure integrity of data (i.e., accuracy, completeness, etc.) collected in the Defense Sexual Assault Incident Database (DSAID). (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 5, #2, p. 8)

DSAID data is used by Navy to assess progress, conduct trend analysis, and tailor effective initiatives across the prevention, investigative, accountability and advocacy lines of effort. To ensure data integrity access to DSAID is limited to SAPR program personnel with a need to enter, correct and, on a limited basis, access information collected. Navy conducts quarterly DSAID audits for consistency and completeness of data.

CNIC HQ SAPR works with SARCs and RSARCs to ensure 100% of sexual assault reports are recorded in DSAID with a 0% error rate. CNIC HQ SAPR hosted multiple DSAID refresher trainings and support webinars to assist SARCs with increasing their data entry, quality assurance, and case management skills. RSARCs are also provided monthly DSAID Quality Assurance (QA) reports from CNIC HQ SAPR utilizing the DoD Quality Assurance Tool that was adapted from the tool originally developed by CNIC HQ SAPR. RSARCs are instructed to work with SARCs to ensure that gaps and inconsistencies within DSAID are corrected by SARCs.

SARCS use a DSAID checklist to ensure all the information required is included in the data entry process. SARCs work collaboratively with NCIS, command legal, and other SACMG members to obtain case numbers, initial dispositions, and other critical data for DSAID entry. RSARCs also conduct ongoing installation DSAID case reviews incorporating the CNIC/DoD checklist. CNIC HQ SAPR developed a document of standard operating procedures that is disseminated monthly with the QA report that provides specific guidance on the management of cases and clarifies process and procedures within DSAID. Additionally, CNIC HQ SAPR guidance helps ensure data completeness by requiring RSARC review prior to case closure or transfer of cases.

The CNIC FFSC Certification Review standards incorporates a requirement for five percent of SAPR cases (minimum of 10 cases) to be reviewed at each site. This review is conducted off-site by CNIC HQ SAPR utilizing a standardized assessment tool based on DSAID data entry requirements. This review assists the sites in addressing any negative quality assurance trends through corrective action.

On a monthly basis, NCIS analysts compile a list of discrepancies that occurred during the interface between the NCIS report writing system and DSAID. NCIS agents review all of the discrepancies and make administrative corrections, where possible, at the HQ level. The remaining discrepancies are forwarded to the appropriate field office for correction. The field office notifies HQ when the correction is made and this is verified on the next discrepancy report.

Judge advocates from OJAG's Criminal Law Division are responsible for data input of dispositions of all Unrestricted Reports of sexual assault in the DSAID Legal Officer module. Legal Officers also coordinate with NCIS and CNIC for year-end data analysis, as well as throughout the fiscal year to ensure data integrity. Coordination ensures accurate input of cases into DSAID, and has resulted in updates and changes to DSAID to permit more accurate data entry.

5.4 Provide an update on your efforts to develop and implement a survey, or leverage existing military training surveys that will provide comprehensive and detailed information to decision makers about sexual assault and other sexual misconduct allegations that occur during initial military training, including basic and subsequent career-specific military training. (GAO Report 14-806, DoD Needs to Take Further Actions to Prevent Sexual Assault During Initial Military Training (March 2015), p. 44)

In a collaborative effort between NETC and DON SAPRO, a survey is offered to Navy accession Sailors as they graduate from their initial skills training ("A" School). The survey collects data on attitudes and perceptions, command climate, and sexual assault circumstances of those Sailors. This effort provides a tool for commanders by establishing a metric that captures the incidence of sexual assault (whether reported or not) among student Sailors and collecting relevant information on their experiences and perceptions. This survey data helps Navy assess and refine local and Department-level sexual assault prevention strategies during initial military training.

5.5 Describe your progress in assessing SARC/SAPR VA training effectiveness. Include actions taken to implement training enhancements. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 5, #21, p. 8)

One of the primary responsibilities of the SARCs and SAPR VAs is to provide training to command personnel, the command triad, and to SACMG members. Additionally, they conduct training for Unaccompanied Housing (UH) Resident Advisors (RA). SARCs use pre-approved, standardized curriculums for these trainings. This ensures that the material is consistent with Navy messaging, includes current policy, and contains adult learning theory concepts. Training is evidence-based and can be tailored to meet the unique needs of individual locations.

When new training curriculums are introduced by CNIC SAPR HQ, a "showcase" is conducted for SARCs and SAPR VAs to introduce the new material via a "Train the Trainer" webinar. This ensures consistent and standardized delivery of training material. During the October 2015 SARC training, several workshops on facilitation and training techniques were offered to bolster the SARCs' skills.

Regional best practices also include the following:

- CNRH - SAPR staff developed a "Train the Trainer" class for unit SAPR POCs after learning that they were either not comfortable with the training material, lacked

“trainer/facilitator skills,” and/or lacked required basic knowledge on adult learning principles.

- EURAFSWA - Evaluations are provided for all SARC administered training to evaluate the effectiveness of training and to identify areas of improvement. Evaluations are also used to determine the effectiveness of the training by measuring the knowledge gleaned from individual attendees.
- CNRSE - Hosted the Catharsis “Force of Awesome” training in February of 2016 for all SARCs and SAPR VAs in the region. This four-day intensive training enabled participants to identify strengths and weaknesses in presentation content and delivery, emphasized an understanding of why society tends to blame victims; and how to best break down audience resistance to the subject matter. The program identified methods of creating positive rapport with specific audiences. In addition, this training program provided participants with the framework necessary to design effective presentations that enable audiences to shift attitude into powerful practice.

5.6 Describe your efforts to assess compliance of commanding officers in conducting organizational climate assessments for purposes of preventing and responding to allegations of sexual assault. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 5, #17, p. 8)

The climate assessment assists unit commanders in evaluating their unit's equal opportunity and organizational effectiveness areas that impact readiness. Preventing and responding to sexual harassment and sexual assault are inherent to the commander's responsibilities as it affects readiness and welfare of unit members.

Commanders are required to conduct a command climate assessment within 90 days of assuming of command, and annually thereafter. ISICs and higher echelon commanders use appropriate tracking processes to ensure compliance of such climate assessments.

The Navy Performance Evaluation System, BUPERSINST 1610.10D CH-1, requires that commanders, commanding officers and officers-in-charge fitness reports include whether or not a command climate assessments was conducted per Navy Equal Opportunity policy. Reporting seniors must clearly document the failure to conduct the required command climate assessment.

5.7 Describe your policy and management control procedures for ensuring that Service members, who reported a sexual assault and are separated for Non-Disability Mental Conditions, are properly counseled, in writing. Additionally, describe how your Military Service ensures that the separations are processed and recorded in accordance with DoDI 1332.14, Enlisted Administrative Separations (4 Dec 14). (DoD IG Report 2016-088, Evaluation of the Separation of Service Members Who Made a Report of Sexual Assault (9 May 16), p. i)

When a Navy Service member is administratively separated for a non-disability medical

condition, a discharge physical/mental health examination is performed. During the examination, the member receives counseling/education about various symptoms and potential concerns relating to their non-disability medical condition, including information on seeking further care. Additionally, if, during the exam, something is discovered that requires further evaluation, the appropriate referrals are made. Resources for Department of Veterans Affairs (Veterans Affairs) care are provided during this time as well. The member is informed, per NAVPERS 1070/613, that their medical condition is not a physical disability, but, may be a disqualifying factor in determining suitability for further naval service. This information goes into the member's military electronic health record, per DoDI 1332.14, Enlisted Administrative Separations, which is available to the member or forwarded to the Veterans Affairs or civilian facility at the member's request. The Military Treatment Facilities and the Veterans Affairs routinely collaborate to ensure proper record transfer for patients that will be entering the Veterans Affairs system.

Navy ensures that such separations are appropriately processed and recorded in accordance with policy. NAVINSGEN conducts inspections of these separations as listed in 5.2 above and include analysis of the effectiveness of internal audit procedures, regulatory compliance, systems management, internal controls, and other associated requirements. Inspection results are forwarded to the command and ISIC to correct deficiencies and take other actions, as required, to ensure future compliance.

5.8 Describe actions taken to integrate recent survey (e.g., MIJES, WGRR, and QSAPR) and focus group results into your Military Service SAPR policies and training programs. (DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 3, para 1s / Encl 12, para 1f)

In FY16, Navy developed and instituted CTC, based on specific feedback from Fleet DEOCS surveys concerning the lower levels of trust in mid-level (or first line) supervisors to address destructive behaviors and emphasize proper decision-making. The training is designed to help Sailors determine how to make the right decisions and behave professionally when facing difficult situations. CTC blends scenario-based videos with facilitator-led discussions that address the idea that all hands must take ownership of enhancing a positive and professional climate within their commands and work environments.

Navy will continue efforts to combat destructive behaviors across the Fleet, while reinforcing and building upon Navy Core Values in FY17 with "Full Speed Ahead" (FSA). FSA challenges Sailors at all levels to think critically about values, decision-making, and leadership with the goal of personal betterment and positive culture change. It will further emphasize the influential role of the Sailors in the "Critical Middle" (E5-E8, O1-O4) and their responsibility to motivate and shape Junior Sailors as well as their access to Sailors higher in the chain of command.

Data from the WGRR was integrated into CNRF Flag level talking points to inform U.S. Fleet Force Command's Executive Steering Committee. This data was also analyzed to assess overall program effectiveness and current trends, which was then briefed to the

RCC Commanders and NOSC Commanding Officers prior to assuming command. Additionally, the Force SAPRO conducted monthly telecons with subordinate SAPR POCs to disseminate information and discuss emerging trends.

Based on the QSAPR surveys, SARCs indicated they spent a majority of time conducting training, outreach, and administrative duties. Navy is in the process of revising the roles and responsibilities of the SAPR POC in OPNAVINST 1752.1C to allow SARCs to devote more of their time on victim support.

5.9 Describe your leadership approved future plans, if any, for effectively standardizing, measuring, analyzing, assessing, and reporting program progress.

Navy will continue analyzing data and programs at all levels in order to implement policies and procedures to improve program effectiveness. Monthly DSAID audits, 24/7 on-call audits, and site visits will be performed to ensure adherence to policies and procedures while feedback from command climate assessment questions, surveys, inspections, DON SAPRO visits, and FFSC certification reviews will be used to support this process.

CNIC HQ SAPR will continue to work with Regions to analyze data and programs in order to implement policies and procedures that promote an environment that promotes safety and encourages reporting. The SAPR staff will continue to perform monthly DSAID audits, 24/7 telephone audits, and site visits to ensure that Regions are adhering to policies and procedures. Regions will also use feedback from Command Climate Assessment questions, surveys, IG inspection, DON SAPRO visits, FFSC Certification reviews, and bi-annual installation SAPR Drills to support this process.

Regional future plans include:

- CNRSW - SARCs will continue to conduct annual SAPR assessments to ensure commands, including non-geographically located NROTCs, NRDs and NOSCs, are in compliance with DoD and Navy policies and procedures, note best practices, identify discrepancies in implementation and execution of programmatic parameters, and set the foundation for developing initiatives, and improvement.
- CNREURAFSWA - The Bahrain Prevention Project, projected to be implemented in FY17, will implement prevention initiatives to decrease incidents of sexual assault and other destructive behaviors, improve reporting, and measure new data to compare/correlate with the base line data. Best practices, lessons learned, and a model for implementation will be exported to other installations.
- CNRNW - Developing a local survey to support command compliance, which will be provided to the unit SAPR POC or Command Master Chief/COB. The survey will inquire about ways the Installation SAPR Team can more effectively support tenant commands to ensure program compliance, standardization, and consistency.

Navy Justice Information System (NJIS), a web-based application is in development for

the DON criminal/military justice communities, including law enforcement, criminal investigations, command actions, judicial actions, and corrections. NJIS will be an integrated “cradle-to-grave” DON information system for reporting data ranging from an initial incident to the details of investigation, prosecution, and confinement. NJIS will have a module designed for VLC which will allow each VLC to track their cases and VLC Program leadership to track and review detailed information regarding progress of the VLC Program. Additionally, NJIS will be used to document court-martial and non-judicial punishments and track the review process of the Navy and Marine Corps appellate leave/appellate review activities. NJIS is designed to replace Consolidated Law Enforcement Operation Center (CLEOC), Case Management System (CMS), and Corrections Management Information System (CORMIS).

NCIS will continue to issue a comprehensive Annual Crime Report that details the number of sexual assault allegations received, the status of the offender and victim, and the conviction rate among other metrics.

BUMED is establishing data collection procedures for the standardized release of informational data through a monthly Dashboard that provides leadership the ability to identify and monitor trends within their command. Navy Medicine will continue to foster Inter-Service SAMFE training with the goal of providing all DoD beneficiaries standardized medical forensic care.

OPNAV N172 is working in with the CNO's Strategic Action Group to examine data, observe existing trends, and tailor future efforts around analytical observations. Currently, Navy SAPR is focused on eliminating senior-subordinate incidents, male-related assaults, and decreasing the latency between date of incidents and date of initial report. While most metrics will remain consistent over the course of many years, Navy SAPR will continue to adapt to the evolving issues and tailor metrics appropriately.

Navy SAPR has contracted the Center for Naval Analysis to examine the relationship between sexual assaults that occur within a command and all other destructive behaviors. This holistic approach of the study is aimed at identifying underlying conditions that exist which allow sexual assaults to occur.

6. Overarching Tenet: Communication and Policy

6.1 Describe your efforts to post and widely disseminate information on male victim sexual assault prevention and response. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

Resources and information for reporting and responding to male and female sexual assault is disseminated to Service members, eligible dependents, and civilian personnel using a variety of media designed to reach the widest audience possible. Commands market information via brochures, posters, websites, and PSAs that describe the SAPR program and list key support personnel and service providers. In addition, the following measures add to Navy-wide communication and dissemination of male victim prevention and response:

- SARCs educate commands on male prevention and response and assist with obtaining gender inclusive marketing materials (brochures, pamphlets, wallet-sized cards, posters, newsletters, bulletin boards, command plans of the day/week, marquees, websites, etc.) to facilitate awareness and education.
- SARCs actively recruit male VAs and when possible have a male VA available on the watch bill to respond to sexual assault victims. Male UVAs are also encouraged to co-facilitate SCTs with installation SARCs to present a male presence within the SAPR Program.
- NJS training for legal practitioners and commanders emphasizes that SAPR is gender-neutral, and reinforces that many victims of sexual assault are male. For example, the current SAPR training scenario used in the Senior Officer Course (SOC) includes a male victim of sexual assault. OJAG's Criminal Law Division ensures, as part of its standard legal review, that policy and training is gender-neutral.
- CTC training presented to all Navy personnel included cases of male sexual assault and drew a clear distinction between hazing and sexual assault.
- Officer accession SAPR training presentations reiterates that men as well as women can be victims of sexual assault and that regardless of gender each victim will be cared for with dignity and respect. Required training such as the pre-commissioning video for Officer Candidates at OTC and senior midshipmen in NROTC, DON SAPRO "Not on My Watch" given to RTC, and all SAPR-L, SAPR-F and "Above Board" training given to NROTC midshipmen, all portray both male and female victims.
- Director, 21st Century Sailor holds engagements in fleet concentration areas and reiterates that sexual assault is gender neutral. To ensure widest dissemination of information, the Director posts information and embedded video on SAPR and relevant 21st Century Sailor subjects on the NavyLive blog.
- Fleet Commanders participate in quarterly SAPR-dedicated video teleconferences with the CNO to discuss trends and recommend future initiatives, including those specific to male victims of sexual assault.

6.2 Describe your efforts to post and widely disseminate information on ways to report allegations of retaliation. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 3)

Navy efforts to post and disseminate information on methods for reporting allegations of retaliation as a result of making a report of sexual assault are similar to those used to promote the SAPR program and male sexual assault described in question 6.1. Information and resources available to all Service members, dependents, and civilian

personnel for reporting and responding to sexual assaults (including the DoD Safe Helpline numbers and websites) is posted, publicized, and widely disseminated using a variety of media designed to reach the widest audience possible.

Retaliation training has been specifically included in Standardized Core Training for FY16, and has been included in the Fleet-wide implementation of CTC training.

In addition to disseminating information, retaliation is now explored in each reported sexual assault, actively reviewed by NCIS, and reinforced at the monthly Sexual Assault Case Management Group meetings. Retaliation is also discussed in quarterly SAPR Executive Steering Committee meetings hosted by the fleets and in Fleet Workshops to counter destructive behaviors. Each of those events includes Fleet-wide roll up of retaliation data from Command Climate Surveys and a review of reporting protocols.

6.3 Provide an update on your development and implementation of new certification standards for sexual assault medical forensic examiners. (DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 2, para 3c(3)(b))

Sexual Assault Forensic Examiners (SAFEs) coordinated training for all examiners to complete the requirements for Sexual Assault Medical Forensic Examiner (SAMFE) certification. Continuing training will be required every three years for recertification.

In FY16, ten interservice DoD SAMFE Training sessions were held at Fort Sam Houston, Texas. For each session, one week of didactic training was delivered by SMEs who meet the Department of Justice National Training Standards for SAMFE, followed by a week of hands-on clinical exams using live male and female models.

6.4 Describe your ongoing efforts to review, revise, update, and issue policy pertaining to:

- Safety Assessments for SAPR Program
- High-Risk Response Teams

Were any multi-disciplinary High-Risk Response Team established?

- If so, how many and what was the duration?
- If the High-Risk Response Team was dissolved, explain why?

(DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 5, para 2c / Encl 9, para 2j(3))

Safety Assessments and the High-Risk Response Team (H-RRT) are addressed in Navy's OPNAVINST 1752.1C, which was last updated in August 2015.

Per the instruction, Safety Assessments are conducted by the SARC or SAPR VA at the initial time of reporting. Assessment of safety is continuous by the SAPR team, service providers and any member from the command. If any safety concerns are identified, they are briefed with the Commanding Officer by the SARC to consider the implementation of a H-RRT.

In the case of an unrestricted report, the SARC will consult with NCIS and the Command to ensure that any safety concerns are identified and addressed as appropriate. SARC notes concerns in DSAID as appropriate.

H-RRT activity in 2016 across the Navy (provided by region) was as follows:

- CNRSW - There were four H-RRTs established across the region. In each case, the team was established for a week and dissolved once the victims' mental health was assessed and the determination was made that they were no longer high risk.
- CNRSE established seven H-RRTs across four installations:
 - NASFWJRB has one High Risk Response Team currently established.
 - NAS JAX had two cases with H-RRTs that met twice; dissolving after the Mental Health representative concluded that there were no longer risks.
 - Kings Bay had one H-RRT established. The Team met on two occasions and was dissolved as the victim was offered a myriad of resources that alleviated the risk.
 - NAS Pensacola held three H-RRTs. One had eight meetings, one had four meetings, and one had two meetings. Each was dissolved when the victim had a personal safety plan put in place and was assessed to be safe.
- CNRMA - There were four H-RRTs established across the region in FY16. One met one time and was dissolved when the victim received an expedited transfer and the safety concern was eliminated. Two H-RRTs met on three occasions and dissolved when the victims transitioned out of the Navy. The final H-RRT was in place at the time of this report.
- CNRSW - There were four H-RRTs established across the region that stood up for a week each and were dissolved once all victims' mental health was assessed and the determination was made that they were no longer high risk.

6.5 Provide an update on your methods for effectively factoring accountability metrics into commanders' and subordinate leaders' performance assessments.
(SecDef Memo (6 May 13), *Enhancing Commander Accountability*, p. 2)

Commanders are evaluated on the extent to which they have or have not established a command climate where allegations of sexual assault are properly managed and fairly evaluated, and a victim of sexual assault can report the assault without fear of reprisal or retaliation. The data for this evaluation is provided through command climate surveys.

Navy requires all commanding officers and officers in charge to conduct a command climate survey within 90 days after assuming command with annual follow-up assessments during their command tenure. Since 31 July 2013, command climate survey outcomes have been provided to the (ISIC) as well as Commanders for full visibility. The ISIC and commander review and discuss the survey results and proposed way forward to

address areas of concern.

The Navy Performance Evaluation System, BUPERSINST 1610.10D CH-1 requires that commanders, commanding officers and officers-in-charge fitness reports include whether or not a command climate assessments was conducted per Navy Equal Opportunity policy. Failure to conduct the command climate assessment will be clearly documented by the reporting senior.

Leaders are expected to fully address input provided in command climate surveys, as well as feedback provided by command assessment team focus groups, interviews, records reviews, and assessors' observations.

Subordinate leaders with every command are evaluated and rated on the climate they lead within the organization. Per NAVADMIN 216/13, Navy Performance Evaluation Changes, issued in 2013, every Sailor is accountable on their evaluations or fitness reports for contributions to Command or Organizational Climate/Equal Opportunity and Military Bearing/Character.

6.6 Provide an update on efforts to improve overall victim care and increase trust in the chain of command: include initiatives or updates undertaken to reduce allegations of retaliation as a means of increasing reporting and the way in which your Military Service is tracking and accounting for these efforts. (SecDef Memo (6 May 13), *Improving Response and Victim Treatment*, p. 2 / DoD Retaliation Prevention and Response Strategy: Regarding Sexual Assault and Harassment Reports (April 2016), p. 10)

Navy is committed to providing high-quality and comprehensive care, in which victims can obtain support immediately via 24/7 hotlines; receive compassionate assistance via credentialed advocacy services; and access medical, counseling, and legal support via dedicated professionals. As discussed above in Section 6.2, Navy is committed to eliminating retaliation and creating a reporting environment free of retaliatory behavior.

Navy, with OSD SAPRO and the other Services, developed the DoD Retaliation Prevention and Response Strategy (DRPRS). The DRPRS was signed by the Secretary of Defense in April 2016. The DRPRS established a uniform process to provide comprehensive support to individuals who experience retaliation and foster an ethical and just climate intolerant of retaliation. The five major issue areas addressed in the strategy are: standardized definitions; closing the gap in knowledge; building strong and supportive systems of investigation and accountability; providing comprehensive support to reporters; and creating a culture intolerant of retaliation. These issue areas are expanded in the DRPRS to outline the recommended way forward. The full details of the prevention and response processes are being determined by working groups led by Navy, the other Services and key stakeholder during an implementation planning phase. The resultant Retaliation Implementation Plan will be formally coordinated with the Services in FY17 prior to execution.

Measures taken by Navy VLC to improve overall victim care and trust in the chain of command include engaging directly with a victim's chain of command to assert the client's rights and interests across a range of issues. This may include a request for a Military Protective Order or expedited transfer, issues related to pay and allowances, matters of career impact, status of dependents, duty station status, social ostracism, command retaliation, and other concerns expressed by a victim meriting engagement with that victim's command. VLC base their interactions with commands on the client's consent, input, and desires. Legal advice, support and advocacy given by VLC to victims reporting a sexual offense fosters their client's trust, faith, and confidence in the Navy and in some instances, the military justice process.

CNIC issued direction that only the installation CO may chair the SACMG. This ensures the installation CO has direct oversight of all response and supportive care to victims. At the beginning of each case review during SACMG, the chair asks the victim's CO how the previous victim update went. The responsiveness of services and leadership directly contribute to the overall feeling of trust in the chain of command. Additional best practices include:

- Leaders attend every SAPR event or initiative to provide a personal message for their sailors, and plan quarterly SAPR specific initiatives to engage members by discussing the importance of victim care and eliminating retaliation.
- Each command ensures they have a sufficient number of quality trained VAs. Engaged VAs and command leadership create a climate that supports a potential report of sexual assault and retaliation.
- During the SAPR CO Toolkit brief with the command triad, the SARC reviews the Commander's Checklist to engage the command in discussing the importance of a command climate that fosters the trust of personnel, is sensitive to the care of potential victims, and discourages retaliation and reprisal.

Timely and thorough SACMG follow-up with victims by their CO, VLC, SARC, or VA demonstrates command concern and improves trust. Any feedback received from a victim regarding care or retaliation is discussed with command leadership to ensure that concerns are immediately addressed and corrective actions put in place.

Command SAPR programs and SAPR teams ensure compliance with all DoD, DON, and Navy instructions. Victims are monitored by SARCs, SAPR VAs, and UVAs to ensure there is no re-victimization. Through all hands calls and continued training, Commanding Officers ensure their commands maintain a culture and policy of zero tolerance when it relates to destructive behaviors and negative victim treatment.

6.7 Provide an update on your policy for Case Management Group Chairs to regularly assess and refer retaliation allegations, made in conjunction with a sexual assault report, for appropriate investigation. Additionally, describe your policy for keeping these retaliation allegations on the CMG agenda for status updates until

the victim's allegation is appropriately addressed.

(SecDef Memo (3 Dec 14), *Engage Command to Prevent Retaliation*, p. 2 / DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 9)

OPNAVINST 1752.1C and CNICINST 1752.4 require that all allegations of retaliation made by victims of a sexual assault, witnesses, individuals who intervened, and/or first responders, be addressed at each SACMG. Specifically at each meeting the SACMG Chair will:

- Receive an individual client review and case status update from SARCs prior to the meeting.
- Utilize the CNICINST 1752.4 SACMG Checklist to ensure complete case review.
- Inquire as to any allegation of retaliation, reprisal, ostracism, and/or maltreatment for every case review on the CMG agenda.
- Promote an open dialogue around concerns of retaliation and ensure appropriate action is taken to address those concerns.

Require that the Commander of a victim reporting retaliation report back to the CMG of actions taken and current status of any reported retaliatory behavior until the issue is fully addressed and the retaliation ceases.

CNIC HQ SAPR continues to provide training on the SACMG, including Mock SACMG demonstrations with local stakeholders, at the quarterly Senior Shore Leadership (SSL) course. CNIC training prepares Installation Commanding Officers to assume the responsibility of chairing the monthly SACMG, and provides them with a forum to ask questions and observe how an efficient SACMG is run. Throughout this training, the participants are taught that it is the chair's responsibility to assess each case for retaliation and refer for corrective action.

CNIC SAPR HQ revised the CO SAPR Toolkit that SARCs utilize in their in-brief with all new COs. Included in the Toolkit are the current SECNAV definitions of retaliation as well as the SACMG Chair's role in SACMG to assess and refer reports of retaliation.

7. Secretary of Defense Initiatives

7.1 Enhance First Line Supervisor Skills and Knowledge: Provide an update on your first line supervisor training that advances a climate of dignity and respect and supports the prevention of potential retaliation associated with reporting. First line supervisors are junior officers, enlisted supervisors, and civilian employees who supervise military members. Address the frequency of the training; policy updates in support of the training; and, how the curriculum emphasizes the importance of engaging subordinates on sexual assault prevention and response; instructs them on recognizing the signs of possible acts of retaliation; and, provides an

opportunity to practice leadership skills to promote a healthy command climate.
(SecDef Memo, (3 Dec 14), p. 2)

SAPR training requirements apply to all Service members and DoD civilian personnel who supervise Service members. Commanders and civilian managers must ensure all first line supervisory personnel receive appropriate training.

Standardized Core Training (SCT) is the foundation of all SAPR training, is an annual requirement, and is mandatory for all Navy members and civilian personnel who supervise Navy members. The focus of first line supervisor training is to ensure all personnel have a working knowledge of the spectrum of harm, prevention and risk reduction strategies, recognition of retaliatory and other destructive behaviors, and their role in advancing and promoting a healthy command climate. Training will include appropriate scenarios for the target population and clarify the nature of sexual assault in the military environment. The contents will include sexual assault policy, sexual assault victim resources and reporting options, and sexual assault prevention.

All first line supervisor additional training requirements emphasize recent changes in policy and engagement with immediate subordinates to recognize risk factors and promote a healthy command climate. Additional training requirements for these first line supervisors are as follows:

- NETC is responsible for maintaining course content for division officer and enlisted supervisor leadership training; they updated the training in FY15 to include content on retaliation, reprisal, maltreatment, and ostracism and the appropriate level of response when identified. For Petty Officer Selectee courses, training delivery is required to be prior to promotion to the next paygrade. For the division officer course, attendance is required prior to or during initial assignment in this capacity.
- Newly commissioned officers receive first line supervisor training during both pre-commissioning training and annual training requirements.
 - USNA - Company Officers and Senior Enlisted Leaders (SELs) receive initial training with the SAPR Program Manager and Training Specialist upon reporting to USNA. This provides exposure to all resources and provides guidance on best practices. After the initial training, Company Officers and SELs receive annual refresher training with updates to the program as necessary. Both sessions reinforce their understanding of basic concepts of sexual assault, discuss the risks and circumstances associated with sexual assault incidences, and offer proactive measures to prevent sexual assault and associated destructive behaviors within their companies.
 - At RTC, OTC and NROTC units, all students and staff receive extensive training on command SAPR policies, and are introduced to key personnel. These tailored training programs address the importance of engaging subordinates on prevention, recognizing signs of possible retaliation, and promoting a healthy climate that encourages reporting. NSTC encourages all

members of both staff and student chains of command to remain highly visible and available for discussion if an issue arises.

- Navy-wide CTC training included skills in identifying risk factors, employing of intervention methodologies, and focusing on how to interact with victims at the same time highlighting the domino effects of decisions made by first-line supervisors to the detriment of good order and discipline.
- Command SAPR teams train first line supervisors on effective ways to respond to misconduct, address potential problems that may arise due to a report of misconduct and how to respond appropriately to retaliation if it occurs. With this knowledge, leaders set the right standard and reinforce a professional culture that fosters an ethical and just climate intolerant of retaliation.

8. NDAA Requirements - Provide your Military Service's update on the following FY15/FY16 NDAA requirements. If the provision has been implemented, indicate "Completed," and provide the implementation date. If the provision has not been implemented, indicate "In Progress" and provide an update (150 words or less), including the projected completion date.

8.1 Review by the Military Service Secretary (at the chief prosecutor's request) of a Convening Authority's decision to not refer charges of certain sex-related offenses for trial by court-martial.

“(c) REVIEW OF CERTAIN CASES NOT REFERRED TO COURT-MARTIAL.—

“(1) CASES NOT REFERRED FOLLOWING STAFF JUDGE ADVOCATE RECOMMENDATION FOR REFERRAL FOR TRIAL.—In any case where”; and (2) by adding at the end the following new paragraph:

“(2) CASES NOT REFERRED BY CONVENING AUTHORITY UPON REQUEST FOR REVIEW BY CHIEF PROSECUTOR.—

“(A) IN GENERAL.—In any case where a convening authority decides not to refer a charge of a sex-related offense to trial by court-martial, the Secretary of the military department concerned shall review the decision as a superior authority authorized to exercise general court martial convening authority if the chief prosecutor of the Armed Force concerned, in response to a request by the detailed counsel for the Government, requests review of the decision by the Secretary.

“(B) CHIEF PROSECUTOR DEFINED.—In this paragraph, the term ‘chief prosecutor’ means the chief prosecutor or equivalent position of an Armed Force, or, if an Armed Force does not have a chief prosecutor or equivalent position, such other trial counsel as shall be designated by the Judge Advocate General of that Armed Force, or in the case of the Marine Corps, the Staff Judge Advocate to the Commandant of the Marine Corps.” (FY15 NDAA, Sec 541)

Completed (March 2016). In March 2016, the Judge Advocate General of the Navy appointed a “Chief Prosecutor of the Navy” in accordance with the NDAA requirement. In furtherance of the NDAA requirement, the Navy is currently drafting a Commander, Naval Legal Service Command instruction (CNLSCINST) consolidating guidance to those

operating under this provision.

8.2 Inclusion of disposition results in future annual reports.

(a) SUBMITTAL TO SECRETARY OF DEFENSE OF INFORMATION ON EACH ARMED FORCE.—Subsection (b) of section 1631 of the Ike Skelton National Defense Authorization Act for Fiscal Year 2011 (10 U.S.C. 1561 note) is amended by adding at the end the following new paragraph:

“(11) An analysis of the disposition of the most serious offenses occurring during sexual assaults committed by members of the Armed Force during the year covered by the report, as identified in unrestricted reports of sexual assault by any members of the Armed Forces, including the numbers of reports identifying offenses that were disposed of by each of the following:

“(A) Conviction by court-martial, including a separate statement of the most serious charge preferred and the most serious charge for which convicted.

“(B) Acquittal of all charges at court-martial.

“(C) Non-judicial punishment under section 815 of title 10, United States Code (article 15 of the Uniform Code of Military Justice).

“(D) Administrative action, including by each type of administrative action imposed.

“(E) Dismissal of all charges, including by reason for dismissal and by stage of proceedings in which dismissal occurred.” (FY15 NDAA, Sec 542)

Completed (Sept. 2016). This data is compiled in the Annual Report to Congress on Sexual Assault, which includes a report analyzing the disposition of the most serious offenses committed by members of the Armed Forces. OJAG’s Criminal Law Division received all Sexual Assault Disposition Reports for Unrestricted Reports of sexual assault. As noted in Question 5.3 above, Criminal Law Division judges enter case disposition into DSAID’s Legal Officer Module. To ensure all cases are properly accounted for in DSAID, the Criminal Law Division coordinates with CNIC, N17, OSD SAPRO and NCIS to ensure all cases are properly entered and accounted for in DSAID. The Criminal Law Division also works closely with OSD SAPRO to resolve any issues in DSAID with case entry and validation.

8.3 Confidential review of the terms or characterization of discharge for Armed Services members who report being victims of sexual assault.

(a) CONFIDENTIAL REVIEW PROCESS THROUGH BOARDS FOR CORRECTION OF MILITARY RECORDS.—The Secretaries of the military departments shall each establish a confidential process, utilizing boards for the correction of military records of the military department concerned, by which an individual who was the victim of a sex-related offense during service in the Armed Forces may challenge the terms or characterization of the discharge or separation of the individual from the Armed Forces on the grounds that the terms or characterization were adversely affected by the individual being the victim of such an offense.

(b) CONSIDERATION OF INDIVIDUAL EXPERIENCES IN CONNECTION WITH OFFENSES.—In deciding whether to modify the terms or characterization of the

discharge or separation from the Armed Forces of an individual described in subsection (a), the Secretary of the military department concerned shall instruct boards for the correction of military records—

(1) to give due consideration to the psychological and physical aspects of the individual's experience in connection with the sex-related offense; and

(2) to determine what bearing such experience may have had on the circumstances surrounding the individual's discharge or separation from the Armed Forces.

(c) **PRESERVATION OF CONFIDENTIALITY.**—Documents considered and decisions rendered pursuant to the process required by subsection (a) shall not be made available to the public, except with the consent of the individual concerned.

(d) **SEX-RELATED OFFENSE DEFINED.**—In this section, the term “sex-related offense” means any of the following:

(1) Rape or sexual assault under subsection (a) or (b) of section 920 of title 10, United States Code (article 120 of the Uniform Code of Military Justice).

(2) Forcible sodomy under section 925 of such title (article 125 of the Uniform Code of Military Justice).

(3) An attempt to commit an offense specified in paragraph (1) or (2) as punishable under section 880 of such title (article 80 of the Uniform Code of Military Justice).

(FY15 NDAA, Sec 547)

Completed (Sept. 2016). The Board for Correction of Naval Records (BCNR) handles records for all cases within the Department of the Navy. The BCNR complies with Section 547 through a separate procedure for sexual assault victims challenging their discharge. BCNR processes ensure all cases are processed confidentially. Applications and case files are available only to individuals responsible for presenting the case to the Board, and are only released on a need to know basis to outside organizations when BCNR seeks an advisory opinion.

8.4 Applicability of sexual assault prevention and response and related military justice enhancements to military service academies.

(a) **MILITARY SERVICE ACADEMIES.**—The Secretary of the military department concerned shall ensure that the provisions of title XVII of the National Defense Authorization Act for Fiscal Year 2014 (Public Law 113–66; 127 Stat. 950), including amendments made by that title, and the provisions of subtitle D, including amendments made by such subtitle, apply to the United States Military Academy, the Naval Academy, and the Air Force Academy, as applicable. **(FY15 NDAA, Sec 552)**

Completed (Sept. 2016). The United States Naval Academy (USNA) has generated a comprehensive training program focusing on honor, respect, and character development as it pertains to sexual assault prevention. The training defines sexual assault, provides numerous case examples, and conveys essential reporting information. Training is conducted within the first week of the academic year.

USNA leadership has ensured the extension of rights to crime victims. The enhancement

of support systems at the USNA have safeguarded victims and guaranteed timely notice of events relating to the offense. Victims have been given access to proceedings and can provide input on matters of processing and sentencing. The USNA has an on-site VLC who can represent victims during the legal process and comprehensive SAPR services. The USNA and the Navy have worked to development strategic program guidance and joint planning objectives in support of the SAPR program.

8.5 Sexual assault prevention and response training for administrators and instructors of Senior Reserve Officers' Training Corps.

The Secretary of a military department shall ensure that the commander of each unit of the Senior Reserve Officers' Training Corps and all Professors of Military Science, senior military instructors, and civilian employees detailed, assigned, or employed as administrators and instructors of the Senior Reserve Officers' Training Corps receive regular sexual assault prevention and response training and education. (FY16 NDAA, Sec 540)

Completed (Sept. 2016). The NSTC department of Officer Development writes and enforces NSTC policy on proper training for administrators and instructors of NROTC units. Professors of Military Science at universities (i.e., NROTC unit Commanding Officers (COs)) receive weeks of consistent training at OD in Pensacola, Florida prior to taking command. The NSTC SAPR POC ensures all new COs receive a toolkit brief from their RSARC once they check into their command, per OPNAVINST 1752.1C. COs and SAPR POCs are responsible for ensuring instructors and civilian staff participates in NSTC required SAPR training including annual SCT, SAPR-C, and CTC.

9. Analytic Discussion

9.1 Military Services/NGB*, provide an analytic discussion (1,000 words or less) of your Military Service's Statistical Report of reported sexual assault cases from the Defense Sexual Assault Incident Database (DSAID). Required elements included on this template are information on Unrestricted Reports; Restricted Reports; Service referrals for victims alleging sexual assault; and case synopses of completed investigations.

***NGB should provide comments based on their available information and data.**

This section shall include such information as:

- Notable changes in the data over time**
- Insight or suspected reasons for noted changes, or lack of change, in data**
- The application of insights from data analyses for programmatic planning, oversight, and/or research**
- Prevalence vs. reporting (the percentage of Service member incidents captured in reports of sexual assault (Restricted Reports and Unrestricted Reports) (Metric #2)**
- Total number of Sexual Assaults (Restricted Reports and Unrestricted Reports) over time (since FY08) (Metric #12)**

- Military Protective Orders issued as a result of an Unrestricted Report (e.g., number issued, number violated)
- Approved expedited transfers and reasons why transfers were not approved
- The number of sexual assault investigations completed by the MCIO in the FY and the corresponding mean and median investigation length. Case open date can be in any year, but the close date must be by the end of the FY (Metric # 5)
- The number of subjects with victims who declined to participate in the military justice process (Metric #8)
- Command action for military subjects under DoD legal authority (to be captured using the most serious crime investigated, comparing penetration to contact crimes) (Non-Metric #1)
- Sexual assault court-martial outcomes (to be captured using the most serious crime charged, comparing penetration to contact crimes) (Non- Metric #2)
- Summary of referral data – Unrestricted and Restricted Reports - either referrals received from other sources or referrals made to other sources (e.g., medical/mental health, command, criminal investigation/security services, legal, civilian or VA authorities, etc.)
- Any other data relating to sexual assault case data

Total Number of Sexual Assaults

Figure 1: Total Number of Sexual Assaults FY08-FY16

I. Overview

In FY16 there were 1,450 reports of sexual assault in the Navy, a 5.4% increase from FY15 (1,376).

II. Unrestricted Reports

In FY16, there were 1,090 unrestricted reports, a 7.6% increase from FY15 (1,013), continuing the incremental upward but flattening trend in this report. Unrestricted Reporting triggers command notification, initiates a Military Criminal Investigation Organization (MCIO) investigation and provides an opportunity to hold offenders appropriately accountable, in addition to giving victims access to support and advocacy services.

Service Member on Service Member

In FY16, Navy Service member on Service member allegations of sexual assault represented 49.7% (542 of 1,090) of initial Unrestricted Reports. The overall percentage of reported “Blue-on-Blue” sexual assaults as compared to total unrestricted reports has been declining and flattening when compared to previous years’ data: 52% in FY15 (528 of 1,013), 59% in FY14 (595 of 1,001), and 60% in FY13 (540 of 902). The Navy saw a 0.9% decrease in reported “Blue-on-Blue” penetration crimes (221 compared to 223 in FY15) and a 15.2% increase in reported contact crimes (295 compared to 256 in FY15).

Male Victim Reporting

Male victim reporting is historically an underreported segment and a challenge for the Navy. Of the 926 Sailors who made Unrestricted Reports in FY16, male victims accounted for 20.4% (189). Although this represents a year-to-year increase of 21.2% (189 compared to 156 in FY16), the trend for this statistic has remained relatively flat when compared to previous years: 18% (156) in FY15, 23% (201) in FY14, 18% (145) in FY13.

SVM Victim Demographics in Initial Unrestricted Reports			
Fiscal Year	Males	Females	Total
FY16	189	737	926
FY15	156	725	881
FY14	201	687	888
FY13	145	634	779

Expedited transfers

In FY16, there were 19 unit/duty and 287 installation-expedited transfers requested by Service member victims. Seven installation expedited transfer requests were denied: one request had insufficient information for the command to make a determination on the case to support the request; two were cases where the victim was pending separation from Navy; one was denied due to the latency of report and concern for timing with recent misconduct; three were denied on the basis of the allegation not being a credible report of sexual assault.

Expedited Transfer Requests				
Fiscal Year	Requested	Approved	Denied	Total SVM Initial Unrestricted Reports
FY16	306	299	7	926
FY15	236	233	4	881
FY14	164	163	1	888
FY13	148	146	2	779

Military Protective Orders (MPO)

In FY16 there were 237 MPOs issued, a 5.2% decrease from FY15 (250). Additionally there were 5 MPO violations, a 28.6% decrease from FY15 (7).

III. Restricted Reports

In FY16 there were 478 initial Restricted Reports of sexual assault in the Navy, a 2.8% decrease from FY15 (492). There was also a 0.8% decrease in the number of reports remaining restricted (360 compared to 363 in FY15). Restricted Reports enable a victim to receive support services, without command notification or initiation of an investigation. SARCs do not report the types of offenses for Restricted Reports.

IV. Victims Support Services

Unrestricted Reports

In FY16, there were 4,181 support service referrals for victims who made Unrestricted Reports, representing a 19.4% increase from FY15 (3,502). Of those, 92.4% (3,865) were for military resources: 847 victim advocacy, 803 legal assistance, 680 mental health, 552 chaplain/spiritual support, 500 medical, 277 DoD Safe Helpline, and 206 other services. The remaining 7.6% (316) of referrals were for civilian resources: 98 victim advocacy, 80 mental health, 58 rape crisis center, 54 other services, 21 medical, 4 legal assistance, and 1 chaplain/spiritual support.

Restricted Reports

In FY16, there were 1,418 support service referrals for victims who made Restricted Reports, representing a 27.7% increase from FY15 (1,110). Of those, 92.0% (1,304) were for military resources: 278 victim advocacy, 245 mental health, 228 legal assistance, 223 chaplain/spiritual support, 195 medical, 101 DoD Safe Helpline, and 34 other services. The remaining 8.0% (114) were for civilian resources broken down as follows (descending order): 42 rape crisis center, 28 victim advocacy, 24 mental health, 9 other services, 9 medical, and 2 chaplain/spiritual support.

V. Investigations

In FY16, MCIOs completed 1,087 investigations of Sexual Assault that were initiated either during the FY or any prior FY. The average length of investigations conducted by NCIS was 129 days and the median length was 105 days. This average includes offenses involving complex investigation, scientific analysis of evidence, or procurement of expert witnesses, as well as simpler cases involving guilty pleas or limited evidence. In cases where the most serious offense investigated by NCIS was a penetration offense, the average length of time between the date the investigation was completed and the date legal advice was rendered to the command regarding case disposition was 45 days. In those cases disposed of at courts-martial, the average length of time between the date the victim made an Unrestricted Report and the date the sentence was imposed or an accused was acquitted at courts-martial was approximately 392 days. In cases disposed of at non-judicial punishment, the average length of time between the date the victim made an Unrestricted Report and the date non-judicial punishment was concluded was approximately 213 days.

Victims Declining to Participate in the Military Justice Process

Victim declinations increased by 2.1%. In FY15, there were 1013 Unrestricted Reports of sexual assault. 60 of those cases, or 5.9%, resulted in victim declinations. In FY16, there were 1090 Unrestricted Reports of sexual assault—a 7.6% overall increase in reporting. Despite this increase in reporting, there were only 91 victim declinations, meaning 8% of cases resulted in declinations. This is not reflective of all cases in which the victim declined to participate in the investigative/military justice process. In some cases, command action was pursued, resulting in administrative or disciplinary action against a subject, despite non-participation of the victim. Moreover, these cases are not categorized as a victim declination within our reporting. Conversely, some cases were categorized as victim declination within our reporting that could also have been categorized as “unknown subject” or “insufficient evidence,” and may have been so categorized in previous years.

Command Action for Military Subjects Under DoD Legal Authority

In FY16, command action was taken against 336 (51% of 655) Service members for both sexual assault and non-sexual assault (e.g., failure to obey order or regulation) offenses. Types of command action included court-martial, non-judicial punishment, administrative separation, or other adverse administrative actions (including Midshipmen Disciplinary System Action at the U.S. Naval Academy).

Sexual Assault Court-Martial Outcomes

In FY16, there were 115 (18% of 655) cases where court-martial charges were preferred for a sexual assault offense compared to 154 in FY15. A total of 70 (62%) cases proceeded to trial on at least one sexual assault offense. Of those, 50 (71%) resulted in a conviction, 20 (29%) resulted in an acquittal.

9.2 Complete the following table with your numbers as of the end of the fiscal year. Use the job/duty descriptions provided and the following inclusion criteria:

- Include all Reserve and Active Duty military personnel. Army and Air Force do not need to include National Guard personnel as they will be included in the National Guard Bureau's response.
- Include civilian and contractor personnel
- Only include filled positions
- Indicate the number of full-time and part-time personnel
- Provide the exact number of current personnel, whenever possible. If the number is an estimate, please indicate how the estimate was reached and any other relevant information.

(DODI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 2, para 6ac)

Job/Duty Title	Description of Job/Duty	Full-Time	Part-Time
Program Managers	Capability in developing policy, or program management and execution; and completion of 40+ hours of Service-specific National Advocate Credentialing Program and approved SARC training.	2	0
Dedicated HQ	Include policy, advocacy, and prevention professionals who support the headquarters-level SAPR program offices at each Military Service/National Guard Bureau (<i>not including program managers, who are counted in their own category</i>).	53	0
Uniformed SARCs	Serve as the single point of contact at an installation or within a geographic area to oversee sexual assault awareness, prevention, and response training; coordinate medical treatment, including emergency care, for victims of sexual assault; and track the services provided to victims from the initial report through final disposition and resolution. Certified under the nationally-accredited DoD Sexual Assault Advocate Certification Program (D-SAACP).	0	5
Civilian SARCs	See above.	80	5
Uniformed SAPR-VAs	Provide non-clinical crisis intervention, referral, and ongoing non-clinical support to adult sexual assault victims; offer information on available options/resources to victims; coordinate liaison	0	5,137

	assistance with other organizations and agencies on victim care matters; and report directly to the SARC. Certified under the nationally-accredited D-SAACP.		
Civilian SAPR-VAs	See above.	55	8
Sexual Assault-Specific Legal	Legal personnel who specialize in sexual assault cases including prosecutors, Victim Witness Assistance Program personnel, paralegals, legal experts, and Special Victim's Counsel/Victim's Legal Counsel. (Note 1)	221	9
Sexual Assault – Specific Investigators	Military Criminal Investigation Office investigators who specialize in sexual assault cases.	164	0
Sexual Assault Medical Forensic Examiners	Medical providers that have completed the DoD course at Fort Sam Houston, or equivalent.	215	0

Note 1: OJAG used the following definitions to complete this question:

Full-time specialists are defined as: Trial Counsel (45); paralegals assigned to trial offices (35); Defense Counsel (47); paralegals assigned to defense offices (31); Victims' Legal Counsel (32); AJAG Military Justice (1); AJAG Chief Judge (1); VLC Chief of Staff (1); Defense Service Office Chief of Staff (1); Code 20 SAPR Personnel (5); Code 45 (7); Code 46 (4); Code 51 (6); Code 52 (2); Trial Counsel Assistance Program (2); and Defense Counsel Assistance Program (1).

Part-time specialists are defined as: specified Front Office personnel (5); and specified Code 20 personnel (4). Staff Judge Advocates are excluded from this number. However, the Navy JAG Corps has 238 Staff Judge Advocates who, as part of their duties in "general attorney" billets, provide advice on the disposition of sexual assault cases to convening authorities and have received sexual assault response training specific to Staff Judge Advocate duties from Code 20.

Note 2: SAPR Officers – 35, listed as HQ Staff

Unrestricted Reports

NAVY FY16 UNRESTRICTED REPORTS OF SEXUAL ASSAULTS IN THE MILITARY		
A. FY16 REPORTS OF SEXUAL ASSAULT (rape, sexual assault, aggravated sexual contact, abusive sexual contact, forcible sodomy, and attempts to commit these offenses) BY or AGAINST Service Members. Note: The data on this page is raw, uninvestigated information about allegations received during FY16. These Reports may not be fully investigated by the end of the fiscal year. This data is drawn from Defense Sexual Assault Database (DSAD) based on Service affiliation of the Sexual Assault Response Coordinator (SARC) who currently manages the Victim case.	FY16 Totals	
# FY16 Unrestricted Reports (one Victim per report)		1066
# Service Member Victims		955
# Non-Service Member Victims in allegations against Service Member Subject		101
# Relevant Data Not Available		10
# Unrestricted Reports in the following categories		1066
# Service Member on Service Member		542
# Service Member on Non-Service Member		101
# Non-Service Member on Service Member		33
# Unidentified Subject on Service Member		340
# Relevant Data Not Available		50

E. SUMMARY OF UNRESTRICTED REPORTS WITH INVESTIGATIONS		FY16 Totals
E1. Subjects in Unrestricted Reports Made to Your Service with Investigation Initiated During FY16		
Note: This data is drawn from DSAID based on Service affiliation of the SARC who currently manages the Victim case associated with the investigation and Subject below.		
# Investigations Initiated during FY16		983
# Investigations Completed as of FY16 End (group by MCIO #)		671
# Investigations Pending Completion as of FY16 End (group by MCIO #)		312
# Subjects in investigations Initiated During FY16		1055
# Service Member Subjects investigated by CID		7
# Your Service Member Subjects investigated by CID		0
# Other Service Member Subjects investigated by CID		7
# Service Member Subjects investigated by NCIS		603
# Your Service Member Subjects investigated by NCIS		578
# Other Service Member Subjects investigated by NCIS		25
# Service Member Subjects investigated by AFOSI		5
# Your Service Member Subjects investigated by AFOSI		0
# Other Service Member Subjects investigated by AFOSI		5
# Non-Service Member Subjects in Service Investigations		
Note: Non-Service Member Subjects are drawn from all CID, NCIS and AFOSI investigations involving a Victim supported by your Service.		38
# Unidentified Subjects in Service Investigations		
Note: Unidentified Subjects are drawn from all CID, NCIS and AFOSI investigations involving a Victim supported by your Service.		374
# Service Member Subjects investigated by Civilian or Foreign Law Enforcement		
Note: Service Member Subjects are drawn from Civilian or Foreign Law Enforcement investigations involving a Victim supported by your Service.		3
# Your Service Member Subjects investigated by Civilian or Foreign Law Enforcement		3
# Other Service Member Subjects investigated by Civilian or Foreign Law Enforcement		0
# Non-Service Member Subjects in Civilian or Foreign Law Enforcement Investigations involving a Victim supported by your Service		3
# Unidentified Subjects in Civilian or Foreign Law Enforcement Investigations involving a Victim supported by your Service		1
# Subject or Investigation Relevant Data Not Available		21
E2. Service Investigations Completed during FY16		
Note: The following data is drawn from DSAID and describes criminal investigations completed during the FY16. These investigations may have been initiated during the FY16 or any prior FY.		
# Total Investigations completed by Services during FY16 (Group by MCIO Case Number)		984
# Of these investigations with more than one Victim		49
# Of these investigations with more than one Subject		48
# Of these investigations with more than one Victim and more than one Subject		3
# Subjects in investigations completed during FY16 involving a Victim supported by your Service		1076
# Service Member Subjects investigated by CID		8
# Your Service Member Subjects investigated by CID		0
# Other Service Member Subjects investigated by CID		8
# Service Member Subjects investigated by NCIS		647
# Your Service Member Subjects investigated by NCIS		605
# Other Service Member Subjects investigated by NCIS		42
# Service Member Subjects investigated by AFOSI		5
# Your Service Member Subjects investigated by AFOSI		0
# Other Service Member Subjects investigated by AFOSI		5
# Non-Service Member Subjects in completed Service Investigations involving a Victim supported by your Service		47
# Unidentified Subjects in completed Service Investigations involving a Victim supported by your Service		349
# Subject Relevant Data Not Available		20
# Victims in investigations completed during FY16, supported by your Service		1065
# Service Member Victims in CID investigations		14
# Your Service Member Victims in CID investigations		6
# Other Service Member Victims in CID investigations		8
# Service Member Victims in NCIS investigations		916
# Your Service Member Victims in NCIS investigations		900
# Other Service Member Victims in NCIS investigations		16
# Service Member Victims in AFOSI investigations		6
# Your Service Member Victims in AFOSI investigations		6
# Other Service Member Victims in AFOSI investigations		0
# Non-Service Member Victims in completed Service Investigations, supported by your Service		120
# Victim Relevant Data Not Available		9

E3. Subjects and Victims in Investigations Completed by US Civilian and Foreign Agencies during FY16	
Note: This data is entered by your Service SARC for cases supported by your Service.	
# Total Investigations completed by US Civilian and Foreign Law Enforcement during FY16 (Group by MCIO Case Number)	11
# Of these investigations with more than one Victim	0
# Of these investigations with more than one Subject	0
# Of these investigations with more than one Victim and more than one Subject	0
# Subjects in investigations completed during FY16 involving a Victim supported by your Service	11
# Service Member Subjects investigated by Civilian and Foreign Law Enforcement	2
# Your Service Member Subjects investigated by Civilian and Foreign Law Enforcement	2
# Other Service Member Subjects investigated by Civilian and Foreign Law Enforcement	0
# Non-Service Member Subjects in Civilian and Foreign Law Enforcement Investigations involving a Victim supported by your Service	5
# Unidentified Subjects in Civilian and Foreign Law Enforcement Investigations involving a Victim supported by your Service	3
# Subject Relevant Data Not Available	1
# Victims in investigations completed during FY16, supported by your Service	11
# Service Member Victims in Civilian and Foreign Law Enforcement investigations	10
# Your Service Member Victims in Civilian and Foreign Law Enforcement investigations	10
# Other Service Member Victims in Civilian and Foreign Law Enforcement investigations	0
# Non-Service Member Victims in Civilian and Foreign Law Enforcement Investigations in a case supported by your Service	1
# Victim Relevant Data Not Available	0
E4. Subjects and Victims in Investigations Completed by Military Police/Security Forces/Master At Arms/Marine Corps CID (MPs) during FY16 (all organizations regardless of name are abbreviated below as "MPs")	
Note: This data is entered by your Service SARC for cases supported by your Service.	
Note: As of 1 Jan 2013, all sexual assault investigations are referred to MCIO for investigation. This section captures remaining Subjects from investigations opened in prior years by Military Police/Security Forces/Master At Arms/Marine Corps CID.	
# Total Investigations completed by MPs during FY16 (Group by MCIO Case Number)	0
# Of these investigations with more than one Victim	0
# Of these investigations with more than one Subject	0
# Of these investigations with more than one Victim and more than one Subject	0
# Subjects in MP investigations completed during FY16 involving a Victim supported by your Service	0
# Service Member Subjects investigated by MPs	0
# Your Service Member Subjects investigated by MPs	0
# Other Service Member Subjects investigated by MPs	0
# Non-Service Member Subjects in MPs involving a Victim supported by your Service	0
# Unidentified Subjects in MPs involving a Victim supported by your Service	0
# Subject Relevant Data Not Available	0
# Victims in MP investigations completed during FY16, supported by your Service	0
# Service Member Victims in MP investigations	0
# Your Service Member Victims in MP investigations	0
# Other Service Member Victims in MP investigations	0
# Non-Service Member Victims in MP Investigations, supported by your Service	0
# Victim Relevant Data Not Available	0

# Service Member Subjects: Other adverse administrative actions for non-sexual assault offense	8	# Service Member Victims involved with Other administrative actions for non-SA offense	9
* Restricted Reports that convert to Unrestricted Reports are counted with the total number of Unrestricted Reports.			

I. COURTS-MARTIAL ADJUDICATIONS AND OUTCOMES (Sexual Assault Charge). This section reports the outcomes of Courts-Martial for sexual assault crimes completed during FY16	FY16 Totals
# Total Subjects with Courts-Martial Charge Preferred for a Sexual Assault Charge Pending Court Completion	115
# Subjects whose Courts-Martial action was NOT completed by the end of FY16	13
# Subjects whose Courts-Martial was completed by the end of FY16	102
# Subjects whose Courts-Martial was dismissed	22
# Subjects in Charges dismissed subsequent to recommendation by Art. 32 hearing officer	13
# Subjects in Charges dismissed subsequent to recommendation by Art. 32 hearing officer followed by Art. 15 punishment	3
# Subjects in Charges dismissed subsequent to recommendation by Art. 32 hearing officer followed by Art. 15 acquittal	0
# Subjects in Charges dismissed for any other reason prior to Courts-Martial	3
# Subjects in Charges dismissed for any other reason prior to Courts-Martial followed by Art. 15 punishment	3
# Subjects in Charges dismissed for any other reason prior to Courts-Martial followed by Art. 15 acquittal	0
# Subjects who resigned or were discharged in lieu of Courts-Martial	10
# Officer Subjects who were allowed to resign in lieu of Courts-Martial	0
# Enlisted Subjects who were discharged in lieu of Courts-Martial	10
# Subjects with Courts-Martial charges proceeding to trial on a sexual assault charge	70
# Subjects Acquitted of Charges	20
# Subjects Convicted of Any Charge at Trial	50
# Subjects with unknown punishment	0
# Subjects with no punishment	1
# Subjects with pending punishment	0
# Subjects with Punishment	49
# Subjects receiving confinement	36
# Subjects receiving reductions in rank	35
# Subjects receiving fines or forfeitures	19
# Subjects receiving a punitive discharge (Dishonorable, Bad Conduct, or Dismissal)	31
# Subjects receiving restriction or some limitation on freedom	5
# Subjects receiving extra duty	0
# Subjects receiving hard labor	3
# Subjects to be processed for administrative discharge or separation subsequent to sexual assault conviction	10
# Subjects receiving UOTHC administrative discharge	9
# Subjects receiving General administrative discharge	1
# Subjects receiving Honorable administrative discharge	0
# Subjects receiving Uncharacterized administrative discharge	0
# Convicted Subjects with a conviction under a UCMJ Article that requires Sex Offender Registration	23
J. NONJUDICIAL PUNISHMENTS IMPOSED (Sexual Assault Charge). This section reports the outcomes of nonjudicial punishments for sexual assault crimes completed during FY16	FY16 Totals
# Total Subjects with Nonjudicial Punishment (Article 15) for a Sexual Assault Charge in FY16	54
# Subjects whose nonjudicial punishment action was not completed by the end of FY16	2
# Subjects whose nonjudicial punishment action was completed by the end of FY16	52
# Subjects whose nonjudicial punishment was dismissed	15
# Subjects administered nonjudicial punishment	37
# Subjects with unknown punishment	0
# Subjects with no punishment	2
# Subjects with pending punishment	0
# Subjects with Punishment	35
# Subjects receiving correctional custody	0
# Subjects receiving reductions in rank	29
# Subjects receiving fines or forfeitures	25
# Subjects receiving restriction or some limitation on freedom	21
# Subjects receiving extra duty	17
# Subjects receiving hard labor	0
# Subjects receiving a reprimand	3
# Subjects processed for an administrative discharge or separation subsequent to nonjudicial punishment on a sexual assault charge	23
# Subjects who received NJP followed by UOTHC administrative discharge	9
# Subjects who received NJP followed by General administrative discharge	8
# Subjects who received NJP followed by Honorable administrative discharge	3
# Subjects who received NJP followed by Uncharacterized administrative discharge	3
K. OTHER ACTIONS TAKEN. This section reports other disciplinary action taken for Subjects who were investigated for sexual assault. It combines outcomes for Subjects in these categories listed in Sections D and E above.	FY16 Totals
# Subjects whose administrative discharge or other separation action was not completed by the end of FY16	2
# Subjects receiving an administrative discharge or other separation for a sexual assault offense	21
# Subjects receiving UOTHC administrative discharge	9
# Subjects receiving General administrative discharge	5
# Subjects receiving Honorable administrative discharge	2
# Subjects receiving Uncharacterized administrative discharge	5
# Subjects whose other adverse administrative action was not completed by the end of FY16	1
# Subjects receiving other adverse administrative action for a sexual assault offense	12

L. COURTS-MARTIAL ADJUDICATIONS AND OUTCOMES (Non-sexual assault offense). This section reports the outcomes of Courts-Martials for Subjects who were investigated for sexual assault, but upon review of the evidence there was only probable cause for a non-sexual assault offense. It combines outcomes for Subjects in this category listed in Sections D and E above.	FY16 Totals
# Total Subjects with Courts-Martial Charge Preferred for a non-sexual assault offense in FY16	15
# Subjects whose Courts-Martial action was NOT completed by the end of FY16	1
# Subjects whose Courts-Martial was completed by the end of FY16	14
# Subjects whose Courts-Martial was dismissed	2
# Subjects in Charges dismissed subsequent to recommendation by Art. 32 hearing officer	0
# Subjects in Charges dismissed subsequent to recommendation by Art. 32 hearing officer followed by Art. 15 punishment	0
# Subjects in Charges dismissed subsequent to recommendation by Art. 32 hearing officer followed by Art. 15 acquittal	0
# Subjects in Charges dismissed for any other reason prior to Courts-Martial	2
# Subjects in Charges dismissed for any other reason prior to Courts-Martial followed by Art. 15 punishment	0
# Subjects in Charges dismissed for any other reason prior to Courts-Martial followed by Art. 15 acquittal	0
# Subjects who resigned or were discharged in lieu of Courts-Martial for a non-sexual assault offense	1
# Officer Subjects who were officers that where allowed to resign in lieu of Courts-Martial	0
# Enlisted Subjects who were discharged in lieu of Courts-Martial	1
# Subjects with Courts-Martial charges proceeding to trial on a non-sexual assault offense	11
# Subjects Acquitted of Charges	0
# Subjects Convicted of Any Non-Sexual Assault Charge at Trial	11
# Subjects with unknown punishment	0
# Subjects with no punishment	0
# Subjects with pending punishment	0
# Subjects with Punishment	11
# Subjects receiving confinement	9
# Subjects receiving reductions in rank	10
# Subjects receiving fines or forfeitures	6
# Subjects receiving a punitive discharge (Dishonorable, Bad Conduct, or Dismissal)	3
# Subjects receiving restriction or some limitation on freedom	2
# Subjects receiving extra duty	0
# Subjects receiving hard labor	0
# Subjects processed for an administrative discharge or separation subsequent to conviction at trial	2
# Subjects receiving UOTHC administrative discharge	1
# Subjects receiving General administrative discharge	1
# Subjects receiving Honorable administrative discharge	0
# Subjects receiving Uncharacterized administrative discharge	0
M. NONJUDICIAL PUNISHMENTS IMPOSED (Non-Sexual Assault Charge). This section reports the outcomes of nonjudicial punishments for Subjects who were investigated for sexual assault, but upon review of the evidence there was only probable cause for a non-sexual assault offense. It combines outcomes for Subjects in this category listed in Sections D and E above.	FY16 Totals
# Total Subjects with Nonjudicial Punishment (Article 15) for a non-sexual assault offense in FY16	84
# Subjects whose nonjudicial punishment action was not completed by the end of FY16	3
# Subjects whose nonjudicial punishment action was completed by the end of FY16	81
# Subjects whose nonjudicial punishment was dismissed	4
# Subjects administered nonjudicial punishment for a non-sexual assault offense	77
# Subjects with unknown punishment	0
# Subjects with no punishment	0
# Subjects with pending punishment	0
# Subjects with Punishment	77
# Subjects receiving correctional custody	1
# Subjects receiving reductions in rank	50
# Subjects receiving fines or forfeitures	53
# Subjects receiving restriction or some limitation on freedom	45
# Subjects receiving extra duty	36
# Subjects receiving hard labor	0
# Subjects receiving a reprimand	11
# Subjects receiving an administrative discharge subsequent to nonjudicial punishment on a non-sexual assault charge	13
# Subjects who received NJP followed by UOTHC administrative discharge	1
# Subjects who received NJP followed by General administrative discharge	11
# Subjects who received NJP followed by Honorable administrative discharge	1
# Subjects who received NJP followed by Uncharacterized administrative discharge	0
N. OTHER ACTIONS TAKEN (Non-sexual assault offense). This section reports other disciplinary action taken for Subjects who were investigated for sexual assault, but upon review of the evidence there was only probable cause for a non-sexual assault offense. It combines outcomes for Subjects in these categories listed in Sections D and E above.	FY16 Totals
# Subjects whose administrative discharge or other separation action was not completed by the end of FY16	1
# Subjects receiving an administrative discharge or other separation for a non-sexual assault offense	14
# Subjects receiving UOTHC administrative discharge	6
# Subjects receiving General administrative discharge	2
# Subjects receiving Honorable administrative discharge	2
# Subjects receiving Uncharacterized administrative discharge	4
# Subjects whose other adverse administrative action was not completed by the end of FY16	0
# Subjects receiving other adverse administrative action for a non-sexual assault offense	17

Restricted Reports

NAVY FY16 RESTRICTED REPORTS OF SEXUAL ASSAULT

438	Rape (Art. 120)	UNITED STATES	Navy	E-4	Female	Navy	E-4	Male	No	No		04 (July September)	Administrative Discharge						Honorable		Victim (single victim)	Notes: Victim reported to local civilian police that she had been raped by Subject. Victim reported that, after arriving home from being treated at a local hospital for a back injury, Subject came to her residence to visit her. They had been reportedly friends for a few years. Victim said after they reached a room, they both went into her bedroom to sleep. Subject reportedly laid on her back while Victim went to sleep on her bed. Victim told Subject later that she had removed her clothes and had visible sexual intercourse and oral contact. The subject Subject was not convicted. Victim said she had consumed two beers prior to going to bed and was progressively more intoxicated. Victim told Subject that she had reported at the same time she left for work. Civilian police conducted a pre-arrest interview with Subject. Early, which is pertinent to sexually assaulting Victim. Local civilian prosecutors declined to prosecute. The Victim declined to participate in a voluntary prosecution. Commanding Officer contacted an Administrative Separations Board, which recommended separation with an honorable discharge.	
439	Sexual Assault (Art. 120)	UNITED STATES	Navy	E-4	Female	Unknown		Unknown	No	No		02 (April June)	Offender is Unknown									Notes: Victim reported that she had taken advice at a party, and when she woke up, she had been sexually assaulted. Victim reported to her unit. Victim declined to identify Subject or participate in military police and investigation. NCIS was unable to identify Subject. Case was closed with no further action due to unknown Subject and victim declaration.	
440	Rape (Art. 120)	UK	Navy	E-3	Female	Unknown		Unknown	No	No		01 (October December)	Offender is Unknown									Notes: Victim reported that she was kidnapped and raped by multiple men in an unknown location. Victim identified one of the men as Subject. Victim reported that she was unable to obtain any evidence or information that he was involved. NCIS never identified the individual as a Subject. As a result, NCIS recommended against charges. No further action was taken.	
440	Rape (Art. 120)	UK	Navy	E-3	Female	Unknown		Unknown	No	No		01 (October December)	Offender is Unknown									Notes: Victim reported that she was kidnapped and raped by multiple men in an unknown location. Victim identified one of the men as Subject. Victim reported that she was unable to obtain any evidence or information that he was involved. NCIS never identified the individual as a Subject. As a result, NCIS recommended against charges. No further action was taken.	
441	Sexual Assault (Art. 120)	UNITED STATES	Navy	E-3	Female	Navy	E-4	Male	No	No		01 (October December)	Court-Martial Charge Preferred	Sexual Assault (Art. 120)			Aggravated				Both Victim and Subject	Notes: Victim reported that Subject sexually assaulted her while she was on duty. Victim reported that she was unable to obtain any evidence or information that he was involved. NCIS never identified the individual as a Subject. As a result, NCIS recommended against charges. No further action was taken.	
442	Sexual Assault (Art. 120)	UNITED STATES	Navy	E-5	Female	Navy	E-5	Male	No	No		04 (July September)	Court-Martial Charge Preferred	Sexual Assault (Art. 120)			Convicted		Assault (Art. 120)	None		Both Victim and Subject	Notes: Victim reported that Subject sexually assaulted her while she was on duty. Victim reported that she was unable to obtain any evidence or information that he was involved. NCIS never identified the individual as a Subject. As a result, NCIS recommended against charges. No further action was taken.
443	Sexual Assault (Art. 120)	UNITED STATES	Navy	E-3	Male	Navy	E-3	Male	No	No		02 (April June)	Non-Judicial Punishment	Sexual Assault (Art. 120)			Article 15 Aggravated					Notes: Victim reported that Subject grabbed her by the neck and sexually assaulted her. Victim reported that she was unable to obtain any evidence or information that he was involved. NCIS never identified the individual as a Subject. As a result, NCIS recommended against charges. No further action was taken.	
444	Sexual Assault (Art. 120)	UNITED STATES	Navy	E-3	Female	Unknown		Unknown					Offender is Unknown									Notes: Victim reported to a nurse that she had been sexually assaulted. The hospital contacted the command NCIS. Victim declined to identify Subject or participate in military police and investigation. NCIS was unable to identify Subject. Case was closed with no further action due to unknown Subject and victim declaration.	
445	Rape (Art. 120)	UNITED STATES	Navy	E-6	Female	Unknown		Unknown					Offender is Unknown									Notes: Victim reported that she was sexually assaulted at her off-duty residence. The incident was reported to local civilian police and NCIS. Local civilian police interviewed Victim, who reported that she was unable to obtain any evidence or information that he was involved. FY16 Annual Report on Sexual Assault in the Military Executive Summary: United States Marine Corps

The fight to prevent sexual assault in the Marine Corps is an ongoing effort. Sexual assault is a crime—one that does not discriminate according to gender or rank. It erodes trust and unit cohesion and ultimately affects mission readiness. The Marine Corps Sexual Assault Prevention and Response (SAPR) Program strives to prevent sexual assault, while simultaneously providing comprehensive support to those who are victims of this crime. To effectively combat sexual assault, the Marine Corps employed several prevention and response efforts in Fiscal Year 2016 (FY16). Some examples of these efforts are listed below. Also included are major initiatives that commenced in FY16 but will be implemented in FY17.

- **Prevention and Response to the Sexual Assault of Military Men.** In FY16, Headquarters Marine Corps (HQMC) SAPR made a concerted effort to reach out to male Service members to bring awareness to the issue, combat myths and misconceptions, address barriers to reporting, and link Marines to supportive services. Initiatives included, but were not limited to, identifying and reviewing research on male sexual assault; coordinating with external Subject Matter Experts (SMEs); infusing male-specific content into SAPR training; and an extensive communications strategy that focused on awareness, outreach, prevention, and supportive services.
- **Coordination with External Subject Matter Experts (SMEs).** The Marine Corps collaborates with civilian experts and organizations to incorporate research-informed practices into its SAPR initiatives. FY16 examples include a Male Victim SME Panel and a Professional Military Education (PME) focused on college students' perceptions of consent and their understanding of coercion and sexual violence.
- **HQMC SAPR Social Media Communications Strategy.** Launched in October 2014, the social media campaign features posts related to sexual assault on official Marine Corps social media pages, including Facebook, Twitter, Instagram, YouTube, and Vine. FY16 posts include messages from leadership and public service announcements addressing male victims and retaliation. During FY16, HQMC SAPR posted 13 infographics, digital posters, or video public service announcements (PSAs) to official Marine Corps social media pages and reached over 3.3 million people.
- **Non-Commissioned Officer (NCO) Summits.** HQMC SAPR hosted two NCO Summits in FY16: one aboard Marine Corps Base (MCB) Camp Pendleton and one aboard MCB Camp Lejeune. The Summits were framed across five functional areas: myths and misconceptions, barriers to reporting, retaliation, suicide, and alcohol. The NCOs then formed working groups and developed Courses of Action (COAs) pertaining to each of these five areas. Across the two Summits, NCOs developed approximately 28 COAs that are being actioned by HQMC SAPR.
- **SAPR Fleet Engagements.** Fleet engagements foster face-to-face dialogue between HQMC SAPR personnel and Marines. During these engagements, HQMC SAPR personnel have the opportunity to update Marines on Marine Corps SAPR progress and receive feedback on initiatives that will resonate with the fleet.

- **SAPR Monthly Snapshot.** To inform the Marine Corps Total Force of reported incidents of sexual assault and provide Marines with awareness of sexual assault in the Corps, HQMC SAPR continued publication of the SAPR Monthly Snapshot publication in FY16. The snapshot is distributed via the Office of U. S. Marine Corps Communications in order to reach the largest number of Marines through Public Affairs Office (PAO) channels of information.
- **Sexual Assault Awareness and Prevention Month (SAAPM).** During FY16, the Marine Corps observed the 12th annual SAAPM with the theme “Eliminate Sexual Assault. Know Your Part. Do Your Part.” This theme emphasized that every Service member had a role in upholding our core values, regardless of grade or job specialty. Marine Corps participation in SAAPM included a variety of efforts, both Headquarters-level and within the fleet. HQMC SAPR initiatives include the following:
 - **Poster Contest.** HQMC SAPR hosted a Corps-wide poster contest in observance of SAAPM in FY16. The goal of this contest was to publicize positive Marine Corps SAPR efforts by both individual Marines and the Corps at large and to provide further incentives for Marines to participate in local SAPR prevention effort. The winning poster was recognized by the Commandant of the Marine Corps (CMC) and the Sergeant Major of the Marine Corps (SMMC) and displayed on official Marine Corps social media pages.
 - **Denim Day.** Manpower and Reserve Affairs (M&RA) observed Denim Day on 27 April 2016, the 15th year Denim Day was observed in the United States, which involved M&RA personnel wearing denim as a visible protest against myths that surround sexual assault.
 - **Increased Social Media Presence.** In April, HQMC SAPR posted to official Marine Corps social media every week highlighting the SAAPM theme. The four posts reached more than 1.8 million people and connected users to supportive services.
 - **Subject Matter Expert Panel.** On 21 April 2016, HQMC SAPR hosted a male victim SME panel covering outreach to male victims, advocacy, and the short- and long-term impact of sexual assault. Each SME was provided the opportunity to educate the audience on the aforementioned topic which was followed by a 90-minute question and answer session.
 - **SAAPM Toolkit.** In FY16, HQMC SAPR released a SAAPM toolkit that provided Sexual Assault Response Coordinators (SARCs), SAPR Victim Advocates (VAs), and leadership with engagement guidance.
- **Sexual Assault Response Coordinator (SARC) Advisory Committee (SAC).** Marine Forces (MARFOR) SARCs, other senior-level SARCs with a significant area of responsibility, and HQMC SAPR meet biannually to continually assess the SAPR Program and facilitate a collaborative approach to solutions.
- **Hip-Pocket Guides.** In FY16, HQMC SAPR began developing hip-pocket guides, which will be designed to facilitate communication with Marines on their role in preventing sexual assault.
- **“Join the Conversation” PME.** Inspired by the CMC message, “Protect What You’ve Earned,” this innovative PME was developed in FY16 and uses a video of

unscripted Marines discussing their role in preventing destructive behaviors, a dynamic educational video, interactive guided scenarios, and a leadership panel discussion to address destructive behaviors (hazing, sexual assault, sexual harassment, retaliation, and alcohol misuse). The pilot occurred at Camp Johnson, North Carolina, in November 2016.

- **SAPR Leadership Toolkit.** This revision to the Commanders Toolkit, which will be renamed the SAPR Leadership Toolkit, is designed to provide leaders at all levels with a wide range of educational resources on a variety of topics related to sexual assault, including but not limited to healthy relationships, alcohol misuse, hazing, and retaliation. Full implementation is expected mid FY17.
- **Measures of Effectiveness and Performance Study.** In FY16, the Marine Corps contracted RAND to conduct a study to examine measures of effectiveness and measures of performance for implementation into the Marine Corps. Implementing responsive, meaningful, and accurate measures of effectiveness and performance will help the SAPR Program ensure that existing programs and practices have the intended effect and outcomes for sexual assault survivors. The expected completion date is late FY17.
- **“Take a Stand” Bystander Intervention Training for NCOs Generation II.** The revision to this training will incorporate best practices in adult learning theory and instructional design, reduce the length from 3 hours to 90 minutes to be in line with typical annual training requirements, and create additional material for small-group discussions.

In addition to these efforts, the Marine Corps has made significant headway in integrating the SAPR Program with other related programs—such as Substance Abuse, Suicide Prevention, Embedded Preventative Behavioral Health Capability (EPBHC), and Military Equal Opportunity (sexual harassment and hazing)—to develop a holistic, sustainable prevention and response effort.

Authorizing Regulations and Instructions

HQMC SAPR is responsible for establishing policy; designing and implementing Corps-wide initiatives; and ensuring program compliance with Marine Corps, Department of Defense (DoD), Executive, and Legislative mandates. Table 1 lists program instructions relevant to the SAPR Program developed in FY16. Ultimately, SAPR is a Commander’s program, which means our leaders are responsible for executing this mission. All other entities—including our SARCs and SAPR VAs, chaplains, healthcare personnel, judge advocates, Victim-Witness Assistance Program (VWAP) personnel, and criminal investigators—support the Commander in providing quality victim services, timely and appropriate investigative and accountability measures, and effective prevention tools.

Table 1. Program Instructions Developed in FY16

Date	Reference	Title / Instruction
Dec 2015	MARADMIN 607/15	USMC Sexual Assault Prevention and Response Program Changes
June 2016	MARADMIN 285/16	Methods to Report Retaliation and Resolution Process
Jun 2016	MARADMIN 300/16	USMC FY16 Victim-Witness Assistance Program

SAPR Personnel

Marines across ranks have a critical role in responding to and preventing sexual assault, and our SAPR Program structure is designed to support their efforts daily, in both garrison and deployed environments. Our SAPR VAs provide their fellow Marines and eligible civilians with training and confidential victim services. Our installation and command SARCs oversee the SAPR VAs under their purview, ensuring an integrated response capability and accountability. Our MARFOR SARCs provide program implementation guidance within their area of responsibility and serve as conduits for information flow to and from HQMC SAPR.

Funding

The sustained increase in operational tempo and mandates, while successfully executed in FY15, revealed gaps in terms of needed compliance, personnel, quality assurance, research, and training. In response, in FY16, the HQMC SAPR Branch worked to enhance the quality of our advocacy, victim care, prevention, investigative, accountability, and assessment capabilities, in order to directly impact and improve mission readiness. In pursuit of our FY16 vision, HQMC SAPR identified several initiatives for the year, such as NCO SAPR summits, and quality assurance site visits. To effectively staff these initiatives, the HQMC SAPR Branch is composed of (4) Non-appropriated Fund (NAF)-5, (16) NAF-4, (1) NAF-3, (5) Overstaffed Uniform, (2) Overstaffed Reservists, and (1) General Schedule (GS)-13 employee. The overall FY16 budget represents an 11% increase from FY15.

1. LOE 1—Prevention—The objective of prevention is to “deliver consistent and effective prevention methods and programs.” Based on the 2014-2016 DoD Sexual Assault Prevention Strategy, implementation of prevention efforts across DoD should be spread across a collection of 10 program elements. To aid in assessing DoD-wide progress in operationalizing the Prevention Strategy, please provide responses connected back to these program elements.

1.1 Summarize your efforts to achieve the Prevention Endstate: “cultural imperatives of mutual respect and trust, professional values, and team commitment are reinforced to create an environment where sexual assault is not tolerated, condoned, or ignored.” Where appropriate, be specific in the types of measures your program uses, the number of Service members impacted and the approved way ahead for achieving the prevention endstate. (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), p. 2)

The Marine Corps continues toward sustainment by implementing prevention efforts across the social ecological model and ten program elements, as outlined in the Department of Defense (DoD) 2014-2016 Sexual Assault Prevention Strategy. Additionally, Headquarters Marine Corps (HQMC) Sexual Assault Prevention and Response (SAPR) works closely with Marine Corps leadership to ensure that all Marines are not only impacted by our prevention efforts but are also a part of the solution to prevent sexual assault across the Marine Corps. The below sections identify some, but not all, of the Marine Corps efforts to achieve a prevention endstate. When possible, the Marine Corps leverages efforts to address multiple program elements.

Individual

- **Non-Commissioned Officer (NCO) Summits.** HQMC SAPR hosted two NCO Summits in Fiscal Year 2016 (FY16): one aboard Marine Corps Base (MCB) Camp Pendleton and one aboard MCB Camp Lejeune. The Summits, attended by over 130 NCOs, were framed across five functional areas: myths and misconceptions, barriers to reporting, retaliation, suicide, and alcohol. The NCOs formed working groups and developed Courses of Action (COAs) pertaining to each of these five areas. Across the two Summits, NCOs developed approximately 28 unique COAs that are being acted upon by HQMC SAPR. Commanders were present at both summits, with NCOs at the two summits briefing approximately 20 Sergeant Majors and 15 Commanders.
- **SAPR Monthly Snapshot.** To inform the Marine Corps Total Force of reported incidents of sexual assault and provide Marines with awareness of sexual assault in the Corps, HQMC SAPR continued publication of the SAPR Monthly Snapshot publication in FY16.
- **Delayed Entry Program.** The Delayed Entry Program is a program run by Marine Corps Recruiting Depots for all prospective Marines who have signed up but have not yet departed for Boot Camp. All recruits undergo a two-hour ethics package course of instruction that introduces these young men and women to the Marine Corps ethos of honor, courage, and commitment, while addressing the Marine Corps position on sexual assault, harassment, hazing, and alcohol

abuse.

Relationships

- **Hip-Pocket Guides.** In FY16, HQMC SAPR began developing hip-pocket guides, which will be designed to facilitate communication with Marines on their role in preventing sexual assault.
- **Staff Sergeants Career Course, First Sergeants Course, Master Sergeants Symposium, and Commanders Course.** HQMC SAPR facilitated town hall discussions at these courses, addressing foundational SAPR components, prevention methods, Marine Corps statistics relating to sexual assault, and the DoD Retaliation Prevention and Response Strategy.
- **“Step Up” Bystander Intervention Training for Junior Marines.** This scenario-based training with video components teaches Marines practical peer-to-peer bystander intervention strategies and emphasizes that they have an inherent duty to protect each other from the crime of sexual assault.
- **“Take a Stand” Bystander Intervention Training for NCOs Generation II.** The revision to this training will incorporate best practices in adult learning theory and instructional design, reduce the length from 3 hours to 90 minutes to be in line with typical annual training requirements, and create additional material for small-group discussions.

Leaders At All Levels

- **Prevention and Response to the Sexual Assault of Military Men.** In FY16, HQMC SAPR made a concerted effort to outreach to male Service members to bring awareness to the issue, combat myths and misconceptions, address barriers to reporting, and link Marines to supportive services. Initiatives included, but were not limited to, identifying and reviewing research on male sexual assault; coordinating with external Subject Matter Experts (SMEs); infusing male-specific content into SAPR training; and an extensive communications strategy that focused on awareness, outreach, prevention, and supportive services.
- **“Join the Conversation” Professional Military Education (PME).** Inspired by the Commandant of the Marine Corps (CMC) message, “Protect What You’ve Earned,” this innovative PME was developed in FY16 and uses a video of unscripted Marines discussing their role in preventing destructive behaviors, an educational video, interactive guided scenarios, and a leadership panel discussion to address destructive behaviors (hazing, sexual assault, sexual harassment, retaliation, and alcohol misuse). The pilot occurred in November 2016 and consisted of four sessions with 50 Marines each. In 2017, HQMC SAPR will launch this PME formally at select Marine Corps installations.
- **HQMC SAPR Social Media Communications Strategy.** Launched in October 2014, the social media campaign features posts related to sexual assault on official Marine Corps social media pages, including Facebook, Twitter, Instagram, YouTube, and Vine. FY16 posts include messages from leadership and public service announcements addressing male victims and retaliation. During FY16, HQMC SAPR posted 13 infographics, digital posters, or video public service announcements (PSAs) to official Marine Corps social media

pages and reached over 3.3 million people. Though the social media communications strategy reaches a large audience, this effort serves to reinforce the message outlined in prevention initiatives promulgated across the fleet.

- **SAPR Leadership Toolkit.** This revision to the Commanders Toolkit, which will be renamed the SAPR Leadership Toolkit, is designed to provide leaders at all levels with a wide range of educational resources on a variety of topics related to sexual assault, including but not limited to healthy relationships, alcohol misuse, hazing, and retaliation. Full implementation is expected mid FY17.
- **“Lost Honor” Video.** Developed by the HQMC Judge Advocate Division (JAD), the “Lost Honor” video is a deterrence initiative that includes interviews with four Marines convicted of sexual assault, each recounting the various circumstances and decisions leading up to the incident.
- **Blotter.** Marine Corps installations publish a daily blotter report, which provides a snapshot of criminal activity of the previous 24-hour period or weekend. This publication serves as a medium for command notification of offenses and provides situational awareness for surrounding criminal activity that may affect command readiness.

Military Units

- **Embedded Preventive Behavioral Health Capability (EPBHC).** Established in January 2016, EPBHC embeds 61 civilian Behavioral Health personnel as special staff officers across all three Marine Expeditionary Forces (MEFs) and Marine Forces Reserve (MARFORRES). Prevention Directors are at the MEF, Prevention Analysts are at the Major Subordinate Command (MSC), and Prevention Specialists are at the Major Subordinate Element (MSE). These special staff officers provide insight, advice, assistance, and coordination of behavioral health prevention efforts. EPBHC staff collects metrics on their activities in six focus areas: 1) information dissemination, 2) training and education, 3) community-based processes, 4) providing positive alternative activities, 5) environmental change strategies, and 6) identifying unit-level problems and referral to services.
- **SAPR Fleet Engagements.** Fleet engagements foster face-to-face dialogue between HQMC SAPR personnel and Marines. During these engagements, HQMC SAPR personnel have the opportunity to update Marines on Marine Corps SAPR progress and receive feedback on prevention initiatives that will resonate with the fleet.
- **Inspector General of the Marine Corps (IGMC) Inspections.** HQMC SAPR provides Augment Inspectors to support successful execution of IGMC-mandated inspections of the SAPR Program.
- **Tactical-Level Readiness and Safety Forums.** Across the Corps, information about SAPR is also monitored and used locally. Combined with the data presented in the SAPR Monthly Snapshot, this information is used to inform Commanders of the health and fitness of the force in regards to sexual assaults by identifying trends and gaps in SAPR services. As a result, this data drives safety briefs and awareness/prevention campaigns and is used to tailor fleet trainings, new-join trainings, check-in/check-out procedures, and PMEs.

Installations

- **Sexual Assault Awareness and Prevention Month (SAAPM).** During FY16, the Marine Corps observed the 12th annual SAAPM with the theme “Eliminate Sexual Assault. Know Your Part. Do Your Part.” This theme emphasized that every Service member had a role in upholding our core values, regardless of grade or job specialty. Marine Corps participation in SAAPM included a variety of efforts, both Headquarters-level and within the fleet. HQMC SAPR initiatives include the following:
 - **Poster Contest.** HQMC SAPR hosted a Corps-wide poster contest in observance of SAAPM in FY16. The goal of this contest was to publicize positive Marine Corps SAPR efforts by both individual Marines and the Corps at large and to provide further incentives for Marines to participate in local SAPR prevention effort. The winning poster was recognized by the CMC and the Sergeant Major of the Marine Corps (SMMC) and displayed on official Marine Corps social media pages.
 - **Denim Day.** Manpower and Reserve Affairs (M&RA) observed Denim Day on 27 April 2016, the 15th year Denim Day was observed in the United States, which involved M&RA personnel wearing denim as a visible protest against myths that surround sexual assault. Participation in this worldwide prevention education campaign allowed M&RA to demonstrate solidarity with HQMC SAPR and SAAPM efforts.
 - **Increased Social Media Presence.** In April, HQMC SAPR posted to official Marine Corps social media every week highlighting the SAAPM theme. The four posts reached more than 1.8 million people and connected users to supportive services.
 - **Subject Matter Expert Panel.** On 21 April 2016, HQMC SAPR hosted a male victim SME panel covering outreach to male victims, advocacy, and the short- and long-term impact of sexual assault. Each SME was provided the opportunity to educate the audience on the aforementioned topic which was followed by a 90-minute question and answer session.
 - **SAAPM Toolkit.** In FY16, HQMC SAPR released a SAAPM toolkit that provided SARCs, SAPR VAs, and leadership with engagement guidance.
- **Sexual Assault Response Coordinator (SARC) Advisory Committee (SAC).** Marine Forces (MARFOR) SARCs, other senior-level SARCs with a significant area of responsibility, and HQMC SAPR meet biannually to continually assess the SAPR Program and facilitate a collaborative approach to solutions.

DoD Communities

- **Publication of Court-Martial Results.** The Marine Corps continues to publish the results of special and general courts-martial, including courts-martial involving sexual assault offenses. A link to the courts-martial results is provided on the Marine Corps homepage at www.marines.mil (under “News,” then “Messages”). These courts-martial results serve as a general deterrent to other Marines. The published results include a description of the offense and the punishment.
- **DoD SAPR Prevention Roundtables.** HQMC SAPR participates in quarterly

prevention roundtables that serve as a forum for the Military Departments and National Guard Bureau to come together to address DoD sexual assault prevention efforts and requirements.

- **Participation in the National Sexual Assault Conference.** HQMC SAPR personnel served as a panelist for the session entitled “Inside the Armed Services: Sexual Assault Prevention and Response as a National Priority” at the National Sexual Assault Conference in Washington, D.C.

Society

- **Coordination with External SMEs.** The Marine Corps collaborates with civilian experts and organizations to incorporate research-informed practices into its SAPR initiatives. FY16 examples include a Male Victim SME Panel and a PME focused on college students’ perceptions of consent and their understanding of coercion and sexual violence.

HQMC SAPR tailors prevention efforts either to a specific rank or for the Marine Total Force. SAPR personnel and Marine leadership in the fleet are key contributors to the fight against sexual assault. Engaged leadership at all levels enhances confidence in the chain of command. Instrumental in the prevention of sexual assault, leaders are responsible for the climate of their unit and the welfare of their subordinates by establishing a climate of safety and trust so that members feel more comfortable coming forward with issues and reporting incidents.

1.2 Communications and Engagement: Update your progress in aligning prevention communications and training based on the type of message, messenger, and delivery methodology to specific demographic audiences across your Military Service (e.g., basic training, first-term, mid-level, and senior leader). (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Communications), p. 11)

The Marine Corps communications and engagement endstate raises awareness among Marines, Commanders, members of Congress, potential recruits and their influencers, advocacy groups, and Veteran Service Organizations of Marine Corps efforts to reduce, with the goal to eliminate, incidents of sexual assault. To that end, HQMC SAPR takes a multilevel approach to prevention, employing a communication strategy to successfully align training and education by encompassing the following: social media outreach, fleet engagements, and the SAPR Monthly Snapshot.

Training and Education

HQMC SAPR outlines detailed plans for prevention communication and training, ensuring products reflect the best available research on any given topic. The prevention message is embedded throughout SAPR training and education components, which employ different facilitators and delivery methods. Those training packages have been and will continue to be updated with materials that provide role-specific guidance to Marines at each level of leadership. SAPR training is facilitated by credentialed and appointed SAPR personnel through use of the adult learning theory, which includes critical thinking components, case scenarios, data, and small-group discussions. Adult learning theory guides the development of all training packages. This ensures that training engages

learners, draws on the diversity of learners' experiences, and provides learners with opportunities to practice and receive feedback.

During FY16, development began on hip-pocket guides and education for the PME schoolhouses, which will be designed to facilitate communication with Marines on their role in preventing sexual assault. Hip-pocket guides are critical thinking aids—case scenarios that provide key takeaways and resources as well as encourage discussion of intervention techniques. Education is focused on case scenarios that challenge Marines to identify their roles in the prevention of sexual assault, understand where to receive assistance, and empower their peers to engage in prevention.

Social Media Communications Strategy

In FY16, HQMC SAPR continued its social media campaign, which features monthly posts related to sexual assault on official Marine Corps social media pages, including Facebook, Twitter, Instagram, YouTube, and Vine. As part of a holistic approach to outreach, the Marine Corps works to reach every audience demographic. Social media increases awareness for Marines at all levels and provides the opportunity to highlight topics of interest throughout the year.

By increasing awareness and knowledge via these popular communications platforms, HQMC SAPR simultaneously extends our message of prevention to large numbers of Marines and members of the public. On average, individual posts in FY16 reached more than 243,000 people each, with total views for all posts of more than 3.2 million people. In addition, our social media campaign includes an engagement strategy that enables us to proactively communicate with the public in real-time. HQMC SAPR monitors each post for eight hours after it goes live to link users to supportive services, if requested, to address misconceptions, correct misinformation, and answer questions.

HQMC SAPR implemented the May 2014 and December 2014 Secretary of Defense Memorandums by developing gender-responsive programs, services, and outreach for male Marine victims of sexual assault to encourage greater victim reporting and access to supportive services within this specific demographic. Because Marines who are ages 18-24 and in ranks E1-E4 are in the highest at-risk demographics for sexual assault, social media targeting male Marine victims was aimed at this population.

This campaign also emphasized the importance of engaged leadership, command climate, and the Marine Corps core values. These posts were image-based (infographics and digital posters) and video-based and reached upwards of 1.4 million people while connecting over 1,000 people to supportive services, such as the DoD Safe Helpline. Figure 1 is an infographic posted to Facebook as part of the social media campaign.

Figure 1. Male Victim Infographic

Fleet Engagements/Roadshows

Through FY16, HQMC SAPR continued its fleet engagements to foster face-to-face meetings between HQMC SAPR personnel and Marines. These trips served as a model of engaged leadership and emphasized every Marine's inherent duty to step up and step in to prevent sexual assault. Via these engagements, HQMC SAPR personnel have the opportunity to update Marines on Marine Corps SAPR progress, so they understand both the importance of prevention and the ongoing relevance of the issue. Table 2 lists the FY16 HQMC SAPR fleet engagements.

Table 2. HQMC SAPR FY16 Fleet Engagements

4 May	II Marine Expeditionary Force (MEF), Marine Corps Special Operations Command (MARSOC), Camp Lejeune, NC
1-3 June	Marine Corps Recruit Depot (MCRD), Parris Island, SC
15 June	Marine Forces Reserve (MARFORRES), New Orleans, LA
1-5 August	Marine Forces Command (MARFORCOM), Camp Allen, Norfolk, VA
11-12 July	Marine Corps Air Station (MCAS) Miramar, CA
12-13 July	Marine Corps Base (MCB) Camp Pendleton, CA

Monthly Snapshot

To inform the Marine Corps Total Force of reported incidents of sexual assault and provide Marines with awareness of sexual assault in the Corps, HQMC SAPR continued publication of the SAPR Monthly Snapshot publication in FY16. The Snapshot is published each month and is distributed via the Office of U. S. Marine Corps Communications in order to reach the largest number of Marines through Public Affairs Office (PAO) channels of information. It is also disseminated to all Marine Corps General Officers, Senior Executive Service personnel, and SARCs with the request that they share

each Snapshot with their Commanding Generals, Commanders, Sergeants Major, SAPR Victim Advocates (VAs), and other target audiences. Figure 2 shows an example of a SAPR Monthly Snapshot released in FY16.

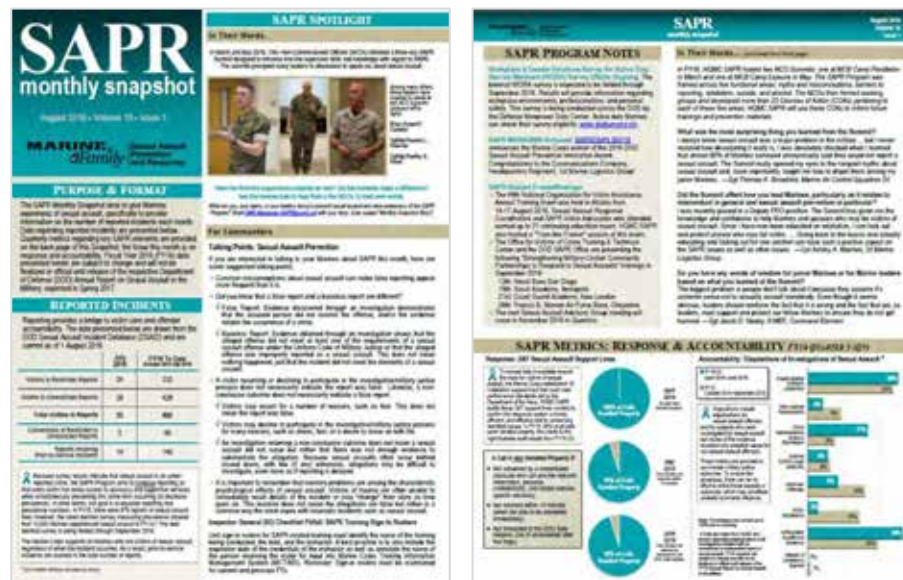

Figure 2. SAPR Monthly Snapshot

The Monthly Snapshot shares data related to SAPR progress Marine Corps-wide and provides a means to monitor, measure, and educate about sexual assault. Each issue lists the total number of reported incidents of sexual assault for the previous month and the fiscal year to date. The Monthly Snapshot also breaks down the reporting metrics to detail the number of Unrestricted and Restricted Reports, conversions of Restricted Reports to Unrestricted Reports, and reports for incidents that occurred prior to Service. In addition, the following analyses are published once per quarter, with the goal of tracking and comparing progress across quarters and to the previous fiscal year:

- Quality of sexual assault services (results of the Installation 24/7 Sexual Assault Support Line audits) and competence in holding offenders appropriately accountable (dispositions of investigations of sexual assault).
- High-level demographic information of those who reported (rank, gender, age, and service duration), the duty status of the offender (civilian or military), where the reported sexual assaults occurred, and the number of reported sexual assaults that involved alcohol.
- Command climate metrics, including perceptions of barriers to reporting, of whether retaliation is likely, and of leadership and unit support for SAPR.

The Monthly Snapshot also features articles regarding SAPR services and resources (e.g., the SARC Dashboard), overall SAPR Program initiatives (e.g., working groups and annual training), and detailed descriptions of survey and annual report findings as they become available (e.g., prevalence trends and the gap between prevalence and reporting).

1.3 Communications and Engagement: Update your efforts to share and foster

practices across all prevention stakeholders (suicide prevention, sexual assault prevention, alcohol reduction, etc.). Detail any effort to incorporate shared messaging (e.g., bystander intervention efforts supporting suicide and sexual assault prevention). (DoD Sexual Assault Prevention and Response Strategic Plan (26 Jan 15), LOE 4, #5, p. 7)

HQMC SAPR is committed to collaborative efforts with other stakeholders dedicated to preventing destructive behaviors. In FY16, the Marine Corps continued to collaborate with those stakeholders to incorporate research-informed practices into its SAPR initiatives and practices.

Join the Conversation PME

The Join the Conversation PME was designed to help Marines identify destructive behaviors such as hazing, sexual harassment, sexual assault, retaliation, and alcohol misuse. To properly identify these behaviors, HQMC SAPR worked closely with representatives from the Department of the Navy (DoN) Sexual Assault Prevention and Response Office (SAPRO), HQMC Military Equal Opportunity (MEO) and the HQMC Behavioral Health Substance Abuse Program (SAP). This collaboration resulted in a comprehensive PME that informs Marines how to identify destructive behaviors in themselves and others, identify the warning signs of these behaviors, understand the impact to mission readiness, and employ effective intervention techniques. The PME was developed in FY16 to be implemented in FY17 across other programs. The pilot occurred at Camp Johnson, North Carolina, in November 2016.

Additional Training Efforts

In addition to the collaborative efforts for the Join the Conversation PME, the HQMC SAPR Implementation Section facilitated trainings for, but not limited to, Victim Witness Assistance Program (VWAP) personnel, Wounded Warrior Battalion Recovery Care Coordinators, Inspector Generals, and Senior Enlisted Spouses. The foundation of these programs was to highlight the similar prevention methods and goals of the programs. Additional elements of the training focused on how collaboration within each program will aid accomplishment of the program goals; promote SAPR awareness, education, and prevention methods; and most importantly provide unified overarching support for victims.

HQMC Collaboration

“Dear Drill Instructor” Public Service Announcement

HQMC SAPR created a PSA entitled “Dear Drill Instructor” that posted to official Marine Corps social media on 18 February 2016 and reached over 123,000 people. The “Dear Drill Instructor” PSA focused on prevention messaging, highlighting how bystander intervention can help protect any Marine who may find himself or herself in a high-risk situation. The PSA featured a NCO writing an email to his former Drill Instructor (DI), thanking the DI for teaching him what it means to be a Marine, both on and off the battlefield. As a result of the DI’s influence, the NCO writes that he stepped up to protect a fellow Marine from a high-risk situation. Pictures of boot camp, graduation, and Marines in action are shown as the email is being written to emphasize Marine Corps pride, values, and comradery. In accordance with CMC Fragmentary Order (FRAGO) 01/2016, which underscores the correlation between destructive behaviors and their impact on mission

readiness, this PSA purposefully takes a generic approach by not defining the dangerous situation encountered. This approach also serves to make the PSA universally relevant and appealing, as well as provide an avenue to both SAPR and Behavioral Health supportive services.

“Eliminate Sexual Assault” Public Service Announcement

In support of SAAPM, HQMC SAPR collaborated with EPBHC to develop a powerful message in line with the DOD theme for the April 2016 SAAPM: “Eliminate Sexual Assault: Know Your Part. Do Your Part.” This PSA showed Marines across a variety of ranks, Military Occupational Specialties (MOSs), and environments (in garrison, deployed, overseas, on base, in the desert, in mess halls, in barracks, in the workplace, etc.) holding up hand-written signs that depict what they believe their part is in eliminating sexual assault. Posted to official Marine Corps social media pages on 4 April 2016, this post reached over 1.6 million people.

Suicide Prevention Public Service Announcement

A collaboration between HQMC Behavioral Health and HQMC SAPR, this PSA seeks to raise awareness of risk factors related to suicidal ideations, attempts, and deaths by suicide. In addition, this product underscores that peer intervention is a primary prevention technique and that unit cohesion and support are protective factors against suicide and sexual assault. Anticipated release on official Marine Corps social media (Facebook, Twitter, and Instagram) is January 2017.

Prevention Synch Meeting

Every month, every employee who holds a prevention billet within HQMC Marine and Family Programs (MF) attends a prevention synch meeting. The purpose of this meeting is to discuss prevention initiatives across MF, inform future prevention efforts, and highlight possible areas for collaboration.

Local Collaboration Efforts

At the local levels, SARCs share and foster practices across all prevention stakeholders in and around their area of responsibility to increase interoperability and exchange information regarding promising practices, leading to increased victim care and prevention capabilities. The below list provides examples of local collaboration efforts.

- **5th Marine Expeditionary Brigade (MEB).** The 5th MEB uniformed Command SARC has a specialized area of responsibility while stationed outside the continental US and on a Sister-Service installation. The 5th MEB SARC collaborates with the command Substance Abuse Control Officer (SACO) to support the needs of the command’s victims.
- **Marine Corps Special Operations Command (MARSOC).** The MARSOC SARC ensures that SAPR VAs appointed to the Command receive the most recent and concise training on suicide prevention and SAPR related topics. Several of the SAPR VAs attended Applied Suicide Intervention Skills Training (ASSIST), a two-day in-depth course on suicide prevention and intervention.
- **I Marine Expeditionary Force (MEF).** I MEF employs the “Strengthening and Sustaining a Culture of Readiness Campaign,” which incorporates decision-making

matrices that share prevention messaging related to domestic violence, suicide, and drinking.

1.4 Peer-to-Peer Mentorship and Support: Describe efforts to support peer-to-peer programs for junior service members that promote healthy relationships focused at the battalion/squadron/or Military Service equivalent levels. Provide, where appropriate, metrics used to assess efforts and intended outcomes of the efforts. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Peer-to-Peer Mentorship), p. 10)

In FY16, the Marine Corps supported peer-to-peer mentorship and support efforts for junior Service members, promoting healthy relationships and emphasizing the role of Marine leaders in preventing sexual assault.

NCO Summits

HQMC SAPR hosted two SAPR NCO Summits, supported by HQMC SAPR Policy and Program Development, HQMC Behavior Health personnel from Substance Abuse and Suicide Prevention, Marine Corps SARCs, a Navy SAPR VA, and Marine Corps SAPR VAs (uniformed and civilian). These summits focused on feedback from NCOs on current prevention, policy, and trainings regarding SAPR and operational planning efforts for future prevention methods and policy updates in the areas of suicide, alcohol misuse, barriers to reporting, myths and misconceptions, and retaliation.

- From 21-23 March 2016, 62 NCOs from I MEF, MARFORRES, and III MEF attended a Summit aboard MCB Camp Pendleton.
- From 3-5 May 2016, 65 NCOs from II MEF, MARFFORES, Marine Forces Southern Command, and Marine Forces Central Command attended the Summit aboard MCB Camp Lejeune.

The NCOs formed working groups and developed COAs pertaining to each of these five areas. The COAs developed by the NCOs are informing future training and prevention materials.

SAPR Leadership Toolkit

Though Commanders are the “center of gravity” with regard to the prevention of sexual assault, HQMC SAPR places an emphasis on leaders at all levels in combatting sexual assault across the Marine Corps. As a result, HQMC SAPR began revising the Commanders Toolkit in FY16, renamed the SAPR Leadership Toolkit. Consisting of informational documents, links, and other resources, the toolkit will help leaders at all levels create positive command climates and foster healthy discourse regarding sexual assault within their specific microclimates. The SAPR Leadership Toolkit will provide leaders at all levels with a wide range of educational resources on a variety of topics related to sexual assault, including but not limited to healthy relationships, alcohol misuse, hazing, and retaliation. Full implementation of the toolkit is expected mid FY17.

Peer-to-Peer Mentorship Efforts

The Marine Corps promotes healthy relationships via peer-to-peer mentorship. Examples are listed below.

- **MARSOC.** The MARSOC Command infused a more informal, conversational

approach into the required annual SAPR training for Marines ranked E1-E3. Service members report to the barracks (or similar location) in civilian attire, and the instructor also wears civilian attire to remove rank from the room. During this required brief, the group discusses healthy relationships, professional behavior, and available supportive resources. The briefs are conducted in a conversational, candid manner; the groups are small and conducive to this training style. Service members share information and ask questions, which creates learning opportunities for all present.

- **Marine Forces Pacific (MARFORPAC).** MARFORPAC promotes a command climate of mutual respect between peers, partners, family, and friends to enhance a healthy command climate and prevent sexual assault. Peer mentors help reinforcing our core military values and professional standards.
 - Peer to peer mentorship is further enhanced through the Marine Corps Mentorship Program (Marine Corps Order [MCO] 1500.58). Every Marine has a mentor, most likely the next senior in his or her chain of command, who is the primary counselor, guide, and teacher to the Marines under his or her direct care. A Marine mentor will mentor the Marines directly junior in the chain of command once they reach the rank of Corporal.
- **I MEF.** The Strengthening and Sustaining a Culture of Readiness campaign provided guided discussions and targeted training in an effort to strengthen the culture of readiness and mitigate adverse events such as substance abuse, relationship problems, intimate partner abuse, and suicide. Intended outcome efficacy is measured through post-training survey questionnaire. The Chaplains Religious Enrichment Development Operation (CREDO) Hope and Healing Retreat in June 2016 afforded victims the opportunity for personal growth and healing by participating in individual and group therapy. As a result, some I MEF participants have formed lasting friendships and are providing emotional support to each other.
- **1st Marine Division (MARDIV).** The 1st MARDIV supports and promotes the “Protect What You’ve Earned” Campaign Blue Diamond Letter, which outlines peer-to-peer and leader-to-led interactions and education to include PME and weekly informal dialogue at the small unit level, Division New Join Program, 1st Marine Regimental Leadership Development Program (RLDP).

1.5 Leadership Involvement: Update improvements to local Military Service SAPR programs (on both prevention and response) based on the feedback to local commanders from command climate assessments. (DoDI 6495.02, Sexual Assault Prevention and Response (SAPR) Program Procedures (7 Jul 15), Encl 5, para 9f)

Command Climate Assessments

The Marine Corps uses two command climate surveys to assess perceptions of leadership and unit support as they relate to SAPR. The Defense Equal Opportunity Management Institute (DEOMI) Organizational Climate Survey (DEOCS) is a DoD-wide survey that measures organizational climate dimensions. This survey is conducted within 90 days after a Commander assumes command and at least annually thereafter. The DEOMI Survey has included questions that measure the climate associated with SAPR since March 2012.

Updates to Local SAPR Programs

Local SAPR programs use the results from command climate surveys in a variety of ways, including employing prevention techniques, addressing perceptions in the command, and adjusting education and training schedules. Leadership works closely with the local SARC to review the survey results and respond accordingly to address any perceived issues of interest to Service members. SARCs work in conjunction with local leadership to ensure continued SAPR support and involvement at the briefs in the Marine Corps Mentorship Program. Increased communication, collaboration, and coordination with the Installation SARC ensures timely implementation and execution of activities associated with the SAPR program within the unit. Commanding officer policy statements are completed and posted within 60 days of assuming Command to include messages specific to the results of the climate survey: reporting options, alcohol use, and values that support preventing a climate that could be conducive to sexual assault or retaliation.

1.6 Deterrence: Update your progress in developing and/or enhancing sexual assault deterrence measures and/or messaging and outline how they are provided to Service members at the installation (or Service equivalent) level (e.g., Crime Reduction Program, Military Criminal Investigation Organization (MCIO) Outreach Initiatives, etc.). Provide summary of Service member feedback or metrics to demonstrate progress. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Deterrence), p. 11)

The Marine Corps employs a broad array of deterrence measures and messaging. At the installation level, physical security enhancements and surveillance measures (e.g., cameras, patrols, barracks monitors) offer some of the first lines of deterrence. Other measures, including the blotter, “Lost Honor” video, court-martial results, and crime reduction campaigns, are described below.

Courts-Martial Results Published

The Marine Corps continues to publish the results of special and general courts-martial, including courts-martial involving sexual assault offenses. A link to the courts-martial results is provided on the Marine Corps homepage at www.marines.mil (Under “News,” then “Messages”). These courts-martial results can be a general deterrent to other Marines. The published results include a description of the offense and the punishment. Since August 2015, the results also report the effect of the pretrial agreement, if any, on the sentence adjudged by the court martial.

Blotter

Marine Corps installations publish a daily blotter report, which provides a snapshot of criminal activity of the previous 24-hour period or weekend. This publication serves as a medium for command notification of offenses and provides situational awareness for surrounding criminal activity that may affect command readiness. The blotter is provided to battalion or squadron commanders (or higher) with the intent to identify command personnel involved in criminal incidents and accidents, enable victim/witness services, and increase situational awareness of criminal activity occurring on or around an installation.

Crime Reduction Campaigns

The Naval Criminal Investigative Service (NCIS) conducts quarterly Crime Reduction Campaigns aimed at increasing awareness within the commands of criminal activity that impact the Marine Corps mission. Two of these quarterly campaigns are focused on family and sexual violence related investigations. The campaign educates the force on the nature of the offenses and encourages Service members to report offenses. Local NCIS offices provide briefings to commands within their respective areas of responsibility in support of this campaign.

“Lost Honor” Video

Developed by the HQMC JAD, the “Lost Honor” video is a deterrence initiative that includes interviews with four Marines convicted of sexual assault, each recounting the various circumstances and decisions leading up to the incident.

1.7 Community Involvement: Describe your efforts to engage with military community leaders and organizations (e.g., Family Advocacy Programs, ROTC Programs, Chaplains, Healthcare providers, and Single Soldier Programs) to develop collaborative internal Military Service programs. Describe how you addressed challenges. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Community Involvement), p. 11 / SecDef Memo (1 May 14), Develop Collaborative Forum for Sexual Assault Methods, p. 2)

The Marine Corps is committed to eliminating all destructive behaviors and crimes that harm Marines and undermine unit readiness and morale. To that end, HQMC SAPR continued in FY16 to work with military community leaders and organizations to develop collaborative education and outreach programs. Our efforts aim to eliminate destructive behaviors through evidence-based education, deterrence, and marketing, as well as to ensure Service members are aware of sexual assault support resources.

Sexual Assault Advisory Group (SAAG)

To mitigate challenges and systematic concerns in the Marine Corps, HQMC SAPR facilitates the Sexual Assault Advisory Group (SAAG). The SAAG consists of representatives from HQMC Behavioral Health, JAD, IGM, Law Enforcement, NCIS, Training and Education Command (TECOM), HQMC SAPR, Bureau of Medicine (BUMED), and any other programs deemed necessary. The SAAG meets at least quarterly to review the results of the Installation Sexual Assault Review Teams (SART), initiatives, and/or concerns that require higher headquarters leadership.

Collaboration across Marine and Family Programs (MF)

HQMC SAPR collaborates regularly with MF entities, such as HQMC SAP, HQMC Suicide Prevention, and EPBHC. In addition, HQMC SAPR collaborates with the MEO Program. Collaboration is essential in order to decentralize programs because commanders must balance annual training requirements with mission readiness. Therefore, during FY16, an Operational Planning Team occurred with relevant stakeholders across MF with the goal to develop a standardized communication plan with regard to prevention. By completing this plan, all programs across MF would be communicating in the same language, thus promulgating the same prevention message.

Sexual Assault Awareness and Prevention Month (SAAPM)

During FY16, the Marine Corps observed the 12th annual SAAPM with the theme “Eliminate Sexual Assault. Know Your Part. Do Your Part.” This theme emphasized that every Service member had a role in upholding our core values, regardless of grade or job specialty. Marine Corps participation in SAAPM included a variety of efforts, both Headquarters-level and within the fleet. HQMC SAPR initiatives include a poster contest, Denim Day, increased social media presence, SME panel, and SAAPM toolkit.

Education and Training

Town Hall Discussions

In another community involvement effort, HQMC SAPR Program Development, Implementation, and the Senior Enlisted Advisor facilitated town hall discussions with military community leaders at Career Course, 1st Sergeant Course, and Master Sergeant Course. These town halls consisted of foundational SAPR components, prevention methods, Marine Corps statistics relating to sexual assault, and the DoD Retaliation Prevention and Response Strategy. The town halls created dialogue between community leaders and HQMC SAPR in areas of retaliation prevention, empowering leaders at all levels, and updating leaders in the current SAPR initiatives.

NCO Summits

HQMC SAPR additionally hosted two SAPR NCO Summits, supported by HQMC SAPR Policy and Program Development, HQMC Behavior Health personnel from Substance Abuse and Suicide Prevention, Marine Corps SARCs, a Navy SAPR VA, and Marine Corps SAPR VAs (uniformed and civilian). These summits focused on feedback from NCOs on current prevention, policy, and trainings regarding SAPR and operational planning efforts for future prevention methods and policy updates in the areas of suicide, alcohol misuse, barriers to reporting, myths and misconceptions, and retaliation.

- From 21-23 March 2016, 62 NCOs from I MEF, MARFORRES, and III MEF attended a Summit aboard MCB Camp Pendleton.
- From 3-5 May 2016, 65 NCOs from II MEF, MARFFORES, Marine Forces Southern Command, and Marine Forces Central Command attended the Summit aboard MCB Camp Lejeune.

The NCOs formed working groups and developed COAs pertaining to each of these five areas. The COAs developed by the NCOs are informing future training and prevention materials.

Marine Awareness and Prevention Integrated Training (MAPIT)

The Marine Corps developed an evidence-informed program called Marine Awareness and Prevention Integrated Training (MAPIT), which consists of tailored curricula for Entry Level Training, Continuing Education, and annual sustainment training at the unit level. Every Marine receives annual sustainment training, referred to as Unit Marine Awareness and Prevention Integrated Training (UMAPIT), which raises awareness about common risk factors and warning signs associated with a range of behavioral issues, including sexual assault. By identifying common risk factors for destructive behaviors as well as common protective factors, Marines are equipped with the tools to not only prevent themselves from engaging in high-risk behaviors but also the ability to intervene if their

peers or the Marines that they lead are engaging in destructive behaviors.

Prime for Life (PFL)

The Marine Corps also uses the Prime for Life (PFL) program, which is an early intervention, evidence-based education program. PFL provides Marines with the necessary skills to self-assess high-risk behaviors to subsequently avoid engaging in destructive behaviors, such as sexual assault. Marine Corps program evaluations indicate PFL significantly alters attitudes, increases awareness of risk, increases abstinence, and reduces high-risk drinking. PFL is posted on the National Registry of Evidence-based Programs and Practices, a service of the Substance Abuse and Mental Health Services Administration. In FY16, 12,404 Marines participated in PFL, for a total of 22,825 Marines since its inception in April 2012.

Local Collaboration

The below list identifies some examples of local efforts to engage with military community leaders and organizations.

- Installation Family Advocacy Program (FAP) VA and SAPR VAs collaborate to host outreach events and activities, maintain updated lists of community resources, identify problems or issues related to service delivery, identify trends in service delivery, identify solutions to meet community gaps/needs related to victims, host training, and understand the differences in programs and services for intrafamilial and non-familial victims of family violence.
- The MARSOC SARC actively works with the MARSOC Preservation of the Force and Families, interacting regularly with the Chaplain, Family Readiness Officers, Safety Officer, Medical Officer, and other allied professionals. The group meets regularly and discusses program initiatives, collaborative efforts, and systemic issues. Additionally the MARSOC SARC engages with the SARCs from sister Services that also fall under U.S. Special Operations Command. The SARCs meet on a quarterly basis to discuss any trends, program initiatives, collaborative efforts (to include training), and any common systemic issues. A SARC from each of the Special Operational Force components is represented.
- The 5th MEB Command Chaplain participates in each SAPR event, session, or training. The Marine Forces Central (MARCENT) SARC is part of MacDill Air Force Base Team SAPR, and is part of the team to identify and coordinate changes to the support and services provided base-wide.
- During SAAPM 2016, Marine Forces Command (MARFORCOM) SAPR collaborated with the Single Marine Program, Semper Fit and Marine Corps Community Services (MCCS) Headquarters for the 2016 Camp Allen/MARFORCOM SAAPM Commemorative 5K, Health and Safety Fair. This event has been executed for the last five years and has always been a joint effort between SAPR, Semper Fit, MCCS (Hampton Roads Admin, Drug Demand Reduction), and other command programs such as Safety, Chaplain, and Health Services.
- The MARFORPAC SARC attends quarterly Commander Pacific Fleet, Flag Executive Steering Committee for the SAPR and Sailor Resiliency Task Force to synchronize SAPR activity; assess SAPR program effectiveness; and provide

information on the number of Restricted/Unrestricted Reports, basic incident demographics, and installation SAPR initiatives. Regions also report continuing efforts to monitor 24/7 on-call response rates, timely and accurate Defense Sexual Assault Incident Database (DSAID) entry, and monitoring of all sexual assaults at installations in an effort to develop trends.

- Marine Corps Recruit Depot (MCRD) Parris Island, South Carolina, implemented the Circle of 6 smartphone application, which is aimed at preventing sexual violence by quickly connecting users in potentially dangerous situations to six friends and safety resources.
- The 1st Transportation Support Battalion, 1st Marine Logistics Group (MLG) in Camp Pendleton, California, executed numerous training events that exposed the Marines and Sailors of the Battalion to the trauma that sexual assault imposes on a unit that is preparing for combat.

1.8 Community Involvement: Describe your efforts to engage with non-DoD civilian community leaders and organizations both locally and nationally (e.g., Safer Bars Alliance and Association of Women for Action and Research) to develop collaborative community relationships and programs. Describe how you addressed challenges. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5, (Community Involvement), p. 11 / SecDef Memo (1 May 14), Develop Collaborative Forum for Sexual Assault Prevention Methods, p. 2)

To be fully equipped in the fight against sexual assault, the Marine Corps leverages non-DoD civilian community leaders and organizations in its efforts to prevent sexual assault. In FY16, we partnered with academia and organizations across a spectrum of fields in order to best leverage knowledge from experts in the community to inform practices and improve training.

Coordination with External Subject Matter Experts (SMEs)

In FY16, the Marine Corps continued to collaborate with civilian experts and organizations to incorporate research-informed practices into its SAPR initiatives and practices.

On 21 April 2016, the Marine Corps hosted a Male Victim SME Panel that focused on effective outreach, advocacy, and the short- and long-term impact of sexual assault for males. This three-hour session allowed for the SMEs to discuss their areas of expertise and concluded with a question and answer session. HQMC SAPR and the following offices attended the symposium: HQMC Behavioral Health Branch; HQMC JAD, to include Victims Legal Counsel (VLC); local SARCs and SAPR VAs; DoN SAPR; Commander, Naval Installations Command (CNIC) SAPR, and Navy SAPR.

HQMC SAPR hosted a PME on in September 2016, where Dr. Jena Nicols-Curtis (State University of New York, Cortland) briefed her research on college students' perceptions of consent and its relationship to sexual violence. The 90-minute brief focused on the ways in which college students interpret their own experiences with consent, coercion, and sexual violence; how students' own behavior and the legal and administrative definitions of consent and sexual violence differ; and, based on the research and our understanding, how we can reduce sexual violence. HQMC SAPR invitees included personnel from HQMC Behavioral Health (Substance Abuse Program, Family Advocacy Program, Suicide Prevention), SARCs and SAPR VAs (uniformed and civilian), commanders/leaders, and

sister Service personnel (Department of Defense, Department of the Navy, Army). In FY17, HQMC plans to host similar events quarterly and invite local organizations to enhance our commitment to community-wide relationships and partnerships.

Local Collaboration Efforts

Collaboration with non-DoD civilian community leaders and organizations occurs at the local level as well. The below items are select examples of that collaboration.

- Marines from the 1st MLG attended an interactive presentation given by Date Safe Project founder, Mike Domitrz. As part of the presentation, 1st MLG Marines wrote and performed a skit, titled “Just another Night,” which addressed the role of alcohol use and abuse in sexual assault.
- The MARFORPAC SARC is a member of the Oahu, Hawaii Joint-Military Community Action Team (CAT) that meets quarterly to plan trainings, webinars, activities, and events with local civilian organizations and sister Services. The focus of the Military CAT is to strengthen joint efforts and collaboration with our civilian partners and sister Services. The Joint-Military CAT participates in the semi-annual Department of Health's Annual Rape Prevention and Education Sexual Violence Prevention meetings as well as training and webinars with the Hawaii State Coalition against Domestic Violence, Hawaii Psychological Association, US Army Health Clinic - Schofield Barracks, US Army Pacific (USARPAC) Sisters in Arms, and Crime Victim Compensation Commission.
- The Honolulu City Council and Honolulu Mayor Kirk Caldwell held a joint-military Service, police department, and local nonprofit organization recognition and proclamation ceremony in April 2016 at the Honolulu City Council chambers. The event declared the month of April as Sexual Assault Awareness Month and recognized the tireless individual and collaborative efforts of the military branches of Service, local law enforcement, and civil sector CATs. Mayor Caldwell talked about community, collaboration of resources, training, commitment, and teamwork throughout the presentation.
- The 1st MARDIV continued collaboration with Palomar Pomerado Health Forensic Health Services; Women’s Resource Center in Oceanside, California; and National Family Justice Center Alliance in San Diego, California.

1.9 Incentives to Promote Prevention: Other than the DoD Exceptional SARC and Prevention Innovation Awards, describe your efforts to promote and encourage installation leadership recognition of Service member driven prevention efforts. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Incentives to Promote Prevention), p. 12)

The Marine Corps recognizes that, in the battle to prevent sexual assault, Marines across all ranks must both understand and do their part. Without everyone’s efforts across the entire Marine Corps, our goal of preventing sexual assault cannot be accomplished. As a result, the Marine Corps has taken steps to recognize the contributions and support of those Marines who have shown a commitment to preventing sexual assault.

HQMC SAPR produces a SAPR Monthly Snapshot in which SAPR programs or personnel throughout the fleet can be recognized for their exceptional work. Recognition could be for innovative prevention methods, outstanding inspections results, superior trainings, or

numerous other achievements. Commanders are encouraged to provide their SAPR leadership accomplishments.

Commanders are encouraged to recognize their SAPR VAs and SARCs through military awards, unit specific recognition, or other avenues to highlight the importance of a job well done, the dedication of the personnel while executing a collateral duty, and ensure that the SAPR personnel are identified in a positive light for the command.

SAAPM Poster Contest

In order to demonstrate CMC and Assistant CMC (ACMC) support for the SAPR program and to emphasize that it is the job of all Marines to eradicate sexual assault within the Corps, HQMC SAPR hosted a Corps-wide poster contest in observance of SAAPM. The goal of this poster contest was to publicize positive Marine Corps SAPR efforts by both individual Marines and the Corps at large and to provide further incentives for Marines to participate in local SAPR prevention effort. The top contestants received recognition from the CMC for the poster contest, and the winning poster was displayed on official Marine Corps social media pages.

Local Recognition Efforts

Frequently featured in the SAPR Monthly Snapshot, local recognition efforts cover a variety of areas. The below items are some examples of local recognition.

- Initiated in FY15, the MARSOC SAPR VA of the Year Award continued in FY16. Presented annually during SAAPM, this award encourages uniformed SAPR VAs to put forth maximum efforts in leadership and representing the SAPR program.
- Marine Corps Air Ground Combat Center (MCAGCC) Twenty-nine Palms awarded a trophy to the winner of the annual three-mile “Amazing SAPR Race” in April 2016. Various briefs held during this event helped educate participants about sexual assault.

1.10 Harm Reduction: Describe the metrics being used to assess the effectiveness of Military Service-specific efforts aimed to reduce the impact of high-risk behaviors and personal vulnerabilities. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Harm Reduction), p. 12)

The Marine Corps aims to eliminate destructive behaviors and crimes that harm Marines and undercut unit readiness and morale. To that end, the Marine Corps is diligent in its efforts to reduce the impact of high-risk behaviors and personal vulnerabilities. The Marine Corps continued its efforts to update policy and implement programs aimed to reduce high-risk behaviors, including the Alcohol Screening Program (ASP), PFL, and EPBHC. The Marine Corps assesses the effectiveness of these programs across many metrics.

- The **ASP** uses random Breathalyzer testing of Marines and sailors to screen for underage drinking and alcohol use while in a duty status. HQMC Behavioral Health tracks the numbers tested, numbers of positive results, and numbers of referrals made because of the results.
- **PFL** is an early intervention, evidence-based prevention and education program that provides Marines with the ability to self-assess high-risk behaviors with the

intent to influence changes in attitudes, beliefs, and behaviors related to alcohol use. In addition to tracking the number of Marines who complete PFL, HQMC Behavioral Health analyzes the results of completed rating forms designed to assess learning and satisfaction with the course materials and instruction.

- **EPBHC** civilian behavioral health personnel are embedded as special staff officers and provide insight, advice, assistance, and coordination of behavioral health prevention efforts. EPBHC staff collects output metrics on their activities in six focus areas: 1) information dissemination, 2) training and education, 3) community-based processes, 4) providing positive alternative activities, 5) environmental change strategies, and 6) identifying unit-level problems and referral to services. The metrics are based off the strategies of prevention outlined by the Substance Abuse and Mental Health Services Administration.

Research and Studies

HQMC SAPR also monitors sexual assault reports and analyzes the information across a wide range of data points, including alcohol involvement. In FY16, alcohol continues to be involved in about half of all reports of sexual assault. As a result, the Marine Corps is focusing efforts to improve safety and reduce the risks posed by alcohol, especially in relation to sexual assault prevention as outlined in this annual report.

In FY16, the SAPR Program completed a pre-post training assessment of junior Marines during the roll-out of “Step Up” Bystander Intervention Training for Junior Marines. The objective of this study was to assess the effectiveness of “Step Up” in 1) transferring knowledge about sexual assault and the SAPR program to junior Marines, 2) providing junior Marines information about bystander intervention techniques, and 3) increasing junior Marines’ willingness to intervene to prevent a sexual assault. Via pre-post tests, the Marine Corps was able to assess the impact of training: identification of bystander intervention techniques increased 12.4%, while overall SAPR knowledge remained high across both assessments. HQMC SAPR will continue assessing the effectiveness of trainings through pre-post training assessments.

The Join the Conversation PME was assessed using focus groups after the pilot event in November 2016. These focus groups explored how well the educational materials and leadership messages resonated with Marines to provide feedback to the development and implementation process. The focus groups also explored how well participants believed the PME would influence other Marines to examine their role in preventing high-risk behaviors.

1.11 Education and Training: Describe efforts to address sexual assault prevention in your organization by educating Service members on healthy relationships. Describe any training, particularly training that focuses on changing skills, attitudes, and behaviors, to encourage Service members to take part in healthy relationships. Describe any increases in complexity or depth of training on healthy relationships over the course of a Service member’s career. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 5 (Education and Training), p. 12)

The Marine Corps continues to develop its SAPR training continuum, ensuring that SAPR training grows with Marines’ rank and responsibility, giving them the appropriate tools to make healthy, effective decisions, while defining criminal behavior. SAPR training begins

for prospective Marines and extends into the later stages of a Marine's career. Figure 3 illustrates the full SAPR training and education continuum in development for enlisted Marines and Officers.

Figure 3. SAPR Training Continuum

In FY16, HQMC SAPR began strategically infusing the above training continuum with instruction that focuses on skills, attitudes, and behaviors associated with healthy relationships. Additionally, the HQMC SAPR Research Section is currently examining evidence-based programs that emphasize healthy relationships to infuse existing research into current practices. This research informs the development and implementation of SAPR training and products, including “Take a Stand” Bystander Intervention Training for NCOs and hip-pocket guides. PME developed in FY16 focus on case scenarios and challenge Marines to identify their roles in the preventing sexual assault, identifying where to receive assistance, and recognizing the best methods to engage their peers.

SAPR trainings have been and will continue to be updated with materials that provide role-specific guidance to reach Marines at their level of leadership. SAPR training is facilitated by credentialed and appointed SAPR personnel and includes critical thinking components, case scenarios, and data points. The adult learning theory model guides the development of all trainings. SAPR education in the schoolhouse is an initiative developed during FY16 that focuses on peer-to-peer education. These educational components will be facilitated by Marine instructors and are focused specifically on Marines at each level of military training and leadership.

The current training environment is geared to changing adverse skills, attitudes, and behaviors, with the goal of encouraging Marines to take an active role in preventing sexual

assault. Part of this prevention effort is helping Marines understand healthy relationships and the positive impact they have on the Marine Corps as a whole. The following sections detail some, but not all, of the Marine Corps training programs that are designed to change adverse skills, attitudes, and behaviors.

Values-Based Training (VBT) at the Delayed Entry Program

The Delayed Entry Program is a program run by Marine Corps Recruiting Command for all prospective Marines who have signed up but have not yet departed for Boot Camp. All recruits undergo a two-hour ethics package course of instruction that introduces these young men and women to the Marine Corps ethos of honor, courage, and commitment, while addressing the Marine Corps position on sexual assault, harassment, hazing, and alcohol abuse. Although this Values-Based Training (VBT) has been infused with specific tie-ins to SAPR and sexual harassment, the program was devised to establish a broader perspective on ethical behavior, which is a key to the prevention of sexual assault. The VBT training curriculum was developed based on the need to ensure a proactive and comprehensive sexual assault prevention mindset with the goal to enable military readiness and prevent sexual assault within our ranks. Group discussions are used to foster an environment where each individual is valued and promote healthy relationships, active bystander intervention, and core values to establish mutual respect at the grass roots level. Improvement of the program will be realized through sharing of best practices on the unit level during regular curriculum evaluation and leadership forums. In addition, upon initial enlistment, recruits view the “Conduct Awareness” video, which describes inappropriate behavior and how to report misconduct and crimes.

“Step Up” Bystander Intervention Training for Junior Marines

For our junior Marines—those in the ranks of Private, Private First Class, and Lance Corporal—the Marine Corps released in July 2014 (and continued in FY16) a scenario-based training with video components called “Step Up,” which teaches Marines practical peer-to-peer bystander intervention strategies and emphasizes that they have an inherent duty to protect each other from the crime of sexual assault. This curriculum educates Marines that both males and females can be victims of sexual assault and outlines red flags that indicate a sexual assault may occur, including acts of hazing and intoxication.

“Take A Stand” Bystander Intervention Training for Non-Commissioned Officers

NCOs in the ranks of Corporal and Sergeant receive “Take A Stand” training, which teaches bystander intervention and appeals to their sense of leadership. Originally released in October 2012, “Take A Stand” was revised to incorporate best practices in adult learning theory and instructional design, to reduce the length from 3 hours to 90 minutes to be in line with typical annual training requirements, and to create additional material for small-group discussions. The “Take A Stand” Generation II curriculum includes skill-building scenarios focused on developing the skills expected of leaders. Additionally, instructors will receive eight Ethical Discussion Groups (EDGs) that can supplement “Take a Stand” training. Themes of the EDGs include the following:

- Bystander intervention
- Male victims
- How to teach bystander intervention

- First-line supervisor responsibilities
- Identifying and addressing retaliation
- How to report outside the chain of command
- Countering sexual assault myths and misinformation

The role-play exercises incorporate the risk of certain behaviors. For example, one exercise features a Service member who was physically and sexually assaulted in an incident that began as hazing. Participants learn that sexual assaults against men may exhibit different patterns than those against women, including being more likely to be part of hazing incidents.

Tactical-Level Readiness and Safety Forums

Across the Corps, program information about SAPR is also monitored and used locally. Combined with the incident data presented in the SAPR Monthly Snapshot, this information is used to inform Commanders of the health and fitness of the force in regards to sexual assaults by identifying trends and gaps in SAPR services. These data assist Commanders and SAPR Program staff in evaluating the types of cases being reported and what preventative measures would be the most impactful. As a result, this evaluation drives safety briefs and awareness/prevention campaigns and is used to tailor fleet trainings, new-join trainings, check-in/check-out procedures, EDGs and other small-group trainings, and PMEs. With assistance from their SARCs, commands monitor the trends relevant to their culture, climate, and needs, which may include the number of Unrestricted Reports, the number of expedited transfers, annual training data, and several other metrics.

Commands use this information—which is gathered from existing data sources including SAPR 8-Day Briefs, Command Climate Surveys, and Operations Event/Incident Report (OPREP-3) Serious Incident Reports (SIRs)—to glean insights into how sexual assaults may impact safety and readiness.

SARC Contributions

HQMC SAPR invited SARCs from around the fleet to assist in developing a more comprehensive SAPR education continuum and training. SARCs supported training initiatives by developing scenarios for hip pockets guides, education for PMEs, and prevention methods, as well as identifying topics that Marines frequently ask question about. This collaboration was invaluable and allowed SARCs to fully immerse themselves into the training development process during their time at HQMC SAPR. HQMC SAPR will continue to use SARCs in the development of SAPR education and training.

1.12 Program Metrics: Describe the metrics used to assess your Military Service Sexual Assault Prevention program. Where appropriate, align the metrics with the 2014-2016 DoD Prevention Strategy elements. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 6 (Prevention Metrics, Assessment, and Research), p. 13)

HQMC SAPR used multiple methods to assess the Marine Corps sexual assault prevention efforts in FY16.

Surveys

The DEOCS provides a snapshot of the SAPR climate and relates Marine *perceptions* about topics like publicity of SAPR information, unit reporting climate, barriers to reporting a sexual assault, and bystander intervention. This survey provides direct and indirect insights into the progress of several prevention efforts, including leadership involvement, peer-to-peer mentorship, accountability, organizational support, deterrence, and harm reduction. The HQMC SAPR Research Section examines this data in light of results from the biennial Workplace and Gender Relations Survey for Active Duty Members (WGRA). The results of the 2016 WGRA are expected in Spring 2017.

Social Media Assessment

Communication, education, and training prevention efforts are monitored both formally and informally. Our social media campaign includes an engagement strategy that enables us to proactively communicate with the public and Marines in real-time. Since beginning the campaign in October 2014, social media posts have reached over 6.1 million people, indicating a successful outreach effort. Additionally, each social media post contains a “call to action”; in other words, it contains a link to a supportive service relevant to that social media post. During FY16, users were connected to either the DoD Safe Helpline or the Inspector General of the Marine Corps website, depending on post content. The Digital Engagement Marines at the Office of United States Marine Corps Communications track the data for each social media post and are able to provide the metrics of how many people were connected to supportive resources as a result of the post.

Measures of Effectiveness and Performance Study

In FY16, a study to examine measures of effectiveness for implementation into the Marine Corps was submitted. The objectives of the study are to (a) identify measures of effectiveness and performance that have been used to assess SAPR programs and practices and (b) propose which measures the Marine Corps SAPR Program should implement to more accurately determine the impact of the program's efforts beyond decreases in prevalence. As a result of this submission, Marine Corps Combat Development Command (MCCDC) Operations Analysis Directorate (OAD) contracted RAND in late FY16 to conduct the study. The expected completion date is late FY17. Implementing responsive, meaningful, and accurate measures of effectiveness and performance will help SAPR ensure that existing programs and practices have the intended effect and outcomes for sexual assault survivors. Incorporating measures of performance and measures of effectiveness into our trainings allows the Marine Corps to assess the delivery of these trainings and determine if the SAPR programs/trainings are meeting desired goals. These measures are important for internal improvement of the SAPR Program.

1.13 Prevention Allocation of Time: As a result of ongoing SAPR related surveys, describe your approved initiatives to assist SAPR professionals improve prevention training. (DoD 2014-2016 Sexual Assault Prevention Strategy (30 Apr 14), para 6 (Prevention Metrics, Assessment, and Research), p. 13)

According to the 2015 QuickCompass of Sexual Assault Prevention and Response-Related Responders (QSAPR) Survey, only 62% of certified SARCs and SAPR VAs stated that they had adequate time to address both victim support and prevention

activities (50% of SARCs and 63% of SAPR VAs).

Leadership Toolkit

In order to help SARCs and SAPR VAs conduct prevention activities across their area of responsibility, HQMC SAPR is revamping the Commanders Toolkit, to be renamed the SAPR Leadership Toolkit, which will contain prevention materials tailored to a Marine's rank and responsibility. SARCs and SAPR VAs will have access to this toolkit and thus will have pre-approved prevention materials that can be tailored to the need of their area of responsibility.

DOD Prevention Roundtable

Every quarter, HQMC SAPR participates in the DoD Prevention Roundtable that serves as a forum for the Military Departments and National Guard Bureau to come together to address DOD sexual assault prevention efforts and requirements. During FY16, a specific roundtable focused on discussing challenges in prevention program implementation, include Service member training, and identified approaches to address them.

Furthermore, the Prevention Roundtable addresses the institutionalization of prevention programs, training, and initiatives, designed to ensure a lasting culture in the Department focused on sexual assault prevention and response.

Train-the-Trainer Initiative

HQMC SAPR commenced a multi-faceted Train-the-Trainer initiative in FY16 that focuses on improving prevention training that is given to the fleet. In August of 2016, HQMC SAPR hosted a Train-the-Trainer skill building session in Atlanta, GA for all of the SARCs and SAPR VAs who attended the 2016 National Organization for Victim Assistance (NOVA) conference. The skill building session focused on understanding the difference between facilitation and lecture; identifying common public speaking errors and subsequently providing positive replacement behaviors; and skills for providing constructive feedback to SAPR personnel within the SARC's area of responsibility. Future plans include quarterly webinars in FY17.

MARFOR SARC Billets

To ensure effective implementation of the SAPR Program, HQMC SAPR established MARFOR SARC billets, who provide guidance to the SARCs in their AORs. In addition, these MARFOR SARCs and other senior-level SARCS participate in the HQMC SAPR SAC, which meets biannually to continually assess the SAPR Program and facilitate a collaborative approach to solutions. A brief occurred at the February 2016 SAC that discussed the role of the EPBHC across the Marine Corps and discussed methods with which SAPR personnel could leverage EPBHC resources for prevention initiatives within their area of responsibility. The Marine Corps EPBHC places civilian behavioral health personnel in the active duty Operating Forces (OPFOR) and MARFORRES to provide operational force commanders internal behavioral health expertise to assist with prevention efforts and assist in the implementation of MEF-based strategic prevention plans. By ensuring that both EPBHC and SAPR personnel work together within their areas of responsibility, prevention initiatives are streamlined to address all destructive behaviors and ensure that efforts are not duplicative.

1.14 Future Efforts: Describe your future plans for delivering consistent and effective prevention methods and programs, including how these efforts will help your Military Service strategies, enable resourcing, and make progress in your overall SAPR program.

In FY17, the Marine Corps will continue to hone and expand its prevention efforts while continuing to use the prevention elements discussed herein. Specifically in FY17, HQMC SAPR plans to act on the initiatives listed below.

Individual

- **SAPR Monthly Snapshot.** To inform the Marine Corps Total Force of reported incidents of sexual assault and provide Marines with awareness of sexual assault in the Corps, HQMC SAPR will continue publication of the SAPR Monthly Snapshot publication in FY17.

Relationships

- **Hip-Pocket Guides.** In FY16, HQMC SAPR began developing hip-pocket guides, which will be designed to facilitate communication with Marines on their role in preventing sexual assault.
- **“Take a Stand” Bystander Intervention Training for NCOs Generation II.** The revision to this training will incorporate best practices in adult learning theory and instructional design, reduce the length from 3 hours to 90 minutes to be in line with typical annual training requirements, and create additional material for small-group discussions. Implementation is expected in FY17.

Leaders At All Levels

- **SAPR Leadership Toolkit.** This revision to the Commanders Toolkit, which will be renamed the SAPR Leadership Toolkit, is designed to provide leaders at all levels with a wide range of educational resources on a variety of topics related to sexual assault, including but not limited to healthy relationships, alcohol misuse, hazing, and retaliation. Full implementation is expected mid FY17.
- **HQMC SAPR Social Media Communications Strategy.** Launched in October 2014, the social media campaign featuring posts related to sexual assault on official Marine Corps social media pages, including Facebook, Twitter, Instagram, YouTube, and Vine will continue in FY17.
- **Train-the-Trainer Initiative.** HQMC SAPR will continue its multi-faceted Train-the-Trainer initiative in FY17 that focuses on improving prevention training that is given to the fleet. Future plans include quarterly webinars.
- **“Join the Conversation” PME.** Inspired by the CMC message, “Protect What You’ve Earned,” this innovative PME was developed in FY16 and uses a video of unscripted Marines discussing their role in preventing destructive behaviors, a dynamic educational video, interactive guided scenarios, and a leadership panel discussion to address destructive behaviors (hazing, sexual assault, sexual harassment, retaliation, and alcohol misuse). This PME will be promulgated to specific Marine Corps locations in FY17.

Military Units

- **SAPR VA Training Revision.** To maintain Marine Corps SAPR personnel at the highest level of effectiveness, the initial training in SAPR victim advocacy is slated for revision and implementation in FY17.
- **SARC Training Revision.** HQMC SAPR will begin revising SARC training in FY16, working with MARFOR SARCs to ensure feedback from the fleet is incorporated in the development process. Implementation is expected in FY17.
- **Infusing SAPR into PME for Enlisted Marines and Officers.** PMEs developed in FY16 that focus on case scenarios and challenge Marines to identify their roles in the prevention of sexual assault, identifying where to receive assistance, and recognizing the best methods to engage their peers will be implemented in FY17.
- **SAPR Fleet Engagements/Roadshows.** Fleet engagements foster face-to-face dialogue between HQMC SAPR personnel and Marines. During these engagements, HQMC SAPR personnel will have the opportunity to update Marines on Marine Corps SAPR progress and receive feedback on prevention initiatives that will resonate with the fleet.

Installations

- **Sexual Assault Awareness and Prevention Month (SAAPM).** During FY17, the Marine Corps will observe the 13th annual SAAPM with the theme “Protecting Our People Protects Our Mission.” This theme offers numerous opportunities to deliver messages that relate to both the individual and unit level. Each Service member, regardless of grade, can encourage behaviors that foster a climate of dignity and respect, and in doing so, help ensure our readiness to complete the Department’s mission. Anticipated HQMC SAPR plans include, but are not limited to:
 - **Poster Contest.** HQMC SAPR will host its second annual Corps-wide poster contest in observance of SAAPM in FY17. The goal of this contest will be to publicize positive Marine Corps SAPR efforts by both individual Marines and the Corps at large and to provide further incentives for Marines to participate in local SAPR prevention effort.
 - **Denim Day.** M&RA will observe its 2nd annual Denim Day on 26 April 2016, the 16th year Denim Day is observed in the United States. Participation in this worldwide prevention education campaign allows M&RA to demonstrate solidarity with HQMC SAPR and SAAPM efforts.
 - **Increased Social Media Presence.** In April 2017, HQMC SAPR will post to official Marine Corps social media every week highlighting the SAAPM theme.
- **Sexual Assault Response Coordinator (SARC) Advisory Committee (SAC).** MARFOR SARCs, other senior-level SARCs with a significant area of responsibility, and HQMC SAPR personnel will continue to meet biannually to continually assess the SAPR Program and facilitate a collaborative approach to solutions.
- **SARC Newsletter.** In FY17, HQMC SAPR will begin publishing a newsletter intended to highlight information about the latest issues, training, and resources for SARCs. The newsletter will be released bimonthly.

DoD Communities

- **HQMC Collaboration.** Throughout FY17, HQMC SAPR will collaborate with both internal and external entities to create prevention materials that will resonate with Marines and reach a large audience. Future collaboration plans include, but are not limited to: a suicide prevention/SAPR PSA highlighting the shared protective and risk factors; an alcohol/SAPR PSA focused on the importance of bystander intervention; collaboration with DOD SAPRO to create a Service-wide SAAPM message; and collaboration with HQMC Equal Opportunity.
- **Publication of Court-Martial Results.** The Marine Corps continues to publish the results of special and general courts-martial, including courts-martial involving sexual assault offenses. A link to the courts-martial results is provided on the Marine Corps homepage at www.marines.mil (Under “News,” then “Messages”). These courts-martial results serve as a general deterrent to other Marines. The published results include a description of the offense; the punishment; and the effect of the pretrial agreement, if any, on the sentence.
- **DoD SAPR Prevention Roundtables.** HQMC SAPR will continue to participate in quarterly prevention roundtables that serve as a forum for the Military Departments and National Guard Bureau to come together to address DOD sexual assault prevention efforts and requirements.
- **Participation in the DoD Prevention Innovation Award.** The Marine Corps in FY17 will continue its participation in the DoD Prevention Innovation Award.

Civilian Experts and Organizations

- **Coordination with External Subject Matter Experts (SMEs).** The Marine Corps will continue to collaborate with civilian experts and organizations to incorporate research-informed practices into its SAPR initiatives.

Train-the-trainer initiatives executed by HQMC SAPR with specialized trainers provide SAPR personnel additional training resources for effective training facilitation. Those initiatives will continue throughout FY17 to include webinars and quarterly events by HQMC SAPR. To ensure that trainings are assessed for impact, we are currently developing pre-post test assessments for the revised Take A Stand training. Such assessments will ensure training materials effectively provide delivery of information about sexual assault throughout our trainings. HQMC SAPR anticipates approval for these assessments and implementation to occur in FY17. The program will also incorporate measures of performance and measures of effectiveness into our trainings to assess the delivery of these trainings and determine if the trainings are meeting desired goals. These measures are important for internal improvement of the program.

The Join the Conversation PME was assessed using focus groups after the pilot event in November 2016. These focus groups explored how well the educational materials and leadership messages resonated with Marines to provide feedback to the development and implementation process. The focus groups also explored how well participants believed the PME would influence other Marines to examine their role in preventing high-risk behaviors.

The FY17 RAND study to identify measures of effectiveness and performance will help identify progress in the overall SAPR program. While program success is largely viewed in terms of an increase in reporting and a decrease in prevalence rates, identifying the
